Forty Drowned Like Rats in Trap

Secretary Garfield Declares That U. S. Government is in Earnest in Its Prosecution of the Standard Oil Company.

RIVERSIDE, Cal., Aug. 4.—In an address last night before the chamber of commerce, James R. Garfield, secretary of the interior, alluded to the fine imposed on the Standard Oil Co. at Chicago yesterday. He said: "The decision and fine are the end of a long fight, and will teach the people of this country that no man, big or little, is above the law. The Standard Oil Co. and others like that great corporation have gone ahead on the theory that they were so powerful that they could do things the ordinary corporation could not. We are showing them that they cannot."

Asked if the prosecution could collect the fine, Secretary Garfield replied: "Yes, you may be assured we can. And there are ten thousand more counts hanging over them on which similar fines can be levied."

John D. is Dumb.
CLEVELAND, Ohio, Aug. 3.—John D. Rockefeller, upon learning of the fine imposed upon the Standard Oil Co. to-day, said he had no comment whatever to make concerning the matter.

Fined Fifty Times the Value.
NEW YORK, Aug. 4.—News of the unprecedented fine imposed upon the Standard Oil Co. by Judge Landis in the United States court at Chicago was received in New York with excited interest.

An official of the Standard Oil Co. said the amount of the fine evidenced the industry of the company.

A Strong Indictment.
WASHINGTON, Aug. 4.—Significant statements are being public today in a report submitted to President Roosevelt by Herbert Knox Smith, commissioner of corporations, concerning the operations of the Standard Oil Co. in a previous report, the means and methods of the company were explained.

Big Earnings.
"Each one of these classes," says Commissioner Smith, "disproved by this report." The increase in annual profits of the Standard Oil Co. from 1896 to 1904 was over \$7,000,000. The report says:

"The total dividends paid by the Standard from 1882 to 1904 were \$51,922,994, averaging 24.15 per cent. per year. The dividends, however, were much less than the total earnings. It is substantially certain that the entire net earnings of the Standard from 1882 to 1904 were at least \$799,000,000, and possibly more.

"These enormous profits have been based on an investment worth at the time of its original acquisition not more than \$75,000,000."

CZAR, KAISER'S GUEST, REVIEWS GERMAN FLEET

Monarchs Meet in Swinemunde Harbor—Special Police Precautions.

SWINEMUNDE, Germany, Aug. 4.—Emperor Nicholas of Russia arrived in this harbor yesterday morning on the Imperial yacht Standart, and was met by Kaiser William on the Hohenzollern, which was accompanied by the cruisers Koenigsberg and Slesper, and a fleet of torpedo boats.

Emperor Nicholas called upon the German emperor and was invited to remain on board the Hohenzollern to review the German fleet. The Hohenzollern, with its convoy of warships, then departed for Swinemunde, and the two emperors reviewed the German fleet, which consisted of eighteen battleships, seven cruisers, a number of auxiliary vessels, a flotilla of torpedo boats and minor craft. A salute was fired in honor of Emperor Nicholas, and the Hohenzollern returned to the harbor, accompanied by an escort of Russian torpedo boats.

At about the time the review ended, the Standart steamed into the harbor, accompanied by an escort of Russian torpedo boats.

FLAW IN RAIL WRECKS TRAIN

13 Cars Derailed and Smashed in Early-Morn Accident Near Grimsby.

GRIMSBY, Aug. 4.—(Special.)—A flaw in one of the rails was the cause of a bad wreck on the G.T.R., early this morning.

Thirteen freight cars were derailed and considerably smashed up, completely tying up traffic both ways for the entire day and a good part of the night.

Five laden box cars were completely demolished, and it was found necessary to drag them to the sides of the track and burn them. About half their contents were saved, however, and two cars containing premium prizes, in the shape of fancy furniture and a large consignment of mail orders from the Larken Soap Company of Buffalo, bonded thru to Maine, Ontario, were saved.

"Lord" Seymour, Convicted of Murder, Asks Ottawa's Mayor to Assist Him.

