OF

# EDUCATION,

BEING THE SEMI-ANNUAL SUPPLEMENT TO THE REPORT OF THE SUPERINTENDENT OF EDUCATION FOR

## NOVA SCOTIA.

OCTOBER, 1907.

Published by Order of the Legislature of Nova Scotia.

HALIFAX, N. S.: COMMISSIONER PUBLIC WORKS AND MINES, KING'S PRINTER,

## Journal of Education.

SECOND SERIES: October, 1878, to August, 1892; XII. Vols., 29 Nos. FIRST SERIES: September, 1866, to August, 1877; 73 Nos.

HALIFAX, NOVA SCOTIA, OCTOBER, 1907.

### OFFICIAL.

I.—The JOURNAL OF EDUCATION shall be published semiannually, in the months of April and October respectively, and shall continue to be the medium of Official Notices in connection with the Department of Education.

II.—The JOURNAL, which is the Semi-annual Supplement of the Education Report, will be furnished gratuitously, according to law, to each Inspector, Chairman of Commissioners, and Board of Trustees, and will be supplied to other parties wishing it at the rate of ten cents a copy.

III.—Each Secretary of Trustees is instructed and required to file and preserve the successive numbers of the JOURNAL for the benefit of his fellow Trustees and the Teacher or Teachers of his section, and their successors, and to inform his associates in office, and the Teacher or Teachers, of its receipt, so soon thereafter as may be convenient.

## Council of Public Instruction.

Sydney.

Division No. 12, the County of Colchester—W. R. Campbell, M. A., Truro.

### Regulations of C. P. I. as amended up to September, 1907.

#### PROVINCIAL EXAMINATION OF HIGH SCHOOL STUDENTS.

- 82. "High School Students" shall be held to mean all who have passed the County Academy Entrance Examination and are studying the subjects of any high school grade, or who are certified by a licensed teacher as having fully completed the Common School course of study, and are engaged in the study of subjects beyond Grade VIII.
- 83. A terminal examination by the Provincial Board of Examiners shall be held at the end of each school year on subjects of the first, second, third, fourth and fifth years of the High School Program, to be known also as Grades IX, X, XI, XII Preliminary and XII Final (or XIII) respectively of the Public Schools.
- 84. The examinations shall be held during the first week of July, according to the time tables given in 98 (a) and (c), for Grade XII at the following stations: — Amherst, Antigonish, Halifax, Kentville, Liverpool, Pictou, Sydney, Truro Yarmouth; for Grades XI, X and IX, and the "Minimum Professional Qualification" of public school teachers at each of the following stations, viz:-1, Advocate; 2, Amherst; 3, Annapolis; 4, Antigonish; 5, Arichat; 6, Baddeck; 7, Barrington; 8, Bear River; 9, Berwick; 10, Bridgetown; 11, Bridgewater; 12, Canso; 13, Chester; 14, Church Point; 15, Digby; 16. Glace Bay; 17, Great Village; 18, Guysboro; 19, Halifax; 20, Kentville; 21, Liverpool; 22, Lockeport; 23, Lunenburg; 24, Mabou; 25, Maitland; 26, Margaree Harbor: 27, Middle Musquodoboit; 28, Middleton; 29, New Glasgow; 30, North Sydney; 31, Oxford; 32, Parrsboro; 33, Pictou; 34, Port Hawkesbury; 35, Port Hood; 36, River John; 37, Sheet Harbor; 38, Shelburne; 39, Sherbrooke; 40, Springhill; 41, Stellarton; 42, St. Peter's; 43, Sydney; 44, Tatamagouche; 45, Truro; 46, Upper Stewiacke; 47, Westport; 48, Westville; 49, Windsor; 50, Wolfville; 51, Yarmouth.
  - 85. (a) Application for admission to the Provincial High School examination must be made on the prescribed form to the Inspector within whose division the examination station to be attended is situated, not later than the 24th day of May.
  - (b) Candidates applying for the Grade IX examination, or for the next grade above the one already successfully passed by

them, shall be admitted free. But a candidate who has not passed Grade IX must have his application for X accompanied by a fee of one dollar; if he has passed neither IX nor X the application for XI must be accompanied by two dollars; and if he has passed neither IX, X nor XI the application for XII or XIII must be accompanied by three dollars. The candidates who are entitled to free examination are only those who pass the different grade examinations in consecutive order.

- amination a fee of two dollars is required; but it should not be forwarded with the application, for it has been found more convenient to have it paid to the Deputy-Examiner on the Saturday when the candidate presents himself for examination. The Deputy-Examiner shall transmit the same to the Superintendent with his report.
- The prescribed form of application, which can be obtained free from the Education Department through the Inspectors, shall contain a certificate which must be signed by a licensed teacher having at least the grade of scholarship applied for by the candidate whose legal name must be fully and plainly written out on the application form.
- When a candidate presents himself for examination, and his name is not found on the official list as having made regular application in due time, the Deputy-Examiner may admit him to the examination provisionally on his written statement that application was regularly made in due time, which with a fee of one dollar, is to be transmitted with the Deputy's report to the Superintendent. If such candidate's statement is verified the dollar shall be returned. Providing there is sufficient accommodation, the Deputy-Examiner may admit any candidate on the payment of one dollar for any Grade in addition to the regular fees required under Reg. 85 (b).
- (f) The prescribed form of application is given in schedule B.
- 86. Each Inspector shall ferward, to the Superintendent of Education, not later than June 1st, a list of the applications received for each grade of examination at each station within his division, on the prescribed form supplied from the Education Office. The said forms properly filled in, together with all fees duly credited shall be promptly forwarded to the Education Office.
- 87. The Deputy-Examiner, when authorized by the Superintendent of Education, shall have power to employ an assistant or assistants, who shall each receive two dollars per day for the time so employed.

- 88. The Superintendent of Education shall cause to be prepared and printed suitable examination questions for each examination in accordance with the regulations of the Council, and shall forward to each Deputy-Examiner a sufficient supply of the same together with copies of such rules and instructions as may be necessary for the due conduct of the examination.
- 89. The maximum value of each paper shall be 100; the questions being made as nearly as possible equal in value. After 1908 the values of questions may be unequal, but shall be stated near the margin of each question.
- 90. Each examiner shall mark distinctly by coloured pencil or ink at the left hand margin of each question on the candidate's paper its value, placing the sum of the marks on the back of the folded sheet. From this sum the number of misspelled or obscurely written words is to be deducted to show the net value of the paper; provided, however that from one to three may be added by the Examiner for specially good writing.
- 91. (a) The "High School Pass" on all grades shall be an average of *fifty* per cent. on six subjects with no mark below *thirty* per cent.
- 91. (b) The "Teachers' Pass" shall be an average of sixty percent. with no mark below forty per cent. on the six subjects.
  - 92. Repealed except as specified in 98 (c).
- 93. (a) Candidates failing to make a High School pass in the grade applied for shall be ranked as making a High School pass in the next grade below, provided an average of 40 per cent with no mark below 25 be made; and as making a pass on the grade second below, provided an average of 30 per cent be made with no mark below 20.
  - (b) Candidates failing to make a Teachers' Pass in the grade applied for shall be ranked as making a Teachers' Pass in the next grade below, provided an average of 50 per cent be made with no mark below 30; and as making a Teachers' Pass on the grade second below, provided an average of 40 per cent be made with no mark below 25.
- 94. Each candidate, provided no irregularity has been reported, shall receive from the Superintendent of Education a certificate containing the examination record in each subject. If the candidate has made a "High School Pass," the certificate will bear the title "High School Certificate," and show the grade obtained under the arms of the Education Department; but candidates failing to pass shall receive an equally detailed statement of their examination record on the various subjects.

- 95. Candidates p assing the various grades in consecutive order shall be admitted free to the regular Provincial High School Examinations, provided their application and procedure have been regular. In all other cases a scale of fees as given in 85 (b) and (e) has been fixed to cover the cost of examination and extra labor likely to be incurred.
- 96. The subjects, number and values of the papers for the different examinations, and the general scope of examination questions, are indicated generally by the texts named in the prescribed High School Program. Examination may demand description by drawing as well as by writing in all grades.

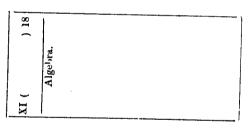

### PROVINCIAL EXAMINATION RULES.

- 97. No envelopes shall be used to enclose papers. Two hours is the time allowed for writing each paper; except in the case of the M. P. Q. examinations, where the time allowed for each paper shall be one hour. The following rules must be exactly observed:—
- (I) Candidates shall present themselves at the examination room punctually half an hour before the time set for the first paper of the grade for which they are to write, at which time the deputy examiner shall give each candidate a seat. The candidate's name shall be represented by a number, and must therefore be neither forgotten nor changed. Candidates who present themselves shall be numbered from I onwards in consecutive order (without hiatus for absent applicants, who cannot be admitted after the numbering), beginning with grade XII, then coming to XI, X and IX in order. Candidates for "Supplementary" examinations need not present themselves until the hour fixed for their papers in the regular timetable, provided they have sent in their applications and the titles of the papers on which they intend to write.
- (2) Candidates shall be seated before the instant at which the examination is fixed to begin. No candidate late by the fraction of a minute has the right to claim admission to the examination room, and any candidate leaving the room during the progress of any examination must first hand in his or her paper to the deputy examiner, and not return until the beginning of the next paper.
- (3) Candidates shall provide themselves with pens, pencils, mathematical instruments, rulers, ink, blotting-paper, and a supply of good, heavy foolscap paper of the size thirteen inches by eight.
- (4) Candidates may write upon both sides of their paper. When more sheets than one are used they must be fastened together. Each sheet should bear the Candidate's grade and number. In order to

secure high values from examiners neat writing and clear concise answers are much more important than extent of space covered or the number of words used.

- (5) Each such paper must be *exactly* folded. First, by doubling, bottom to top of page, pressing the fold (paper now  $6\frac{1}{2}$  by 8 inches); next, by doubling again in the same direction, pressing the fold flat so as to give the size of  $3\frac{1}{4}$  x 8 inches.
- (6) Finally the paper must be exactly indorsed as follows:—A neat line should be drawn across the end of the folded paper one-half an inch from its upper margin. Within this space,  $3\frac{1}{4}$  inches by  $\frac{1}{2}$  inch, there must be written in very distinct characters, 1st, the letter indicating the grade; 2nd, the candidate's number, and 3rd, a vacant parenthesis of at least one inch, within which the deputy examiner shall afterwards place the private symbol indicating the station. Immediately underneath this space and close to it should be neatly written the title or subject of the paper.

For example, candidate No. 18 writing for Grade XI on Algebra should endorse his paper as shown below:—

- (7) The subject title, grade and candidate's number may be written within, over the commencement of the paper also; but any sign or writing meant to indicate the candidate's name, station or personality may cause the rejection of the paper before it is even sent to the examiners.
- (8) Any attempt to give or receive information, even should it be unsuccessful, the presence of books or notes on the person of a candidate, or within his reach during examination, will constitute a violation of the examination rules, and will justify the deputy examiner in rejecting the candidate's papers, and dismissing him from further attendance. No dishonest person is entitled to a provincial certificate or teacher's license. And where dishonesty at examination is proven, provincial certificates already obtained and licenses based on them will be cancelled.
- (9) It is not necessary for candidates to copy papers on account of erasures or corrections made upon them. Neat corrections or cancelling of errors will allow a paper to stand as high in the estima-

tion of the examiner as if half the time were lost in copying it. Answers or results without the written work necessary to find them will be assumed to be only guesses, and will be valued accordingly.

- (10) Candidates are forbidden to ask questions of the deputy examiner with respect to typographical or other errors which may sometimes occur in examination questions. The examiner of the paper alone will be the judge of the candidate's ability as indicated by his treatment of the error. No candidate will suffer for a blunder not his own.
- (11) Candidates desiring to speak with the deputy examiner will hold up the hand. Communication between *candidates* at examination, even to the extent of passing a ruler or making signs, is a violation of the rules. Any such necessary communication can be held through the deputy examiner only.
- (12) Candidates should remember that the deputy examiner cannot overlook a suspected violation of the rules of examination without violation of his oath of office. No consideration of personal friendship or pity can therefore be expected to shield the guilty or negligent.
- made at this examination, should fill in a form of application for such license as is expected. The deputy examiner is provided with blank forms for those who do not already have them. The applicant should have his certificate of age and character correctly made out and signed, and should fill in the number, station and year of any previous examination he has taken, whether he has been successful in obtaining a certificate thereon or not. He should also fill in his number, station, etc., and grade of certificate or rank of M. P. Q. expected. This latter should be placed in brackets, which will be understood to mean that it is not yet obtained but is expected to be obtained.
- (14) All candidates will be required to fill in and sign the following certificate at the conclusion of the examination, to be sent in with the *last* paper:—

#### CERTIFICATE.

Examination Station..... Date....... July, 190.....

Candidate's No. (

I truly and solemnly affirm that in the present examination I have not used or had in the Examination Room, any book, printed paper, Portfolio, manuscript, or notes of any kind, bearing on any subject of examination; that I have neither given aid to, nor sought nor received aid from, any fellow-candidate; that I have not wilfully violated any of the rules, but have performed my work honestly and in good faith.

(Name in full)

## 98 (c). SPECIAL REGULATION FOR COMPLETING THE OLD "A."

- (1) The following A candidates are privileged to take the examination in the manner prescribed up to and including July 1907, and according to the time-table in force at that date (See *Time Table below*).
  - (a) Those who have taken "Partial A" and elect to take this examination to complete their A.
  - (b) Those who have written unsuccessfully for A(cl.) or A(sc.).
  - (c) Those properly certified as having done at least two years. Work in A (cl.) or A (sc.).
    - (d) Those who have partially completed the A (cl. and sc.).
  - (2) Those holding "Partial A" at present may complete the A in one of two ways:—
    - (a) By passing the A Final.
    - (b) In the manner prescribed in paragraph (1) above.
  - (3) After 1909 the privilege of completing the A according to regulations (1) and (2) above shall no longer be granted.
  - (4) All applications for this examination should be made to the Superintendent of Education on or before the middle of January, specifying each subject on which a paper is desired, and the station for examination.

### TIME TABLE (OLD "A ' EXAMINATION.)

## OPTIONAL EXAMINATION IN MUSIC, ETc.

- (a) At the County Academy Entrance Examination and the Teacher's Minimum Professional Qualification Examination candidates who have taken London Tonic Sol-Fa certificate can for the question in music substitute their certificates for which values will be given as follows:—For "Junior" certificate, 10; for "Elementary" certificate, 15; and for "Intermediate" certificate, 20—'he last two for M. P. Q. only.
- No. of the question on music in his examination paper, the words "Junior Certificate," or "Elementary Certificate," or "Intermediate Certificate," as a reference to the fact that such a certificate has been handed to the deputy examiner, bearing on its back the name, and address, and examination number, and station of the candidate plainly endorsed upon it.
- compared with his list to verify the correctness of the endorsation by the candidates, then enclosed in one envelope addressed, in the case of the Academy Entrance, to the Principal, and in

the case of the M. P. Q. to the Superintendent of Education, who, after perusal, shall return them to the respective candidates.

- (d) The Principal or the Superintendent, as the case may be, shall then endorse 10, 15, or 20 points (according to a) on the examiner's report ard on the candidate's paper below the general valuation number and add the two together for the total value of the paper.
- (e) To prevent the possibility of two values being given by accident, the examiner of a paper in which a certificate is substituted for the question, shall mark the general value of the paper with an asterisk, both on the paper and on his report.
- (f) No certificate from any local examiner of the London Tonic Sol-Fa College shall be accepted, unless the examiner has previously given a satisfactory proof to the Principal or Superintendent that he or she has been duly appointed as local examiner for the grade of certificate in question by the authorities of the said College.
- (g) At the County Academy Entrance Examination the certificate of Attendance for a year at a Mechanic Science school, or a Domestic Science school, can be accepted for the answer to a question on the subject in like manner as the "Junior" Tonic Sol-Fa certificate—value from 0 to 20, according to the character of the candidate's worth.

## LICENSING OF TEACHERS.

100. No person can be a teacher in a public school entitled to draw public money without a License from the Council of Public Instruction. Before obtaining a license a candidate must obtain, first, a certificate of the prescribed Grade of Scholarship at the Provincial High School Examination; second, the prescribed certificate of professional Rank as a teacher, either from the Provincial M. P. Q. Examination or the Provincial Normal School, and third, the prescribed certificate of age and character from a minister of religion or two certificate of age and character from a minister of religion or two Justices of the Peace. The value of a License is distinguished by the term Class; of scholarship by the term Grade; of professional skill by the term Rank. Full information as to the licensing will be found in Regulations 101 to 114 inclusive, but the following collocation of the terms used will help to explain their significance and relation:—

#### Generally,

	(1)	(2)	(3)
Class A	"Teacher's Pass Scholarship."	Normal Diploma.	Age & Character.
Class B	requiresGrade XII (Final)	Academic Rank	. 21 years, etc.
Class C	"Grade X	Second Donle	19 years, etc.
Class D Class D (Tem	Glade IA	Third Rank	. I7 Vears, etc.
January 15 (Telli)	p.) "Grade IX	· " M.P.Q	. 16 years, etc.

The following are the exact requirements for the licensing of teachers:—

- 101. No diploma of the Provincial Normal School shall be awarded any candidate who is found defective (below 40 %) in the scholarship of any of the six subjects of the Provincial Program taken in the corresponding grade, until the Faculty is satisfied that creditable proficiency has been made in each such subject.
- 102. When a candidate obtains a teacher's license without graduation from the Provincial Normal School, it can be only of a *class* one degree lower than the "teachers' pass" grade of scholarship.
  - 103. Repealed.
- 104. No certificate, combination of certificates, nor any other qualification except the possession of a lawfully procured License gives a person authority to teach under the law in a public school. The regulations governing the issuance of licenses are as follows:
- regulations, namely: the presentation of the prescribed proof of (1) age and character, (2) scholarship, and (3) professional skill.
- 106. There shall be four classes of such licenses, which may be designated as follows:—

Class A—Academic.

Class B-First Class.

Class C-Second Class.

Class D-Third Class.

107. The certificate of professional qualification or skill shall be (a) the academic, first, second or third RANK classification by the Normal School, or (b) the *minimum* (which shall rank one degree lower than the *normal*), and shall be the academic, first, second or third rank pass on the following papers written on the Saturday of Provincial Examination week.

The questions set for the minimum professional qualification examinations shall be on the following syllabus:—

- I. School Law and Forms.
  - (a) The acts of the Legislature and Regulations of the Council of Public Instruction bearing on public education, with their latest amendments, and a knowledge of the way in which the law is to be administered.
  - (b) The proper keeping of the School Register, the making out of neat and accurate school Returns, and a knowledge of all the ordinary forms required by school boards in administering the affairs of the section.
- 2. Theory and Practice of Teaching.

As in Calkin's "Notes on Education," or any equivalent.

3. Hygiene and Temperance.

As in Knight's "Introductory Physiology and Hygiene," the Education Act and Regulations, and the text books prescribed for the public schools.

4. School Management.

As in Lectures on Teaching, by Sir Joshua Fitch.

5. History of Education.

As in Educational Reformers, by Quick.

6. Pedagogy.

Bagley's The Educative Process.

For Third Rank M. P. Q.—An aggregate of 150 on 1, 2 and 3, with no subject below 30 per cent.

For Second Rank M. P. Q.—An aggregate of 250 on 1,2, 3, 4 and 5, with no subject below 40 per cent.

For First Rank M. P. Q.—An aggregate of 300 on 1, 2, 3, 4 and 5, with no subject below 50 per cent.

For Academic Rank M. P. Q.—An aggregate of 360 on 1, 2, 3, 4, 5 and 6, with no subject below 50 per cent.

108. The Provincial Normal School at Truro is recognized as the appropriate source of certificates of professional qualification for Public school teachers; but the certificates of other Normal or teach-

ers' training schools whose curricula may be satisfactorily shown to the Gouncil to be at least the equivalent of those of the Provincial Normal School, may be accepted when qualified by the addition of the two following conditions: (a) a pass certificate of the Provincial "minimum" professional qualification examination of the corresponding rank, and (b) a certificate of a Public School Inspector, before whom or under whose supervision the candidate has demonstrated by the test of actual teaching for a sufficient period his or her qualifications for the class of license sought.

In the case of candidates whose course of professional training had been completed before the grade of scholarship necessary for the class of license afterwards applied for was obtained, no license shall be issued until after the lapse of a year from the date of the certificate of high school grade required for the said license.

109. The prescribed certificate of age and character is given in the following blank form of application for license, which will be supplied to candidates by the Education Department, through the Inspectors or the Principal of the Normal School:—

Form of Application for a Teacher's License.
То
Inspector of Schools, Division NoNova Scotia-
I hereby beg leave through you to make application to the Council of Public Instruction for a Teacher's License of Class and herewith I present evidence of compliance with the conditions prescribed, namely:—
I. The prescribed certificate of age and character hereto attached, which I affirm to be true.
II. My High School certificate of Provincial Gradeob-
tained at Examination Station as No, in the
year 190 (Further information below.)
III. My certificate of professional qualification of
Rank Noobtained atin the month of
, 190 (Name in full.)
(Post Office address)
Date (County)

#### CERTIFICATE OF AGE AND CHARACTER.

I, the undersigned, after due inquiry and a sufficient knowledge of the character of the above named candidate for a Teacher's License, do hereby certify:—

That I believe the said candidate(name
in full), was born on theday of
in the year; and
That I believe the moral character of the said candidate is good, and such as to justify the Council of Public Instruction in assuming that the said candidate will be disposed as a teacher to "inculcate by precept and example a respect for religion and the principles of Christian morality, and the highest regard for truth, justice, love of country, loyalty, humanity, benevolence, sobriety, industry, frugality, chastity, temperance and all other virtues."
(Name and title.)
(Church or Parish.)

(When the certificate given above is signed by "two Justices of the Peace" instead of a "Minister of Religion," the word "I" should be changed by the pen into "we," and after the signature on the second line the words "Church or Parish" should be cancelled by

.....(P. O. Address.)

a stroke of the pen.)

The correct quotation of the High School certificate in II. above will be considered as equivalent to its presentation. When the candidate makes application at the High School Examination Station, the grade or rank of certificate written for and expected may be entered, but shall be enclosed in a parenthesis, which will be understood to indicate the expected result of the Examination.

The correct quotation of the Provincial M. P. Q. Certificate or the Provincial Normal School Diploma in III. above, will be considered as equivalent to its presentation.

Any certificate from Normal Schools, etc., which are not regularly recorded in the Education office, must accompany this application as evidence of the correctness of the quotation.

conditions are necessary. (1) A certificate signed by a Minister of Religion or two Justices of the Peace, as in the preceding form, to the effect that the candidate is of the full age of twenty-one years, and capable of fulfilling the duties specially mentioned in the statute.

(2) A pass certificate of the Grade XII (Final). (3) A certificate of academic rank professional qualification from a Normal School;

or Honor graduates in Arts or Science of recognized Universities who along with the required certificates of age and character, present satisfactory certificates of attendance on approved University courses in the History of Education, the Theory and Practice of Teaching, School Law and School Management; and who likewise present M. P. Q. certificates of academic rank, shall be eligible to receive Teachers' Licenses of the Academic Class. No course of less than 50 hours instruction in the History of Education and the Theory of Teaching shall be approved; and no course of less than 50 hours in the Practice of Teaching shall be approved, of which at

least 20 hours shall be spent in actual teaching under approved supervision, and the remainder in the observation of the practice of teaching in the public schools of the province.

Universities claiming the above privilege for their graduates shall submit their claims for recognition, including their matriculation standards and their courses for ordinary and for honor degrees, to the Council of Public Instruction.

- 111. For a First Class or B License the three following conditions are necessary:—(1) A certificate of the full age of nineteen years and moral character as in the foregoing regulation. (2) A Teachers' Pass certificate of Grade XI. (3) A Teachers' certificate of first rank professional qualification from a Normal School.
- OR, (1) A certificate of age and character as above. (2) A Teachers' Pass certificate of Grade XII Final. (3) A certificate of first rank M. P. Q.
- 112. For a Second class or C License the following three conditions are necessary:—(1) A certificate of the full age of eighteen years and moral character as in the foregoing regulation. (2) A Teachers' Pass certificate of Grade X. (3) A certificate of second rank professional qualification from a Normal School.
- OR, (1) A certificate of age and character as above. (2) A Teachers' Pass Certificate of Grade XI. (3) A certificate of second rank M. P. Q.
- 113. For a Third Class or D License the following three conditions are necessary:—(1) A certificate of the full age of seventeen years and moral character as in the foregoing regulation. (2) A Teachers' Pass certificate of Grade IX. (3) A certificate of third rank professional qualification from a Normal School.
- OR, (1) A certificate of age and character as above. (2) A "Teachers' Pass" certificate of Grade X. (3) A certificate of third rank M. P. Q.

#### TEMPORARY LICENSE.

114. A Third Class (Temp.) or D (Temp.) License, valid only for one year may be granted (but not previous to the 15th day of September in any school year) on regular application when the following four conditions are fulfilled:—(1) A certificate of the full age of sixteen years and moral character as in the foregoing Regulation. (2) A pass certificate of at least Grade IX as in the foregoing Regulation. (3) The third rank minimum professional qualification. (4) A recommendation of the candidate as a temporary teacher for a specified school by the Inspector, who must previously be assured by the

trustees of the said school that, although reasonable effort was made to employ a regular teacher of permanent class, one could not be obtained, and that the candidate would be acceptable to the school section as a teacher for the year. Such License can be re-issued for another year only when the candidate has demonstrated an advance of grade or rank in his qualifications at a subsequent Provincial Examination.

### COUNTY ACADEMY ENTRANCE EXAMINATION.

Regulation 61 of the C. P., (page 81, Manual of School Law) is repealed and the following substituted in its place.

The regular mode of admission into county academies shall be by an entrance examination in the last week of the school term in June, on the common school course Grade VIII. There shall be: six subjects of examination, as follows, the questions being sent out from the education office:—(1) Reading—to be tested by the examiners on the Grade VIII reading, (third series for 1908). [Music:: Candidates known from individual or class exercises, or from reliable certificates, to be able to sing, especially when they have a practical acquaintance with any system of musical notation, may receive an extra mark as a bonus under this head at the option of the examiner, providing the Reading is passable. See also Reg. 99.] (2) Language. (3) Drawing and Bookkeeping. (4) Geography and History—Geography of Asia, Africa, Oceania, in detail, with a review of Canada. History of Canada (Hay or Calkin). (5) General Knowledge: (a) The five families, Crowfoot, Rose, Heath, Violet and Lily; with the important native trees and the common weeds injurious to agriculture. (b) The common rock and minerals of Nova Scotia. (c) Common insects injurious to plants and animals. (d) A few of the common birds. (e) Health Reader, No 2. (Mechanic or Domestic Science or Music as in Regulation 99). 6. Mathematics.

From the Report of the Committee on College Entrance Requirements, National Educational Association, 1899.

Three distinct terms seem to be needed:

- 1) Program of studies, which includes all the studies offered in a given school;
- (2) Curriculum, which means the group of studies schematically arranged for any pupil or set of pupils;
- (3) Course of study, which means the quantity quality and method of the work in any given subject of instruction.

Thus the program of studies includes the curriculum, and may indeed furnish the material for the construction of an indefinite number of curriculums. The course of study is the unit, or element, from which both the program and the curriculum are constructed.

## 154. HIGH SCHOOL PROGRAM FOR 1907-08.

- 1). The maximum value of each examination paper shall be 100, and the passes shall be determined not by the aggregate mark, but by the average on the prescribed group of six subjects.
- (2). The "High School Pass" in all grades shall be an average of 50 % with no mark below 30 % on the group of six subjects.
- (3). The "Teachers' Pass" shall be an average of 60 % with no mark below 40 % on the group of six subjects.
- (4). Two hours shall be given at examination for each paper, which shall contain only eight questions (no options).
- (5). No candidate shall write upon more than six subjects of any grade at any regular examination (except when French and German are taken instead of Latin).
- (6). When a candidate wishes to raise a "High School Pass" to a "Teachers' Pass" he shall be required to make a mark of 60 per cent instead of 40 per cent on the subject or subjects on which he writes. This can be necessary only when a candidate is not writing for a higher grade, and therefore all such supplementaries can be taken on the papers of the regular examination.
- (7). A candidate who has taken Latin in Grade IX, may take the IX French paper instead of the regular one in Grade X, and the X French paper in Grade XI, provided a 70 per cent. mark is made in each case.
- (8). All teachers' licenses must continue to be granted under the regulations of the last school year 1906-7 until after the Provincial Examinations of 1908; after which date they can be granted only under the revised regulations published September, 1907, and future amendments.
- (9). The "High School Pass" admits to the corresponding class in the Provincial Normal School, whose faculty can raise it to the "Teachers' Pass" on evidence of improved scholarship, without which the Normal School diploma cannot be awarded.
- (10). From one to three points may be added by the examiner for pecially good writing. Bad writers have no right to be admitted

to an examination except on certificate of physical defects, and if examined, the papers are subject to a deduction of marks.

- (11). The high school subjects to be taught in a rural, or incompletely graded high school, shall be determined by the school board in agreement with the principal, with an appeal to the Inspector, and from him to the Council in case of disagreement or dissatisfaction.
- (12). Any subject deemed to be of importance in any community, may be put on the program of a school by the school board with the consent of the Education Department.
- (13). No school is advised to undertake the work of Grade XII with less than a staff of four regularly employed high school teachers.

#### GRADE IX.

(English and any other five subjects imperative.)

#### I. ENGLISH:-

- (a) LITERATURE—Lamb's Tales from Shakespeare, 4 tragedies and 4 comedies—Lear, Othello, Macbeth, Merchant of Venice, Hamlet, Tempest, As You Like It, and Twelfth Night—8 out of 20 in the edition of T. C. Allen & Co., and Longfellow's Evangeline, with critical study, word analysis prosody and recitations; English Composition as in Sykes, or an equivalent in the hands of the teacher, with essays, abstracts and general correspondence so as to develop the power of fluent and correct expression in writing.
- (b) As in Grammar (except notes and appendix) with easy exercises in parsing and analysis.
- 2. LATIN:—As in Collar and Daniell's Firs' Latin Book, to end of Chapter L., or any equivalent grammar, with easy translation and composition exercises. [The Roman (phonetic) pronunciation of Latin to be used in all grades].
- 3. French:—Bertenshaw's Grammar, Part I., and First Reader to page 56.
- 4. Geography:—Physical and Astronomical, General Geography of continents and British Empire in detail as in Calkin.
  - 5. ARITHMETIC:—As in the Academic to page 63.
- 6. ALGEBRA:—As in Hall and Knight's Elementary to end of Chapter XVI.

#### 7. Drawing:

- (a) As in Morton's Mechanical Drawing.
- (b) High School Drawing Course, No. 1, with model and object drawing and Manual Training No. 2.
- 8. Science: Botany—(5 Q.) Spotton (except Chap. XIX) and the study of the Wild Plants of the Phenological observations, with Pteris, Aspidium, Onoclea, Osmunda.

Physics—(3 Q.) As in Primer or equivalent (winter months). Text to be used only as an aid to the study of the subject.

#### GRADE X.

(English and any other five subjects imperative.)

#### i. English:—

- (a) Same subjects as in previous grade but more advanced scholarship required. Composition as in *Sykes*, or an equivalent in the hands of the teacher, with special attention to the development of readiness and accuracy in written narrative, description, exposition and general correspondence.
- (b) As in Grammar:—text book complete.
- 2. LATIN:—As in Collar and Daniell's First Latin Book complete, and "Cæsar's Invasion of Britain," by Welch and Duffield.
  - 3. GREEK:—As in White's First Greek Book, lessons I to end of L.
- Or FRENCH:—Bertenshaw's Grammar, Part II, and Souvestre's "Le Chevrier de Lorraine."
- Or GERMAN:—As in Joynes-Meissner's Grammar, first 25 exercises, with Buchheim's Modern German Reader, Part I., first division only.
- 4. HISTORY:—Review of British History as in "Outlines" or Calkin's; and oral lessons by teacher based on Bourinot's "How Canada is Governed" (one question).
- 5. CHEMISTRY:—Inorganic, as in Williams except Chapter XIII; or the corresponding matter in Waddell.
  - 6. ARITHMETIC: Text book completed.
- 7. ALGEBRA: As in Hall & Knight's Elementary to end of Chapter XXVII.

8. Geometry: Hall & Stevens' Euclid. Books I and II, with exercises to end of page 85.

#### GRADE XI.

### [Junior Leaving Examination.]

(English and any other five subjects imperative.)

- 1. ENGLISH: LITERATURE-Milton's L'Allegro, Il Penseroso, Comus and Lycidas; Macaulay's Essay on Milton. History of English literature as in Meiklejohn.
- 2. LATIN: Grammar and easy composition partly based on prose author read.
- (a) Cæsar's De Bell. Gall. Book I (for 1909, Books II and III,) and (b) Vergil's Æneid, Book III (also for 1909), with grammatical and critical questions.
- 3. Greek: Grammar and easy composition based partly on author read and White's First Greek Book completed. Xenophon's Anabasis, Book II (for 1909, Book III), with grammatical and critical questions.
- or French: Fraser and Squair's Grammar, sections 227 to 344; with the corresponding exercises, pages 343 to 371. Berthon's Specimens of Modern French Prose; Racine's "Athalie,"

or GERMAN: As in Joynes-Meissner to lesson 44, with Buchheim's Modern German Reader, Part I, complete. Review of Grade X German.

- 4. HISTORY:—General History as in Swinton.
- 5. PHYSICS:—As in Gage's Introduction to Physical Science, except chapters V and VI for the year 1907-08.
- 6. PRACTICAL MATHEMATICS:—As in Murray's Practical Mathematics, except chapter XI. Mensuration of surfaces and solids to be studied also as in Eaton or an equivalent.
- 7. ALGEBRA:—As in Hall & Knight's Elementary Algebra to end of chapter XL, except chapter XXIX to end of XXIXd.
- 8. GEOMETRY:—Hall & Stevens' Euclid, Books III and IV, with the typical and the easier exercises of Books I-IV.

## GRADE XII (PRELIMINARY).

[English, Latin (or French and German), one Mathematical, one Scientific and any other two subjects imperative.]

I. ENGLISH.

Stopford Brooke (Copp Clark) for reference. Carlyle's Sartor Resartus; Shakespeare's Julius Cæsar; and Milton's Parudise Lost, Books I and II with the following books for outside reading and theme writing; Pope's Rape of the Lock; Ruskin's Sesame and Lilies; Thackeray's Henry Esmond.

- 2. LATIN.. (Two Papers).
- (a) Cæsar's Gallic War Book VII, Chapters 1-50, with grammar, composition and sight translation; Bennet's Latin Grammar and Bradley's Arnold's Latin Prose Composition to end of Ex. XXV for 1907-8.
- (b) Cicero's Pro Milone, and Pro Archia; Vergil's Æneid, Books IV and V.
- .3. GREEK..

Xenophon's Hellenica, Books I and II. Homer's Iliad, Books I and II (omitting the catalogue of the ships) with grammar based upon the texts. Goodwin's Greek Grammar.

OR FRENCH.

