We have determined to publish the MIRAMICHI ADVANCE hereafter at ONE DOLLAR

a year, subscriptions to be prepaid in all cases.

We make this Liberal Offer to induce those who owe us small sums to pay up, as we intend, after the month expires, to place our unpaid subscription list in the hands of Messrs. J. B. Snowball & Co.

We have made arrangements by which we will furnish leading St. John Weeklies together with the ADVANCE at the following rates:—

ADVANCE AND FREEMAN, \$1.90 ADVANCE AND TELEGRAPH, 1.90 ADVANCE AND GLOBE, 1.90 ADVANCE AND NEWS, 1.90

SPECIAL PRIZES.

A SPECIAL PRIZE of \$5 will be given to the person who furnishes, within two months from date, the largest list of New Subscribers to the ADVANCE, singly, and another of \$5 for the largest list of Subscribers to the ADVANCE with any of the Weeklies in the above list.

Miramichi Advance. CHATHAM, THURSDAY, OCTOBER 17, 1878.

The Lumber Trade.

Latest advices from Great Britain give very discouraging reports from the general wood market and show that there is little present prospect of any improvement in the deal trade.

It is one of the drawbacks of ordinary farming in this country, that the farmer is not only a producer, but a consumer.

There is a corresponding indication of the present situation of the Reform party. The American papers say 'protection' is impossible, and ridicule the idea of a tariff.

There can be little room to doubt that the dominant party have promised the country much which they cannot undertake to put to the practical test of performance.

It is pretty generally admitted by those who are familiar with the North Shore of New Brunswick that it possesses some of the finest tracts of agricultural lands in the Province.

It is pretty generally admitted by those who are familiar with the North Shore of New Brunswick that it possesses some of the finest tracts of agricultural lands in the Province.

a new home abroad, is more prevalent. But it is difficult to prevent young people from seeking to establish themselves in those callings which appear to offer the greatest amount of variety in the experience of everyday life, and to this natural bias we believe the prevalent neglect of farming among us is chiefly due.

It is pretty generally admitted by those who are familiar with the North Shore of New Brunswick that it possesses some of the finest tracts of agricultural lands in the Province.

Hay comes by the car-load from Albert, Westmorland, Kings, etc., and oats by the schooner-load from Prince Edward Island, to be hauled through our fine farming lands to the lumber camps.

Thousands of bushels of potatoes are purchased yearly from farms hundreds of miles away. Even our vegetables are largely imported for daily consumption, while one half of our supply of turkeys, geese, ducks, chickens, etc., comes from other parts of the Province or from Nova Scotia.

If we had not a good home market for all kinds of agricultural products and if those who are engaged in farming were not among our most well-to-do people, there might be some ground on which to excuse the neglect which this great interest receives at our hands, but when those who do make farming the business of their lives are better off, as a class, than persons engaged in any other industry, and when thousands upon thousands of our countrymen are engaged in the pursuit of their own interests, it is evident that, as we have already said, there is room for missionary work among us in our agricultural interests.

When our farmers observe the risks incident to almost every other industry in which our people are engaged, and contrast their condition with that of their neighbors engaged in lumbering, fishing, or other pursuits they have reason to congratulate themselves on their lot. And the more they compare their condition with that of others, the more convinced will they be that there is the pursuit best suited to the country and also calculated to promote and encourage those conditions and qualities of body and mind which enable men and women to fulfil the requirements and discharge the highest duties of home life.

The Provincial Exhibition, Fredericton.

The Exhibition at Fredericton was brought to a close on Friday evening, and was one of the most successful that has ever taken place in this Province.

It is estimated that about 20,000 people visited the building while the Exhibition was in progress and it is expected that the receipts will cover all expenses, exclusive of the cost of the building.

The Montreal True Witness, a paper which has Conservative leanings, says: "There are already indications of uneasiness in the Conservative ranks, and there is a corresponding indication of the present situation of the Reform party."

The American papers say 'protection' is impossible, and ridicule the idea of a tariff.

There can be little room to doubt that the dominant party have promised the country much which they cannot undertake to put to the practical test of performance.

very ungrateful to those who give it their best services.

Good table codfish are sold at the wharves in Chatham and Newcastle for 84 per quintal.

NORTH SHORE herrings retail at from \$3.00 to \$3.50 a barrel (about 100 lbs) at the wharves in Chatham and Newcastle.

OSTERS of excellent quality and in good quantity were offered at 80c, and \$1 a barrel in Chatham on Saturday last.

