(Associated Press.) LONDON, June 23.— King Edward and Queen Alexandra gave a grand dinner party tonight at Buckingham Palace to seventy royal personages

who practically represented the sov-ereigns of all the monarchies of the

world. The list of their majestles guests was headed by the Czarewiich of Rus-sla, who arrived in London this even-ing and included an imposing array of princes and princesses, and all the members of the British royal family. Buckingham Palace was beautifully decorated and the bands of the grem-adler and Coldstream Guards dis-coursed throughout the evening. The dinner was followed by a brilliant re-ception which was attended by the members of the suites of all the for-eign potentates now in London.

LONDON, June 23.-A full and strictly private rehearsal of the coro-nation ceremonies to be held in West-minster Abbey took place there this afternoon, in which everybody, with the exception of the royal personages and the participants in the musical and religious features of the functions, rehearsed their respective duties. The Archbishop of Canterbury and the Lord Chancellor were among those who were drilled in their parts under the superintendency of the Duke of Norfolk, the earl marsbal. The re-hearsal lasted for two hours and after it was over the musical service for the coronation was rehearsed in full in the church house adjoining the abbey.

much harm has been done by colonial sympathizers with the movement in London in pressing their views so sturdly in advance. While home rule he says is being advocated for Ireland, and even Sootland, subordinate parlia-ments could not be offered to self gov-erning colonies. Newfoundland might accept, New Zealand perhaps would be doubtrul, but with Canada and Au-stralia it would be impossible. India pays one third the cost of the army and must be consulted. Canada, he added, might be willing if bought by trade arrangements, but this would in-ocrease the cost of living in Britain. It is useless to consider the question when Canada and Australia are unwill-ing to diminish the present sovereign Seddon, the prime minister of New Zealand, complained that an attempt had ben made to prejudice the posi-tion of the premiers before they ar-rived in Eingland. He said the col-onies had no desire to raise the fiscal question. They wished to bind the Empire together, not to disrupt it. Why could they not help the mother country with her colonies, he taked, by following the example of foreign nations in subsidizing the steamers which carried their goods ? Such ac-tion, he said, would not interfere with the fiscal relationship.

### NOVA SCOTIA IN LONDON.

HALIFAX, June 23.-A despatch from London says that Agent General and Mrs. Howard held a reception at the Nova Scotia government agency, Pall Mall, on Saturday evening, when upwards of 150 Nova Scotians and their friends attended to meet the premier of the province and Mrs. Mutray. The function was of great brilliancy and interest, and was highly appreciated by those present. A feature of the evening was the artistic and extensive illumination of the premises, installed for the coronation celebrations, which attracted vast crowds that thronged the street till a late hour. A Money Grant Voted Towards Support of the Hespital in Wood-stock-Scott Act Enforcement Not Paying Expenses-An Old Tiff Between the Town and the County.

WOODSTOCK, June 11 .- The county council met in semi-annual session thi morning, Warden W. S. Saunders in the chair. The councillors were all present but Coun. Lamont of Aberdeen, who is seriously ill at his home in West Glassville, and Coun. Brown of Northampton. During the winter one seat was vacated by the death of Coun. Wm. Speer of Benton, who represented the parish of Woodstock. His place was filled by F. Byron Bull, who was elected about two weeks ago Coun. Brown was absent by reason of the death of his uncle, David Brown. Before taking up routine business Warden Saunders referred in suitable terms to the death of Coun. Speer. He terms to the death of Coun. Speer. He spoke of his efficiency as a councillor, and referred to the election of Coun. Bull to fill the vacancy. He said that the bill ordered last session to put the town of Woodstock in a position sim-ilar to that of the parishes with regard to the collection of bad taxes was pre-pared and taken in charge by Mr. Ap-pleby On the representation of Mr. pleby. On the representation of Mr. Appleby and on finding that the town was much opposed to the bill, it was decided to allow it to remain as it was, until a town committee consulted with the council. The town would agree to pay a certain sum every year A committee was before the cou this morning from the new hospital organization. This would be a county hospital, and it was thought the coun-cil should, like the town, make a suitable contribution.

