FLORENCE KINRADE'S MOTHER ON THE STAND; DETECTIVE TELLS OF INTERVIEWING FLORENCE

Important Witnesses at Last Night's Murder Inquest, But Police Are CAMP AGAIN Still Completely Baffled and No Solution in Sight.

Contradictory Statements Made By Mrs. Kinrade

Police Officer Relates Story Told Him By Florence Immediately Following the Shooting of Ethel, Which Differs Radically From Statement Made By Her When On Witness Stand-Ernest and Gertrude Kinrade and Neighbors Give Evidence.

Hamilton, March 11.—Another phase of their objections. Florence returned the Kinrade mystery was presented to the coroner's jury last night, and delighted to see her. In this pool he had found a bullet and a tooth, indicating that the girl had fallen forward, whereas when the body was found she was lying on her back. He clearly intimated his opinion that Ethel was sitting in a chair when shot, preparing to go out, as the presence of her rubbers and furs close at hand

A number of neighbors also gave

evidence relating to the events fol-lowing the tragedy, and all bore out the claim that the Kinrade family was a very quiet one, that lived almost entirely to itself. What Florence First Said.

Mrs. Hickey, who lives across the road from the Herkimer residence, and to whose house Florence fled after the tragedy, declared positively the girl's first words were, "Ethel has been shot, shot six times." She also was certain

that Florence when she entered her house was wearing her hat. Dr. McNichol disposed of the theory that the girl had been dead for some long period of time before he was called, and a summing up of the evidence presented so far fails to indicate that the crown have any great surprise to spring or anything to offer beyond throwing doubts on the thug The affair becomes theory. The affair becomes more mystifying the more it is probed and is still enshrouded in as great a darkness as on the day of the murder.

There has been no estrangements whatever among children, or between herself and her Ernest had married about six years ago, and the family liked his wife well enough, they being all friendly together. They thought wife was rather young, and would have preferred that he had not married, but they got along pleasantly. "None of the other members of the family ever married?" asked Mr. "Not that I know of," was the reply.

"But you would have known if any of them had married?" A .- "Yes, I guess we would have known." Witness had known of the engagement of her daughter Florence to Mr. Wright a year ago last October. "When I was in Toronto Detective Miller came to me alone and got the keys. I handed them over without any hesitation, showing my confidence in them, for this would have given some men the chance to put a revolver in the house and make it appar that Florence used it."

Mr. Kinrade complained about the sensational manner in which the press had treated the case. He said that he had lived all his life in Hamilton, and was entitled to better treatment at the hands of the papers, which, he said, took chances on having to pay damages for printing so many untrue statements about the family.

"The papers evidently made lots of money and increased their circulation over this case and decided to take chances," he said. He further stated that he was considering the advisability of entering suits for libel against the majority of them. Every paper, he said, had been saved, and in the near future he will read them carefully and decide what to do. Mr. Kinrade thinks that his daughter Florence fainted, which would account for her not having a clear remembrance of the details of the shooting. The inquest will likely be finished tonight. BABIES SUBJECT TO

COUGHS AND COLDS KICK OFF THE COVER AND TAKE COLD.

How One Baby Was Cured of a Dreadful Cold by Chamberlain's Cough Remedy.

All the world loves a baby and everyone is more or less interested in their health and happiness. There probably never was a baby that did not kick off the covers and take cold; in fact, babies are particularly susceptible to colds and croup, and the favorite remedy for these ailments is Chamberlain's Cough Remedy. It always gives quick relief and is pleasant and safe to take, in fact, it contains nothing injurious. Mothers have become acquainted with this fact and do not hesitate to give it to their babies when such a preparation is required. Mrs. John D. Harmon, of Melfa Station, Va., says: "About two weeks ago our baby had a dreadful cold, and at one time I feared it would have pneumonia, but one of our neighbors told how Chamberlain's Cough hemedy had cured her little boy, and I began giving it to our baby at once and it soon cured her. I had tried other remedies and they all failed to do her any good. Our baby is now well and we heartily thank Chamberlain's Cough Remedy, for it cured her. I cannot recommend it too highly or say too much in its favor. I hope all who read this will try it and be convinced as I

gineers on the preliminary survey in connection with the proposed railway by the minister of railways and can-

