DIRECTORY OF ABORIGINAL EXPORTERS

Directory of Aboriginal Exporters

The Aboriginal International Business Development Committee* is pleased to provide a directory of Aboriginal small - and medium-sized enterprises that are:

- exporting;
- export-prepared; or
- export-oriented.

Federal departmental databases of known Aboriginal businesses have been used to develop this directory. It will be used by Canada's trade network at home and abroad to encourage the participation of Aboriginal companies in federal government international business development activities.

Additional Registrations to this Directory

If you are aware of a firm that qualifies under the categories listed above, please contact:

Department of Foreign Affairs and International Trade (DFAIT)
Export Services for Small and Medium-Sized Enterprises (TSME)
125 Sussex Drive
Ottawa, Ontario K1A 0G2
Tel: 613-944-0634, Fax: 613-996-9265
E-mail: rosi.niedermayer@dfait-maeci.gc.ca

WIN Exports (World Information Network for Exports)

All Canadian companies who are exporting or who have the capacity to export can also register in WIN Exports, the Department of Foreign Affairs and International Trade's (DFAIT) computerized database of exporters. WIN can only be accessed by DFAIT's Trade Commissioners around the world, Team Canada Inc partners and International Trade Centers. It is used to match Canadian firms with international business opportunities. All registrants also receive the CanadExport newsletter, published bi-monthly, with articles on trade issues and export opportunities. To register in WIN Exports call the hot line at 1-800-551-4946.

New to Exporting?

A firm can determine if it is export-prepared through the diagnostic test located on the world wide web at www.exportsource.gc.ca, the site also provides export information sources within each province. If you don't have access to the internet call the Canada Business Service Centre at 1-800-811-1119 for assistance.

* Committee members are comprised of the Team Canada Inc network and other agencies.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing reliable information to stakeholders.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps from initial entry to final review, ensuring that all necessary information is captured and verified.

3. The third part of the document addresses the role of the accounting department in this process. It highlights the need for clear communication and collaboration between different departments to ensure the accuracy and completeness of the records.

4. The fourth part of the document discusses the importance of regular audits and reviews. It explains how these processes help to identify any discrepancies or errors in the records and ensure that the company's financial statements are accurate and reliable.

5. The fifth part of the document provides a summary of the key points discussed and offers recommendations for improving the record-keeping process. It suggests implementing new technologies and training staff to ensure the highest standards of accuracy and efficiency.

CONSTRUCTION

Tron Power Inc.

An English River First Nation Company
Saskatoon, SK

www.TronPower.com

Tron Power's advice to new exporters is: *"Take the politics out of running a business.*

Focus on your professionalism and ensure that the best service is provided to the customer."

What does Tron Power do? Tron Power Inc. got its start in 1985, when a small group of tradespeople and engineers partnered together and combined their many years of industrial construction experience with superior customer service. In 1997, the English River First Nation of Patuanak, Saskatchewan purchased the company. Tron Power serves the mining, forestry and oil and gas sectors. Customers include Crown corporations and international companies.

Joint ventures enabled Tron to partner with the largest providers of underground development and mining services in Canada. The Mudjatik-Thyssen Mining Joint Ventures consists of three separate joint ventures, all in northern Saskatchewan. Fifty percent ownership is split between Tron and seven First Nation and Métis communities. The other 50 percent is held by Thyssen Mining Construction of Canada.

Future goals include the provision of a wide range of top-quality services to Crown corporations, domestic and international industrial and mining projects, and to the oil and gas industry.

What is Tron Power's experience in exporting? Tron continues to work at the Kumtor gold mine in Kyrgyzstan, Commonwealth of Independent States (CIS). Also in the CIS, Tron refurbished a gold mine for International Gold Pool in Kazakhstan. Tron hopes to expand its international presence through its upcoming Tron/Casa Gari Joint Venture. Tron/Casa Gari's ownership will be shared equally between Tron and Casa Gari. Casa Gari is owned by the Garifuna people, an indigenous Honduran group who shares Tron's objectives of economic commercial development for their people. The company will pursue Hurricane Mitch reconstruction and other construction opportunities in Central America.

Kitsaki Meats Ltd. Partnership

La Ronge, SK

Kitsaki Meats Ltd. Partnership's advice to new exporters is: *"We strongly recommend that you enlist the aid of an experienced firm to assist you with exports, as the traditions and customs vary from country to country."*

What does Kitsaki Meats Ltd. Partnership do? Kitsaki Meats produces meat snacks that are sold across Canada under a variety of private labels. It is one of only a few federally inspected meat plants in Saskatchewan and the only one in northern Saskatchewan. The plant smokes, processes and packages a wide range of products, including natural jerky and ground and formed jerky, in both individual sticks and bulk packaging. The company also sells its own Northern Lights Brand of meat snacks.

The retail meat division supplies fresh meat to a variety of customers across northern Saskatchewan. Better quality food at lower prices is one of the benefits that Kitsaki has brought to the region. It has also provided training, in a manufacturing environment, to many northern Aboriginal people. Kitsaki Meats is an expanding exporter of wild rice products.

