GROWN'S OLD THEORY

That the Bank Was Robbed
on Inside Information.

PONTON-MACKIE CASE ON

Fifty-Eight of the Panel Were Called
to Get a Jury of Twelve.

the Jury and Outlines the Case

Confessed Robber Looks Like—
Can Safe Combinations Be Worked—
A Talk With Mr. Arthur
Gravelle, Who Juggles With
Combination Locks—Mackie's
Premises at Belleville Searched.

Napanee, Nov. 23.—(Special.)—The bank
case is reached and is being prosecuted
with more vigor than ever. It is rather
tiring to the court habitues, but there is
no perceptible falling off in attendance. It
is stated that there is now very little like-
lihood of the case being finished before
next Wednesday. The Crown holds on to
its original theory, first broached by De-
fensive Greer in 1897, that the bank was
burglarized owing to information given
out by someone inside.

The defence, it is expected, will contend
that no reliance should be placed upon
the evidence of criminals such as Pare
and Holden. Besides, as Mr. Oser said,
Holden's hope for mercy lies in the fact
that he must tell the truth. What is the
truth in the eyes of the Crown is the
Crown case. If so, Holden gets a few
years' freedom if he keeps close to that
story. The defence ask: Is he likely to
waver from it?

It is not likely that Pare will be mutu-
ally cross-examined by the defence. The
ground has all been gone over, and there
is no need of trying the jurors. As to the
Government bonds, it will be claimed that
in the spring of 1897 there were actually
entered in the assets of the bank \$16,000
of bonds; yet Pare speaks only of \$10,000.

Ponton knew about the bonds in the
spring, and, according to Pare's story,
and the Crown's case, Ponton was dimmy
with the gang then, yet nothing is said of
the \$16,000 in bonds. Further, there is in
evidence the conversation held in Ponton's
room, after the robbery, yet there is not
a single word about the Government
bonds. What was the matter? Again,
from Mr. Baines' evidence, it is claimed
that Ponton had access to the safe and to
both compartments at different times, and
had to use them. Is it not probable that
he would know that the Government bonds
were not in the bank? This is what the
defence ask. If Ponton is put in the box,
he will say that he knew the bonds were
not in the bank.

As predicted in yesterday's World, Holden
will throw himself on the mercy of the
court.

It was stated this morning by the Crown
that on July 27, 1897, an electric bell was
to have been placed in the bank. A witness
is expected to testify to this, and that
his information was gained from the inside.
This forms another link in the
Crown's case and is now first stated. Both
sides are satisfied with the jury.

Pare Goes Free.
The most important feature in the case
to-day was Mr. Oser's announcement that
Pare, as a witness for the Crown, would
go free, while Holden, if he told the
whole truth, might look for mercy from
the judge. It is said on good authority
that Holden may get a remission of at
least seven years of the 14 due him. This
statement has given rise to much com-
ment upon the equity of such a course,
but in the eyes of the Crown it is just-
ifiable on the ground that it is a recom-
pense for the proper placing of the crime.

Court Room Crowded.
The court room was jammed to the doors
when the court opened at 9:10 o'clock.
The bar was represented by B. B. Oser,
D.C., C. J. Holman, W. S. Herdman, W. B.
Northrup, Q.C., W. G. Wilson, Morley
Wilson, W. H. Madden and E. Porter.
Prisoner Mackie, looking in good shape,
was brought into the room and entered
the box. W. H. Ponton, who sat free in
the court room, on a nod from his counsel
went into the box and sat down beside
Mackie.

The charge of the Queen v. Mackie and
Ponton was read, and the two prisoners
pleaded not guilty in a firm voice.
Then the clerk of the court read off the
names of a panel of 60 jurors. There were
72 called, but the Crown allowed a panel
of 60, of whom 48 could be objected to.

Getting a Jury.
The first man called was Chris. Thomp-
son. This came a pause. The spectators
wanted to see whether there would be an
objection or not. The delay was attrib-
uted to the fact that the clerk in read-
ing out the names of the jurors from the
yellow book read them in no regular order,
whereas the counsel had signs of names
that ran from 1 to 72, and experienced no
little difficulty in picking out the names
of the men called. There was really a
revision of the list on the part of the
lawyers.

At last the clerk got the checks shuffled

RATES WILL GO UP MONDAY.

Drawn Out War During
Public Traveled
Over.

(Special.)—At 9:30
this morning the rate war was
announced to be in sight, as the following
official statement will show:
The Canadian Pacific and Grand
Trunk Companies, having come to an
understanding on the present rate con-
troversy, all rates will be restored on
Monday, Nov. 23.

Negotiations are under way with re-
gard to the use of the North Bay line
of the Grand Trunk for Ontario busi-
ness to and from the Northwest, and
the service will likely become effective
shortly.

"Nothing to Add" Says Mr. McNicol.
"There is nothing to add to this," said
Mr. McNicol of the C.P.R. "This, in my
opinion, is all the public want to know.
The details of the struggle are no ancient
history, and it would serve no good pur-
pose to revive the old incidents, many of
them exaggerations, and representing views
of the situation diametrically opposed to
each other, and far from representing the
true facts." "I prefer to leave the matter
as it stands."

