

The Waterdown Review

THE BIGGEST LITTLE PAPER IN ONTARIO

VOL. 4.

WATERDOWN, ONTARIO, THURSDAY, JANUARY 26, 1922

NO. 38.

WE SELL AND RECOMMEND
Wampole's Extract of Cod Liver
The Best Tonic for Coughs, Colds, Influenza and Grippe

IT IS better than ordinary cough medicines, for it reaches the seat of the trouble, relieves the cough and supplies continual treatment to build up the system to withstand future attacks. A splendid blood and body-building tonic for both young and old who take it regularly.

Notice of Application

To the Legislative Assembly, Ontario.

NOTICE is hereby given that at the next session of the Legislative Assembly of the Province of Ontario application will be made by the Corporation of the Village of Waterdown for an Act to validate By-law Number Two Hundred and Twenty-two (222) of the said Village, authorizing the issuing of debentures for Twenty Thousand Dollars (\$20,000) for the erection and equipping of a Memorial Hall. The existing debenture debt of the Village is as follows:—

By-law No. 186, \$5000. For Hydro Electric, of which there is unpaid \$3331.25.

By-law No. 102, \$1500. For extending Hydro Electric, of which there is unpaid \$1000.21.

By-law No. 205, \$1500. For extending Hydro Electric, of which there is undaid \$706.20.

By-law No. 217, \$55000. For Public School, of which there is unpaid \$52484.41.

By-law No. 227, \$20000. For Public School, of which there is unpaid \$10512.15.

The Corporation of the Township of East Flamboro has to pay the Corporation of the Village of Waterdown one half of the debentures unpaid under the two last mentioned by-laws.

BRUCE & COUNSELL,

Solicitors for the Corporation of the Village of Waterdown.

Dated at Hamilton this 24th day of January, 1922.

CARD OF THANKS

Mrs. Sparks and family wish to thank the Women's Missionary Society, Community League and others for their kindness and sympathy in their bereavement.

Card of Thanks

Mr. and Mrs. John Fulton wish to express their sincere thanks to the people of Waterdown who so faithfully endeavored to save their home from fire last Saturday.

W. I. Meeting

The regular monthly meeting of Waterdown Women's Institute will be held Wednesday afternoon, February 1st at the home of Mrs. Geo. Rohr. There will be a Question drawer by Mrs. Wm. A. Drummond. Also a paper by Mrs. Ed. Blagden on "The benefit of keeping household accounts." The music committee is Mrs. J. O. McGregor and Miss B. Little. Everybody welcome.

The prize winners at the Institute baking contest held at the home of Mrs. J. F. Wedderburn on January 4th were: Mrs. A. E. Alton for best doughnuts. Mrs. Geo. Nicholson for best tarts. Mrs. Walker Drummond for best tea biscuits.

Greenville

Mr. and Mrs. R. Surerus have returned from a pleasant visit with relatives in Dundas.

Mr. and Mrs. Gilbert Clarke have moved into Miss M. E. Clarke's house.

The Athletic Club held a very successful box social and dance last Friday evening in the Hall.

Mr. H. A. Morden was in Toronto last week attending the funeral of Mr. S. Green.

This is the year when you expect to do so much next year.

John Fulton's Home Destroyed by Fire

Mr. John Fulton had a narrow escape from being smothered to death by smoke last Saturday when fire destroyed the house in which he was living. Mrs. Fulton and little daughter were visiting in Burlington at the time. The fire is supposed to have started from the chimney. When Mr. Fulton awoke the house was so full of smoke that he was overcome before he could get to the door and fell unconcious to the floor where he was found carried out by neighbors who had noticed smoke pouring out under the eaves of the house and forced open the kitchen door in time to save Mr. Fulton's life, but the fire had gained such headway before it was discovered that the house and all its contents was completely destroyed. Some furniture belonging to Mrs. Glass which was stored in the garage was saved but a quantity of furniture and valuable dishes belonging to Mr. Ellsworth Smith which were stored upstairs were destroyed as well as all of Mrs. Fultons home furnishings and clothing.