OTTAWA, Aug. 4.—(Special.)—"Lord" Frederick A. Barrington Seymour, under sentence of death in Clayton, Missouri, for murder in the first degree, and P. Tressider of Chicago, who has taken such an interest in him, have appealed to Mayor Scott to use his influence to raise a fund to aid Seymour to obtain a just and fair trial, which his claims he did not get.

MISSING MISS

At Least Mrs. Etta Strangways is Accused of Many Swindling Operations.

Etta Strangways, alias Mrs. Eva Fox, alias Mrs. Eva Fox-Strangways, alias Margaret Sinclair, who is alleged to have swindled big hotels in New York and Philadelphia, and worked on the susceptibilities of the most exclusive social sets in both cities, was arrested here at noon yesterday on a charge of grand larceny.

Where she was found is kept a secret by the police, but it was in a fashionable neighborhood, and she had been there for several days in hiding.

The woman has in her life been quite an adventuresome, having visited most every habitable country in the world. She mingled with the best everywhere she went, but has in most every occasion caused the many friends she made to regret the acquaintance.

With the tale that she was the daughter of the Earl of Lichester, and that she possessed the title of a countess, she became acquainted with the elite of society, stopped at the best hotels, and always lived in luxuries.

The woman disappeared from Philadelphia very suddenly, and it is supposed that she was in the New York police, who were especially after her, tracked her here.

The Toronto police have been looking for the woman for some days, and finally located her Saturday night.

The New York Suffragists.

The New York Suffrage Association has issued an August News Letter, which announces a program of interest to every suffragist. The New York state women are planning a regular campaign for the year. They will have a busy time if they carry out all the proposed plans. In the first place, there is to be a double purpose of decoration at the annual state fair from September 9th to 14th. Speeches will be made, and very many workers are being secured for the months following a course of lectures, concerts, teas and receptions is mapped out which cannot fail to call every woman's attention to the cause. New York women are to be envied their enterprising spirit.

For the Summer Cottage.

A girl who was the happy possessor of many artistic and dainty photos of friends as well as some really exquisite hand painted postcards did not know what to do with them in the summer home. She missed the hand-mantel of the private room at home, and yet hated to leave her photos, which are such an easily portable decoration for walls at home. At last she had a bright idea. She bought a great, rough-meshed fish-net and nailed it across the corner of the room, and she hung her photos in the meshes, where they caught admirably and the net served the double purpose of decoration and the preservation of the photos from rough, casual hands.

A Summer Occupation.

During the long summer hours sometimes even the society girl is at a loss for occupation. A really artistic and useful art, suited to the most tender fingers, is the coloring of the exquisite heads on the eucyre party tallies or dinner place cards which one buys at a dozen if not ready tinted. When done by professionals they are often carelessly dabbed with too brilliant colors, and the cause of the individuality to be lost. They can be tinted with ordinary photo tints, such as do quite as well with a little practice. An enterprising girl who wished to make a little money quietly among her own friends or acquaintances would do well to take up this occupation. One word of warning; beginners always put on the prepared flesh too strong. Be sure to dilute it well, and also all other deep tints as water-color mistakes cannot be painted over.

The Coiffure Beautiful.

The care of the hair is something so shockingly neglected nowadays as to constantly call forth admonitions in the columns of contemporary magazines for women. We have all heard till we are weary of the hair-dresser's admonition not to wash frequently, and of the old prophecy: "If you keep on teasing your hair, you'll lose it!" Yet what, may one ask, in the presence of the nowadays mode in hats and hair dressing, is one to do? Pads are a nuisance in summer time, and a downright aid to ugliness anyway. A padded head, like a bleached one, always shows it. What to do? Well, one wise woman suggested the other day that we might wear wigs and "save our hair!" Excellent idea.

The next best, after preserving enquiry, is said to be this: Save your combings and have them made into a little, soft, short-haired switch and a larger long-haired one. Leave the short-haired one, observing the rule never

WHAT TO WEAR

For late August wear nothing can be more desirable than an Etou of one of the summer materials so much in favor. A very charming dress of Panama, in a pale grey shade, was finished with touches of purple velvet, and had a slight-corseage headed with purple braid. The coat was scarcely such in the sense proper, but was over a lined lace waist, and was draped back and front with shirred pieces gathered in on the shoulder and brought together just above the belt with a large bow of purple velvet. The curve obtained in this way, leaving a long oval of lace visible both back and front, is the chief charm of the costume. The pattern is found in all the latter modes.

