BEFORE SEEDING TIME

Starting Satur., March 30

AND CONTINUING THROUGH THE FOLLOWING WEEK

For Sale—3 Yorkshire pigs, four weeks old. J. B. Hinsperger.

Miss N. Kennedy is spending the Easter holidays at Toronto and Clinton.

Mr. Hamilton Ballagh, student at Toronto University, was an Easter visitor here.

Miss M. Sugrue is spending the Easter holidays at her home at Mount Forest.

This Week Only—a 15c Pad and a 15c package of Envelopes, both for 25c, at Phelan's.

Mr. Orville Kalbfleisch, teacher, of Kitchener, is spending the vacation at his home here.

Arthur Pletsch has taken a position as salesman at Liesemer & Kalbfleisch's garage.

Mrs. Nellie Harding and son Charles, are spending a couple of weeks in Toronto.

We're not pessimistic, but we believe it's a little early yet to store away the snow shovel.

Mr. and Mrs. A. F. Missere visited their daughter, Mrs. Jos. Fehrenbacher, in Toronto over Easter.

Mr. W. G. Rae, principal of the Bayfield public school, is spending the Easter vacation here.

Misses Susan Schneider and Marie Schumacher, of Walkerton, spent the week-end at their homes in Carrick.

Miss Della Schnurr, of Guelph, spent the Easter vacation with her parents, Mr. and Mrs. J. H. Schnurr.

Eggs Wanted—Highest market price paid for same. Call phone 14 and get our prices. Fred Weiler.

Miss Justina Schultheis left last Saturday for Chicago, after having spent the past six months at Mildmay.

After Monday's rain the water in the fields and flats was higher than it has been at any time in the past twenty years.

Mr. Jack Hanley, student at St. Jerome's College, Kitchener, spent the Easter vacation with Mr. and Mrs. John Weiler.

A number of Carrick trustees are attending the annual convention of the Ontario Educational Association at Toronto this week.

Mr. Ross Vogan, student at the Normal School, Stratford, spent the holidays with his parents, Mr. and Mrs. Jos. Vogan.

Mr. and Mrs. Frank Missere went to Kitchener to spend the Easter with relatives. Mrs. Missere will remain there for a fortnight.

Mrs. Jack Donahue and Mr. Arthur Herrgott, of Toronto, spent the Easter holidays with their parents, Mr. and Mrs. Jacob Herrgott.

Just Arrived, a fresh shipment of FORMALDEHYDE, guaranteed full strength. Bring in your bottle and get it filled, 25c lb., at Phelan's.

Miss Ethel Fothergill, teacher in the Elnora High School, is spending the Easter holidays with her parents, Rev. Dr. and Mrs. Fothergill.

While returning home from Gorrie on Sunday evening, Edward Diebel's car plunged into a washout on the 5th sideroad of Howick, near the townline, smashing a rear wheel.

Mr. Wm. Kleist received word last week that his son, Oscar, was injured in a lumber yard at Turin, Alta., where he was employed. He had a bad fall, fracturing a couple of ribs.

Mr. Edward Fenner and niece, Elveretta Wicke, are spending a couple of weeks with relatives at Linden, Copetown and South Cayuga. John McLeers of Carrick also accompanied them to Linden.

Mrs. John H. Duffy has leased her farm at Huntfield to Mr. Elden Renwick for a term of one year. The lessee will use this farm for grazing cattle. Mrs. Duffy has reserved the right to live on the premises.

The Hergott Company, is busy working on the largest season's production of threshing machines in the history of this successful concern. This separator is finding a ready sale wherever it is known, and is giving excellent satisfaction.

Orville Shaw, the mystery man of "Skunk's Misery" is still at large, and appears to have little trouble fooling the big posse of police who are out for his capture. It is thought that he is now surrounded in a swamp near Hespeler.

The Carrick Council has a problem on its hands to get rid of the tremendous pond of water which covers the road on the 8th concession to a depth of nearly four feet. In previous years the water sank away quickly into the ground, but this year the amount of water there increases with each rain.

When returning home by motor from Guelph on Monday, Reeve J. P. Phelan got stuck on the Provincial Highway between Arthur and Tevotodate. A kind-hearted farmer was on the job very quickly and pulled the car out of the mud with his team, inflicting a small charge of \$3 for his five minutes job.

DANCE in the Town Hall, Mildmay on April 10th, by the A. E. Club.

Mr. Wilfred Weller, teacher, of Toronto, is home for the vacation.

Miss Marie Walter of Guelph is a guest at Bernard Walter's this week.

Don't miss the football club dance in the town hall, Mildmay, on Friday evening of this week.

Special for the Spring Winds—Jergens' Hand and Face Lotion, only 25c bottle, at Phelan's.

Special for Friday and Saturday—Elkay's Soap Dye, regular 15c, reduced to 3 for 25c, at Phelan's.

Mr. W. H. Miller of Guelph was home with his parents, Councilor and Mrs. H. B. Miller over Easter.

Samuel Harper, of Waterloo, spent the week-end visiting his brother, Fred, who has been seriously ill for some time.

We would be pleased to have returned our Screw Jacks, Wire Stretchers and other tools loaned as they are in urgent demand now.

We are sorry to report that Mrs. Mary Wendt of Mildmay is very ill with heart trouble at the home of her son, W. F. Wendt, at Oshawa.

J. A. Fox, Chiropractor and Drug-less Therapist, of Wingham, will be at the Commercial Hotel Monday by and Thursday each week from 9 to 11 a. m.

Mrs. A. T. Missere was at Kitchener last week visiting her daughter, Helen, who underwent an operation for appendicitis in St. Mary's Hospital. The patient is making a good recovery.

Refrigerator for Sale—A medium sized refrigerator, in good condition, for sale very cheap. Apply at this office.

Cream Wanted—Special 48c, No. 1 47c, No. 2 44c. Cash or trade. Cream tested and graded by Swift Canadian Company Stratford. Fred Weiler.

Auction Sale—Auction sale of farm stock and implements will be held at lot 21, Con. 8, Carrick (Deemerton) on Friday, April 5th, at 1 o'clock. John Kupferschmidt, proprietor; John Purvis, auctioneer.

For Sale—1 Frame Building, 20x18 (must be sold by April 15th); 2,000 ft. Maple Flooring; 15 Pine and Oak Doors; 15 Window Frames; 1 Pipeless Furnace; 2 big Cupboards. A. Schmalz, Chairman, Mildmay Sep. School.

Preparing to Build—C. J. Koenig, implement salesman, is getting the material hauled to his premises in preparation for his new implement warehouses to be erected this summer. It is to be a brick structure, with concrete foundation walls and floors.

Very desirable Mildmay residence, recently remodelled and renovated, with new furnace, three lots, good stable and double garage, down town location. Everything in pink of condition, and price right. Apply to J. A. Johnston.

Crew Charged With Manslaughter—Three of the train crew of the No. 3 National train in the terrible wreck at Drocourt, near Parry Sound have been arrested, charged with manslaughter; they are engineer L. V. Alexander, fireman R. Rilly and rear brakeman Charles Gorrie. This action was taken following the finding of the coroner at the inquest. They have been released on bail pending their trial at the assizes in May.

TOWN HALL, HARRISTON—Friday and Saturday, April 5 & 6. "The Terror" with May McAvoy; Special Music and Sound Effects; also other extra attractions: Monday and Tuesday, April 8 & 9, Sharkey - Stribling fight picture taken at the ringside, and "The Crowd" with an all-star cast. Two shows every night, 7.30 and 9.15 p.m. Adults, 25c; Children, 15c. Free Dance on Tuesday, April 9th, in Library Hall 25 cent ticket for show and dance. Dancing 9.30 until ? ?

Literary Meeting April 11th—The Mildmay Literary Society will hold its next regular meeting on Thursday, April 11th, and a very attractive program will be provided. The debate will be a prominent feature of the program, the subject of discussion being "Resolved that the World to-day is a better place to live in than it was fifty years ago." Dr. E. J. Weiler will lead the affirmative, and Ira E. McIntosh the negative. This will be the concluding meeting of the season. An admission fee of 10c and 5c will be charged.

Becoming An Eyesore—Mildmay's dumping ground at Noeekerville corner is becoming a terrible eyesore, due to the fact that those who are using it are too indolent or careless to observe proper care in the dumping of the refuse. At present the refuse is commencing to crowd the highway and unless some improvement takes place it would be better to close up the whole property. In future all dumping must be done at the rear end of the lot, or action will be taken to fence the lot and close it up.

Alfred Sauer of Burlington was a visitor here this week.

Get one of these for your car, a complete Flashlight for 50c, at Phelan's.

DANCE—in the Town Hall, Mildmay, on Tuesday, April 8th. Music furnished by the Steeple Orchestra, A. E. Club.

Gravelling Contract—The contract of gravelling Adam street, Mildmay, will be let at the village clerk's office on Saturday afternoon, April 6th, at 2 o'clock.

Farm for Sale—Lot 28, Con. 8, Carrick, is offered for sale. There is a lot of splendid land on this place, fair buildings and a good bush. Apply to Fred Goll, Neustadt.

Dance Postponed—The dance advertised to be held in the town hall, Mildmay, on Easter Monday, has been postponed to Friday night of this week. The weather on Monday was too rough to hold the dance.

Hurt by Auto—Chester Gowdy of Toronto, son of

NOTICE

Did you see the premium list and prize list of the Mildmay Horticultural Society for this year. The prize list is without doubt one of the best in Western Ontario. Help the Society by becoming a member and exhibitor and share in the valuable prizes offered. Country people are also invited to join the Society. Do not delay your entry. Full information may be obtained from the Secretary, Wm. G. Helwig, or any Director.