NEW FISH SUPPLY.—Prof. Spencer T. Baird has discovered a new Flounder on the American coast. He says it is the Pole Flounder of Great Britain is only found in about 40 fathoms of water, has a mouth so small that it could, probably, not take the hook, but could, no doubt, be taken with the trawl at the rate of a ton a day by a small schooner and is, altogether, a valuable discovery.

UNNECESSARY THOUGHT.—No licenses for the bass fishermen were obtainable from the officers of the Fisheries Department this season until a week or more after the time fixed by the Regulations for that fishery to commence. Fishermen who applied for licenses, and could not obtain them, are we learn, now threatened with trouble by the Department. We are assured that the difficulty has grown out of the fact that the Inspector for the Province neglected to forward the blank Licenses. "We hope the Department will direct the Overseers to make allowances, in dealing with the fishermen for what is so evidently the result of a neglect of duty on the part of its chief officer in the Province. The fall bass fishery is a comparatively small one on the Lower Miramichi, but the application of the license system to it seems calculated to produce more inconvenience and annoyance all round than benefit in any respect."

BASS, TROUT AND SALMON.—J. A. Henshall, M. D., argues that salmon and trout must steadily decrease in America, owing principally to the advance of civilization, the settlement of the country, erection of dams, etc., and claims that they will be succeeded as the result of farm produce and stock as said to have been the best ever seen in New Brunswick, but the display of manufactures, though fair, is considered to have excelled on several previous occasions.

Europe, and of South America find means to get it at whatever cost. It is because it works like magic. It restores the hair to its youthful color and beauty, and robs approaching age of one of its disagreeable accompaniments. If you are getting bald try it. Try it if you are getting gray, or if you have any disease of the scalp. Try it if you wish a good hair dressing. It will not disappoint you.—Mirror (Ind) News.

Our Market Report.

St. John, N. B., Oct. 16, 1878. We have to report a very dull market on all staples. Money market is extremely tight, and the general want of confidence felt by dealers very much retards movement of goods, except for cash.

STERLING EXCHANGE is dull. Bank selling rate 3 1/2 for 60 days, 3 1/2 sight. Bank of England advanced rate of int. last week to 6 1/2.

FLOUR.—Market dull, Price 15 to 20 cents lower. Demand light.

CORNS.—Market steady, but demand very light. Only 1433 bbls received the last two weeks.

FISH.—Cod are in large supply with demand only light. Prices are getting steeper as receipts have fallen off the last 10 days.—Pollack are firmer at quotations.—Bay Herring—market well supplied. Prices have lowered about 25 cts. per bbl. Tendency now is to firmness.

FRUITS.—Apples.—No. 1 Gravensteins are in better demand. Prices have advanced to \$2.00. Great increase in consumption has checked the very rapid decline in prices. Rasins.—Old Layers are scarce and higher.

MOLASSES.—Fall inquiry is beginning to look up. Prices are no higher last the feeling is firmer.

MEAT.—Pork is dull, stock large.

WHEAT.—No. 1 Scotch is scarce. No. 2 Scotch is easy. Receipts of Scotch Refined only 21 hhd. the last two weeks. No. 1, very scarce.

GRAIN.—Very little doing. Rates are better on deals. Several vessels got 6 1/2 c. d., on deals to Liverpool, but they had to take birch at 25.

WHEAT.—No. 1 Scotch is scarce. No. 2 Scotch is easy. Receipts of Scotch Refined only 21 hhd. the last two weeks. No. 1, very scarce.

GRAIN.—Very little doing. Rates are better on deals. Several vessels got 6 1/2 c. d., on deals to Liverpool, but they had to take birch at 25.

WHEAT.—No. 1 Scotch is scarce. No. 2 Scotch is easy. Receipts of Scotch Refined only 21 hhd. the last two weeks. No. 1, very scarce.

ALSO—MARINE STORES. Ship Side Lights, Mast Head and Head Lights, Lanterns, Fog Horns, etc., etc.

MANUFACTURING AND REPAIRING. 627 Promptly attended to. JAMES GRAY, Chatham, June 26, 1878.

ROUND THE MOON.

CHAPTER VII.

A MOMENT OF EXCITEMENT. This phenomenon, curious but explainable, was happening under these strange conditions.

Every object thrown from the projectile would follow the same course and never stop until it died. There was a subject for conversation which the whole evening could not exhaust.

Besides, the excitement of the three travelers increased as they drew near the end of their journey. They expected unforeseen incidents, and new phenomena; and nothing would have astonished them in the frame of mind which they were in.