Corneille's Le Cid and De Vigny's Cinq Mars. Berthon's Specimens of Modern French Verse, Part I, with questions upon grammar and composition as in Fraser and Squair's Grammar sections 345 to 461 with the Composition exercises from page 371 to page 394.

OR GERMAN.

Buchheim's Modern German Reader, Part II, Grammar and Composition as in Joynes-Meissner.

- 4. ALGEBRA.
- Hall and Knight's *Higher Algebra*, Chapters 1-23 inclusive, chapter 32 to section 467, chapter 35, omitting (\*) paragraphs throughout the prescribed work.
- .5. GEOMETRY.

As in Hall and Stevens, Books V and VI; and solid geometry.

6. PHYSICS.

As in Gage's Principles of Physics.

BOTANY. As in Bergen and Davis' Principles of 7. Botany.

ANCIENT 8. History of Greece and Rome as in Myers. Ancient History (Revised Edition) Parts II HISTORY. . and III:

## GRADE XII (FINAL) OR XIII.

[English, Latin (or French and German), one Mathematical, one Scientific and any other two subjects imperative.]

As in Lounsbury's English Language, Chauc-ENGLISH. er's Canterbury Tales, The Prologue, The Knighte's Tale and Nonne Preste's Tale (Skeat 2-6 edition). Shakespeare's As You Like It and Hamlet. With the following books for outside reading and theme writing; Blackmore's Lorna Doone, Ruskin's Crown of Wild Olive.

- LATIN. (Two Papers).
- Cicero's De Senectute; grammar, composition and sight translation.
- Tacitus, Agricola and Germania. Horace, Epistles, Books I and II with questions on grammar and subject matter.
- GREEK... 3.

Plato's A pology.

Demosthenes, *Philipics*, I and III. Euripides, Medea; with questions on grammar and subject matter of the prescribed authors.

FRENCH. OR

Sandeau's Sacs et Parchemins.

Moliere's Les Femmes Savantes, and Le Misanthrope.

Berthon's Specimens of Modern French Verse, Part II.

Francois' Advanced French Prose Composition. Exercises I to XXV inclusive.

OR GERMAN.

Prose Selections from Heine, Edited by Colbeck, (MacMillan & Co.).

Schiller's Wilhelm Tell and Lessing's Minna Von Barnhelm. Grammar as in Joynes-Meissner, and Composition as in Poll's Ger-

man Prose Composition.

Plane and Spherical as in Murray's. TRIGONO-4. METRY. . ANALYTICAL . As in Wentworth's, Chapters 1, 2 and 3 in 5. full, and chapters 5, 6, 7, omitting supple-GEOMETRY. mentary propositions. As in Norton's, with applications to Nova GEOLOGY.\*. Scotia. As in Ontario High School Zoology or Equiv-ZOOLOGY.\*. OR alent, with dissection of typical N.S. species, see Journal of Education, April, 1902, p. 31. CHEMISTRY. As in Storer and Lindsay's. 7. Myers' Mediæval and Modern History (Re-HISTORY... vised Edition). \*Only one of these to be on the time-table of any school. (SCHEDULE B.) PRESCRIBED FORM OF APPLICATION FOR PROVINCIAL HIGH SCHOOL EXAMINATION. To......Inspector of Schools: I,...., a duly licensed teacher of Class....,

do hereby certify that the candidates whose names are given below from No. 1 to No. . . . inclusive, will, to the best of my knowledge, have completed, before the date of next examination, the Prescribed Course of Study up to and including the Grade for which each hereby applies; and furthermore, according to my judgment, both the reading and writing\* of each candidate is up to the standard desirable to be maintained for promotion in the High Schools of the Province.

I also forward herewith on behalf of these candidates ..........dollars, being the amount of fees required under sub-section (b) of Regulation 85, "Provincial Examination of High School Students," as specified in the list below.

Candidates intending to take the M. P. Q. Examination (fee \$2.00, payable to the Deputy Examiner at Examination) are indicated by the letters M. P. Q. in the column headed "remarks" below.

Signed......School...........Co.

\*If a candidate has a physical defect preventing good reading or writing, application may be made if qualified by and accompanied with a particular and authentic description of the case for the consideration of the Education Department.

These pages, 1 to 32 of the October Journal of Education, 1907, are being published in advance as a bulletin on the 6th September, 1907.

## PROVINCIAL HIGH SCHOOL.

## EXAMINATION QUESTIONS, JULY, 1907.

County Academy Entrance - (Grade VIII.)

(See Comments and Regulations of the Council of Public Instruction, 59-66, page 80 to 82,

Manual of 1901.

10 TO 12 A. M., THURSDAY, 27TH JUNE.

#### ENGLISH.

- 1. Make sentences in which the following words occur:—orange, iron, cold, sweet, square, say, forgive, inform, cotton, salmon.
- 2. Write the plural of deer, mouse, ox, wharf, money; and the singular of memoranda, trout, teeth, chimneys, wolves.
- 3. Write, from memory, a passage of at least eight lines of poetry from the Reading selections of the past year.
- 4. Give the principal parts of the following verbs, and tell which of them are transitive and which are intransitive:—sit, is standing, are driven, ask, sleep, fall, rise, raise, break, fly.
  - 5. Explain the following abbreviations:—A. D., inst., Jr., etc., i. e., R. S. V. P.
  - 6. What are the Enlargements of a sentence? Define:—Adverbial, Noun, and Adjective clauses.
  - 7. Scan the following stanza, and point out any figures of speech in it:-

"All night long the northern streamers Shot across the trembling sky; Fearful lights that never beacon, Save when kings or heroes die."

- 8. Tell how Portia saved the life of Antonio, the Merchant of Venice, or, Write a short description of the place where you live.
  - 9 and 10. Analyze the following sentences, and parse the words in italics:—
    (a). Six spears' length from the entrance,
    Halted that mighty mass.
    - (b). Uneasy lies the head that wears a crown.
  - (c). The stranger said his name was Orlando.

2 TO 4 P. M., THURSDAY, 27TH JUNE, 1907.

#### MATHRMATICS.

(All the work necessary to find the answers must be shown in the solution.)

- 1. Reduce to an improper fraction 37569 45064
- 2. Find the greatest number that will divide 10974 and 15336, leaving remainders respectively 54 and 36.
- 3. A got one-sixth of a certain sum of money, and B got one-seventh of the same sum. A's share was \$8 more than B's. What was the sum, and how much did each get?
- 4. Reduce 37 miles, 6 furlongs, 35 rods, 2 yards, 1 foot, 11 inches, to inches, and express the result in meters.
- 5. Two men own 1 share each in different gold mines. A's share decreased in value 10%, and B's increased in value  $12\frac{1}{2}\%$ . Each is now worth \$900. What was the former value of each?
- 6. A house worth \$6000 and insured at two-thirds of its value, at the rate of 11%, is destroyed by fire. What was the actual loss?
- 7. Find the compound interest on \$420 from May 16th, 1906, to Jan. 7th, 1907,... at 6%.
  - 8. Find, to four places of decimals, the square root of 1074.9.

9. If 
$$W = 5a + 4b - 7c$$
  
 $X = -3a - 9b + 7c$   
 $Y = 20a + 7b - 5c$   
 $Z - 13a - 5b + 9c$   
evaluate  $W - X - Y + Z$ .

10. Show that when 
$$x = 5$$
:  $y = 3$  and  $a = 4$ ,  $(x^2 + y^2 - a)(x^2 - y^2) = x^4 - x^2 + a + y^2 + a - y^4$ 

9.00 TO 10.30 A. M., FRIDAY, 28th JUNE, 1907.

#### BRAWING AND ACCOUNTS.

[Only five questions to be answered.]

- 1. The base of a triangle is 45.6, and the angles at each end of the base are respectively 52° and 64°. Find the length of the two sides correct to a decimal and the vertical angle.
- 2. Draw freehand from memory, either (a) a natural leaf and the same conventionalized, or (b) a landscape scene, or (c) an animal, or (d) any model or object presented by your examiner.

- 3. (a). Give a sample of beautiful lettering—a name, title or motto; and (b) your address in the form it should appear on an envelope. (Of no value unless neat, very legible and beautiful).
  - 4. Make out a short bill of parcels as it would appear after being receipted.
  - 5. Rule out a short ledger account so as to show what it looks like.
- 6 (a). Under what circumstances is a Bill Book necessary? Why? Or (b). Draw out a form of a balance sheet showing the different classes of accounts generally to be found in it.

10.40 TO 12.00 A. M., FRIDAY, 28TH JUNE, 1907.

#### GEOGRAPHY AND HISTORY.

(Only three geographical and three historical questions to be answered.)

- 1. Define Longitude, Latitude, Equator, Zone, Gulf, Isthmus, Strait, Cape, Peninsula, Plateau.
- 2. Give the boundaries of the Province of Quebec, and name the chief rivers and lakes of that Province; or draw a map of New Brunswick marking the chief coast waters and capes.
- 3. Name the Southern States of the American Union with their capitals. Give also the chief products of each state.
- 4. Name the six great powers of Europe, and tell what you know about Sweden, of Holland, or Switzerland.
  - 5. Write a short note descriptive of British India.
  - 6. Tell what you understand by climate, or give a short description of Australia.
  - 7. Tell what you know about the Norman conquest of England.
- 3. Name the Sovereigns of the Houses of Tudor and Stuart, and mention the chief events in the reign of any one of them.
- 9. When and between whom were the following battles fought:—Hastings, Standard, Bannockburn, Bosworth?
- 10. Tell what you know about any one of the following:—Champlain, Frontenac, or Wolfe.
- 11. Tell the story of Lady La Tour or the outbreak of the Rebellion in the Northwest in 1885.
- 12. State the causes that led to the war of 1812. Name some of the chief battles fought, and the results.

2.00 TO 4.00 P. M., FRIDAY, 28th JUNE, 1907.

#### GENERAL KNOWLEDGE.

[A certificate from any teacher known to be qualified that a pupil can sing at least the prescribed number of school songs, and understands and can use the tonic-sol-fa or staff notation in such melodies, may count as one question. A certificate of a full year's course in Mechanic or Domestic Science may count as two questions; but full values are to be given only for the highest possible excellence in such courses; merely passable certificates being rated at about 50 per cent. of full value, according to the judgment of the examiner on the import of the certificate. Candidates presenting certificates can receive no value for answers to questions below referring to the subject of the certificate.

- r. Give a list of the songs you can sing. Where did you learn to sing them? Write down in any musical notation the air of one of them so as to show your knowledge of the system. Or present a certificate of having passed a recognized musical standard.
- 2. Indicate with a drawing any work which you have learned to do with tools, or household work, such as sewing, cooking, etc. Describe the circumstances, whether at home or in school, under which you learned to do such work. Or present a certificate of a full year's work in a Mechanic or Domestic Science department.
- 3. Why is it considered that total abstinence from alcoholic beverages is a better habit to form, than to use them in moderation, or occasionally?
- 4. Why do some people who know what is stated in the Health Readers used in our schools, adopt the tobacco habit after they leave school? What do you think could be done to enable people to do what is best for themselves in this habit?
- 5. Does a good manner enable a person to get on better anywhere than a bad manner? If so or not, explain why?
- 6(a). What are the good points of military drill in school? What are the points which you do not like in it? Or (b). Is there any need of physical exercise in school? Give the reasons for your view.
- 7. Tell as well as you can what you have learned from seeing cuttings through the surface of the earth with respect to the origin and composition of soil.
- 8. In like manner discuss any one of the things learned related to the following:—
  (a) Frost action, (b) Water in the air, (c) Light action.
- 9. What have you learned about the natural history of (a) any insect injurious to the interests of man; or(b) birds useful or injurious?
- 10. What have you learned about plants injurious to human interests. Give a list, if you can, of such plants as you have studied.

## PROVINCIAL HIGH SCHOOL EXAMINATIONS.

See Comments and Regulations of the Council of Public Instruction, 82 to 98, pages 86 to 93.

#### GRADE IX.

9.00 TO 10.00 A. M., WEDNESDAY, 3RD JULY, 1907.

#### ALGEBRA.

- 1. If a = 0, b = 1, c = -2, d = 3, find the value of  $(3 \ a \ b \ c 2 \ b \ c \ d) \sqrt[3]{a^3 \ b \ c c^3 \ b \ d + 3}$ .
  - 2. Divide  $6x^5 x^4 + 4x^3 5x^2 x 15$  by  $2x^2 x + 3$ .
  - 3. Find the value of x when  $x \left(3x \frac{2x 5}{10}\right) = \frac{1}{6}(2x 57) \frac{5}{3}$
  - 4. Given 
     \$\frac{9}{x} \frac{2}{y} = \frac{5}{z} \frac{3}{x} = \frac{7}{y} + \frac{15}{2z} = 4\$. find the values of \$x\$, \$y\$ and \$z\$.
     5. Two persons, 27 miles apart, setting out at the same time are together in 9 hours if \$\frac{1}{2} = \frac{1}{2} = \frac{1}{2}\$.
- 5. Two persons, 27 miles apart, setting out at the same time are together in 9 hours if they walk in the same direction, but in 3 hours if they walk to meet each other. Find their rate of walking.

Or, extract the cube root of  $54-27x^3+\frac{8}{x^6}-\frac{36}{x^3}$ 

10.10 TO 11.10 A. M., WEDNESDAY, 3RD JULY, 1907.

#### LATIN.

- 1. Decline together in both numbers, bonus filius and piger puer. Compare the adjectives acer, bonus, malus, magnus; and the adverbs bene, male, and feliciter.
- 2. Write in full the future indicative of sum and give the principal parts of facior floreo, vinco, debeo, duco, educo.
- 3. State the Case to be used in each of the following Constructions:—Means and instrument; the subject of the infinitive; time when; time within which; time how long; to denote possession after forms of the verb sum.
- 4. Translate into English:—(1) Servi reginis libros magistri dant. (2) Semper erit clarum imperatoris nomen. (3) Miles fortis periculo non terrebitur. (4) Nam maximæ erant militum spes et virtus.
- 5. Translate into Latin:—(1) The friend is advised by his faithful brother.—(2) The Romans were not loved by the Greeks.—(3) The number of fires in the town was great.—(4) The messenger is praised by the free people for his speed.

2 to 3 p. m., Wednesday, 3rd July, 1907.

#### ENGLISH LANGUAGE.

(Only five questions to be answered.)

- 1. Describe the interview between Marley's Ghost and Scrooge.
- 2. Describe the Christmas dinner at Bob Cratchit's.
- 3. Give, in your own language, a description of the home of Ellen Douglas.
- 4. Describe the combat between Fitz-James and Roderick Dhu.
- 5. Re-write the following, making necessary corrections:-
- (a). The heat of passion as well as the indolence of indifference are to be avoided.
- (b). Lay down and rest.
- (c) He plead earnestly to be allowed to return the purse.
- (d). It makes us kind of tired to hear him talk.
- (e). "Waverley" is one of the novels that never tires one in re-reading
- 6. Write a letter to a friend telling of your school work.

3.10 TO 4. 10 P. M., WEDNESDAY, 3RD JULY, 1907

#### FRENCH.

r and 2. Translate:—Un jeune homme avait élevé ensemble un liou, un ous **et un** chien. Ces trois animaux, habitués à se voir dés l'enfance, vivaient en paix et jouaient l'un avec l'autre sans jamais se fàcher. Un jour le chien, un peu trop rude au jeu, fit une légére morsure à la patte de l'ours. Cet animal, reprenant tout à coup sa férocité naturelle, se jeta sur le chien et l'etrangla. Le lion, témoin de cette cruauté de l'ours, ne la laissa pas longtemps impunie. Il se jeta à son tour sur la béte féroce, et vengea la mort du chien par la mort de l'ours.

- (a). Un jour le chien, un peu trop rude au jeu, fit une légére morsure à la patte de l'ours. Write this sentence in the plural.—Peu, account for this word, give its comparative and superlative and the corresponding adjective forms.
- (b). The boy has written a letter to his parents. Translate this sentence, and write it also in the negative and in the interrogative form, noting peculiarity of construction in the latter form.
- (c). La mort du chien. Parse du: explain its formation and mention analogous forms. Illustrate its use as a partitive article. When do you translate some and any by de, when by des and when by en? Give examples.

3 and 4. Translate:—Un matin donc, s'étant éveillée avec le jour, elle monta à l'atelier pour travailler au portrait de l'évéque. Personne n'était entré dans la piéce; du moins, le désordre de la veille y régnait encore. Quelle fut la surprise d'Angélica en trouvant sa boîte aux crayons ouverte, tous ses pastels bouleversés et plusieurs traits rouges tracés tout au travers de son beau portrait. Angélica demeura confondue devant

son ouvrage ainsi maltraité. Les larmes lui vinrent aux yeux en considérant les outrages dont il avait été l'objet. En cet instant la porte s'ouvrit et Paolo entra, un balai à la main et son torchon sous le bras. Il venait nettoyer l'atelier.—Paolo, dit Angélica, vous étes déjà entré ici ce matin? Non mademoiselle, lui répondit-il.

- (a) Parse and give principal parts of:—jut, avait, dit; write down the present indicative of jut, and of avait.
- (b). Write the plural of:—Son beau portrait. Pronominal form of son? When do you use bel? Give examples of these forms. State when and why son must be used before a feminine noun; translate for example:—Her friend (f) has arrived this morning.
- (c). How is the possessive case ('s) expressed in French; explain and translate:

  My father's house is near our uncle's. Whose house is this? It is my aunt's.

  Write the feminine and the meaning of:—blanc, doux, faux, sec, gentil, views.
- 5. Translate into French:—Give me some water for this poor man, he is thirsty. What is the seventh day of the week? It is Saturday. Your friend will be at the station on the 31st of August at half past eight in the evening. Where have the passengers gone? They have departed for their native country. What has that man been asking for? He has been asking for money.

9.00 TO 10.00 A. M., THURSDAY, 4TH JULY, 1907.

#### GEOMETRY.

- 1. From a given point B, draw a straight line, equal to a given straight line C D.
- 2. The two sides B C and C D of the triangle B C D, are together greater than the third side B D.
- 3. If the side B C of the isosceles triangle B C D be produced to F, and the exterior angle D C F be bisected by the straight line C K, then C K shall be parallel to the base B D.
- 4. The square described on the hypothenuse B D of the right angled triangle B C D is equal to the squares on the sides B C and D C.
- 5. (a) Any triangle B C D is divided by each of its medians into two parts of equal area. (b) The three medians intersect in the same point, which (c) trisects each median.

Or find the magnitude of each angle of a regular polygon of n sides.

2.00 TO 3.00 P. M., THURSDAY, 4TH JULY, 1907.

#### SCIENCE.

[Five questions only to be attempted, four from A and one from B. When there are several parts to a question be careful to keep them distinct so that none of them may be overlooked by the examiner.]

#### A.

- 1. Describe carefully (a) the different margins of leaves, or(b) different forms of pistil, or(c) the structure and germination of a seed.
- 2. Give a list of five flowering plants with such characteristics as will determine the order to which it belongs. If any two of the plants belong to the same order give distinctive characteristics.

- 3. Describe different forms of cell structure, that is, either the peculiarities of different individual cells, or the different arrangement of cells in different tissues, such as epidermis, fibro-vascular bundles, etc.
- 4. What are the peculiarities of any six of the following:—(a) the leaves of the mayflower; (b) the leaves of the spruce; (c) the shape of corolla of the buttercup, the lilac, and the bean; (d) the stamens of the mint or self heal; (e) the stamens of the sunflower or dandelion; (f) the arrangement of flowers in the clover; (g) the fruit of the pine; (h) the fruit of the shepherd's purse; (f) the calyx of the hepatica; (h) the leaves of the trillium; (h) the fruit of the raspberry; (h) the fruit of the apple.
- 5. Write as complete a description, as the time permits, of any plant. You may choose the largest tree, or a microscopic alga, or a fungus, or anything between. The object is to see how well you have studied the plant with which you are most familiar.

6. Describe peculiar forms of roots, or stems, or branches, or leaves.

В

7. Describe some experiment that shows expansion due to heat, or you may describe the rarer cases of expansion with lowering temperature.

8. Describe any experiment in sound in such a way as to show that you understand the principles involved.

9. Describe an air-pump, or a diving-bell.

9.00 to 10.00 A. M., FRIDAY, 5TH JULY, 1907.

#### ABITHMETIC.

(Only five questions to be answered)

1. Simplify 
$$\frac{7}{12}$$
 of  $\frac{3}{14}$  of  $\frac{18}{18} \times \frac{10\frac{3}{4} - 4}{6\frac{3}{16} + 7\frac{2}{3}} \div \frac{7}{5}$  of  $9\frac{1}{11}$ 

- 2. A person buys drugs at \$16.00 a lb. Avoir. At how much a dram Apoth. wt. must he sell to gain 80%.
  - 3. From the sum of  $\frac{2\frac{1}{3}}{5}$  and  $\frac{3\frac{1}{3}}{6}$  take the difference of their quotient and product.
- 4. On March 1st, a person loaned \$600,00 at 10%, per annum, Simple Interest, and when the loan was repaid he received \$624 00. On what date was it repaid?
- 5. An apple dealer bought 1250 barrels of apples at \$2.10, and paid insurance on 75% of his purchase at  $\frac{4}{5}$ %. At what price per barrel, must be sell the apples to clear 30% on his outlay?
- 6. At what price must a book-seller mark a book which cost \$1.20, so that he may allow a discount of 10% to a student, and still make 20% profit.

10.10 TO 11.10 A. M., FRIDAY, 5TH JULY, 1907

(Only five questions to be answered-2 or 3 in A, and 2 or 3 in B.)

#### DRAWING AND BOOKKERPING.

- 1. A ship making for a point ten miles due North, sails N. E. at first, then N. W., then N. E., then N. W., and so reaches her destination. How far did she sail altogether?
- A church stands on a level plain. The angle of elevation of the top of the spire At a point 200 ft. nearer, the angle of elevation is 30°. Find the height of the is 15°. spire.
  - Draw a picture of a dog in a sitting position, watching a bird in a tree.
  - Draw an historical border, giving its name.

- Write him a letter enclosing a draft for You owe John Smith of St. John \$700. \$500 and a promissory note for \$200.
  - 6. Give copies of the draft and note in question 5.
- If you purchased a horse for \$120 and gave in payment a note of hand for three months at 7 per cent., show how you would enter it in the Bill Book.

2.00 TO 3.00 P. M., FRIDAY, 5TH JULY, 1907.

#### GEOGRAPHY AND HISTORY.

(Only five questions to be answered; not more than three from either A or B.)

- 1. Write a descriptive paragraph on the Dominion of Canada under the following heads:-position and area, climate, resources and trade.
- Name and 2. Define Latitude and Longitude and tell how they are reckoned. locate the principal ocean currents.
- Write a note on any one of the following: Newfoundland, British West Indies, Cape Colony or Ceylon.
  - Draw an outline map of Great Britain, marking the situation of the chief cities. 4.
- Describe British India, naming its divisions, cities, etc; or write a note on Austra-5. lia.

- 6. Give a short account of the exploration of the coast of Acadie by De Monts.
- Write a note on the Indians of Eastern Canada in Champlain's time. 7.
- Tell what you know about the early settlement of Cornwallis, Horton, Pictou, Truro, Prince Edward Island, Shelburne.
  - Describe some of the effects of the war of 1812-14.
- 10. Tell what you know about the duties of the following:—Sheriff, Coroner, Pro honotary, Constable, Stipendiary.

3.10 TO 4. 10 P. M., FRIDAY, 5TH JULY, 1907.

### ENGLISH GRAMMAR.

- 1. Define Passive Voice. Tell how the passive voice is formed.
- 2. Define Participle. Name all the particples of the verb "drive."
- 3. Give the chief sub-divisions of Adverbial Clauses of Manner, with exemples
- 4. Analyze:--

Long, weary hours they waited. The duty of accusing him belongs to me. The witness was asked a question. 'It' is a pronoun.

All that a man hath will he give for his life.

5. Parse the italicized words in the sentences given above.

### GRADE X.

9.00 to 10.00 A. M., WEDNESDAY, 3RD JULY, 1907.

#### ALGEBRA.

1. Simplify 
$$\frac{x^4 - 8x}{x^2 - 4x - 5} \times \frac{x^2 + 2x + 1}{x_1^3 - x^2 - 2x} \div \frac{x^2 + 2x + 4}{x - 5}$$

- 2. Find the value of x in  $\frac{(\cdot 3x 2)(\cdot 3x 1)}{\cdot 2x 1} \frac{1}{6}(\cdot 3x 2) = \cdot 4x 2.$
- 3. A, B, C are three towns forming a triangle. A man has to walk from one to the next, ride thence to the next, and drive thence to his starting point. He can walk, ride, next, ride thence to the next, and drive thence to his starting point. He can walk, ride, and drive a mile in a, b, c minutes respectively. If he starts from B he takes a + c b hours. If he starts from C he takes b + a c hours. If he starts from A he takes c + b a

hours. Find the length of the circuit.

4. Given 
$$\frac{34}{x^2+y^2} = \frac{15}{xy}$$
 and  $x+y=8$ ; find the values of x and y.

5 There is a number between 10 and 100; when multiplied by the digit on the left the product is 280; if the sum of the digits be multiplied by the same digit the product is 55; required the number.

10.10 TO 11.10 A. M., WEDNESDAY, 3RD JULY, 1907.

#### LATIN.

1. Decline together in both numbers:—idem deus and eadem dea. In each of the foilowing adjectives and adverbs two degrees of comparison are omitted. Supply them, bene, pejor, acriter, maximus, optimus, diutius.

2. Give the principal parts of the following verbs:—fundo, torqueo, tollo, morior, lego, surgo, fingo, figo, curro. Write in full the future indicative of eo, and the imperfect Subjunctive of volo.

3. (a) State the case used in each of the following constructions:—(1) Name of town at which, to which, and from which, respectively; (2) Noun following simple verbs of privation and want; (3) Predicate noun referring to same person or thing as subject; (4) Object remembered or forgotten.

- (b) Explain the use of tenses of Subjunctive Mood in wishes and conditions.
- 4. Translate into Latin:—(1) The Roman general stripped Corinth of many statues. (2) The soldiers will not be terrified by many dangers. (3) They ordered him to go to Rome. (4) At length Ceres heard who had abducted her daughter.
- 5. Translate into English:—Utuntur aut aere aut taleis ferreis ad certum pondus examinatis pro nummo. Nascitur ibi plumbum album in mediterraneis regionibus: in maritimis ferrum, sed eius exigua est copia: aere utuntur importato. Materia cuiusque generis, ut in Gallia est, praeter fagum atque abietem. Leporem et gallinam et anserem gustare fas non putant: haec tamen alunt animi voluptatisque causa. Locas sunt temperatioria quam in Gallia, remissioribus frigoribus.
  - (a) Parse utuntur, abietem, alunt.
  - (b) Explain:—case of aere, causa, frigoribus.

2 TO 3 P. M., WEDNESDAY, 3RD JULY, 1907.

#### ENGLISH LANGUAGE.

(Only five questions to be answered.)

- 1. Describe the appearance of the first of the three spirits which appeared to Scrooge.
  - 2. Describe the scene at the home of Scrooge's nephew on Christmas evening.
- 3. Describe the appearance and character of Ellen Douglas as portrayed in the "Lady of the Lake."
  - 4 Explain the following:—
    - (a). The Lady of the Bleeding Heart.
    - (b). The Fiery Cross.
    - (c). The village maids and matrons round In dismal coronach resound.
    - (d). Then on the field his targe he threw.
    - (e). If pall and vair no more I wear, Nor thou the crimson sheen.
- Write a letter to a friend, telling of the games, and amusements, and pleasures of your school life.
  - 6. State fully when (1) capital letters, (2) italic letters should be used.

3.10 TO 4.10 P. M., WEDNESDAY, 3RD JULY, 1907.

#### FRENCH.

r and 2. Translate:—Les decouvertes d' Hudson. Si vous examinez la carte de l'Amérique du nord, vous verrez une grande baie, nommée la baie d'Hudson. Hudson était un marin anglais qui vivait au commencement du dix-septiéme siécle. Vous savez qu'à cette époque, toutes les nations de l'ouest de l'Europe équipaient des expéditions de découverte. Parmi les hardis marins qui rendirent fameux ce siécle, on compte particu-

liérement Henri Hudson. Jamais personne ne connut mieux le métier de marin. Son courage était à l'épreuve de tous les événements, et sa constance infatigable. Le but de ses voyages était de trouver un passage pour alier aux Indes par le nord-ouest. Il serait trop long de faire la description de tous les voyages d'Hudson.

- (a) Illustrate, giving short examples, the use of qui and of que as relative and as interrogative pronouns. Disjunctive form of que? Translate:—What are you thinking of?
- (b). The relative who, in certain cases, cannot be expressed by qui; explain and translate:—My friend's mother who has been in England, has returned. Translate:—The gentleman whose son I know. The gentleman with whose son I have travelled. Whose in the second sentence assumes a different form; explain.
- (c). Parse and give principal parts of:—savez, rendirent, serait.
  3 and 4. Translate:—Henri (mercredi, 24 mai). Nous voilà prêts. Quelle route prendrons-nous pour aller à Paris? Vous savez qu' il y en a plusieurs. Nous pouvons y aller par Douvres, Folkestone, ou Newhaven. C'est de Douvres à Calais que la traversee ést la plus courte. Par Newhaven elle est beaucoup plus longue. Par Folkestone elle est un peu plus longue que par Douvres, mais cette route épargne ensuite une trentaine de kilométres de chemin-de fer, le trajet de Calais à Boulogne. Maintenant décidons quel train nous devons prendre. Il nous faut consulter l'indicateur. Le voici. Il y a un train qui part de Charing-Cross à dix heures de matin. Si cela vous va nous prendrons ce train-là. Nous arriverons ainsi à Paris à 6 heures du soir. J'ai déjà écrit à l'hôtel pour retenir deux chambres.
  - (a). Il y en a plusieurs. b) as a preposition. ples in French.

    Parse en; illustrate its use: (a) as a pronominal object; What meanings is "il y a" susceptible of; give examples in French.
  - (b). How do the French effect comparison of superiority and of inferiority. Write sentences in illustration. Compare:—bon, bien, peu. Translate:—Worse than that.
  - (c): Parse and give principal parts of:—pouvons, faut, va.
- 5. Translate into French:—If you find the newspapers, lend me one. This book, the author of which I have met, is very interesting. From what countries do we receive these useful animals? At what time does the sun set in spring? Were the men not mistaken when they thought that the train stopped at this station.

9.00 to 10.00 a. m., Thursday, 4th July, 1907.

#### GEOMETRY.

- 1. The rectangle contained by the whole line B D and the part B C, is equal to the square on the part B C and the rectangle contained by the two parts B C and C D.
- 2. The sum of the squares on the whole line B D and on the part B C, is equal to twice the rectangle contained by B D and B C together with the square on C D.
- 3. The circle B C D, touches internally the circle F C G; Show that they cannot have the same centre.
- 4. On B D as an hypothenuse, right angled triangles B C D are described; Find the locus of the right angle C.
- 5. The squares on the diagonals B D and C F of the trapezium B C D F, are together equal to the sum of the squares on its two oblique sides, B F and C D, with twice the rectangle contained by its parallel sides, B C and F D.

10.10 TO 11.10 A. M., THURSDAY, 4TH JULY.

#### GREEK.

- I. (a) Distinguish between the uses of  $\epsilon \kappa$  and  $\epsilon \xi$  and of  $\delta \nu$ ,  $\delta \nu \kappa$  and  $\delta \nu \chi$ ; also between the meaning of  $\tau i \kappa$  and  $\tau i \kappa$ . (b) Decline together in all numbers  $\tau o$   $\mu \iota \kappa \rho \delta \nu$   $\delta \hat{\omega} \rho o \nu$ .
- II. (a) Define reduplication, distinguish between its forms and point out the reduplication in ἐλελύκη.
  (b) Give principal parts of λέγω, ἔχω, φυλάττω, πείθω, χράομαι, παύω.
- III. Point out (1) The different meanings of autos; (2) The distinction between proclitics and enclitics; (3) Difference between Greek and Latin infinitives in regard to expressing purpose; (4) The manner in which agency is expressed in Greek with chief exception.
- IV. Translate into English: (1) σὺν τοῖς θεοῖς καλαὶ τῷ στρατένματι ἐλπίδες ἐισὶ νίκης. (2) Αλλὰ μὰ τοὺς θεοὺς οἰκ αὐτοὺς διώξω. (3) θᾶττον γὰρ τῶν ἵππῶν ἔτρεχον. (4) οἱ δὲ στρατιῶται ἐπεὶ ἤκουσαν ἐχαλέπαινον καὶ ὡργίζοντο ἰσχῦρῶς τῷ Κλεάρχῳ.
- V. Translate into Greek: (1) Cyrus called together his generals and spake as follows. (2) Clearchus led the right wing and Menon the left. (3) At daybreak he sent heralds concerning a truce. (4) He made Xenophon commander in order that we might be saved.

2.00 TO 3.00 P. M., THURSDAY, 4TH JULY, 1907

#### SCIENCE.

#### Α

I Five questions only to be attempted—not more than four from A and not more than two from the remainder of the paper—either from B or C, not from both.]

oxide, copper nitrate, sulphuric acid, calcium carbonate; also the names of the substances having the following molecular formulæ:—

### HgO, O3, HBr, NH3, CO2.

- 2. Describe fully the method of preparation and the properties of oxygen, or chlorine, or nitric acid, or sodium carbonate, or marsh gas.
- 3. What volume is represented by the formula of a gas? Given the equation  $FeS + H_2SO_4 = FeSO_4 + H_2S$ , how many liters of hydrogen sulphide (sulphuretted hydrogen) at standard temperature and pressure can be obtained from 88 grams of fer rous sulphide (sulphide of iron). The standard weights required for use are Fe = 56 S = 32.

- 4. What would be obtained by the action of sulphuric acid on zinc, on common salt, on potassium iodide, on oxalic acid, on caustic potash, and on sodium carbonate. Either tell the conditions necessary, or give the equations.
- 5. The weight of oxygen in water is eight times that of the hydrogen; why is the formula H<sub>2</sub>O with O—16 considered better than HO with O—8?

6. Describe any chemical manufacture of an industrial character.

B.

- 7. How does water get into and out of the plant?
- 8. Write a short account of the diseases of plants.
- 9. Describe the process of butter making. What are some of the most important causes of good and bad butter?
- 10. What is meant by "igneous agencies" in Geology? What results of their action do we find?
  - II. Describe three minerals with which you are acquainted.
  - 12. Give a short account of stratification.

3.10 to 4. 10 p. m., Thursday, 4th July, 1907.