The news was confirmed by Mr. R. B.
Reeves of the Grand Trunk, Mr. Shaughnessy
and Mr. Hays having nothing to say.

GREAT STORM IN BRITAIN.

Street and Railway Traffic Crippled
by Snow—Many Wrecks Along
the Coast.

London, Nov. 23.—Severe snowstorms, the
first of the season, prevailed to-day over
the Midlands and North Britain, and heavy
gales are sweeping the coast. Trains and
mail boats have been delayed. In Sheffield
the storm is described as a blizzard and
in Manchester the street and railway traf-
fic is badly crippled.

A despatch from Brussels says that the
Belgian coast was swept by a storm yester-
day and that great damage was done.
A despatch from Amsterdam says that the
steamer Montenegro went ashore in the
storm near Texel Island, in the North Sea.

The three winds, accompanied by a sud-
den cold snap, have proved serious over
the whole northern portion of the King-
dom. The snow has caused many block-
ades and numerous accidents on the rail-
ways.

Along the coast there have been num-
erous wrecks and the lifeboats have been
in constant requisition. The channel traf-
fic is practically suspended and the hotels
at Calais on the French side are crowded
with travellers waiting to cross to Dover.

SHOT BY A POLICEMAN

George Smith Brought Down
by P. C. McCarron.

TWO BULLETS STRUCK HIM

The Lad Was Homeless and Went to
Sleep in a Hay Loft.

Neighbors Notified the Constable,
and When Smith Jumped Out of
a Window and Ran, Two Shots
Were Fired—Now in the Emer-
gency Hospital in a Precarious
Condition.

Shortly before midnight yesterday George
Smith, a lad 18 years of age, was shot
on Queen-street, near Niagara, by P. C.
McCarron (No. 134) and perhaps fatally in-
jured. Smith, who is well-known in the
neighborhood, where he has worked for dif-
ferent people, had only just arrived from
Cleveland, where he had been employed in
shipbuilding. As he was homeless, and had
nowhere to sleep, he crawled into the
hay-loft of George Sanderson, at 706 Queen-
street, in company with another wanderer.
People who saw the men enter the barn
notified Constable McCarron, who was pat-
rolling the beat, and the officer went to
the place. He called out for the intruders
to come down, whereupon Smith jumped
out of a side door on Manning-avenue and
ran down Queen-street.

The officer gave chase, and when Smith
was opposite Congreve's brewery he fired
at him, and the runaway fell. Smith was
picked up, and carried into Lander's drug
store at 708 Queen-street, and Dr. Badde-
ley was called. After dressing his injuries,
Smith was removed to the Emergency Hos-
pital in the ambulance.

The two shots entered Smith's legs, one
in the right leg below the knee, and the
other in the left ankle. During the time
before the physician arrived the injured
lad lost nearly two quarts of blood,
and at an early hour this morning was lying
in a precarious condition. The other
escaped.

FEDERAL FIGHT IN JUNE.

Sir Wilfrid Laurier Said to Have Given This Tip to a Member
of the Quebec Legislature.

Montreal, Nov. 23.—(Special.)—A general
Federal election in June, and Sir Wilfrid
Laurier says so, was passed to-day from
mouth to mouth, and no one appears to
doubt it.

The story is that Sir Wilfrid gave the
tip in person to a Liberal member of the
Quebec Legislature, and that the latter gave
it to personal friends. This is the way the
story goes, and, as just stated, there are
very few people in Montreal to-night who

A STUB FOR SIR JAMES

His Suggestion to Exchange Jam-
anica for an Eastern State is Not
Approved of.

London, Nov. 23.—(Star Cable.)—"Ridic-
ulous" and "most imprudent" were the
epithets which a prominent Englishman
connected with the West Indies this morn-
ing applied to the suggestion of Sir James
Edgar, Speaker of the Canadian House of
Commons, that Jamaica be ceded to the
United States in exchange for the entry
of the Eastern States of the Union
into the Canadian Federation. "The idea,"
he added, "is preposterous. England would
never consent to surrender Jamaica, even
if Jamaica wished it. This feeling is
strongly and widely held here."

TREATY MAY BE SIGNED MONDAY.

Looks As If the Spaniards Would
Accept the Philippine Offer By
Uncle Sam.

Paris, Nov. 23.—At the request of the
Spanish Peace Commissioners, there will be
no joint session to-day, pending instruc-
tions from Madrid. The date of the next
meeting is not fixed.

The postponement of to-day is regarded
as a hopeful sign that the treaty will be
signed. While the Madrid Government has
not yet received the text of the American
ultimatum, the Spanish Ministers received
quite enough by telegraph on Monday
night to enable them to instruct their
Commissioners to retire, were such their in-
tentions.

It was confidently believed by several of
the American Commissioners who con-
ferred with the correspondent of the Asso-
ciated Press to-day, that before the ex-
piration of the time fixed by the Ameri-
cans, namely, Monday next, the Spaniards
will acquiesce in the United States' Phil-
ippine offer, and that ultimately the treaty
will be signed by all the Spanish Commis-
sioners.