Stop! Look! and Listen! Watch for the new play, entitled "Eyes of Love" to be presented by United Church Young People, on May 10th.

Auction Sale—Auction sale of village property and household effects, owned by the estate of the late B. Beingsasser, will be held at the premises at Formosa, on May 10th. John Strauss, auc.

LIMERICK CORNER

Joyous Jingles By Gifted Rhymsters

The Contest is closed. For the time being at any rate, the Limerick Contest will be discontinued. There is no question, however, about its popularity with readers as we are literally swamped with letters and there are hours of work ahead to get through with those at present on hand. While we are catching up we will be glad to hear from those who have taken part in the contest, or who have found pleasure in following it in the papers. Let us know what you think of the Limerick Corner and whether or not you would like to see this feature continued.

On the other hand, if you have any ideas for a feature to take the place of Limerick Corner, let us have them. Editor, Limerick Corner, Associated Publishers, 73 Adelaide St. W., Toronto.

Following are the selections for this week:

ISSUE No. 13—'29

CHAPTER XIII.—(Cont'd.)

Antony tried to put himself in Cayley's place. Cayley, when Antony had first discovered him, hammering at the door and crying, "Let me in!" Whatever had happened inside the office, whoever had killed Robert, Cayley knew all about it, and knew that Mark was not inside, and had not escaped by the window. But it was necessary to Cayley's plans—to Mark's plans if he were acting in concert—that he should be thought so to have escaped. At some time, then, while he was hammering (the key in his pocket) at the locked door, he must suddenly have remembered—with what a shock!—that a mistake had been made. A window had not been left open!

And then Antony's sudden appearance! Here was a complication. And Antony suggesting that they should try the window! Why, the window was just what he wanted to avoid. No wonder he had seemed dazed at first.

Ah, and here at last was the explanation why they had gone the long way round—and yet run. It was Cayley's only chance of getting a start on Antony, of getting to the windows first, of working them open somehow before Antony caught him up. Even if that were impossible, he must get there first, just to make sure.

So he had run. But Antony had kept up with him. They had broken in the window together, and gone into the office. But Cayley was not done yet. There was the dressing-room window! But quietly, quietly, Antony mustn't hear.

And Antony didn't hear. Indeed, he had played up to Cayley splendidly. Not only had he called attention to the open window, but he had carefully explained to Cayley why Mark had chosen this particular window.

And Cayley had agreed that probably that was the reason. How he must have chuckled to himself!

They were outside on the lawn again now, Bill and Antony, and Bill was listening open-mouthed to his friend's theory of yesterday's happenings. It only gave them another mystery to solve.

"What's that?" said Antony. "Mark. Where's Mark? If he never went into the office at all, then where is he now?"

"I don't say that he never went into the office. In fact, he must have gone. Elsie heard him." He stopped and repeated slowly, "She heard him—at least she says she did. But if he were there, he came out again by the door."

"Well, but where does that lead you?" "Where it led Mark. The passage." "Do you mean that he's been hiding there all the time?"

Antony was silent until Bill had repeated his question, and then with an effort he came out of his thoughts and answered him.

"We'd better make certain. Could you be a sleuth-hound, Bill—one of those that travel on their stomachs very noisily? I mean, could you get near enough to the pond to make sure that Cayley is still there, without letting him see you?"

"Rather!" He got up eagerly. "You wait." Antony's head shot up suddenly. "Why, that was what Mark said," he cried.

"Mark?" "Yes. What Elsie heard him say." "Oh, that." "Yes. . . I suppose she couldn't have made a mistake, Bill? She did hear him?"

"She couldn't have mistaken his voice, if that's what you mean." "Oh?" "Mark had an extraordinary characteristic voice."

"Oh!" "Rather high-pitched, you know, or even more so if anything." He

rattled these words off in Mark's rather monotonous, high-pitched voice, and then laughed, and added in his natural voice, "I say, that was really rather good."

Antony nodded quickly. "That was like it," he said. "Exactly." He got up and squeezed Bill's arm. "Well, just go and see about Cayley, and then we'll get moving. I shall be in the library."

"Right." Bill nodded and walked off in the direction of the pond. This was glorious fun, this was life. The immediate program could hardly be bettered.

To Antony, who was older and who were getting, it did not seem fun. But it was amazingly interesting. It was like looking at an opal, and discovering with every movement of it some new color, some new gleam of light reflected, and yet never really seeing the opal as a whole. His brain could not get hold of it.

But there were moments when he almost had it. . . and then turned away from it. He had seen more of life than Bill, but he had never seen murder before, and this which was in his mind now, and to which he was afraid to listen, was not just the horrible killing which any man may come to if he loses control. It was something much more horrible. Too horrible to be true. Then let him look again for the truth. He looked again—but it was all out of focus.

CHAPTER XIV. Bill had come back, and had reported, rather breathless, that Cayley was still at the pond. They stood in front of the row of shelves. Antony took down the Reverend Theodore Ussher's famous volume, and felt for the spring. Bill pulled. The shelves swung open toward them.

"By jove!" said Bill, "it is a narrow way." There was an opening about a yard square in front of them, which had

"Good Lord!" said Bill, turning round with a start, "Cayley!" something the look of a brick fireplace, a fireplace raised about two feet from the ground. But, save for one row of bricks in front, the floor of it was empty. Antony took a torch from his pocket and flashed it down into the blackness.

"Look," he whispered to the eager Bill. "The steps begin down there. He flashed his torch up again. There was a handhold of iron, a sort of large iron staple, in the bricks in front of them.

"You swing off from there," said Bill. "At least, I suppose you do. I wonder how Ruth Norris liked doing it."

"Cayley helped her, I should think. . . It's funny." "Shall I go first?" asked Bill, obviously longing to do so.

Antony shook his head with a smile. "I think I will, if you don't mind very much, Bill."

"Right," he said. "Go on." "Well, we'll just make sure we can get back again, first. It really wouldn't be fair on the Inspector if we got stuck down here for the rest of our lives. He's got enough to do trying to find Mark, but if he has to find you and me as well—"

Antony swung down on the ledge of bricks, swung his feet over, and sat there for a moment, his legs dangling. He flashed his torch into the darkness again, so as to make sure where the steps began; then returned to his pocket, seized the staple in front of him and swung himself down. His feet touched the steps beneath him, and he let go.

"Is it all right?" said Bill anxiously. "All right. I'll just go down to the bottom of the steps and back. Stay there."

The light shone down by his feet. His head began to disappear. For a little while Bill, craning down the opening, could still see faint splashes of light, and could hear slow uncertain footsteps; for a little longer he could fancy that he saw and heard them; then he was alone. . . . There was a sudden voice in the hall outside. "Good Lord!" said Bill, turning round with a start, "Cayley!" If he were not so quick in thought as Antony, he was quick enough in action. Thought was not demanded

nov. To close the secret door safely but noiselessly, to make sure that the books were in the right places, to move away to another row of shelves—the difficulty was not to decide what to do, but to do all this in five seconds rather than in six.

"Ah, there you are," said Cayley from the doorway. "Hallo!" said Bill, in surprise, looking up from the fourth volume of "The Life and Works of Samuel Taylor Coleridge." "Have they finished?" "Finished what?"

"The pond," said Bill, wondering why he was reading Coleridge on such a fine afternoon. Desperately he tried to think of a good reason. . . . verifying a quotation—an argument with Antony—that would do. But what quotation?"

"Oh, no. They're still at it. Where's Gillingham?" "The Ancient Mariner"—water, water, everywhere—or was that something else? Water, water everywhere—

"Tony? Oh, he's about somewhere. They aren't finding anything at the pond, are they?" "No. But they like doing it. Something off their minds when they can say they've done it."

Bill, deep in his book, looked up and said "Yes," and went back to it again. He was just getting to the place.

"What's the book?" said Cayley, coming up to him. Out of the corner of his eye he glanced at the shelf of sermons as he came. Bill saw that glance and wondered. Was there anything there to give away the secret? "I was just looking up a quotation," he drawled. "Tony and I had a bet about it. You know that thing—about—er—water, water everywhere, and—er—not a drop to drink." (But what on earth, he wondered to himself, were they betting about?)

"Nor any drop to drink," to be accurate." Bill looked at him in surprise. Then a happy smile came on his face. "Quite sure?" he said. "Of course."

"Then you've saved me a lot of trouble. That's what the bet was about." He closed the book with a slam, but it back in its shelf, and began to feel for his pipe and tobacco. "I was a fool to bet with Tony," he added. "He always knows that sort of thing."

So far, so good. But here was Cayley still in the library, and there was Antony, all unsuspecting, in the passage. When Antony came back he would not be surprised to find the door closed, because to see if he could open it easily from the inside. At any moment, then, the bookshelf might swing back and show Antony's head in the gap. A nice surprise for Cayley!

(To be continued.)

Strict Treatment

Venezuela Moves Rebel Students to New Prison in Secret Trip

Caracas.—After the conflict between the government and the university students at Caracas last October the rebellious students were kept under arrest and at work on the highways some thirty miles east of Caracas. They were housed under canvas and guarded by soldiers so as to prevent escape or communication with their families.

Recently, however, in the midst of the night, the easterly quarter of this city was aroused by the rumble of a procession of crumpled loaded with students. The rumor of what was about to happen had already spread through the town, and a thousand or more persons, for the most part relatives of the young men, were awaiting their arrival in the neighborhood of the Carabobo plaza.