The representation from the hos-pital, including Ven Archdeacon Neales, Dr. Hand and George E. Bate-man, was introduced, and Archdeacon Neales addressed the board. He entered into a brief explanation of th steps which had led to the starting o steps which had led to the starting of the hospital. About \$3,500 was needed to start the hospital, and this amount was secured by various means. There was nearly \$1,000 in cash, a property valued at some \$500 had been given by a well known citizen. A subscrip-tion list represented a goodly sum and with other sources the cost in starting the hospital was nearly provided for. It was necessary that some \$2,000 should be guaranteed annually for the support of the hospital, and with the grant by the government, the grant by the town council and private guar-antees, it was thought that if the coun-ty council voted \$400 a year, the pro-jectors would feel assured of suc-cess. The hospital will be able to take care of some 12 patients, and care and

cess. The hospital will be able to take care of some 12 patients, and care an attendance will be free to those wh are unable to pay. It was asked that the county make a donation of \$400 s year, the same amount that Charlott county donated for a similar purpose. Dr. Hand said that hospitals hav become a necessity for the carrying o of his profession. To perform prope surgery the hospital was necessary to the doctor, as modern improvement were necessary in all professions

trades and crafts. He spoke stron of the use of trained nurses and th great value they were in preservin human life. We have now pledged between \$2,600 and \$2,700 and alread on hand nearly \$1,000 in cash. Th house we have could in an emergence take care of 18 or 20 patients. The committee have its board for five years. The estimated expenses of being recalled. maintaining this institution is \$2,000 year. We may add \$500 from the ex-penditure. If the county gave \$400 a year the necessary annual contribution would be made up. While those who were able would be expected to pay, any patient who was unable to pay would get treatment free. The hos-pital staff would operate once, but, of course, if a patient wished his own doctor either from the town or count-ty, that was provided for. Certain members of this committee have information that they cannot give to the public, which makes them sure that the hospital will be a certainty in the future if once started.

#### CALF FEEDING.

By F. W. Hodson, Dominion Live Stock Commissioner.

a number of years I have had most of my cows drop their calves in the late fall or early winter," says Duncan C. Anderson of Rugby, Ontarlo, "and I have come to the conclu-sion that there is a decided gain in so doing. The milking season is length-ened; cows coming in fresh before Christmas, by liberal feeding in win-ter, milk nearly as well in the carly ter, milk nearly as well in the early summer when the pastures are at their est, as cows that come in fresh in March. We milk ten months, giving the cows two months rest. They are rested in the early fall, when the pas-tures are at their poorest. At that time the grass is generally dry parch-ed and burned up. As we raise on the skim milk one calf to each cow, it is ery important that the cows should have two months' rest out of the twelve. When th cows are milked to within a couple of weeks of calving they get no chance to recuperate. The calf generally comes with a weakened itality, and does not make as rapid or satisfactory a growth in the six months as when the cow has had a air period for rest and recuperation.

fair period for rest and recuperation. After a long term of experience I have come to the conclusion, considering the increased price of winter butter, the long milking season, resting when the grass is poor, that in winter dairy-ing cows give at least 25 per cent.

young calves, especially those under three months. It has a tendency to disturb the normal action of the stomach and set up scours. Whenever a calf is scouring reduce the quantity of skim milk. Be careful to have the pail from which the calves are fed as clean as possible. With skim milk at the right temperature, fed out of pails as clean as your milking pails, in not too large quantities, and fed regularly, there will be but little trouble from calves scouring.

kept in during the day time and turned out in the evening. Thus they will avoid the hot sun and the files. Whole or chopped oats should be fed. A mixture of whole and chopped oats, about a cupful twice a day for an ordinary sized calf on good pasture, will be sufficient. For fall feeding, until the roots are harvested, there is nothing equal to green corn run through the cutting box and mixed with some

chopped oats. The main point in calf feeding is to never allow them to stop growing, and in the case of beef animals keep them in good flesh. In feeding calves, as in every system of feeding, the extremes of over and under feeding are to be avoided. Continuous, regular, liberal feeding always brings the most profit and the best practical results.