What is Kitsaki Meats Ltd. Partnership's experience in exporting? Kitsaki Meats has been exporting for about 20 years, almost exclusively to the US. It is now starting to venture into the European and Asian markets.

FOOD

Torngat Fish Producers Co-operative Society Ltd.

Happy Valley, NF

www.tfpcs2@cancom.net

Torngat Fish Producers Co-operative Society Ltd.'s advice to new exporters is:

"Make sure that you understand what's involved with exporting; make sure you have the right system (logistics and infrastructure) in place; and, be prepared for problems. Get to know the country you are exporting to and your new buyers' customs and practices. Customs agents may not understand the processes or there may be computer errors causing shipments to go missing. Anything can go wrong. Be prepared."

What does Torngat Fish Producers Co-operative Society Ltd. do? Torngat is a co-operative with 625 members on the North Coast of Labrador. With approximately 300 staff in five fish plants, Torngat is the largest employer on the North Coast.

Torngat purchases and processes snow crab, turbot (Greenland halibut), Arctic char, Icelandic scallops and rock cod. Torngat markets its products to Asia, the US, Europe and across Canada. Torngat also owns a shrimp licence, which is fished by a Nova Scotia company.

What is Torngat Fish Producers Co-operative Society Ltd.'s experience in exporting? Torngat has been exporting since 1982, beginning with the US market. Moving into fish exporting has been a complicated procedure for Torngat. Problems included the red tape involved in exporting, export restrictions from Canada and import restrictions of the foreign markets.

Torngat publicizes its Aboriginal ownership having found that, in many countries, consumers will purchase from an Aboriginal firm over a non-Aboriginal competitor.

COMMUNICATION

Taybridge Communications

Taymouth, NB

www.taybridge.com

Taybridge Communications' advice to new exporters is: *"Network with other firms in the countries where you wish to market your goods or services. Position yourself as a strategic partner to other firms, align yourself with Canadian divisions of firms that reside in your targeted export countries, and most of all, use complementary technology from other companies to allow you to reach areas that you may not otherwise be able to target."*

What does Taybridge Communications do? Taybridge Communications was launched in 1992 providing desktop publishing and writing services. Seeing the opportunities available on the Internet, Taybridge switched tack and began focusing primarily on Web and multimedia services in 1994.

Services provided by Taybridge include: Web design and authoring, technical and copy writing, graphic design, computer- and Internet-based training, interactive CD-ROM development, electronic documentation, document conversion and project management.

With a background in communications, journalism, computer-based training and Web development and a business philosophy that stresses complete customer satisfaction, Taybridge has developed a strong, loyal and growing client base.

What is Taybridge Communications' experience in exporting? Taybridge began exporting its services in 1997 while contracting for the Canadian parent of a US firm. When the Canadian parent downsized, Taybridge picked up a full-time contract from the US firm. The majority of the work is done in Canada with occasional on-site visits in the US. Taybridge is in the process of starting work with a California based firm. Taybridge will provide one-on-one e-mail support and assistance to trial users of its software.

NATURAL RESOURCES

Torngait Ujaganniavingit Corporation

Goose Bay, NF

Torngait Ujaganniavingit Corporation's advice to new exporters is: *"You must have faith and perseverance to build your business. Be innovative in solution development. Find good partners that match your own business philosophy and goals and don't be afraid to change partners when necessary."*

What does Torngait Ujaganniavingit Corporation do? This Labrador Inuit corporation owns and operates a granite quarry. In the second season of operation, 2,000 tonnes of granite were shipped. With the \$130,000 profits made, a second quarry was developed. By 1995, production was valued at \$1 million. In 1998 production was up to 3,958 tonnes and revenues at \$2.3 million. The business continues to grow every year as new technology is acquired, allowing for higher quality products, more employment and higher yields.

What is Torngait Ujaganniavingit Corporation's experience in exporting? Unlike the natural progression of most businesses (selling in the local market before exporting), 100 percent of Torngait's sales has gone to Italy. Now Torngait is exploring the US and Canadian markets.

To provide top-notch service to its European export market, Torngait's managers knew from the beginning that they needed a stone marketing partner in Europe. In 1996 they joint ventured with two European partners to market their product in Europe. In 1999, when the decision was made to target the US and Canadian markets, they again joint ventured with their Italian agent to form another marketing firm, called Tunnet Inc.

Spirit Ware

Six Nations of the Grand, ON

www.spiritwarecanada.com

Spirit Ware's advice to new exporters is: *"Follow your instincts. Don't always listen to other people. If you have a unique product, you can still compete against import imitations. I have found a niche market in the US that has opened doors for me that do not exist in Canada. I wish I had started exporting sooner."*

What does Spirit Ware do? Spirit Ware is a designer and manufacturer of contemporary native fashions, gifts and home accessories. Most designs incorporate native motifs and traditional techniques, such as beadwork, embroidery and hand lacing. Spirit Ware also makes extensive use of deerskin and buckskin in its fashion and home accessories line. The fur, supported by the Fur Council of Canada, uses non-endangered species such as beaver and muskrat.