The government, it was learned, had decided to transfer the students, some 200 in number, to another scene of action. They were brought to the city in sixteen lorries, under a guard of armed soldiers, and in charge of the Governor of the Federal District, General Velasco, and of the prefect of police.

No communication was permitted with them during the journey and they were speedily transferred to a line of buses and departed from the city by a side route, so as to avoid notice. They took the road for the interior. Telephonic information that the procession had passed through the City of Valencia about 10 o'clock the next morning, apparently en route for Puerto Cabello, was soon reported. In the fortress of San Carlos at that post the students had been imprisoned at the time of the uprising last fall. Nothing is known concerning the further purpose of the government respecting the prisoners, but uneasiness prevails among their friends.

It's Safe

The nurse tells you to take Aspirin because she knows that it is safe. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago. But be sure it's Bayer—the genuine Aspirin. At druggists, with proven directions for its many uses.

Shaw Refuses to Write For Trade Purposes

Wells and Bennett Also Enunciate the Ethics of Their Profession

London.—What is almost certain to be recognized as a definite outlining of a new and admirable standard of ethics for all honorable writers and for literature in general has been stated by Arnold Bennett, H. G. Wells, and George Bernard Shaw. They have outlined a creed in which their own assessment of their responsibility to their profession and to the public can hardly fail, in the judgment of competent critics, to raise and soundly establish the entire field of letters on a higher plane.

The opportunity which these three writers have seized to define their attitude and their own estimation of their place in national and international life was supplied through the enterprise of Sir Woodman Burbridge, head of the great department store of Harrod's in London.

REQUEST TO AUTHORS

Sir Woodman's position was that although Harrod's and other great commercial enterprises are able to retain the best advertising talent and best artists, as well as architects, technicians, and others of the professional classes, they had not had the real story of their growth, their amazing complexity and ramifications, and the romance of industry in general presented to the public as these great writers would be capable of presenting it. He thereupon wrote to ask if they would lend their pens in such a manner.

All three declined, and in their reasoned replies is found a standard which is recognized as a noble statement of ideals which lesser writers may strive to reach. Replying to the argument that a writer is a skilled professional who should place his talent at the services of commercial enterprise, Mr. Wells said:

TAKES HIMSELF SERIOUSLY

"The answer is that, rightly or wrongly, the writer takes himself more seriously than that. In his heart he classes himself not with the artists, but with the teachers and the priests and prophets. That may be an old view, and it may be going out of fashion.

"We all believe, of our generation, deep in our foundations, that our only paymaster ought to be the reader. We live on sales to readers and we don't accept fees. There is, we feel, an implicit understanding between writer and reader to that effect."

Mr. Shaw prefaced his refusal with an account of the tremendous improvement which has taken place in journalistic standards since he first began to write. Of the use of the best professional talent aside from writers with established reputations he says:

MILLAIS STARTS CUSTOM

"When Millais was at the height of his fame as a painter a very popular picture of his, representing a nice little boy blowing bubbles, was bought by the firm of Pear's, and used and reproduced as an advertisement. The Academy was shocked; but Millais took no notice; the advertisement had an enormous vogue; and advertising entered on its present phase, in which it is a matter of course for commercial firms to employ the best available artistic and literary talent to advertise their wares and services. There is no reason on earth why they should not, and every reason why they should, now that the art of selling has so much more importance than the routine of production."

AUBREY BEARDSLEY POSTER

Mr. Shaw then recalled that Aubrey Beardsley designed a poster for his first play and that there would be nothing questionable if he were to commission the president of the Royal Academy to design a poster for his next one. Then he continues: "But if I were intimate to, say, Mr. St. John Ervine and Mr. Harris Deans that in the event of their notices of my play being sufficiently flattering to be usefully quoted as advertisements I should be prepared to buy the copyright from them for £500 apiece, then Heaven knows what would happen. Probably both gentlemen would refuse to notice my play at all, and would say why."

"By all means let our commercial houses engage skilled but nameless scribes . . . to write their advertisements as such. But a writer who has been consecrated by fame to the service of the public, and has thus become a prophet as well as author, must take wages in no other service."

MR. BENNETT'S OPINION.

Mr. Bennett bases his refusal on a slightly different ground. He thinks there is not necessarily any ethical reason why he should not, under proper conditions, write advertisements, but doubts whether worth-while public opinion would sanction such action on the part of writers whom it could, in a sense, be said to have made. He concludes: "The reason is that public opinion in Britain is not yet ripe to approve the employment of responsible imaginative writers to whom it has granted a reputation, in any scheme of publicity for a commercial concern. Personally I differ from public opinion in this matter; but the opinion exists and I will not flout it."

Current opinion, in the short time

it has had to express itself, does not see eye to eye with Mr. Bennett's view that in some future time recognized authors will sell their pens in the cause of commerce. Such a step seems to be generally considered retrograde, and in line with the practice of those days when literary men served the causes of the politicians who granted or procured pensions for them and whom Dr. Samuel Johnson so unmercifully dogged with the vigor of his scorn.

Bird Menace Seen in Abandoned Cats

Concreted attacks on the slinking hordes of stray cats have netted the New York City Division of the S.P.C.A. some 322,273 pellets says an article in the April issue of "Field and Stream". The pellets, however, are not desired so much as the lives of the erstwhile wearers, though the one is closely allied to the other, the main purpose being the elimination of stray cats as a menace to birds.

Says the article, "It is the unwanted, homeless, hungry cat that is the menace of bird life. What is true in the environs of Greater New York is equally true in every part of the inhabited United States. The number of birds devoured by the stray and homeless cat is beyond computation. The house cat gone wild and foraging in the country for its own living is by no means a helpless, puny animal. Its extraordinary growth and strength indicate a abundant food supply, a great part of which is birds.

As for cats, being kept to kill rodents this article discounts the claim "that a large cat population is necessary to control the increase of rats and mice, and urges that the proper care and storing of food which are attractive to rodents and the avoidance of scattering loose food around stock or poultry will do more to discourage the breeding of undesirable rodents than can be accomplished by any number of cats.

Community Art Action Needed

Lee Simonson Says Towns Should Get Together and Head off Ugliness

In a joyous dialogue concerning culture in the April "Forum" between Harvey Wiley Corbett, William M. Ivins, Henry Goddard Leach, Vachel Lindsay, Lewis Mumford, Walter Pach, Walter B. Pitkin, Alfred Steiglitz, Harvey M. Watts, Art Young and Lee Simonson, the latter remarks, "We need a development of community effort, if we are to get anywhere in such arts as architecture. The community should get together, as it has in Frankfurt and many Dutch cities, and decide what it needs, and then send for the architect and say to him: 'This is our problem. You can do anything but sidestep the problem and take it. Now go ahead and find the ornament that expresses that.' Every time that has been done in Europe it has been successful. Whereas here, every time you haven't a community that is clearly conscious of its real problem, that isn't free to give a mandate to the architect and say, 'Light, air, leisure, recreation, and don't you dare funk one of those, then you get this crazy mixture we have of port magnificence, part borrowing, and part Renaissance palace, Roman bath, or Greek temple."

The sanctity of the roads is becoming almost as dear to the tribesmen as to the government, Sir Norman declared. Nothing is more symbolic of this change in the tribesmen's angle of vision than the increasing requests for the intervention of the government in purely tribal disputes. Even the Mahsud women, it is reported, appreciate the advantage of the Pax Britannica as saving their men folk from the danger of internal feuds.

An achievement of no mean merit is also the reduction of crime on the border and the suppression of border feuds.

The most wonderful thing that the world contains is a bright face.—Dr. Albert Einstein.

Spring is coming down the street, Light of heart and light of feet, Can you hear his merry note Echoed in each song-bird's throat? Can't you see his youthful grace Mirrored in the tulip's face? Spring is coming, oh, what gladness! Spring must surely banish sadness.

Once the Pride of the Road, Now a Pile of Junk.

Officials and wreckers of the C.N.R. observing the chaos of all that remains of the huge locomotive of train No. 3. This picture was taken immediately before the task, which was commenced of clearing away the tangle to clear the line for traffic.

Indian Tribesmen Favor Britain On Northwest Border

Government Intervention Increasingly Sought in Pure Tribal Disputes

Bombay.—The remarkable success of the British policy on the northwest frontier of India is strikingly illustrated in the report of Sir Horatio N. Bolton, Chief Commissioner, on the administration of the border during the past year.

Sir Norman describes how warring tribes of Waziristan, have, of their own accord, come into line with Britain. The policy of opening this country to the influence of civilization by giving the tribesmen themselves a stake in the administration of law and order was maintained and even accelerated last year.

The sanctity of the roads is becoming almost as dear to the tribesmen as to the government, Sir Norman declared. Nothing is more symbolic of this change in the tribesmen's angle of vision than the increasing requests for the intervention of the government in purely tribal disputes. Even the Mahsud women, it is reported, appreciate the advantage of the Pax Britannica as saving their men folk from the danger of internal feuds.

An achievement of no mean merit is also the reduction of crime on the border and the suppression of border feuds.

The most wonderful thing that the world contains is a bright face.—Dr. Albert Einstein.

U. S. and England Will Have War Says Russia

Calling the United States and Great Britain "tight and bloated," the Russian War Commissioner Ghandjiev is quoted in "Time" as saying they are bound to come to war with each other.

"I mean by tight," continued Comrade Voroshilov, "exactly what I say. Grown gigantic and bloated with capital like a giant blood sausage, the United States feels tight within its frontiers.

Least any dunderhead should fail to catch his drift, "Time" continues: "War Minister Voroshilov added that there is another bloated blood sausage which feels tight, namely Great Britain, and that 'one need not be particularly Bolshevik to foresee that a solution lies in armed conflict between them.'"