Coun. Gallagher asked if a man met with an accident, say in this county, how would be get to the hospital, on whose permit.

Dr. Hand said a line from a doctor would be all that would be necessar. He referred to a case where th parish of Richmond paid some \$60 for an amputation and treatment of a patient who was a pauper. In such a case treatment at the hospital would be free. He explained that the tem-porary board of directors was selected by a public meeting. The average cost of a bed is from \$150 to \$200 a year. This does not mean a bed oc-cupied all the time, but the average bed.

Geo. E. Balmain said that if the county gave an annual grant the town would have to pay their proportion. He had personal experience of the Vic-toria hospital in Fredericton, having typhoid. It was then a splendid in-stitution, and had grown since. The treatment he got there was better had been incorrectly informed. than he could possibly have secured at home. It was urged that this was than he could possibly have secured at home. It was urged that this was a scheme to help the doctors. It would help the doctors because it would give them an opportunity to work to advantage.

To Coun. Meredit-It is altogether likely that the town would exempt the

hospital from taxes.
 Coun. Kearney did not believe the hospital would justify him in voting for an appropriation. Every one in the county had a home and they could be attended there by their own physicians and surgeons. He thought we would be discriminating against our pwn doctors in the councillors instead of reaching a grant give their annual indemnity.
 Coun. Behan, seconded by Coun. Skinser, moved that the request of the committee be granted.

Coun. Williams did not believe that serve the hearty co-operation of the citizens at large. it would be any use to appoint a com mittee. The bill should go through.

The warden said he did not stop the bill. It had its first reading. Mr. Ap-pleby came to him and he acted as warden in agreeing to the withdrawal of the bill. Coun. Carvell-Did you not advise Mr. Appleby to withdraw the bill? Warden-Yes, I did, but I only did.

ections by the town to this bill? The warden-There are representa-tives from the town council present who can explain. The town wishes to

pay a certain amount each year. Coun. Merrithew-If the town wa justly assessed it was just that they should pay the taxes.

Coun. Carvell-I want to state have nothing against the town. I find fault for the warden in not letting the bill go through. If he had done so ft would have been better for the county. The warden let the town pull him. The warden-I did not let the town pull me, for the town did not want to pull me.

Coun. Gallagher-The doctor was or the other side. The bill would have passed. There was a caucus in Mr. Appleby's office, and finally he was instructed not to let the bill go through. He understood that one person at that caucus said that the town did not ow the county a single cent. The warden was one of the parties that helped

and winters much better than a spring calf, which is just weaned in the fall and goes into winter. When a calf is dropped it is not good

practice to allow the cow to fondle and lick her offspring. When the separation does take place there is al-ways a disturbance in the cow stable; the mothers get excited, and some nervous cows remain so for the best part of a week. Better results are obtained by removing the new born calf

without allowing the mother to lick it. Rub it dry with a wisp of straw, put it into a roomy, dry, warm pen, free from frosts and drafts, and give it no milk for the first twelve hours. When

a calf is hungry it is not nearly so much trouble to teach it to drink. The first two weeks it should have a quart of whole milk three times a day, care being taken that the noon milk is warmed to new milk heat. For the next three weeks half a quart of skim milk should be added to the whole milk at each meal. When the calf gets to be five weeks old, discontinue the noon milk, also the whole milk, giving about three quarts of skim milk twice about three quarts of skim mik twice a day. By this time the stomach will be strong enough to assimilate and di-gest other food. The noon meal should then be pulped roots, chopped oats and well saved clover hay. If a separator is not used and the milk is set in shal-low pans or deep setting cans, it should be warmed up to new milk heat before being cd. If it is fed cold or before being fed. If it is fed cold or too hot it is apt to produce bloating and scours. When through careless feeding scouring is allowed to become chronic there is no remedy. When a calf is not doing well break an egg into