The American Demand.
London, Nov. 23.—The Madrid correspon-
dent of The Daily Mail says: "Ministers
deny that the Americans have offered Spain
commercial privileges in the Philippines.
They declare, on the contrary, that the
United States commissioners have only of-
fered to negotiate after a peace treaty has
been signed, a special commercial treaty
with regard to Spanish commerce. The
Americans have demanded Young Island in
the Cordillera group as a coaling and cable
station."

What About the Sulu?
London, Nov. 24.—The Berlin correspon-
dent of The Times, who remarks this morn-
ing on the scepticism of the German critics
regarding the sincerity of America's in-
tention to adopt the open door policy in
the Philippines, calls attention to German
speculations on the prospect of protection
in the American possessions in the Pacific.

The Neuest Nachrichten draws attention
to the treaty of 1877 between Spain, Great
Britain and Germany securing freedom of
trade in the Sulu Archipelago Anglo-Ger-
man shipping, and says that Prince Bis-
marck at that time successfully contested
Spain's claim to have the Sulu group
as belonging to the Philippine group.

The correspondent of the German press
"heavily assumes that America will claim
the Sulu," and suggests that this is a point
upon which an understanding with Great
Britain with a view to joint action appears
indispensable.

The list in the Baldwin Hotel fire

Tate Prior, a race track employe.
F. R. Andrews, cashier of the cafe in the
basement of the burned building.
Joe Summerfield, a Chicago bookmaker.
D. Siler of St. Louis, advertising agent.
Fred Webster.
John Carter, race track judge, and two
chambermaids.

Been Dismissed From Office.

London, Nov. 24.—The Shanghai corre-
spondent of The Times says: "An Imperial

the Taotsi of Shanghai, who is a progres-
sive, and in sympathy with the foreigners.
The British and American consuls have
asked their respective legations at Peking
to endeavor to secure his retention in office

foreign settlement here has been arrang-
ed."

ONE CAUSE FOR THANKFULNESS.

Canada ought to be thankful for many things to-day, but for nothing more than the fact that she can stand alone. It will do Canadians a great deal of good at the present moment to recognize and appreciate the fact that Canadian nationality does not depend on the good will or the bad will of any outside power. Our neighbors will hardly admit that Canada can exist as a nation on its own merits. We are not surprised that they have become saturated with the idea that Canada must hitch itself on to something, or else give up the game of nationality. The Liberal party, in opposition as well as when in power, has fostered the idea of Canada's dependency on the good will of the United States. Sir Wilfrid Laurier's party at one time favored commercial union as the only escape from what they thought was an otherwise hopeless condition. For years and years this idea of a closer union with the United States has been uppermost in the minds of the Liberal leaders. Well-to-day they have everything their own way. They have obtained the ear of the United States legislators, and at this very moment negotiations between the two countries looking towards a closer relationship are in progress. We are pleased that these negotiations are under way, and we trust that reciprocal benefits may be the outcome of them. But it is not the fact that the two countries are negotiating a treaty which causes us to express our thanks on this Thanksgiving festival, but, as we have already stated, it is the fact that Canada can exist and flourish whether a treaty is made or not. We ought to be particularly thankful for that fact, because with the United States as the Liberal party has for years been contemplating. We will have no bad feelings against our neighbors if they refuse absolutely to make a reciprocity treaty with us. We trust, however, that the good feeling which it is alleged exists between Great Britain and the United States will have the effect of smoothing out the petty differences that exist between the two countries. If the alien labor trouble, the Alaska boundary question and a few other minor points are settled, that is as much as we can expect or hope for. That the United States will negotiate a treaty with us which will equally benefit the two countries, we have no hope whatever. The feeling which has actuated the United States all along in its policy towards Canada actuates the American commissioners now sitting in Washington. Their one object is to drive as hard a bargain as they can with Canada, and unless they get a great deal more than they are willing to concede there will be no reciprocity treaty. As a matter of fact there will be no treaty. No decent treaty is possible with the United States until we have proved in a most emphatic manner that this country is able to exist and prosper by itself and within itself. The Americans still have a latent belief that the starvation policy will bring Canada to its knees. It remains for us to disabuse them of this idea. The ablest work of Sir Wilfrid Laurier and the Liberal party will be undone. We must no longer adopt a cringing or suppliant attitude towards our neighbors. We must show them that we can exist independently of any trade concessions from them. We must convince them that the pride we take in our commercial independence is not assumed, but real. To speak candidly, we are not over-anxious to secure a reciprocity treaty with our neighbors. We believe that Sir Wilfrid Laurier can do more for Canada at Ottawa than at Washington. Canada has the game in her own hands if her statesmen only know how to make the move. An aggressive tariff policy towards the United States will put in the hands of Canadians a great deal of the business that is now done by our neighbors. We import from the United States a great deal more than we export to that country. The balance of trade is greatly against us. The way to remedy this evil is to put up the tariff and make American manufacturers, who wish to do business with us come over to Canada and establish their factories here. Canada needs no treaty with the United States until it has been shown that the country cannot prosper under an aggressive policy looking towards the conservation and development of our natural resources. We need no reciprocity treaty with the United States until it is proved that we cannot refine our own pulp into paper. We need no one-sided reciprocity treaty with the United States until it is proved that we cannot find a market in Great Britain and Europe for our agricultural produce. The moment Canada applies their own policy against the people of the United States, that moment will they begin to respect us. The way to hold our own against the Americans is by aggression, not conciliation. The former policy we have never yet tried. We still have it up our sleeve and for this we ought to be thankful. As soon as we decide to put it in force the war will come down.

