The copy filmed here has been reproduced thanks to the generosity of:

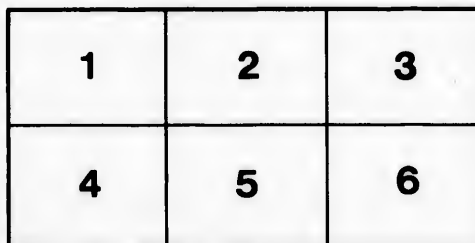

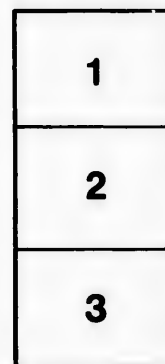

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

### TRUST AND AGENCY DEPARTMENT.

Under the approval of the Ontario Government the Company is accepted by the High Court of Justice as a Trusts Company, and from its organization has been employed by the Court for the investment of Court Funds. The Company acts as Executor, Administrator, Receiver, Committee of Lunatics, Guardian of Children, Assignee of Estates, Agent, etc., and as Trustee under Deeds, Wills, or Court Appointments or Substitutions, and also as Agent for Executors, Trustees and others, thus relieving them from onerous and disagreeable duties. Under Sec. 3, of 35 Vic., cap. 83, the Company may be appointed Administrator without any security being required other than the responsibility of the Company. The appointment of the Company in this capacity has been found in many cases a great convenience to the next of kin, where the extent of the personal estate made it difficult for them to furnish the necessary security, a difficulty which has been increased by the recent legislation, under which the real estate, as well as the personalty, devolves upon the administrator, and the value of both together has to be taken into consideration, in fixing the security required of the Administrator. The Company invests money, at best rates, in first mortgages or other securities; Collects Rents, Interest, Dividends, and acts as Agent in all kinds of financial business. It also Countersigns Corporate Securities.

### SAFE DEPOSIT DEPARTMENT.

The Vaults are in a building specially constructed, most substantial and secure, fire and burglar proof, and unequalled in Ontario, costing over \$30,000.

Safes and Compartments varying from the small box, for those wishing to preserve a few papers, to large safes for firms and corporations, are rented at low rates, and afford ample security against loss by fire, robbery, or accident. Bonds, Stocks, Deeds, Wills, Plate, Jewellery and other valuables are also stored in the Company's vaults.

## Explanation of the Articles in the Calendar.

These pages are calculate for Toronto, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

**NOTE.**—Standard times\* are given in all columns headed Toronto. In calculating, the mean time has been taken as 17m. 34s. slower than standard.

The times\* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto.

The standard times\* both for the rising and setting of the Moon's centre are given for every day for Toronto.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

**MOON'S AGE.**—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time\* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 11.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

**GREATEST ELONGATION OF THE POLE STAR.**—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

| Latitude .....                                   | 42°     | 43°     | 44°     | 45°    | 46°     | 47°     | 48°    | 49°     | 50°      |
|--------------------------------------------------|---------|---------|---------|--------|---------|---------|--------|---------|----------|
| 1st Correction for Degrees.....                  | -5' 14" | -3' 35" | -1' 50" | 0' 00" | +1' 56" | +3' 53" | +6' 7" | +8' 23" | +10' 47" |
| 2nd Correction for each minute of latitude ..... | + 1".7  | + 1".7  | + 1".8  | + 1".9 | + 2".0  | + 2".2  | + 2".3 | + 2".4  | + 2".6   |

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

|                                                      |                                     |
|------------------------------------------------------|-------------------------------------|
| Thus for latitude 43° 20'...1st correction = -3' 35" | 2nd correction + 1.7 × 20 = +0' 34" |
| " " 47° 40'... " = +3' 58"                           | " " + 2.2 × 40 = +1' 28"            |
| " " 45° 10'... " = 0' 0"                             | " " + 1.9 × 10 = +0' 19"            |

**MOON'S PHASES.**—This Table gives the times (standard 75th meridian)\* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

| Latitude .....                  | 42°     | 43°     | 44°    | 45°     | 46°     | 47°     | 48°     | 49°     | 50°     |
|---------------------------------|---------|---------|--------|---------|---------|---------|---------|---------|---------|
| Constant .....                  | 5 54 28 | 5 54 18 | 5 54 8 | 5 53 57 | 5 53 47 | 5 53 35 | 5 53 24 | 5 53 12 | 5 52 59 |
| Difference for 10' of latitude. | -1.7    | -1.7    | -1.8   | -1.7    | -2.0    | -1.8    | -2.0    | -2.2    |         |

\* In the present Almanac, the hours are numbered from 0 (midnight) to 23.