#### GERMAN.

- I. Translate:—Ein Mann fiel einmal in einen Fluss und konnte sich nicht retten. Er schrie um Hülfe, und ein Bauer eilte herbei, und zog ihn mit einer Stange aus dem Wasser; dabei stach er ihm aber unglücklicher Weise ein Auge aus. Nun ging der Mann zum Richter, verklagte seinen Retter und verlangte, er solle ihm Busse för das verlorne Auge geben. Der Richter wusste lange nicht, wie er den Fall entscheiden sollte, und die Leute lachten über ihn.
  - (a). Write the Genitive singular and the Nominative plural of .—Mann, Fluss, Bauer, Auge, Blume, Kind.
  - (b). Decline er, ich, es. In English you is used in addressing persons; what forms are employed in German? Give illustrations.
- 2. Translate:—Der berühmte General Wallenstein pflegte als Knabe mit seinen Schulkameraden Soldat zu spielen. Dabei musste er aber immer kommandieren, und er Erlaubte niemand, ein Wort darein zu reden Einmal sagte jemand zu ihm "Du benimmst dich, als wenn du ein Fürst wärest." "Was nicht ist, antwortete der stolze Knabe, das kann noch werden."
  - (a). Der berühmte General. Decline this in the four cases singular and plural.
  - (b). Parse and give principal parts of:—würest, kann, werden. Write down the Indicative present of wärest and werden.
- 3 and 4. Translate:—Ein Missverständniss. Eines Morgens kam in ein Wirtshauss am Rhein ein junger, preussischer Offizier, und bestellte sich einen marinierten Hering, der ihm auch bald in einer Bri he mit Kapern gebracht wurde. Nicht weit von ihm sitzt ein östreichischer Offizier, der ihn freundlich anredet und sagt:—"Nicht wahr, das ist etwas Gutes, ich habe sie selbst in Italien wachsen sehen." "Sie scheinen heiter aufgelegt," erwiederte der Preusse, "ich muss Sie aber ersuchen, mir solchen Unsinn nicht aufbinden zu wollen." "Gar kein Unsinn es ist mein voller Ernst." "Lächerlich! Wie können Sie so etwas behaupten?" "Und ich sage Ihnen, ich habe es selbst gesehen, sie wachsen auf Sträuchern."

- (a). Comment on the position of the *verb* and of the *subject* in the sentence:—
  "Eines Morgens...preussischer Offizier."
- (b). What is the logical order of words in a German sentence? Translate:—I have written a letter to my brother yesterday; illustrate the various ways in which this order may be deviated from in this sentence.
- 5. Translate into German:—The daughters of this man are tall. In this long street is a large old house; it is the boys' school. In winter the days are shortest and in summer they are longest. I should have been at home earlier, if I had not been so tired. Where is my German grammar? I need it.

9.00 to 10.00 A. M., FRIDAY, 5th July, 1907.

#### ARITH METIC.

(Only five questions to be answered)

1. Simplify 
$$3\frac{1}{2} \times \frac{\frac{1}{4} \quad \text{of } \frac{5}{9} \times 7\frac{1}{5}}{\frac{1}{3} + 4\frac{1}{2} \quad \text{of } \frac{7}{27}} + 7\frac{1}{2} \left( \frac{\frac{2}{5} - 1\frac{1}{5} + 3\frac{3}{4} \div 7\frac{1}{2} + \frac{4}{15}}{\frac{7}{95} + 150 \frac{5}{19} - 74\frac{2}{5}} \right) \times 425$$

- 2. Find the cube root of 5 —— correct to three places of decimals.

  105
- 8. A man invested \$500 00 more than 2 of his money in a house, and \$600.00 more than 4 3 of the remainder in a lot, and had now \$900.00 left. How much money had he in all?
- 4. A puts \$1,500.00 and B \$1,800.00 into a business. At the end of a year each adds \$1000.00, and C joins them with \$2000.00. Fifteen months after this the profits, which amounted to \$2,500.00, are divided. Find the share of each partner?
- 5. A man sold a farm for \$2,400.00. He received \$200.00, and was to receive \$200.00 each month till it was paid. The purchaser, however, made no other payment until the end of five months, when he paid \$1,000.00, and at the end of seven months, when he paid \$500.00. When could the balance be paid without loss to either party.
- 6. What sum will purchase an annuity of \$240.00 for three years, at 5%, compound interest? What is the final value?

10 10 TO 11.10 A. M., FRIDAY, 5TH JULY, 1907.

### DRAWING AND BOOKKEEPING.

(Only five questions to be answered—2 or 3 in A, and 2 or 3 in B.)

Α.

1. Two ships, C and D, are at anchor. A base line, A B, of 300 yards is taken of the shore. The observer finds that the angle, B A C, is 60° and the angle, B A D, is 40°, the angle, A B C, is 50°, and the angle, AB D, is 90°. How far are the ships apart?

- 2. A church stands on the top of a hill of uniform slope. At a certain point on the slope, 700 feet from the base of the church, the angle of elevation of the base is 15°, and of the spire is 30°; find the height of the church.
  - 3. Sketch a boy blowing soap bubbles from a clay pipe.
    4. Draw a picture showing how a cat differs from a rabbit in form and habits.

В.

- 5. Journalize (a) Paid my note of 12th July in favor of D. Ross, \$500 and interest \$1.08.
  - (b) Paid Clerks' salaries in cash \$100.
  - (c) Bought of W. E. Holt, 200 bbls. Beef at \$2,600; paid him cash \$600, gave-him my note for \$2000.
  - 6. (a) What is a trial balance.
    - (b) Why does the trial balance not prove the work to be absolutely correct?
- 7. (a) What is a draft? (b) Write a draft. (c) Which is the drawer, the drawee, the payee? (d) Give a general rule for journalizing drafts on account.

2.00 TO 3.00 P. M., FRIDAY, 5TH JULY, 1907.

### GEOGRAPHY AND HISTORY.

(Only five questions to be answered; not more than three from either A or B.)

#### A.

- 1. Draw an outline map of the coast-line of the Mediterranean Sea, naming the countries bordering on it.
- 2. The United States originally consisted of thirteen British Colonies. Name them and give the capital of each. Name the chief rivers of the United States, and the waters into which they fall.
- 3. Describe the physical features of South America; or, write a note on the Barbary States.
- 4. Write a note on any one of the following, with particular reference to climate, trade, and foreign possessions:—Portugal, Germany or Denmark. Or, describe the great rivers of Asia.
  - 5. Describe Malaysia, its situation, products, and political connection.

В.

- 6. Write a note on the English Institutions and customs before the Conquest, such as the "Witenagemot," the "Moots," Divisions of the people, methods of trial.
  - 7. Relate the chief events in the reign of Edward III.
  - 8. Name the most important political changes under the Stuart Sovereigns.
- 9. What do you know about any three of the following:—"Magna Carta," "Field of the Cloth of Gold," the "Armada," "Habeas Corpus Act," "South Sea Scheme," "Stamp Act," "Chartists."
  - 10. Write a note on the Crimean War, its causes, progress and results.

3.10 TO 4.10 P. M., FRIDAY, 5TH JULY, 1907

#### ENGLISH GRAMVAR

- 1. What classes of nouns take "es" in the plural? Give an example for each class.
- 2. Give five examples of irregular comparison of adjectives. Define tense, and name the tenses of the Indicative Mood.
- 3. Discuss the exceptions to the following rule of Syntax:—"When the subject consists of two or more nouns, or expressions equivalent to nouns, connected by and, the verb must be plural."
  - 4. Analyze:--

"I change My thought, and hold thy valor light As that of some vain carpet knight, Who ill deserved my courteous care, And whose best boast is but to wear A braid of his fair lady's hair."

5. Parse the words italicized in the following sentences:-

We slept the whole morning.

Have you been waiting long,

Love thyself last.

Which of the scholars is to have the prize?

### GRADE XI.

9.00 to 10.00 A. M., WEDNESDAY, 3RD JULY.

#### ALGEBRA.

1. Divide 
$$\frac{8-4\sqrt{5}}{\sqrt{5}+1}$$
 by  $\frac{3\sqrt{5}-7}{5+\sqrt{7}}$ 

Or, By the Binomial Theorem find the cube root of 128 to six places of decimals.

- 2. (a) If the roots of  $x^2 px + q = 0$  are two consecutive integers, prove that  $p^2 4q 1 = 0$ .
- (b) If p be the difference between any quantity and its reciprocal, q the difference between the square of the same quantity and the square of its reciprocal, show that  $p^2(p^2 + 4) = q^2$ .
- 3. Find a Geometrical Progression of which the sum of the first two terms is  $2\frac{2}{3}$ , and the sum to infinity  $4\frac{1}{6}$ .
  - 4. (a) In what scale is the Denary number 418 represented by 1534.
- (b) There are 9 books, of which 4 are English, 3 Latin, and 2 Greek; in how many ways could a selection be made so as to include at least one of each language?
- 5. Find the amount of an annuity of \$150 in 15 years, allowing compound interest at 4 per cent. per annum.
  - Or, Show how you would solve, graphically, the equation

$$2x + 3y = 7$$
  
 $3x - 2y = 4$ 

10.10 TO 11.10 A. M., WEDNESDAY, 3RD JULY.

#### LATIN COMPOSITION.

- 1. Decline together in the Singular:—fortis Æneas, meus Virgilius; and in both numbers, pulchrius pæma, idem orator, ea res.
- 2. Give the principal parts of the following verbs:—cado, cedo, caedo, tango, tego, surgo, maneo, rego, lego. Write in full the perfect indicative of cano, and the imperfect Subjunctive of eo.
- 3. Illustrate by brief expressions the following Latin Constructions:—(1) Ablative Absolute, (2) Dative of the Possessor, (3) Time when, (4) Time how long, (5) Case or Cases following in and sub, (6) Case following the Comparative degree when quam is omitted.
- 4. Translate into Latin:—(1) The next day they move their camp from that place. (2) Thus in doubtful battle they fought long and sharply. (3) He replied that he would not go. (4) He promised that he would give him ten ships.
- 5. Translate into Latin:—(1) It pleased them to send delegates to Caesar. (2) The entire hope of the Greeks rested on the aid of Pallas. (3) Thoughtless and blind with rage we press on. (4) He was born at Athens, lived at Rome twenty years, and died at Carthage.

2 TO 3 P. M., WEDNESDAY, 3RD July.

### ENGLISH LANGUAGE.

(Only five questions to be answered.)

1. "The education of Joan of Arc was mean, according to the present standard; but ineffably grand according to a philosophic standard."

How does DeQuincy support this statement?

- 2. Give an account of the trial of Joan of Arc
- 3. Explain the following:
  - (a) Apparitors.
  - (b). Lilies of France.
  - (c). The Oriflamme of France.
  - (d). The Sacred Ampulla.
  - (e). The Triple Crown.
- 4. Give an outline of the plot of "The Princess" Point out what bearing the "Songs" have upon the teaching of the poem.
- 5. Compare the character of "Lady Ida" with that of "Lady Blanche." Illustrate your answer by quotations.
  - 6. Explain the following, with special reference to the words in italics:-
    - (a). Close at the boundary of the liberties.
    - (b). In masque or pageant at my father's court.
    - (c) The dame That whispered "Asses' ears" among the sedge.

- (d). The gray mare
  Is ill to live with, when her whinny thrills
  From tile to scullery.
- (e). Then on the roofs
  Like that great dame of Lapidoth she sang.
- 7. Describe the character of "Bob Cratchit" in Dicken's "Christmas Carol," or, that of Roderick Dhu in Scott's "Lady of the Lake."

3.10 TO 4.10 P. M., WEDNESDAY, 3RD JULY.

#### FRENCH.

- 1. Translate:—Le jour de reception. Pour quoi avez-vous un jour, bonne maman?—Pour rester à la maison et recevoir mes amis lorsqu'ils viennent me rendre visite.—Est-ce que cela vous amuse, bonne maman?—Est-ce amusant de rester toute une journée sans sortir?—Ce n'est pas toujours amusant.—Alors pourquoi le faites-vous?—On fait bien des choses qui ne sont pas amusantes.—Mais quand je serai grand, je ne serai pas aussi sot. Je ne ferai jamais ce qui ne m'amuse pas.
  - (a). Parse and give the principal parts of:—viennent, failes, ferai. What parts of a verb are formed from the present participle? Use the verbs above for your illustrations.
  - (b). Explain, giving examples, the use of:ce qui and ce que. Translate:—What I am speaking of happened yesterday. What I am thinking of does not interest you.
- 2. Translate:—Une lecon de savoir vivre. Etes-vous un papa vous?—Hélas, non, je suis célibataire.—Qu'est-ce que c'est que célibataire?—Cela veut dire que je suis un vieux garçon.—Oh, je vois bien que vous étes vieux; mais vous n'avez pas l'air d'un garçon avec vos lunettes et votre téte sans cheveux et..—Oh! oh!—Qu'y a-t-il?—Vous allez vous couper la langue. Regarnez, bonne maman—monsieur met son couteau dans la bouche.—Chut! taisez-vous.
  - (a). Vous allez vous couper. Write the present Indicative and the future of allez, and account for the infinitive couper. What other class of words govern the infinitive? Give an example.
  - (b). Taisez-vous. Parse and give principal parts of taisez. Distinguish between:—Vous vous taisez and vous taisez-vous. French for:—I have been silent.
- 3 and 4. Translate:—Souvestre "Le Serf." C'était là le seul lit de l'habitation. Un homme en cheveux blancs y était couché, les yeux fermés, mais il était aisé de voir, à sa respiration entrecoupée et au leger tremblement de ses lévres que la maladie l'y reterait plutôt que le sommeil. Un jeune garcon d'environ seize ans, assis prés de là au foyer, s'occupait à entretenir le feu sous une bassine de fer. Il venait de la découvrir et semblait savourer l'odeur succlente qui s'en exhalait, lorsqu'une jeune fille de son âge entra portant un morceau de beurre enveloppé dans un lambeau de toile rousse
  - (a). Que la maladie l'y retenait plutôt. Que may be:—relative, interrogative, exclamatory (how); write sentences illustrating these forms.
  - (b). L'y retenait. Parse y. In what case may y be a pronoun? Explain and translate:—Did you think of (songer a) writing? I did not think of it.
- 5. Translate into French:—At what time should the English mail have arrived? He is angry that you have gone out without him. We spent the time in asking each other questions. Apply to the "Mail" for information. History is more useful to us than novels; the bee cannot extract (tirer) honey from flowers that are merely painted.

#### GREEK.

### XENOPHON: ANABASIS.

I.

### Translate:---

ἐνταῦθ' ἔμεινεν ἡμέρας πέντε· καὶ τοῖς στρατιώταις ώφείλετο μισθὸς πλέον ἢ τριῶν μηνῶν, καὶ πολλάκις ἰόντες ἐπὶ τὰς θύρας ἀπήτουν· ὁ δὲ ἐλπίδας λέγων διῆγε, καὶ δῆλος ἢν ἀνιώμενος· οὐ γὰρ ἢν πρὸς τοῦ Κύρου τρόπου ἔχοντα μὴ ἀποδιδόναι.

(a) Parse ἀπήτουν. (b) Explain the case of ἔχοντα.

II.

#### Translate:--

οί μεν εφασαν άρπάζοντάς τι κατακοπηναι ύπο των Κιλίκων, οι δε ύπολειφθέντας, καὶ οὐ δυναμένους εύρειν τὸ άλλο στράτευμα οὐδε τὰς όδούς, είτα πλανωμένους ἀπολέσθαι ἡσαν δ' οὖν οὖτοι ἐκατὸν ὁπλίται.

Parse έφασαν, κατακοπήναι, υπολειφθέντας, ευρείν.

#### III.

### Translate:-

οί δὲ Θαψακηνοὶ ἔλεγον ὅτι οὐπώποθ' οὕτος ὁ ποταμὸς διαβατὸς γένοιτο πεζῆ, εἰ μὴ τότε, ἀλλὰ πλοίοις, ἃ τότε ᾿Αβροκόμας προϊὼν κατέκαυσεν, ἵνα μὴ Κῦρος διαβῆ. ἐδόκει δὴ θεῖον εἶναι καὶ σαφῶς ὑποχωρῆσαι τὸν ποταμὸν Κύρφ ὡς βασιλεύσοντι.

Give the rule for mood in the *oratio obliqua* depending on a past tense. Illustrate rule from extract.

#### IV.

### Translate:-

ταῦτα δὲ λέγων θορύβου ἤκουσε διὰ τῶν τάξεων ἰόντος καὶ ἤρετο τίς ὁ θόρυβος εἶη. ὁ δὲ εἶπεν ὅτι τὸ σύνθημα παρέρχεται, δεύτερον ἤδη. ΄ καὶ δς ἐθαύμασε τίς παραγγέλλει, καὶ ἤρετο ὅ τι εἴη τὸ σύνθημα. ὁ δ΄ ἀπεκρίνατο '' Ζεὺς σωτὴρ καὶ νίκη."

(a) παρέρχεται. Does the mood of this verb conform to rule given under previous extract? (b) Account for case of θορύβου.

#### Translate:-

καὶ εὐχὴν δέ τινες αὐτοῦ ἐξέφερον, ὡς εὕχοιτο τοσοῦτον χρόνον ζῆν ἔστε νικώη καὶ τοὺς εὖ καὶ τοὺς κακῶς ποιοῦντας ἀλεξόμενος. καὶ γὰρ οὖν πλεῖστοι δὴ αὐτῷ ἑνί γε ἀνδρὶ τῶν ἐφ΄ ἡμῶν ἐπεθύμησαν καὶ χρήματα καὶ πόλεις καὶ τὰ ἑαυτῶν σώματα προέο θαι.

(a) Parse νικφη, giving other forms. (b) Explain case of αὐτφ.

9.00 TO 10.00 A. M., THURSDAY, 4TH JULY.

#### GEOMETRY.

- 2. B C D is a secant and B F a tangent to the circle F C D; show that the rectangle contained by B C and B D is equal to the square on B F.
- 2. Given the base and vertical angle of a triangle, find the locus of the centre of the inscribed circle.
  - 3. Find a fourth proportional to three given straight lines.
- 4. A B C is a triangle, O is its orthocentre, and A K a diameter of the circumscribed circle; show that B O C K is a parallelogram.
  - 5. The bisectors of the angles of any regular polygon are concurrent.

10.10 TO 11.10 A. M., THURSDAY, 4TH JULY.

### LATIN (Casar and Vergil).

- 1. Translate:—Reperiebat etiam in quaerendo Cæsar, quod proelium equestre adversum paucis ante diebus esset factum, initium eius fugae factum a Dumnorige atque eius equitibus (nam equitatui, quem auxilio Caesari Aedui miserant, Dumnorix praeerat): eorum fuga reliquum esse equitatum perterritum.
  - (a) Parse quaerendo, (b) Account for the datives, equitatui, auxilio, Caesari-
- 2. Translate;—Petierunt uti sibi concilium totius Galliae in diem certam indicere, idque Caesaris voluntate facere liceret: sese habere quasdam res, quas ex communi consensu ab eo petere vellent. Ea re permissa diem concilio constituerunt, et iureiurando ne quis enuntiaret, nisi quibus communi consilio mandatum esset, inter se sanxerunt.

Give rule for use of moods in oratio obliqua, and illustrate from extract.

- 3. Translate:—Qui se ex his minus timidos existimari volebant, non se hostem vereri, sed angustias itineris et magnitudinem silvarum, quae inter eos atque Ariovistum intercederent, aut rem frumentariam, ut satis commode supportari posset, timere dicebant.
  - (a) What is the distinction in meaning and use between vereri and timere.
  - (b) What is the distinction between ut and ne after verbs of fearing?
  - 4. Translate:—Vestibulum ante ipsum primoque in limine Pyrrhus exsultat telis et luce coruscus aena;; qualis ubi in lucem coluber mala gramina pastus, frigida sub terra tumidum quem bruma tegebat, nunc positis novus exuviis nitidusque iuventa, lubrica convolvit sublato pectore terga arduus ad solem, et linguis micat ore trisculcis.

(a) Scan and prove quantities of first and last lines.

(b) Derive bruma.

5. Translate:—'Mene efferre pedem, genitor, te posse relicto sperasti? tantumque nefas patrio excidit ore? si nihil ex tanta superis placet urbe relinqui, et sedet hoc animo, perituraeque addere Troiae teque tuosque iuvat, patet isti ianua leto, iamque aderit multo Priami de sanguine Pyrrhus, natum ante ora patris, patrem qui obtruncat ad aras.

### LOCAL "NATURE" OBSERVATIONS.

This sheet is provided for the purpose of aiding teachers to interest their pupils in observing the times of the regular procession of natural phenomena each season. First, it may help the teacher in doing some of the "Nature" lesson work of the Course of Studyo secondly, it may aid in procuring valuable information for the locality and province. Two copies are provided for each teacher who wishes to conduct such observations, one to be preserved as the property of the section for reference from year to year; the other to be sent in with the Return to the Inspector, who will transmit it to the Superintendent or examination and compilation.

What is desired is to have recorded in these forms, the dates of the first leafing, flowering and fruiting of plants and trees: the first appearance in the locality of birds migrating north in spring or south in autumn, etc. While the objects specified here are given so as to enable comparison to be made between the different sections of the Province, it is very desirable that other local phenomena of a similar kind be recorded. Every locality has a flora, fanna, climate, etc, more or less distinctly its own: and the more common trees, shrubs, plants, crops, etc., are those which will be most valuable from a local point of view

in comparing the characters of a series of seasons.

Tracher's will find it one of the most convenient means for the stimulation of pupils in observing all natural phenomena when going to and from the school, and some pupils radiate as far as two miles from the school room. The "nature study" under these conditions would thus be mainly undertaken at the most convenient time, without encroaching on school time; while on the other hand it will tend to break up the monotony of school travel, fill an idle and wearisome hour with interest, and be one of the most valuable forms of educational discipline. The eyes of a whole school daily passing over a whole school section will let very little escape notice, especially if the first observer of each annually recurring phenomenon receives credit as the first observer of it for the year. The observations will be accurate, as the facts must be demonstrated by the most undoubted evidence, such as the bringing of the specimens to the school when possible or necessarily.

To all observers the following most important, most essential principles of recording are emphasized: Better no date, no record than a wrong one or a doubterful one. Sports out of season due to very local conditions not common to at least a small field, should not be recorded except parenthetically. The date to be recorded for the purposes of compilation with those of other localities should be the first of the many of its kind following immediately after, it. For instance, a butterfly emerging from its chrysalis in a sheltered cramy by a southern window in January would not be an indication of the general climate, but of the peculiarly heated nook in which the chrysalis was sheltered; nor would a flower in a semi-artificial, warm shelter, give the date required. When these sports out of season occur, they might also be recorded, but within a parenthesis to indicate the peculiarity of some of the conditions affecting their early appearance.

These schedules should be sent in to the Inspector with the annual school returns in preceding July (if possible) when the schedule of the previous school year was necessarily completed and sent in.

A duplicate copy of the schedule of observations should be securely attached to the school register for the year, so that the series of annual observations may be preserved in

each locality. The new register has a page for such records.

Remember to fill in carefully and distinctly the date, locality, and other blanks at the head of the schedule on the next page; for if either the date or the locality or the name of the responsible compiler should be omitted the whole paper is worthless and cannot be bound up for preservation in the volume of The Phenological Observations.

May for instance, can be readily and accurately converted into the annual date, "the 144th of day of the year," by adding the day of the month given to the annual date of the last day of the preceding month (April in this case), thus 21+120=144. The annual date can be briefly recorded, and it is the only kind of dating which can be conveniently averaged for phenological studies. When the compiler is quite certain that he or she can make the conversion without error, the day of the year instead of the day of the month will be preferred in recording the dates.

### (OTHER OBSERVATIONS AND REMARKS.

<sup>\*</sup> These figures are the Provincial Phenochrons for 1906—the arithmetical means of the Phenochrons of each of the ten Regions of the Province of Nova Scotia It will form an interesting standard of comparison for local observers. Yarmouth observations, for linstance, will generally be much earlier, while Inverness observations will be later.

2.00 TO 3.00 P. M., THURSDAY, 4TH JULY.

#### PHYSICS.

(Only five questions to be answered.)

- 1. Describe capillary attraction.
- 2. Describe experiments which show that the pressure of a liquid depends only upon the depth and not upon the quantity of liquid.
- 3. How high will a body rise if projected vertically upwards with an initial velocity of 100 ft. per second.
- 4. Describe any mechanical power (or machine) showing clearly the relation between the power and weight.
  - 5. Describe how water can be made to boil at the ordinary temperature of the air.
- 6. Give experiments which show the effect of a current of electricity upon a magnet placed near it.
  - 7. Describe experiments in electrical induction.
- 8. Describe the Wheatstone Bridge, or Ruhmkorff's coil, or a dynamo, or a telephone.
- Describe, in a way to show that you clearly understand the principles involved, any experiment in sound.
- 10. Describe total reflection, or double refraction, or the effect of a double convex lens when placed in different positions in relation to the object.

3.10 TO 4.10 P. M., THURSDAY, 4TH JULY.

#### GERVAY.

- 1. Translate:—Die ganze Nacht hindurch arbeitete der Schmied, und wenn er so mit dem grossen Hammer das Eisen zusammenschlug, sprach er bei jedem Schlag:—"Landgraf, werde hart! Landgraf, werde hart, wie dies Eisen! und schalt ihn, und sprach weiter:—"Du böser, unseliger Herr! was nözest du mit deinem Leben den armen Leuten? Siehst du nicht, wie deine Räte das arme Volk plagen, und die Edelleute deine Befehle verspotten?"
  - (a). Die ganze Nacht hindurch arbeitete der Schmied. Write this sentence in the plural, and account for the position of the subject.
  - (b). Write the plural of:—Hammer, Landgraf, Herr; and the singular of:—Räte, Edelleute, Befehle.
- 2. Translate:—Zu gleicher Zeit drückte er mir ein Papier mit Geld id die Hand. Ich nahm es und wusste vor freudiger Bestürzung nichts zu antworten. Als ich zu Hause das Papier öffnete, fand ich zwanzig Louisdors. Nun erschrak ich zum zweiten Male. Dieser freudige Schrecken that eine mächtige Wirkung auf mein Herz. Es war ein glücklicher Abend für mich, fur den ich Gott nicht genug danken kann.
  - (a). Ein glücklicher Abend Decline this in the four cases singular and plural.
  - (b). Parse and give principal parts of:—wusste, fand, war, and write down the present Indicative of war and of wusste. Translate:—He has no friends. There is nothing new. No, he is not here.

3 and 4. Translate: -Ein Wolfsgericht. Einen Augenblick darauf sprang er wieder herein, und zweiundzwanzig Wölfe folgten ihm. Alle eilen still an das gefallene Pferd und beginnen ihr Mahl. Da ertönt ein furchtbarer Schlag,—die eisernen Thorslügel fahren zu. Entsetzt stieben die Wölfe auseinander, stürzen nach dem Thore, und da dieses geschlossen ist, rennen sie verzweiflungsvoll nach allen Seiten—die Wölfe erkennen, dass sie gefangen und verloren sind. Da kehren sie in die Mitte des Hofes zurück, umstellen den alten Wolf, der sie geführt hat, bilden einen Kreis um ihn, hatten gewissermassen Gericht über ihn, und wie auf ein Zeichen stürzen sie plötzlich vor, reissen ihn zu Boden und zerfleischen ihn.

Da kehren sie in die Mitte des Hofes zurück. Explain the construction of (a). the word zurück, and account for its position. In three cases words of this class assume a different position; take the same sentence for your illustrations.

What is the position of the *verb* in a sentence:—a) in the *inverted* order;

in the transposed order; write two sentences in illustration.

Translate into German:—Many were expected, but few have come. I thought you would keep your word, but I have been mistaken. A man has suddenly fallen ill; a physician must be sent for. It is very probable that it will rain to-morrow. The more diligently I study the German language, the more clearly I see that it is very much like the English.

#### GREEK COMPOSITION.

- Decline together in all numbers: outos o avip and άύτη ή γυνή.
- II. (a) Explain meaning of the augment and distinguish between its syllabic and temporal forms. out peculiarities in augment and imperfect indicative of ἔχω and δράω. (b) Give principal parts of ἔχω, μανθάνω, δίδωμι, Βαίνω, τάττω.
- III. (a) Distinguish between the attributive and predicate positions of the adjective in relation to article and noun and between the meaning of autos o aunp and ό ἀυτὸς ἀνήρ. (b) What cases are used to express the following relations: (1) Price and value; (2) Nearness. and likeness; (3) Sharing and touch; (4) Separation?
- IV. Translate into English: (1) Ενίκησε Μαρσύαν ξρίζοντά όι περί σοφίας. (2) ἀπέλαβον τὰ ήρπασμένα άνδράποδα, ἄν που έντυγχάνωσιν. (3) οἱ δὲ ὁρῶντες ἐθαύμαζον καὶ ἐσιώπων. (4) προσαιτοῦσι δέ μισθόν.
- V. Translate into Greek: (1) Here Cyrus had a palace and a great park; (2) They already suspected that they were going against the King. (3) For they ran much faster than the horses. (4) The King did not perceive the plot against himself.

9.00 to 10.00 A. M., FRIDAY, 5TH JULY.

#### PRACTICAL MATHEMATICS.

(Only five questions to be answered.)

- 1. Given  $\log 2 = .30103$ , find  $\log 8$ . of 128, 125, and 2500.
- 2. Express the functions of Sin.  $204^{\circ}$ , Sin.  $510^{\circ}$ ,  $\cos{(-800^{\circ})}$  and  $\cos{359^{\circ}}$  in terms of the functions of acute angles.
- 3. (a) Deduce the formula Sin. 2 A = 2 Sin. A cos A. (b) Find the Sin. of 36°, given. Sin.  $18^\circ = \frac{5\frac{1}{2} 1}{4}$ 
  - 4. Find an angle that satisfies the equation: tan. A + 3 cot. A = 4.
- 5. From each of two stations, East and West of each other, the altitude of a balloon is observed to be 45°, and its bearings to be, respectively, N. W. and N. E. If the stations be one mile apart, how many feet high is the balloon?
- 6. (a) Deduce the formula: Diff. Long. = dep.  $\times$  Sec. mid. lat. (b) Find the number of miles in 1° of Long. at Lat. 45°, the cos. of 45°, being  $\frac{1}{\sqrt{2}}$ .
  - 7. Explain, with drawings, the two systems of pulleys:

$$\frac{P}{W} = \frac{1}{2n} \text{ and } \frac{P}{W} = \frac{1}{2^n}$$

10.10 TO 11.10 A. M., FRIDAY, 5TH JULY.

#### PHYSIOLOGY.

(Only five questions to be answered.)

- 1. Describe the spinal column, and show how it is adapted to the purposes for which it is intended.
- 2. Describe briefly all the organs that can be seen when looking into the mouth avity or pharynx.
- 3. What are the most common defects of sight? How are they caused? What remedies would you advise?
- 4. What is meant by normal pulse, temperature, and breathing? What are the usual variations that occur in disease?
- 5. Describe fully the conditions that most seriously affect health in the school-room?
- 6. Describe any one experiment which you performed, or saw performed, last year, to illustrate or explain the structure or functions of any part of the human body.

2.00 TO 3.00 P. M., FRIDAY, 5TH JULY.

#### GEOGRAPHY AND HISTORY.

(Only five questions to be answered.)

- r. Write a note on Egyptian civilization, with special reference to government, caste, fine arts, religion, etc.
- 2. Draw an outline map of the Roman Empire in the second century, locating the cities, Byzantium, Rome and Carthage.
  - 3. Give a brief account of the Peloponnesian War.
  - 4. Write a note on the rise of the Saracens.
- .5 Give a brief account of any two of the following:—Pericles, Hannibal, Peter the Hermit, William the Silent, Peter the Great, Frederick the Great.
  - 6. What do you understand by "The War of the Spanish Succession?"
- 7. Mention the principal battles fought in the Franco-German campaign giving as many particulars as you can.
  - 8. Trace the events leading up to the breaking out of the American Civil War.

3.10 TO 4.10 P. M., FRIDAY, 5TH JULY.

#### ENGLISH GRAMMAR.

- 1. Give the definition and derivation of the word "case." Compare Case as used in modern English, with old English and other languages. Explain the use of the apostrophe in the possessive of nouns.
- 2. Discuss the theories with regard to the origin of the gerund. Give illustrations of other parts of speech being used as nouns.
- 3. What is Syntax as distinguished from Etymology. Distinguish between the three classes of verbs that take two objects, with an example for each class.
- 4. As compared with Ancient Greek or modern German "modern English is weak in formative elements." Explain this statement.
  - 5. Analyze the following extract, and parse the words italicized:-

'Fresh as the first beam glittering on a sail, That brings our friends up from the underworld, Sad as the last which reddens over one That sinks with all we love below the verge; So sad, so fresh, the days that are no more

#### GRADE XII.

9.00 TO 10.00 A. M., MONDAY, IST JULY

#### ROMAN HISTORY.

- t (a). Describe the political and social organization of the Roman people under the kings. (b). Give an account of the form of government established at Rome when kingly rule was abolished. (c). Define augur, comitia centuriata, patres conscripti.
- 2 (a). Tell what you know of the Laws of the Twelve Tables. (b). What were the Tribunes of the Plebs. When and how were they established? (c). Tell the story of the Gallic invasion and its results.
- 3 (a). What important series of wars terminated in 290 B. C.? (b). Where was Carthage? When and by whom was it founded? (c). Give an account of the most important incident connected with the third Punic war.
- 4 (a). Outline the career of Sulla. (b). Tell briefly what you know of the Jugurthine War. (c). Enumerate the chief exploits of Pompey the Great.
- 5 (a). Give some account of Julius Cæsar's invasion of Britain. (b). Of the circumstances which led to the second civil war. (c). Cæsar's reforms.

10.10 TO 11.10 A. M., MONDAY, 1ST JULY.

#### CHEMISTRY.

(Only five questions to be answered.)

- 1. State Avogadro's Law. How may it be used to determine the molecular formula of a gas such as hydrogen?
  - 2. Compare the metals, Copper, Silver and Gold.
- 3. What weight of potassium nitrate is required to produce enough nitric acid to make 10 grams of copper nitrate from copper oxide (Cu-63.5; K 39; N 14; O 16)
- 4. Give the formulæ for the molecular quantities of the following substances:—Silicon fluoride, lead sulphate, phosphoric acid, oxalic acid potassium ferrocyanide, and alum. What substances are represented by the following formulæ:—Hg Cl, Fe(O H)3, K2 Cr2 O7, Na2H P O4, Bi O (N O3), H2 Si F6?
  - 5. Describe the manufacture of Phosphorus.
- 6. Give, with as much detail as is possible in the time, the metallurgy of sodium, or aluminium, or mercury.
- 7. What is meant by an oxidising agent? What are some of the most common oxidising agents? Show by an equation, and express in words the action of any of them on sulphur dioxide in water, or on any other reducing agent.
- 8. What volume of nitrous oxide measured at 700 mm. pressure and 25° C can be obtained from 60 grams of ammonium nitrate. (The calculation need not be worked out, but may be left in the form of fractions multiplied together; N = 14; O = 16).

11.15 TO 12.15 P. M., MONDAY 1ST JULY.

#### GREEK.

### XENOPHON: HELLENICA.

I.

#### Translate:-

Καὶ χειμών ἐπήει, ἐν ῷ οἱ αἰχμάλωτοι Συρακόσιοι, εἰργμένοι τοῦ Πειραιῶς ἐν λιθοτομίαις, διορύξαντες τὴν πέτραν, ἀποδράντες νυκτὸς ῷχοντο εἰς Δεκέλειαν, οἱ δ' εἰς Μέγαρα. ἐν δὲ τῆ Λαμψάκῳ συντάττοντος 'Αλκιβιάδου τὸ στράτευμα πῶν οἱ πρότεροι στρατιῶται οὐκ ἐβούλοντο τοῖς μετὰ Θρασύλλου ουντάττεσθαι, ὡς αὐτοὶ μὲν ὅντες ἀήττητοι, ἐκεῖνοι δὲ ἡττημένοι ἥκοιεν.