MORE SCOPE FOR THE ALIEN LABOR LAW.

The Hamilton papers last night scored The World for its defence of a Toronto company that applied for permission to do business in the Ambitious City. After the castigation administered to us we are surprised to find these Hamilton papers advertising our Harry Webb's

THE CIRCULATION OF THE BANKS.

The business of the country is growing, and it begins to look as if the chartered banks will have to increase their capital stock in order to allow of an expansion of their note issue. Some of them are now up to their limit and are using the bills of other banks in order to meet the calls on them. This is the explanation of a rather common occurrence these days: viz., one bank making payments with the bills of another.

DAILY EUROPEAN HINTS.

Worth evening gown of black velvet. Cottage draped in a Grosgrain and fastened at one shoulder by a diamond clasp. Left side of corsage filled out with real lace. Narrow band of gold and jeweled embroidery at decollete. Gold belt richly studded with diamonds.

PERSONAL.

Miss Nina Kinsella left last week for Winnipeg to visit her friend, Mrs. Henderson (nee Miss Lillie McVey), for three months. At the Grand Union: R. J. Graham, Belleville; E. L. Brown, Aylmer; W. D. Putnam, Montreal; M. J. McLaugh, Guelph; T. A. McArthur, North York; W. L. Whitty and wife, Brockville; D. H. Graham, Inglewood; J. T. McGrany, Whitty. At the Arlington Hotel are: John Smith and wife, Montreal; Joseph Morris, Hamilton; C. B. Mansfield, Frank W. Mansfield, Hamilton; W. B. Robertson, London, Eng.; Sir E. C. Boehm, England; E. N. Watson, Port Hope; Mr. Parker, St. Catharines.

HEARING RESTORED.

THE WARRINGTON FAILURE.

Ottawa, Nov. 23.—Warden Balastrone drew the attention of the Council of the Board of Trade today to the recent failure of Warrington & Co. of Montreal and its disastrous effect on the members of the Ottawa Cheese Board. He asked the council to devise some scheme by which defaulters in the Ottawa Cheese Board would be guaranteed against loss. The practicability of this suggestion will be considered by the board.

THE ESCAPE.

When a man has a chance to escape from prison he does not stop to argue about it; he breaks out as quickly as ever he can. He knows that every moment's delay may lessen his chances of escape; but when a man is sick he too often postpones his opportunity of getting well and says: "O, perhaps I'll be better next week" or "I'll be better next month." The weeks and months go on and every day his chance of escaping from the dungeon of disease grows smaller. The "Golden Medical Discovery" originated by Dr. R. V. Pierce, of Buffalo, N. Y., offers a certain means of relief to every man and woman who is suffering from any form of weakness or disease due to imperfect nutrition. This marvelous "Discovery" creates good appetite, good digestion, good blood, good health. It gives the body solid flesh, muscular strength, and steady nerves. It helps you to think clearly and work with success. Mr. J. E. Housman, President of the Toronto Baptist Young People's Union states that the executive are arranging a series of official visits to the societies of the respective churches. A New Year's rally of all the societies will be held at one of the central Baptist churches early in January.

APPROPRIATE SERVICES.

The eve of Thanksgiving was appropriately celebrated by the congregation of the Bond-street Congregational Church, who held a social address from Morgan Wood. The speaker compared the Thanksgiving of the old times with that of today, and said that every one should feel thankful for the many advantages that we today enjoy, and which were not possessed by those who lived before us. A special musical program was also rendered by the choir.

WHERE IS DAVIDSON? BRICK GAME FRUSTRATED.

A Scheme That Worked to the Loss of a Good Many Farmers—Bailiff Takes Possession. About two months ago William Davidson opened up a wholesale produce business at 88 Front-street east, under the firm name of Campbell, Davidson & Co. The firm advertised in the country papers for agents at \$15 per month, and 2 per cent. commission on all the produce received by the firm. Another move by Davidson to get a large stock for the holiday trade was to offer the farmers recently prices in excess of other firms in the city. The firm did daily business amounting to \$900, and not a cent was returned to the agents. The farmers became anxious about their money, and they worked the agents. The agents wrote to Davidson, and not getting any answer, came themselves in person on Monday. On Monday night Davidson and a friend, the latter supposed to be his partner, went to Bonner's garage, furnished on Yonge-street, and bought in a \$28.00 in goods. Davidson gave his cheque in payment and left the store. After the pair had gone out the clerk became suspicious, and hastily went to the Union Station, where he met Davidson and his friend about to board a train for Buffalo. The clerk at once traced Davidson and told him there was no money in the bank. Davidson handed up the cash and got on the train just as it pulled out. It is said that Davidson is now in a hospital, and in for about \$50 in a similar manner. Barrister James Bicknell yesterday, on behalf of a number of creditors, put all the cheques for the amount, and a quantity of perishable goods were sold. The World learned last night that Davidson sent out to farmers who were holding cheques for the amount, but forgot to sign them. This act, one of his employees said, was evidently performed by Davidson to get the goods were not slaughtered by the shipper as stated, but the market prices were got for the produce sold.