strength to its ration. To supplement the loss of butter fat To supplement the loss of butter fat to milk, take for 12 calves over two months old, four cups of flax seed, put it into a common stove pot and fill up with water. Do this after dinner and allow it to simmer all afternoon and evening. Next morning boil smartly for about one-half hour, stir in some wheat flour until the mixture is about the consistency of thin porridge. A calf three months old will take a cup full of this flax seed tea porridge in its akim milk. The flour is used to counskim milk. The flour is used to counteract the loosening effects of the flax ences now experienced in crossing this seed. Care must be used at first not strait. to overfeed, but to work up gradually

to what I have mentioned, with skim milk, flax seed tea, roots, chopped cats and clover hay, and with comfortable,

warm pens, kept clean and well bed-ded. Calves can in this way be raised much more available much more profitably in winter than in summer. When a separator is used it is best to skim the froth off the skimmed milk and not feed it to the

one of Them Interviewed By Representative of the Asso-

ciated Press.

LONDON, June 21.-Much interest is LONDON, June 21.—Much interest in being manifested in the approaching conference with the colonial premiers, who are now in London to attend the coronation of King Edward. For months the government has been urgmonths the government has been urg-ing parliament not to express any kind of opinion upon the feasibility of preferential trade with the colonies, and when introducing measures tend-ing to such an end it was warded off on discussion on the ground that it would not be fair to do or say anything until the colonial premiers had a chance to announce their views on the subject. In short, the government's whole policy has been waiting in the balance until the premiers had already practically come to a decision that they would refuse to make any sug-sestions until the imperial government gestions until the imperial government puts forward its own intentions. That is exactly what the cabinet not only does not want to do, but cannot do. One of the colonial premiers said to a representative of the Associate Press: We have no voice in the fiscal policy of Great Britain, and have not always complete control of pur own It is the duty of the mother country by

make propositions to us. We might sit for months and eventually arrive at a conclusion satisfactory to all nies, though it would be difficult and then find that the results wer merely politely filed away in some pigeon hole in Downing street. We mus have at least some idea of what th government is willing to support be fore we can seriously discuss such a vital question. Lord Salisbury publicly stated his disbellef in the practicability of colonial preference, and Sir Michael Hicks-Beach, the chancellor of the exchequer, has open-ly declared his hostility to the idea. So what is the good of our having a mock debate for the sake of holding up Chamberlain's hands into the empty air. It is well for us to get togeth-er and doubtless intercolonial harmony will thereby be premoted, but beyond that I can see no practical ending of our meetings."

The only end likely to be achieved at this notable meeting is one which is peculiarly interesting to Canada, and the United States. The Associated Press learn that Sir Wilfrid Laurier. Press learn that Sir Wilfrid Lauries the Canadian premier; Sir Rober Bond, the premier of Newfoundiand and Mr. Chamberiain intend to thrash out their long standing differences o opinion, and on all sides ther is hopefulness that a conclusion will be reached regarding the Bond Blaine convention. LORD BERESFORD

Declares the Whole British Admiralty System is Rotten

LONDON, June 20.—During the course of the discussion of the navy estimates in the house of commons today, rear Admiral Lord Charles Beresford, con-servative, scathingly criticised the de-ficiencies of the navy. He declared the mach estimation was routen ficiencies of the navy. He declared the whole admirality system was rotten and led to the great extravagance and the general want of efficiency of the navy, on which depended the existence of the empire. This was the judgement of all the commissions of inquiry and has been proved to be a fact. Every increase in the number of ships and every improvement in them had been the result of outside agitation. As a result of such agitation the British Mediterranean fleet was now a fourth stronger than it was a year ago. It was remarkable, Lord Beresford added, that both army and navy offi-

dded, that both army and navy offi-ers were compelled to threaten to re-ign in order to get things righted. Great Britain had only 20,000 naval Great Britain had only 20,000 navai reserves instead of the requisite 80,000, and the engine room departments were thousands of men short. As to arma-ment, both the United States and France possessed superior guns. Blun-ders would continue until a separate business hoard was appointed at the admiralty and was made responsible for efficiency of the fleet. for efficiency of the fleet. Treasury control was fatal to effic ency. As an instance, the speaker pointed out the case of Sir William Vernon Harcourt (liberal), who, when he was chancellor of the exchequer, put his pen through the ammunition supplies after the guns had been or-