The stain sometimes made on neck or wrist by costume jewelry may be averted in many cases if the two surfaces of the ornament are washed in warm soapsuds to which a few drops of household ammonia have been added. They should then be rinsed in cold water and polished with a dry cloth.

A Scottish mother complains that her daughters "have danced away from her." Having their Highland fling probably.

British Economist Sees Crisis Ahead

Protection Policy is Bringing Disaster to Business, Says Sir George Paish

Manchester, Eng.—The gravest financial crisis in the world's history was described by Sir George Paish, well known economist, as threatening modern business.

"I say with the highest authority, and I challenge anyone to deny it," Sir George told the National Free Trade Conference, "when I say we are threatened with the greatest financial crisis the world has ever seen, because the governments of the world have followed the policy of trade restriction, preventing debtors from paying their debts." Sir George declared.

"The greatest authorities in this country and in the United States expect it to come this spring, and unless this policy of safeguarding or protection is checked, it means disaster to the world. I am not exaggerating."

I consider it the duty of the men at the head of government to remain in their places even if the waves wash the deck and the crew talks of mutiny.—Dr. Gustav Stresemann.

Although we regret very much that this generation has at present lost the old standard and has not yet found a new one, I think that it may have found a little grain of truth that may be of enormous value.—Evelyn Sharp.

A Good Idea of What a Terrible Mess Occurred

The tangle of wreckage of train No. 4, with wrecking train standing beside it. The remains of the other engine and baggage car of train No. 3 are shown in the background at the right.

Beebe Party Sails to Scan Sea Depths

Scientist's 32nd Expedition Will Study Ocean Life Off Bermudas

William Beebe, writer and explorer of ocean depths, sailed recently for another expedition into the world of deep-sea creatures unknown to man. Widely experienced in observing ocean phenomena and in invading the private haunts of weird aquatic creatures, Mr. Beebe will this time turn his eyes toward the tropic sea surrounding the Bermudas.

When he and his party of scientists and aides arrive at Bermuda, they will go to Nonsuch Island, a speck of land at the entrance to Castle Harbor, which has been offered to the expedition by the Colonial government of Bermuda for the advance of the study of sea life there.

Formerly, the explorer has been somewhat handicapped in his researches because he has had to use a ship as a floating base and has made his studies from small boats.

Nonsuch Island, Dr. Beebe said, was a perfectly natural base for the expedition, and he looked forward to the discovery of valuable data on tropic sea life hundreds of feet below the surface.

The expedition, Mr. Beebe's thirty-second, and the twelfth under the auspices of the New York Zoological Society, will begin the six months of study without any single goal in view. The purpose of the expedition, Mr. Beebe declared yesterday, is to get "any kind" of available deep-sea life, and the party will not seek any particular variety.

"It will be just like going to Mars or Jupiter," he added, "as you don't know just what you are liable to find." Some new devices will be used in this expedition. One is the new radium-covered type of hook for deep sea work. A special diving bell will be used for going into deep waters.

Another is the camera Dr. Beebe will use. It is a brass box affair containing a hand-operated motion picture camera, weighted so it will sink to the operator's level beneath the surface. He had taken pictures at 60 feet depth and contemplated trying it at 90 but was dissuaded by divers. The camera may be tried at 70 feet, however, he declared.

A seagoing tug will take the party out from Nonsuch Island whose surrounding waters reach a depth of two miles in places. Nets secured to sounding wires will be used for fishing. In shallow depths he will use percussion caps to start the fish.

Dr. Beebe is accompanied by Mrs. Beebe, John Tee-Van, general assistant; William K. Gregory, scientific associate; Sven von Hallberg and Helen Tee-Van, artists; Robert White-law, photographer, and William Merriam. Several of the party have accompanied Dr. Beebe on preceding expeditions. Other scientists may join the party later.

Gandhi Prepares Plan for Boycott

Would Eliminate Foreign Cloth and Substitute Native Product

Bombay.—For carrying out the congress program regarding the boycott of foreign cloth with the aid of khadi (handspun and handwoven cloth), Mahatma Gandhi has prepared a scheme for submission to the Working Committee of the Congress.

The scheme requires congress organizations to call for contributors to go from door to door in every town and village having a congress committee and collect foreign cloth and deliver or receive orders for khadi. Foreign cloth, it is stated, should be burned. Wherever possible, foreign cloth dealers should be individually visited with a view to inducing them to stop further purchase of foreign cloth and to cancel all cancellable orders.

Picketing of foreign cloth shops may, it is pointed out, be undertaken wherever possible and where there is no danger of violence being committed by the congress pickets. The help and co-operation of all political and other organizations should be solicited in the campaign and the help of patriotic women should also be enlisted.

The French-Canadians Go Ahead

La Presse (Ind.): The progress of the French-Americans in public affairs has just been confirmed anew in the municipal elections which have taken place in New England. . . . The Province of Quebec, which is the mother country of most French-Americans, watches with legitimate pride their progress and their political success. In their progressive emancipation, their traditions, their racial influence establishing itself in the very heart of American society, especially in the Eastern States, Quebec has good reason, to congratulate them. But, faithful to its motto and guarding the memory of its past, it reminds them that there is always sat its fire side a warm place for those who wish to return.

He blamed politicians who had pursued wrong policies since the war for the impending crisis.

No Other Spreader Gives You This!

Only on the Model 8 NEW IDEA Spreader can be found the unequalled NEW IDEA DISTRIBUTER—the original of all "wide-spreads." The shape of the blades add their position on the shaft give the smooth, wide spread of finely pulverized manure that is characteristic of NEW IDEA work.

We have selected this spreader for you because of this and other exclusive and patented features that are found only on Model 8 NEW IDEA Spreader. Let us show you how these features will save you time and money.

The place for the Knocker is out— Trying to get rich has kept many side the door. From being happy.

WIT AND HUMOR

Educative Wanderlust "They say if there's anything in a man, travel will bring it out." "You tell 'em! I found that out my first day at sea."

That's the Kind They Want Druggist—Yes, Miss, you'll find most ladies like this lipstick. The Girl—You couldn't—ah—tell me the kind that men like, could you?

The little group of country folk had been watching the band play for several minutes. They had never seen a trombone before, and the player of that instrument received particular interest. Finally, one farmhand nudged another with his elbow. "Come on," he said, "it's a fake. He don't swaller it every time."

"Mother?" "Yes, dear." "Tell me a fairy story before I go to bed, will you?" "Wait till your father comes home dear, and he'll tell us both one."

Tom—Well, Jim, I can tell you are a married man all right. No more holes in your socks. Jim—No, sir. One of the first things my wife taught me was how to darn them.

Sandy was fishing. Donald, passing, asked: "How are the fish to-day, Sandy?" "I dinna ken," answered Sandy. "I've dropped them a line, but so far they've made no reply."

A romantic young man of Rangoon, with a lute by the light of the moon, sang, "I'll die for you, love." When a voice from above said, "You will if you don't shut up soon."

Salesman (at shirt counter)—Looking for something in a shirt, madam? Irate Woman—Yes, indeed! About 165 pounds, and he's kept me waiting here for nearly an hour.

A certain bishop was being patronized by a millionaire. "I never go to church," the millionaire said. "Perhaps you have noticed that, Bishop?" "Yes, I have noticed it," said the

bishop, gravely. "Well, the reason I don't go to Church is that there are so many hypocrites there." "Oh, don't let that keep you away" said the bishop smiling. "There is always room for one more."

Two negro expressionists raised their trucks at the depot. "Hey dar, culated man," yelled one to the other, "I'll knock yo' out of house an home of yo' don' back up." "We got no home," retorted the other often-driver, "Now wha yo' gwine do 'bout it?" "I'll dig yo' one, black boy—I'll dig yo' one."

Veronica (eagerly)—What did father say, Jack? Jack—I'm not quite sure whether he said "Take her, young man," or "Take care, young man."

"She's Done Gone" A salesman bringing his bride South on their honeymoon visited a hotel where he boasted of the finest honey. "Sambo" he asked the colored waiter, "where's my honey?" "Ah don't know, boss," replied Sambo, eyeing the lady cautiously. "She don't wuk here no mo'."

The Race Question "Is this the hosiery department?" asked the voice over the phone. "Yes." "Well, have you any flesh-colored stockings?" "Plenty of them," answered the weary saleswoman; "whaddy want—pink, yellow or black?"

Teacher—Why is English called "mother tongue?" Tommie—Cause father never gets a chance to use it.

One of the speaker's chief points concerned the modern, common-sense style of women's dress. "Do you know," she cried to her audience, who were nearly all of her own sex, "that our present style of sensible clothing has reduced accidents on trams, trains and busses by at least fifty per cent?" She paused to let this sink in. "I gave a bright young man his opportunity. 'You'll excuse me,' he said, politely, 'but why not do away with accidents altogether?'"

YUHAUTOREADTHIS! He had choked her— She was dead there could be no doubt about that. He had listened to her dying gasp. Now she was cold—cold as the hand of death.

Yet in his anger he was not convinced. Furiously he kicked her. To his amazement she gasped, sputtered and began to hum softly. "Just a little patience is all it takes John," remarked his wife from the rear seat.

A Scotchman's idea of the world's most practical alarm clock is a cash register to keep his money in. It's ring never fails to awaken him!

Mr. Phillip Rehkopf, of Kitchener, is visiting relatives here for a few days. Mrs. Peter Walner of Hanover visited her parents, Mr. and Mrs. John Grub of here last Friday.

