

Poetry, &c.

[From the National Era.] TO FREDERICK BREMER. BY J. G. WHITTIER. Welcome from thy dusky Norway, Daughter of the Vikings bold...

A young lady from the country being invited to a party, was told by her city cousin to fix up and put her best foot foremost, in order to catch a beau...

CLOTHING. A NOVELTY!

Something that interests every Lady, Gentleman and Boy, and all the small Children in Saint John and Vicinity.

IT INTERESTS LADIES, As it is for their interest to furnish their little ones of Brothers with care and taste, and with the least trouble and expense...

IT INTERESTS GENTLEMEN, For, although the true gentleman is known even in Home, yet he still repairs for his personal appearance...

IT INTERESTS BOYS, Of every age and position in the community, and more especially those who have had the misfortune to lose their parents...

IT INTERESTS CHILDREN, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE YOUTH, As it is for their interest to furnish their little ones of Brothers with care and taste, and with the least trouble and expense...

IT INTERESTS THE MIDDLE CLASSES, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE POOR, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE RICH, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE BEAUTIFUL, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE MODERATE, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE ELEGANT, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE DISTINGUISHED, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE REVEREND, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE SACRED, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE VENERABLE, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE REVEREND, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE SACRED, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE VENERABLE, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE REVEREND, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE SACRED, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE VENERABLE, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

IT INTERESTS THE REVEREND, For what can more interest a child than a pretty dress—and here can be found every variety and novelty of dress suited to the child's personal appearance...

SARSAPARILLA

FOR THE REMOVAL AND PERMANENT CURE OF ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD OR HABIT OF THE SYSTEM.

Scrofula or King's Evil, Rheumatism, Ointment of the Face, Blotches, Bites, Chronic Sore Eyes, Ring Worm or Tetter, Scald Head, Enlargement and Pain of the Glands and Joints, Scalding Ulcers, Scalding Syphilis, Scalding or Lambs' Tongue, and Diseases arising from an impudic use of Mercury, whether in Drops, Exposure or Imprudence in Life; also, Chronic Constitutional Disorders, &c. &c.

This Medicine has acquired a very extended and established reputation wherever it has been used, being entirely on its own merits, which its superior efficacy has alone sustained.

The attention of the reader is called to the following cure, effected by the use of Sarsaparilla.

ULCER CURED OF SEVEN YEARS' STANDING. This cure was effected in July, 1844; there have been no symptoms of a return, and her health still continues good, July, 1848.

Amputation of Two Legs Presented. Extract of a Letter dated Roscommon, February 24th, 1847, from the highly respectable Professor of the Roscommon Journal.

Bad Digestion, with extreme weakness and Debility.—An extraordinary case, in which the patient was restored to a state of good health, and vigor, by the use of your Pills and Ointment.

Mr. T. Gardner, of No. 9, Broad Street, Grosvenor square, had been in a very bad state of health for a long time, suffering much from a distended Stomach, very impaired digestion, with constant Stomach-pains in his Chest, was extremely nervous, and so greatly debilitated as to be scarcely able to walk one hundred yards; during the long period of his illness he had the advice of four of the most eminent Physicians besides five Surgeons of the greatest celebrity in London, from whose aid he derived no benefit whatever.

Mr. T. Gardner, of No. 9, Broad Street, Grosvenor square, had been in a very bad state of health for a long time, suffering much from a distended Stomach, very impaired digestion, with constant Stomach-pains in his Chest, was extremely nervous, and so greatly debilitated as to be scarcely able to walk one hundred yards; during the long period of his illness he had the advice of four of the most eminent Physicians besides five Surgeons of the greatest celebrity in London, from whose aid he derived no benefit whatever.

DANIEL WEBSTER AND THE JEWS.

The following letter from Daniel Webster, was read at the recent Hebrew festival in New-York:—

My Dear Sir:—I am afraid it will not be in my power to attend the anniversary of the Hebrew Benevolent Society, on the 24th of the present month. I am, however, grateful for having been remembered on that occasion, and desire to present my acknowledgments and thanks to the committee.