the road to the former point would be correspondingly less. The engineers estimate that a line to Fort Churchill Port Nelson, which is eighty-five miles nearer and through an easier country, the cost would not exceed \$8,000,000 Hitherto, Fort Churchill has been generally regarded as the point to which the road would be run, on account of the fine natural harbor and deep anchorage there, and it may be that the engineers, in showing, evidently, a preference for Port Nelson, have in view solely the distance and less diffleulty of construction. Later investigation will doubtless satisfy the Government as to which of the two points is best adapted for terminal purposes. It is interesting to learn from an English paper that three powerful steel steamers were recently launched eventually for the carrying trade from form Fort Churchill to British ports, and until the Hudson Bay Railway is completed they will be used in the seal fisheries. The Winnipeg Free concrete evidence that the shipowners are keenly alive to the fact that the construction of the railway to the bay will open up a profitable route for freight-carriers built with a view to the conditions obtaining in Hudson Bay navigation. With the harbor, bay and straits open for navigation to ordinary sea-going vessels for four months of the year, steel vessels such as these, specially built for working in ice-cumbered waters, should be able to lengthen the open season appreci-

No suggestion of confiscation of vested interests is made. The committee would permit persons enjoying title or precedence to continue in such enjoyment during life. Was Charged With Complicity in Assassination of Lincoln --Hid in Montreal.

Montreal, March 12.—The recent celebrations in honor of the 100th and niversary of the martyred president, Abraham Lincoln, has called up once more the great conspiracy to abduct him, which finally ended in his cowardly assassination at Ford's theatre Washington, on the evening of the 14th of April, 1865. The dastardly crime shocked the whole civilized world, and nowhere was the assassin, John Wilkes way system in the world it will have Booth, more execrated than in Montreal. He had been playing in Mr. and Mrs. Buckland's stock company at the Theatre Royal for a short time, and made the old St. Lawrence Hall his temporary home. He made plenty of friends, and it was a grievous blow to his friends and colleagues on hearing of his horrible crime. The whole city was aroused and stunned at it. He paid the penalty by being shot down a few days after Lincoln's death, in the barn of a man named Garrett, not far from the Capitol, by a trooper of the Sixteenth New York Cavalry, under the command of Lieut. E. P. Doherty, a Canadian, of the Eastern Townships All the conspirators suffered the death penalty, except John H. Surratt, who, in a statement in the New York Times of Sunday last, a reproduction, it is alleged of one made in 1870, tells of his escape to Montreal and his subsequent movements before getting away from

How Surratt Escaped. Surratt had been a companion of Booth, and a notorious secessionist of Southern Maryland. He was at college when the war broke out, and came as a messenger to southerners here. He has never denied knowing the parlor last night he said: "How old of the early plot to kidnap Lincoln, but insisted he knew nothing of the plot to assassinate. His account of his short residence in Montreal is not exactly correct, as those who were living at the time can show. He was said to be in Elmira at the Brainard Hotel registered as "John Harrison," at the time of the murder. He next appeared in St. Albans and reached Montreal four days after Lincoln's death. The city was filled with United States detetctives and the local staff, and it was hard to get near a "bar" without running the gauntlet of a score of sleuths hot on Surratt's trail, for, after several checks, the Government detectives

from Washington were certain of having "nosed" the quarry, but it was another thing to capture it. He was for a few days hidden in an insurance company's office by the late Alfred Perry, the veteran fire marshal, but things became so warm that it is alleged that Mr. Perry, on hearing of Surratt's record, told him to skip into the country, which he did. slight disguise, he actually walked up to the register of the St. Lawrence Hall, and scribbled an illegible name, the "sleuths"; then he calmly walked out of the Craig street entrance with his friend Perry and a southern banker, and at once disappeared from Montrealers' knowledge for many years. Just as he had passed down Craig street a big sleuth just arrived from Washington rushed at the register. He made a jump and called on his corps to get traps and cut off every road leading to the country villages. He had at once recognized the disguised signature, and opened out on his men in Mr. Plumpton-In? You mean bursting vigorous language for their stupidity and neglect. Surratt, whose family were Roman Catholics, found at St. Liboire village a kind friend and protector in Abbe Boucher, of St. Liboire who hid him from April to June, and another priest sheltered him from July to the second week in September, when he was taken to Quebec by the two reverend fathers and seen safely on board the Allan steamship Peruvian,

bound for Liverpool. Surratt left for Rome in November and reached there in safety, despite the army of United

States and European detectives seeking his arrest.