Their over-extended imagination went faster than the projectile, whose speed was evidently diminishing, though insensibly to themselves. But the moon grew larger to their eyes, and they fancied if they stretched out their hands they could seize it.

The next day, the 5th of November, at five in the morning, all three were on foot. That day was to be the last of their journey, if all calculations were true. That very night at twelve o'clock in eighteen hours, exactly at the full moon, they would reach its brilliant disc. The next midnight would see that journey ended, the most extraordinary of ancient or modern times.

Thus from the first of the morning, through the centuries silvered by its rays, they saluted the orb of night with a confident and joyful hurra.

The moon was advancing majestically along the stary firmament. A few more degrees, and she would reach the exact point where her meeting with the projectile was to take place.

According to his own observations, Barbicane reckoned that they would land on her northern hemisphere, where stretch immense plains, and where mountains are rare. A favorable circumstance if, as they thought, the lunar atmosphere was stored only in its depths.

"Besides," observed Michel Ardan, "a plain is easier to disembark upon than a mountain. A Selimite, deposited in Europe on the summit of Mount Blanc, or in Asia on the top of the Himalayas, would not be quite in the right place."

"And," added Captain Nichol, "on a flat ground, the projectile will remain motionless when it has once touched; whereas on a declivity it would roll like an avalanche, and not being secured it should not come out safe and sound. So it is all for the best."

Indeed the success of the audacious attempt no longer appeared doubtful. But Barbicane was preoccupied with one thought; and he was not wishing to make his companions uneasy, he kept silence on the subject.

The direction the projectile was taking towards the moon's northern hemisphere, showed that her course had been slightly altered. The discharge, mathematically calculated, would carry the projectile to the very center of the lunar disc. If it did not land there, there must have been some deviation. What had caused it? Barbicane could neither imagine, nor determine the importance of the deviation, for they were no pilots.

"Hid, however, that it would have no other result than bringing them near the upper border of the moon, a region more suitable for landing.

Without imparting his uneasiness to his companions, Barbicane contented himself with constantly observing the moon in order to see whether the course of the projectile would not be altered; for the situation would have been terrible if it had failed in its aim, and being carried beyond the disc should be launched into interplanetary space.

At that moment, the moon, instead of appearing like a disc, showed its convexity. If the sun's rays had struck it obliquely, the shadow thrown would have brought out the high mountains, which would have been clearly detached. The eye might have gazed into the crater's geyring abysses, and followed the capricious fissures which wound through the immense plains. But all relief was as yet veiled in an intense brilliancy. That they scarcely distinguish those large spots which give to the moon the appearance of a human face.

"Face, indeed!" said Michel Ardan, "but I am sorry for the amiable sister of Apollo. A very pitted face!" But the travelers, now so near the end, were incessantly observing this new world. They imagined themselves walking through the unknown country, climbing its highest peaks, descending into its lowest depths. Here and there they fancied they saw vast seas, scarcely kept together under so rarified an atmosphere, and water courses emptying the mountain tributaries. Leaving over the abysses, they hoped to catch some sounds from that orb forever mute in the solitude of space. That last day left them.

They took down the most trifling details. A vague uneasiness took possession of them as they neared the end. This uneasiness would have been doubled had they felt how their speed had decreased. It would have seemed to them quite insufficient to carry them to the end. It was because the projectile then weighed! almost nothing. Its weight was over decreasing, and would be entirely annihilated on that line where the lunar and terrestrial attractions would neutralize each other.

But in spite of his pre-occupation, Michel Ardan did not forget the morning report with his accustomed punctuality. They ate with a good appetite. Nothing was so excellent as the soup liquified by the heat of the gas; nothing better than the preserved meat. Some glasses of good French wine crowned the repast, causing Michel Ardan to remark that the lunar vines warmed by that radiant sun, ought to distill even more generous wines; that if, they existed. In any case the far-seeing Frenchman had taken care not to forget in his collection some precious cuttings of the Medoc and Cote d'Or, upon which he founded his hopes.

Reid and Regnault's apparatus worked with great regularity. Not an atom of carbonic acid resisted the potash; and as to the oxygen, Captain Nichol said, "it was of the first quality." The little water vapor enclosed in the projectile mixed with the

air tempered the dryness; and many apartments in London, Paris or New York, and many theatres are not in such a healthy condition. But that it might act with regularity, the apparatus must be kept in perfect order; so each morning Michel visited the escape regulators, tried the traps, and regulated the heat of the gas by the pyrometer. Everything had gone well up to that time, and the travelers, imitating the worthy Joseph T. Maston, began to acquire a degree of ebullient which would have rendered them unrecognizable if their imprisonment had been prolonged to some months. In a word they behaved like chickens in a coop; they were getting fat.