TO KILL THE CZAR.

A Railway Bridge Barriercd and a Switchman Removed the Obstacles Just in Time. Berlin, Nov. 23.—A despatch from Ebing, the seaport of West Prussia, says an attempt was made Monday to blow up the railway bridge over the Danube near Copenhagen. Just before the czar's special train crossed the bridge between Boehmhoefen and Legern, a switchman discovered that the bridge had been barriercd. By almost superhuman efforts, the engine and train were stopped, and the switchman, it appears, succeeded in removing the obstacles sufficiently to permit of the passage of the imperial train. An investigation, which is being conducted in secret, is still proceeding.

Worse Than a Dog.

London, Nov. 23.—Charles Mitchell, who was arrested here recently for swindling, has been remanded without bail. At the time of his arrest Mitchell was engaged in a school for the purpose of obtaining women of questionable character. By advertising a patent preparation, he induced some 800 women to write to him. To each of these he sent a circular demanding \$10, on threat of exposure and arrest. Mitchell had already amassed a fortune when caught.

Forming a Colossal Trust.

London, Nov. 23.—The Birmingham Post understands that negotiations have been in progress between certain prominent houses in London and New York for the formation of a colossal trust for the purpose of buying up, financially in Cuba and the Philippines. Everything depends upon the amount of support obtained from the United States Government.

Sister's of Precious Blood Bazaar.

The bazaar that has been in progress here last Monday in the Confederation Life Building, under the auspices of the Sisters of the Precious Blood, is being well attended. The afternoon and evening sessions were held under the direction of Miss Malton, and the different articles were well sold. The bazaar is a most interesting and profitable one. The work is a religious one, and there will be a children's matinee, and special features have been secured for their amusement.

Delicate children! What a source of anxiety they are!

The parents wish them hearty and strong, but they keep thin and pale.

To all these delicate children Scott's Emulsion of Cod-liver Oil with Hypophosphites comes with the best of news.

It brings rich blood, strong bones, healthy nerves, and sound digestion. It is growth and prosperity to them.

No matter how delicate the child, it is readily taken.

IN THE CAUSE OF HUMANITY

Mr. W. E. Massey Donates \$2500 to Build an Experimental Laboratory at Gravenhurst.

Mr. W. J. Gage, treasurer of the National Sanitarium Association, yesterday received the following welcome letter from Mr. W. E. Massey: "Undoubtedly you and the other officers of the Muskoka Sanitarium are deserving of hearty congratulations on the splendid success achieved in its first year's operations. The results have abundantly proven the wisdom and foresight of the promoters in selecting Gravenhurst as the centre of operations and as the location for the first and largest building of the association."

FORFEITED THE DIAMONDS.

Uncle Sam is \$40,000 Richer by the Smuggling Methods of Lasar. New York, Nov. 23.—The jury in the case of the United States against Max J. Lasar, charged with the smuggling of diamonds worth about \$40,000 worth of diamonds, which was charged, were smuggled into the country from Europe, by way of Montreal, without payment of duty, and returned a verdict today, forfeiting the diamonds to the Government. Lasar is under indictment for the same offence in connection with the smuggling of diamonds and his attorneys preferred to hold their defence until the trial on the criminal charge came up, believing they could bring forward witnesses who would testify to the disappearance of Lasar. A feature of the trial of the defendant was the testimony given by Miss Ivy Curdie, an English girl, who Lasar induced her to travel on the steamship with him as his wife, and to whom he showed the diamonds.

TRANSPORTATION NEWS.

Thanksgiving Excursions Largely Patronized—Big Reductions in Freight—Officials Busy.

The Union Station was thronged all day and night yesterday by large crowds of people who were hurrying to catch trains, or the coming of them. The cut rates induced many to get out of the city to spend Thanksgiving, and on no other similar holiday ever was the business seen so brisk in passenger traffic. Both the Canadian Pacific and Grand Trunk run cheap excursions to and from the city, and in most cases extra cars have been attached to regular trains, so great was the rush. The Grand Trunk train consisted of a dozen coaches, and on its arrival here was never so standing room. The G.T.H. train from the west at 2:10 p.m. was crowded, and the Buffalo train was largely packed, and large numbers came into the city. The excursion tickets will be good to return until the 28th, and beyond. The business of the day is expected to be heavy at the depot.

DEATH WAS ACCIDENTAL.

Verdict of the Coroner's Jury on the Sudden Taking of James Bonar's Life. Coroner Johnson held an inquest yesterday afternoon at Bates & Dodds' yesterday afternoon at 10 o'clock, on the body of James Bonar, who met his death by being crushed between two G.T.H. cars at the foot of John-street on Tuesday afternoon. The coroner's jury heard the evidence of several witnesses, but nothing new was brought to light. The jury returned a verdict of accidental death. The funeral will take place this afternoon from the deceased's late residence, 188 Warden-street, to Mount Pleasant Cemetery.

