THREE PRACTICAL POINTS. In connection with the Esplanade difficulty there are two practical points to be

noted, which, if conceded and acted upon by the Grand Trunk, would do away with the greater part of the present trouble. Man., as a summer resort. It, of course, One is to have nearly all the shunting

through freight would pass. This loop line should of course be open to all railways wishing to use it, on payment of fair rates of toll. For the short distance involved, these rates need not be very heavy. At no time since the Toronto Land Boom, during the years of 1873 and 1874, has such an opportunity as the present been offered to parties to invest small or large amounts to good advan-tage. Toronto during the past few years of hard times has held its own, and although Real Estate could at times be got at a price below its real value, yet such opportunities seldom arose, and when they did shrewd speculators of means were always ready to purchase, and property if worth having could always find a purchaser at a reasonably fair value; besides the city has continued to increase in population and wealth, very many new buildings have been erected and hundreds are now in course of erection; vacant land has steadily increased in value, and so in the future as in the past must the population of the city increase, its limits extend and its real property increase in value. But a few years since Parkdale was a vacant commons and land could be had at less than \$100 per acre, now an acre cannot be purchased at less than from \$2,000 to \$3,000.

The building of the Ontario and Quebec Railway in connection with the Oredit Valley and Syndicate Roads with its junction at West Toronto Junction, is giving employment to a large number of men and expending, it is said, about \$2,000,000 within the limit of Toronto and this junction.

WEST TORONTO JUNCTION

Is a new suburban Town adjoining Parkdale and within two miles west of the present limits of Teronto and so called (like Chicago and Detroit Junction) because all the railways entering and leaving the city by the West do so at this point.

The Ontario and Quebec railway have purchased 40 acres here, part of the Runnymede Estate, for their workshops, which when built, with the other railway facilities will make this a larger and more important point than Parkdale, and accordingly properties which can be now purchased at a low price, must before many years be very many times more valuable.

We have sold by private sale a number of these lots 50 x 160 each to a lane, which are now being built upon.

There are churches and a good school besides a number of dwellings here. The location is high, dry and healthy, and has every advantage required to make it a popular and growing town. Com-mutation tickets can be had from the railways, by which return tickets to the Union Station will cost less than 8c each (4c each way) and the drive into the city by the Davenport Road or Dundas Street is always attractive.

We are instructed to sell the balance of these lots (being part of the block of land purchased by the railway) and known as the Runnymede Estate during the month of April at \$125 each lot.

TERMS---One-third Cash ; balance in four semi-annual payments ; interest 6 per cent. half yearly.

Those splendidly situated she does not care for her present admirer. A lady living in New York is so dainty that the servants who wait upon her table are obliged to wear white kid gloves at every meal. Each servant wears out a pair every three weeks, but this is a triffing expense to the wife of a millionaire. Building Sites near the Humber. NEXT SATURDAY, April 28.

expense to the wife of a millionaire. An old woman in Ireland made up her mind last week that it was time she should die, as she was ninety, so she evidently passed away, and all the arrangements for the funeral were made. The coffin was closed and taken to the place of buriat, but when the grave it felt so light that it was opened and found empty. The old lady had come to life and escaped on the road. But how she did it was the mystery. The sites are the Chespest, most pictures and casiest-to-pay for sites near the Humber. No Land Grabbing Allowed. These lots are near the workshops of the Ontario and Quebec railway, the great Wall Paper factory, all the west end work-shops, opposite the OLD ORCHARD BRACH of America, near the Humber on the left and the Grenadier pond on the right. The air is pure and bracing, no fever spots, pure water, close to High Park, boating, yachting, fishing pionicing, pavil-lions on the beach. The Grand Trunk steam cars to city on the south, horse cars at King street and Bloor street horse cars on the north. Steam communication with Toronto at the new wharf which is to be built on the beach by private partise. These sites are the casiest to pay for of any of the properties near Toronto now offered to the public.

Jay Gould to Retire.

From the New York Times Mr. Jay Gould has declared to his near

friends his intention to retire from his active usiness life on the completion of his steam yacht, the Atalanta, built for his projected our around the world. His son, Mr. Geo. J. Gould, a young man of 23, is to take his

place as a speculator, and Mr. Gould himself will lead a private life. Mr. Gould's

self will lead a private life. Mr. Gould's fortune is carefully estimated in round num-bers to be \$100,000,000, of which \$20,000,-000 is in the stock of the Western Union Telegraph company and \$20,000,000 in the stock of the Missouri Pacific Bailroad com-pany. In real estate he has never put much money, considering the size of his fortune His investment in this Eind of property al-together amounts to about \$5,000,000. The remainder of his wealth is in securities, mainly in the shape of the bonds of the dif-ferent railroad companies. But one large deal, in speculative parlance, remains to be consumated previous to his retirement, and that is, from the account gives, the pro-posed allisnce between his Southwestern system of railroads and the East Ternessee, Virginia and Geergia system and other tributary roads. The "boys," as Cornelius and Willism K. Vanderbilt are called, have taken their father's place in the market, and Mr. Gould's contemplated retirement will be even more complete than that of Willism H. Vanderbilt, for Gould's has been a life of speculation. NEXT SATURDAY, April 31, Commencing at 2 o'clock and 7.80 p. m. John M. McFarlane & Co.,

There is only one way by which any disease There is only one way by which any disease can be cured, and that is by removing the cause-what-ever it may be. The great medical autho.ities of the day declare that nearly every disease is caused by deranged kidneys or liver. To restore thase therefore is the only way by which health can be secured. Here is where W aRNAE's sAFE CURE has achieved its great reputation. It acts directly upon the kid eves and liver and by placing them in a healthy condition drives disease and pain from the system. For all kidney, liver and urinary too les; for the distressing disorders of women; for malaria, and physical troubles generally, this great remedy has no equal. Manlan at the Hub.

Boston, April 24 .- Haplan and Lee arrived today. They say i' double sculling races are given at Pullman, II., and here on July 4, they will row in them. If an an will personally give a prize at To-ronto for double-sculling in the fall. They left for Low all this evening.

That Double-Sculling Race.

HALIFAX, N. S., April 24 -- It is probable that the double-scull contest between Hamm and Conley and Hanlah and Lee, which it is now thought will be definitely arranged, will take place either at Point of Fines, eight miles outside of Boston, on the Mira-michi as Campbelton, or perhaps at Lake Menra-cook. The chances are that the first-named place will be selected, Campbellton and Lake Memram-cook being situated so much out of the way of gen-eral passenger traffic.

A consumptive-looking man, lame and feeble, and carrying a pint bottle full of something, halted a pectentrian in the street the other day, and said . "I found the bottle in the sorner, there, and I wish you'd tell me what's in it." The other rook it, removed the cork, and pulled in a full breach. The next instant he staggered adding the wall, blawing the air and chok-ing and gasping, and it was a fall minute before he burted out 1. "Wisy, you fdfor, that's hartshows !". "Well, it perfectly willing to take yous word for it withcut extra insult." Observed the invalid, in asy injured voice.
