"I beg to report per order of C. N. R. Inspector Dunphy, I released Kenneth D. Clifford at 5.20 p. m. on a \$25 deposit for appearance Monday, March 22, at 10 a. m. I put same in your office. (Signed) "INSP. HARRIS."

Somebody, whose identity must be disclosed soon, is attempting to make it a crime or misdemeanor to sell the Saint John Evening Times-Star to the public on the platform of the C. N. R. station here.
The newspaper in question has hitherto enjoyed all of the rights and privileges accorded newspaper publications under the law of the land, but an attempt has been made to dictate to the people of Moncton, and to the traveling public, and to say to them that this publication is under the ban so far as its purchase on the platform of the C. N. R. station here is concerned.
On Saturday, afternoon, about 5 o'clock, Kenneth D. Clifford, a member of The Times-Star circulation staff,

Id by Leading Merche form; but up to tonight no charge of any kind had been made, and no offi-cial reason had been given for depriv-ing Mr. Clifford of his liberty and lock-

ing Mr. Clifford of his liberty and lock-ing him up. Mr. Clifford, when interviewed to-day by a Telegraph-Journal represen-tative, said that at the time of his ar-rest a boy was offering the Moncton Transcript for sale, and that he did not see any effort made by the C. N. R. police to stop him. He said, also, that within the last few days he had repeatedly seen a boy selling the Tran-script on the station platform without interference.

VERBAL AGREEMENT

CCC

whonday, March 22, at 10 a.m. 1 put same in your office. (Signed) "INSP. HARRIS." CHARGE ISN'T LAID YET When Inspector Dunphy was inter-viewed by a Telegraph-Journal repre-sentative today, and asked for what crime Mr. Clifford had been arrested, he said that he would be charged with selling newspapers on the station plat-

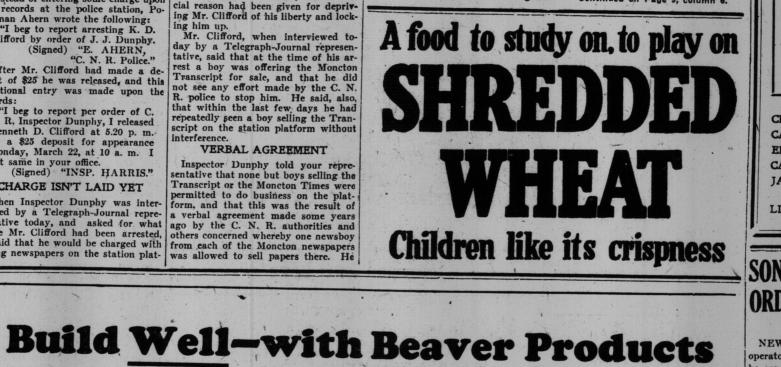

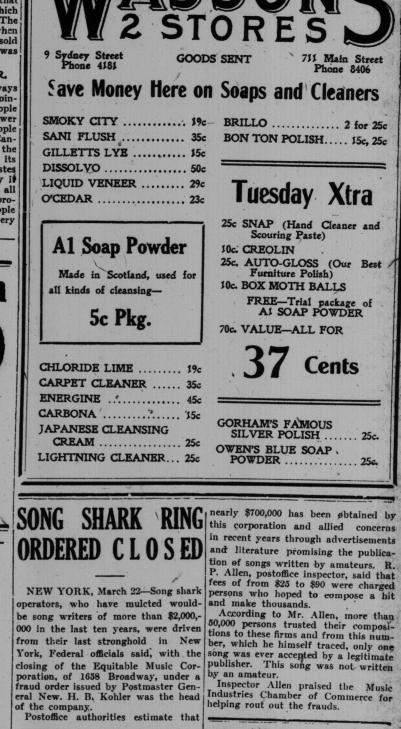

said he had instructions that such a rule did not apply to any newspapers published outside the city of Moncton. When he was asked if he did not recog-nize an element of discrimination in this, he declined to make any comment. Of course it is necessary to keep in mind that The Times-Star was being sold under the permission given by Chief Tingley, and that there had been no hint to The Times-Star of its having been withdrawn or of any change of policy. TO APPEAR TURSDAY

TO APPEAR TUESDAY. As the matter stands Mr. Clifford is to appear in the Moncton police court on Tuesday morning at 11 o'clock, and at that time the case will be gone into, not only in order to protect his rights fully, but also in order that it people of Moncton can be told by the C. N. R. or any other authority, what newspapers they shall or shall not pur-chase. So far as Mr. Clifford is concerned he is in the position of having been locked up arbitrarily in spite of the

he is in the position of having been locked up arbitrarily in spite of the fact that no charge was made against

Continued on Page 9, column 6.