Another very charming dress was seen in one of our large stores. It is an early bird from the autumn flock now beginning to be due. It consisted of black voile and silk mull, combined with taffeta as a foundation, and was exquisitely Parisian in get-up. Abroad band of the delicately transparent voile was set into the taffeta skirt just below the knee, and was finished on both edges by stitched veil in simulation of braiding in a Roman pattern. The bodice had insets of silk mull, indescribably soft in effect, and the semi-jumper effect of bands of voile over the shoulders was completed by a Roman sleeve falling over a double puffed sleeve of mull, caught in with little bow knots of taffeta. The bodice had these same little

knobs between the voile bands, which latter were arranged so that no stitching showed. A variation on the common and now becoming wearisome variety hat is seen in the handsome felts in white and light shades, seen lately in the Paris shops. Another pretty effect is that of the "scidien" straw in rough weaves, wired to the sandy shape of the hat, and lined with dainty ribbon in some delicately contrasting shade, such as pale linen, or deep brown.

Country Girl writes asking what are the duties of a chambermaid, a parlormaid and ladies' maid. Several prominent Toronto ladies who were consulted differed on the subject in details, but united in ascribing the following functions to the chambermaid: She must do all the cleaning and tidying, bed-making, etc. in the bedrooms. If there be boudoirs or private sitting rooms upstairs, her duties extend to them. The floors must be swept, curtains and bed furniture changed when necessary, dusting done and apartment set in order generally. If a housemaid is kept, she will attend to all halls and passages, if not, the chambermaid must do these upstairs, and if a seamstress is not kept, would probably be expected to mend bed linen, etc. The parlormaid must be in the first place attend to the door, if no footmen are kept. She must rise very early and see that all rooms downstairs are fit to receive the household and guests, too, if necessary. Moreover, she must have the worst of the work done before breakfast, as if a butler is not kept, it will fall to her lot to wait on table. No sewing of any kind should be expected from the parlormaid, except in case of tatters, fringes on furniture or such. Of course a house which kept no laundress might expect ironing and occasional mending from a parlormaid, but that is really beside her duties. None of these things are

SAVING MONEY

The wisdom of saving money must be apparent to any person who gives the subject any thought. A little money saved enables you to take advantage of opportunities for making more money to buy a lot, to make the first payment on a home, to start in business for yourself. The opportunities come to the man with Capital. Saving the small sums is the creation of Capital.

CANADA PERMANENT MORTGAGE CORPORATION

HARRIMAN'S DOMINATION IS CLEARLY INDICATED

Increase in S. P. Dividend is For Market Effect—Local Stocks Are Weak.

World Office, Saturday Evening, Aug. 3. Whatever may be the purpose of Mr. Harriman's carried out his promise in regard to Southern Pacific by increasing the dividend from 5 per cent. to 6 per cent. Less than a year ago this stock was initiated to the dividend section for the first time, and it must be admitted that its progress in this direction is quite rapid. It is not improbable that Mr. Harriman's previous market operations bear out the contention—that the dividend was necessary to make the stock attractive to investors and speculators. It might be expected that, with money so difficult to obtain for construction and improvement, it would have been better to have left the increase in dividend payment in the treasury of the company. This evidently is not Mr. Harriman's plan of flotation which will prove which plan would be most beneficial to the permanent holder. Wall-street has had quite a varied experience since a week ago. It was suggested last week that the insiders making the market had taken the opportunity of buoyancy built up on rising values to distribute a little stock. There is no doubt that such was the case, as the dip which commenced with last Saturday's bank statement quotations subsided during one or two days of the week pointed to the almost entire absence of a short interest in the floor trader seems to have been as badly misled into following the bull side as the ordinary public. It is perhaps permissible that even these usually astute gentlemen could be so misled.

The export of \$500,000 in gold is the only determining factor in the market. The count for a drop of from 5 to 10 points in some of the active issues. True, some have fallen to a low level, and the London market has been semi-demoralized, but matters of greater pre-eminence were in vogue when the market was at its recent zenith. Attempting to reason out the market's decline would be the rarest kind of waste effort. The market was precipitated because it was considered essential to avert a panic, and manipulation. Prices were forced down by the same interests as supported them during the advance, and it is not surprising that the operation when the market presents another opportunity of a similar character.

