

WEAK AND NERVOUS

A Condition Due to Watery Blood
—Easily Corrected Through the Use of Dr. Williams' Pink Pills.

Thin, pale girls lack the power of resistance to disease that rich, red blood gives. Nervous breakdown is the result of thin blood. So is indigestion, aches, backaches and many other troubles. Girls suffering from thin, impure blood need just the help Dr. Williams' Pink Pills can give. For many years Dr. Williams' Pink Pills have been a world-famous blood-builder and nerve restorer. They actually make new, rich, red blood which imparts new vigor and life to all the organs of the body. Their first effect is usually shown by an improved appetite; then the spirits revive and restlessness at night gives way to health restoring sleep. For sufferers from anemia, nervousness, general weakness or physical exhaustion Dr. Williams' Pink Pills are a restorative of the utmost value. This is proved by the experience of Miss Sarah A. McEachern, R.R. 3, Brule, N.S., who says:—"About three years ago I became very weak and nervous. I had pains in my side and back. I also had frequent pains in the back of my head and neck. I was very pale and very weak. I had attacks of nervous irritability, and at times I was so nervous that life seemed hardly worth living. While in this condition a friend strongly advised me to take Dr. Williams' Pink Pills. I began taking these pills and used them for about two months with the result that there was such an improvement in my condition that friends would ask me what I was taking, and I was only too glad to tell them it was Dr. Williams' Pink Pills. I am now enjoying good health and am glad to give this statement for the benefit it may be to some other sufferer."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When Engine Squeaks; Beware.
If the engine of the new car suddenly starts a squeaking noise that grows louder and louder until it shows signs of developing into a genuine screech, by all means stop. Do not force the engine along in the belief that the noise will "wear away." Stop, let the engine cool, put two quarts of oil in the gas tank and proceed slowly. Chances are that a tight piston is starting to score its cylinder.

A Puzzle.
"Daddy, is a man allowed to have only one wife?"
"That's all, my boy."
"Then why does it say in the Prayer Book that he must take four better or four worse?"

OCEAN AND MOUNTAIN BARRIERS

Scientists Think They Caused Division of Men Into Races.

The sketch shows the Nordic and Mediterranean types. These are divisions of the Caucasian race. The sketch also shows types of two other races—the American Indian, native of the North American continent, and the Austroloid, a primitive race found in Australia and New Guinea.

Secrets of Science.

By David Dietz.
One of the outstanding facts about man today is that he is divided up into races, each possessing distinguishing characteristics.

Two great opposing forces have been at work throughout the story of mankind. One has been the tendency toward differentiation.

The other has been assimilation, the intermingling of different types tending to bring about similarity.

Different varieties of men migrating about the world and intermingling with the types they met have tended to make for assimilation.

But certain great barriers, such as oceans and high mountain ranges, have tended to preserve differentiations in certain great areas.

These differentiations are thought to be the results of varying climates, foods, living conditions and the like.

Therefore we find certain characteristics prevailing throughout great areas.

Thus in the north and western Europe great numbers of peoples are characterized by white skins, fair hair and blue eyes.

About the Mediterranean we find people with white skins but dark hair and black eyes.

In eastern Asia great numbers of people have yellowish skins, straight black hair and more or less high cheek bones.

Most of the natives of southern Africa have black skins, flat noses, and thick lips.

The ethnologist, who studies races, divides mankind up into races which he has assigned names.

Thus the race which spread over Europe, the Mediterranean area, and western Asia, is known as Caucasian.

It is divided into three main groups. The first include the northern blonds or Nordics. The Scandinavians, Scots and northern Englishmen are Nordics.

The second division is the Alpine. The third is the Mediterranean or Iberian.

In eastern Asia there is a second race known as the Mongolian.

In Africa we find the Negro race, and in Australia and New Guinea, a black primitive race named the Australoids.

But we must remember that there are many groups of peoples which do not belong to it well into any one of those groups and others which are undoubtedly the results of mixtures.

Three thousand years ago, as already pointed out, man learned to make implements of iron.

From that point on, we must leave the story of man to the historian.

We started out with a general survey of the universe. Then we narrowed our survey to the earth upon which we live.

Let us now narrow our field to the specific phenomena of life.