I feel, and have ever felt, respect and sympathy for all that remain of that extraordinary people, who preserved, through the darkness and idolatry of so many centuries, the knowledge of one Supreme Spirit, the Creator of Heaven and Earth, and the Creator of Man in His own image; and whose canonical writings comprise such productions as the books of Moses and the Decalogue, the Prophecies of Isaiah, the Psalms of David, the book of Job, and Solomon's prayer at the dedication of the Temple. The Hebrew Scriptures, I regard as the fountain from which we draw all we know of the world around us, and of our own character and destiny, as intelligent, moral and responsible beings.

I wish, my dear sir, for the associated Societies, who have honored me with their invitation, a gratifying anniversary, and am, with respect, your obedient servant, DANIEL WEBSTER.

A FRUITFUL VINE.—There is a lady in this county, eighty-two years of age, who has had twenty-one children. Her daughters, one the wife of Mr. William Farrello, had sixteen children; fourteen of whom are now living; the other, the wife of Mr. Matthew Farrello, had had twenty-three children, nineteen of whom are now living, nine sons and eight daughters. These ladies are in the prime of life, and enjoy the prospect of an increasing family. Another sister, Mrs. Parker, recently died in Scriven County, at the age of thirty-eight years, who had twenty-five children. The children of the majority of these ladies, born in this county. If any county in Georgia can beat Baker, either in the luxuriance of its production or the domestic increase of its population, we should like to hear from it.— Albany (Ga.) Patriot.

BENJAMIN FIELDS.—This celebrated place was originally opened as a burying ground in the year 1658. It contains about seven acres, and it is supposed that considerably more than 100,000 human beings have taken place in this field, and that £1,000,000 sterling have been derived from, &c., &c., from the burial of the dead. Among other celebrated characters, it contains the remains of John Bunyan, author of The Pilgrim's Progress; Daniel Defoe, author of Robinson Crusoe; and George Fox, the founder of the sect called Quakers. This field was originally called "Bunhill" Field.

The originally known, as Kolner, valued at £213,582, formerly in the treasury of Maharajah Duleep Singh, and discovered among the prizes captured by our army at the victory of Lahore, is now on its way to England, under the charge of Major Edwards, for presentation to Her Majesty.

Sir J. Herschel has lately expressed his opinion, that it is impossible any longer to attempt the explanation of the Newtonian theory, as understood in the bodies by simple attraction, as understood in the Newtonian theory—these comets, with their trains perversely turned from the sun, deranging still our systematic views.

One of the most important female qualities is sweetness of temper. Heaven did not give to a man insinuation and persuasion in order to be surly; it did not make them weak in order to be imperious; it did not give them a sweet voice to be employed in scolding.— Cato.

It is better not to be sharp observers, nor too searching for faults. In advanced life the sight is weak, and the hearing obtuse, and occasion may be taken of these infirmities skillfully to affect not to notice things which would be very displeasing, and have no knowledge of what has been heard perfectly well.— Plutarch.

There is now, it is estimated, about 9,000,000 of Jews throughout the world, hitherto discovered and isolated, but now, by means of periodicals, brought into contact with each other.— Patriot.

GREATEST TRIAL TO A WOMAN'S BEAUTY.—The New York Era thus criticises:—"Byron said the greatest trial to a woman's beauty was the ungraceful act of eating eggs; he never saw one of the critics hanging by the teeth to a blazing corn cob, that's clear."

It is said that the Lord Mayor of London has an allowance of six thousand pounds a year, and is expected to spend ten!

Mankind too generally mistake anarchy for liberty, ostentation for magnificence, passion for love and vanity for pride; yet how widely different are they all.— Eliza Cook's Journal.

A reputed old witch died recently at Pife, after having enjoyed the privilege of a fish from every fisherman who desired good fortune; and, on searching her dwelling, 2000 specimens of 1020 shells, 3 oysters, 47 in bank notes, and 410 in addition, were discovered concealed in bags.