Spirit Ware has been featured in major newspapers and magazines, such as *Chatelaine* and *Flair* in Canada and in *Cowboy and Indian* magazine in the US. It has also been featured on local and national television.

What is Spirit Ware's experience in exporting? Spirit Ware's launch into the export market was delayed because DeMontigny, the founder and president, listened to other people's advice and to conventional wisdom, which said that her company should get its feet wet in the Canadian market before venturing further. In hindsight, DeMontigny feels that she could have entered the US market sooner because her product fits a US niche market that does not exist in Canada. Having faith in her product allowed her to pursue the research necessary to find her niche in the US market.

In the Canadian and US markets, Spirit Ware sells its giftware and home accessories through mail order catalogues and their fashion line through exclusive boutiques and galleries. Having participated in a NEBS (New Exporters to Border States) mission to the Denver Western Apparel Trade Show, Spirit Ware learned about the US market and has decided to exhibit at the next Denver show.

While participating in a NEXOS (New Exporters overseas) trade mission to Paris and Milan, Spirit Ware made contact with an Italian buyer who continues to be a customer. Other European clients buy through Spirit Ware's web site.

Dorothy Grant Ltd.

Vancouver, BC

www.dorothygrant.com

Dorothy Grant Ltd.'s advice to new exporters is: *"Do your homework. Research the market, have an export plan and understand the social and business culture of the country you want to export to. You also have to find a way to build production capacity to meet export orders. But the only way to find out is go there, spend time in the market, do your research and build a plan."*

What does Dorothy Grant Ltd. do? Dorothy Grant Ltd., founded in 1994, is wholly owned by Dorothy Grant, a fashion designer and traditional Haida artist. Her garments, ceremonial button blankets and spruce root hats can be found in galleries, museums and private art collections around the world.

Her strong connection to her culture and deepened sense of Haida identity are the creative forces behind her fashion labels **Feastwear** and **Dorothy Grant**. In response to the high demand for her fashion, Dorothy opened a retail store in prestigious Sinclair Centre in downtown Vancouver in 1994.

What is Dorothy Grant Ltd.'s experience in exporting? Dorothy Grant Ltd. began exporting to the US during the 1990s. Subsequently, she was invited to Paris, France to exhibit at the "Les vendanges sur la Montaigne" fall fashion event sponsored by the Canadian Embassy. In 1999, as a result of Japanese-market interest in her product, Dorothy Grant was one of 300 entrepreneurs on the Team Canada trade mission to Japan where she was able to make great connections to expand her product line into that market.

TRANSPORTATION

Global Aerospace Corporation

Mississauga, ON

www.globalaerospace.com

Global Aerospace Corporation's advice to new exporters is: *"I believe the most effective means of marketing and pursuing international markets is to attend international trade shows and to hire an international company or person to sell your product. When attending a trade show, it is vital to your success that a plan and schedule be developed in advance. Schedule your appointments with the companies you will visit and bring your company objectives to the trade show."*

What does Global Aerospace Corporation do? Global Aerospace Corporation, located at Toronto's Pearson International Airport, is Canadian owned and operated. Global Aerospace provides aircraft component overhaul, exchange and lease capabilities for hydraulic, pneumatic, mechanical and electrical components. Customers include both domestic and foreign operators that maintain commercial, commuter and military aircraft.

What is Global Aerospace Corporation's experience in exporting? Global Aerospace's reputation in the aerospace industry attracted its first international client. Starting with a client in Norway seven years ago, Global Aerospace has built a strong European customer base by means of word of mouth (reputation), direct mail, cold calls and attendance at trade shows.

Communication with its customers and employees has been Global Aerospace's key to success.

Artistic Steel

A Division of Great Barriers Inc.
Edmonton, AB

www.artisticsteel.com

Artistic Steel's advice to new exporters is: *"Have a plan. Know the markets in the US and how they may differ from the Canadian market. Research if your product will fit a niche that is not currently addressed by other competitors."*

What does Artistic Steel do? Artistic Steel was founded 10 years ago by Andy Hawirko, a member of the Métis community from Lac La Biche in northern Alberta. Primarily a furniture manufacturer, Artistic Steel does custom metal fabrications, re-upholstery and upholstery of soft seating, including lounge chairs and sofas.

With 30 employees, they service western Canada, Ontario and the US. Artistic Steel supplies a number of other Aboriginal businesses, particularly those in the gaming, hotel and hospitality sectors.

What is Artistic Steel's experience in exporting? Initially exporting to one of its Canadian customers that had expanded into the US, Artistic Steel is now exploring new markets in the US, particularly the Aboriginal and hospitality sectors.

In exploring its export market, Artistic Steel has learned that trade shows are very competitive and companies have to be well prepared with price lists, a shipping policy, appropriate packaging, etc. Detailed, specific promotional materials are a necessity. It is important to use a solid, respected sales representative or distribution channel. Don't be afraid to change your sales representative if they don't work out. Do not initially tie yourself into a long-term commitment until you have tested their capabilities.