(a) Πειραιώς. Decline this noun. (b) Parse ἀποδράντες and explain this use of participle.

#### II.

### Translate :-

- Οἱ δὲ ᾿Αθηναῖοι ἀκούοντες ταῦτα ἀθύμως μὲν εἰχον, ἔπεμπον δὲ πρὸς τὸν Κῦρον πρέσβεις διὰ Τισσαφέρνους. ὁ δὲ οὐ προσεδέχετο, δεομένου Τισσαφέρνους καὶ λέγοντος, ἄπερ αὐτὸς ἐποίει πεισθεὶς ὑπ' ᾿Αλκιβιάδου, σκοπεῖν ὅπως τῶν Ἦλλήνων μηδὲ οἴτινες ἰσχυροὶ ἀσιν, ἀλλὰ πάντες ἀσθενεῖς, αὐτοὶ ἐν αὐτοῖς στασιάζοντες.
- (a)  $\partial \theta \dot{\nu} \mu \omega s \epsilon i \chi \sigma v$ . How is this use of  $\dot{\epsilon} \chi \omega$  and adverb generally explained? (b)  $\ddot{a}\pi\epsilon\rho$ . To what does this relation refer?

#### III.

#### Translate:-

Τούτων όποτέρω βούλεσθε, ὁ ἄνδρες ᾿Αθηναῖοι, τῷ νόμω κρινέσθων οἱ ἄνδρες κατὰ ἔνα ἔκαστον διηρημένων τῆς ἡμέρας τριῶν μερῶν, ἐνὸς μὲν ἐν ῷ συλλὲγεσθαι ὑμᾶς δεῖ καὶ διαψηφίζεσθαι, ἐἀν τε ἀδικεῖν δοκῶσιν ἐάν τε μή, ἐτέρου δ΄ ἐν ῷ ἀπολογήσαθαι.

(a) Parse κρινέσθων and διηρημένων. (b) What is the construction of μερών and of ένδς?

#### IV.

### Translate:-

Έν δὲ ταῖς 'Αθήναις τῆς Πᾶράλου ἀφικομένης νυκτὸς ἔλέγετο ἡ συμφορά, καὶ οἰμωγὴ ἐκ τοῦ Πειραιῶς διὰ τῶν μακρῶν τειχῶν εἰς ἄστυ διῆκεν, ὁ ἔτερος τῷ ἐτέρφ παραγγέλλων ὅστ' ἐκείνης τῆς νυκτὸς οὐδεὶς ἐκοιμήθη, οὐ μόνον τοὶς ἀπολωλότας πενθοῦντες, ἀλλὰ πολὺ μᾶλλον ἔτι αὐτοὶ ἑαυτούς, πείσεσθαι νομίζοντες οἶα ἐποίησαν.

 (a) τῆς Παράλου. Explain.
 (b) ὁ ἐτερος-παραγ-Lέλλων. What would be the regular construction?

#### v.

#### Translate:--

\*Ω ἄνδρες βουλευταί, εἰ μέν τις ὑμῶν νομίζει πλείονας τοῦ καιροῦ ἀποθνήσκειν, ἐννοησάτω ὅτι ὅπου πολιτεῖαι μεθίστανται πανταχοῦ ταῦτα γίγνεται· πλείστους δὲ ἀνάγκη ἐνθάδε πολεμίους εἶναι τοῖς εἰς ὀλιγαρχίαν μεθιστᾶσι διά τε τὸ πολυανθρωποτάτην τῶν Ἑλληνίδων τὴν πόλιν εἶναι καὶ διὰ τὸ πλεῖστον χρόνον ἐν ἐλευθερία τὸν δῆμον τεθράφθαι.

(a) Syntax of χρόνον? (b) Parse τεθράφθαι and explain its construction.

2.00 TO 3.00 P. M., MONDAY, 1ST JULY.

#### GREEK HISTORY.

- 1 (a). How did the physical features of Greece affect the political destinies of the people? (b). Name the four great divisions of the Grecian race. (c). Sketch the state of society in the Heroic Age.
- 2 (a). What is meant by the *Dorian Invasion*. (b). Tell what you know of the *Amphictyonic Council*. (c). Of Lycurgus and his legislation. (d). Of the reforms of Clisthenes.
- 3 (a). Discuss the colonization of Asia Minor by the Greeks, and mention the three groups of colonies there founded. (b). Describe the interesting expedition that took place in that country in 401, B. C. (c). The invasion of Asia by Agesilaus.
- 4 (a). State how the control of Thebes was acquired by the Spartans in 382 B. C., and how they were subsequently expelled. (b). Describe the exploits of Epaminondas. (c). Narrate the career of the elder Dionysius.
- 5 (a). Show how Philip of Macedon became the leading ruler in Greece. (b). Describe his character. (c). Write a brief sketch of the eminent Athenian who headed the opposition to Philip.

3.10 TO 4. 10 P. M., MONDAY, 1ST JULY.

#### BOTANY.

(Only five questions to be answered).

- 1. (a) Describe the appearance and size of the nucleus of any plant cell which you may have examined, stating particulars with respect to the kind of plant and the magnifying power of your microscope. (b) Describe the process of cell division and growth, so as to show your idea of the cell, its contents, and their transformation.
- 2. Sketch briefly the character of the tissue seen in any three of the following:—(a) a section of a potato tuber, (b) a cross and longitudinal section of pine, spruce or hemlock, (c) of a fern stem, (d) of a lichen thallus, or (e) of any tissue not figured in your texts.
- 3. Discuss assimilation and respiration in plants within the compass of an average answer. Or describe with drawings any experiments you may have made in plant physiology.

- 4. Show what you know about the protophyta, either generally, or in some particular species which you may have studied.
  - 5. Show what you know about fungi parasitic on leaves of any kind.
  - 6. Show what you know about any of the olive or red algæ.
- $\,$  7. Compare a moss with a liverwort so as to show your knowledge of the characters of the classes.
- 8. Describe the characters of the Compositæ and give a list of the species you remember; or of the Rosaceæ; or of the Labiatæ; or of the Orchidaceæ; or of the Lycopodiaceæ, or of the Agaricaceæ.

4.15 TO 5.15 P. M., MONDAY, IST JULY

#### GREEK.

### DEMOSTHENES.

I.

### Translate:-

εἴ τι πάθοι καὶ τὰ τῆς τύχης ἡμῖν, ἥπερ ἀεὶ βέλτιον ἡ ἡμεῖς ἡμῶν αὐτῶν ἐπιμελούμεθα, καὶ τοῦτ ἐξεργάσαιτο, ἴσθ ὅτι πλησίον μὲν ὄντες, ἄπασιν ἂν τοῖς πράγμασι τεταραγμένοις ἐπιστάντες ὅπως βὸύλεσθε διοικήσαισθε, ὡς δὲ νὖν ἔχετε, οὐδὲ διδόντων τῶν καιρῶν Αμφίπολιν δέξασθαῖ δύναισθ ἄν, ἀπηρτημένοι καὶ ταῖς παρασκευαῖς καὶ ταῖς γνώμαις.

(1) What is the construction of τα τηη τύχης and of ηπερ? (2) Parse ἀπηρτημένοι.

II.

#### Translate: -

οὕτοι παντελῶς οὐδ' εἰ μὴ ποιήσαιτ' ἄν τοῦτο, ὡς ἔγωγέ φημι δεῖν, ἐὐκαταφρόνητόν ἐστιν, ἵν' ἢ διὰ τὸν φόβον εἰδὼς εὐτρεπεῖς ὑμᾶς (εἴσεται γὰρ ἀκριβῶς. εἰσὶ γάρ, εἰσὶν οἱ πάντ' ἐξαγγέλλοντες ἐκείνω παρ' ἡμῶν αὐτῶν πλείους τοῦ δέοντος) ἡσυχίαν ἔχῃ, ἢ παριδὼν ταῦτα ἀφύλακτος ληφθῆ, μηδενὸς ὄντος ἔμποδὼν πλεῖν ἐπὶ τὴν ἐκείνου χώραν ὑμῖν, ἀν ἐνδῷ καιρόν.

(1) Parse  $\ell \iota \sigma c r \alpha \iota$ ,  $\lambda \eta \phi \theta \hat{\eta}$ . Explain construction of the adjectives  $\ell \iota \iota \tau \rho \epsilon \pi \epsilon \hat{\iota} s$  and  $\pi \lambda \epsilon \iota \delta \iota \upsilon s$ .

### III.

### Translate:-

σκοπείτε γάρ ώδι. ὑμεῖς τὴν παρρησίαν ἐπὶ μὲν τῶν ἄλλων οὕτω κοινὴν οἴεσθε δεῖν εἶναι πᾶσι τοῖς ἐν τἢ πόλει ὅστε καὶ τοῖς ξὲνοις καὶ τοῖς δούλοις αὐτῆς μεταδεδώκατε, καὶ πολλοὺς ἄν τις οἰκέτας ἴδοι παρ' ὑμῖν μετὰ πλείονος ἐξουσίας ὅ τι βούλονται λέγοντας ἢ πολίτας ἐν ἐνίαις τῶν ἄλλων πόλεων, ἐκ δὲ τοῦ συμβουλεύειν παντάπασιν ἐξεληλάκατε.

ἀυτης. Explain case of this word.

#### IV.

#### Translate:-

πάνυ γε, ἀλλ' ὅμως αὐτοὺς δεῖ σῶς εἶναι· συμφέρει γὰρ τῆ πόλει. καὶ μὴν οὐδ' ἐκεῖνό γε δῆλόν ἐστιν ἡμῖν, ὡς ἐπὶ χερρόνησον οὐχ ήξει· ἀλλ' εἴγε ἐκ τῆς ἐπιστολῆς δεῖ σκοπεῖν ἡς ἔπεμψε πρὸς ὑμᾶς, ἀμυνεῖσθαί φησι τοὺς ἐν χερρονήσω. ἄν μὲν τοίνυν ἢ τὸ συνεστηκὸς στράτευμα, καὶ τῆ χώρα βοηθῆσαι δυνήσεται καὶ τῶν ἐκείνου τι κακῶς ποιῆσαι.

(1) Parse  $\sigma\hat{\omega}_s$ . (2) Explain the case of  $\hat{\eta}_s$  and the grammatical connection of the words  $\tau\hat{\omega}_{\nu}$  ekelvoy  $\tau_i$ .

#### V

#### Translate:-

φέρε γὰρ πρὸς Διός, εἰ λόγον ὑμᾶς ἀπαιτέσειαν οἱ Ἦχηνες ὧν νυνὶ παρείκατε καιρῶν διὰ ραθυμίαν, καὶ ἔροινθ' ὑμᾶς ΄ ἄνδρες 'Αθηναῖοι πέμπετε ῶς ἡμᾶς ἐκάστοτε πρέσβεις, καὶ λέγετε ὡς ἐπιβουλεύει φίλιππος ἡμῖν καὶ πᾶσι τοῖς Ἑλλησι καὶ ὡς φυλάττεσθαι δεῖ τὸν ἄνθρωπον καὶ πάντα τὰ τοιαῦτα; ' ἀνάγκη φάσκειν καὶ ὁμολογεῖν. ποιοῦμεν γὰρ ταῦτα.

(1) λόγον ὑμᾶς. Explain construction of these words.

9,00 TO 10,00 A. M., TUESDAY, 2ND JULY.

### TACITUS (Agricola and Germania).

<sup>1.</sup> Translate:—Ac plerique suam ipsi vitam narrare fiduciam potius morum quam arrogantiam arbitrati sunt, nec id Rutilio et Scauro citra fidem aut obtrectationi fuit; adeo virtutes iisdem temporibus optime aestimantur, quibus facillime gignuntur. At nunc narraturo mihi vitam defuncti hominis venia opus fuit; quam non petissem incusaturus tam saeva et infesta virtutibus tempora.

- (a) Explain construction of ipsi, morum, obtrectationi, venia.
- (b) Quam——tempora. Explain this conditional sentence.
- 2. Translate:—Iam vero principum filios liberalibus artibus erudire, et ingenia Britannorum studiis Gallorum anteferre, ut, qui modo linguam Romanam abnuebant, eloquentiam concupiscerent. Inde etiam habitus nostri honor, et frequens toga, paulatimque discessum ad delenimenta vitiorum; porticus et balnea et conviviorum elegantiam; idque apud imperitos humanitas vocabatur, quum paus servitutis esset.
  - Et——anteferri. Give differing interpretations of this clause.
- 3. Translate:—Quos quod tandem invenistis, non restiterunt, sed deprehensi sunt' novissimae res et extremo metu corpora defixere aciem in his vestigiis, in quibus pulchram et spectabilem victoriam ederetis. Transigite cum expeditionibus, imponite quinquaginta annis magnum diem, approbate rei publicae nunquam exercitui imputari potuisse aut moras belli aut caussas rebellandi.

Parse restiterunt and ederetis, accounting for mood of latter.

- 4. Translate:—Quotiens bella non ineunt, multum venatibus, plus per otium transigunt dediti somno ciboque, fortissimus quisque ac bellicosissimus nihil agens, delegata domus et penatium et agrorum cura feminis senibusque et infirmissimo cuique ex familia; ipsi hebent, mira diversitate naturae, quum iidem homines sic ament inertiam et oderint quietem.
  - (a) Parse venatibus. (b) Parse oderint and explain mood.
- 5. Translate:—Est in insula Oceani castum nemus, dicatumque in eo vehiculum, veste contectum. Attingere uni sacerdoti concessum. Is adesse penetrali deam intelligit, vectamque bubus feminis multa cum veneratione prosequitur. Laeti tunc dies, festa loca, quaecunque adventu hospitioque dignatur. Non bella ineunt, non arma sumunt; clausum omne ferrum; pax et quies tunc tantum nota, tunc tantum amata, donec idem sacerdos satiatam conversatione mortalium deam templo reddat.

Parse penetrali and adventu, accounting for case of each.

10.10 TO 11.10 A. M., TUESDAY, 2ND JULY.

#### ZOOLOGY.

- (Only five questions to be answered.)

  1. (a) Show what you know about the bones connected with a jaw and hyoid arch of any fish you may have dissected, and (b) its intestinal system.
- 2. State, as fully as you can in the time, any practical study you may have made of any group of the fauna of the province, exhibiting as evidence, a list of the species, &c., sufficient to impress the examiner with the character of your work.
- 3. Compare the structure of the skin and its organs in the following:—(a) Mammals, (b) Birds, (c) Amphibia, (d) Reptiles, (e) Fish, (f) Earth-worm, and (g) Starfish or any echinoderm.
- 4. Show generally what you know about the Arthropoda, or exhibit the structure of any one species of the order which you have dissected.
  - 5. Show what you know about the Polyzoa, Porifera or Mollusca.
- 6. Give any classification of the *Protozoa*, specifying where the species you studied from any locality would be placed in the system. Give an idea of the size, structure, habitat, and development of these local species.
  - 7. Discuss the life history of any of the pathogenic animal organisms.
- 8. Discuss lucidly any one of the following subjects:—(a) Physiological Biology, or (b) Developmental and Palæontological Biology, or (c) Taxonomic Zcology, or (d) Geographical Zoology.

11.15 TO 12.15 A. M., TUESDAY, 2ND JULY.

#### NAVIGATION.

(Only five questions to be answered.)

I. Find the true courses from the following data: . .

Mag. Course	Variation.
S. W. by W.	2° W.
N. by. É.	3° Е.
S. S. W. ½ W.	2¼° E.
W. N. W. ½ W.	1½° W.

- 2. Demonstrate a formula for finding the diff. of Long. when the initial and final latitudes and the course are given.
- 3. Show, as fully as you can, the principle on which a Mercator's Chart is constructed, and, also, the advantages, and disadvantages, if any, of such a chart.
- 4. Show, as clearly as possible, the different ways of finding the longtitude of one's **position at** sea, giving the names of the instruments, tables, &c, that one would have to use.
- 5. What parts in the right-angled triangles for mid. latitude sailing, and for Mercator's sailing, respectively, correspond to the course, difference of latitude, and distance, in the triangle for plain sailing.
- 6. A ship from a place in Lat. 50° 6′ N., and Long. 5° 55′ W., is bound to a port in the Island of St. Mary, in Lat. 36° 58′ N., and Long. 25° 12′ W., and steers the following courses:—S. by W. 24 miles, W. S. W. 32 m., N. W. ½ W. 41 m., S. S. E. ½ E. E. 49 m., E. N. E., ½ E. 19 m., W. 21 m., N. E. ½ E. 36 m., S. 41 m., S. S. W. 92 m., and N. 36 m. Construct (a) a traverse to suit the given courses and distances, and (b) show how you would find, by Mercator's sailing, the latitude and longitude in, and also the direct course and distance to the intended port, using hypothetical numbers wherever necessary.

2.00 TO 3.00 P. M., TUESDAY, 2ND JULY.

#### GREEK.

HOMER: ILIAD.

I.

### Translate:

Αλλὰ τὸ μὲν πλείον πολυάΐκος πολέμοιο Χείρες ἐμαὶ διέπουσ· ἀτὰρ ἤν ποτε δασμὸς ἵκηται, Σοὶ τὸ γέρας πολὺ μείζον, ἐγὼ δ' ὀλίγον τε φίλου τε Ερχομ' ἔχων ἐπὶ νῆας, ἐπεί κε κάμω πολεμίζων. (1) Account for cases of γαλόφ and είδος.
 (2) Parse έθεν.

3.10 TO 4. 10 P. M., TUESDAY, JULY. 2ND

#### SANITARY SCIENCE.

- 1. Show that a mixed diet is desirable. About how many ounces "water free" of each of the following substances is required daily by a man at ordinary work:—nitrogenous matter, fats, carbo-hydrates, mineral substances?
- 2. How are the laws of health most commonly violated in the home? In the school?
  - 3. Give some directions for the treatment of the drowned.
- 4. To what extent, respectively, are the school, the course of study, the home conditions, and ignorance of the laws of health, responsible for the so-called "over pressure" and education?
- 5. Give some of the advantages and disadvantages, respectively, of city and rural life.

4. 15 TO 5. 15 P. M., TUESDAY, 2ND JULY.

#### ASTRONOMY.

(Only five questions to be answered.)

- 1. Explain how the exact determination of time may be obtained with a Transit Instrument.
  - 2. How is the sun's distance determined by the Aberration of Light?
- 3. The mass of the sun is very nearly 332,000 times that of the earth. How is this **Tesult** obtained? What is the volume and density of the sun?
  - 4. State Kepler's laws, and the inferences from them.
- 5. State the more interesting or more important facts known about the planet Venus.
  - 6. Discuss the physical constitution of Comets, their orbits and probable origin
- 7. How can the proper motion of stars be distinguished from their parallactic motion? Name any five constellations and describe their position at any time of the year and hour of the night, so as to prove that you can readily recognize them.
- 8. Explain the terms:—Ecliptic, Precession of the Equinox, Latitude and Longitude of a star, Perihelion, and Galaxy.
- 9. Discuss the effect of the atmosphere on the appearances of all celestial phenomena.

### GRADE XII.

9.00 TO 10.00 A. M., WEDNESDAY, 3RD JULY.

#### ALGEBRA.

1. (a) In what scale of notation is 25 doubled by reversing the digits.

(b) If 
$$n + 2 C_8 : n - 2 P_4 = 57 : 16$$
, find n.

- 2. If the harmonic mean between two quantities is to their geometric means as 12 to 13, prove that the quantities are in the ratio of 4 to 9.
  - 3. Solve in positive integers the equation 41 x + 47y = 2191.
  - 4. Find by the method of Indetermined Coefficients the sum of  $l_2 + 3_2 + 5_2 + 7_2 + \dots$  to n terms.
- 5. If, on an average 9 ships out of 10 return safe to port, what is the chance that out of 5 ships, at least 3 will arrive?

Or, Prove that 
$$\begin{vmatrix} a_3 & 3a^2 & a & 1 \\ a^2 & a^2 + 2a & 2a + 1 & 1 \\ a & 2a + 1 & a + 2 & 1 \\ 1 & 3 & 3 & 1 \end{vmatrix} = (a - 1)^6$$

10.10 TO 11.10 A. M., WEDNESDAY, 3RD JULY

#### LATIN COMPOSITION.

- 1. Decline together in both numbers:—Deus major, vis superior, bos ferox, vulnus letale. Give the present infinitive and supine corresponding to the following verbal forms:—Vetat, cedit, caedebat, caderet, jecit, fefellit, dormiebat, tango, tegebam.
  - 2. (a) Quote or frame brief expressions illustrating the following constructions:—
    Dependent clause containing indirect question: locative case when noun is of first or second declension and singular: locative case when noun is of third declension or plural: verbs taking two accusatives: ablative of quality.
    - (b) Explain and illustrate the use of Moods in the Oratio obliqua. Answer any three of the following questions: (3, 4, 5, 6).
- 3. Translate into Latin:—(1) He said that the enemy was at hand, but exhorted his men not to flee. (2) There is a tradition (traditur) that he refused to accept the crown that he might not displease his brother. (3) They have come to importune us for peace. (4) I remember well the man whom you mention.
- 4. Translate into Latin:—(1) Circumstances having changed he sends ambassadors and asks for peace. (2) When Cæsar saw this he ordered his troops to charge.

  (3) He was a man of consummate courage, but of a vain mind. (4) If I were to say this I should not be listened to.
- 5. Translate into Latin:—(1) Their present joy was great, their hope of future good still greater. (2) He is on the way (it) to ruin his fortunes. (3) He wrote me that he would come if I wished. (4) It is the part of a good citizen to obey the laws of his country.
- 6. Translate at sight:—At enim vir clarissimus, amantissimus rei publicae vestrīs beneficiis amplissimis adfectus, Q. Catulus, itemque summis ornamentis honoris, fortunae, virtutis, ingenii praeditus, Q. Hortensius, ab hac ratione dissentiunt: quor-

um ego auctoritatem apud vos multis locis plurimum valuisse et valere oportere confiteor. sed in hac causa tametsi cognoscetis auctoritates contrarias virorum fortissimorum et clarissimorum, tamen omissis auctoritatibus ipsa re ac ratione exquirere possumus veritatem, atque hoc facilius, quod ea omnia, quae a me adhuc dicta sunt, eidem isti vera esse concedunt, et necessarium bellum esse et magnum et in uno Cn. Pompeio summa esse omnia.

11.15 TO 12.15 A. M., WEDNESDAY, 3RD JULY.

#### FRENCH AUTHORS.

1. Translate: Dumas "Le beefsteak d'ours" C'est qu'elle était merveilleusement servie, ma petite table. Quatre plats formaient le premier service, et au milieu était un beefsteak d'une mine à faire honte à un beefsteak anglais!... Mon hôte vit qu'il absorbait mon attention. Il se pencha mystérieusement à mon oreille:—"Il n'y en aura pas de pareil pour tout le monde," me dit-il. "Qu'est-ce donc ce beefsteak?".--"Du filet d'ours! rien que cela!"-J'aurai autant aimé qu'il me laissât croire que c'était du filet de boeuf.

Distinguish between:—Toute la ville, Toutes les villes, and Toute ville. Translate:—A man must do his duty. I shall take the whole. The whole world.

Translate:—Alfred de Vigny "Moïse." Et, debout devant Dieu, Moïse, ayant pris place, Dans le nuage obscur lui parlait face à face. Il disait au Seigneur:—"Ne finirai-je pas? Ou voulez-vous encor que je porte mes pas? Je vivrai donc toujours puissant et solitaire? Laissez-moi m'endormir du sommeil de la terre. Que vous ai-je donc fait pour être votre élu? J'ai conduit votre peuple ou vous avez voulu.''

(a). What form of verse is used in this poem? Can you scan the first line?

Translate: Theuriet "Les Peches." Les rires alors partirent de tous les coins du salon; les domestiques eux-memes se tenaient les côtes, et, pâle, hagard, chancelant, je m'enfuis, écrasé de confusion; j'étais si égaré que je ne trouvais plus la porte, et je m'en allai, la mort dans le coeur, couter mon désastre à ma femme. Le lendemain, l'histoire courait la ville. Quand j'entrai dans mon bureau, mes camarades m'accueillirent par un:—"Herbelot, ramassez vos pêches!" qui me fit monter le rouge au visage.

Les domestiques eux-memes se tenaient les côtes. Put this in the singular. Express the meaning of this sentence in different words.

Translate:-Dérouléde "Le Sergent."

"Quand tu m'enterreras, comme le temps te presse, "Fais ça tout seul, un trou, deux branches, ça suffit,

"Et pas de nom, la lettre arrive sans adresse! "Mais, pour que le bon Dieu n'en fasse pas trop fi,

"Tu me cachéteras avec mes cinq médailles, "Il comprendra trés bien que ça veut dire: urgent! "Car le bon Dieu s'appelle aussi Dieu des batailles...

"Dis done, conscrit? il va me renommer sergent."

5. Translate: - Molière Le Bourgeois Gentilhomme." - Le Maitre de Philosophie. Tout ce qui n'est point prose est vers, et tout ce qui n'est point vers est prose. Jourdain. Et comme l'on parle, qu'est -ce que c'est donc que cela? Le M. de Ph. De la prose. Jourdain. Quoi! quand je dis, Nicole, apportez-moi mes pantousses eme donnez mon bonnet de nuit, c'est de la prose? Le M. de Ph. Oui, monsieur. Jourdain. Par ma foi, il y a plus de quarante ans que je dis de la prose sans que j'en susse rien; et je vous suit la plat de la m'avoir appris cela. Suis le plus obligé du monde de m'avoir appris cela.

- Sans que j'en susse rien. Give principal parts of susse, and account for its mood. What form does the clause assume if sans is used instead of sans
- Give a few short notes on Moliére.

2.00 TO 3.00 P. M., WEDNESDAY, 3RD JULY.

#### ENGLISH LANGUAGE.

(Only five questions to be answered.)

- 1. What influence had Latin upon the Anglo-Saxon language? To what was it due? Give examples of changes that occurred.
- 2. State fully what circumstances concurred to give predominance to the Midland dialect in England.
  - 3. What changes have taken place in the comparison of the adjective?
  - 4. What description does Chaucer give of the Prioress in the Prologue?
- 5. From what source did Chaucer take "The Knight's Tale?" How does he describe the Temple of Mars?"
  - 6. Explain the following:-
    - (a). He rood upon a rouncy, as he couthe, In a gowne of faldyng to the kne.
    - (b). In his male he hadde a pilwe-beer.
    - (c). "Madame," quod he, "graunt mercy of your lore."
    - (d). For swevenes been but vanitees and japes.
    - (e). Whether that Goddess worthy forwiting Streyneth me nedely for to doon a thing.

3.10 TO. 4.10 P. M., WEDNESDAY, 3RD JULY

#### FRENCH GRAMMAR AND COMPOSITION.

- t. The passive voice may be expressed in different ways? explain and translate:—Many things are done that ought not to be done. French is spoken almost everywhere. The new Judge has been appointed (nommer). Prove that intransitive verbs admit of no passive by translating:—This question has not been thought of. This matter has not been spoken of.
- 2. What is the *pronominal* form of the *Object* governed: a) by à; b) by de; explain and translate.—Do you remember (se souvenir de) what I told you? No, I do not remember it. Have these letters been answered(répondre à)? Yes, they have been answered an hour ago.
- 3. Quoi, as a relative pronoun, is used with a certain word; translate for example:—The thing (ce) about which we think most, is often that of which we speak least. Give the English of the following idiomatic forms:—Il y a de quoi se plaindre. Il n'a pas de quoi payer son loyer. Cet homme a de quoi vivre. Establish the difference in the use of:—quoique and quoi que, giving examples.
- 4. Je ne puis parler qu'il ne m'interrompe. Comme il était tard et qu'on craignait la chute du jour, on partit pour la ville. Translate these sentences, and explain the nature of que in each. What mood does que require when used instead of si? translate for example:—If he came to Halifax and if (que) he did not call on me, I should feel offended. C'est a vous a qui je parle. C'est de vous dont il s'agit; translate and correct these sentences, giving explanations.
- 5. Translate into French:—When Lessing was yet a little boy and could scarcely read, his greatest pleasure was to turn over the leaves of books. Once his parents wanted to have him painted with a bird cage at his side. But the boy opposed this and exclaimed:—You must have me painted with a big heap of books, or else I won't be painted at all.

4.15 TO 5.15 P. M., WEDNESDAY, 3RD JULY.

#### GEOLOGY.

(Only five questions to be answered.)

- 1. Write explanatory notes on (a) Metamorphic rocks, (b) Crystalline rocks, (c) Gneiss, (d) Granite, (e) Syenite.
- 2. Describe the history of a rock stratum from its formation to a highly contorted, broken or displaced condition, so as to show your knowledge of the dynamical agencies generally at work in these different stages.
- 3. Outline such a scheme of the Geological Ages, eras, or formations, as you have in your mind; and explain how their comparative ages or succession are determined.
- 4. Indicate the geographical distribution of the principal geological rock strata of Nova Scotia, with notes on (a) their fossils, (b) their economic minerals, and (c) their relation to the loose surface stratum overlying the rocks.
- 5. Describe any geological section through the province; and discuss the local conditions which produced each principal series of strata.
  - 6. Discuss conditions in Nova Scotia during Quaternary times.
- 7. Discuss the distribution and mode of occurrence of the following minerals in the province:—Gold, Gypsum, Copper, Tin, Infusorial Earth.
- 8. Describe any practical systematic work you have done in any department of Nova Scotian Geology.

9.00 TO 10.00 A. M., THURSDAY, 4TH JULY.

#### GROMETRY.

- 1. Similar triangles are to one another in the duplicate ratio of their homologous sides.
- 2. Determine a point in the circumference of a circle, from which lines drawn to two other given points shall have a given ratio.
- 3. Show that two planes are perpendicular to one another when the dihedral angle formed by them is a right angle.
- 4. The straight lines which join the vertices of a tetrahedron to the centroids of the opposite faces are concurrent.
- 5. (a) Divide the line joining two given points into two parts having a given ratio m: n.
  - (b) Construct the locus of the equation:  $-(x-3)^2 + (y-2)^2 = 25$ .

### GREEK COMPOSITION.

- I. Decline together in all numbers: μέγας βασιλεύς, τὸ ἀληθές ἔπος, ὁῦτος ὁ ἀιών, τὸ δυς ἀκοῦον.
- II. (a) Give a full description of the augment, with illustrations. (b) Explain peculiarities in the formation of the future and agrist of liquid verbs.
- III. (a) State what mood and tense would be employed to express in Greek the italicized words in the following sentences: *Read* good books. *Do not associate* with bad persons. *Loose* that horse. *Do not strike* that boy. (b) Explain the principal forms assumed by conditional sentences in Greek.

Answer any two of the following questions (IV, V, VI.)

- IV. Translate into Greek: (1) He plots against the enemy (sing.) and the enemy plots against him. (2) They were not able to use the water. (3) They heard a noise going through the ranks. (4) Man will fight more bravely for wife and children than for anything else.
- V. Translate into Greek: (1) He wishes to rule but not to do those things which become a ruler. (2) Who ever saw a more beautiful city than Athens? (3) Peace has her victories as well as war. (4) These are the things, O Athenians, which we have been able to discover.

# VI. Translate from author not specified:

Ταῦτα γράψαντος έμοῦ τότε, καὶ τὸ τῃ πόλει συμφέρον, οὐ τὸ τοῦ Φιλίππου ξητοῦντος, βραχὺ φροντισαντες οἱ χρηστοὶ πρέσβεις οὖτοι καθῆντο ἐν Μακεδονία τρεῖς ὅλους μῆνας, ἔως ἢλθε Φίλιππος ἐκ Θράκης πάντα τὰκεῖ καταστρεψάμενος, ἔξὸν ἡμερῶν δέκα, μᾶλλου δὲ τριῶν ἢ τεττάρων, εἰς τὸν Ἑλλήσποντον ἀφίχθαι καὶ τὰ χωρία σῶσαι, λαβόντας τοὺς ὅρκους πρὶν ἐκεῖνον ἐζελεῖν αὐτά· οὐ γὰρ ᾶν ἤψατ' αὐτῶν παρόντων ἡμῶν, ἢ οὐκ ᾶν ὡρκίζομεν αὐτόν, ὥστε τῆς εἰρήνης . ἀν διημαρτήκει καὶ οὐκ ᾶν ἀμφότερα εἶχε, καὶ τὴν εἰρήνην καὶ τὰ χωρία.

βραχύ φροντισαντές — paying little heed to my suggestions.

11.15 TO 12.15 A. M., THURSDAY, 4TH JULY.

#### CICERO-In (atilinam.

- r. Translate:—Si te iam, Catilina, comprehendi, si interfici iussero, credo, erit verendum mihi, ne non hoc potius omnes boni serius a me, quam quisquam crudelius factum esse dicat. Verum ego hoc, quod iam pridem factum esse oportuit, certa de causa nondum adducor ut faciam. Tum denique interfecere, cum iam nemo tam improbus, tam perditus, tam tui similis inveniri poterit, qui id non iure factum esse fateatur.
  - (1) Account for the cases of mini, quod, tui. (2) How is the verb credo used? Also the adverbs serius and crudelius?
- 2. Translate:—Quodsi ea mihi maxime impenderet, tamen hoc animo fui semper, ut invidiam virtute partam gloriam, non invidiam putarem. Quamquam nonnulli sunt in hoc ordine, qui aut ea, quae imminent, non videant, aut ea, quae vident, dissimulent; qui spem Catilinae mollibus sententiis aluerunt coniurationemque nascentem non credendo corroboraverunt.
  - (1) Hoc animo. Account for case.
  - (2) Parse partam, and account for the subjunctives videant and dissimulent.
- 3. Translate:—Quodsi iam sint id, quod summo furore cupiunt, adepti, num illi in cinere urbis et sanguine civium, quae mente conscelerata ac nefaria concupiverunt, consules se aut dictatores aut etiam reges sperant futuros? Non vident id se cupere, quod si adepti sint, fugitivo alicui aut gladiatori concedi sit necesse?
  - (1) What is the force of num in direct interrogations? (2) Parse adepti sint.
    What construction follows verbs of hoping?
- 4. Translate:—Memoria vestra, Quirites, nostrae res alentur, sermonibus crescent, litterarum monumentis inveterascent et corroborabuntur: eandemque diem intelligo, et ad salutem urbis, quam spero aeternam fore, et ad memoriam consulatus mei propagandam: unoque tempore in hac republica duos cives exstitisse, quorum alter fines vestri imperii, non terrae, sed coeli regionibus terminaret; alter ejusdem imperii domicilium sedemque servaret.
  - (1) Alter—alter. Who are referred to? (2) Exstitisse. What is the construction of this infinitive?
- 5. Cogitate, quantis laboribus fundatum imperium, quanta virtute stabilitam libertatem, quanta deorum benignitate auctas exaggeratasque fortunas una nox paene delerit. Id ne umquam posthac non modo conficised ne cogitari quidem possit a civibus, hodierno die providendum est. Atque haec, non ut vos, qui mihi studio paene praecurritis, excitarem, locutus sum: sed ut mea vox, quae debet esse in republica princeps, officio functa consulari videretur.
  - (1) Delerit. Parse and account for mood.
  - (2) Ne——quidem. What is the rule for the relative position of these words?

Account for case of officio.

2.00 TO 3.00 P. M., THURSDAY, 4TH JULY.

#### PHYSICS.

(Only five questions to be attempted. Full value will be given provided the answer is in such form that only multiplication and division is necessary to give the correct numerical result.)