The World is a looking-glass, and gives forth to every man the reflection of his own face. Frown at it, and it will turn frowny upon you; laugh at it, and with it, and it is a jolly, kind companion; and so let all young persons take their choice.

A correspondent of The Weekly News, who seems to think with Mr. Macaulay that we live in a declining but decay, and see nothing but progress, sends the following epigram:—

"XERXES OUTRAGED." "Fool Xerxes bridged the Hellespont with boats;— Fools John Bull's feet with the devil's train;— Could he arise and see the bridge that boats— John's steam-boat bridge across the broad Atlantic."

An advertising Chandler modestly says that, without intending any disparagement to the store, may confidently assert that his octagonal spermaceti is the best light ever invented.

A down-caster said he could jump so high in the air that he could change his shirt before he touched the ground again. A New Yorker replied that he was so light-footed that he could hold a fifty-pound weight in each hand, and walk over 200 eggs without breaking one!

MAGNETIC CLOCKS.—Professor Locke, of Cincinnati, has been at Boston superintending the construction of one of his newly-invented magnetic clocks for the National Observatory at Washington. Congress appropriated \$10,000 to purchase and set up. It is one of the most important of modern discoveries. It divides seconds into hundredths with as much precision as the machinist divides inches on a scale. And by its use, in connection with the electrical telegraph, the astronomical observer in one place, say at Cambridge, can communicate the exact time of a transit to the observer at Washington, New-Orleans, and every other place where there is a transit instrument in communication. The other reports in their turn, and thus the great problem of exact longitude is solved at once, the geography of the country can be perfected, maps made accurate, the traveller or mariner may know exactly his point of departure.—Independent.

GOODS ON HAND, AND FOR SALE

By JOHN KINNEAR, PRINCE W.M. STREET. 600 BOXES WINDOW GLASS, 80 crates of Tapers, Decanters &c. 5 crates BLACK TEA POTS, 50 dozen SMALL LOOKING GLASSES, 18 lbs BRIGHT SUGAR, 20 do. DR. LA'MBERT, With Forty Colored Engravings. Just Published, 40th Edition, and may be had in French and English, in a neat Envelope, 2s. 6d. Sterling.

SELF-PRESERVATION: A MEDICAL TREATISE ON THE PHYSIOLOGY OF YOUTH AND MATURITY, usually acquired at an early period of life, which enervate the physical and mental powers, diminish and enfeeble the natural force of the system, and induce a variety of Disorders, Syphilis, Stricture, and all Diseases and Derangements resulting from Indiscretion. With FORTY Colored Engravings, illustrating the Anatomy, Physiology, and Diseases of the Reproductive Organ, explaining their structure, uses and functions, and the various injuries that are produced in them, by "voluntary excess, excess, and infection." No. 37, BEDFORD-SQUARE, LONDON.

Doctor of Medicine, Matriculated Member of the Society of Edinburgh, and Lecturer on the Diseases of the Lungs, Honorary Member of the London Hospital, Medical Society, &c.

BY SAMUEL LA'MBERT, M. D. CONTENTS OF THE TREATISE: CHAPTER I.—On the Physiology of Marriage, with its Hindrances and Obligations, and on Indiscretion and Unproductive Unions. CHAPTER II.—On the Anatomy and Physiology of the Generative Organ, their functions, structure, and secretions, proving that great Mental and Physical Power are dependent on their healthy action. CHAPTER III.—On Solitary Habits; their various effects on the Annual Economy; the concealed cause of Debility, and its connection with the various Disorders of Youth and Maturity, and the Treatment of Nervous and Venereal Weakness, Mental Debility, and Premature Decay. CHAPTER IV.—On the various Diseases, which attend the Indiscretion of Youth, and the various Disorders of the Venereal System, and the Treatment of these Diseases of the Venereal System.