Enlisted as Zouave. He enlisted in the Papal Zouaves and did service for several years in No. 9 Company. His escape to Europe made the United States sleuths keener than ever on the hunt, but it was only when he was denounced by a Canadian Zouave, named Ste. Marie, whom he had offended in Baltimore years previously. that the wonderful detective force of the world got their hands on him. He was arrested in the barracks at Vitry, near Rome, by the order of the Government of the Papal States. The arrest took place on Nov. 7th 1866, and he boldly escaped from the military escort, by a jump across a deep abyss on his way to Rome. He got to Alexandria, Egypt, where he was again arrested on Nov. 27th by the American consul-general, and sailed for the United States on an armed cruiser on Dec. 21. He was kept in irons all the voyage. He was tried June 10. 1867, the jury disagreeing. This trial according to Miss Clara E. Laughlin's recent "History of the Death of Lincoln," lasted 62 days. Surratt was combailed out on \$25,000 bonds. He was tried a second time the turn feiling to tried a second time, the jury failing to agree. He is now a highly-respected citizen of Baltimore, living down all thoughts of the terrible tragedy.

Althe same that were drafted in Scran-Plaid A man who was leaving the rooms ton last October but early accosted him.

A Flat Refusal.

"The operators declined to accede to the demands. The chief reason offered for the rejection was that any increase in the cost of production would necessitate an advance in the price of coal, Lady Lannesley, who seldom departs ticable. The operators said that wages and that such an advance was impracin the anthracite mining industry were much too intent upon his own affairs be increased. already at a high level and could not "The announcement of the operat-

ors' position was followed by a free discussion of the damands, each side stating its views in relation thereto. The operators declared their willingness to reopen the eight-hour question and other questions passed on by the anthracite strike commission of 1902. They also declared themselves opposed the mine workers' proposition for a ne-year agreement.

"They decline to recognize the United Mine Workers of America, hiefly on the ground that it was conrolled by bituminous workers. They said they met Mr. Lewis and his committee as representatives of the anthracite mine workers and not as officers of the union. The operators called upon the report of the strike commission to support their refusal to deal with the United Mine Workers. "At the end of the discussion the operators made the definite proposition to renew the present agreement

for a term of three years." The present agreement, made in New York three years ago, when John Mitchell led the miners in the negotiations, is identical with the award of the strike commission made in 1903 after the strike of 1902. Three years ago miners made numerous demands, but all were rejected, and they accepted the renewal of the strike commission award.

What the Men Want. The miners' demands today were: First, that an agreement shall be

To Be Dyspeptic Is To Be Miserable.

Dyspepsia is the prevailing malady of civilized life. It is largely due to gross errors in diet, over-eating, too free indulgence in stimulants and over-taxing the stomach with indigestible food, eating too rapidly without chewing the food sufficiently, indulging in hot bisouits, pastry, pickles, confectionery, etc.

Constipation, headache, heartburn, sour atomach, distress after eating, belohing of wind, faintness, and fullness and distention of the stomach are a few of the many distressing symptoms of the poor, weary dyspeptic. Burdock Blood Bitters regulates the stomach, stimulates the secretion of the saliva and gastric fuice to facilitate digestion, removes acidity, purifies the blood, and tones up the system to full health and vigor, and thereby cures dyspepsia and all its tributary diseases.

Mr. Amos Sawler, Gold River, N.S., writes:- "I was greatly troubled with dyspepsia, and after trying several doctors to no effect, I commenced taking Burdock Blood Bitters and I think it is the best medicine there is for that complaint."

The farmers in this vicinity are very much interested in the proposed traction line; in fact, it is understood that some along the line have offered free right-of-way. The line would be a great boon to this community, as the stages, as now run, are altogether inadequate to accommodate the people. The Farmers' Club, which meets in the schoolroom at school section No. , is in a flourishing condition. SERVIA MORE PEACEFUL

Has Abandoned Demand for Territorial Compensation.