She, how ever, was unconscious for some time. A Mail reporter, interviewed Mr. Ox-ner, He stated that shortly after Lil-ian had complained of being ill, she went into convulsions. She was insensible for days, and after she had recov ered Irene became unconscious. Lilian's case was very serious and her life was in the balance for days. Mr. Oxner informed the Mall that when he left home this morning his daughter Irene was dying. The physician told

him that she could not live over a few When we asked what caused the illness of his little ones, Mr. Oxner attri-buted it to in his opinion to their having partaken of poisoned candy. The children had freely partaken of candy previous to their illness. In fact they were very partial to it. They had purchased from different stores, and from what place the poisoned material was obtained is not known. In one of the cases apendicitis developed. SCHOOL SAVINGS BANKS.

An objection has been raised that inidren grow miserly under this sys-tem. Facts disprove this. In the schools of Long Island City, where the savings banks were first introduced in this country in 1885, the scholars have \$14,220 on deposit. The morning after the disastrous flood at Johnstown some of the pupils on entering their class rooms manifested to their teach-ers a wish to contribute something to help the school children in Johnstown heip the school children in Jonnstown who had lost their homes. The idea was greeted with acclamation. There was a great flutter of little hands; most of the four thousand scholars volunteered offering from their savngs funds, which aggregated \$452.31. This was not a miserly act. Another kind of water cure not wholly original has been tested in New Jersey and has proved completely successful. The patients who were cured on these occasions were anarchists and other disturbers of the peace, mostly of Italian origin. In Paterson the interesting persons who conspire for the assassination of kings and presidents were the leaders in a great demonstration. ' This movement caused all the silk factories in the town to be closed down to save the lives of the employes, most of whom were girls. The police stood almost helpless as the wild people went from shop to shop ordering the hands to quit work. The next day the mayor dismissed the chief of police and caused it to be understood that if the riot was repeated, somebody would be shot. So the proceedings were adjourned to another manufacturing town and there a like demonstration took place. One manufacturer was found who refused to close down his mill, and who prepared to defend his property and his employes. Rioters to the number of more than a thousand moved along the street to the attack of places where work went on. They valiantly placed in the front a score of anarchist women some of them with small children These were kept between the mob and the police and nobly did their best to intercept the force, while the men behind them threw bricks at the officers over the heads of the women. The officers were overpowered and were falling back when some one sent in an alarm of fire. Firemen hurried to the spot with their machinery. They found no fire but discovered a splendid. opportunity for usefulness. Connect ing the hose with the nearest hydrants which fortunately supplied a high pressure at that point, they administered the water cure to the mob. Now the Italian anarchist has an aversion to water whether applied internally or ations. externally, and under this attack the invading army began to waver. Dexterous firemen turned the full force of the stream on one after another of the more violent leaders, and the man struck usually went to the ground stunned and disabled, in which condition the police gathered him in. In the end the firemen saved the situation, dispersing the mob, and causing the capture of about a score of wet and dejected prisoners,

contribution in explanation of the alleged falling pff in the number of adherents of the Church of England reported by the census. It is not clear that the census' returns show any special reasons for the disappointmen of Anglican more than other Protestants, and Bishop Courtney admitted that he had not seen the return of the religious census when he made his address. But assuming that there was a "deplorable leakage," the bishop of Nova Scotia offers certain explanations. Among other things he fears that there is a lack of definiteness in church teaching. People who go west or into some other part of Canada where there is no organized Anglican church are led to believe that there is no great difference between the Church of England and the various forms of dissent. Therefore, instead of keeping up their church collection they ac cept the right hand held out to them and join some other religious body. Besides losing groups of families in this way, the church loses individual members through marriage. Bishop Courtney puts it this way :

should be given for departing from it.