Carlisle

Last Saturday a valuable team belonging to Mr. John McCarthy of Nelson Township plunged over a 25 foot precipice at the Bennet Co. Flour Mills, into the rapids below the Progression Falls and came out with but slight injuries. The team being driven by Mr. McCarthy, had been left at the mill door with the reins tied to one corner of the sleigh box, when the horses turned to one side tightening the reins causing the horses to back over the precipice into the rapids below. The rescuers, with the horses tangled in the harness and struggling in the water, amid huge chunks of floating ice, found much difficulty in getting the horses floated down the stream to a place where they could get them on to the bank. One of the horses had a cut above the hip and the other had not a scratch. Dr. Telfer of Milton was hurriedly called. Upon thorough examination he stated that the team if kept warm would soon be alright again.

Locals

Mr. Geo. Nicholson is confined to his home through illness.

Mr. Elmer King has sold his farm and intends moving to Waterdown.

Miss Bessie Soutar of Toronto is visiting friends in the village this week.

Mr. Wm. W. Foster of Milton visited with his sister, Mrs. A. De Long over the week end.

The ladies of St. Thomas Church will hold a card party in the assembly hall of the church on Monday evening Jan. 30th.

The Agricultural and High schools are preparing to hold a concert and debate in the Rink on Wednesday evening, February 8th. Watch for handbills.

The W. A. of Grace church will hold a Valentine Tea at the home of Mrs. W. H. Torrance on Tuesday afternoon, February 14th. Silver collection.

Herbert Thomas Glass

On Wednesday Jan. 11th Herbert Thomas Glass died in his 71st year. Deceased was born in Barnstable, England and came to this country with his parents when 5 years of age, settling in Hamilton where he lived until 8 years ago, when he moved to Waterdown and has resided here ever since.

Although a short time here he made a host of friends who will mourn his death. He was a member of Knox Church. The funeral took place Sat. Jan. 14th from the residence of C. W. Brigger, and was largely attended.

He leaves to mourn his loss, his widow and one daughter Mrs. C. H. Brigger, Waterdown.

Explanation Not Satisfactory

Waterdown, Jan. 24th, 1922.

In reply to Reeve Smith's explanation in the last issue of the Review we beg to inform him that we appreciate his sympathy, but his explanation is not satisfactory to us, and in order to give the public some insight as to how our worthy Reeve interprets the word truth it is necessary to ponder over his municipal record for the past two years, for instance in regards to By-law No. 222 which was voted on and passed by the ratepayers, and as Mr. Smith was elected to the Reeve's chair at the same time he and his council failed to put said by-law into effect and when appealing to the ratepayers for his re-election for a second term made a statement on the public platform that if elected he was going to build the Memorial Hall and he repeated his statement at the opening of the new Public School soon after the election. Now when an opportunity presented itself on the 13th of June for our Reeve to make good his promise that he had made to the public. But by his casting vote he decided not to build a Memorial Hall on the Bell House site and again at the October session another chance came for him to make good by putting by-law No. 222 into effect. But in his so called wisdom he calls on two members of the council to bring in an amendment to have the motion laid over until the next regular meeting and now by looking over the minutes of the council for the year 1921 you will notice that his attitude indicated a desire to side track the issue entirely instead of trying to fulfil his promises made on the public platforms. We again challenge Mr. Smith to play the game fair by substantiating the statement that first appeared in the Review, of Jan. 12th, by alluding to the minutes of the council or by any other means that there is truth in to suit his whims for we know that he has deliberately lied and we are in a position to prove it. We here leave the question for the ratepayers to draw their own conclusions and decide who has the interests of the village at heart and who understands what the word truth means.

THE WATERDOWN REVIEW

Issued Every Thursday morning from the office, Dundas Street, Waterdown

G. H. GREENE
Editor and Publisher
Member C. W. N. A.

A Fly Spray.

A good fly spray can be made from 4 1/2 quarts coal tar dip, 4 1/2 quarts fish oil, 3 quarts coal oil, 3 quarts whale oil, and 1 1/2 quarts of tar. Dissolve 3 lbs. laundry soap in water, add the ingredients of the spray and bring the whole up to 30 gallons with lukewarm soft water. This spray will keep off the flies and prevent the coats of the animals from becoming harsh. The cows should be sprayed twice a day—in the morning after milking and in the afternoon when in the barn for silage of green feed. Thirty gallons of mixture will spray 40 cows twice a day for ten days.