Berlin, March 11 .- The latest Servian circular note is that she does not desire to provoke war with Austra-Hungary, but maintains that the question of annexation of Bosnia and Herzegovina should be regulated by the powers. It was delivered at the foreign office here this afternoon. The impression caused by Servia's renunciation of territorial compensation is favorable and is regarded officially as a peaceful sign. The reference to mutual material interests is considered an indication of Servia's willingness to discuss the Austro-Hungarian proposal regarding the mmercial treaty.

It is not felt, however, that the situation has been cleared by this communication. If Servia gives assurances that she does not wish war with the dual monarchy, yet the fact remains that her military preparations are being continued and are causing remarks on the part of Austria-Hun-

Turkey is also beginning to show nervousness in the matter. It is not known here whether Servia will give a direct reply to the Austrian proposal were in the city yesterday. Toronto, March 11 .- Hon. Frank Cochane presided at the railway committee today in the absence of Hon. J. S. Hendrie, who has gone away for his health. The bill to incorporate the People's Railway, originating at Berlin through Guelph, Elora and Fergus, was passed after some discussion.

It was provided that the salaries of the officers should be subject to regulation by the railway board.

St. Lawrence Railway, proposed by E. Fripp, was passed. On suggestion Mr. Downey it was made clear that the right to sell electricity should be subject to regulation by the hydro-electric con

FIERY COUNSEL

Clash Was Feared in Court Between Carmack-Cooper Lawvers.

Nashville, March 11. - The fourth day of the arguments in the trial of Col. Duncan Cooper, Robin Cooper and John D. Sharp, for the murder of former United States Senator E. W. Carmack, closed tonight with Gen. Washington, of the defence, in the middle of his argument, and two more attorneys to follow him. At this rate, it is doubtful whether the case will go to the jury before Saturday. Gen. Washington finished his ninth hour of argument, when court ad-

journed at 5 p.m., and he announced that he would "conclude some time to morrow." He will be followed by Judge Anderson, who is expected to make the main argument for the defence. Then Attorney-General McCarn will close for the state. Judge Anderson says he will require about six or eight hours or his speech, while Mr. McCarn declares that four hours will do him. Judge Hart today again requested the attorneys to submit instructions for the charge, and complained that they were slow about complying.

Gen. Washington's argument today was full of figurative language, and invective. He made savage attacks upor the state's counsel and singled out Attorney-General Garner as his special Garner is reputed to have nearly as

flery a temper as has Washington, so counsel for the state insisted upon Garner's withdrawing from the room during Washington's address.

GRAIN PRICES CONTINUE FIRM

The Farmers Are Having Merry Time Now.

OATS SOLD FOR

Wheat Was Scarce and Sold Readily at \$1 05 a Bushel.

The local grain market was again characterized today by strong bid-

The farmers, who proved that they were in the business for the money, did much to help the battle along. One man brought in two loads of oats. A buyer who did not wait to make any examination of the quality offered the owner \$1 35 per cwt. He was about to bounty close the deal, when a couple of his rivals turned up. The second man up got the grain at \$1 35, and in a minute a wordy war was in progress. lasted for some time, and all promised faithfully to bid it up to any price if it would cause the slightest inconvenience to any other man in the business.

Prices Firmer. A large supply was brought in, but the prices did not drop any. In fact, they appeared firmer, and from the appearance of the market the quota-

tions may go higher. The buyers have orders for any quantity, and all are willing to pay the highest prices. Wheat was scarce and sold readily at \$1 05 per bushel this morning.

A good suplpy of hay was on hand, and prices came down slightly. Quotations ranged from \$9 50 to \$10 50. Straw was quoted at \$6 per ton. quotatiosn.

Miners Say Will Not Qualify Demands

Rejected by Owners. Philadelphia, March 12.-The subcommittee of the anthracite mine workers and operators will hold another meeting this afternoon and endeavor to reach an agreement to go into effect at the expiration of the present working arrangement between the men and their employers. The flat refusal of the operators to make any concessions have greatly depressed the reports of the miners, While they expected the president would refuse to concede to the principal demands, they did not expect that they would refuse all of them, President Lewis, of the Miners' Union, has not announced what his

arrangements will be, but it is probable that he will accept the operators proposition if they will consent to 71/4 make changes in the working arrangements for which some of the miners in different sections of anthracite mines are clamoring. Judging from the attitude taken by

that they will concede this to the men. If it turns out to be the case it is declared by the men that they will aconference of the anthracite miners to decide upon the next move. that everything we have asked for "Then you look for trouble in case the operators insist on their rejection

of your demands, and refuse to recognize the union? "I am not predicting trouble nor looking for it. All I have to say is that we will insist upon our demands, and will make our attitude very clear to

In view of the probable disagree ment of the conference today it may be stated positively that there will be a convention of the three district unions of the anthracite region in the latter part of this month to consider the question of continuing work after the expiration of the present years' agreement on March 31.