A similar result from the lack of definit A similar result from the fack of dennite church teaching, namely, the loss of indi-viduals to the church, is reached by the so-called mixed marriages, which are all the time being contracted; whereas a rightly instructed churchman would make it a sine qua non of marriage that the other party should come into the communion of church.

This may be found a hard saying for some young men and women even in Bishop Courtney's immediate flock. Some of these even when well instruct-

ed, may disagree with the bishop to the extent of preferring to marry a

dissenter where love is than to make a sina qua non which may mean non. meter.

As against the view of Bishop Courtney there are others who think that the cause of the Church of England in new settlements and on the frontier flourishes best where there is the largest comradeships with other denomin

Throughout the meetings the pastor, Rev. Mr. Shaw, took part, introducing the speakers and assisting in the function reading and pravers. The scripture reading and prayers. The efficient choir, in addition to leading in the singing of familar hymn tunes which were heartily taken up by the assembled worshippers, sang three an-thems at each service, each one in keeping with the occasion and the spirit of the themes discussed by the

ministers. One of the most interesting parts of the whole series was the Saturday hight roll call, prefacing which the church clerk, S. H. F. Flewwelling, read a brief sketch of the church's his-tory, from which it appeared that the Hampton village Baptist church was organised June 21st, 1877, with eighteen members, thirteen of whom were re-ceived by letter and five by baptism, under the pastorship of the Rev. Wil-liam Allen Corey, and during the follinder the pastorship of the flow. While liam Allen Corey, and during the fol-lowing twenty-five years the s ces-sive ministers were: Rev. W. A. Daniel, rector of Rothesay parish; Rev. Dr. W. O. Raymond, Rev. John de Soyres, and L. P. D. Tilley. At 3.30 o'clock and until 4 the boys

were put through their drill by Instructor Pickett. Besides the marching and formation, the collegiate spldiers executed some very pretty free gymnastics.

While the boys were being put through their exercises on the green sward, the visitors were cosily seated under the shade trees close by. Never did the Rothesay College grounds present such a beautiful appearance.

From 4.15 until 6 o'clock the closing addresses were made. Among the speakers were Rev. Dr. Raymond, Rev. John de Soyres, Rev. A. W. Daniel and L. P. D. Tilley. All spoke of the good work done by the college, its efficient state at present, and its bright prospects.

Then the following prizes were awarded:

To Recognize Purity. Adulteration has grown to such he art, that it is almost impos fine art, that it is almost impossi-ble for a woman now-a-days to de-tect the false from the true; but a chemical analysis will always detect adulteration. Prof. W. Hodgson Ellis, Official Analyst to the Domin-ion Government, after a number of analyses, reports that "Sunlight Soap is a pure and well-made soap." Try Sunlight Soap-Octagon Bar-next wash day, and you will see that Prof. Ellis is right. No one should know better than he. \_ 210

The following resolution was moved by Dr. Wilson, seconded by Rev. W. W. Lodge :

W. Lodge : Whereas, Thursday, 26th Inst., has been set apart, as the day upon which His Majesty Bdward VII. Is to be crowned King at the United Kingdom of Great Britain and Ire-hand and of the British uossessions beyond the seas and Emperor of India; and Whereas His Majesty has proclaimed it as his desire that the festivities of the day should be preceded by special religious scr-vices diroughout the ampire: This conference, recognizing the propriety of the proposition as well as the desire to meet the wishes of His Majesty, would re-commend that appropriate religious services be held on all our circuits on the forenoon of Coronation day. The stationing committee met again on Saturday evening and completed its work. The changes are: Bolestown—Rev. E. Ramsay.