What would be accepted as an anomaly in anything else, but in the market was the break in the Steel Trust shares on the production of the best quarterly statement in the history of the concern. The ordinary pretence that the good showing had been discounted could not be resorted to, as the shares had risen so far in advance. If, in the uninitiated, the market's position is not clear, the attempt to prove that a commercial depression is pending, the market's position is not clear. The area of business contraction has not yet encroached on the market's position. The natural inference would be to expect a rise in the price of the concern, instead of falling.

The crops, the money situation, or other matters having a general relation to stock market values, are in no great respect changed from that of yesterday, being more dull, if anything. We look for a further market next week, but it is probably a matter of time before we take advantage of all moderate recessions to buy the stock. The market is in a position to be a good advertisement to this end. It is, therefore, to be expected that the upward movement will follow the present decline. A period of tentative operations both in the market and in the general market will follow the present decline. This is in no way a prelude to a definite trend. This is now in effect, and may last a good portion of the present month. The market's position will not assist bullish operations, and a further dragging reaction in the market is not a probable nearby occurrence.

It is the common belief among those who are close to the local financial situation that the present stagnation and weakness in domestic securities is due to the existence of some weak spots in the market, which, when they are eliminated, will not then be eliminated. This belief, together with the almost unparalleled money stringency, has determined the market's position. It is therefore patent that nothing from entering the market during the recent past. The position taken by the banks is more speculative, and would meet the approval for support of largest financial interests at this time.

REAL GOOD INVESTMENTS. Chicago's Merchant Prince Had Faith in Industrial Stocks.

Marshall Field, the great Chicago millionaire, had invested over \$3,000,000 in industrial stocks and bonds.

The modern captain of industry is he who ventures his money in established industries rather than in the speculative stocks, which pay very small dividends.

Canada has embarked on an era of development, and the careful investor can find many established manufacturing industries where the returns are liberal and certain.

It has been urged that such stocks as these should be listed in the stock exchange to facilitate public investment.

There are many bond issues, and a number of new ventures always being offered for subscription, but what investors really desire is an opportunity to share in the safe-going concerns which are paying good dividends, and the cost of which has not been advanced to a high figure by speculative investors.

Wheat—Aug. 92 1/2 bid, Sept. 93 1/2 asked. Oct. 94 1/2 bid.

Chicago Grain. Marshall, Spader & Co. (G. Beatty), King Edward Hotel, reported the following fluctuations on the Chicago Board of Trade:

Open High Low Close. Sept. 92 92 1/2 92 1/2 92 1/2. Dec. 92 1/2 92 1/2 92 1/2 92 1/2.

Chicago Goslop. Chapin & Co. to Melady & Co. : Wheat—Black rust is spreading in the northwest, and in the opinion of reliable grain people in the northwest it is simply a question whether the wheat can grow fast enough to escape serious injury.

Proat was reported at several points in North Dakota last night, while temperatures of new wheat were said to be in the neighborhood of 100 degrees.

It is expected the rust is likely to be nipped by the frost. Buying of an excellent character, of small proportions, was based on these factors, and with the strength in coarse grains, helped to advance prices 1/2c from the bottom after a week opening. Indications of a better export demand and continued light receipts of new wheat were said to be the market, but the bullish news was overruled by the lack of outside buying.

Increased offerings on the advance checking the upturn and bringing about a better character of the market, but the market was not so strong as it had been.

SIXTY THOUSAND PEOPLE LEAVE CITY FOR HOLIDAY

Exodus Constitutes New Record For Toronto --- Boats Also Handle Large Crowds.

Holiday-seekers in record numbers left the city by rail and boat Saturday. Most of the regular trains left the Union Station in two or more sections, and quite a number of specials were also necessary to accommodate the heavy passenger traffic. Station officials state it was the largest crowd they have had to handle on any Saturday or holiday this season.

In order to satisfy the many who were seeking tickets for the C.P.R. special extra both in the Arcade and the C.P.R. was also forced to erect a temporary booth to relieve the congestion at the regular ticket offices.