Mr. Clarence Rossel has added another improvement to his up-to-date farm, by installing a milking machine, as he intends to do more dairy farming in the future.

Messrs. Charles Schwan and Peter Kroetsch motored to Waterloo on Saturday to spend the week-end with relatives. Mr. Willie Reutz, of Shaunavon, Sask., left for his home on Friday, after selling three car loads of horses in this vicinity.

Mrs. George Becker, who was seriously ill last week is on the mend. Mr. Clarence Rossel has added another improvement to his up-to-date farm, by installing a milking machine, as he intends to do more dairy farming in the future.

The Ripley Express has been sold to J. J. Hunter of Kinardine, who will publish the issues starting April 4th. The Express was established by Geo. H. Mooney thirty-five years ago, who built up a large circulation and a substantial advertising and job printing patronage. Five years ago Mr. Mooney retired from the journal and saw succeeded by his daughter, Miss Adeline Mooney as publisher and editor.

(By Walt Mason) A mountain of books have been written, to show us the path we should tread, and we have been laden with precepts, by sages both living and dead; and, most of the wisdom is useless, for all that a man needs to do, is just to be gentle and true, lad, just to be gentle and true. The name of the teachers is legion who'd point out the road to success; they'd have us believe that the journey, unguided is full of distress; the secret, however simple, and easy to carry in mind; it's just to be honest and kind, lad, just to be honest and kind. I don't care a cent for the theories and creeds that the wise men expound, for all the words that are thundered, are merely a wind and a sound; the logic of life is so simple, it leaves all the dogmas behind; it's just—to be honest and kind, lad, just to be honest and kind.

Wally—I got a rare old gift for Christmas — one of Caesar's coins. Dick—That's nothing. I got some of Adam's chewing gum. An Ontario mining authority, in warning the public to exercise care in purchasing mining stocks, says that a lot of people buy on what they call a tip, much as they do in betting on horse races. His advice is for investors to study the market and know something about the mines. This is sound sense, but it is to be feared that the buying on "tips" will continue, unless human nature undergoes some very radical change.

NEUSTADT MAN TAKES OWN LIFE

George Liesemer, a well-known citizen of Neustadt, committed suicide by hanging himself to one of the beams in his barn at the rear of his home last Wednesday. When he was missed during the dinner hour one of the members of his family went out to the barn to see what was keeping him and found his lifeless body, still warm, hanging to the beam.

Following the discovery Dr. Brown Sr., of Hanover, coroner, was notified and constables called. After making a complete investigation of the circumstances in connection with the case it was apparent that it was a

clear case of suicide, and an inquest was unnecessary.

The late Mr. Liesemer was a man about 50 years of age and had resided in the village of Neustadt for many years. He is survived by a wife and two children. So far as can be ascertained no motive has been found which would cause him to end his life.

GLADIOLUS GROWING FOR AMATEURS

Almost anyone can successfully grow gladioli for they do not require much space, they will thrive in almost any soil, and they are of easiest culture. There are, however, a few things that must (and must not) be done if one would be reasonably sure of success.

First of all, it is generally admitted that closely spaced bulbs give the best results. This, of course, may be overdone, yet I am frank to say it irritates me to see a garden where gladioli are planted from eight inches to foot apart. To me they look lonesome, and with the exception of a few branching varieties like Los Angeles, I believe anyone will have better results with reasonably close planting, to say nothing of the garden space saved for other purposes.

To be definite, I believe that a double row of bulbs spaced three or four inches between centres each way is entirely reasonable and safe. This means about eight to the foot of row, so that a row 12 feet long will take about 100 bulbs. For medium-sized bulbs, a little closer may be permissible, if single rows are preferred, I should recommend placing bulbs about their own diameter apart. For planting in beds, the plan that suits me is to lay out rows across the bed about six inches apart and place the bulbs from three to four inches apart in rows. This will take from six to eight bulbs per square foot, so that a bed three feet wide by five feet long will take about 100 bulbs. If the bed is more than three feet wide, it will be wise to leave a wider space each three feet, to serve as a walk.

Another attractive result is obtained by planting a clump of from 12 to 25 bulbs of one variety in a vacant space in the border. Be careful not to place them too close to other plants or where they will be shaded for any considerable part of the day, or where roots of trees or herbaceous plants will rob them of soil moisture, for gladioli absolutely require two things—plenty of daylight and water, especially around blossoming time.

Catalogues frequently state that gladioli may be safely planted in any good garden soil, and this is literally true. I have seen fine quality gladioli growing in the lightest of sandy soil, in heavy clay, and in peaty muck. Varieties differ in soil requirements, but most any soil, provided it does not entirely dry out in hot weather and has reasonably good drainage. Again, do not plant gladioli near foundation walls of buildings, for repeated trials have proven that best results are improbable in this location. As mentioned before, if planting herbaceous border, keep in clumps by themselves, well separated from other plants. If grown for cutting purposes, no place is better than a few rows in a vegetable garden, where they will have full sunlight and frequent cultivation.

It is somewhat risky to drive your car without a 1929 license plate on it.

J. B. Bowe's weather forecasts for the month of April: About the first half of the month will be dry and milder than the average. Then about ten days with very heavy winds, rain, snow and very cold.

BLAZE AT TEESWATER

Shortly after three o'clock Friday morning last the residents in the down town section were startled by sound of the fire alarm bell and the prompt action on the part of those living near probably saved the Jeffery Hardware building, where the fire started in the floor from an overheated stove. They had been doing some inside painting and left a fire on for the purpose of drying the paint. The first intimation that anything was wrong came to the residents over the hardware, where Mrs. Batte was awakened by the smoke. After waking up the children Mr. Batte put in the alarm and other residents right near were first on the scene with the hand extinguishers. The side door was forced in and in a few minutes the contents of four extinguishers helped to keep the blaze under control until the hose was connected and the water pressure got up. Fortunately, at the back part of the building, there is no cellar, or otherwise the circulation of air would have fanned the slowly burning fire as it ate its way through the floor. The flooring and joists for two feet around the stove were consumed, ceiling and walls were slightly scorched, harness and leather goods in proximity of the stove was damaged and the whole stock more or less smoked up. No estimate of the damage can be accurately made although the adjusters were on the job last week-end.—News.

Some wives may feed tramps a meal just to see a man eat a meal without finding fault with the cooking.

Laughing through her tears, April brings the world to bud and blossom and swings the world of business to the summit of springtime.

J. N. SCHEFFER (Executors)

WHEN THE RAIN COMES A-PITTER-PATTER

A BLACK cloud hangs overhead. Great blobs strike and splash on your roof. In a moment comes the torrent—harmless if your roof is tight and secure.

Even light summer rains have a way of finding the smallest crack or chink in the roof of your home—cumbering your plaster, spoiling your interior decorations, and drenching your rugs. How essential, then, that you own a roof which is immune to ordinary roofing ailments—a roof that cannot warp—the wind cannot loosen—the driving snow and sleet cannot harm.

Brantford Asphalt Slates give your

home the highest degree of weather and fire protection. For Brantford Asphalt Slates neither swell or shrink, split or chip, curl or bulge, rust or decay. Yet they cost no more.

You can entrust the safeguarding of your family and furnishings with perfect confidence to these handsome shingles. For summer and town homes—for schools, churches, and public buildings they are equally desirable—not only for their security but for their exceptional beauty and economy.

Write for copy of booklet "Beauty With Fire Protection"—an authoritative treatise on the proper type, design, finish and colour for your roof.

Sunday School Lesson

April 7. Lesson I—The Ministry of Isaiah—Isaiah 6: 1-5; 20: 1, 2; 38: 1-5. Golden Text—Then said I, Here am I; send me.—Isaiah 6: 8.

I. THE CALL OF ISAIAH, Chap. 6: 1-13.
II. THE WAR WITH SYRIA AND ISRAEL, AND THE SIGN OF IMMANUEL, Chap. 7: 1-17.

III. CONQUEST OF EGYPT BY ASSYRIA PREDICTED, Chap. 20: 1-6.
IV. THE KING'S ILLNESS AND RECOVERY, Chap. 38: 1-22.

INTRODUCTION—The series of Old Testament studies which begins with this Lesson extends from Isaiah to Malachi, from the latter part of the eighth to the latter part of the fifth century, B.C. It covers the period of the great prophets whose messages to the people of their time have come down to us in the books which bear their names.

The period of Isaiah's ministry in Judah and Jerusalem, about B.C. 740 to 700, saw the rise of the first of those great military empires which sought to rule the world by armed force. The rapid expansion and increase of power of Assyria began with the reign of Tiglath-pileser III, B.C. 745-727, who is mentioned under the name of Pul in 2 Kings 15: 19 and 29, as interfering in the affairs of Israel and carrying off many captives. From its capital city of Nineveh, on the upper waters of the Tigris River, the power of Assyria, under Tiglath-pileser and his successors, Shalmaneser IV (2 Kings 17: 3), Sargon (Isa. 20: 1), and Sennacherib (2 Kings 18: 13), rapidly spread to the westward over all the smaller countries as far as the Mediterranean Sea and the Nile, converting them into provinces, or tributary states of the empire. Against that power there was vain resistance, or equally futile and vain rebellion, which only resulted in more tragedies of war, and heavier burdens of tribute, or in more deportations of captives. In this way both Israel and Judah suffered during the lifetime of Isaiah. It was given to him and to his contemporaries, Amos and Hosea in the northern kingdom of Israel, and Micah in Judah, to interpret to the people of their time these distressing events, to show them the hand of a just and merciful God in all that happened, to call to repentance, and to promise a brighter and happier future to a repentant and purified nation.