A LITTLE time—a little thought before you build, re-model or repair, will mean a great deal of satisfaction

10 o'clock. Magistrate Steeves subsequently decided to continue the case until Tuesday morning at 11 o'clock, in order that counsel selected to repre-

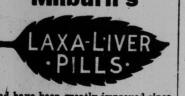

sent the prisoner might be present to defend him and might have the requisite witnesses on hand. The publishers of The Times-Star

and The Telegraph-Journal propose to see that the legal rights of the prisoner are fully protected, and also that the right of the public to purchase any newspaper they may desire shall be fully vindicated.

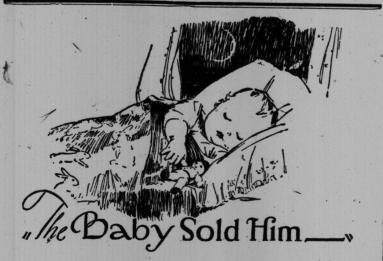

### SELLING TIMES-STAR.

Although no charge has been made

Although no charge has been made on the police records of Moncton against Mr. Clifford, he was arrested because he had committed the crime of offering The Times-Star for sale on the station platform, although at that par-ticular moment the Moncton Trans-cript was being offered for sale there by a newsboy selling that publication. The question immediately arises, therefore, as to who has the power to say that the traveling public shall have the right to purchase one newspaper and not another, and also who it is that is attempting to censor the taste of the people of Moncton, or of travel-ers on the C. N. R. or its employes,

and have been greatly improved since I started to take them.

A man telephoned a Confederation Life representative the other day and said, "Bob, come over and see me." When he got there, he asked Bob to write his application for \$10,000. He just said, "Bob, I want you to fix me up for \$10,000 to commence with."

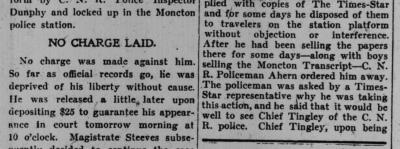

He was a man Bob knew very well, but he had never before succeeded in selling him a dollar's worth of Insurance. What made him change? Nothing that Bob said. It was the influence of his first child not more than a few weeks old.

I<sup>F</sup> this thought strikes a responsive chord in you, the Confederation Life Association would like to send you a booklet about the Peerless Policy—a policy that meets the requirements of most business men. Write for a copy.

# Our Pledge to Milk-Users

THIS is our pledge to you—a simple pledge of simple goodness.

- 1. Perfect Purity Carnation Milk comes to you pure and fresh, whole-some and absolutely safe.
- 2. High Food Value Carnation con-tains all the nourishing qualities of rich, full-cream milk, concentrated to double richness.
- 3. Delicate Taste-Foods acquire a finer flavor, coffee takes on a richer savor, when Carnation is used.
- 4. Creamy Smoothness—The texture of foods is improved when this creamy milk is used in cooking.
- 5. Economy Carnation goes farther than ordinary milk, with less spoilage and wastage. And it cuts cream bills in three.

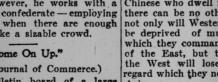

These qualities are Carnation's pledge to you. Prove them to yourself. Then

you will understand why Carnation has become the biggest selling brand of evaporated milk in all the world. Tell your grocer you want Carnation.

COCOA-3 tbsp. cocoa, 2 tbsp. sugar,  $\frac{1}{2}$  cup hot water, few grains salt,  $\frac{1}{2}$  cups Carnation Milk diluted with  $\frac{1}{2}$ cups water,  $\frac{1}{4}$  tsp. vanilla. Scald the diluted milk in a double boiler. Mix cocoa, sugar and salt and add the hot water. Cook over a low flame from 10 to 15 minutes stirring occasionally to prevent burning. Add to the cocoa the scalded milk; return to the double boiler and continue cooking for 10 minutes. Whisk with a dover egg beater just before serving. Place a marshmallow in the cup and pour over it the hot cocoa. This serves four.

FREDERICTON, March 21- With the budget speech set for Thursday in the Provincial Legislature there is much speculation as to what this week will bring forth in the shape of announcement of new revenue-producing meth-ods; in other words, what new tax-ation New Brunswick is to have, if any, to diminish the provincial treasury's prospective loss of at least a quarter of a million dollars in liquor sales profits, a further large sum as a result of the enduction in schemers unon lumbar out reduction in stumpage upon lumber cut on the Crown lands and other defec-

essary, must be taken to provide rev-enue to enable the budget to be bal-

anced. The New Brunswick Labor Federa-tion wanted to know last week if the amusement tax is to be increased, re-ports to that effect having gained wide circulation recently, but all the Premier told them was that the amusement or any other tax now in existence could not be decreased.

large stock and years of experience should be of advantage to vou

(Carpet Dept.—First Floor, Germain street entrance.)