In looking through the scintilla Barbicane saw the spectre of the dog, and other divers objects which had been thrown from the projectile obstinately following them. Diana howled lugubriously on seeing the remains of Satelet, which seemed as motionless as if they represented on the solid earth.

"Do you know my friends," said Michel Ardan, "that if one of us had succumbed to the shock consequent on departure, we should have had a great deal of trouble to bury him? What am I saying! to stier him, as here he takes the place of earth. You see the opening body would have followed us into space like a remora."

"That would have been said," said Nichol.

"Ah!" continued Michel, "what I regret is not being able to take a walk around this moon. What voluptuousness to float amid this radiant ether, to bathe oneself in it, to wrap oneself in the sun's rays. If Barbicane had only thought of furnishing us with a diving apparatus and an air pump, I could have ventured out and assumed fanciful attitudes of feigned monsters on the top of the projectile."

"Well, old Michel," replied Barbicane, "you would not have made a feigned monster long, for in spite of your diver's dress, availed by the expansion of air within you, you would have burst like a shell, or rather like a balloon which has risen too high. So do not regret it, and do not forget this as long as we float in space, all sentimental walks beyond the projectile is forbidden."

"I do not know," exclaimed Michel, "with a fellow which provoked a sonorous echo in the projectile."

"No, I have not even thought about it," retorted Barbicane, in the same loud tone.

"Well, I know," replied Michel, "it was you, my friend, Nichol, who could no longer contain the growling of his voice."

"I shall speak if it suits me," exclaimed Michel, seizing his companions, arms by violence.

"It must suit you," said Barbicane, "with an eye on fire, and a stammering mouth, as if you who draw us into this frightful journey, and we want to know what for."

"Yes," said the captain, "now that I do not know where I am going, I want to know why I am going."

"Why? I am going, Michel, jumping a yard high, why? To take possession of the moon in the name of the United States; to add a fourth State to the Union; to colonize the lunar regions; to cultivate them, to people them, to transport there all the products of the sciences and industry; to civilize the Selimite, unless they are more civilized than we are; and to constitute them a republic, if they are not already one."

"And if there are no Selimite?" retorted Nichol, who, under the influence of this unaccountable intoxication, was very contradictory.

"Who said that there were no Selimite?" exclaimed Michel in a threatening tone.

"I do," howled Nichol.

"Captain," said Michel, "do not repeat thy insolence. I will knock your teeth down your throat!"

The two adversaries were about to fall upon each other, and the incoherent discussion threatened to merge into a fight, when Barbicane intervened with one word.

"Stop, miserable men," said he, separating his two companions; "if there are no Selimite, we will do without them. We have only to wait Selimite. Down with the Selimite!"

"The empire of the moon belongs to us," said Nichol. "Let us three constitute the republic of the moon."

"I will be the congress," cried Michel.

"And I the senate," retorted Nichol.

"And Barbicane, the president," howled Michel.

"Captain," said Michel, "do not repeat thy insolence. I will knock your teeth down your throat!"

The two adversaries were about to fall upon each other, and the incoherent discussion threatened to merge into a fight, when Barbicane intervened with one word.

"Stop, miserable men," said he, separating his two companions; "if there are no Selimite, we will do without them. We have only to wait Selimite. Down with the Selimite!"

"The empire of the moon belongs to us," said Nichol. "Let us three constitute the republic of the moon."

"I will be the congress," cried Michel.

"And I the senate," retorted Nichol.

"And Barbicane, the president," howled Michel.

"Captain," said Michel, "do not repeat thy insolence. I will knock your teeth down your throat!"

The two adversaries were about to fall upon each other, and the incoherent discussion threatened to merge into a fight, when Barbicane intervened with one word.

"Stop, miserable men," said he, separating his two companions; "if there are no Selimite, we will do without them. We have only to wait Selimite. Down with the Selimite!"

"The empire of the moon belongs to us," said Nichol. "Let us three constitute the republic of the moon."

"And I the senate," retorted Nichol.

"And Barbicane, the president," howled Michel.

"Captain," said Michel, "do not repeat thy insolence. I will knock your teeth down your throat!"