the tremendous phenomenon presented by the British Empire, its growth and far-reaching influence; pointed out the liberality of the terms made with the Boers and insisted that the diplomatic proposals preceding the war were equally liberal. He showed how the war had waked up the mother coun-try and enabled her to find herself and to note defects in her army and navy. He pointed out that to make the war a success the religious movemen must keep pace with the political de velopment. He then turned his atten-tion to the Dominion of Canada, disavowed any narrow sectarian bigotry, bade God speed to all attempts of all denominations to christianize the goodly heritage given us by the Al-mighty, advocated the increased use of laymen in the work and drew atntion to the fact that at the recent Anglican Synod in Toronto the imita-tion of Methodism in their employment had been strongly urged, insist-ed on the need of increased efficiency in all departments of Methodist work, deprecated the substitution of the aturalism of scientific evolution for the supernaturalism of the religion of great deal of the so called liberality as really only superficiality. Doctor Carman also dwelt earnestly on the Sabbath question and on the need of state interference to secure to the religious and moral elements of the popu-lation the comfortable enjoyments of a Christian though not puritanic Sab-Party politics were criticised and the liquor question discussed in connection with party politics. Prohi-bition was strongly advocated. The address concluded with an eloquent and strongly worded appeal against pride and worldliness and other more subtle evils that were assailing the life of the church. Help against these evils had to be sought in some quar-ter. It was for him and for them to seek it from Methodism.

HANGED AT BRANDON

For the Murders of Two Mon, Daw and

BRANDON, Man., June 20.-Walter Gordon, the double murderer, was hanged here this morning. He murdered a farmer named Ed Daw at dered a farmer named Ed Daw at White Water on July 31, 1900, and om the following day shot and killed Jake Smith, the partner of Daw. He threw both bodies into a well on the farm. Gordon had arranged to purchase Daw's farm, but when the time came for completing the bargain he lacked the money. Gordon took possession of the farm and held it for some time, when, fearing detection, he fied to Dakota, where he joined a United. States company of infantry. After-wards he deserted, and going to Halifax, enlisted in the Second Canadian Mounted Rifles for South Africa. He was 'arrested just as he was on the point of embarking.

King Edward New in Capital Condition to Face the Complete Programme.

ondon's Streets Thronged With Strai gers Who Praise the Police for Their Courtesy and Alertness-King and Queen Will Return

to London Today.

LONDON, June 22 .- The reappear ance today of brilliant sunshine, after weeks of rain and mirky weather, gave to the first day of coronation week an air of unusual gaiety and gladdened the hearts of thousands of British subjects from all parts of the Empire and the thousands of foreigners who are pouring into London.

The announcement that King ward, Queen Alexandra and the court would return to London from Windor tomorrow at noon increased the universal anticipations for the day and served to quiet to some extent the flood of extraordinary rumers concerning the King's physical condition accompanied in some quarters by wierd plots to assassinate His Majesty, all of which have been promptly denied by the official most intimately connected with the King.

King Edward's health was authoritatively declared to be good at Windsor Castle today and this morning His Majesty attended divine service, accompanied by other members of the noyal family. This evening he enjoyed a drive through the royal gardens of Windsor Castle in a closed carriage The court will arrive at Buckinghan Palace tomorrow before luncheon time At the command of the King many thousand persons were admitted to the east terrace of Windsor Castle this afternoon for the Sunday band performances. The terrace was crowd-ed. The King and the Queen listened to the music from the windows of their private apartments. King Ed-

es-(Hamilton Times.) The We regret to note in the reported remarks of Dr. Powell of Toronto, president of the Ontario Medical Association, a tendency to belittle Dr. Roddick's dominion médical bill, and to hint at making it hard to bring it into effect. We hope Ontario will not be one of the provinces to stand out for dis-union in medical standards. Certainly in event of Ontario Medical Council taking such a stand the people would overwheim-ingly support the legislature in depriving it of powers so abused.