Weather Changes

Peculiarly weakening to the human system are sudden changes of weather. Taking cold is as dangerous as taking a fever. Colds impair the vitality and if allowed to run general and permanent debility. Every cough brings on a slight congestion of the lungs and a sufficient number of such congestions injure the structure. This is the invitation which consumption is watching for. The germs which float in the air find ready lodgment in the inflamed air passages and begin their work of destruction. Under proper treatment and with proper care for the general health the tubercular bacilli may be thrown off and the affected parts healed like any ordinary wound. The unfailing specific for incipient consumption is Shiloh's Consumption Cure, a standard remedy which has been used in successful professional practice for nearly half a century. The following testimonial from Mrs. C. H. West, of Barina, Ill., is one of many: "I have used Shiloh's Consumption Cure in my family constantly for the past thirteen years. Have used it for whooping cough, croup and colds with perfect satisfaction. My brother-in-law, who was pronounced by using it, and is a strong well man to-day. We are never without it; it is our standard remedy. Shiloh's Consumption Cure is sold by all druggists under a positive guarantee that the purchase money will be refunded in case of failure. 25c., 50c. and \$1 a bottle in the United States and Canada. In Great Britain 1s. 2d., 2s. 3d., 4s. 6d."

A TYPICAL CANADIAN INDUSTRY.

Where and How Pickles Are Made—A Thriving and Interesting Industry.

The Trade and Commerce returns show that the Dominion exports, every year, of fruits—canned and preserved, jellies, jams, etc., some eighty thousand dollars worth, and of pickles, sauces and catsups one hundred and nine thousand dollars worth. Naturally the question arises: why should it be necessary to import the table delicacies represented by these figures while Canada can and does produce almost everything of which they are made? In a number of articles The World has recently called attention to the future of Canadian manufacturers to all this and as it might be and should be done, and the other day Messrs. T. A. Lytle & Co. of this city invited a representative of The World to visit their establishment on Richmond-street west and see whether or not one concern at any rate is doing its full duty in this line. Yesterday this invitation was accepted, and the representative of this paper was shown over the establishment, being not a little astonished at the magnitude of the business which is evidently being done by the firm. The main building in which the business is carried on is at No. 124, 125 and 126, Richmond-street west, and is a handsome five-story structure, built and laid out with a view to the requirements of the business. The firm began the manufacture of vinegars as far back as 1882, and commenced the making of pickles in 1887. Their beginning in the business of pickles and sauce-making was modest, unpretentious one, having been in a small cellar on Pearl-street, with a little force of six employees. Now they have the largest concern of its kind in the Dominion, and, at their present rate of progress, bid fair, ere many years, to rival in magnitude and importance the great pickle and sauce establishments of the United States and Great Britain. The progress of the firm has been in the face of many difficulties and discouragements. Perhaps the greatest obstacle they have had to overcome has been the prejudice in favor of imported goods. Manufacturers in other lines have had this wrong-headed predilection in favor of foreign made articles to contend with, but to the makers of

CANADA VINEGAR WORKS

table delicacies it has been particularly trying. The temptation to avoid the difficulty by adopting the names and imitating the labels and styles of popular foreign made articles, and thus passing their goods off as "imported," has been great—too great for some makers to resist—and merchants here, for the profit they determined to wink at and assisted in the deception, saving their consciences, perhaps, with the reflection that, after all, their customers were getting as good an article as they thought they were buying. The Messrs. Lytle have steadily and consistently refused to adopt this plan. They determined that their goods should be at least equal in quality to any imported articles of their kind, and that the standard one established should never be lowered. They then adopted their own names and labels, put up their goods in neat and attractive packages, and left them to win their way to popularity by their own intrinsic excellence and merit, believing that a business thus established would have all the important elements of permanence. The result appears to have demonstrated the wisdom of the plan they adopted, and their brands "Sterling" and "Canada" are better known and known as popular as those of the most famous foreign makers. It is possible that during the earlier years of their business they might have sold more goods, had they adopted the plan of imitating the labels and brands of successful foreign makers, but they could not thus have created the demand which is now to them a source of steady profit and proper business pride. The visitor to Messrs. Lytle's establishment is struck with the order and system everywhere apparent, but, perhaps, what is most noticeable and pleasing is the absolute and scrupulous cleanliness. Nothing offensive to sight or smell is to be found in any part of the premises. Every tub and utensil, every vessel, bucket or tank, even the very floors are kept as clean as the traditional new pin. Though there were in the several parts of the establishment tons upon tons of vegetables and fruits in various stages of preparation, not an odor was observable which could offend the most delicate or to which fastidiousness itself could object. This entire absence of everything uncleanly or offensive will be appreciated by those lovers of toothsome delicacies who are in no hurry to swallow the proverbial peck of dirt which is said to be the allotted portion of all of us. It is also a guarantee of wholesomeness which all must esteem. There does not appear to be any great mystery in the manufacture of pickles. Care in the selection of the right sort of vegetable, care in its preparation, and at the correct stage of development, proper handling of these so as to guard carefully against any