Long centuries afterward, a Jewish scholar and sage wrote of Isaiah that he "was great and faithful in his vision," and that "he saw by an excellent spirit what would come to pass at the last, and he comforted them that mourned in Zion."

I. THE CALL OF ISAIAH, Chap. 6: 1-13.
This chapter is generally, and it would seem rightly understood as telling the story of Isaiah's call to the prophetic ministry. It will be interesting and helpful to compare this story with that of the call of Moses (Ex. ch. 3, of Samuel (1 Sam. ch. 9), of Elisha (1 Kings 19: 19-21), of Amos (Amos 7: 14-15), of Jeremiah (Jer. 1: 4-10), and of Ezekiel (Ezekiel chaps. 1 to 3). It is evident, in every case, as in many others that might be cited, that there is an assurance and certainty of the divine call and commission to a great task.

The date (v. 1) may be approximately fixed, by a comparison of the Biblical chronology with that of the Assyrian monumental records, as B.C. 740, or a year or two later. The story was probably written some years later, and the vision, therefore, interpreted in the light of subsequent actual experience in the prophetic office and ministry.

The following elements in the vision are worthy of special notice: (1) The sense of the immediate presence of the Lord, enthroned in holy majesty in his heavenly temple; (2) the awakened sense of unfitness, both his own and his people's to live in that holy presence; (3) the unspoken prayer answered by an experience of cleansing as by fire from God's altar of sacrifice; and (4) the call to service and the ready response.

The seraphim (vs. 2-6) are evident in angelic beings attendant upon the divine King. They are nowhere else mentioned in the Old Testament, but the same Hebrew word is used of the fiery serpents in the wilderness (Num. 21: 6). Since the angelic figures called "cherubim" are associated in poetic imagery with clouds and wind (Psalm 18: 9-11), it may be assumed that the figure in the seraph is suggested by the flashing lightning. Here the seraphs are winged human forms, with voices, hands and feet.

The discouraging results of his preaching and teaching (vs. 9-12) are

View of Wrecking Train Clearing the Line

Colonist car telescoped by baggage car on train No. 3 which was on this railway car that at least three railway employees of C.N.R. and a not fully known number of people were cremated. Passengers after the crash pushed the cars in the rear of this car away from the burning inferno.

such as could hardly have been anticipated by Isaiah at the beginning of his ministry, but they become apparent as his work proceeds. Compare the experience of Jesus (Matt. 13: 14-15), and of Paul (Acts 28: 23-28).

II. THE WAR WITH SYRIA AND ISRAEL, AND THE SIGN OF IMMANUEL, Chap. 7: 1-17.

Isaiah took a keen interest in the political affairs of his time. He had very pronounced views regarding what was best for the country, and what he believed to be the mind and the will of God. He was still a young man when the kings of Syria and Israel formed a league against the advancing power of Assyria. They invited Ahaz, king of Judah, to join them. When Ahaz refused, they invaded Judah, intending to take the kingdom from him and give it to one who was favorable to their designs. Ahaz, in great fear, sent ambassadors to the king of Assyria imploring his aid, Isa. 7: 1-5, and 2 Kings 16: 5-9. Assyria responded by invading Syria and Israel, 2 Kings 15: 29; 16: 9. Isaiah, knowing that this act of Ahaz involved the subjection of his country to Assyria, opposed it with all his might. In a series of messages to the king he counseled patience, strict neutrality and faith in God, vs. 3-9. The final message challenged the king with the sign of Immanuel. "God with us," which contains the first definite prediction in Hebrew prophecy of a coming Saviour, v. 14.

III. CONQUEST OF EGYPT BY ASSYRIA PREDICTED, Chap. 20: 1-6.

An inscription of Sargon (B.C. 722-705) fixes the date of the siege of Ashdod in the year B.C. 711. The fortunes of Judah were closely bound up with those of the Philistines and both were being incited by Egypt to war against Assyria. Isaiah, both then and afterward, was profoundly distrustful of Egypt, and here predicts its ultimate conquest. Wearing only the simple dress of a captive he presents in his own person, to the king and people of Jerusalem, what he declares will be the fate of Egypt.

IV. THE KING'S ILLNESS AND RECOVERY, Chap. 38: 1-22.

Hezekiah, son of Ahaz, was a good king. The historians speak well of him, 2 Kings 18: 1-7. He seems to have held Isaiah in high esteem and the prophet's influence over him throughout his reign seems to have been very great. The story here told

appears also in 2 Kings 20: 1-11. It shows us Isaiah as spiritual adviser to the king, bearing him messages from the Lord. The psalm that follows illustrates the simplicity and strength of Hezekiah's faith.

Forestry Aids Palestine Hills

Large Contribution Toward Planting Work Reported Forthcoming from Tree Lover's Society—Timber Declared First Need of New Zionist Home

Jerusalem—"The future prosperity of Palestine is bound up with forestry," declared Richard St. Barbe Baker, of London, founder of "Men of the Trees" Society, visiting Jerusalem in connection with a revival of the ancient Jewish festival known as the "Trees' New Year."

"The ancient prosperity has disappeared with the hill forests," said Mr. Baker. "The barren hills of Judah are calling out for trees. Their rain-washed slopes are bare of humus. The struggling peasant in scratching a poor existence from the soil, looks up to the hills for forest and protection for his crops, but finds there no help. If those hill tops could be planted, it would make his task lighter." "The Men of the Trees," said Mr. Baker, "are anxious to help Palestine in the work of reforestation, and have formed a fund for this purpose."

It is learned it is possible that "The Men of the Trees," of which Sir Francis Younghusband is chairman, will make Jerusalem the centre of the world movement. In any event arrangements may soon be made to spend \$250,000 of this organization's funds on tree planting in Palestine.

How to Tell a Good Egg From a Bad

"What is a bad egg? One that stinks with hydrogen sulphide, or one that contains a partially formed chick."

"What is a good egg? One that has a thick jelly-like white, an upstanding yolk, a firm membrane separating white and yolk, a sheen over the whole contents."

"What is a poor egg? One with either watery or turbid white, a yolk that flattens out or bursts because of its thinned membrane, a dull appearance throughout the contents."

This egg advice is taken from the scientific department of the current issue of "Time."

"Poor eggs are practically as edible and nourishing as good eggs, merely less pleasant to look at and hence less appetizing," continues the "Time" article.

Cornell University has been making a study of egg deterioration and preservation. Last week Paul Francis Sharp, Cornell's professor of dairy chemistry, who has been working on the matter with other Cornell men, wrote a preliminary report to Science. Egg spoil, he stated, because: (1) they contain germs caught from the hen or absorbed through the shell pores; (2) they lose water by evaporation which helps break down the membrane between yellow and white; (3) they are kept at a temperature too high, which causes chemical reactions, if not the formation of embryos; (4) most important and only newly discovered, the alkalinity of white and yolk has increased.

"Alkalinity increases because carbon dioxide escapes through the shell from the white. Then the white absorbs carbon dioxide from the yolk, only to lose it again through the shell. Result of the loss is that the yolks get flabby, the whites watery."

"These observations suggested to Professor Sharp's group the way of preserving eggs in their newly-laid

condition, a way which they have found efficacious.

"It is simple: store the eggs in a place filled with a low concentration of carbon dioxide. That keeps a carbon dioxide balance within and without the eggs. Cost is 1c per case of eggs, .03c per dozen."

Balmy Weather Seems to Predict Early Spring

City folks find themselves at a disadvantage when it comes to comparing dates from one year to another such as the early or late arrival of spring. Farmers are probably more sure of the coming and going of the seasons but on the subject of spring they are argumentative as George Godfrey points out in the April issue of "Successful Farming."

"Every spring," he says, "you hear a lot of complaint about the lateness of the season. It is mighty easy to forget from one year to another just when we do start into the field. I was township trustee for several years and annually attended a meeting as prescribed by law, the first Monday in April. Only once did that meeting come after we had started work in the field. Often there was still much snow. Every year, however, except the one early spring, we discussed the backwardness of the season. I have decided that for us in this latitude we are about in normal time if we get into the field by the middle of April."

GLAD IT ISN'T YOU
Cock-a-doodle-do!
My dame has lost her shoe;
My master holds his pocketbook,
Looking mighty blue.
Cock-a-doodle-do!
The careless, worthless shrew!
'Twill cost my master twelve good plunks
To get another shoe.

Radio Promotes True Democracy

Radio has promoted true democracy and has served to abate partisanship in American politics, claims General J. G. Harbord, writing in the April "Forum."

"The peril of democracies in all ages has been the demagogue," the "Forum" article reads. "The devices of the orator, the mystery of personal magnetism, the gift of leadership, and the contagion of mob feeling have swayed the crowd in all times. Apparently it is one of the instincts of human beings when they came together to place themselves under the authority of a chief. The multitude always listens to the strong willed man who knows how to impose himself upon it. The audience in such cases does no reasoning; its conclusions may bear no relation whatever to the merits of the issue. Carried along by mob enthusiasm, it merely follows the leader."

"One change that has been brought about by radio is the elimination of mob feeling from political audiences. The magnetism of the orator cools when transmitted through the microphone; the impassioned gesture is wasted upon it; the purple period fades before it; the flashing eye meets in it no answering glance. Though he be one of thirty millions, each individual in the audience becomes a solitary listener in the privacy of his own home."

"A persistent weakness in our American scheme of government has been the lack of popular interest in politics and the failure of a great number of citizens to vote. The last Presidential election, however, with its huge registration, gave evidence of a greatly increased interest in the affairs of government. It is not unreasonable to attribute a large part of this to the broadcasting of political speeches. Radio brought the candidates and the issues within the family circle and made them topics of discussion at every dinner table. In a word it brought our citizens into closer contact with their government and made them more alive to the part which they should play in it."