HASTY MR. FOSTER

Attacks Civil Service Increases and Has To Be Set Right.

Ottawa, March 11 .- Hon. George E. Foster brought up the question of increase of salaries of civil servants today. He objected to the flat increases of \$150, because it placed good men and bad on the same basis, he declared.

He criticised particularly increases given to outside civil servants to the number of 1.577 brought into the inside service under the new act. He instanced cases in which increases of more than the individual's previous salary had been given, these men being further entitled under the act to

the flat increases. Three of the ministers had made these increases, Hon. Pugsley, Fisher and Oliver, the first two by order-incouncil, but Mr. Oliver without consulting anybody. Mr. Oliver had made 116 new appointments, which was against the law, said Mr. Foster, there being no appropriations for them by Parliament.

Hon. Mr. Fisher showed that Mr. Foster had been hasty in drawing his conclusions. Of the 146 increases in his department, 108 got their increases at the first of the fiscal year, before he knew what the provisions of the civil service act would be. Twentynine of the increases were given with the purpose of putting them in the class to which they were entitled to enter under the new bill. All increases were made on the recommend. ation of the heads of the departments. It was true that the majority of those who got increases were men appointed since 1896, and the reason was that previous to 1896 the department of agricultural was starved by the Conservative Government. Many of the sub-departments did not exist, he said,

THINKS EARTH SAFE FROM ANNIHILATION

Professor Says There's Only Remote Chance of Actual Collision.

Cambridge, Mass., March 11 .-Commenting on the assertion made recently by Dr. Percival Lowell that the earth was in danger of colliding with some large astral body and thus being destroyed, Professor W. H. Pickering, of the Harvard Astronomical Observatory, says that the chance of such an event is about "one in one hundred million, raised to the one hundred

millionth power." "A more possible danger," he added "but nevertheless a highly improbable one, is that the solar system in its journey through space may come close enough to some such dark body as to cause a disturbance in the orbital motion of planets and perhaps dry some of them, the earth included in to space. The entire danger is so remote, however, that there need be no popular apprehension about it."

WHOLESALE SCHEME OF STREET PAVING

Board Proposes To Initiate on Many Cross Streets-Contracts Let.

Awarding tenders and considering the estimates, occupied the attention of the board of works last evening, and as would be expected the session was somewhat long. The figures are \$27,329 in advance of last year. The increase is due to several large items, some of which will

likely be removed when the final revision takes place. One of these is the item of \$6,000 for a greenhouse in Victoria Park. This matter has come up for years. Then there is another item of \$5,

000 for a storm sewer on Maitland street. This, too, was in last year, but was not passed, and it probably will not pass this year, owing to the fact that a storm sewer scheme will be drafted covering the whole city, to be paid for by a debenture issue. There is an item of \$3,000 for a new street cleaning plant, and another of \$1,600 for breaking stone, adding somewhat to the expense of the com-

mittee-both unusual expenditures. On ordinary expenditure the increase is not marked, and when the estimates are cut down they will be but little in

Cost of Parks.

Parks Commissioner Pearce's figures or ordinary park expenditures are ittle in advance of other years, but he has added a great deal for other matters. The sum asked for is \$9.319. Of this \$6,000 is for a new greenhouse and \$2,000 for lavatories for Victoria Park. Then there are smaller sums for ma terial for children's playgrounds, and other expenses. It is not probable that they will be passed as they stand. They will be sent on to the finance committee to be dealt with.

The Estimates.

The estimates are as follows: Streets and general ex-required . ne-breaking plant City hall, ordinary expenses 1,800 City hall, repairs to boilers Storm sewer on Maitland Bridges-Repainting all of penses
Storage building and grounds