† Although these times are calculated for Toronto only, the standard times at other places not differing much from it in latitude may be obtained with sufficient accuracy for ordinary purposes, by adding four minutes for every degree west of Toronto and subtracting four minutes for every degree east of Toronto.

## Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, at 1 of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude. To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

## CANADIAN TARIFF OF CUSTOMS.

Revised and Corrected to latest date.

NOTE.—As far as possible articles have been grouped under general headings, as Iron and Steel Goods of all kinds under "Iron and Steel Manufactures;" all kinds of Oil, Fish, Spirituous Liquors, etc., under those headings; those relating to Vehicles, under "Carriages," and so on. And to avoid the enormous bulk of duplicate or triplicate references the principal word only in each article has been taken for reference, as "Coats, Fur," under "Fur;" "Wax Candles," under "Candles;" "Plated Cutlery," under "Cutlery," and so on. We believe that the table will be found easy of reference and thoroughly reliable.

## Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration (use Registration Stamp), in addition to the Postage, is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registered Letter Stamps have been issued of the denomination of 5 cents, which may be obtained at any Stamp Agency.

Registration Stamps cannot be used in payment of postage.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

On all books, pamphlets, occasional publications, printed circulars, prices current, hand-bills, and other matter wholly in print, and on packages of seeds, cuttings, bulbs, roots, scions or grafts, patterns or samples of goods or merchandise, the rate of postage is one cent for each four ounces or fraction of four ounces; and on all book and newspaper manuscripts, printers' proof sheets, whether corrected or not, maps, prints, drawings, engravings, lithographs, photographs, when not on glass in cases containing glass; sheet music, whether printed or written; documents partly printed or written, being letters, or intended to serve the purpose of letters—such as deeds, insurance policies, militia, municipal and school returns, school or college examination papers or other documents of like nature, and on all other miscellaneous matter transmissible by post and otherwise herein expressly provided for, the rate of postage is one cent for each two ounces or fraction of two ounces; and the postage rate must in every case be prepaid by postage stamps or stamped postbands or papers; provided that no letter or other communication intended to serve the purpose of a letter be sent or used in any such package or thing mentioned, and the same be sent in covers open at the ends or sides, otherwise so put up as to admit of the contents being, necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision; (if enclosed in sealed envelopes marked at ends or sides, or with the corners cut off, letter rate of postage will be charged); and that the postage rate be prepaid by postage stamp or stamped postbands or papers in all cases.

A packet of miscellaneous matter can be transmitted by mail if it exceed, 5 lbs. in weight, 24 inches in length 2 inches in width or depth.

6. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel, also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the Parcel to which it relates.

### Parcel Post Charge.

All the Dominion, except British Columbia, 2 cents per pound or fraction of a pound. British Columbia 30 cents per pound or fraction of a pound.

Prepayment by postage stamp is required, but when a Parcel is posted in the United Kingdom or Newfoundland, for British Columbia, and by inadvertence prepaid at a lower rate than that applicable to that Province the Parcel will come to Canada, liable to collection by the Canada Post Office on delivery, of the deficient postage and it will moreover be optional with the Canada Post Office to impose a fine in addition.

Parcels may also be exchanged with all countries with which the United Kingdom maintains parcel post relations.

### Fifth Class Matter.

Fifth class matter must be so packed or put up as to be opened to examination of contents and must not exceed 4 pounds in weight, nor 2 feet in length by 1 foot in width or depth. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 5th class matter is 5 cents in addition to postage.

**New Post Offices** are established by the Department whenever it is ascertained that a sufficient number of inhabitants can be accommodated, and there is a probability of a sufficient amount of correspondence to warrant such measure. When a new Post Office is required, a petition should be addressed to the Postmaster-General at Ottawa, signed by as many of the inhabitants as can conveniently subscribe the same. The petition should state the name of the township and the number of the lot and concession on which it is desired the office should be established; the distance from the neighbouring offices; whether there is a village at the site of the proposed Post Office; the names of the roads, mills, bridges, farms and houses there; the extent of the settlement to be served, and the probable amount of the mail service; together with any other facts which may form any ground for giving the accommodation applied for.

or actions against the Crown. It has concurrent

instance of the Attorney-General of Canada to impeach  
any patent of invention or any patent case or

officers for anything done or omitted to be done as such  
officer, and all actions or suits in which the Crown is  
plaintiff or petitioner.

Hon. Geo. W. B. Burbridge, Judge of the Court.  
Hon. A. Audette, Esq., Registrar.

