FIFTH ANNUAL REPORT.

In presenting the Fifth Annual Report of the Elgin Association, the Directors would acknowledge the goodness of God in giving health and prosperity to the settlement at Buxton, while sickness has prevailed in other parts of the country around; and would return thanks for the measure of success which has already attended their efforts in improving the social and moral condition of the coloured families who have settled there.

Another year's experience has served only to demonstrate the entire practicability of the plan, and to remove the objection that has often been urged against the social improvement of the coloured people in this Province. It is no longer a matter of doubt, that when placed under favourable circumstances, they are just as capable of improvement as emigrants from Europe without means, and in many cases as destitute as the fugitive. All that they require is simply a fair opportunity to support themselves and their families, their own right arm will do the rest.

The persons who settled on the lands at Buxton, were, for the most part without means. Many of them arrived there stripped of every thing but life: they had to work for the money that paid their first installment, and the provisions that supported themselves and their families during the first year: they had to erect their own houses after a model prescribed by the Association, purchase their own farming implements; in short, they had every thing to do for themselves, and nothing was given them but a fair opportunity to develope their own natural resources. Five years' experience has demonstrated that they have not only supported themselves and their families; but they have paid up their

instalments for their land regularly as they fell due. They have also made considerable improvements by way of ornamenting their farms, opening up roads and planting fruit trees. Although ten years were given to pay for the land, a number of them have taken out their deeds already, and some others are preparing to do so during the next year. Before the expiration of ten years, there is good reason to believe that all the settlers on the lands will have

taken out their deeds.

It was mentioned in the last report, that all the houses in the settlement were built after a model prescribed by the Improvement Committee. The model was 18x24, twelve feet high, and the house set thirty-three feet from the road : the front of the house and garden to be enclosed with a picket-fence. The object of this arrangement was, to give a neat and uniform appearance to the whole settlement. While no house was allowed to go up in the settlement inferior to the model, they were at liberty to build as much better as they pleased. This has produced a healthy spirit of improvement. Several houses have been built during the past year far above the model; and one person has contracted for a brick cottage—the first that will be erected on the lands of the Association: others, both of brick and frame, will be erected in a few years. The clay on the land has been found to make excellent brick-250,000 have been made during the last year, and the same number will be furnished during the next year.

One serious drawback to the improvement of the settlement is the want of lumber—there being no saw-mills in the neighbourhood. The distance the settlers have to haul it, and the high price they have to pay render it very difficult for them to finish their houses, and prevent others from building who would erect frame houses, if they had the lumber cheap and near. There is abundance of valuable timber on the land that might be made very profitable to the settlers if there was a good steam saw-mill erected to cut it up and prepare it for market. The oak timber alone has been estimated by competent judges at \$57,000; but without a saw-mill this is not available to the settlers. Were the Association to erect a steam saw and grist mill, for the benefit of the settlers, the money spent would be repaid in

five years, conferring a the can m improving a remain unp

five years, with interest, from the sale of lumber, besides conferring a great blessing on the settlement. Without it the can make no progress in the erection of barns and improving their places, and all their valuable timber must remain unproductive.

The progress made by the settlers during the last twelve months in building, clearing, and cropping, has been con-The lands are nearly all located and settled. About 150 families have settled on the lands of the Elgin Association and on improved farms in the neighbourhood; of these seventy-seven have put up houses after the model, and most of them enclosed with a picket-fence, and whitewashed; -eight are above the model. The rest are making arrangements to have their houses put up during the ensuing year.

The number of acres cleared, and under fence, is 726; the number chopped down, and ready to clear for fall and spring crops, is 174. Of the cleared land, 334 are in corn, 95 in wheat, 48 in oats, and 100 in other crops, making in all 577 acres under crop. This shows an increase over last year, of cleared land, 226 acres; and of crops, 162.

Could it be so arranged that all the settlers could work on their own farms during the whole year, this improvement, both in clearing and cropping would be very easily We do hope, before another year, that some arrangement will be made by which the settlers will be enabled to spend more time on their own farms, and with their families.

There is an improvement in stock, both in numbers and quality since last year. The number of cows and oxen is 150; of horses, 38; of sheep, 25; and of hogs, 700. The number of hogs is unusually large-larger than the quantity of grain raised in the settlement would warrant; but they require little feed. The mast has been so abundant this year and last, that most of the hogs are fattened on it. In some places the ground is literally covered with beech and oak nuts. It is customary to let the hogs run in the woods till December, when they are generally in good order for killing.

The health of the settlement still continues good. Peace and harmony reign among the people. The Sabbath is strictly kept as a day of rest—most of the settlers attending some place of worship. Temperance prevails. Nothing that intoxicates is manufactured or sold in the settlement. The Schools and Chnrch are well attended. There are 147 on the roll in the Day School, and 120 in the Sabbath School. In both departments considerable progress has been made, both in scriptural and secular knowledge.

The population has increased so fast during the last year, that one school cannot accommodate all the children in the settlement; besides, those living in the northern part of the settlement are too far removed from the central school to attend during the whole year; yet, so anxious are the parents that their children should receive an education, that they have erected a neat school-house at their own expense, with a view of getting a teacher for it at least six months in the year.

The present liabilities of the Association amount to £2946 2s. 1d.: that is, to Government for land and interest, £2245 7s. 7d.; Stockholders, for instalments and interest; £700 14s. 6d. The assets amount to £3516 7s.; that is, for land, sold and interest thereon, £3316 7s.; land unsold £200; leaving a balance of assets to meet the current or ordinary expenses of the Association, of £570 4s. 11d.