The exodus continued all day Sunday, and the different companies had to provide accommodation for sixty thousand people during the two days.

All the steamboat lines got a big share of the traffic. The Niagara, St. Catharines & Toronto agent stated that their regular passenger traffic was heaviest for this season, and that every berth had been taken in full compliance with extra trip had to be made in the evening to bring back the big crowds who were attending the Canadian Henley Regatta at St. Catharines.

The Turbina carried large numbers during the day. At the Niagara Navigation Company's office the officials thought that the traffic surpassed anything to date. A conservative estimate of the number carried on their various boats during the day would be over three thousand persons.

The Belleville and Ontario coast, which sailed on Saturday afternoon, had all her passenger accommodation filled up, and quite a number of berths have been booked for today.

All the passenger lines report a most satisfactory traffic for the past month, and the numbers carried approximate record. Although the season opened in such an unpromising manner and traffic was away behind at the end of the season, it has brought an improvement that makes good the losses of the first part of the season and puts receipts in advance of last year. Had weather conditions been at all favorable during June, passenger traffic for this season would have assumed a more favorable position. It would be safe to say that business would have been almost doubled.

CANADIAN NORTHWEST FEARS COAL FAMINE

Last Winter's Sufferings May Be Again Endured---Not Providing For Future.

FRANK, Alta., Aug. 4.—There begins to be promise of another coal famine during the coming winter, with the accompanying possibility that the experiences of the last winter may be repeated with even greater severity throughout the Northwest.

Signs pointing in this direction are to be found in the condition of the coal supply. The coal shortage commenced in the Northwest last winter, and has since grown steadily worse, until for the past two weeks the mines of the Crow's Nest Range have been most seriously hampered. After all has been done concerning the causes which produced the coal shortage last winter, the lack of cars for the transportation of coal has been found to have been the chief factor.

That being the case, there can be no question that another coal famine is ahead of the Northwest, unless salutary measures are adopted, either by the railroads or the government.

In view of the enormous increase in the consumption of coal, and the fact that absolutely no provision against fuel scarcity is being made, there is the gravest likelihood that the handicap that was put upon the country last winter may be repeated this year if the necessary something is not done.

The week before last the mines of the International Company at Coleman were idle three days, and the same last week. Thus it will be seen that the greatest coal-producing concern in Alberta is working just half time.

The Canadian-American Company at Frank, Alberta, which has been working about three-quarters of the time, and the Western Canadian Collieries, with mines at Lillie and Bellevue, have worked scarcely half time. These mines produce easily two-thirds of all the coal mined in Alberta.

That being the case, and with no prospect of coal in the country, it is not difficult to foresee serious times ahead if the coal shortage is not remedied.

SAILORS JUMP INTO SEA WHEN 5 MILES FROM SHORE

Reckless Attempt at Desertion by Two Norwegians—Were in Fear of Punishment.

MONCTON, N.B., Aug. 4.—With their ship five miles from the nearest land, two Norwegian sailors jumped from the barque Auguste Leffer into the Straits of Northumberland. A little later they were rescued by a passing boat and taken to Shediac, where they have been given employment.

The escape of the two men was dramatic. With another sailor over three weeks ago, they deserted some time ago and ran away. Constable Bell, Shediac, was sent after the trio, locating them with some difficulty, and they put up quite a stubborn resistance before being taken back to the vessel, which was bound for Preston, England, and sailed from Port Duchene yesterday morning.

When the ship was some five miles out, the sailors, wearing their heavy boots and usual clothing, jumped overboard into the sea. A ship's boat was promptly lowered by order of the captain, but was swamped by the heavy seas, and the two men were struggling in the water. A few minutes later a Point Duchene sailboat picked them up. So far as known, there were no reasons for the daring act. The ship is in good condition, and the men were well treated. They were given a year's imprisonment for the first desertion, however, and the expenses involved by the captain in capturing them would have been deducted from their salaries.

FARMERS MOB AUTO BURN IT IN BONFIRE

Had Run Over a Little Boy—Adventure of a Chicago Party.