Next article—What Is Life?

Garden Tragedy.
One of the best schoolboy hooligans that we ever heard of is the definition of rhubarb as "a kind of celery gone bloodshot."

An Iron That Wiggles.
An electric iron specially shaped to wiggle its way into the corners and gathers of garments has been invented.

Jealous of His Work.
Many wives are jealous of their husband's work and regard his job as a necessary evil. Instead of as the goose that lays the golden eggs of food and warmth.

These wives are jealous of the time he spends at the office or shop, resentful of his enthusiasm for his job, jealous, above all, of the women he encounters in his work—the typists at the office, the girl assistants behind the counter.

All this is very foolish and unjust. A wife who shares in her husband's success is not playing the game if she fails to take an interest in the means by which he has attained it.

She may feel rather at sea when he waxes eloquent over carburetors and sparking plugs, but the least she can do is to take an intelligent interest in the things that mean bread and butter and the very roof over her head.

George is a perfect slave to the workshop," complains Hilda fretfully to a neighbor. "He doesn't get home until after six, and then spends most of the evenings poring over books on engineering, or making experiments in the shed he has fitted up at the back."

It is perhaps natural that Hilda should feel hurt and lonely, but she must remember that she will benefit as much as George will when the better post for which he is qualifying comes along.

If George were always at Hilda's disposal in the evenings, and took no interest in his work once the factory gates were shut, he would never rise out of the rut.

They might jog along happily at first, but as expenses increased without a corresponding increase in wages, Hilda, as the housewife, would be faced with the thankless task of making a dollar do the duty of a dollar and a half.

To find fault with her husband because of an enthusiasm that will probably save her from this unpleasant fate is, of course, to act in a very short-sighted manner.—D. H.

Minard's Liniment for Burns.
Nose Pinching for Sheep.
A sheep's nose, like a man's thumb, seems to be its own particular property, so the Michigan State College has adopted a nose pinching system to identify the fleecy animals. After three years of experimenting college specialists say there is yet to be found two sheep with similar nose lines.

Don't Stir Muddy Water.

Some people have the knack of interfering with things. Their delight seems to be to raise the dust, disturb the mud, arouse sleeping dogs.

If they have a grievance they take a supreme delight in nurturing it. They chew their pills and always seem to have a nasty taste in their mouth.

What earthly good can it do to make an unpleasant noise, when by silence peace would reign supreme? Nothing is more annoying than to be compelled to live with people who take an interest in stroking one the wrong way and probing at a sore place. If they know of a weakness of ours, such people are continually exposing it or reminding us of it.

A lot of otherwise harmless things will, if tampered with, give pain. If you know that nettles sting, why touch them? In a small boat we remain still because there is danger in our movement. Then why irritate and create temper by lingering upon those places of life which we know are sore and give rise to bad feeling?

It is far better to smooth down the rough places. Never argue with a man about his faults. He knows them much better than you do. Tell him, in kindness, about them, but be careful not to trespass upon his own preserves. Men do not require us to inform them of their unhappy memories. But they do need someone who will point them to a loftier ideal. To the mistakes of another it is kind to be blind and to look for the virtues.

Never be a party to the digging up of old offenses. It is cowardly and unkind. If a man has paid the price for his offense it is not our job to remind him of that which is no longer a debt. Those who do most in life to help others along are the ones who can give a cure for a wound; who will heal sore places and show big-heartedness.

We are all too fond of recalling the past. We find a spice in remembering the faults of others.

Keep the mud at the bottom of the pond. Plenty without your aid will do the miserable work of stirring it up and discoloring the purities of life. Let's all resolve to do our best to keep them separate.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child.

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sardines Build Cities.
Over in Italy, very close to the wonderful city of Trieste, are a dozen somewhat small cities which are still owing their existence to the fact that all around Trieste the Adriatic Sea is filled with small sardines.

From Trieste one can take a little steamer in almost any direction; such steamers sail every few minutes from the gigantic wharves of Trieste, and in an hour land at a city built up for centuries on the sardine industry.