And, anyway, why should a woman be forced to give up her occupation just because she is assured of enough to eat and clothes to uer back? Nobody would dream of even suggesting that it was a man's duty to quit business and give some other man a chance use because he has made enough to insure him a modest income the remainder of his life.

**T**HAT is one side of the question. Another side is that housekeeping is a profession in itself that requires all the strength and intelligence that any woman has, and the result is that the woman who tries to be both a housewire and a business woman generally falls between the stools and tails at both jobs.

No woman can make a comfortable home who is away from it all day, who rushes from her desk at night to the delicatessen store, where she assembles the materials tor a scrappy dinner. No man's gream of married bliss consists in coming home at night to a wite whose nerves have been so frazzled out by dealing with a crotchety boss and unreasonable customers that she is as cross as two sticks and too tired to go anywhere or to be entertaining and amusing.

amusing. Nor does any woman get anywhere in business who is giving one lobe of her brain to her job and the remainder of it to won-dering how the things are coming on in the fireless cooker at home and it the grocer will send the things she ordered at 5.30.

THE woman who works outside of her own home cannot possibly be as efficient a homemaker as the one who gives all her time and attention to it. In addition, she runs the risk of pauperizing her husband, so to speak. If Sattie can support herself, many a husband will not only let her do it, but will graft his own living off her also. If you will call to mind the married women you know who are in business you will realize that nearly every one of them is supporting a good-for-nothing, lazy loafer of a hus-band. Whether this is cause or effect we do not know, but undoubtedly many of these men would have worked if they had had to work to keep themselves and their families from starving. But, on the other hand, by continuing with her job many a woman heips a good husband get a start in life and a home.

Of course, when there are children it is a tragedy for a woman not to be able to be with them all the time, because it is in infancy and early childhood that characters are formed, and this should not be left to hired hands.

No one can do for little children what their mother can do for them. No one can give them the love and tenderness that she does nor have the patience with them that she has. And for them to know only a mother who comes home at night, as father does, too ured and occupied with business problems to give them more than a perfunctory kiss and send them off to bed is for them to sustain an irreparable loss.

BUT there is still another phase of the subject, and that is the impossibility of many young persons getting married unless the wife continues on with her job.

Under present economic conditions, it is not possible for a poor man, alone and unaided, to make enough money to support a wite comfortably while he is young. He must wait to marry, and the girl he loves must wait for him until they have burned out the fires of their romance and have grown dull and tired, or else she must help him earn their right to marry while they are still young and ardent.

ALSO, there are many men who are everything that is lovable and fine, but who have not the gift of money-making. They work, but they do not know how to turn it to profit, and the women who love them and who would be perfectly happy married to them must either forego marriage entirely or half starve, or else continue on in business.

Surely in these cases a half loaf is better than no bread. And a woman is happier working after marriage than she would be not to marry at all.

**THERE** are even instances in which a mother can do more for her children outside of her home than she can do in it, as when the money she carns can put them in a better environment, give them an education and opportunities that they could not otherwise have.

So the problem of whether a woman should work outside of her home after she is married is an individual one that each woman must settle for herself. DOROTHY DIX. Copyright by Public Ledger.

IN NEW YORK SEE-SAWING "P and BROADWAY LL America has been listening

lately on the romance of Izzy Baline-otherwise Irving Berlin-and the charming young society girl, Ellen Mac-

Bay. Berlin, as the world knows, came out of New York's ghetto. He was one of the Graad Street Boys' Association, which has on its membership judges, which has on its interesting received in a second magnates. This is but one of the organizations working for years to keep the young-sters of east side gangs from becoming gangsters.

NOW the Beavers, for instance, were as rough a liftle gang of baby crap-shooters as anyone might find upon the sidewalks of New York. One of the spectacles that never falls to get a gasp from the New York vis-

tor is that of crowds of lads, short in ants and years as well, who handle their dice with the adeptness of a vet-eran. And they gamble right up to the mit of their pennies. This sort of thing leads to all sorts

of petty pilfering—shoplifting wares from the pushcarts, stealing from the many little stores—and hence, by slow process of growth, into larger thefts and perhaps prison.

T E. LAUGHLIN told me about them He has charge of a Y. M. C. A. branch in the Bowery. He says the case is typical.