CHICAGO, Aug. 4.—Mobb'd by farmers after their big touring car had accidentally run over a little boy, several prominent persons recently are said to have been driven from their automobile near Deerfield, Ill., forced to look on while the big auto was incinerated in a big bonfire that farmers built under it, and then compelled to walk two miles thru the country before they could find an accommodating inn where they would take them to the Moraine Hotel in Highland Park.

It was stated that the occupants of the car were Louis F. Swift, son of the millionaire packer, R. C. Chase, and a member of the brokerage firm of S. B. Chapin & Co.; Mrs. Chapin and a young woman who has been a guest at the Chapin summer residence in Lake Geneva.

IMPROVEMENT BARRED BY NEW REGULATION

Selling by Tired Holders Continues to Hamper the Market For Cobalt Shares.

After a long period of steadyness Nipissing stock took a sudden downward trend in the market during the early part of the week. The break ran into nearly 3 points, the lowest price being a fraction below \$8 a share. This week's record of the stock puts it on the lowest level since the shares were first started up last year and carried to nearly \$24 a share. The renewed break in the stock is regarded as a matter of local concern, and is so thought by local investors. The highest point, and every fresh outburst of selling with lower prices has been suggested by the fact that the market, but there appears to be no foundation for the reiterated rumors that there is an attempt to shake up the small holders and corner the stock. Even at present prices the value of this property is now placed at over one million dollars. This estimation of the property is quite a large one, and while much more may be taken into account than the present value of the entire district, it is a matter of course that the downward movement of the stock will be a matter of course. The Cobalt market. Many of the stocks whose value is doubtful have practically no market, but such is the case with Tretwey and Silver Queen still find a substantial support at each new concession. There is as yet no evidence that tired holders will not further liquidate in the process will serve to act against any improvement as long as it lasts.

May Buy Other Properties
NEW YORK. Aug. 4.—Cobalt Central has been well supported during the week. At low prices there has been heavy buying of Cobalt Central. The price of the stock is believed to be the present depression is due solely to the labor troubles, and that when these are settled all the better class of Cobalt shares will sell at much higher prices. The concentrating on the property, a large body of the machinery has now been delivered and is being set up, and the managers expect to have the completed plant ready for operation early in September. A large amount of ore is being mined, and it is believed that the concentration plant will handle it so economically that there will be a large margin of profit available for dividends. It is reported that Cobalt Central will shortly acquire about 10 additional properties. It is stated, however, that there will be no increase in the capital stock, as the properties will be paid for out of the treasury.

GRANDEUR OF ROCKIES INSPIRES JOURNALISTS

Whole Trip Thru West Has Been One of Revelations to British Tourists.

VANCOUVER, B. C., Aug. 4.—(Special.)—The British journalists, who are the guests of Sir Thomas Shaughnessy, left Field Saturday morning for Vancouver. They have been right royally received at all the principal points between Quebec and Calgary, and in the three eight-sewing days spent in the mountains, have seen the grandeur and beauty of the Canadian Rockies, which, they assert, not only rival that of Switzerland, but exceed it in every respect. As a special extra attraction Manager Shea has engaged the services of a soprano, Miss Edythe Mae Vernon & Co. His act is a magnificent one.

Shea, Wardette and company have a sketch, "A Honeymoon in the Rockies," which is a most delightful playlet, where they saw the great work of development going on and the wonderful prosperity which has attended the labors of thousands of impressed people.

They were deeply impressed with what was seen and fully realize the possibilities of Canada's future and the opportunities it offers to energetic people, seeking to find a new home for themselves and their families in the western slope of the Rockies and thru the Selkirk and Gold Range and today brought them to the mountains, which Victoria will be visited.

Public receptions will be given them. The return trip will be made thru the Crow's Nest Range, and down the great lakes to Toronto, arriving there Sunday, the 18th inst. Niagara falls will be visited the following Tuesday, and the party, with three exceptions, will sail on the Empress of Britain, Aug. 23, from Quebec.

SHEA'S OPENING TO-DAY WITH SPLENDID BILL

Theatrical Season Will Open With Two Holiday Performances at Home of Vaudevilles.