in fully demonstrating that there is not the slightest necessity for importing into the Dominion a dollar's worth of any of the kinds of goods which they manufacture, and that all of the hundreds of thousands of dollars which Canada has been sending abroad for the purchase of table delicacies might just as well have found their way into the pockets of Canadian workers, farmers, gardeners and manufacturers. And just here a protectionist is tempted to pause and reflect upon the fact that this one firm, besides the direct employment they give to Canadian workers and women, are the means of employing indirectly many printers, lithographers, tub and pack makers, glass blowers, box makers, coopers and others. Probably Messrs. Lytle & Co. are not singular among Canadian manufacturers, in looking with concern bordering upon apprehension, upon the possible outcome of the negotiations now in progress at Washington. They cannot lose their eyes to the fact that a very slight blunder on the part of the Canadian Commissioners, in negotiating the terms of a reciprocity treaty, might mean business ruin to them. As the negotiations now in progress at Washington are a measure of protection to manufacturers in their line, but any lowering of the wall in favor of United States rivals would be disastrous.

THREE YEARS FOR FORGERY.

A. T. Burnett was crooked when doing business for Michael Winters of York Township. In the County Judge's weekly Criminal Court yesterday, A. T. Burnett was sentenced by Judge McDougall to three years in Kingston Penitentiary for forgery. He recently did some business for Michael Winters of York Township, and during the transactions forged Winters' name to a discharge of a mortgage. Louis Suran and P. G. Beatty were convicted of stealing a quantity of copper wire from the Metropolitan Street Railway Company. Sullivan got three months in the Central Prison for the same offence with a four months' sentence which he is now serving, and Beatty got 15 days in jail.

HELPLESSLY BOUND.

Disease makes a man just as helpless as he were tied with ropes. Weariness makes his muscles useless—sluggish circulation of impure blood clogs his brain with useless, effete matter. Effort is distasteful and brings scant results.

The trouble usually starts with the digestion. Too much brain work takes need blood from stomach to head and retards the stomach's action. The habit is formed. The nerves rebel. Sleep becomes a stranger. Loss of appetite is followed by loss of flesh—and all for the want of the right medicine at the right time. Dr. Pierce's Golden Medical Discovery is the man who is losing flesh and vitality. It is for the man whose digestion needs help and whose nerves and brain are overworked. It is the water power of all troubles. No matter what is your trouble, the "Golden Medical Discovery" will generally cure it. It cures by making the blood pure, rich and plenty, and by furnishing food for nerves and brain. It has been found to equal in value to the most expensive medicines, but it does not hurt the stomach. It is the invention of an educated and experienced physician. Dr. Pierce has been for nearly thirty years chief consulting physician of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., and his medicines are recognized standard remedies.

"I can heartily recommend your 'Golden Medical Discovery' and 'Fleasant Peppets' to any one who is troubled with indigestion and torpid liver," writes M. G. Crider, Esq., of Leonard, Harton Co., Ky. "My disease was chronic. My family physician could do nothing for me. I could not walk nor help myself. When I began taking your medicine I could get up and go to work all day." "I am very thankful to you" writes Henry Wolcott, Esq., of St. Cloud, Minn. "I was badly affected with eczema for four years and all right medicines failed. Dr. Pierce's Golden Medical Discovery. I have used five bottles of it and it has cured me of the eczema. I am satisfied if any one follows your hygienic advice and takes Dr. Pierce's Golden Medical Discovery and 'Peppets,' he can be cured of eczema in its worst form." "I must acquaint you with my first knowledge of your medicine," writes T. J. Granton, Esq., of 412 Dayton Avenue, Dayton, Ky. "I am a boatman by profession, plying between Cincinnati, Ohio, Memphis, Tenn., and New Orleans, La. There was a man of my acquaintance at one of our regular stopping places who represented a terrible case of general dropsy. He had it all over, and he was a sight to look at. I had a talk with him after the neighboring doctors (three, I believe) had told him he was beyond cure, that it was no use to take any more medicine, that he must die. I said to him, 'While there is life there is hope for all.' I did not think it any use to hope for him. In his case, I said it for consolation to him, as I never expected to see him alive again. While he was waiting for death to come, he had resigned himself to his supposed fate) a drummer from the East happened to come along with the 'Discovery.' Now, I never heard some men in the store talking about this man they were expecting to die. This man was after a bill of goods to the merchant, went to see the sick man, and he recommended Dr. Pierce's Golden Medical Discovery. I think it was twelve bottles that cured the patient. But he had not heard he took two or three bottles after he appeared to be entirely well. He was overjoyed with the 'Discovery.' Now, I have more than fourteen years ago, and he has enjoyed good health ever since, without any return of the disease, for I suppose he was waiting for death to come, but I know it returns in many instances, but his was a permanent cure."

THE DOMINION BREWERY COMPANY

Minnehaha Directors Met Yesterday in Toronto. And Decided Upon a Vigorous Policy of Development—Shaft to be Sunk to the 400 or 500 Foot Level—Stamp Mill to be Erected—\$30,000 in the Treasury—Golden Cache and Cariboo.