1. Given the formula for the pendulum,  $g = \frac{\pi^2 l}{t^2}$ ; find the value of g when

T=10 meters and t=2 minutes. How does the value you obtain compare with the standard value for g on the earth's surface?

- 2. Show how it happens that when the two resistances in one branch of the Wheat-stone Bridge have the same ratio as the two in the other branch, there is no current through the Galvanometer.
  - 3. On what basis is the absolute zero of temperature determined?
  - Discuss the color of mixed pigments, or colors due to interference of light.
- 5. Make plain that you understand the nature of electrical induction and condensation, as exhibited in the Leyden jar.
- 6. Find the focal length of a lens that throws upon a screen 3 feet distant, the image of an object 5 feet distant.
- 7. Compare the power required for two circuits, on one of which there are fifty arc lamps of 50 ohms resistance, and on the other a dynamo of 540 volts supplying a current of 200 amperes. What is the horse power of each? (746 Watts = 1 H. P.)
- 8. How would you prove Boyle's Law experimentally, (There is usually a flaw in the description as given by examinees. Try to avoid it). If a quantity of air occupy 350 c. c. in a tube over mercury, the level within the tube being 25 mm. below that without, and the atmospheric pressure 750 mm., what volume will it occupy when the level within the tube is 30mm. above that without, and the atmospheric pressure is 760 mm?
  - 9. If a wheel make 200 revolutions per minute, what is its angular velocity?
- the principles involved. (The simpler the experiment chosen, the more minutely must the examinee expect his answer to be criticised).

3.10 TO 4.10 P. M., THURSDAY, 4TH JULY.

### GERMAN GRAMMAR AND COMPOSITION.

- r. Compose three German complex sentences, the dependent clauses of which being respectively:—a noun clause; an adjective clause; an adverbial clause. If in a complex sentence, the dependent clause precedes the principal, what is the order of words in the latter? Translate for example:—When I visited Germany a few years ago, I was astonished at the progress of Arts and Sciences there.
- 2. Certain conjunctions cause inversion, others transposition of the verb: name three of each class, giving short examples in illustration. The English conjunction but is represented in German by:—aber, allein, and sondern; explain the difference in the use of these words by translating:—Canada is a vast and magnificent country; but the number of its inhabitants is not very large. Your friend has invited us to a concert next week; but, unfortunately, we cannot accept the invitation. It was not his brother, but his friend, who lost his life.

- 3. Illustrate the difference between:—denn and dann; wenn and wann, give the English of your German examples. The English when corresponds with three German words; explain and translate:—When do you intend to leave for home? I don't like to be disturbed, when I am writing. When I went out, it began to rain.
- 4. What is the equivalent form in German of the English infinitive in ing preceded by a preposition? translate for example:—He insists upon going abroad. If the subjects of both verbs are dissimilar, the sentence assumes a different form; explain and translate:—I insist upon his going abroad. Give the German of:—He saved his life by jumping through the window.
- 5. Translate into German:—Those who help us in misfortune are our true friends.—Tell me what books you want, and I will send them to you.—We went into a house from the windows of which we could see the whole procession.—Of all the poets Schiller has most won the love of the people.—I should never have thought that you could learn German in so short a time.

4.15 TO 5.15 P. M., THURSDAY, 4TH JULY.

## VERGIL (Georgics).

Translate:—Pater ipse colendi
 Haud facilem esse viam voluit, primusque per artem
 Movit agros, curis acuens mortalia corda,
 Nec torpere gravi passus sua regna veterno.
 Ante Jovem nulli subigebant arva coloni;
 Ne signare quidem aut partiri limite campum
 Fas erat: in medium quærebant, ipsaque tellus
 Omnia liberius, nullo poscente, ferebat.

Colendi. Is this a gerund or gerundive? Can it have a grammatical connection different from that indicated in your translation?

- 2. Translate:—Idcirco certis dimensum partibus orbem
  Per duodena regit mundi Sol aureus astra.
  Quinque tenent cælum zonæ: quarum una corusco
  Semper sole rubens et torrida semper ab igni;
  Quam circum extremæ dextra lævaque trahuntur,
  Cærulea glacie concretæ atque imbribus atris:
  Has inter mediamque duæ mortalibus ægris
  Munere concessæ divum; via secta per ambas,
  Obliquus qua se signorum verteret ordo.
  - (a) Parse dimensum. (b) Explain the following expressions:—duodena astra: has inter mediamque: obliquus ordo.
- 3. Translate:—Nec tempore eodem
  Tristibus aut extis fibræ apparere minaces,
  Aut puteis manare cruor cessavit: et altæ
  Per noctem resonare lupis ululantibus urbes.
  Non alias cœlo ceciderunt plura sereno
  Fulgura; nec diri toties arsere cometæ.
  Ergo inter sese paribus concurrere telis
  Romanas acies iterum videre Philippi;
  Nec fuit indignum superis, bis sanguine nostro
  Emanthiam et latos Hæmi pinguescere campos.

- (a) Explain syntax of extis, puteis, superis.
- (b) Write explanatory note on iterum videre Philippi.
- 4. Translate:—Ergo ubi nactæ sudum camposque patentes
  Erumpunt portis, concurritur; æthere in alto
  Fit sonitus; magnum mixtæ glomerantur in orbem,
  Præcipitesque cadunt: non densior aere grando,
  Nec de concussa tantum pluit ilice glandis:
  Ipsi per medias acies insignibus alis
  Ingentes animos angusto in pectore versant,
  Usque adeo obnixi non cedere, dum gravis aut hos,
  Aut hos versa fuga victor dare terga subegit.
  - (a) Parse nactae, grando, obnixi.
  - (b) tantum pluit ilice. Parse these words. Can pluit be followed by more than one case?
- 5. Quin ipsæ stupuere domus atque intima leti
  Tartara, cæruleosque implexæ crinibus angues
  Eumenides, tenuitque inhians tria Cerberus ora,
  Atque Ixionii vento rota constitit orbis.
  Jamque pedem referens casus evaserat omnes,
  Redditaque Eurydice superas veniebat ad auras,
  Pone sequens;namque hanc dederat Proserpina legem;
  Quum subita incautum dementia cepit amantem,
  Ignoscenda quidem, scirent si ignoscere manes.

Write brief explanatory notes on Eumenides, Cerberus; Ixionii orbis, Proserpina.

9.00 TO 10 A. M., FRIDAY, 5TH JULY.

#### TRIGONOMETRY.

(Only five questions to be answered.)

- 1. (a) Given  $\log_{10}2 = .30103$ , find  $\log_{10} 10$  and  $\log_{12} 10$ . (b) The logs of 2, 3 and 7 being known, solve the equation:  $3^{2r} = 128 \times 7^{(4-r)}$ .
- 2. Deduce the formula: Tan.  $\frac{A}{2} = \sqrt{\frac{(s-b)(s-c)}{s(s-a)}}$
- 3. Prove: Sin. A + Sin. B =  $2 \text{ Sin. } \frac{1}{2} \text{ (A + B) cos. } \frac{1}{2} \text{ (A B)}$
- 4. If Sin. A.  $=\frac{1}{\sqrt{5}}$  and Sin. B  $=\frac{1}{\sqrt{10}}$ , show that one value of A + B is

45°.

- 5. Find the ratio between (1) the sides and (2) the areas of an equilateral triangle and a square inscribed in a circle.
- 6. A person standing at a point A, due South of a tower built on a horizontal plain, observes the altitude of the tower to be  $60^\circ$ . He then walks to a point B, due West from A, and observe the altitude to be  $45^\circ$ , and then at the point C in A B produced, he observes the altitude to be  $30^\circ$ . Prove that A B = B C.

7. If A = Sin. 
$$\frac{-1}{5}$$
 and B = cos,  $\frac{-1}{5}$ , prove A + B =  $\frac{\pi}{2}$ 

10.10 TO 11.10 A. M., FRIDAY, 5TH JULY.

## PSYCHOLOGY.

(Only five questions to be answered).

1. Lay a red patch on a white sheet of paper, and cover both with white tissue-paper. The white surface will seem slightly tinged with..... Explain this result.

Or, state Weber's law, and explain how it may be tested for tactual pressure by raising successive multiple weights.

- 2. "The abstract *conception* of space is not the same thing as the *perception* of an extended object, or a particular part of space." Discuss this statement, or explain the "construction of real space."
- 3. "The sense of our meaning has to do with the fringe of the mind's object."
  Discuss the theory alluded to.
  - 4. "What holds attention determines action." Discuss.
- 5. "Probability and circumstantial evidence thus run dead against the theory that our actions are purely mechanical in their causation." Discuss the theory.
  - 6. Write notes on habit, its physical basis, practical effect, and ethical importance
  - 7. Discuss the four chief memory types, including verbal subtypes.
- 8. (a) What is the fundamental difference between mind of genius and mind of commonplace man? (b) Define apperception.
  - 9. Can animals reason? State the reasons for your view.
  - to. Define emotion and instinct, and discuss the physiological theory of emotion.
- 11. Discuss any one of the following:—(a) Dreams, (b) Hypnosis, (c) Double consciousness.

11.15 TO 12.15 A. M., FRIDAY, 5TH JULY

## HORACE (Satires.)

- 1. Translate:—Iura inventa metu iniusti fateare necesse est, tempora si fastosque velis evolvere mundi. nec natura potest iusto secernere iniquum, dividit ut bona diversis, fugienda petendis; nec vincet ratio hoc, tantundem ut preccet idemque qui teneros caulis alieni fregerit horti et qui nocturnus sacra divum legerit.
  - (a) Against what Philosophical School and doctrine is this passage directed?
  - (b) fugienda petendis. Parse these words in full.
- 2. Translate:—Quattuor hinc rapimur viginti et milia raedis, mansuri oppidulo quod versu dicere non est, signis perfacile est: venit vilissima rerum hic aqua; sed panis longe pulcherrinus, ultra callidus ut soleat umeris portare viator; nam Canusi lapidosus, aquae non ditior urna qui locus a forti Diomede est conditus olim, flentibus hinc Varius discedit maestus amicis.

Parse milia, mansuri, venit.

3. Translate:—'Tempore quo iuvenis Parthis horrendus, ab alto demissum genus Aenea, tellure marique magnus erit, forti nubet procera Corano filia Nasicae metuentis reddere soldum. tum gener hoc faciet; tabulas socero dabit atque ut legat orabit; multum Nasica negatas accipiet tandem et tacitus leget, invenietque nil sibi legatum praeter plorare suisque.

Give syntax of Aenea, Corano, plorare.

- 4. Translate:—Liberius si
  dixero quid, si forte iocosius, hoc mihi iuris
  cum venia dabis: insuevit pater optimus hoc me,
  ut fugerem exemplis vitiorum quaeque notando.
  cum me hortaretur, parce, frugaliter, atque
  viverem uti contentus eo quod mi ipse parasset,
  'nonne vides Albi ut male vivat vivat filius, utque
  Baius inops? magnum documentum ne patriam rem
  perdere quis velit.''
  - (a) hoc me. Parse these words.
  - (b) exemplis quaeque notando. Account for the case of each of these words.
- 5. Sequor hunc, Lucanus an Apulus anceps nam Venusinus arat finem sub utrumque colonus, missus ad hoc, pulsis, vetus est ut fama, Sabellis, quo ne per vacuum Romano incurreret hostis, sive quod Apula gens seu quod Lucania bellum incuteret violenta.
  - (a) Hunc. Who is referred to? Anceps. What is the construction of this word?
  - (b) Romano. What different explanations are given of the singular number?

2.00 TO 3.00 P. M., FRIDAY, 5TH JULY.

### BRITISH HISTORY.

(Only five questions to be answered.)

- 1. Give a short account of English society at the time of the Conquest of Britain in the 5th century.
- 2. "He had a strange gift of attracting friends——but in his inner soul John was the worst outcome of the Angevins." Fill in details illustrating this statement.
- 3. Write a note on the commerce, wealth and social progress of England during the reign of Elizabeth.
- 4. Point out the effects of Puritanism upon culture, human conduct and society in England.
- 5. What were the chief features in the settlement of the Constitution by the Revolution of 1688-9.
- 6. Give an account of the religious revival in England that "burst forth at the close of Walpole's administration."
- State the chief causes that led ,to the confederation of the British Amrican Colonies, and also note the financial arrangements of the scheme.

3.10 TO 4.10 P. M., FRIDAY, 7TH JULY.

## ENGLISH LITERATURE.

(Only five questions to be answered.)

- 1. What date, and with what writer does English Prose begin? Name the subject on which he wrote, and his translation.
- 2. Mention the first three prominent English historians. Give the titles of their histories, and the characteristics of each as to style.
  - 3. Give the substance of Carlyle's remarks on "Adamitism,"
  - 4 What does Carlyle say about "Helotage?"
  - 5. How does Milton describe "Satan?"
- 6. Quote fifteen or twenty consecutive lines from Milton's "Paradise Lost." Book II.
- 7. Contrast the character of Brutus with that of Cassius, and illustrate your answer by quotations.
  - 8. By whom, and under what circumstances were the following excerpts spoken:—
    - (a.) Cowards die many times before their deaths; The valiant never taste of death but once.
    - (b.) Thou art the ruins of the noblest man That ever lived in the tide of times.
    - (c.) Are yet two Romans living, such as these? The last of all the Romans, fare thee well! It is impossible that even Rome Should breed thy fellow.
    - (d.) This was the noblest Roman of them all.

4.15 TO 5.15 P. M., FRIDAY, 5TH JULY.

#### GRRMAN AUTHORS.

- 1. Translate:—Nach hundert Jahren.—Aber er kam nicht. Stunde um Stunde verrann, und Juan kam nicht zurück.—"Das ist doch sonderbar," sagte die besorgteverann, und Stunde heute bleibt;" und endlich stand der Vater verdriesslich auf und Mutter, "wo das Kind heute bleibt;" und endlich stand der Vater verdriesslich auf und Mutter, "wo das Kind heute bleibt;" und endlich stand der Vater verdriesslich auf und Mutter, "wo das Kind heute bleibt;" und endlich stand der Vater verdriesslich auf und entsche hin gewiss finden—wo ging er sagte: "Kommt, ich will euch suchen helfen,—wir werden ihn gewiss finden—wo ging er sagte: "Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte?"—"Es was oben in dem langen Gange," riefen ein paar Duthin, als er sich versteckte.
  - (a). Ihn zu suchen. Account for the infinitive with zu, and illustrate cases in which it is used without zu, Translate:—I have heard them singing.
  - 2 Translate:—Heimatliebe.
    - () süsse Heimatlüfte, Wie weht ihr doch so mild, Wie labet ihr, o Düfte Vom heimischen Gefild.

Was auch auf fernen Wegen
Das Herz fur Freuden fand,
Es giebt den reichsten Segen
Doch nur das Heimatland.

(a). Why is the adjective mild uninflected here? In what other cases does the adjective assume the same form? Give illustrations.

- 3. Translate:—Josef Speckbacher.—Aber länger konnte sein Gastfreund ihn und sich nicht der Gefahr aussetzen. Inder Nacht auf den 16. trugen er und ein Freund Speckbacher abwechselnd auf den Schultern, mehr als zwei Stunden weit über lauter Seitenwege nach Rinn, wo sich seine Familie befand, wobei sie oft durch tiefen Schnee zu waten hatten. Noch in der Dunkelheit langten sie bei Speckbachers Stalle an, der eine gute Strecke vom Wohnhause entfernt liegt, wo sie ihn zurückliessen.
  - (a). In der Nacht...auf den Schultern. Explain the inversion of the subject in this sentence, and write it down in the normal order.
  - 4. Translate: -Erlkönig. -

Mein Vater, mein Vater, und siehst du nicht dort Erlkönigs Töchter am düstern Ort? Mein Sohn, mein Sohn, ich seh' es genau, Es scheinen die alten Weiden so grau.—

"Ich liebe dich, mich reizt deine schöne Gestalt; Und bist du nicht willig, so brauch ich Gewalt."— Mein Vater, mein Vater, jetzt fasst er mich an! Erlkönig hat mir ein Leids gethan!—

- (a). Give short notes on the author of "Erlkönig."
- 5. Translate:—Englische Schauspieler in Paris.—Zwei Tage später wollten die Engländer noch einmal auftreten, in einem Lustspiel von Sheridan, welches in Deutschland unter dem Namen "die Lästerschule" bekannt ist. Man hatte die Preise der Plätze erhöht und glaubte, damit etwas sehr Kluges gethan zu haben. Aber das Haus war nicht weniger angefüllt als das vorige Mal, und von der nämlichen Menschenklasse. Ich war dieses Mal so vorsichtig das gefährliche Parterre zu vermeiden und nahm in einer Loge der zweiten Gallerie Platz.
  - (a). Parse, classify, and give principal parts of:—austreten, erhöht, vermeiden, nahm.

# Municipal School Fund

For the support of Public Schools, appropriated to Trustees of School Sections named below for the year ended July 31st, 1907.

The Asterisk (\*) indicates the Poor Sections.

egally authorized days schools were open,	grand total days' attendance of pupils.	Potal amount from Municipal Fund.

5-Jennie Alwilda Roach.

6-Blanche Helen Patton.

7—John Spinney Lombard. 8—Annie May Hardy.

9-Annie Evangeline Whitman.

10-Herbert Philips Rhodes.

11-Rokeby Robinson.

12-Hattie Alena Miller.

### ANTIGONISH.

1 — Ada Cunningham.

2-Eunice Whidden.

3-Dellie Sweet.

4-John Ross.

5-Mamie Chisholm.

6-Dorothy Pushee.

7 - Cassie Ďonahue.

8-Katie A Macdonald. 9-Margaret McGillvray.

10 - Greta Walden.

11-Rosalia Macdonald.

Matthias Purcell.

Katie Ann McLean. 13-John Osborne Whidden.

14-John McIsaac.

15-Clara Cunningham.

16- S John McIsaac. Bessie McDougall.

17-Lucy McNeil.

18-Annie Bell Macdonald.

19-Francis McIsaac.

20-Edna Cunningham. 21-Mary T McGillivray. 22-Effie Ann Boyd.

23-Janet Catherine Macdonald.

24 - Alexander O'Brien.

Nora McDonald.

Angus Duncan Chisholm.

#### CAPE BRETON.

1-John McLellan.

2-Charlie Cameron.

3-Sadie MacKinnon.

-Harry Schurman.

John Gillis.
Wong Wing Yeen.

6-Vera Ingraham. 7-Harold Robeson.

8-Robert McNeil.

9-Charles Daly.

10-Jessie Richmond.

11-Harold Theakston.

12-Hughena Smith.

13-Frank Bell.

14-Edith Ritcey.

15-Maude McKinnon.

16-Willie Anderson. Eva Smith

Laura Routledge.

Mamie Macdonald.

Dorothy Thompson.

Allie Jackson. Annie Hart.

19--Èthel Richardson.

20-Sadie Patterson.

21-Guy Pace.

22-Fred Laphen. 23-Grace Chisholm.

24—Ernest Moore.

25-Mary McDonald.

26—Sylvia Lewis.

Arta Falconer.

27- | Arta Parison.

Weldon Travis.

Robert McIntyre.

29-Gladys Fisher.

30-Doug'as McDougall.

31-Gertrude Heathcock.

32-{ William Drodge. 32-{ Christina McLeod.

Clarence Dias.

| Clarence Dac. | Florence Falconer. 34-Elsie Ledrew.

ట్ల-John O'Callaghan.

36—Beatrice Fader.
37—Lillie Hagel.
38—Ida Brison.
39—{ Beatrice Fraser.
Margaret Dumaresq.

Supplementary.

40-Mamie McLeod.

## COLCHESTER.

1-Elsie Brownell. 2-Sadie Moran. 3-Emma Creelman. 4-Douglas Crowe. 5-Lucy Crowe. -Faye Gordon. -Helen Layton. Philip Hallisey. Kaye Wilson. William Blair. Jamie Gourley. 10-Blair Nichols. 11-William Doane. 12-Elsie Waller. 13 - Earl Dickie. 14-Clair McLellan. 15-Gordon McGee. Blaikie Campbell. 17-Walter Dickie. Katie Archibald. McGregor Layton. Maud Lynds. 19-Frank Christie. 20-Alice Ross. 21--Fred Hefferman. -Grace Cox. -Bessie Edwards. Arnold Blackburne. Eleanor Smith. -Edna Munsey. Ruby Bryson. Aileen Henderson. 27-Roy Dickson. 28-Arthur Casson. 29-Percy Henderson. 30—Gwennie Purdie. 31—Hugh Blackmore. William Louther. Myrtle McCallum. -Libbie Lynds. 84--E Pearson. Minnie Henderson. Fred Rennie. –Frances Crowe. 37 - Boyd Cox. Russell McKenzie, Charles Waite. 89 - Joseph Gasper. 40-Elinor Bryson. 41- | James Kelly, Isabel Waite. 42-Edna Spencer. 43-Sadie McIntyre.

44—Walter Stick.
45—Teresa Robbins.
46— Adams Bruce,
Alice Whidden.
47— Willard McLeod,
Fred Smith.
48—Andrew Christie.
49—Maynard McCurdy.

#### CUMBERLAND.

1-Arthur W Rogers. 2-Elizabeth Milner. Rachel G McKim. Lionel Harold Bent. -Agnes Alice Travis. 5-Winnie Collins. 6-Ella Irene Allaby. -Nellie E Tait. 8-Lennie M. Limby.
9- William M Rogers,
Ruby M Smith. –Mildred Ripley. 11—Osborne Alfred Scott. 12-James McDonald. 13-Evelyn Aubrey Beattie. 14-Ottie Austen Silliker. 15-Della Lillian Horton. 16—Lillia Lavinia Fage. 17—Georgia Leeman. 18—Lloyd Sutherland Baird. 19-Harold David Adamson. 20-Aubrey Adam Johnston. 21-Sadie Olivia Tait. Addie Alfretta Porter. Lillian Emma Rackham. Olive Maude Carroll, Maggie Selena Fortune. 24-George Moody Pugsley. 25—Phosa Leone McNeil. Eva Grace Hunter, Mildred Alice McAdam. 27-Arthur Welsford Brinton. 28-{Fletcher Thomas Coates, Mina Alberta Smith. 29-Roland Hill Chapman. 30-Vaughn Nathan Hoeg. 31-Annie Dernier. Lena Legere. Mary Hazel Nicol.

#### Supplementary.

33—Dora Blenkhorn.
34—Mabel Fortune.
35—Mary Parker.
36—Lillian Anderson.
37—Villa Baker.
38—Andrey Lusby.
39—Electa McGlashing.
40—Gladys M Baird.

#### DIGBY.

1—Clare Bancroft. 2—Leland Young. 3—Ralph Winchester. 4-Harold Carty. 5-Rene Young.

Harold Waine.

Gretchen Churchill.

8-Frances Bonnell.

9—Darcy Roop. 10—James Walsh.

#### GUYSBORO.

1-Annie Bell Worth.

2-William Rufus Gould.

3-Gertrude Josephine McGuire.

4-Celia Eva Horton.

5-Bessie Lillian Scott.

6-Clara Edna Marion Scott.

Sadie Laurie Murphy. Sadie Laurie Murphy.

### HALIFAX.

1-Florence Evans.

2-Isabel Creighton.

3-Ralph Allison Hendry.

-Ethel Lloyd Dunbrack.

5-Clara Nichols.

6-Allan Foster Boutilier.

7—Karl Johnson.

8-Ruth Maria Christie.

9-Jessie Stone.

10-Thomas Melton Hayes.

f Edna Crook.

Nellie Collins Fultz.

12-Grace Ernst.

13-Elizabeth Dawes.

14-Arthur Hill.

15-Howard Thomas Christie.

16-Margaret Keddy. 17-Eleanor Hanson.

18-Ernest McColough Moir.

19—Glenn Keeler.

20—Annie Webber.

21 - Bertha Lesser.

22—Daisy Ernestine Maynard.

23-Arthur Wisdom.

## PASS LIST, 1907

## PROVINCIAL HIGH SCHOOL EXAMINATION

[The valuation of Candidates' examination papers is made by the Provincial Examiners

according to the Regulations of the Council of Public Instruction.]

Reg. 91. To make a "High School Pass" on Grades IX, X, and XI, the candidate must make, at least, the minimum aggregate (400) of the grade on not less than six papers with no subject below 25.]

REG. 92. To make a "High School Pass" on Grade XII, the Candidate must make

at least, the minimum aggregate (1000) on the subjects prescribed, with no subjects

below 25.

A candidate who makes an aggregate of 600 on any ten papers of Grade XII, and makes, at a subsequent examination, an average of at least fifty per cent. on each of the required papers on which a pass of fifty was not previously made, or who makes an aggregate of 1000 on twenty papers of the Syllabus, or who has already taken a XII (cl), a XII (sc), or an "A" license, may thereafter present himself for examination on any of the subjects on which he may not have made, at least, 50 per cent. at a previous examination; and so long as the Council of Public Instruction deems the character of the examinations on the subjects not materially changed, all the valuation marks 50 per cent. or above made on each subject at the said and following examinations may be incorporated into a single certificate, provided, at least, 50 per cent. be made on each of the (twenty) subjects required for the Grades XII (cl), or XII (sc), or on each of the (thirty) subjects in the full course for XII (cl. and sc.).

REG. 93. Candidates failing to make a pass in the grade applied for may be ranked as making a pass in the next grade below, provided 75 per cent. of the minima be made; and as making a pass on the grade second below, provided 50 per cent. of the minima be made.

(See comments and regulations of the Council of Public Instruction, "Provincial Examination of High School Students." Reg. 82 to 96, pages 86 to 90. Manual 1901.)

### PRELIMINARY PROSPECTUS

OF COURSES TO BE GIVEN IN THE

## LOCAL TECHNICAL SCHOOLS.

- 1. English.
- 2. Arithmetic.
- 3. Practical Mathematics.
- 4. Mechanical Drawing.
- 5. Machine Drawing.

- 6. Architectural Drawing.
- 7. Elementary Electricity.
- 7. Elementary8. Mechanism.
- 9. Surveying and Plotting.
- 10. Chemistry.

SURVEYING AND PLOTTING AND MECHANISM WILL NOT BE OFFERED THIS
YEAR IN ANY LOCAL SCHOOL EXCEPT AT SYDNEY.

### **SESSION:**

November 4th, 1907, to April 30th, 1908.

#### INTRODUCTION.

It is the purpose of the department of Technical Education of the Province of Nova Scotia, acting in conjunction with the School Boards and the City or Town Councils, to conduct evening classes in the principal localities. It is hoped that all ambitious mechanics, craftsmen, and apprentices, in fact, any men engaged in industrial pursuits, who are desirous of learning the scientific principles underlying their profession or trade, or who wish to improve themselves so that they may rise in their chosen calling, will attend these classes. Students who spend two or three evenings a week during the winter season in attending these classes and who apply themselves diligently to the work should be able to increase their working efficiency and be of proportionately more value to their employers.

These classes are to be within the reach of everyone, and are to be conducted so that the amount charged for admission to them will be very small, and most of it will be returned to the student at the end of the course if he has attended regularly. This matter of fees is referred to below.

Each class will be carried on in a thoroughly practical manner, and the illustrations used and the problems worked out, will be taken from the every day work of the students whenever possible.

The classes are to be held in the County Academy, or any building which is centrally located and easily accessible to all. One room will be fitted up especially for Mechanical Drawing. The teachers are for most part men in practical work and have been carefully chosen for their fitness as teachers and their eminence in the line in which they work.

#### OPENING.

It is intended to hold each class twice a week, except English, which will be held.

once a week only, and each session will be two hours long. Schools will be opened

about the first of November, and will continue until April 30th, with the exception of

two weeks' vacation, from Dec. 21st, 1907, to Jan. 6th, 1908. A diploma will be given

to any student who has attained the standard set in any class, certifying to the fact.

that he has satisfactorily completed such course.

#### FEES.

The fees will be as follows:-To each student who has attended 90% of the sessions of the class, at the end of the course,  $\frac{4}{5}$  of the fee shall be refunded.  $\frac{2}{3}$  shall be refunded for 80-90% attend-

ance,  $\frac{1}{3}$  for 70-80% attendance, and  $\frac{2}{3}$  refunded for from 60-70% attendance.

Descriptions of the classes to be given will be found in the following short paragraphs. This is, however, only a "Preliminary Prospectus," and the official Calendar, with the nights on which classes will be held, the names of the instructors, etc., will be issued later.

#### ENGLISH.

In this case it is intended to teach the use of written and spoken English and not try to impart any knowledge of English Literature. Nothing is more important for a person who expects to hold a position of any responsibility than the power to express himself clearly and freely in the English language. Many young men consider it a waste of time and find it a very tedious performance to attend any class that is not strictly technical, because they can see no practical value in it. This is, however, a very grave mistake. A business letter cannot be written, or an examination satisfactory without a fair knowledge of Expelicit and the control of the strict technical process. factorily taken, without a fair knowledge of English composition. The young man

should not be handicapped by lack of ability to express himself clearly and logically.

It is intended to carry on this class in English in a thoroughly practical way.

Instruction will consist mostly of individual drill in the writing of business letters and general correspondence, in spelling, and in simple English grammar applied to and general correspondence, in specials, and in simple rangish grainmar applied to composition and conversation. Much attention will be paid to the proper arrangement of words in sentences and the arrangement of sentences in paragraphs, to pro-

duce clearness and emphasis in the thought to be conveyed.

Further consideration will be given to forms of business notes, description of inventions, forms of bills and receipts, drafts, cheques, etc. Instruction will also be furnished in writing items for the public press, in drafting resolutions, etc.

#### ARITHMETIC.

Every mechanical trade, every branch of industry, depends inherently upon the principles of mathematics. The introduction to mathematics is the study of arithmetic. It is one of the commonest forms of knowledge, constantly used in every day life.

Students will not be admitted to advanced classes such as Machine Drawing.

or Mechanism without having a preliminary training in arithmetic, or having a know-

ledge of the subject equivalent to that given in this class.

The class will begin at any point where the average knowledge of the students warrants. It will then be carried on to as high a plane as the time of the course for the year allows. The examples to be worked out will be as nearly as possible such ones as are met with every day by the worker, and each student is asked to bring in problems which he meets in his work, to be solved in the class. An outline of the course might follow some such line as the one given below.

Fractions, decimals, metric system, ratio and proportion, percentage, interest, square root, cube root, weights and measures and uses of mensuration; areas of rectsquare root, cube root, weights and measures and specific angles, triangles, and circles, volumes of rectangular solids, spheres, cylinders, prisms, and pyramids. Specific gravity, weights of castings, shafting, forgings, machined

pieces, etc. Problems.

## PRACTICAL MATHEMATICS.

This class is supposed to be one step in advance of the class in arithmetic and to take up the simple applications of geometry, trigonometry, and algebra as they are daily applied in the various branches of industries. This class should be of special value to pattern makers, machinists, engineers, boiler makers, draftsmen, etc., but should also be a benefit to anyone with a good knowledge of the principles of arithmetic. An outline of a course is given that would serve as a basis of instruction.

Square and cube root, explanation of construction of shrinkage rules, geometrical properties of angles, triangles, polygons, circles, etc., commonly employed in every-day work. Areas of rectangles, triangles and circles. Volumes of rectangular solids spheres, cylinders, cones and prisms.

Trigonometrical properties of triangles. Sine, tangent, etc.

Logarithms, use of slide rule.

Specific gravity; weights of castings, forgings and machined pieces. Simple formulae for horse power, strength of boilers, etc. Transposition in formulae and the solving of formulae for any particular value; strength of shafting; change gears for screw cutting; circumferential speed; heating surface of boilers, etc.

Simple factoring of algebraic equations; fractions in algebra; solving simple

equations for unknowns.

All the work in algebra will be carried on with arithmetical examples to make it clear.

#### MECHANICAL DRAWING.

No previous knowledge of this subject is required for entrance into this class. It is intended to make this class of as much practical value as possible, by introducing familiar objects to use as models, instead of employing imaginary prisms, etc. As little time will be spent in teaching the student the use of the inking pen, lettering, etc., as is necessary to give him a fair knowledge, and then practical drawing will be entered upon at once. Neatness and accuracy will be insisted upon in the work, because the attainment of these qualities is only second to the acquirement of the know-ledge of drawing itself. It is the aim of the course to make men capable of interpreting quickly and accurately the simpler blue prints and sketches with which they have to work every day.

The line pursued will be something as follows:—
Instruments, and how to use them; geometrical definitions, geometrical problems; inking and lettering; projection of points, lines, plane figures; projection of solids; shade lines; shadows; uses of scales; working drawings; sketching and drawing machine parts.

#### MACHINE DRAWING.

In this course will be taken up the drawing of simple machine parts, to show the application of the theory of projection to mechanical drawing. This will be followed by the making of general arrangement and detailed drawings of some piece of mechanism which will admit of demonstration and instruction in regard to,—

The materials used in Mechanical Engineering,

(2)

Various kinds of fastenings, The theory of stress and strain, (3)

The strength of materials.

(5) Methods of generating and transmitting power,
(6) Shop and field practice, and their influence on design,

And such other subjects as will tend to develop in the mind of the student the ability to reason along mechanical lines, and arrive at the solution of mechanical problems.

#### ARCHITECTURAL DRAWING.

This class will be adapted to the needs of carpenters, cabinet makers, joiners, bricklayers, and stone cutters. It is not intended to make competent architectural draftsmen, but to give men such knowledge of the art of drawing that they can readily inthen, but to give men such knowledge of the arc of all might they can readily interpret the sketches and plans from which they carry out their daily work. The subject as a whole is conducted in quite a different manner from Mechanical Drawing, because there is much less time given to general work and more to actual details and plans of construction.

The following subjects will be treated in some detail. Use of instruments, practical geometry, lettering.

Drawing of joints, mitres, mortises and tenons, moldings, trusses, floor plans, etc. Representation of different bonds in brick laying, drawing of piers, arches, cornices, groins, moldings, intersections of moldings, etc.

The orders and styles of architecture will be taken up with the students who al-

ready possess sufficient elementary knowledge.

#### ELECTRICITY.

The development of the wide application of electricity for power and lighting has been of comparatively recent date. Many competent steam engineers find electricity introduced in some form into their steam plant and while they can handle the electric machinery perfectly well, are not entirely clear on the fundamental principles, the reasons why, of the action of the direct and alternating electric current. For such as these, for the young enthusiast who is desirous of a good grounding in the first principles of electrical engineering, and for others to whom an elementary knowledge of electricity is a benefit, or necessity, this course is offered. The lessons will be illustrated with experiments to show the actual working of the different phenomena under consideration.

Below is given an outline of the subject in a reasonable development for the prac-

tical man:

Fundamental Principles;—Effects of an electric current, electro-motive force, electrical units, measurement of currents, Ohm's Law, branching of circuits, electrical power, electric mains, electric magnets, induction, electrical machines.

Direct current dynamos and motors, different forms of armatures and exciting systems, types of machines, efficiency, direct current motors, electric railways, control-

lers, troubles with D. C. motors and their cures.

Accumulators,-machines for charging, treatment required, applications of accumulators.

Electric lighting, glow lamps, open and enclosed are lamps.

Alternating currents; -wave motion, current strength and voltage of alternating currents, induction effects, transformers, phase difference, Wattmeters, power factor, the working of alternating current machines in parallel.