September Notes.

Peonies should be divided and reset during September or October. Do not forget to lift some of the geraniums, salvia, asters, or other plants in the yard or garden. They will bloom in the window this winter. A drain tile set over each plant is a good method of blanching celery. Celery for winter storage should not be blanched before putting in the cellar. Plant tulips in the garden or border the last of September or early October. Tulips, narcissus, crocuses and hyacinths planted now in pots or boxes and put in a cool place will give good flowers next spring. Place squash on shelves in a dry room near the furnace or in a warm attic room. They must not be in a damp or frosty place. They will stand a great deal of heat and dry air, but little moisture. If you want squash or pumpkins to keep well, handle them carefully so they are not bruised. Dahlias, cannas, gladioli, etc., should be dug and stored after the foliage has been killed by frost. The first part of October is usually the time. Try to arrange a change of pasture for the sheep. Changing the pasture as frequently as possible minimizes losses through parasitic diseases.

To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,

ABOUT THE FARM WELL

A Most Important Factor in Agricultural Work.

Purity of the Water a Great Essential — Location Also of Importance — Construction Described — People on Farms Live Longest.

(Contributed by Ontario Department of Agriculture Toronto.)

The well is the usual source of the farm water supply, and a good well, that is, one which supplies plenty of pure fresh and wholesome water the year round, is certainly one of the most essential and valuable assets of the farm. Without it no man could live there for long, to say nothing about bringing up a healthy family, or building up an efficient dairy herd. The well must be there first and last and all the time, and we cannot conceive of an intelligent man buying a farm without a good well if he intended to live on it and make it pay dividends.

A Good Water Supply Is Common.

Fortunately most of Ontario's farms are well supplied with water, in fact it is a rare thing to find a farm where it could not be secured in sufficient quantities by drilling to reasonable depths. The supply, therefore, will probably never cause us any serious worry, but judging by a recent report on analysis of many well waters from this province one seems justified in concluding that there is still need for education of the rural public in regard to the protection and care of the farm well. The following suggestions will be found helpful to any farmer desirous of making his water supply safe against possible underground and surface contamination.

Location of the Well Most Important.

The first step in the solution of this problem of purer water supply is the location of the well. This should be by all means on ground higher than any source of contamination such as barnyard, cesspool, or outside privy. If there should be no choice in location and this cannot be done, then the well should be kept a considerable distance from such contaminations, at least 100 feet in clay, and 200 feet or more in sandy soils, and the cribbing and top of the well specially protected as detailed later against the entrance of any seepage and surface washings.

How to Keep the Water Uncontaminated.

In the second place the cribbing for at least ten feet below the surface should be made impervious to water so that any contamination in solution reaching the well would have to pass down through this extra depth of soil before getting into the well, when in all probability it would be taken up by the soil and never reach the well water. This may be done in case of an old well by putting a wall of puddled clay one foot thick and ten feet deep around the well cribbing, and in case of a newly-dug well, or re-cribbing an old one, by using large concrete tile for the cribbing and setting the joints thoroughly in rich cement. Before the tile are placed in the well the outsides should be washed with pure cement plaster in order to fill up all pores and make the tile absolutely impervious to soil waters. Thirdly, the cribbing should be extended at least one foot above the ground level, and the soil banked up to the top of it, to provide good surface drainage away from the well. Fourthly, the well should be provided with a strong and tight-fitting cover made of heavy plank or concrete so that it will always be safe for man and beast, and proof against the entrance of dirt, small animals like frogs, etc.

Using a Second or Dry Well.

Even better still, the pump may be placed over a shallow dry well to one side and the top of the real well made absolutely tight by a concrete cover. In this case the well should be ventilated by putting a small iron pipe, with the exposed end turning downwards, through the top or cover. And, fifthly, the stock should not be allowed to tramp about close to the well.

What has been said refers chiefly to dug wells, but even the drilled or driven wells should be well drained and protected at the top, for otherwise contamination may work down along the well casing and reach the water, especially if the casing is not tightly driven into the rock below.