Swap Wives and Split the Expense

Two farmers who traded wives in the subject of an item in the current issue of "Time."

"The Willis Knights had been married for 17 years and had five children," reads the "Time" story. "The Lawrence Rikansruds had been married for twelve years and had two children. The two families were friendly farm neighbors, near Minot, North Dakota."

"Two divorces were granted, last fortnight, in Minot. One automobile containing four persons immediately set out for Minot, Canada, where two marriages were performed. Having rearranged themselves, the Knights and the Rikansruds tabulated and shared expenses:
Divorces at \$65 each \$130
Marriage licenses at \$5 each .. 10
Gasoline, incidentals 10
\$150

Shorter Distance to Europe

Winnipeg, Manitoba.—The world is being made smaller not only by automobiles and aeroplanes, but by shorter routes between its chief centres. A table of distances recently compiled shows that the Hudson Bay route will effectively shorten the distance between the grain fields of Western Canada and the markets of Europe. For example, from Saskatoon to Liverpool via the Great Lakes and the St. Lawrence is 4,878 miles, but from Saskatoon to Liverpool via the Hudson Bay Railway and Churchill will be 3,783 miles, a saving of 1,095 miles. From Edmonton to Liverpool via the St. Lawrence is 5,224 miles but via the Hudson Bay the distance will be 4,182 miles, a saving of 1,042 miles. The Hudson's Bay Railway, now being built by the Canadian Government to Port Churchill on Hudson's Bay therefore promises to be an important factor in reducing distances from the Canadian prairies to the markets of the world.

MUTT AND JEFF—By Bud Fisher.

Jeff Impersonates a Mechanical Robot and the Deception is Perfect

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should be in Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Popular at Last

Eiffel Tower at Last Wins Paris by Place in Art and Romances

Paris—After dominating the sky line of Paris for almost forty years, the Eiffel Tower has become popular with Parisians.

Always intensely partisan wherever the beauty of their city is concerned, the natives of Paris for long after the exposition of 1890 were unanimous in condemning the huge skeleton of steel and cable towering above the Champ-de-Mars.

Artists and writers have changed public opinion. For years the tower has been an integral part of the background of all the innumerable paintings of the quais. Within the last four years at least four romances have been published in which hero and heroine, typically Parisian in every other respect, found the tower a trysting place. Native opinion changed. The immediate result was tribute, somewhat belated, to the memory of Gustave Eiffel, the engineer who built the tower. The monument, a bust on a circular dais, will be in place in time for commemoration of the 100th anniversary of the birth of Eiffel. The engineer was born in 1832 at Dijon, on the Cote d'Or.

Turkey to Cease Use of Arabic Letters June 1

Latin Characters Learned at State Schools Under Re-form Ordered by Kemal

People Approve Change

Angora, Turkey—Mustapha Kemal Pasha's major reform in the west-ernization of Turkey will go into effect officially on June 1. After that date Arabic writing will be entirely forbidden throughout the country and all Turks will be required to use the Latin characters which they have been learning in special government schools.

Although state papers have been written in the Latin alphabet ever since the reform was first inaugurated Arabic letters were permitted in private communications. During this time all citizens between the ages of sixteen and forty have been required to attend the national schools to learn the new characters.

Kemal Teaches Classes

The reform has proved so popular that many men and women more than forty have attended the classes, some of which have been taught by Kemal himself.

The misfortune of King Amanullah of Afghanistan, who lost his throne because of the efforts to force Occi-dental civilization upon his subjects, has made little impression here. The only concession which the govern-ment has made to tradition has been an amendment making Arabic legal for inscriptions in the mosques and for the Koran, and the temporary postponement of the adoption of Sun-day as a legal holiday instead of the Islamic Friday.

Young Minister Dies

The death of Nedjati Bey, the young Minister of Public Instruction, who had charge of the reform program, has not brought any relaxation in the government's efforts to teach the new alphabet to the 14,000,000 inhabitants. Nedjati died of appendicitis and it was charged in the Turkish press that the inefficiency of his physicians was responsible.

The Minister of Public Hygiene, re-plying to a question in the National Assembly, defended the physicians and declared the death was due solely to the gravity of the illness.

Premier Ismet Pasha temporarily took over the portfolio and continued the campaign. It is learned that Wafiq Bey, who has resigned as Am-bassador to Moscow and who formerly was Minister of Public Instruction, will succeed Nedjati. He recently was elected Deputy for Smyrna.

He who said "The Sabbath was made for man, not man for the Sab-bath," would also have said, "Mar-riage was made for man, not man for marriage."—Dean Inge.

Canada Figures on Immigration

Dominion Looks for Onflux of Nearly 200,000 This Year

Homestead Filings Gain

Immigration to Canada opened up a little brighter and more auspiciously in 1929, and should the increment re-corded in January, which is not a month of active movement, be con-tinued throughout the year the aggre-gate for the twelve months should come much nearer the 200,000 mark, says a recent Canadian Pacific Rail-way bulletin. The total of new ar-rivals in January was 4,164, as com-pared with 3,692 in 1928, an increase of 12.78 per cent. Newcomers from the British Isles totaled 1,133, as com-pared with 771 in the previous year, an increase of 46.95 per cent. Citi-zens of the United States totaled 1,573, as against 1,223, an increase of 28.61 per cent. The number of en-trants from all other countries was 1,458, against 1,698, a decline of 14.13 per cent.

Swelling the movement from across the international border, "which was the outstanding and most gratifying feature of the immigration situation in 1928," says the bulletin, were 1,787 Canadians who had made permanent homes in the United States and were returning to Canada to live, as compared with 1,683 in January, 1928, an increase of 4.99 per cent. "The month of January likewise gave indication of an active year of land settlement, with every likelihood of its surpassing in this regard 1928, which was the most outstanding of the post-war period. Canadian farm lands are again coming strongly into the limelight as the cheapest of their kind in the world. New transporta-tion arrangements for the Peace River country of Northern Alberta have in-duced a flow of settlers into that ter-ritory, which doubled its population last year.

"Projected new railway lines in yet unexploited territory in the North-west is focusing attention upon set-tlement possibilities there. Vacant lands in developed communities are proving more attractive to newcom-ers with small capital. Considerable expansion is taking place in the ir-rigated sections of Southern Alberta. There is every sign that a consider-able volume of new colonization will be accomplished in 1929.

Homestead Filings Gain

"Homestead filings, after recording an increase of nearly 150 per cent. in 1928 over 1927, started off the year with a further increment of 66 per cent. 761 homesteads being filed upon in January, compared with 457 in the corresponding month of the previous year. Alberta showed 386 filings, against 201 in 1928, this being largely due to new acreage taken up in the Peace River country, which section accounted for 33 per cent. of the Provinces filings in 1929. Filings in Saskatchewan rose from 194 to 309, both Prince Albert and Moose Jaw offices recording large increases. British Columbia more than doubled its filings, figures rising from eleven to twenty-four. Manitoba was the only Province to register a decline, figures dropping from fifty-one to forty-two.

"The Canada Colonization Associa-tion similarly started off the year in an active manner. After settling 667 families in 1928, bringing its record of colonization since inception up to 3,038 families on 715,789 acres of land worth \$29,653,958, twenty-five fam-ilies were placed on 3,227 acres of land worth \$53,490 in January of the present year, all with the exception of five families in Ontario being in the Western Provinces. The association has an elaborate program of settle-ment for the present year, with 400 families definitely ready for settle-ment at the opening of 1929. In ad-dition to which a reservoir of 400 fam-ilies is to be created and maintained at that strength. This is being ef-fected through temporary placement, while a cottage scheme is being de-veloped for the benefit of British set-tlers. Only those families will be immediately settled on the land which have sufficient means of their own or which insist on immediate settlement this to further offset possibility of

Pharaoh's Games Shown at Cairo

New Tut-ankh-Amen Relics on View for First Time

Cairo—Howard Carter is continuing his work on the Tut-ankh-Amen tomb at Luxor and treasures of antiquity are still being brought to view, much to the delight of tourists. The public is now having its first opportunity of seeing at the museum the new objects from the tomb, which arrived in Cairo re-cently in 90 cases, heavily guarded. To-day, lovely alabaster vases and inlaid faience are exposed to view, also figures, finely worked, of the sacred ibis and a representa-tion of the Egyptian god "Bes," a form of vase, which is still sealed, probably containing scent, an inter-esting hand drill for burning holes in wood and making fire, a gold spec-imen inlaid with multicolored glass, which is a unique find, a lovely silver vase which looks as though made yesterday.

Other exhibits include a large model in alabaster of a boat, its heads form-ing the prow and stern, a cabin in the form of a shrine, with two bronze seated a woman, while in the bow is seated a woman, with two bronze swords, of which only one specimen is known—that Khepesh sword.

Another remarkable exhibit is a large bed, heavily gold plated, which resembles other types of Tut-ankh-Amen furniture, the fibre springs re-maining in an extraordinary state of preservation.

Interesting examples of games played at Pharaoh's court are also shown, including a fine ebony gam-ing board, still highly polished, marked out in squares on which are pictures which determine the coun-ter's moves. An ivory drawer contains knucklebones and four flat pieces of ivory, which were thrown as an equivalent of dice, and another two miniature ivory gaming blocks.

Other lovely new exhibits are now on view, and many smaller, which are still unpacked, and unlikely to be shown before next winter, when it is probable that the Tut-ankh-Amen tomb will have been completely cleared.