Alternating current generators and motors, synchronous motors, rotary con-

verter, induction motors.

#### MECHANISM.

The object of this course is to acquaint the student with the elements of machines and mechanical motions with as little reference as possible to higher mathematics. It is not intended to fit a man for machine design, but to give him an introduction to this subject, acquaint him with the mechanical powers, and give him correct ideas of work and energy so that he may go further into mechanics of machines if he so desires. The applicant is supposed to have a good knowledge of arithmetic, and to be familiar with practical geometry.

Syllabus of course:-

Definitions of motion, reciprocation, vibration, etc.

Definitions of force, energy and work. The parallelogram, triangle, and polygon of forces.

The mechanical powers;—levers, inclined plane, wedge screw, wheel and axle,

worm and wheel.

m and wheel.

Transmission of power;—Rolling cylinders and cones, friction gearing; rack and pinion, toothed gearing; transmission by bands, belts, cords and chains; length of open and closed belts, speed cones and design of speed cones for constant length belt; Tope and chain drive.

Cams and wipers; heart cam, involute cam; link work; crank and rocker, drag link, toggle joint, sliding block linkage, swinging block linkage, quick return motion, parallel motions; wheels in trains; engine lathe trains, screw cutting, rules for calculations of a comparable motion. Gearing:—construction of gear teeth, definitions. Spur, bevel, skew, twisted and screw gearing. Cycloidal teeth.

## SURVEYING AND PLOTTING.

This course is intended to give the student an elementary knowledge of surveying and plotting, so that he will be able to do plain surveying, simple underground surveying, and the plotting of such surveys.

Plane geometry such as is necessary in surveying. Plane trigonometry, properties of angles, triangles, logarithms, etc. Construction, adjustment, use, and propercare of the various instruments used in surveying. The surveyor's compass, the prisched the engineer's transit. thatic compass, the engineer's level, and the engineer's transit. The construction and

use of verniers. Surveying by chain only. Surveying with compass and chain. Keeping of field notes. Land surveying with transit. Latitudes and Departures. Calculation of areas. Plotting survey.

Mining Surveying:—Adaptations of instruments, and methods for surveying underground.

#### CHEMISTRY.

The object of this course is to acquaint those desiring a general knowledge of Chemistry with the elementary foundations of this science which is so fundamental to industry. No previous knowledge of this subject is required. The method of instruction will be for the most part by laboratory work supplemented by informal lectures. The aim of the course is to acquaint the student with the bare elements of general chemistry, then simple qualitative analysis, and a small amount of quantical contents of the course is to acquaint the student with the bare elements. titative analysis, so that he can read the technical chemistry appertaining to his business, and carry out the more simple analyses which relate to his profession.

The work will necessarily be more or less individual, but the following is a general outline that may or may not be strictly followed, according to the desires and needs

outline that may of may not be strictly followed, according to the desires and needs of the majority of the applicants.

Matter;—solid, liquid, gaseous; molecules and atoms.

Physical properties of matter;—boiling points, evaporation, freezing, diffusion, solution, crystallization.

Elements and compounds, chemical symbols, laws of chemical combination, con-

servation of matter.

Water;-hydrogen and oxygen. Air;-oxygen and nitrogen. Oxides of nitrogen. Common properties of the common elements and their compounds; iron, copper, lead, mercury, silicon, silver, sodium, potassium, sulphur, tin, zinc, aluminum, arsenic,

chlorine, carbon, fluorine, gold, etc. Qualitative Analysis. The silver group, the hydrogen sulphide group, the arsenic group, the iron-aluminum group, the alkaline earth group. Determination of simple

unknowns.

Quantitative Analysis. Simple individual technical analyses applying to the different businesses in which the respective students are engaged.

## IMPORTANT EXPRESSIONS OF EDUCATIONAL OPINION.

REPORT OF THE COMMITTEE ON THE EDUCATION AND TRAINING OF ENGINEERS.

[Institute of Civil Engineers, Great Britain.]

Recommendations in respect of Preparatory Education:

r. It is desirable that a boy intended for the Engineering Profession should, before leaving school and commencing to specialize, have attained a standard of education equivalent to that required by the Institution Studentship Examinations; and that he should not commence his special training until he is about 17 years of age.

and that he should not commence his special training until ne is about 17 years of age.

2. A leaving examination for secondary schools, similar in character to those already existing in Scotland and in Wales, is desirable throughout the United Kingdom. It is desirable to have a standard such that it could be accepted by the Institution as equivalent to the Studentship Examination, and by the Universities and Colleges as equivalent to a Matriculation Examination.

3. Advanced teaching of History and Geography, with instruction and practice in Essay-writing and in Precis-writing, should be included in the ordinary school curriculum; and the instruction in English subjects should include at least an introduction

to English Literature.

Greek should not be required, but an elementary knowledge of Latin is de-The study of Latin should, however, be discontinued during the last twoyears of attendance at school, or after the standard required for the leaving certificate has been attained. Modern languages, especially French and German, should be studied, and should be taught colloquially or in such a way as to give the pupils a practical knowledge of each language, sufficient to enable them to study its literature and to converse in it with some degree of facility.

5. Instruction in Mathematics should be given by methods differing considerably from those usually adopted in the teaching of this subject merely as an intellectual exercise. The geometrical side of Mathematics should be fostered, and before they leave school, boys should be conversant with the use of logarithms, and with at least the elements of trigonometry, including the solution of triangles. It is also of importance that instruction in practical arithmetic should be carried further than has been generally the case hitherto, with the object especially of encouraging the use of contracted methods and operations in mental arithmetic; and of encouraging also the expression of results with only such a degree of precision (numerical) as is consistent with the known degree of certainty of the data on which they are or may be supposed to be based.

6. It is preferable that boys should attain at school a general knowledge of elementary Physics and Chemistry, or of what is sometimes called "Natural Philosophy," rather than that they should pursue in detail some particular department of science.

7. Special attention should be given to drawing; the instruction should include ordinary Geometrical Drawing with orthographic projection, Curve-drawing, Freehand drawing and Practical Mensuration.

8. Work in the nature of handicraft, such as Carpentry or Turning or Elementary Field Surveying, may be encouraged as a recreation but should not be required as a school exercise.

 It appears to be impossible in the general curriculum of school work to include advantageously time for instruction in such a subject as Surveying, which has

The Committee recommend that this scheme of Preparatory Education should be officially communicated to the Board of Education and widely circulated amongst those engaged in the conduct of Secondary Schools and Engineering Colleges, in order that future schemes of tuition of youths who contemplate entry into the Engineering Profession may be guided thereby. The Committee are of opinion that if this course is taken it would assist in overcoming one great difficulty now universally felt in Institutions in which applied science is taught. At present, a considerable proportion of students enter technical Institutions ill prepared, and at least one year has to be devoted to instruction which ought to be secured beforehand. Proper preparation is essential if students are to derive full benefit from special instruction in applied science. Professors and teachers ought not to be required to undertake subjects that should be taught elsewhere, but should be left free to devote themselves to scientific and technical instruction which is their real work.

II.

### SCIENCE IN ITS APPLICATION TO NATIONAL HEALTH.

PRESIDENTIAL ADDRESS DELIVERED AT THE MEETING OF THE BRITISH MEDICAL ASSOCIATION.

[Henry Davy, M. D., Lond., F. R. C. P., Lond., Physician, Royal Devon and Exeter Hospital, in the "Lancet," London.]

Physical Culture is, in my opinion, one of the most pressing questions of the day, for it is by it alone that we have a proper remedy for the state of muscular degeneration which is so prevalent. It ought to be considered by every educational authority, for by its use use dwellers in city and country alike can have their muscular systems built up and developed to a healthy standard. There is no need that any collection built up and developed to a healthy standard. There is no need that any collection of children who are not diseased should become a class of muscular degenerates. It is a very serious matter, when you come to think of it, that a considerable number is a very serious matter, when you come to think of it, that a considerable number of healthy, well fed boys from some of our best public schools are too physically undeveloped to join the army as officers, until they have undergone a course of physical developed to join the army as officers, until they have undergone a course of physically culture after leaving school, and that large numbers of children in the elementary schools are diseased and physically undeveloped. For the children of to-day, are the men and women who compose the nation of to-morrow, and if they are diseased and physically deteriorated the nation in the near future will be equally affected.

Is it sufficiently recognized how greatly the future of the nation is decided during the school life of its children? It is while the children are at school that you must give them the foundations on which the whole of their future, physical, intellectual, and moral, is to be reared, and if they are not shown how to develop their bodies and keep them in health, the only chance of their learning it has been missed. It is also essential to see that during their school life they are not exposed to contamination from disease, and this can only be done by placing them under the supervision of a trained and qualified medical man, as is done in Japan and in nearly every other country in Europe except England. As the Committee on Physical Deterioration emphatically recommends, every school in the country without exception should be under the supervision of a properly trained medical officer. It should be his duty, with his assistants, to examine every pupil, to see who are healthy and who are diseased, who are fit for a course of physical culture, and who are not, and generally to look after the health and development of the children. How necessary such medical supervision must be is proved by the fact that Dr. Alfred Greenwood, medical officer of health of Blackburn, in an examination of 388 school children of that town, found that no less than 54 children were affected with some form of tuberculosis, and of this number 34 had tuberculosis of one or both lungs.

I would urge on the educational authorities that they are responsible for the development of the pupils' bodies as well as their minds, and that it is of little use to the nation to bring up men with their minds stored with facts, but their bodies left ill-developed and generally degenerate. Playgrounds are as necessary for the healthy development of our children as school buildings, gymnasia as class rooms, trainers in physical exercises as school teachers, and if every board school cannot be provided with these necessary adjuncts they should, at all events, be provided in certain areas,

so that physical development is provided for and insisted on for all children.

I know of nothing more worthy of the attention of this great Association and of its powerful organ in the press than that the duty of pressing on the statesmen of the day the need for making elementary physiology and hygiene a compulsory part of the education of all the children in this country. We shall never be able to deal satisfactorily with physical degeneracy and the prevention of disease so long as the majority of the men and women in the nation remain in absolute ignorance of the very rudiments of science and hygiene. It is not creditable to our educational systems that a so-called "well-educated" gentleman, who may one day be called on to legislate for his country in Parliament, should be able to go through one of our best public schools and take a degree at one of our oldest universities, without the least knowledge of the composition of the atmosphere and without the most elementary ideas as to food and hygiene; but so it is, and I despair of improving the health of this country and of preventing a mass of preventable disease so long as this anomalous condition of education exists. For in the prevention of disease we as a profession, can do little or nothing unless we have the support of public opinion behind us, to assist in carrying out

But it must remain, after all, with the Government to apply this truth to the legislation of the country, and to the every-day life of the people. This it is possible for a Government to do, this has been proved by the Government of Japan. You have here a nation which had its own civilization, and whose people were well educated in Chinese Classics and Literature, but who were not acquainted with the science which is the distinguishing feature of Western civilization. For 250 years this people enjoyed peace, and during this time had been able carefully to examine the work being done by other nations. They saw the value of science and scientific developments of the Western world, all of it new to their modes of thought and life; they determined to bring it into their mode of life, and they have done this in a thoroughly systematic

manner.

Farlier in this address I quoted to you the systematic manner in which they introduced physical exercises, gymnastics, and games into all their schools, and we can see the value of their system yet further shown in the marvellous freedom from disease which was apparent in their armies during the late Russo-Japanese war. Through the kindness of Admiral White I have been able to make a study of the book of rules which each Japanese officer took into that campaign. They were drawn up by a body of experts, military surgeons, and they deal with almost every contingency likely to be met with in warfare. There has never before in history been so systematic an application of the science of the day to the every-day life of a soldier nor are there many armies in the world sufficiently educated in hygiene to understand such minute details. But all the children in Japan are taught in their schools the principles of elementary hygiene, and, carrying out the directions given to them, the soldiers march-

ed to victory, with less illness from preventable disease than ever occurred in any previous campaign; and they thus gave a demonstration to all nations of the importance of the application of the science of the day in the prevention of disease. If Japan can thus bring science to assist in preserving the health and physique of their nation. England can do the same, or else she must eventually take a back seat in that concourse of nations in which only the fittest will be supreme. In one of his most striking passages Rudyard Kipling, says: "We are a great people and very strong, but we build our empire in a very wasteful way—on the bones of the dead, who have died from disease!" It is of our profession, gentlemen, as the advisers of the nation on all matters of health, to show how much of this terrible waste can be prevented; and just in proportion as we succeed in doing this, in that proportion shall we be carrying out the highest purpose of our profession in maintaining the health of the individual and in preventing the degeneration of the nation.

### EDUCATIONAL OPINION

#### III.

## CURRICULA OF SECONDARY SCHOOLS.

[Report of the Committee of the British Association, consisting of Sir Oliver Lodge (chairman), Mr. C. M. Stuart (secretary), Mr. T. E. Page, Profs. M. E. Sadler, H. E. Armstrong, and J. Perry, Sir Philip Magnus, Principal Griffiths, Dr. H. B. Gray, Prof. H. A. Miers, Mr. A. E. Shipley, Prof. J. Findlay, and Sir William Huggins, appointed to consider and to advise as to the curricula of secondary schools; in the first instance, the curricula of boys' schools. August, 1907.]

The Committee submit for consideration the following conclusions which they have reached as the result of their debates:

1. There is need for secondary schools of different types, with different curricula

or combinations of curricula: because

All boys are not suited to the same course of study. The requirements of the various callings upon which the boys will subse-(a)

quently enter, differ considerably. (c) The needs of the schools differ in a considerable degree, according to the

economic conditions of the districts in which they are situated.

Broadly speaking, however, the secondary schools fall into two different types—viz., those in which the majority of boys remain till eighteen or nineteen, and then continue their education at places of university rank; and those in which the majority leave at fifteen or sixteen and proceed to business. There is, however, no sharp line of demarcation between the two.

2. The Committee consider that one modern foreign language should in all cases be begun at an early age; but are of opinion that it would be a wise educational experiment to postpone the systematic teaching of Latin as an ordinary school subject periment to postpone that such a change will prove sufficiently successful to warrant its adoption.

On the other hand, they are of opinion that such absence of systematic teaching by no means precludes its incidental teaching before the age of twelve by such means

as will naturally occur to a fully qualified teacher of young boys. The Committee also desire to record their opinion that the continued teaching The Committee also desire to record who, after serious trial, have shown little of either of the two dead languages to boys who, after serious trial, have shown little of either of the two dead languages to boys who, after serious trial, have shown little or no progress in, or capacity for, such linguistic study has little or no educational value; and that, though the mental training afforded by such study is of great value in the case of many boys, yet in the case of others such study not only produces no good results, but does positive harm to their mental and moral progress by reason of their incapacity to grapple with its difficulties.

The Committee go further, and express their doubt whether the authorities in some secondary schools have sufficiently recognised this fact, or have provided

sufficient alternatives to such linguistic study.

t alternatives to such iniguistic study.

The Committee deprecate any form of early specialisation in the education 3. The Committee deprecate any form concern the fact that the entrance exor charges, and therefore results and the great English public schools give undue prominence to the study of

Latin (and Greek) in the course of education at the preparatory schools, the result being that too little time is available for (a) the teaching of the mother tongue, (b) manual training, (c) science and mathematics.

The Committee would deprecate anything like State-imposed rigidity in the

organisation and studies of secondary schools.

But the Committee are led to the conclusion that up to twelve years of age there might be a broad general course of education for all. It would in all cases include careful preliminary training in the use of the mother tongue, so that it could be used in speaking and writing correctly on ordinary occasions, and would further comprise the following divisions:

Literary; (2) mathematical; (3) scientific; (4) manual training

They consider that a school week of twenty-six hours might be divided as follows: Literary work, thirteen hours; mathematical and scientific work, nine hours; drawing and manual training, four hours; while for those who after twelve years of age commence the study of Latin, the division of time should be: literary work, sixteen hours; other subjects, ten hours.

The Committee are of opinion that the curriculum in secondary schools suffers gravely from the number of subjects which have been crowded into it, and they regard this as the most serious factor in secondary education at the present time. They are of opinion that this "overcrowding" is due to two causes:

(1) The disproportionate amount of time bestowed in many schools on the two ancient languages, which leaves only a small residuum for each of the other subjects now increasingly regarded as essential items of education, the result being that the pupil obtains only a smattering of the knowledge of such subjects.

(2) The ill-founded belief that the curriculum should be an abstract of all modern

knowledge.
6. The Committee desire to see a great simplification in the arrangement of examinations for secondary schools, and they strongly recommend that examination and teaching should go hand in hand, the examiners co-operating with the teachers and acting in conjunction with them in order to further the interests of real education.

The Committee would urge upon the universities and professions to accept as qualifying for entrance the leaving certificates granted by each university to the schools

which submit to its inspection.

The aim should be to examine in accordance with the teaching, and to pay special attention to the special peculiarity of each school, or group of schools; and it would be a great relief, and at once improve the teaching of the higher forms, if the results of such examination were accepted by universities and professional bodies without

further entrance test.

The Committee particularly deprecate any uniform or centrally administered examination applied to all the schools of the country. For a uniform State examination if it were made the door of entrance to all higher courses of study and the professions and Civil Service, would do much evil, focussing the efforts of teachers and pupils upon those parts of the school curriculum in which alone examination is possible. Further, the rivalry between schools would cause the standard of attainment steadily to rise, until the over-pressure became serious, and intellectual vigour and independ-

ent thought were killed.

7. The Committee feel that no scheme of secondary education can be satisfactory 7. The Committee let that he seneme of secondary education can be satisfactory unless it is carried out by teachers of learning and force of character, and they would urge that every effort should be made, by conditions of appointment, by scale of salaries, and by retiring allowances, to attract a high class to the teaching profession, which and by retiring allowances, to accept a high class to the teaching profession, which should be regarded as a very laborious, but very honourable, form of public service. Prompt action in this matter is urgent and imperative; for, unless something is done without delay, the best interests of the schools, and especially of boys' day schools,

will be sacrificed to a false and disastrous economy.

#### EDUCATIONAL OPINION.

#### IV.

[Extract from the opening Address of the Educational Section of the British Association, by the President, Sir Philip Magnus, M. P., of the University of London. August, 1907.]

There never was a time perhaps when it was more necessary than now that education should be regarded dispassionately, apart from political bias, as a matter of vital interest to the people as a whole. Education nowadays is a question which affects not only the life of a few privileged, selected persons, but of the entire body of citizens. The progress that has been made during the last few years in nationalising our education has been very rapid. It may be that it has been too rapid, that sufficient thought has not been given to the altered social and industrial conditions which have to be considered. We have witnessed a strong desire and a successful effort to multiply Secondary and Technical Schools and to open more widely the portals of our Universities. The object of the desire is good in itself. As a people grow in knowledge the demand for higher education will increase; but the serious question to be considered is whether the kind of education which was supplied in schools, founded centuries ago to meet requirements very different from our own, is equally well adapted to the conditions which have arisen in a state of society having other needs and new ideals. rightly our students in training for the profession of teachers are expected to study the writings of Locke, Rousseau, Milton, Montaigne, and others; but many are apt to overlook the fact that these writers had in view a different kind of education from that in which modern teachers are engaged, and that their suggestions, excellent as many of them are, were mainly applicable to the instruction to be given by a tutor to his private pupil, and had little or no reference to the teaching of the children of the people in schools expressly organised for the education of the many. Only recently have we come to realise that a democratic system of education, a system intended to provide an intellectual and moral training for all citizens of the State, and so organised that, apart from any consideration of social position or pecuniary means, it affords facilities for the full development of capacity and skill wherever they may occur, must be essentially different in its aims and methods from that under which many of us now living have been trained. It has also been brought home to us that the marvellous changes in our environment, in the conditions under which we live and work, whether in the field, the factory, or the office, have necessitated corresponding changes in the education to be provided as a preparation for the several different pursuits in which the people generally are occupied. Yet, notwithstanding these great forces which have broken in upon and disturbed our former ideals, forces the strength and far-reaching effects of which we readily admit, we still hesitate to face the newly arisen circumstances and to adapt our educational work to its vastly extended area of operation and to the altered conditions and requirements of modern life.

When I say we hesitate to face the existing circumstances I do not wish to be mis-As a fact, changes are continually being discussed, and are from time to time introduced into our schools. But such modifications of our existing methods are generally isolated and detached, and have little reference to the more comprehensive measures of reform which are now needed to bring our teaching into closer relation with the changed conditions of existence consequent on the alterations that have

taken place in our social life and surroundings.

Four years ago, it will be remembered, a committee of this section was appointed to consider and to report upon the "Courses of Experimental, Observational, and Practo consider and to report upon the Courses of Schools." That committee, of which I had the honour to be chairman, presented a report to this section at the meeting of the Association held last year at York. The general conclusion at which they arrived was that "the intellectual and moral training, and indeed to some extent the physical training, of boys and girls between the ages of seven and fourteen would be greatly improved if active and constructive work on the part of the children were largely substituted for ordinary class teaching, and if much of the present instruction were made to arise incidentally out of, and to be centred around, such work." It is too early, perhaps, to expect that the suggestions made in that report should have borne fruit, but I refer to it because it illustrates the difference between the spasmodic reforms which from time to time are adopted, under pressure from bodies of well-meaning

representatives of special interests, and the well-considered changes recommended by a committee of men and women of educational experience who have carefully tested

the conclusions at which they have arrived.

There can be no doubt that, as regards our elementary education, there is very general dissatisfaction with its results, since it was first nationalised thirty-seven years ago. Our merchants and manufacturers and employers of labour, our teachers in secondary and technical schools all join in the chorus of complaint. They tell us that the children have gained very little useful knowledge and still less power of applying it. There is enough in this general expression of discontent to give us pause and to make us seek for a rational explanation of our comparative failure. The inadequacy of the results attained to the money and effort that have been expended is in no way due to any want of zeal or ability on the part of the teachers, or of energy on the part of school boards or local authorities. They have all discharged the duties which were imposed upon them. It is due rather to the fact that the problem has been imperfectly understood, that our controlling authorities have had only a vague and indistinct idea of the aim and end of the important work which they were charged to administer. If we look back upon the history of elementary education in this country since 1870, we cannot fail to realise how much its progress has been retarded by errors of administration due very largely to the want of scientific method in its direction. It is painful to reflect, for instance, on the waste of time and effort, and on the false impressions produced as to the real aim and end of education, owing to the system of payment on results, which dominated for so many years a large part of our educational system. We must remember that it is only within the last few decades that education has been brought within reach of all classes of the population. Previously it was for the few; for those who could pay high fees; for those who were training for professional life, whether for the Church, the Army, the Navy, Law, or Medicine, or for the higher duties of citizen life. This had been the case for centuries, not only in this country, but in nearly all parts of the civilised world. If we read the history of education in ancient Greece or Rome, or mediæval Europe, we shall see that popular education, as now understood, was unknown. All that was written about education applied to the few who got it, and not to the great mass of the people engaged in pursuits altogether. apart from those in which the privileged classes were employed. Trade and manual work were despised, and were considered degrading and unworthy of the dignity of a gentleman. I need scarcely say that these social ideas are no longer held. of society is changed, and we have to ask ourselves whether the methods of education have been similarly changed, whether they have been wisely and carefully adapted to the new order of things. What is it that has really happened? Is it not true that we have annexed the methods and subjects of teaching which had been employed during many centuries in the training of the few and applied them to the education of the people as a whole—to those who are engaged in the very callings which were more or less contemned? Surely it is so, and the results are all too manifest. We have applied the principles and methods of the secondary education of the Middle Ages to our new wants, to the training of the people of other duties than those to which such education was considered applicable, and it is only within the last few years that we have begun to see the error of our ways. In the report of your committee, to which we have begun to see the error of our ways. In the report of your committee, to which I have referred, it is pointed out that the problem of primary education has been complicated by the introduction of the methods which for many years prevailed in secondary plicated by the introduction of the National Education many years prevailed in secondary schools, and at a meeting of the National Education Association, held only a few weeks since, it was truly said: "In this country secondary education preceded primary by several centuries and so the nation now finds itself with the aristocratic cart attempting: to draw the democratic horse."

Let it not be supposed that in the days not so far distant, yet stretching back into the remote past, the people as a whole were uneducated. This was not so. But we have to widen the meaning of education to include the special training which the people then received—an education that was acquired without even the use of books. It cannot for one moment be said that the artisans, the mechanics, the farm hands, male and female, were wholly uneducated in those far-off days. In one sense possibly they were. Very few of them could read or write. But from earliest childhood they had received a kind of training the want of which their descendants have sadly felt in the cloistered seclusion of the modern elementary school. They were brought face to face with nature. They learned the practical lessons of experience; and as they grew up their trade apprenticeship was an education which we have been trying vainly to reproduce. They gained some knowledge of the arts and sciences, as then understood, underlying their work. Their contact with their surroundings made them thoughtfu and resourceful, for Nature is the most exacting and merciless of teachers. The diffi-

culties they had to overcome compelled them to think, and of all occupations none is more difficult. They were constantly putting forth energy, adapting means to ends, and engaging in practical research. In the field, in the workshop, and in their own homes, boys and girls acquired knowledge by personal experience. Their outlook was broad. They learned by doing. It is true that nearly all their occupations were manual, but Emerson has told us, "Manual training is the study of the external world."

Compare for a moment this training with that provided in a public elementary school, and you cannot be surprised to find that our artificial teaching has failed in its results, that our young people have gained very little practical knowledge, and that what they have gained they are unable to apply; that they lack initiative and too often the ability to use books for their own guidance, or the desire to read for self-We seem to have erred in neglecting to utilise practical pursuits as the basis of education, and in failing to build upon them and to evolve from them the mental discipline and knowledge that would have proved valuable to the child in any subsequent occupation or as a basis for future attainments. We have made the mistake of arresting, by means of an artificial literary training, the spontaneous development of activity, which begins in earliest infancy and continues to strengthen as the child is brought into ever closer contact with his natural surroundings. We have provided an education for our boys which might have been suitable for clerks; and, what is worse, we have gone some way, although we have happily cried a halt, to make our girls into "ladies," and we have run some risk of failing to produce women.

If we are to correct the errors into which we have drifted, if we are to avert the

consequences that must overtake us through having equipped our children for their life-struggle with implements unfitted for their use, we must consider afresh the fundamental ideas on which a system of elementary education should be based. Instead of excluding the child from contact with the outer world we must bring him into close relationship with his surroundings. It was given to man to have dominion over all other created things, but he must first know them. It is in early years that such knowledge is most rapidly acquired, and it is in gaining it that the child's intellectual activities

are most surely quickened.

It is unfortunate that we failed to realise this great function of Elementary Education when we first essayed to construct for ourselves a national system. The three R's, and much more than that, are essential and incidental parts of Elementary Education. But what is needed is a *Leitmotij*—a fundamental idea underlying all our efforts and dominating all our practice, and I venture to think that that idea is found in basing our primary education on practical pursuits, on the knowledge gained from actual things, whether in the Field, the Workshop, or the Home.

Instead of fetching our ideas as to the training to be given in the people's schools from that provided in our old grammar schools, we should look to the occupations in which the great mass of the population of all countries are necessarily engaged, and endeavour to construct thereon a system with all such additions and improvements as may be needed to adapt it to the varied requirements of modern life. By this process—one of simple evolution adjusted to everyday needs—a national system of education might be built up, fitted for the nation as a whole—a system founded on ideas very different from those which, through many centuries, have governed the teaching in our schools. In the practical pursuits connected with the Field, the Workshop, and in our schools. the Home, and in the elementary teaching of science and letters incidental thereto, we

might lay the foundation of a rational system of primary education.

These three objects—the Field, the Workshop, and the Home—should be the pivots on which the scheme of instruction should be fixed, the central thoughts determining the the character of the teaching to be given in rural and urban schools for boys and girls. It was Herbart who insisted on the importance of creating a sort of centre around which school studies should be grouped with a view to giving unity and interest to the subjects of instruction. I have elsewhere shown how a complete system of primary education may be evolved from the practical lessons to be learned in connection with out door may be evolved from the practical lessons to be domestic arts, and how, by means of such lessons, the child's interest may be excited and maintained in the ordinary subjects. of school instruction, in English, arithmetic, elementary science, and drawing. of school instruction, in Engiss, arithmetic, elements, and drawing. In the proposals I am now advocating I am not suggesting any narrow or restricted curriculum. On the contrary, I believe that, by widening the child's outlook, by closely associating school work with familiar objects, you will accelerate his mental development and quicken his power of acquiring knowledge. I would strongly urge, however, that the child should receive less formal teaching, that opportunities for self-instruction through out-door pursuits, or manual exercises, or the free use of books, should be increased, so that as far as possible the teacher should keep in view the process by which

in infancy and in early life the child's intelligence is so rapidly and marvellously stimulated. Already we have discovered that our unscientific attitude towards primary education has caused us to overlook the essential difference between the requirements of country and of town life, and the training proper to boys and girls. Our mechanical methods of instruction, as laid down in codes, make for uniformity rather than diversity, and we are only now endeavouring, by piecemeal changes, to bring our teaching somewhat more closely into relation with existing needs. But the inherent defect of our system is that we have started at the wrong end, and, instead of evolving our teaching from the things with which the child is already familiar, and in which he is likely to find his life's work, we have taken him away from those surroundings and placed him in strange and artificial conditions, in which his education seems to have

no necessary connection with the realities of life.

The problem of primary education is to teach by practical methods the elements of letters and of science, the art of accurate expression, the ability to think and to control the will; and the ordinary school lessons should be such as lead to the clear apprehension of the processes that bring the child into intimate relation with the world in which he moves. During the last few years the importance of such teaching has dimly dawned upon our educational authorities, but, instead of being regarded as essential, it has been treated as a sort of extra to be added to a literary curriculum, already overcrowded. What is known as manual training is to some extent encouraged in our schools, but it forms no part of the Child's continuous education. It is still hampered with conditions inconsistent with its proper place in the curriculum, and is uncoordinated with other subjects of instruction. Moreover, no connecting link has yet been forged between the teaching of the Kindergarten and workshop practice in the school. We speak of lessons in manual training as something apart from the school instruction, as something outside the school course, on the teaching of which special grants are paid. Twenty or thirty years ago people used to talk about "teaching technical education," and from this unscientific way of treating the close connection that should exist between hand-work and brain-work our authorities have not yet freed themselves.

It is true we have long since passed that stage when it was thought that the object of instruction in the use of tools was to make carpenters or joiners; but, judging from a report recently issued by the Board of Education, it would seem that it is still thought that the object of cookery lessons to children of twelve to fourteen years of age is the training of professional cooks. Until the Board's inspectors can be brought to realise that the aim and purpose of practical instruction in primary schools, whether in cookery or in other subjects, is to train the intelligence through familiar occupations, to show how scientific method may be usefully applied in ordinary pursuits, and how valuable manipulative skill may thus be incidentally acquired, it does not seem to me that they themselves have learned the most elementary principles of their own profession. anonymous teacher, writing some weeks since in the Morning Post, said: "The cookery class can be made an invaluable mental and moral training ground for the pupils, the most stimulating part of primary education. It teaches unforgettable lessons of cleanliness and order, of quickness and deftness of movements. The use of the weights and scales demands accuracy and carefulness, and the raw materials punish slovenliness or want of attention with a thoroughness which the most severe of schoolmasters might hesitate to use. Practical lessons in chemistry should form an important feature of each class.... The action of heat and moisture on grains of rice provides an interesting lesson on the bursting of starch cells, and the children's imagination is awakened by watching the hard isolated atoms floating in milk change slowly to the creamy softness of a properly made rice pudding. The miraculous change in the oily white of egg when it is beaten into a mountain of snowy whiteness gives them interest in the action of air and its use in cookery.

Can the teaching of grammar or the analysis of sentences provide lessons of equal value in quickening the intelligence of young children?

I must add one word before passing from this suggestive illustration of the value of scientific method in the treatment of educational questions. We live in a democratic age, and any proposed reform in the teaching of our primary schools must be tested by the requirement that the revised curriculum shall be such as will provide not only the most suitable preparatory training for the occupations in which four-fifths of the children will be subsequently engaged, but will, at the same time, enable them or some of them to pass without any breach of continuity from the primary to the secondary school. There must be no class distinctions separating the public elementary from the State-aided secondary school. The reform I have suggested is unaffected by such criticism. The practical training I have advocated, whether founded on

object-lessons furnished by the Field, the Workshop, or the Home, would prove the most suitable for developing the child's inte ligence and aptitudes and for enabling him to suitable for developing the child's intengence and one of the different types of second-derive the utmost advantage from attendance at any one of the different types of second-derive the utmost advantage from attendance at any one of the different types of secondchild's intellect would be fully determined before the age when the earliest specialisation No scheme of instruction for primary schools can be regarded as would be desirable. satisfactory which is not so arranged that, whilst, providing the most suitable teaching for children who perforce must enter some wage-earning pursuit at the age of fourteen, or at the close of their elementary school course, shall at the same time afford a sound and satisfactory basis on which secondary and higher education may be built. And I hold the opinion, in which I am sure all teachers will concur, that a scheme of primary education pervaded by the spirit of the Kindergarten which, by practical exercises, encourages observation and develops the reasoning faculties, and creates in the pupil an understanding of the use of books, would form a fitting foundation for either a literary or a scientific training in a secondary school.

I have purposely chosen to illustrate the main subject of this address by reference to defects in our primary instruction, because the success of our entire system of education will be found, year by year, to depend more and more upon the results of the training given in our public elementary schools. We have scarcely yet begun to realise the social and political effects of the momentous changes in our national life, consequent on the first steps which were taken less than forty years ago to provide full facilities under

State control and local management for the education of the people.

At present all sorts of ideas are afloat which have to be carefully and scientifically The working classes have to be further and somewhat differently educated, in order that they may better understand their own wants and how they are to be satisfied. We have placed vast powers in the hands of local bodies, popularly elected, powers not only of administration, for which they are well adapted, but powers of determining to a very great extent, by the free use of the rates, the kind of instruction to be given in our schools, and the qualifications of the teachers to impart it. Moreover, these local bodies have shown, in many instances, a distrust of expert advice and a desire to act independently as elected representatives of the people, which cannot fail for some time at least to lead to waste of effort and of means. It was said years ago, when the centre of our political forces received a marked displacement, that we must educate our masters. Our masters now, both in politics and education, are the people, and it is only, I believe, by improving their education that we can enable them to understand the essential difficulties of the problems which they are expected to solve, and can induce them to rely, to a greater extent than they do at present, on the results of the application to such problems of scientific method, founded on the fullest information obtainable from historical and contemporary sources.

I might have illustrated my subject by reference to the acknowledged chaotic condition of our secondary education. In the report of the Board of Education published in December last, we read: "While the development of secondary education is the most important question of the present day, and is the pivot of the whole education as it affects the efficiency, intelligence, and well-being of the nation, yet its present position may be described as 'chaos.' "The "chaos" by which the present position of our secondary education is here described is intimately connected with the questions relating to primary education which I have been engaged in considering. If we construct a system of primary education which serves equally for children of all classes, apart from social conditions—a system educationally sound, both as a pre paration for immediate wage-earning pursuits and for more advanced and somewhat more specialised training in a secondary school—many of the difficulties which confront the Poard of Education, and which are largely of an administrative order, would disappear. The difficulties are in part dependent on the question of curriculum, to the

discussion of which a day will be devoted during the present meeting.