It was the accident of a street base-ball game that introduced him. A wild pitch sent a baseball through his office

pitch sent a baseball through his office window. He ran out to catch the cul-prits and came face to face with a hard-bolled and deflant lad of 12. "The first thing I discovered was that the gang has to be accepted in toto, or not at all," he related. "In most work, boys are listed in groups according to age. But you can't do that with gangs. The gang has to be accepted as one and there must be no classification. So I designed to accept the Beavers. That was six years ago. design. The nightgown sketched above is being shown in one of the smart shops. It is of flat crepe in the dell-cate, yellowish green known as chartreuse. Deep green crepe out-lines the neck, armholes and the flat panels applied at either side. The same deep green reappears at the pocket and in the spray appli-ue at the side.

ue at the side. The model could also be interpreted in pale blue with deeper blue, or in yellow with peach. was six years ago.

"Today there isn't a kid that hasn't expanded in muscle and mind and who wouldn't be ashamed to be seen unclean. They have taken on that invalu able asset-a sense of pride. They build radio sets and have athletic teams. They are still the 'gang,' but they will never be gangsters."

Extra From Poverty Row Wins Chance for Fame

GEORGIA HALE, the extra girl of Foverty Row, whose flight to fame is one of Hollywood's most glamorous chapters, has been placed under a long-term contract with Paramount that will put her name in electric lights the world

B. P. Schulberg and Hector Turnbull, associate producers of Paramount, an-nounce the signing of this girl of "The Salvation Hunters" and "The Gold Rush."

A little over a year ago, Georgia Hale was an extra. She went unnoticed-a Cinderella in the throng applying at the Cinderella in the throng applying at the windows of the casting offices. Then one day a young but ambitious director decided to make a picture. Scraping together what money he had and borrowing what he could from his friends, he at last obtained a sum which was barely sufficient to meet his needs. The total was 4000—one of the smallest sums ever expended on a pic-ture of feature length. The director was Joseph Von Stern-hers, and the picture was "Salvation

berg, and the picture was "Salvation Hunters." Von Sternberg, in a mo-ment of inspiration, chose Georgia Hale, a mere extra, as leading woman. The rest is history. "The Salvation Hunters" has been called the most "successful failure" of the industry. Critics raved over it, but the public turned "thumbs down." However, Charles Chaplin had seen it.

Seeking out the girl he signed her to a cong-term contract, and made her his seading woman in "The Gold Rush."

randahs, artisian well, electric lights, hardwood floors, bath and modern conveniences. Garage, driveways. Near club

Mrs. Francis Robinson, 149 Broad Street 'Phone M. 742 Saint John

This fine property is well worthy of investiga-tion. Write TRY TO KEEP CIDER Sweet cider in June, with its natural flavor and aroma, may soon be avail-able at soda fountains, if investiga-tions now under way are successful. The experiments aim to see if cider cannot be concentrated by heat under a vacuum without a loss in flavor.

All Qualities.

A peculiar parasite has been dis-covered by F. R. Beaudette, boultry pathologist, in a number of chickens sent for diagnosis to New Jersey agri-cultural experiment station. So far as known, the parasite has not previously known, the parasite has not previously been reported in this country. The parasite undoubtedly causes much destruction. Its location in the tissues renders treatment in the tis-sues impossible. Prevention lies in rearing young stock on new ground en-tirely separate from adult birds.

### By R. H. BRUCE. Armstrong & Bruce, Ltd., Saint John, N. B.

WOU may be sure of one thing whereever you live-you cannot rent a home.

You may rent a flat, an apartment or a house but you have to own a ne. The whole history of civilization proves that in the home-owning aspirations of peoples lie the germ of national growth. The continent of America is the greatest example of this in history. It was the desire to escape a system of landlord-and-tenantism as much as religious and political persecution that drove the early settlers to these shores. It is the desire to found and own a home that has brought immigrants here ever . since and this is the chief argument used today to induce immigration to his or any other country.

does in regard to any other human activity. Competition is keen, and only co-operation and standardization of products can command profitable mar-kets. The Maritime Provinces must look beyond the local market for their farm products and there they must be prepared to meet competition. We have good soil and climate and the cheapent of all forms of transportation—the good soil and climate and the cheape-it of all forms of transportation—the waterways of the world. Our farmers, our business men and our legislat.5: must get together and in the spirit of co-operation bring about a new era in agricultaral production and marketing. We are asking the rest of the country to remoxe disabilities under which we have labored since Confederation. There have babered since and for our are many things we can do for our selves, and an intensive development of agriculture is one of them.

IN the brief review of apple growing in New Brunswick submitted here with, the objects are to show the position of the industry today as comared with past con ook for the future.

The pioneer in developing the possibilities of apple growing in New unswick was Francis Peabody Sharp, of Woodstock, whose work with apples was carried on very extensively at Upper Woodstock and vicinity from 1860-1900. Mr. Sharp's work was dea it with at some length in an article entitled "Francis Peabody Sharp—His Work in Horticulture," written by Tappan Adney, and published in the Report on Horticulture for 1911.