MARRIAGE requires the fulfilment of several conditions, in order that it may be really the cause of mutual happiness. Could the veil, which conceals the origin of animal generation, be removed, and the process of procreation be disclosed, in how many could it be traced to physical disproportion, and in how many to mental weakness, and in how many to the influence of the gift which, when used in moderation, is fraught with advantage, becomes, when abused, the prolific source of disease, and of greater or less injury to the constitution and vital powers.

The particular excesses, on the nature and consequences of which his Treatise professes to dilate, are productive of greater misery to the human frame, than any other to which it is subject.

This Work contains an accurate and complete account of the Anatomy and Physiology of the Reproductive Organ, and of their relative conditions in health and disease. It is also the sole contents of the work; the means of escape, as well as the nature of the danger, are pointed out in a clear and intelligible language. It necessarily requires the closest attention and study, for what subject can be of more importance than the preservation of health, and of the physical constitution of which every man should be possessed. It unfortunately happens, that the unhappy victim of excessive indulgence and vicious habits, who is seized in early life, or from the follies of advanced age, while suffering from his insatiable concupiscence, unconsciously carries a load of suffering to a qualified physician for relief. Shame and the dread so frequently but erroneously entertained that these complaints are beyond the reach of art, often deter him, and prevent his seeking for assistance where alone it can be procured. In acting thus he forgets that accurate information respecting the nature and progress of the disease, and the means of cure, is indispensable to the medical man, who can show him the possession of the requisite legal qualifications, that he is entitled to esteem and respect in his professional practice, the utmost confidence should be extended to DR. LA'MBERT, who has obtained the highest medical honours, as his diploma testifies, and the great extent of his practice for many years is a guarantee for his professional experience and skill, and reference alone solely to the treatment of these Disorders.

The Work may be had in St. John, of H. CHUBB & CO., No. 2, 6d. St. John, Halifax, Messrs. MONROE & CO.; Quebec, Mr. NEILSON. August 21, 1849.

TO LET, THREE very desirable Dwelling HOUSES, situate in very eligible Situations, with Stables, Gardens, and every convenience.—Apply at the Office of W. & G. RITCHIE, April 10, 1849. [Courier.]

ASTONISHING EFFICACY OF HOLLOWAY'S PILLS AND OINTMENT.

EXTRAORDINARY CURES BY Holloway's Ointment. CURE OF A DESPERATE CASE OF ERYSIPELAS. Extract of a Letter from Mr. Joseph Gildon, Jun., a Farmer, East Kent, near Spalding, Lincolnshire, 24th April, 1846.

TO PROFESSOR HOLLOWAY. Sir,—I have the gratification to announce to you a most wonderful cure wrought upon myself, by the use of your Ointment and Pills. I had a severe attack of Erysipelas in my right foot, which extended along my ankle, and was attended with swelling and inflammation to an alarming degree, inasmuch that I was unable to move without the use of crutches. I consulted a very eminent physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, when, strange to say, in less than two weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocation, to the utter surprise and amazement of those who were acquainted with my case, seeing that I was cured so quickly. I am my family well known here, as my father holds his farm under the Rev. J. Spence, Rector of our Parish. JOSEPH GILDON.

Amputation of Two Legs Presented. Extract of a Letter dated Roscommon, February 24th, 1847, from the highly respectable Professor of the Roscommon Journal.

Sir.—Mr. Ryan, the well known proprietor of the Hotel near door to me, had two very bad Legs, one with eight ulcers on it, the other with a severe attack of Erysipelas in my right foot, which extended along my ankle, and was attended with swelling and inflammation to an alarming degree, inasmuch that I was unable to move without the use of crutches. I consulted a very eminent physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, when, strange to say, in less than two weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocation, to the utter surprise and amazement of those who were acquainted with my case, seeing that I was cured so quickly. I am my family well known here, as my father holds his farm under the Rev. J. Spence, Rector of our Parish. JOSEPH GILDON.

Cure of a Desperate Scorbatic Eruption of the Face. Extract of a Letter, dated Waterbury on the 10th of February, 1847, written by Mr. Simpson.