University education in this country, and indeed in other countries, has also suffered much from the hands of the unscientific reformer. In Germany, owing to suffered much from the hands of the dissellent advances during to many causes, the higher education has made considerable advances during the past century; but, even in that country, a more critical study of the development of Unicentury; but, even in that country, a more the twofold function of a University might versity education and a truer recognition of the twofold function of a University might versity education and a truel recognition of distinct institutions and under separate rehave prevented the early separation in distinct institutions and under separate renave prevented the early separation in distriction. Only within recent gulations of the higher technical from University instruction. Only within recent years has France retraced her steps and returned to the University ideal of seven centuries ago. But perhaps the climax of unscientific thinking was reached in the scheme, happily abandoned, of founding a new University in Dublin on the lines suggested by Mr. Bryce in his now famous speech of January last.

Our conception of the functions of a University has undergone many violent ges. Between the ideal of the University of London prior to its reorganisation and that of a mediæval University, in which students were never plucked, obtaining their degrees whether they did their work well or badly, there have been many variations; but I think it may be said that, recently at any rate, we have come to realise the fact that our Universities, to fulfil their great purpose, must be schools for the preparation of students for the discharge of the higher duties of citizenship and professional life, and Institutions for the prosecution of research, with a view to the promotion of learning in all its branches, and that examinations for degrees, necessary, as they undoubtedly are, as tests of the extent of a student's acquired knowledge, must be regarded as subordinate to these two great functions.

## EDUCATIONAL OPINION.

V.

## SIMPLIFIED SPELLING.

From Australia, New Zealand and England as well as the United States of America, movements more or less radical for the simplification of English spelling are growing. Professor Skeat, who only a few months before was criticised sharply by the Edinburgh Scotsman, was roundly cheered at the Cambridge University reception to the delegates of the Empire's Educational Conference, on the 5th of June last, when Dr. Tate, of Victoria, (Australia), in responding to a toast referred to his services for the improvement of the spelling of the English Language. Professor Tucker, of the University of Melbourne, a graduate of Oxford and Dublin, has come out with a most effective appeal in favor of a very radical improvement in spelling. It is re-published by the Government as a special supplement in the Educational Gazette. The Inspector-General of Education, in New Zealand, is also in favor of reform. The great Journal of Education, published in London and Edinburgh, spells "program" in English instead of French as we do in many publications in Nova Scotia. The Conservative Germans have cut it down only half way at date, with whom it appears as "programm."

When Carnegie and Roosevelt joined the movement in the United States, Canadian newspapers, with very few exceptions, republished some caricatures of the movement copied from the yellow American press. Our people have, therefore, been left uninformed on this important subject. They are not aware that the leading authorities in Findlish extraordinal Country of the contraction of the contra ities in English scholarship in Great Britain, as well as in the United States, are at the head of this movement, which many do not support because they think it not

sufficiently radical to be of much present advantage.

This the Conservative school admits; but it holds first, that changes to become popular must not be too many at a time. And that as soon as the people become used to moderate instalments of reform they can accommodate themselves to its continuance under the authority of a body of the acknowledged scholars of the English speaking world, until the spelling becomes as perfect as possible.

At the last meeting of the National Educational Association of the United States, At the last meeting of the Executive, moved that the last twelve spellings of the three hundred list adopted several years before, including "thru, tho, &c.", be discontinued; and it passed without notice. When it was brought to the attention of the Executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the extention of the executive was consured by a vote of the executive was consumed by a vote of the executive was consuched by a vote of the executive was consuched by a vote of the Association the action of the Executive was censured by a vote of 209 to 22. teachers of the 90,000,000 in the United States may be considered to be solidly in

teachers of the 90,000,000 in the United States may be considered to be solidly in favor of simplification since 1898, when the simplified spelling was adopted in its reports. One thing is as certain as fate, and that is, that if there should be a cleavage in the spelling of English, the shorter, more regular, and more scholarly form will become wentually, not only the popular but the literary form.

We should, therefore, move slowly, until the busy and conservative people have time to think and act in unison with us. In the meantime, while we would not conservative one to give up the old spelling, no matter how wrong that evaluing may be. pel any one to give up the old spelling, no matter how wrong that spelling may be, we dare not cut down a candidate at examination a single point because he chooses to follow the recommendations of the scholars of the language who are interested in making it the more worthy language of the future.

As neither our newspapers nor our educational papers have published the list of three hundred simplified words, we do so here, so that those concerned may know exactly what simplified spellings can be accepted by examiners. Private and unauthorized simplifications are misspellings. The three hundred words have a higher scholarship authority than that of any dictionary, it must be remembered; for they are recommended unanimously by the greatest dictionary makers in Great Britain as well as by those in the United States of America.

## NATURE STUDY INFORMATION.

I.

A SIMPLE METHOD OF KEEPING ORNITHOLOGICAL NOTES.

(E. C. Allen Yarmouth, N. S.)

The basis of a good system of recording bird observations is the keeping of a register of all birds seen daily throughout the year. At the end of the year the number of facts that may be deduced from such a register is astonishing.

It may be objected that the time required for keeping this record is more than most people are willing to give; but such time may be minimized to a period of two or three minutes a day by the use of the table illustrated below, which may be ruled either upon the pages of a book kept for the purpose or npon separate sheets.

#### BIRD OBSERVATIONS.

	Day of Year.	LOCALITY.	Weather.			Species.			
Day of June.				Wind,	Temp. at noon.	Passer domesticus.	Merula migratoria.	Mniotilta varia.	Vireo olivaceus.
1	152	Yarmouth Town .	Cloudy.		75	v. c.	C. S.	<u>≥</u> So.	- 2

8	154	Town and Locality B	Cloudy.	S. E. Light	76				-
4	155	Town	Fine.	w	70				

In the first column are found the days of the month. Next to these come the

In the first column are found the days of the month. Next to these come the corresponding days of the year. The utility of these figures will appear later.

Under the heading "Locality" the amount of definiteness used will vary according to the taste and desire of the observer. For general purposes the name of the town or village which is the centre of the district covered by the observations is sufficient; but if the observer wishes to formulate ideas of what small localities with the cient; but if the observer wishes to formulate ideas of what small localities, such as groves, parks, marshes, meadows, brook valleys, etc., are favoured by certain species, he may be more definite in this column, and mention these smaller localities visited he may be more definite in this column, and mention these smaller localities visited during the day. Sometimes, to save space and unnecessary writing, it is well to designate certain small localities that are not known by any particular name, by letters, such as "Locality A," "Locality B," but care should be taken that the localities represented by the different letters should be fully described and explained, as should all other abbreviations used in the table, and this key should be kept with the year's observations; otherwise the records would be meaningless to anyone except the author.

The fourth column contains remarks on the weather; the fifth, the general direction and comparative velocity of the wind; and the sixth, the temperature taken at some one time each day, e. g., at noon. If a thermometer is not at hand, this column may contain the remarks—Very Warm, Warm, Cool, Cold, Very Cold, etc., considering the time of year.

The principal value of keeping a record for weather, wind, and temperature, along with that of bird abundance, is to ascertain, by comparing records for different years. what effect, if any, these phenomena have upon the movements and abundance of our birds.

The names of the species, in the "Species" columns are filled in along the top of the table as new birds are observed each day. Scientific names are far preferable. The objection to such common names as "swamp robin," "catbird," "linnet," etc., is the fact that in different parts of the country these names are applied to birds of entirely different species, while such school-boy names as may be commonly used in Each bird has but one scientific name, one locality, are entirely unknown in another. and this is known and recognized universally.

In recording the appearance of birds each day, simple straight marks, such as are used to mark attendance in a school register, may be used whether the birds observed were seen singly or in large numbers. Even such a simple record as this, will, at the end of the year supply material for such facts as when each species was first at the end of the year supply material for such facts as when each species was first seen, when last seen, and give some idea of the abundance of each. But by the use of a few simple, and more specific symbols, the records can be made highly interesting, and of infinitely more value. The following observations will be found useful:—C—common; V. C.—very common; Sv—several: F.—flock; S—heard in song; Pr—a pair; N—nesting; Y—young out of nest; D—"drumming," (to be used in observations of the Ruffed Grouse, Bonasa umbellus). Many others will suggest themselves. to the observer.

Owing to the small number of species of birds found in Nova Scotia during the months of November, December, January, and February, one page (foolscap size) usually gives sufficient space for the records during these months, but for the remaining months it is usually necessary to extend the columns across two pages.

The interesting facts that may be obtained at the end of the year by an examination of the records, will amply repay the student for the small amount of time spent

Such notes as the following, (being two or three of the many drawn from records taken at Yarmouth during 1906) will serve to illustrate.
"Canadian Ruffed Grouse (Bonasa u. togata)

Becoming more and more uncommon near town.

First heard drumming, April 21st, then heard occasionally through each month up to September 29th, when drumming was again quite common.

First young seen June 8th.

"Purple Finch (Carpodacus purpureus)"
First seen March 28th; number seen, one;

Next seen, March 30th; became common, April 8th; Next seen, Oct. 21st., Song period extended from March 28th, to June 30th. Females were occasionally heard to sing. First females were seen April 28th."

For the keeping of such inferences, together with other notes of length taken from time to time, a system of cards is far preferable to an ordinary book with fixed pages. By the use of the card system, all the notes for each species are kept together.

Five inches by eight inches is a convenient size. The face of each card may be

ruled and headed as illustrated.

	A
Yellow Warbler.	
Dendroica aestiva	652

The number on the second line is the number given to each species by the American Ornithologists' Union.

The cards may be arranged in a box or drawer, either according to the birds, or in alphabetical order of their scientific names. When the card for any particular species is full, it may be lettered A., and another lettered B., inserted behind it.

The back of card A., for each species should be ruled in nine vertical columns as follows:-

LOCALITY.	Year.	F. S.	No S.	N. S.	Com.	L. S.	S. Period.	Breeds?
								-
					l			
	-					<b>-</b>		
7	<b>-</b>							
						١		
	_							
-								
				-				
		i			. 1	.	Ť	i i

The columns are for the general locality covered by the year's observances, the year, date when first seen, number seen, (i. e. on date first seen), when next seen, when it became common, when last seen, and the dates bounding the period of song, whether found breeding or not, and the abundance expressed in a general way by the word "Common," "Uncommon," "Rare," etc.

The dates transferred from the daily records to these columns are put down as

days of the year. These figures are much more convenient in finding averages, than

Along with these particularly ruled cards, a few cards headed "General Notes" should be kept for observations which do not apply to any particular species but to

II.

## BIRD OBSERVATIONS FOR 1906, AT YARMOUTH, N. S.

(By E. C. Allen, Yarmouth, N. S.)

The following observation for 1906 were made in and about Yarmouth town, within a The following observation to recipilate exceptions being those made during a six weeks camping trip at Moods Mills, a locality twelve miles from Yarmouth, and situated in a densely wooded valley along an expansion of the lower Salmon River, Yarmouth Co

Where dates are given below for any species without explanation, such dates will be understood to correspond respectively to the following five data, and where dates are wanting their places will be filled by the dashes,—First seen, Number seen, Next seen, When common, Last seen.

Allow me to say that the following are only from my own personal observations, and those only are recorded in which there is not the least doubt of the identity of the species observed.

(BIRDS GIVEN IN ALPHABETICAL ORDER OF SCIENTIFIC NAMES.)

REDPOLL (Acanthis linaria). Rare. Only a small flock seen during December on two occasions.

Only one observed during 1906 close enough Goshawk (Accipiter atricapillus) for identification, although several were brought in to local taxidermists in the early

winter of 1906-7.

SPOTTED SANDPIPER (Actitis macularia). Breeding commonly about the seashore, and also near fresh water, inland, June 23rd., young observed, just out of nest at Yarmouth. July 14th., at Mood's Mills, specimens seen, able to fly quite as well as old birds, although still unfeathered about the head and neck.

RED-WINGED BLACKBIRD (Agelaius phaniceus). One specimen shot at Cranberry

Head near Yarmouth, on or about Dec. 1, and brought to town for mounting.

ACADIAN SHARP-TAILED SPARROW (Ammodramus subvirgatus). Found common,

and in song about our salt marshes during the summer.

SAVANNA SPARROW (Ammodramus savanna). April 21, common, April 22, April 21, September 26. Very common about town. During the six weeks spent farther inland, however, this species was not observed once although much open cleared land was almost daily passed. It would appear from this that the species favored proxi .mity to Coast.

CEDAR WAXWING (Ampelis cedrorum). June 4, several June 5, June 6, September This species was more common both in town and country and remained with us

later than on any other year covered by my observations.

BLACK DUCK (Anas obscura). A flock seen as early as July 20. Local hunters report that broods are often too young to fly even later. Those mentioned were on the

AMERICAN PIPIT (Anthus pennsylvanicus). Rare here. I have only observed it twice in the past eight years. A large flock was observed at Yarmouth Sept. 26.

GREAT BLUE HERON (Ardea herodias). July 8. Two July 9. Sept. 24.

RUFFED GROUSE (Bonasa umbellus). Becoming more and more uncommon near First heard drumming April 21, then heard occasionally through each month, up to Sept. 29, at which time drumming was again quite common. First young seen

AMERICAN BITTERN (Botarus lentiginosus). May 18. Two June 23. CANADA GOOSE (Branta canadensis). April 13, Flock April 20. I see this species

only during the Spring migrations, and now less often than formerly. Purple Finch (Carpodacus purpureus). March 28, one; March 30, April 8, October 21. The song period extended from March 28 to June 30. The females occasionally Did not see first female until April 25.

sing. Did not see first female until April 25.
PILEATED WOODPECKER (Ceophloeus pileatus). Only one observed, a female, shot

within a mile of Yarmouth Jan. 20

within a line of xamouth Jan. 20

Brown Creeper Certhia familiaris americana). Only three seen, two at Yarmouth Jan. 2, one at Moods Mills Aug. 7.

mouth Jan. 2, one at Moods Mills Aug. 7.

Kingfisher (Ceryle alcyon). April 22, one; May 18, Sept. 9. Never common. One pair, occasionally two, found in each favorable locality. One burrow was found in an old compressed saw-dust dump.

CHIMNEY SWIFT (Chaetura pelagica). May 15, several May 16, Aug. 19. Found fully as common in the woods, with houses distant and scattered as about town. This

would appear to indicate that these birds do not all prefer chimneys to hollow trees.

would appear to indicate that these phus uo not all preter chimneys to hollow trees.

BARN'SWALLOW (Chelidon erythrogaster). May 6, Common; May 10, May 6, Sept. 2.

NIGHTHAWK (Chordeiles virginianus). June 16, One; June 20, June 30, Oct. 20.

Booming period of males June 20 to Aug. 12.

BARSH HAWK (Circus hudsonius). Aug. 17, Two; Sept. 2, Sept. 15, Sept. 15. These birds probably arrive here earlier than Aug. 17, but they are much more common in BANK SWALLOW (Clivicola ribaria). Only one observation. One seen Aug. 24 Autumn.

BANK SWALLOW (Christon reparts). April 21, Three April 29, Nov. 13.

FLICKER (Colaptes auratus). April 21, Three April 29, Nov. 13.

PARULA WARBLER (Compsothlypis americana). Found fairly common and in

'song about Mood's Mills throughout July. about mood's mins infoughout july. Observed nearly every day about OLIVE-SIDED FLYCATCHER (Contopus borealis).

Mood's Mills from July 6 to Aug. 5
Wood Prwee (Contobus virens). Observed fairly common about Mood's Mills

from July 6 to August 8.

CROW (Corvus americanus). We have a daily migration of these birds over the town, during the winter. In the morning they fly Northwest and in the afternoon Southeast. However when the ground is snowcovered or when there is a strong North wind, the crows seem to show a tendency to stop and feed about the town.

RAVEN (Corvus corax principalis). Rather uncommon. Seen only seven times

during the whole year.

BLUE JAY (Cyanocitta cristata). Found fairly common in the woods inland. As an rule seldom seen in town but this year a large flock appeared in the town about Sept. 25, and remained about till Oct. 20.

YELLOW WARBLER (Dendroica aestiva). May 12, one; May 13, May 16, Sept. 6. Song period from May 12 to July 17. Found much more common in town and open country than in the deep woods.

BLACKBURNIAN WARBLER (Dendroica blackburniae). Seen at Mood's Mills on six occasions between July 7 and Aug. 2. Females were observed caring for young out of the nest, so they evidently breed in that locality.

BLACK-THROATED BLUE WARBLER (Dendroica caerulescens). One seen at Yar-

mouth Oct. 18.

MYRTLE WARBLER (Dendroica coronata.) Apr. 21, Several; Apr. 23, Apr. 29, Oct. 23. Song period April 22 to June 8. Young found out of nest but still under care of parents July 17. A tendency to congregate in flocks noticed throughout October.

MAGNOLIA WARBLER (Dendroica maculosa). Apparently much less common than

usual. Several seen during first half of July.

YELLOW PALM WARBLER (Dendroica palmarum hypochrysia). May 31, one; June Oct. 13. I never saw this species here in large numbers except in the Fall migrations. This year several flocks were observed during the last of September and first of

CHESNUT-SIDED WARBLER (Dendroica pennsylvanica). May 31, one; June 30.

No further observations.

BLACK-THROATHED GREEN WARBLER (Dendroica virens). May 19, several; May 23, May 31, Sept. 15. Song period May 19 to Aug. 13. Among the evergreen woods this isour most common species of warbler.

BOBOLINK (Dolichonyx oryzivorus). Very common in Yarmouth Co. Only a pair

seen near town June 8.

Downy Woodpecker (Dryobates pubescens). Fairly common. Permanent resident. More common in winter.

HAIRY WOODPECKER (Dryobates villosus). Permanent resident. Rather less-

common than D. pubescens.

LEAST FLYCATCHER (Empidonax minimus). May 18th, one; May 21st, June 1st. Songperiod, May 18th to June 30th.

CATBIRD (Galcoscopies carolinensis). Not at all common. A very few seen about Mood's Mills, from July 6th to August 14th.

Wilson's Snipe (Gallinago delicata). May 19th, two; May 26th. No further observations. The aerial performance of the males last from their arrival to the last No further of May.

MARYLAND YELLOWTHROAT (Geoth'ypis trichas). May 18th, one: May 19th,. May 31st, September 29th. Song period, May 18th to August 3rd. Most common

lowland warbler.

BALD EAGLE (Haliactus leucocephalus). Only one observed Feb. 10th.

JUNCO (Junco hyemalis). April 5th, flock; April 8th. Song period, April 8th
to July 22nd. These began to flock in large flocks about the middle of September.

Several flocks were seen in November, and two flocks even in December.

AMERICAN CROSSBILL (Loxia curvirostra minor). Seen this year in the monthsof Jan., May, June and Sept., but most common in June. Flocks seen from May 26th to June 10th, contained birds in characteristic immature streaked plumage. WHITE WINGED CROSSBILL (Loxia leucoptera). Seen in Jan., Sept., Oct., Nov.,

and December.

Song Sparrow (Melospiza fasciata). April 3rd, two; April 4th, Oct. 26th. Song period from April 3rd to August 2nd. Another short song period occured throughout the warm days which we had in October. Found as common inland as near the

SWAMP SPARROW (Melospiza georgiana). April 21st, common. Song period. April 21st to July 26th.

LINCOLN'S SPARROW (Melospiza lincolni). One specimen (male) shot at Kelley's. Cove, South of Yarmouth, June 22nd. The only specimen that has come under my notice up to this date.

notice up to this date.

AMERICAN ROBIN (Merula migratoria). April 5th, one; April 6th, April 8th.

Song period April 8th to July 26th. Many remained over. First nest found May 31st.
One egg, two young. First young hunting food for himself, June 8th. Signs of flocking noticed July 28th. A young robin was found just out of the nest as late as Aug 29th.

BLACK-AND-WHITE WARBLER (Mniotilla varia). May 18th, one; May 26th,
May 31st, Aug. 14th. Song period, May 18th to July 17th.

Snowy Owl (Nyctea nyctea). Several came into local taxidermists in early winter of 1906-7. These, however, come from anywhere in the South-western counties, but mostly from coastal localities.

AMERICAN OSPREY (Pandion haliaetus carolinensis). Only two seen. Both on

Sept. 29th.

CHICKADEE (Parus atricapillus). Common throughout the year.

HUDSONIAN CHICKADEE (Parus hudsonicus). More common than P. atricapillus in midwinter, but becoming uncommon during the other seasons. I have never,

up to the present year, found it breeding here.

EUROPEAN HOUSE SPARROW (Passer domesticus). Common throughout the year. But in the town a scarcity of these birds was noticed for a period in the Fall, roughly from Sept. 20th to Nov. 15th. The abundance of seeds in the Fall, and the immense flocks of sparrows seen about grainfields in the country at that time may account for this lack of the sparrows in the town at that time. Birds were seen carrying nesting material as early as March 29th. Fox Sparrow (Passerella iliaca). Only two seen, December 16th.

CANADA JAY (Perisoreus canadensis). Only four observations throughout the year near town. But at Mood's Mills they were found rather common in July.

CLIFF SWALLOW (Petrochelidon lunifrons). May 18th, common, May 21st, May

18th, Aug. 25th. Many seen building June 2nd.

AMERICAN WOODCOCK (Philohela minor). I seldom see these birds on their journey North in Spring, except those that come to grief against wires, etc. They were rather common in the covers about our county this Fall. Last seen, Oct. 27th.

ARCTIC THREE-TOED WOODPECKER (Picoides arcticus). Only one observation

for 1906, a male, which I shot Jan. 29th. PINE GROSBEAK (Pinicola enucleator). I find this bird far more than a mere winter resident. My records show three observations in Jan., two in Feb., one in winter resident. If the shows the shows the show three observations in Jan., two in Feb., one in Mar., seven in July, six in Aug., and two in Nov. From Jan. 8th to Jan. 20th, a small Mar., seven in July, six in Aug., wooded locality three miles Feet of Versident States. flock was observed in a densely wooded locality three miles East of Yarmouth. On nock was observed in a densely model locality three limits hast of farmouth. On all three of my visits to this place, in spite of the fact that the weather was fairly severe, one or more of the birds was heard in song. They sang from the tops of the tallest trees, and their song resembles in its rambling character that of the Purple tallest trees, and their song resembles in its rambling character that of the Purple tailest trees, and their song resembles in its ramoning character that of the Purple Finch. It is interpsersed with very robin-like notes, so robin-like that if heard sep-arately one would declare the robin to be the songster. The finch-like trait of singing

SNOW-FLAKE (Plectrophenax nivalis). Fairly common in flocks during winter while on the wing was always noticed. of 1905-6. Last seen for 1906—Jan. 11th. Not seen at all in winter of 1906-07,

up to Dec. 31st.

GOLDEN-CROWNED KINGLET (Regulus satrapa). Our most common woodland GOLDEN-CROWNED And fall months, but from April to August they were uncommon bird during the winter and fall months, but from April to August they were uncommon excepting a flock seen in July. PUBY-CROWNED KINGLET (Regulus calendula). April 29th, one;

Several were heard attempting to sing their spring song Oct. 13th. RUSTY BLACKBIRD (Scolecophagus carolinus). Uncommon this year. Seen only

'six times. Last seen Oct. 13tn.

Oven-bird (Seiurus aurocapillus). Found very common about Mood's Mills during July and August, where they were heard in song. A note taken in July is as follows. "We had been for a short distance down the lake, and were on our way back to camp. The lake and all about were perfectly calm and darkness was just back to camp. The lake and all about were perfectly calm and short up into the hard woods on the hillside, a bird short up into the lake and all about were perfectly calm and darkness was just back to camp. pack to camp. The lake and all advocations on the hillside, a bird shot up into the coming on. Suddenly from the hard woods on the hillside, a bird shot up into the coming on. Suddenly from the hard mosts on the hinside, a blid shot up into the air, gave a vocal performance, reminding one of that more frequently heard from air, gave a vocal performance, reminding one of that more frequently heard from the Maryland yellow-throat and dove back into the sea of green covering the slope. the Maryland yellow-throat and doct of one quite near me. When quite near the Some days later I witnessed the descent of one quite near me. After ing of course the booming sound, and shot like an arrow past me into the woods. After ing of course the booming sound, and shot like an arrow past me into the woods. After a ground the course of "Teacher, teacher" was not heard and the aerial song above WATER-THRUSH (Seiurus noveboracensis). Sept. 21st, one seen on the lawn in described only occasionally.

This is the only observation for 1906. May 23rd, one; May 31st, June 2nd, Aug. 14th. Song period, May 23rd to June 30th. The first female was seen May 31st. 14th. Song period, May 231d to June 30th. Seen only during the lasthalf RED-BREASTED NUTHATCH (Sitta canadensis). Seen only during the lasthalf

RED-BREASTED NUTHATCH (Sitta canadensis). Seen only during the lasthalf of Sept., as follows: Sept. 15th two, Sept. 24th-one, Sept. 29th-several.

WHITE-BREASTED NUTHATCH (Sitta carolinensis). One observation August 12th, a flock at Mood's Mills.

YELLOW-BELLIED SAPSUCKER (Sphyrapicus varius). One taken at Yarmouth April 25th. Found common and feeding young about Mood's Mills from July 5th to July 14th, when they suddenly became uncommon, being seen but twice afterwards,

July 27th and August 11th.

PINE FINCH (Spinus pinus). Found commonly about the town and surrounding country from June 4th to July 3rd, and not seen at any other time during the year.

Goldfinch (Spinus tristis). Appears to have been only a summer resident this year. July 1st, one; July 6th, July 17th, Oct. 5th. Song period July 1st to July 30th. At Deerfield, near Mood's Mills, several males could be heard in song any day in July. They were very common this fall. During a walk about the north end of the town on Sept. 24th, they were the most common bird. Flocks were everywhere, and all were in the dull winter plumage.

There Sparrow (Spirulla monticale). Only two observations are N

TREE SPARROW (Spizella monticola). Only two observations, one Nov. 3rd, one

Nov. 18th.

BARRED OWL (Syrnium nebulosum). Found at Mood's Mills during July and first half of August, where we often heard them at night, and once or twice found them abroad during the day. On Nov. 5th, I took one in the town.

TREE SWALLOW (Tachycineta bicolor). April 18th, three; April 20th, April 21st.

August 24th.

YELLOW-LEGS (Totanus melanoleucus). Only one observation, A GREATER

small flock Aug. 25th.

HUMMING BIRD (Trochilus colubris). May 19th, one; May 21st, Sept. 26th. Never common. Rarely more than two or three seen a day. Not one adult male seen this year. Two nests were found. One in the Mountain cemetery July 1st, the other at Mood's Mills July 21st. Both nests were in high, long slender branches and their contents remained unknown but judging from the actions of the parent birds,

the first contained eggs and the other young.

Winter wren (Troglodytes hiemalis) (?). The following is from notes taken at Mood's Mills July 16th. During the morning my attention was attracted by a very sweet and canary-like song back of the camp. After much scrambling through tangles and brush heaps, I at last observed the songster perched atop a heap of brush. This bird continued in full song until July 30th. On that date two (I believe different) birds were heard. I believe this to be (T. hiemalis) both from my observation of this particular bird and because I have never seen any other wren than this in the county.

HERMIT THRUSH (Turdus aonalaschkæ pallasii). Common during the summer.

One was picked up dead in town as late as Nov. 16th.

WILSON'S THRUSH (Turdis juscescens). Found fairly common in song during first week of July at Mood's Mills.

KINGBIRD (Tyrannus tyrannus). May 18th, one; June 2nd, Sept. 2nd, Sept. 8th. Does not become common here until the Fall migrations. LOON (Urinator imber). On arriving at our Mood's Mill camp July 5th, one loon LOON (Urnator imber). On arriving at our Mood's Mill camp July 5th, one loon was seen in the lake. July 6th to July 9th, two were seen about the lake. No more were seen for several days. July 17th, landing on an island in the middle of the lake, the boat almost ran on to the two large eggs of a loon, in a shallow depression very near the water (within three feet). July 18th, I paddled cautiously out and around the end of the island and the bird plunged from the nest to the water, flapped out along the surface for some seventy-five yards, then dove like a flash to reappear a quarter of a mile up the lake. During the next few days we had much heavy rain. On the night of July 25th, the loons called and wailed most mournfully all night, and July 26th we visited the nest to find the eggs half submerged by the rising water. One loon was watching from the lake. July 27th, there were four inches of water over loon was watching from the lake. July 27th, there were four inches of water over the eggs and no loon was seen or heard. One was again seen in the lake July 29th, the eggs and no loon was seen of the water and man again seen in the take July 20th, and loons were heard from a neighboring lake in August. I give this only to show that the loon nested too close to the water and met with consequent misfortune. The notion of attributing to animals an imaginary power, prophetic or otherwise, I do not believe to be founded on wide observation. My observations thus far lead me to believe that the lower animals depend more upon their keen senses for their well-being, than upon any prophetic or other supernatural power.

VIREO (Virco olivaceus). Common and in song about Mood's Mills during July

and August, the incessant song of these birds became much less common.

CANADIAN WARBLER (Wilsonia canadensis). Several seen at Mood's Mills throughout July and first half of August.

WHITE THROATED SPARROW (Zonotrichia albicollis). May 18th, two; May 19th, Oct. 13th. Song period, May 18th to Oct. 6th.

## NATURE STUDY,

III.

## THE BROWN-TAIL AND GYPSY MOTH.

The former of these has already invaded Nova Scotia. The second has vanquished the army of science which for a few years was supported so indecisively by the peo-ple of Massachusetts after the expenditure of hundreds of thousands of dollars. They are now marching on, south, west, and north; and may soon be reported from Nova Scotia, where they will add another item of cost to the cultivation of gardens, farms,

At the request of interested observers we publish the following two "Nature

Leaflets," for the information of teachers and pupils interested.

We acknowledge with thanks the permission given by the State Board of Agriculture for the Commonwealth of Massachusetts, to republish these neat instructions with the illustrations.

## THE BROWN-TAIL MOTH.

The history of the brown-tail moth is as old as the history of economic entomology. When the early scientists began to record the habits of insects injurious to fruit trees this pest was one of the first to be described. It found its way to Somerville.

Mass., in the late nineties, probably on rose bushes imported from Holland, and has now spread throughout eastern Massachusetts, southern New Hampshire and southwestern Maine.

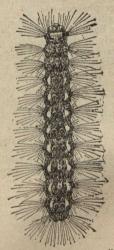

Fig. 2. - Full-grown caterpillar.

The first outbreak of the brown-tail moth covered only a few square miles in Somerville and Cambridge. It was sufficient, however, to yield a swarm of moths which flew, or were drifted by a high wind over a wide territory. As the female moth is a strong flyer its spread has been rapid. In addition to the effect of the wind, the insects are also strongly attracted to light. It results, therefore, that a swarm of moths arising from any infested spot and being drifted by the wind out of their immediate environment fly to the nearest mass of lights. Thus the centres of cities and towns become first infested, and here are established the colonies from which a more general infestation takes place. Electric cars, railroad trains, and even steam-boats, serve infestation takes place. Electric cars, railroad trains, and even steam-boats, serve to transport the moths. The writer has repeatedly seen them, attracted by the lights, enter into the street or steam cars and be carried for miles. The rapid spreading of the insect indicates that within a few years it will be well distributed throughout New England England

#### LIFE HISTORY.

The brown-tail moth lays from two hundred to four hundred small globular eggs, thickly covered with a mass of brown hairs from the tip of the abdomen of the moth.

Fig. 3.- Female brown-tail moth,

The typical egg mass is about two-thirds of an inch long and about one-quarter of an inch wide. While the eggs are occasionally deposited on branches or trunks of trees, or even on lamp posts or house walls, a very large majority are laid on the under surfaces of the leaves of fruit and shade trees. The moths show a strong liking for pear trees, and will apparently seek out trees of this species in preference to any others. At the same time the apple, elm, wild cherry and white oak are very commonly infest-

ed by the insect, while other trees suffer to some extent.

The eggs, laid in July, hatch the following month, and the young caterpillars, feeding in the mass, soon commence their work of spinning their winter webs. In making this web, a number of leaves in the vicinity of the egg clusters are drawn together and are carefully spun in with a tenacious silken web. With the approach of cold weather the caterpillars enter the web and close the exit holes. We then have the strange phenomenon of a caterpillar wintering over when only one-quarter grown and emerging the following spring to complete its life history. Whatever extremes of cold we have in Massachusetts do not seem to affect these insects adversely. They emerge early in the spring, eat first the buds, then the blossoms, and attack the foliage of fruit trees as soon as it develops. The full grown caterpillar is light brown with a white stripe on either side and about two inches in length. Stripping the foliage of one tree they march to another, and so continue until full grown, when the cocoons are spun within the leaves at the ends of the branches, or sometimes on the tree trunks. The pupation usually takes place the latter part of June, and the moths emerge from the first to the twentieth of July. The snow-white female moth is conspicuously marked with an enlarged tuft of brown hair, which gives to the insect its common name.

#### NETTLING BY THE CATERPILLARS.

The damage by the caterpillars to the fruit trees is only a part of the story. Whenever these insects come into contact with human flesh they produce a most severe

Fig. 4.—Pruning shears suitable for removal of winter webs.

and painful nettling. This is apparently not due to any poisonous material in the hairs, but rather to the finely barbed and brittle hairs themselves. So severe is this affect

tion that in many cases people have been made seriously ill by it. The best remedy for it is the liberal use of cooling lotions, or, what is more satisfactory, even if less pleasant, the free use of common vaseline.

#### REMEDIES.

The habit of the caterpillar in wintering over in webs at the tips of the branches gives a key to the simplest and cheapest remedy, which is merely to cut off and burn the webs during the fall, winter or spring. This preventative means is most effective, and gives such excellent results that in Germany, France and Belgium there is a law making it obligatory on property owners to destroy the webs during the winter season. Where citizens neglect to carry out this work it is done for them by local authorities, and the sum thus expended added to their tax levy.

Winter Work.—The work of removing the webs is best done by the use of a longhan led tree pruners or similar device. Particular care should be given to gathering the webs and burning them, as any left on the ground will yield caterpillars and con-

tinue the infestation locally.

Spraying.—Spraying is very effective against these insects; in fact they are much less resistant to the action of poison than is the gypsy moth or elm leaf beetle. To secure best results, spraying should be done as soon as the foliage develops in the spring. Five pounds of the arsenate of lead paste to one hundred gallons of water is sufficient, or, if preferred, one pound of good Paris green kept well stirred may be applied in one hundred and fifty gallons of water.

Where the caterpillars swarm from trees along fences or on house walls the use of kerosene emulsion or strong soap suds is advisable. Fall spraying with arsenate of lead is also effective, but the feeding of the caterpillars at that time of the year is usually of miner importance.

is usually of minor importance.

Little good can be done in the way of collecting the eggs or trapping the moths by light, although many of the mature insects are destroyed by arc lamps. no method of combatting the brown-tail moths that will give better results for the outlay than the destruction of the webs in the winter season. Cases will arise where the caterpillars swarm from adjoining estates, and where this occurs banding the trees with some sticky material, as heretofore described, will protect the foliage from harm.

## NATURAL ENEMIES.

Like the gypsy moth the brown tail moth is attacked by numerous parasites and by certain birds, but the latter do not appear to take to it as readily as to the former insect. Of the birds, the cuckoos, vireos and orioles are most helpful, while English sparrows eat many of the winged moths. The garden toad also does its part in feeding first on the migrating caterpillars and later on the moths as they fall injured from the street lights.