At the company's offices in the Canada Life Building yesterday was held a meeting of the directors of the Minnehaha Gold Mining and Milling Company of Camp McKinney, President Montgomery of Trinity University occupied the chair, and the policy of the management was discussed. It was decided to sink the present 100-foot shaft to the 400 or 500-foot level and tenders have been invited for the second 100 feet. Meantime the manager of the mine is at work with a force of men extending the present drifts at the 300-foot level. A stamp mill will be erected on the property within a short time. At the request of the board the president will visit and examine the mine early the coming month. The management has secured \$30,000 for the treasury and expects to raise the reserve fund to \$50,000 shortly. The managers of Minnehaha stock will be glad to hear this good news.

Golden Cache Outlook Bine. A week ago today The World published a special despatch from Vancouver, B.C., giving a brief account of the stormy meeting of the shareholders of Golden Cache, held in that city on Nov. 18. The Vancouver News-Advertiser of the 17th, just received, contains full details of the proceedings in question and for the sake of the investors of Toronto, Hamilton, London and Ottawa, who are carrying 60,000 shares of the stock, the report is condensed below.

Vice-President Skeene occupied the chair and presided over the meeting. President McKinnon for having resigned his post at such a critical period of the company's existence. "The beginning of 1898, Mr. Skeene proceeds: "Although the result of the crushing in December and January last had proved the value of the ore, the report was found to be low grade, it will be remembered that the presence of five tons of very rich ore consisting of the upper workings of the mine, was reported to the shareholders, believing at the time that he had struck the true ledge, and that development was necessary to find these bodies of better grade quartz continuous. "This fact, and the possession of our own machinery, and the fact that the very great cost of drilling by hand, in the extremely hard rock of the mine, decided the board to proceed at once with the sinking of the shaft, and the purchase of air compressors, turbine, and other machinery. Mr. W. M. MacKinnon, C.E., was called in to consult with the engineer pro tem, and during March the contract to Mr. R. H. Woods for dam, etc., was completed. In the interim, in October, 1897, confirmed and issued. On April 7, tenders were accepted from the William Hamilton Manufacturing Company for a steam engine, boiler, plant and turbine wheel, all of which were in due time erected and have been successfully operated during August and September.

Gold and Garnets. Yesterday afternoon the University yesterday showed The World a fine sample of quartz taken from a gold mining prospect which he recently examined in the neighborhood of Marston, Hastings. The quartz carried bits of free gold as large as peas.

Prof. Montgomery has also some good specimens of garnets, obtained from Parry Sound.

Mining Exchange. Closing quotations yesterday were:

From January 31st the end of April a shaft of development 76 feet in diameter in the mine, and the ore turned out low grade on all sides.

On Sept. 19 we were advised by telegram that the robbery of amalgam, I myself went to investigate, and on my return a meeting was held on Sept. 20, at which I presented a report, and it was decided that, on account of the robbery and the poor result of the clean-up, we had no option but at once to discharge all hands, and was found to be so instructed by telegram, leaving only a watchman on the premises.

"Such gentlemen, the unfortunate position in which we stand. During the recent mill-run, 900 tons of ore were crushed, 44 tons of which only were of the better quartz, the balance assaying barely 82 net, and the gross average being \$4.50. The problem we have now to face is, what is the best course to pursue?"

"At last we have apparently a ledge to follow, the location of which is shown on the plan now before you; very low grade, it is true, at present assaying 76 per cent, but having good walls, we are advised by Superintendent Rives. It certainly seems worth following, and with every appliance at hand, it will be most unfortunate if some means cannot be found to provide the necessary funds. Whether, if these can be found, this work should be done, with the necessary advice, or whether, as a first step, the opinion of a reliable, first-class expert should be taken on the property, is for you to decide. The question is entirely one of funds."

"At the moment the company has liabilities of about \$2000, and has a law suit pending with the late trustee, Dr. Carroll. The estimated expense necessary to prove the ledge now visible, by sinking a shaft and running the lower tunnel, to

HALL & MURRAY, 12 TORONTO ARCADE. DECCA This is a mine that will make a record. Good management, ample working capital, steady work, good assays, large ore body, no stock-jobbing, fast dealing. A mine with a future—a stock with a value attaching. Ask your brokers for information, or write connect which work would take three months using machine drills, as estimated by Superintendent Rives, so that \$10,000 for labor, powder, etc., so that \$10,000 at the least would be required, and may be considered as dead work before we could commence to get out any ore for maturing sufficient to start upon and work; of course, the chance remaining that it may even then be labor in vain if values were not found at depth.

Some of those present demanded an investigation into the manner in which the company's money had been spent, and a committee was appointed to report to an adjourned meeting called for yesterday.

The new shaft house and camps at the Decca mine are nearly completed. The Golden Star mine expects to commence operations next week. W. F. Borland, president of the Decca Mining Company, recently visited the Cariboo ledge, and reported that the intention of the company to install all necessary machinery in the spring, should be extended to improve the shaft, which is down 60 feet, all in ore, will be completed by the end of the month, and further, before drifting to any extent is undertaken. A camp is now being built, where the men will board—Border Budget.