### The Law Society of Ontario.

The Law Society was first established in 1797 by the  
Act, 37 Geo. III., c. 13, which enabled the then practi-  
sers of the law to form themselves into a society, and  
to make rules for its government. By the Act of 1822,  
3 Geo. IV., c. 5, "the Treasurers and Benchers of the  
Society" were formally incorporated; and under  
this and other statutes the Society has continued to be  
governed by a Board of Benchers, in the same manner  
as the various Law Societies of England. By Revised  
Statutes of Ontario, c. 138, the Benchers theretofore  
constituted, from time to time, by their own body, are  
now, exclusive of *ex-officio* members, elective by the  
members of the *ex-officio* consisting of the Attorney-General of  
the Dominion for the time being, if a member of the Bar  
of Ontario, and all members of the Bar of Ontario who  
at any time held the office of Attorney-General of  
the Dominion or of Ontario, or of Attorney or Solicitor-  
General of the former Province of Upper Canada, and  
retired Judges of the Superior Courts of Law or  
Judges of Ontario; the *electors*, thirty in number, being  
chosen by the ballot, for a term of five years, by the  
members of the Bar, in manner prescribed by the Act.  
The Benchers during the term are filled by the remaining  
members. On the first day of Easter Term, annually,  
the Benchers appoint one of their body to be Treasurer,  
and also President of the Society. The Benchers sit  
in convocation every term for the call of Barristers, the  
admission of Attorneys and Solicitors to Practice, and  
to enter the Society, the fees paid by whom  
for the revenue of the Society. Osgoode Hall, appro-  
priately named after the first Chief Justice, is the  
"Inn of Court," or head-quarters of the Society,

in which is provided accommodation for the Court of  
Appeal and Courts of Equity, and for the sittings in  
term of the Superior Courts; with a valuable and exten-  
sive library.

In respect to elections for the Local Legislature of Ontario, the Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually in Michelmas Term, severally select, by a majority of votes, a Judge of each respective Court to be placed on the rota for the trial of election petitions. ### Collegiate Institutes and High Schools.

Each of the High Schools (which form the Intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees

are all appointed by the City Councils, except where there is only one school in the County. The head master must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of \$400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 29 Collegiate Institutes and 89 High Schools, with 18,642 pupils, in Ontario in 1889. J. E. Hodgson, M.A., and John Seath, B.A., Inspectors of High Schools.

### Public Schools.

Each Township is divided into School Sections of suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality. There were 5,569 Public (including separate) Schools, with 495,323 pupils, in Ontario in 1888.

### Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. The Museum is freely open to the public from 9 a.m. to 5 p.m.

### Total Number of Educational Institutions.

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1888 was 5,690 attended by 514,300 pupils, and expending nearly \$4,800,000 in their support.

The type, striking through the guide, will keep the alignment absolutely perfect.

The type, striking direct to the paper, instead of through a ribbon makes this the most powerful manifold extant.

Why use a dirty, antiquated, expensive ribbon instead of a metal based pad which lasts from 6 months to a year.

Type-arms tested to last over 30 years.

No ribbons, shifts, spiral springs or safety pins. Portable, Noiseless, Perfect.

Machines sent on approbation.

# How to Learn Shorthand.

Few studies can lay claim to such wide-spread utility as Shorthand, nor can be said of any accomplishment of similar value that it can be learned so easily. The value of Isaac Pitman's Shorthand (Phonography) as a means of education is scarcely be over-rated. Being founded on a scientific and rational basis, the learning of it trains the mind and improves the intellect. Its use gives a correct pronunciation, and is a great help in learning to spell. Every facility is afforded in learning it, and the instructive books are so plainly worded and so carefully compiled, that the art is pleasantly and easily acquired. The *Cyclopædia of Education* in an article on Shorthand, states that it is "easy to write, easy to read, and easy to learn."

## Press Opinions on Isaac Pitman's Phonography.

**THE TIMES.**—Generally in use, and now the favorite system. . . . Other schools of Shorthand lay claim to greater merits, but none have succeeded in ousting Mr. Pitman's from pride of place.—27 and 29 Sept., 1887.

**THE DAILY NEWS.**—The most practical of all systems of stenography.—3 March, 1886.

**THE GLOBE.**—Has practically displaced all other systems. Is nearly universal among the shorthand writers of the present day.—26 Sept., 1887.

**THE ILLUSTRATED LONDON NEWS.**—A perfectly scientific system of shorthand. Unquestionably far superior to every other.—1 Oct., 1887.

**THE QUEEN.**—At the present time the most popular system appears to be that of Isaac Pitman. . . . The continued popularity of the system proves its success.—1 Oct., 1887.

**THE SCHOOLMASTER.**—Despite the appearance of hundreds of new systems, a large proportion of them still-born, totally unrecognised, or practically useless, Phonography still holds the field as the best system.—11 June, 1887.