The two adversaries were about to fall upon each other, and the incoherent discussion threatened to merge into a fight, when Barbicane intervened with one word.

The Columbiad still buried in the soil of Florida? Is cotton and nitric acid wanted where with to manufacture the pyroxyle? Will not the moon again pass to the zenith of Florida? In eight days' time will not occupy exactly the same place as to-day?"

"Yes," continued Michel, "yes Maston will come, and with him our friends Elphinstone, Blonsmeier, all the members of the Gun Club, and they will be well received. And by and by they will run trains of projectiles between the earth and the moon!"

"Hurray for J. T. Maston!"

It is probable that, if the Hon. J. T. Maston did not hear the hurrahs uttered in his honor, his ears at least tingled. What was he doing then? Doubtless peering at the Rocky Mountains, at the station of Long's Peak, he was trying to find the invisible projectile gravitating in space. If he was thinking of his dear companions, we must allow that they were not far behind him; and that under the influence of a strange excitement, they were devoting to him their best thoughts.

But whence this excitement, which was evidently growing upon the tenants of the projectile? Their sobriety could not be doubted. This strange irritation of the brain, which he attributed to the Rocky Mountains, under which they found themselves, to their proximity to the orb of night, from which only a few hours separated them, by some secret influence of the moon acting upon their nervous system? Their faces were as rosy as if they had been exposed to the roiling flames of an oven; their voices resounded in loud accents; their words escaped like champagne corks driven out by carbonic acid; their gestures became wanton; they wanted to sing, to dance, to perform the most extraordinary feats of strength and agility; they felt as if they were in the presence of a great power, and they felt that they were in the presence of a great power.

"Well, I know," replied Michel, "it was you, my friend, Nichol, who could no longer contain the growling of his voice."

"I shall speak if it suits me," exclaimed Michel, seizing his companions, arms by violence.

"It must suit you," said Barbicane, "with an eye on fire, and a stammering mouth, as if you who draw us into this frightful journey, and we want to know what for."

"Yes," said the captain, "now that I do not know where I am going, I want to know why I am going."

"Why? I am going, Michel, jumping a yard high, why? To take possession of the moon in the name of the United States; to add a fourth State to the Union; to colonize the lunar regions; to cultivate them, to people them, to transport there all the products of the sciences and industry; to civilize the Selimite, unless they are more civilized than we are; and to constitute them a republic, if they are not already one."

"And if there are no Selimite?" retorted Nichol, who, under the influence of this unaccountable intoxication, was very contradictory.

"Who said that there were no Selimite?" exclaimed Michel in a threatening tone.

"I do," howled Nichol.

"Captain," said Michel, "do not repeat thy insolence. I will knock your teeth down your throat!"

The two adversaries were about to fall upon each other, and the incoherent discussion threatened to merge into a fight, when Barbicane intervened with one word.

"The empire of the moon belongs to us," said Nichol. "Let us three constitute the republic of the moon."

"I will be the congress," cried Michel.

Medical. **CATARRH** NEVER-FAILING RELIEF AFFORDED BY SANFORD'S RADICAL CURE.

It is a fact that catarrh is not a disease, but a symptom of a disease. It is a disease of the mucous membrane, and is caused by a variety of causes, such as cold, wet, and exposure to the elements.

From Hon. Theo. P. Bogert, Bristol, R. I. I have been afflicted with Catarrh of the Bladder for many years, and have tried every remedy, but have not obtained any relief until I used Sanford's Radical Cure.

10 YEARS A SUFFERER. From Hon. Theo. P. Bogert, Bristol, R. I. I have been afflicted with Catarrh of the Bladder for many years, and have tried every remedy, but have not obtained any relief until I used Sanford's Radical Cure.

CATARRH AFFECTIONS. Such as Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Lungs, Catarrh of the Throat, Catarrh of the Nose, Catarrh of the Ears, Catarrh of the Eyes, Catarrh of the Skin, Catarrh of the Hair, Catarrh of the Nails, Catarrh of the Teeth, Catarrh of the Gums, Catarrh of the Lips, Catarrh of the Tongue, Catarrh of the Throat, Catarrh of the Lungs, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh of the Prostate, Catarrh of the Rectum, Catarrh of the Stomach, Catarrh of the Intestines, Catarrh of the Liver, Catarrh of the Gall Bladder, Catarrh of the Pancreas, Catarrh of the Spleen, Catarrh of the Kidneys, Catarrh of the Bladder, Catarrh of the Uterus, Catarrh of the Vagina, Catarrh