A. H. KIRKLAND.

Boston, March 1, 1905.

[From "Nature Leaflet No. 26," published by the State Board of Agriculture of the Commonwealth of Massachusetts, U. S. A.]

#### THE GYPSY MOTH.

The gypsy moth, a well-known European insect pest, was brought to America about 1868 by Prof, Leopold Trouvelot, for use in his experiments on silk-producing insects. Accidentally exercise it the woodland near Professional Control of the control about 1800 by Prof. Leopold Trouvelot, for use in his experiments on silk-producing insects. Accidentally escaping, it spread gradually in the woodland near Professor Trouvelot's home at Medford, Mass., and, becoming acclimated, soon developed into a first-class enemy of fruit and shade trees. By 1888 the plague of the gypsy moth caterpillars had become notorious, and in 1890 the State commenced its work against the insect. This work, at first carried on by a commission, but principally by the State Board of Agriculture, resulted in bringing the pest under control, and by 1899 so few moths could be found and so little damage was caused by the insect that the so few moths could be found and so little damage was caused by the insect that the Legislature of 1900, probably not realizing the necessity of continuing control measures, stopped the work. The few moths left in 1900 have now multiplied to such an extent that the caterpillar plagues of 1888-90 are duplicated each summer over a much

13

Fig. 1. — Female gypsy moth.

larger area in eastern Massachusetts. Since these insects kill trees and shrubs by repeated defoliations, not to mention the annoyance caused by the invasion of houses.

Fig. 2. - Male gypsy moth.

by the swarming caterpillars, it is important that property owners should familiarizethemselves with the appearance and habits of the moth and the best means for destroying it in its various stages of development.

## LIFE HISTORY.

In July and August the female moths lay their yellow, hair-covered egg masses on tree trunks, fences, walls, etc. Each egg cluster is about one and one-half inches in length by half an inch in width, and contains about five hundred eggs. Hatching takes place in April or May. The young caterpillars first attack the buds, and later the blossoms and foliage. Spinning down on silken threads, they are blown.

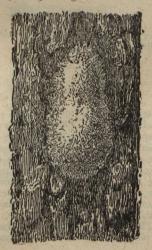

Fig. 3.—Egg cluster of gypsy moth,

about by the wind, or, falling on teams, are often transported long distances. As they grow, the effects of their feeding become more apparent, and badly infested fruit trees, shade trees and woodland are soon as bare of foliage as in mid-winter. By July the caterpillars change to pupæ, from which the moths emerge in the course of two weeks to lay eggs for the next year's brood. The cuts accompanying this article fully illustrate the appearance of the moth in its different stages.

#### DISTRIBUTION.

Teams, automobiles, electric cars, etc., are the principal means of spreading the moth. The female moths do not fly, and the caterpillars seldom crawl over two hundred feet; but each infested spot, early in the spring, yields a swarm of tiny cater-pillars, which by the agencies mentioned spread locally, or even to considerable distances, the main spread being, of course, along the principal lines of travel.

### FOOD PLANTS.

The gypsy moth caterpillar is remarkable in that it attacks nearly all our common fruit and shade trees. The apple, oak and willow would seem to be slightly preferred, while the white ash and rock maple are attacked to a less extent. Garden vegetables,

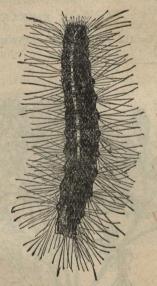

Fig. 4. - Full grown caterpillar of the gypsy moth.

flowers and shrubs are consumed as readily as the foliage of fruit trees. Pines and other conference trees trees to be decided to the decided to the conference trees. other coniferous trees die as a result of one defoliation, while deciduous trees seldom survive stripping three years in succession.

## REMEDIES.

Egg Destruction.—This is best accomplished by searching out the egg clusters in the fall, winter or spring, and soaking them with creosote mixture. This preparation may be found in the seed stores, and retails at from seventy-five cents to one dollar per gallon. In applying it a small paint brush is used, it being important to thoroughly soak the nests.

Burlapping.—When a loose band of burlap or other cloth is tied about an infested tree trunk, the caterpillars will gather under it in the early morning, and may then be destroyed by hand. The burlaps should be examined daily.

Spraying.—Spraying with arsenate of lead at the rate of ten pounds to one hun-

dred gallons of water is very effective when the caterpillars are small. Any of the

common hand outfits will suffice for the spraying of shrubs or flowering plants. For use on trees a barrel pump is desirable. The poison should be thoroughly mixed in water, and applied, if possible, on a clear, dry day.

Cutting and Burning.—In woodland infested by the moth it is usually desirable to thin out the trees and cut the underbrush. The brush so obtained should be burned early in May, after the caterpillars have hatched. If this work is followed by spraying the problem of the problem of the problem. ing and burlapping, the moth can be brought under control.

Several professional foresters now make a business of destroying the moth on

private estates. Where property owners do not have the necessary appliances, the

services of such experts can usually be obtained at a moderate expense.

#### NATURAL ENEMIES.

While the gypsy moth is a serious enemy of trees, it has its own foes in the shape While the gypsy moth is a serious enemy of trees, it has its own foes in the shape of predaceous insects, parasites and birds. Several ground beetles prey on the caterpillars, while true parasitic insects attack both larvæ and pupæ. Several species of birds, notably vireos and cuckoos, consume large numbers of the caterpillars, while others, like the chewink, chickadee, blue jay and crow, do their part in reducing the numbers of the pest. The services of these natural tree protectors is worthy of high praise, but in attempting to control the moth the main reliance must be placed on human filters on the timely and thereugh application of the remedial means the placed on human efforts, on the timely and thorough application of the remedial measures outlined above.

A. H. KIRKLAND.

Boston, November 1, 1906. From "Nature Leaslet No. 27," published by the State Board of Agriculture of the Commonwealth of Massachusetts, U. S. A.]

The accompanying cut which we owe to the courtesy of "The Farmer's Advocate," London, Ontario, represents somewhat the shape of the yellow-rayed heads of the "St. James" or "Tansy" Ragwort, which form a flat-topped cluster of flowers of a brilliant yellow above a wealth of green leaves, the large basal ones of which are not represented in the figure. The rays are not exactly in true shape and proportion in the figure.

Owing to the pressure of work in the Education Office this Fall, the Phenological Observations from the schools of the Province have not yet been looked into, so that the range of the plant throughout the province cannot be exactly given. In the April Jour-

A Ragwort.

NAL we hope to overtake this work, and publish the usual summary, with

the range of Senecio Jacobæa.

In Pictou County, the Corresponding Secretary of the East Pictou Woman's Council, reported a fund of \$100 to be offered as prizes to school pupils for exterminating the weed, and hoped the County Council would offer a similar amount. From notes in the Eastern Chronicle, the most alive of our provincial newspapers, some progress must have been made in this not only useful but necessary work. There really should be municipal, if not provincial officers, whose duty it would be to cut down or otherwise destroy any weeds or trees spreading disease, charging the expense to the individuals or parties responsible for allowing their growth. Some new and effective legislation is necessary.

In milch cattle one of the first symptoms of Senecio poisoning is a putrid odor from the milk, especially distinct when hot water is poured into some in a cup. Near Halifax, some beautiful Jerseys were the other day seen grazing in a pasture between luxuriant clumps of the ragwort. It is quite time that the milk users in our towns and cities should have official inspection of the source of their milk supply. It concerns them just as much as the rural milk users and sellers, who may first have to use or sell unwholesome milk, and later, lose their poisoned cattle. For a fuller account of the origin and character of this poisoning, see Dr. Pethick's report on the "Senecio, (Pictou) Cattle Disease," published by the Department of Agriculture at Ottawa. A very few of the more progressive

newspapers have published it in full.

Mr. Malcolm Blue, Post Master at Valley Mills, in Inverness County. reports that it is extending into the Cape Breton counties, via., Orangedale and Marble Mountain. It has been reported seen lately near Whycocomogh and even at Upper Glencoe. It will never be more easy to eradicate than now. Twenty years ago it would have been compara-In a few years it is likely to spread to every part of the tively simple. From Dr. Pethick's reports, teachers can get an idea of what it has already cost Pictou, from which it can be inferred what it will cost the province if allowed to freely spread. The teachers may create a sentiment which may develop into a law against all spreading noxious weeds and other serious disease disseminators before the people are moved to act by heavy loss.

## NEW SCHOOL MAPS.

George Philip & Son, 32 Fleet Street, London, England, the great map publishers, have just issued a map of Canada and Newfoundland in their series of "Comparative Maps." They are constructed to give greater prominence to the physical features, the land elevations and sea depths, being shown by graduated shades of color. They also publish them with coloring showing the political divisions. No map makers have any higher approval from geographical authorities; and the prices are especially reasonable.

## AMENDMENTS OF REGULATIONS

## PUBLISHED ON PAGES 4 TO 27 PRECEDING.

REG. 98 (c) (1) is modified so as to allow any candidates for the old "A" to present themselves for examination in July, 1908, as during the past year.

ent themselves for examination in July, candidates for the new as well as for Reg. 98 (c) (4) is modified by requiring candidates for the new as well as for REG. 98 (c) (4) is modified by requiring contained to the new as well as for the old "A" to report to the Superintendent of Education their intention to apply the old "A" to report to the Superintendent of on or before the middle apply for the particular examination at certain stations, on or before the middle of January.

for the particular examination at certain stations, on of better the middle of January. The new course is provisional, and may be modified after fuller consideration.

The terms A (preliminary) and A (final), or XII (preliminary) and XII (final), are meant to convey the idea that a candidate cannot be admitted to the grade XIII are meant to convey the idea that a candidate cannot be aumitted to the grade XIII or XII (final) examination without first passing the grade XII (preliminary) examination, or its equivalent as specified in Reg. 98 (c). In 85 (b) erase the words "or XIII," in the fifth line of page 5.

The paragraph in Regulation 110, relating to the exemption of Honor graduates in Universities from a Normal course, cannot go into effect until the C. P. I., recognises the Heisenstein and its course after due investigation.

the University and its course after due investigation.

REG. 154 (8) does not refer to Licenses issuable on the old "A" examinations, which must be accepted for Licenses as in 1907 up to 1909,
In grade IX, English (a), insert after the words "English Composition as in Sykes," the words "to page 101."

In grade XI substitute the following for subjects 5 and 8 respectively:—
5. Physics:—As in Gage's Introduction to Physical Science (For 1908 examination, the Chapters on Sound and Light to be omitted; for 1909, the Chapters on Electricity

to be omitted; and so on alternately).

8. Geometry:—Hall and Stevens' Euclid, Books III. and IV. with all included

exercises, and the theorems and examples" italicized following each Book from I to IV.

In grade XII (prelim.) for "DeVigny's Cinq Mars," candidates may substitute "LaBruyère's Les Caractères" (MacMillan).

In grade XII (old "A") candidates can substitute for "Sanitary Science" now out of print "School Hygiene and the Laws of Health" by Charles Porter, (Longmans, Green & Co).

REGULATIONS OF C. P. I. FOR CONSOLIDATED SCHOOL SECTIONS WHICH WERE BENEFI-CIARIES UNDER CHAPTER 22 OF THE STATUTES OF 1903.

Ordered:

(1) That in the case of consolidated school sections which received the special Provincial Grant under Chapter 22 of the Statutes of 1903, the conveyance of pupils shall be from points more than two and one-quarter miles from the school house, to a point which will afford such pupils the advantages as to distance enjoyed by those not more than two miles distant, and must be satisfactory to the Inspector of Schools.

(2) Under no circumstances shall it be deemed necessary to convey such pupils further than to and from a point within one and a half miles of the school, or the same distance towards the school in the morning, or the same distance towards the pupils'

homes in the evening, as can be most economically arranged.

(3) The Trustees of the Section will endeavor, as far as compatible with the regulations of the C. P. I., to meet the reasonable desires of parents and pupils in the arrangements and equipment for the said conveyance, any point of difference to be

referred to the Inspector for decision.

(4) The Trustees in making arrangements for conveyance, shall take the ordinary precautions to have as satisfactory service as possible, at the most economical rate of cost to the section. It is recommended when it may be found expedient, to grant allowances to parents or guardians for the conveyance of their children or their neighbor's children, in which cases the sectional school tax or any portion of it may be remitted to such parties by the Trustees, as a part of such allowance agreed upon.

(5) Generally it may be found most convenient for Trustees to call for tenders

for conveyance along certain definite routes at definite times, with a definite equip-ment, under the oversight of responsible drivers or other parties, in order to ascertain when possible, with equally satisfactory conveyance—all arrangements for which are subject to the approval of the Inspector. the cost, but Trustees should keep themselves free to make cheaper arrangements

That the power conferred upon Boards of School Commissioners by Sec. 17 of the Education Act, with respect to ordinary school sections, be recommended. to be applied to distant and isolated ratepayers in Consolidated sections, due regard, however, being paid to the object for which Consolidated sections have been established.

(7) Only resident pupils of the school section from 7 to 14 years of age are to be conveyed free, but other pupils may be carried on the payment of a reasonable fee which will not allow their conveyance to be at the cost of the school section, unless provision had been made for conveying such pupils at the annual meeting of the school section.

(8) All previous regulations inconsistent with these are hereby repealed.

DECISIONS OF THE COUNCIL OF PUBLIC INSTRUCTION ON SOME LIMITATIONS OF THE POWERS OF SCHOOL TRUSTEES.

1. School trustees have power to rent temporary school rooms when there is not sufficient accommodation in the public school rooms; but they cannot use for publicschools, rooms which are not, for the time, completely under their control for schools purposes, so that they can be held responsible for the character of the accommodation which must be in accordance with law.

2. School trustees cannot vacate a public school room for any other room except in order to have it repaired, providing it should be deemed capable of repair; or for some sufficient reason affecting the school section as a whole, such as to secure better grading, but not to suit the desires of individual parties or sects.

Any arrangement of school rooms which may (1) prevent the exercise of supervision by the principal teacher of the school section; or (2) prevent the efficient grading of the departments in charge of such teacher, is not compatible with the spirit of the school law. If either of these irregularities exist, and continue after notification by the Inspector, the schools cannot participate in the public grants.

4. It is legal for pupils in a section with only a few departments, which cannot have,

therefore, more than one series of grades to meet for devotional exercises in another, room than the one in which they are registered for the work of the grade, the arrangements for exchange to be co-ordinated by the principal so that there may be no confusion or unnecessary loss of time.

## SCHOOL LIBRARIES (RURAL).

It should be noted that notice of the intention to compete for a rural library grant should be given the Inspector in the notice of the opening of the school.

For the FIVE dollar grant, this year, the value of the books must be FORTY ars. [See regulation 173 (1) in previous JOURNALS]. For the TEN dollar grant the value of the books must be at least EIGHTY dollars:

## SCHOOL LIBRARIES (SUPERIOR).

All the schools whose Principals are receiving more Provincial Aid than that of the regular "B" grant must have a school library as one of the conditions of the advanced grant. This applies to the County Academies as well as to the other high schools. No condition determining the minimum circulation of the books of such library is required, however; but each such school has to report the statistics of each library on the regular form, for otherwise the Education Department cannot make a report on the libraries of these schools. When the Superintendent is going to the trouble of collecting such statistics for the information of the public, as is being done in other progressive countries, the principals of the schools receiving these superior grants will not wish—when they think—to give the Department any additional labor in getting the facts from them.

## PHYSICAL EXERCISE AND MILITARY DRILL.

The Department of Militia and Defence at Ottawa, proposes to aid the continuance of male teachers in the profession by giving a special bonus to those who take the higher certificate for competency, and drill their own cadet corps. From \$50 to \$100 for such training work, added to the increased Provincial grant about to be made, and the retiring annuities provided, show that the Provincial and Dominion Governments are desirous of having not only a worthy teaching profession, but of contributing as much as possible to the financial support necessary. If the school sections now do their duty to the schools, as the people themselves do to each other in trade and wage, the schoolmaster with even more than his old time force and influence may continue to remain more comfortably in the profession.

The proposed scheme will introduce nothing new to the Nova Scotian school system, except, (1) a bonus to male teachers (especially if they become militia officers, for which facilities will be given) to do advanced work among pupils of high school age; (2) a text book for the exercises which have for several years been prescribed in Nova Scotia, although not very efficiently carried out except by the later graduates of the Provincial Normal School; and (3) the obtaining of a certificate of the lower grade of competency by every teacher above the third class, for which facilities will be given at certain centres in addition to those provided at the Normal School. Courses of three weeks may be given during the summer holidays at the Vacation School in Truro and the Summer School of Science for the Atlantic Provinces, for teachers who have already been licensed without being trained to give proper physical drill in school.

The higher grade of training (Military A) is at present done very effectively in the Rifle Cadet companies of the high schools at Halifax, Yarmouth and Middleton, which in 1906 reported a strength of 290. Additional companies have been formed since at other populous centres, but there has been hitherto no arrangement to bonus the teacher.

The lower grade of training (Military B) is now required, as said above, in every school, as the following regulations have been in force for several years, and are printed in every register on every teacher's desk:—

Physical Exercise and Military Drill.—Physical exercise should be given for a few minutes in the middle of every session over one hour in length. At such times it is beneficial even to pupils who have walked a long distance to school and who are accustomed to active work at home. The younger the pupils the more often such exercise should be given, in order to maintain physical restfulness and mental activity during the time for study. These exercises should always be made the occasion of training the pupils to maintain the most healthful and graceful position of the body in sitting, standing and moving. This training is as much the duty of the teacher as the other work of the school.

Military Drill is the latest result of the experience of generations of practical men in devising the most effective manner of training numbers of men to move in the most convenient order and under the fullest control. It is, therefore, particularly adapted to the movement of pupils in all schools, for girls as well as boys. Apart from other considerations, the fact that the children from various schools are often likely to be massed together, makes it desirable that the same system should be followed exactly everywhere. The best system, and that which is most likely to be useful in the widest extent, is the standard modern military drill. All teachers are required to make as practical an acquaintance as possible with the system of military drill at least as far as "squad drill," and to have their pupils drilled to stand and move smartly. Inspectors are directed to mark no school work under this head, no matter how good, higher than "fair," unless he has had an opportunity of observing the Military drill.

The text book proposed is cheaper than the one hitherto recommended. It is the one used in the schools of Great Britain, price nine pence. The drill throughout Canada and Great Britain would thus be identical. The title of the text is "Syllabus of Physical Exercises for use in the Public Elementary Schools." There is nothing of military drill in this course, except the marching and turning movements of the children. The rest is physical culture with clearly figured illustrations.

It is certainly better to have one uniform system, the one found to be the best after years of extensive and careful trial, than an infinity of

different systems based on the caprice of individual teachers.

This physical drill is desirable for all who would have healthy, well-poised bodies. It is as necessary for girls as for boys; for those who are to be our future workmen as for those who are to fill the professions. In fact it will as a rule be more useful to the physically laboring classes where so much advantage is obtained by a well developed physique and so much respect is inspired by a manly bearing.

It will have the tendency to prevent the growth of that vain sentiment called "militarism"; for it will develop an accurate, thoughtful

and painstaking habit. It is the people who have not felt the responsibility suggested in all such training who are likely to create irritations provoking foreign war. The cool, well trained cadet, who knows he will be in the front in any such dire emergency, will never be found in the mobs defying the powers and breaking the windows of unprotected people. They will always be the guardians of order and propriety—true citizen soldiers-neither mercenary warriors nor howling rioters. The workman, more than any other class, will be benefited in his student days by the exercise; and if in the inscrutable course of the future our country should ever have to sound the bugle in alarm, it is likely to be for the cause of our workmen. In nearly every country at the present moment, it is room and sufficient employment for the masses which dictate the policies of governments and their commercial treaties; for if the people cannot sell enough of the products of their labor to live, their rulers will be swept off by revolution in a mad struggle for life. It will then be as in the days of old, the starving hordes will invade the happy countries or perish in the attempt.

Below will be found the outlines of the scheme under consideration; and the views of any one interested will with pleasure be transmitted

by the Superintendent of Education to the Council.

## PHYSICAL TRAINING AND MILITARY DRULL IN PUBLIC SCHOOLS.

1. The Nova Scotia Educational authorities will enforce more generally their existing regulations which prescribe the practice of physical training and military drill in all public schools, and will further adopt a system uniform with that of the other provinces of Canada and Great Britain, suitable to the age and sex of the pupils, and will encourage the formation of cadet corps and rifle practice among the boys of high school age, on the understanding that the Militia Council, on its part, will:

a. Provide competent instructors, at convenient places and seasons, in order to enable teachers, both those now employed in Nova Scotia, and those under training for such employment, to qualify themselves to carry out physical training and mili-

tary,drill; and will also

b. Grant an annual bonus to such qualified teachers as actually impart this instruction, provided that they make themselves eligible for this bonus by becoming members of the Militia Force.

2. As regards the instruction of the teachers already employed, there appear to be four centres, at or near which a sufficient number of teachers are employed to to be four centres, at or near winen a summent number of teachers are employed to enable classes to be formed and carried on in the evenings, without interference with the ordinary day's work, viz:—Halifax, Sydney, Truro, Yarmouth, and possibly a fifth at Pictou or New Glasgow or Antigonish, may be added. Each course would be followed by an examination.

3. For the benefit of the large number of teachers working out of reach of these centres, it was agreed that instruction might best be provided during the summer vacation, either at the Vacation School held at Truro, or at the Summer Science School of the Atlantic Provinces, wherever held. It is proposed in these cases to hold two courses of three weeks each, at each place, followed by an examination. The Militia Department will provide the Instructors required, dates and

places being settled by agreement with the Education Department of Nova Scotia.

5. In order to provide for the instruction of those students who are qualifying to become teachers, the Militia Department will also provide a competent instructor to conduct a course of Physical Training and Military Drill at the Normal School, Truro, dates to be hereafter arranged with the Education Department.

In future the Education Department will, before granting a teacher's license higher than third class, require a certificate of competency to instruct in Physical Training and Elementary Military Drill. This certificate, grade B (military), will, if desired, be issued after examination by the Department of Militia and Defence.

The Education Department will within three years from the close of the present school year, give an opportunity (as in 2 and 3 above) for all teachers above the third class who have been licensed without the certificate of grade B (military) to obtain this lower certificate, so that no school of higher grade than third class need bewithout a teacher competent to give the prescribed physical drill effectively in all the departments of the school.

The certificates issued will be of two grades:-

Grade A (military) will represent competency to instruct in both Physical Training and advanced Military Drill, including rifle shooting, and will be issuable to maleteachers only, upon their passing a satisfactory examination after a course of instruction carried out at, or under, the supervision of a Military School of Instruction.

Grade B (military) will represent competency to instruct in Physical Training

and Elementary drill, and will be issuable to teachers of both sexes.

The Militia Department will pay the annual bonuses referred to in paragraph. I b to those teachers only who hold Grade A (military) certificates and actually instruct the pupils, and are in addition Officers of the School Cadet Corps or members of the

Under the existing regulations for Cadet Corps, the Department of Militia grants to Instructors of Cadet Corps who are on the instructional staff of the School or College concerned, and who attend and obtain a qualifying certificate at any of the Infantry Schools of Instruction, the same transport and allowances as are paid to officers of the Militia for similar attendance.

The annual bonuses will be paid upon the certificate of an Inspecting Officer of the Militia that the instruction imparted is satisfactory.

10. The Militia Department will draft a syllabus of the work required to be doneby a School or College Cadet Corps in order to entitle a teacher to the annual bonus, and will conduct the necessary examinations. Until Cadet Corps possess in the officers. qualified instructors, this work of instruction will be carried out by instructors detailed by the Military Department, so far as practicable.

The new system will, so far as possible, be brought into force on August:

1st, 1908.

The system of Physical Training adopted, should be such as to lead on naturally, without change, to the system of drill in force for the Canadian Militia. With this object the Syllabus of Physical Exercises in use in British Elementary Schools will be followed, for the present at any rate. It will be supplemented for more advanced training and rifle practice by the official "Infantry Training" in use by the Canadian Militia.

The instruction given in the schools will be such as is suitable to the age and phy-

sical condition of the pupils.

13. The Department of Militia will be prepared to supply for the use of Cadet Corps, belts, caps (if desired) a proportion of arms and ammunition, and in addition drill books for the more advanced training. Uniforms if worn, must be supplied by the schools themselves.

14. The amount of the bonuses to be paid by the Department of Militia and

the minimum number of boy members necessary to enable a Cadet Corps to be formed (upon the instruction of which the grant of the annual bonus depends) will be fixed after discussion between the Department of Militia and the Education Department of

It is expected that those who will take the trouble to understand what is proposed to be done, will find it to be desirable in the interests of the health and power of the individual pupils, as well as in the interests of the general well-being of the state. The most highly qualified modern of the general well-being of the state. opinion of medical science and of the thoughtful and responsible press of the country urge us to delay no longer. As a type of the former, read the extract from the last Presidential Address of the British Medical Association, reprinted on pages 173 to 175 preceding.

From our own press, read the following words of the sanest and. soberest daily of Canada, when commenting on "Schools and Morals," and on the destructive and disgusting pranks which characterise the socalled humor of the silly, witless cads who now-a-days make the loudest

noises around many of our universities:-

There is one moral influence apparently looming over our school system which bears closely on the view so earnestly set forth by these writers. It is the proposed encouragement by our Militia Department of physical training, both for boys and big hly. girls, in all the schools of the Dominion. As we have said before, we cannot too hig hly;

commend this broad view of what is best to be done to fit our country for defence. Since the 'Witness' began to advocate the use of the schools for that elementary training which would give the country in time of emergency an army almost readymade—semi-ready, as the clothier says—without the cost and demoralization of maintaining one and at great advantage to our school system, the idea has gained ground very rapidly. We may hope yet to see used as a powerful stimulus to the consolidation and grading of schools some small part of the funds which would otherwise be spent on the maintenance of a force which all earnestly hope will prove unnecessary. The introduction into the schools of military exercises, or exercises for physical development. opment subsidiary thereto, would go a long way, if well managed, to associate amusement and physical effort in the minds of children with obedience to rule and with public duty-. Montreal Witness, 29 Oct., 1907.

## COMMENTS.

The Provincial Advisory Board of Education met in Halifax from the 12th to the 20th of August. Their recommendations to the Council of Public Instruction were considered as promptly as possible, and those approved were printed and published as soon as possible. The extraordinary pressure of unexpected problems on the Education department would prevent the earlier issue of the Journal even were the printer not also crowded.

The delay has had the advantage, however, of enabling some of the later decisions of the C. P. I., to be announced. The first two forms of sixteen pages each, were published early in September, with the changes

above referred to.

It should be remembered that the Superintendent is not a member of the Advisory Board, and is not even present at its sessions. He receives its final report as Secretary of the C. P. I., to which he presents it for consideration and final action. The Superintendent will be glad, however, to present to the members of the Advisory Board any views

transmitted to him for them, if so requested.

The Superintendent regrets the inconveniences to which the sudden changes this term put many teachers and pupils. He trusts he may have their sympathy when they learn that he has suffered more than the worst used individual among them, himself. These accidents, however, are not made any worse by bearing them patiently. The increased correspondence, the doubling of the numerous and tedious "A" papers, the compiling and printing of which are much more serious than people think, the new technical developments, in addition to the normal crop of routine reports and difficulties always arising, will keep our work for the next year at high pressure. Correspondence, brief, clear and exactly to the point, will therefore be highly appreciated, when correspondence TEACHERS' INSTITUTES. is necessary.

This school year is the year of Institutes. Next Fall will be the regular time for the meeting of the Provincial Educational Association. A large union (normal) Institute for the Eastern Counties of Nova Scotia was held at Antigonish from 22nd to the 26th, October. A series of small Institutes are being held at different points in Colchester County, by the new Inspector.

## INSPECTORS' BUREAU OF EDUCATION.

Our Inspectors are making strong efforts to supply every school section with a teacher. They are, therefore, interested in knowing the addresses of teachers who desire a school. Teachers, therefore, will not be considered as imposing on an Inspector, should they send them as early as July or August or later, a card with their address, class of License, scholarship, experience, and the class of school preferred; provided they promptly notify each such Inspector as soon as they are engaged. Such notices might be repeated a few months later to any Inspector within whose division the candidates would be willing to teach, were a suitable school to be had. Unlike other bureaus, this one will charge no fees for placing a teacher; and both Inspector and teacher may consider themselves mutually favored by any such simple system of correspondence.

## AMOUNT LEVIED ON SCHOOL SECTION.

It has been discovered that in one of the Cape Breton Counties some school returns contained a serious error without being detected by the Inspector when summing up the estimates. The error was probably unintentional, and due to a faulty procedure at the annual meeting. It appears that some local authority thought it good form to allow the vote at the Annual Meeting to include the municipal fund—the difference between the vote and the Municipal fund when received being the amount levied on the section. This is wrong in form, and is probably responsible for the entry of "this Vote" as the amount levied on the section.

The amount voted at the Annual or special meeting is the amount, plus the collection percentage, which must be levied on the section. And in the return, the amount actually to be levied on the section must be exactly stated. Teachers when filling in column 146 on page 9 of the register, should make clear to the Secretary what the amount asked for is. If there is an error in this or any other statistics, the Inspector must promptly return the document for correction; and the teacher as well as the School Board will be held responsible for their errors, which if repeated should disqualify them thereafter for teaching or acting as Secretary.

## CENSUS OF SCHOOL SECTION.

In order to know accurately the number of pupils in the section who have not attended school, which is one of the important items of information which school trustees have to discover and report in the *Annual return*, a house to house visitation has to be made.

In Amherst for several years, Principal Lay has combined this work with a more or less general census of the town, in its way perhaps more accurate than the official census, because conducted by a highly compet-

ent officer.

In Stellarton last year, the late principal, Mr. J. W. McLeod, did similar work; a very large amount of other valuable information being obtained. So valuable was the light thrown upon the growth of the town and its population, that it suggests that the same plan would be

deemed so valuable in every community were it known, that a small grant would be annually voted in order to aid in making a local annual census a regular annual institution. Wherever there are people intelligently interested in the development of the community, such information would be highly appreciated; and it can be obtained with little more effort than is required for the one item now required before the section is entitled to receive a public grant.

## PRESENTATIONS.

#### STEAM NAVIGATION.

Mr. James Croil, of Montreal, one of Canada's great veteran editors and authors, after spending a few weeks holidaying in Nova Scotia. kindly presented one hundred copies of his history of "Steam Navigation" to the public schools making the most commendable efforts in establishing school libraries. The volume contains nearly 400 hundred pages, is well bound within ornately gold stamped covers, catalogued at \$1.50, and even their expressage from Montreal to Halifax was pre-paid. This province figures well in it. The neat plate next to the frontispiece is a facsimile of the memorial brass ordered by the Parliament of Canada commemorating the first steam voyage across the Atlantic in 1833. It was the Royal William which steamed from Pictou on the 18th of August of that year, arriving at Cowes, Isle of White, England, nineteen days and a half later. There are numerous illustrations of the early steam vessels, some of them with very curious episodes, and of the Nova Scotian, Canadian and foreign pioneers of this, now, tremendously vast industry. The awards of the volumes to the schools were made on the reports of the Inspectors. Mr. Croil's public spirited deed has evoked the thanks of the Education Department of the Province; but the knowledge of the satisfaction he will thus continue to give to many thousands of the young people of this Maritime Country for many years to come, is what he will most enjoy. FARM WEEDS OF CANADA.

This is another valuable presentation to the more commendable school libraries of the Province, in the agricultural districts, on the reports of the Inspectors to the Superintendent of Education, from the Department of Agriculture at Ottawa. George H. Clark, B. S. A., Seed Commissioner of Canada, aided by Dr. James Fletcher, F. R. S. C., and the artist, Mr. Norman Criddle, are to be congratulated on one of the most interesting and good looking publications of the Dominion Government.

The volume is nearly 9 by 12 inches with a hundred pages of descrip-

The volume is nearly 9 by 12 liteles with a litelest pages of descriptive letterpress, and 56 magnificent full page figures in natural colors, which make the plants as clear to the unscientific farmer as to the botanist. About two thirds of the plates, figure weeds found already in Nova Scotia. The natural history and best mode of treating each

are very plainly given.

#### PUPILS' SCHOOL CORRESPONDENCE.

Teachers who wish to have their pupils linked in correspondence with pupils in other parts of the Empire, can be put in the way of doing so by communicating with

MRS. ORD MARSHALL, Hon. Secretary "League of the Empire," Caxton Hall, Victoria St., Westminster, S. W., London, England.

The League of the Empire is the most convenient institution through which to get into touch with other schools for general school correspondence, nature study

correspondence, etc., as intimated in previous Journals.

The Federal Magazine which is the Monthly Record of Work of the League of the Empire, containing notices of all prizes offered to schools, etc., can be obtained through the same address, for the subscription price of three shillings per annum.

## A NELSON VICTORY SHIELD.

containing some of the copper from the old famous battleship "Victory," of Admiral Lord Nelson, to which Lord Strathcona contributed £1,000, to enable them to be offered to schools as prizes, can be obtained through Mr. Edward W. Matthews, Secretary, Passmore Edwards Sailors' Palace, London E., England. This institution was originated to aid the British (Canadian) and Foreign Sailors' Society. It is mentioned here because the smallest school can obtain this beautiful burnished Copper shield for no more than one dollar, which will be accepted as a contribution to the Society.

#### LORD MEATH EMPIRE DAY CHALLENGE CUPS AND LEAGUE OF THE EM-PIRE PRIZES.

#### ESSAY COMPETITION FOR EMPIRE DAY, 1908.

The following are the subjects and conditions for the Essay competition inter-all-Secondary Schools and inter-all-Primary Schools of the Empire for Empire Day, 1908. Secondary Schools.

Subject:-State and criticise the relation between Great Britain and any Country

or Crown Colony with which you are acquainted.

Conditions:—(Secondary Schools). A Silver Challenge Cup, value £10, 10s., presented by the Right Hon., the Earl of Meath, K. P., to be held by the School, and a personal prize of £5, 5s., given by the League of the Empire, is offered for competition, inter-all-Secondary Schools of the Empire, for an Empire Day Essay not exceeding 2,000 words. Age limit, 14 to 18 years old. Primary Schools.

Subject:—(a) Write a letter to a friend desiring to emigrate, and point out the advantages of any Country, State, Province or Crown Colony with which you are acquainted; (b) or to a friend living in any part other of the Empire, and point out the advantages of coming to settle in the United Kingdom.

Conditions:—(Primary Schools). A Silver Challenge Cup, value £10, 10s., presented by the Right Hon. the Earl of Meath, K. P., and a personal prize of £3, 3s. given by the League of the Empire inter-Elementary Schools of the Empire, for an Empire Day Essay not exceeding 1,000 words. Age limit, under 14 years old.

All the essays must first be judged in the schools, and afterwards by the authori-

ties kindly co-operating with the League in the different countries of the Empire. Only those Essays sent in through the authorized channels will be eligible for the final judging arranged for by the Federal Council of the League in London.

The Essays which are entered for the final judging in London must reach the Central Office by the 1st of February next, and Nova Scotian Essays must be sent to

the Educational Office, Halifax, not later than Jan. 1st, 1908. The names of the winning schools will each year be engraved upon Cups which are

replicas of the Warwick Vase.

The Cups and Prizes will be dispatched in time to reach the winning schools before the 24th May, each year.