Australian Gold Yield Declining

Largely Increased Costs of Production the Cause of Diminution

Melbourne, Vic.—Gold is to be found practically all over Australia, but for various reasons, not the least of them labor troubles and conse-quently largely increased costs of production, the yield is declining very considerably. In 1928 the total gold obtained was 457,201 ounces fine, which is 47,556 ounces less than in 1927. The decrease applies to all states.

In Victoria the amount won was less by 4,621 ounces than in 1927, and the New South Wales yield fell short by 5,200 ounces. The closing of the rich Mount Morgan mine in Queens-land, which also abounds in copper, gave Queensland a very low return, but with the price of copper now at an attractive level, there is a big pos-sibility that capital will be forthcom-ing to enable work to be resumed there.

Mines in Western Australia, the richest of all the states in gold, main-tained a steady output, the yield being not far below that of 1927.

Master of the House (nervously): "Better not light the fire with paraffin, Norah. Remember you promised to give a week's notice before you left us."

RED ROSE ORANGE PEKOE is extra good

difficulties arising from inexperience. From these temporary placements the association will draw steadily for its permanent settlement activities.

Land Values Rise

"Canadian farm lands, though still cheaper than others of their class elsewhere, are rising steadily in value. In 1901 the average acre of farm land in Canada, improved and unimproved together with buildings thereon, was \$22.13 per acre, whereas in 1911 it had risen to \$30.41, and in 1928 was worth \$38. Taking the Province of Alberta as typical of West-ern Canada in 1901, the average acre was worth \$6.12; in 1911, \$21.71, and in 1928, \$28, the rise in the first de-cade of the century exhibiting the effect of active settlement. Due to their higher productive value in the last few years farm land values in many Provinces have risen lately.

"Also because farm labor is com-ing to be increasingly regarded as the logical and surest road to farm own-ership, the Governments figures on farm wages prevailing last year have interest. The demand for farm workers in Canada at all times is greater than the supply. Last year the Canadian Pacific Railway was able to fill only about half of the ap-plications filed with it for single male workers, much less than half of those for domestics, and only about a quar-ter of those for families on farms.

"For the whole of Canada the aver-age wages per month of farm help during the summer season of 1928 were for men \$40 and for women \$24. In addition, the value of the board is placed at \$23 for men and \$24 for women. The total wages and board thus amounted to \$63 for men and \$44 for women. In Western Canada wages were higher, being \$61 and \$41 respectively in Manitoba; \$69 and \$47 in Saskatchewan; \$72 and \$49 in Alberta, and \$77 and \$52 in British Columbia.

Cost of Living

Quebec Evenement (Cons.): There are four immense regions of different character in the United States. The conditions of life vary as much from one region to another as between two widely-separated countries like, for example, Mexico and Spain. In the north-east, the north-centre and the far west certain industries and cer-tain labor unions are formidably or-ganized. Some artisans, such as au-tomobile workers, construction hands and railway workers, receive salaries which seem very large, even in com-parison with the salaries paid in Can-ada. But in New York, Philadelphia, Chicago, Seattle and San Francisco the cost of living is materially higher than it is with us.

NEW BABY DISTURBS TIRED OFFICE WORKER

"When my oldest boy was just a few weeks old he was badly constip-ated from my milk," says a Nebraska mother. "He kept us awake so much, my husband almost slept over his desk at the office. Then my doctor got us to give Baby some Castoria and the next day he was much better. His stomach and bowels began acting perfectly and he gave us no more trouble." Avoid imitations of Castoria. The Fletcher signature marks the genuine, purely vegetable, harmless Castoria, doctors everywhere advise for those ill of babies and children, such as colic, constipation, colds, biliousness, etc.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vege-table Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak, I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vege-table Compound, and soon I was able to get up and do my work. I have taken three bottles and I feel much better and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."

Miss. F. Scatton, Box 220, Mitchell, Ont.

Why Build to Burn?

Use Gyproc, the Fireproof Wallboard. Makes a smooth, solid, permanent wall. Takes any decoration paper, paint, Alabastine, Gypdex, Panels. It is the very thing for new partitions and repairing walls and ceiling. It is a stronger, thicker, lighter and better made wall-board, in 6, 7, 8, 9 and 10 foot lengths; 32" and 48" wide; 7-16 of an inch thick. We have a full stock of Gyproc and also the joint filler to make a smooth finish.

To decorate this wall in the most beautiful and most economic way, use Alabastine in any one of its twenty-one tints, besides white. You can re-decorate, without fuss or muss, every room, so that walls, furniture and curtains are in perfect harmony. Alabastine is sanitary, and, unlike wall papers, there is no pulp or paste in the Alabastine to decay and become infected with germs.

For \$1.50 you can buy enough Alabastine to decorate any average-sized room. The difference between the cost of Alabastine and wall paper is sufficient to pay for the services of an interior decorator, if one does not wish to do the work oneself.

Call at the Hardware Store for samples of Gyproc and an Alabastine Color Card.

ARE FALL FAIRS FUNCTIONING?

At a recent meeting of directors of Midway Fall Fair committees were appointed to revise the prize list for current year. Here is a hint from the Farmer's Advocate to those who have charge of the revision of the fruit list.

An analysis of 44 fall fair prize lists made by E. F. Dalmer revealed 80 varieties of apples worthy of recognition by fair boards. The Fruit Branch at Toronto and the Ontario Fruit Growers' Association endorse a list of only 7 varieties for commercial planting. The Fruit Branch is a part of the Department of Agriculture and is, of course, maintained by the Government. The fall fairs are supported by the same Government through the Department of Agriculture to the extent of \$85,000, and the Minister is constantly being asked to raise the grant to \$100,000. Here we have one Branch of the Government recommending a list of 7 varieties and another organization working under the parental care of the same Government endorsing a list of 80 varieties.

Too many varieties of apples is the bane of the industry. The fall fairs can and should do something to correct the situation. The Agricultural Societies Branch recommend a list of varieties, and that is surely sufficient to cover all contingencies of climate, markets and local prejudices. Why have the fall fairs not followed the advice sent them from headquarters?

The agricultural side of our fall fairs is meddled with too much by town people who think they know all about farming because they have a Duchess apple tree in their backyard and a flock of chickens which annually tear up their neighbor's garden.

The fall fairs have a wonderful opportunity to point the way to better marketing methods, which, after all, are based on producing what the market demands. By giving prizes to 80 varieties of apples, 60 at least of which are obsolete and undesirable, the fairs are confusing the buying public and misinforming the producer.

The high ways of life are the happy ways. No sermon seems long which is interesting. Too many family cars are equipped with grumble seats. No man ever loses more than when he loses his head. No preacher will ever lack for an audience who is really helpful. The easiest way to tell a boy how to go straight is to show him. Blessed is the church whose preacher doesn't do all the work. It takes a lot of brass for some men to talk about the Golden Rule. The devil is never worried by the preacher who is afraid to take sides.

DRIVERS CAN TEST THEIR OWN BRAKES

Though the latest brake testing machines are not available to every motorist there is no reason why any driver should be at a loss to know whether his rear brakes are equalized in the opinion of brake experts. Intelligent use of the speedometer is said to be a handy means of meeting this problem. The test is outlined as follows: Drive at a normal speed along the road and apply the brakes forcibly. If the speedometer dial immediately swings back to zero the indications are that both rear wheels have locked. If either of the two rear wheels fails to lock the speedometer will continue to register car speed until the machine actually comes to a stop. While the test does not assist in checking front wheel adjustment it is useful in helping motorists guard against unequal adjustment of the rear wheel brakes, a condition which is more undesirable than unequal adjustment between front and rear sets of brakes.

OTTER CREEK

Mr. and Mrs. Adam Seegmiller spent Sunday in Neustadt visiting friends.

Mr. Albert Wells, teacher of Carleton Place, spent the week-end with Mr. and Mrs. C. M. Hossfeld.

Miss Verna Seegmiller returned home on Sunday, after spending some time with her aunt, Mrs. Demerling.

Mr. Joe McPhail called on friends in Otter Creek on Good Friday.

Mr. Otto Reis of Hanover spent Good Friday with his brother, John, and together they called on friends in Formosa.

Miss E. Warder, teacher at Otter Creek, is holidaying at her home in Southampton.

WORTH REMEMBERING

The high ways of life are the happy ways. No sermon seems long which is interesting.

Too many family cars are equipped with grumble seats. No man ever loses more than when he loses his head.

No preacher will ever lack for an audience who is really helpful.

The easiest way to tell a boy how to go straight is to show him. Blessed is the church whose preacher doesn't do all the work.

It takes a lot of brass for some men to talk about the Golden Rule.

The devil is never worried by the preacher who is afraid to take sides.

Another good memory test is to sit down and recall the things you were worried about this time last year.

Terms—All sums of \$10 and under Cash. Over that amount Twelve Months credit will be given on approved joint notes bearing 5% int.

JOHN KUPPERSCHMIDT, Prop. John Purvis, auctioneer

According to Dr. Fitzgerald, Professor of Hygiene at Toronto University, Canada loses industrially through sickness, the vast sum of \$311,000,000.

In the face of this information it is not hard to understand why so much stress is being laid by the medical profession on preventive medicine.

The government is spending freely, but the people of Ontario are being taxed everywhere they turn. There is the Dominion income tax, the municipal income tax, a tax to drive a car, a tax to keep a dog, a tax to run a radio, a tax to buy liquor, a tax to get married, a tax to hunt.

The Deseronto Post says they have forgotten one possible source of revenue: a license to run a baby carriage.