Attention to such matters of construction and protection of the farm well as here detailed, and an occasional pumping out and cleansing of the well with a little lime, will assure a pure and wholesome water supply.—R. R. Graham, O. A. College, Guelph.

Every farm and country home should feed itself, and to do this it is necessary for each family to grow garden vegetables and small fruits.

All corn cribs and grain bins should be carefully inspected to see that they are rat and mouse proof. A concrete foundation for storage buildings is advisable whenever it is practicable.

Why an Orchard Will Pay.

The planting of commercial apple orchards in the Province of Ontario is highly desirable for several reasons:

1. Ontario is not producing enough good apples for home supply, but imports annually from Nova Scotia, British Columbia, Oregon and California.

2. Production in Ontario is likely to fall off still more because no commercial planting is being done. Very few commercial apple orchards have been set out in this Province since 1911.

3. Of the thousands of young trees set in the boom years of 1905 to 1911 a large proportion have already passed out of existence. Probably not more than 20 per cent. of the trees planted during those years will figure in the commercial production of the future, and certainly not more than 40 per cent. of them are alive and receiving reasonable attention to-day.

4. The home orchard will never again be an important factor in commercial apple production in this Province, because it is not large enough

to be worth while. In seasons when scab control is difficult, or when prices are down because of a heavy crop, the return from the small orchard is not large enough to justify the expense and risk involved. When conditions are unfavorable the small orchard passes quickly into a state of neglect; this is why apple growing in Ontario is at such low ebb at present.

5. Fruit is an essential part of diet. While it is true that in case of necessity people can live without it, it is also true that health suffers and nutritional complaints become much more general in the absence from the dietary of fresh fruits and vegetables. The apple is the most important and most useful fruit of the temperate zone, and, from the standpoint of public health, its culture should not be neglected.—J. W. Crow, O. A. College, Guelph.

Green tomatoes may be put under cover when frosty nights come and many will ripen.

Onions keep best in an airy, dry place. A moist cellar is not a good place. They decay quickly.

EFFECTS OF CROPPING

Sure to Exhaust the Best Soil
in Time.

Plant Food Must Be Supplied—
Mother Earth Has Her Limits—
Seven Rules for Poultry Raisers
—Breaking Up Broody Hens.

(Contributed by Ontario Department of
Agriculture, Toronto.)

Lands that have been farmed for
half a century usually show a de-
crease in crop production. A few
farms that have been well managed
in the various sections of Ontario are
still very productive. Some have been
so depleted of the plant food materi-
als that were accumulated during the
period of forest development as to
be unprofitable under tillage to-
day. Previous to clearing and crop-
ping the process was accumulating
fertility. Since cropping has been
practiced the process has been re-
versed and supplanted by one of ex-
penditure. Under a farming practice
that exhausts the humus and returns
no vegetable matter the soil hardens
quickly, dries out and becomes non-
productive, simply because there is
neither food nor soil life to release
such to growing plants.

Mineral Elements Become Exhausted.

Frequently one of the mineral ele-
ments—lime, potash or phosphorus
—is exhausted by cropping or leach-
ing. Nitrogen exhaustion is a very
common condition noticeable in lands
that have been cultivated for more
than twenty-five years. After all, the
soil is only a storehouse for those
elements required in the life pro-
cesses of the food plants that the
farmer grows. In that storehouse
various forms of life are at work
converting the unusable to a usable
or food condition for the plant. If
we crop for years and exhaust the
nitrogen or the potash or the phos-
phorus to a point where any of such
could not be supplied in quantity suf-
ficient to meet the full demands of
the growing plant then we have a
condition of plant mal-nutrition or
starvation.

Every farmer should keep some
sort of account system of his busi-
ness. It should show the profit and
loss of all of his operations.

Sometimes we can not prevent out-
breaks of live stock disease on our
farms, but we can and should always
use every preventive measure and see
that proper precautions are taken
when the disease first makes its
appearance.

partment where we keep a stock of the
highest grade groceries, and at prices as
low as the lowest.

A special Black Tea of excellent flavor
and quality. You may buy cheaper tea
but this is an excellent high grade tea