The theatrical season of 1907-8 will be opened this afternoon at Shea's Young street theatre, when a splendid holiday vaudeville bill is to be presented. The cool weather that seems to be a certainty now for the rest of the summer will cause indoor entertainment to be appreciated, and the several weeks' "raas" of anything in the way of dramatic amusement is sure to bring out large attendance with comedy features.

There are many feature acts on the opening bill, chief of which is Buckner, a sensation, who has been a success since returned from Europe. As a special extra attraction Manager Shea has engaged the services of a soprano, Miss Edythe Mae Vernon & Co. His act is a magnificent one.

Johnston and Harty, singing comedienne, are making their first appearance here. Norton and Russell have a novelty in that of Switzerland, but exceeding it in every respect. As a special extra attraction Manager Shea has engaged the services of a soprano, Miss Edythe Mae Vernon & Co. His act is a magnificent one.

Joe Denning is an entertaining fellow with his songs, dances and imitations. He is a most delightful playlet, where they saw the great work of development going on and the wonderful prosperity which has attended the labors of thousands of impressed people.

They were deeply impressed with what was seen and fully realize the possibilities of Canada's future and the opportunities it offers to energetic people, seeking to find a new home for themselves and their families in the western slope of the Rockies and thru the Selkirk and Gold Range and today brought them to the mountains, which Victoria will be visited.

PROTECTION FROM AUTOISTS

Object of a New League Just Formed in France.

PARIS, Aug. 3.—The frequency of automobile accidents in France has led to the formation of a society of protection against the abuse of automobilism. They propose to circulate petitions through the republic which will be presented to the parliament.

The memorial will ask for more rigid speed laws and other safeguards. Moreover, the new society will lend material support to the victims of irresponsible automobilists in their efforts to secure reparation.

PERMANENT COURT.

U. S. Proposition re Arbitration Accepted at Hague.

THE HAGUE, Aug. 3.—The American proposition regarding the establishment of a permanent court of arbitration at The Hague was adopted today by the sub-committee.

The vote on the proposition was as follows:

In favor of—Germany, Argentina, Brazil, Bulgaria, China, Chile, Colombia, Denmark, Santo Domingo, Ecuador, France, Great Britain, Guatemala, Italy, Japan, Mexico, Montenegro, Norway, Panama, Paraguay, Holland, Peru, Portugal, Russia, Sweden, Venezuela, and the United States.

The following abstained from voting, some of them because they were without instructions: Austria, Belgium, Greece, Roumania, Servia, Spain, Switzerland, Turkey, Uruguay, Luxembourg and Salvador.

It is quite probable that Great Britain, France, Germany, Russia and the United States will agree to present to a special committee on Tuesday, a combined scheme for constituting a permanent court of arbitration.

Besides the details already known, a section regarding the expenditures will doubtless be arranged like that of the universal postal union at Berne, the following countries being divided into different classes, according to their population and bearing a proportionate share of the costs.

SPECIAL TRIP SUNDAY.

Lakeside Brought Over Last of Henley Crowd.

The steamer Lakeside made a special trip from Port Dalhousie on Sunday to accommodate the large number of oarsmen and their friends who stayed over for the presentation of prizes won at the Henley regatta. The boat left Port Dalhousie at 10 a.m. and Toronto at 2 p.m. on the return trip.

Almost a Panic.

Quite a sensation was caused yesterday by a rumor started to the effect that the weather conditions for today would be unfavorable to those who had anticipated an enjoyable day on the water. This rumor, however, was entirely without foundation, as the weather man informed us today, and who stated further that the day would be fine and warm, and a very propitious one for an outing. Freshets Modjeska and Macassa will furnish a service of six return trips between Toronto and Hamilton, leaving Toronto at 7.30 and 11 a.m., 1.15, 3.15, 5.15 and 11 p.m., and leaving Hamilton at 7.45 and 10.45 a.m., 2.15, 3.15 and 11 p.m. A 15c fare is in force on all trips.

WILL YOU STAND FOR THIS? An Ohio liquor man, in a speech, said: "It will be needful, therefore, that missionary work be done among the boys, and I make the suggestion, gentlemen, that nickels expended in treats to the boys now will return in dollars to your tills after the appetite has been formed. Above all things, create appetite. Can you imagine anything more fiendish? You can stop such rascally work by voting."