One of the quaintest cities in Northern Italy is the city of Pirano, a matter of about fifteen cents steamer fare from Trieste. It is built at the foot of a small but steep mountain, with old and strange buildings reaching to its very top. Its streets are tiny thoroughfares running in any direction except in straight lines, and many of the houses extend over the streets. It is well worth seeing, as are the other cities all around, for all of them live on sardines.

However, sardines are served there in every form, as they are in Trieste, and it is certainly strange for a Canadian to get for his meal a plate of fresh sardines fried just like any other fish.

Thus it is learned that sardines do not always live in cans.

The flesh tastes very good, equal to the average fish flesh, but what surprises the Canadian is to find no flavor of oil or of smoke, not even of mustard, just plain sardine.

The towns all along the coast are strewn with small meshed nets, and everywhere one sees women carrying huge baskets on their heads, baskets filled with sardines being brought from the fishing boats to the canning factories.

Stupid Fellow.
Arctic Explorer—"Yes, right in front of that roaring stove it was 49 below zero!"
Mamie—"Well, you didn't have to stay right by the stove, did you?"

Passed the Century.
Aged 102, Mr. John Balster has died at Salisbury, England.

Minard's Liniment for all pains.

Summertime and the Baby.

In very hot weather the baby needs less food, but more cool boiled water to drink.

Baby's clothes should be loose and light. Protect the head and eyes from strong sunlight.

Much of his comfort depends on the condition of his skin, and nothing makes for baby's happiness in the summer as much as a warm bath morning and evening, and on very hot days, sponging before the afternoon sleep also. Keep the skin clean, dry and powdered and baby will be less restless.

Baby needs fresh air quite as much as fresh food. Keep him out of doors as much as possible, but avoid the sun in the middle of the day. In very hot weather take him out early in the morning and in the later afternoon. Take the baby to the beach and the country whenever you can. The change will be good for him, provided you watch his food and don't tire him too much.

Breast milk is the best for the summer. Give cool boiled water frequently between nursings in the summer. It is safer to postpone weaning until after the hot weather.

Summer diarrhoea is easier to prevent than to cure, and it can usually be prevented by (1) Boiling all milk in summer; (2) Care in preparing baby's food, and diluting it during very hot spells; (3) Stopping all food if acute diarrhoea begins. If the bowel movements are very frequent and the baby has vomiting and fever, stop all food, give only boiled water and call the doctor at once.

The summer is the most wonderful time of the year for the baby and he will reap great benefit from his outings if care is taken in regard to his care, particularly his food.

The Jovial Frederick.
During the Crusades of the thirteenth century, when all Europe had one idea in view, that of taking Jerusalem from the heathen Turks, Emperor Frederick of Germany was what would today be called a good fellow, and a jolly one at that.

Frederick's religious views, however, were not suited to the spirit of the day and finally ended in his being excommunicated from the church.

Nevertheless, Frederick gathered about him a few soldiers and started on a private Crusade to take Jerusalem from the Arabs.

Arriving near the historical city, Frederick sent a courier to the Sultan with a message which said:—"Out of the goodness of your heart surrender to me the city of Jerusalem as it is that I may be able to lift my head among the kings of Christendom."

The Turks were ever and always seeking wit and humor and this request struck the Sultan as being very humorous. The fact that the city was deemed absolutely safe, only made the request funnier.

Accordingly the Sultan not only turned the city of Jerusalem over to Frederick, but sent him elephants and camels and food as well as a great bevy of dancing women.

Frederick crowned himself king, set about to have a good time and after a merry season personally thanked the Sultan for his goodness and went to Italy, gathered a great body of troops and for thirty years fought Rome, driving Pope Innocent into France.

In the end Frederick died with misfortunes crowding about him.

Definition.
"What do they mean by raining cats and dogs?"
"That's what you call beastly weather."

A Simple Beauty Secret That Every Woman Should Know

According to the old adage "beauty is only skin deep," but it would be a transient thing indeed if it did not have behind it a strong, healthy body with all of the organs functioning properly. Just as warmth is radiated by intense fire so is beauty of face and figure the expression of glowing health. Without good health there can be no lasting beauty. Every woman has an inherent beauty, but so many unconsciously handicap themselves in the effort to look their best! Any physician will tell you that the basis of good health lies in keeping the system free from those poisons that accumulate so quickly if the body does not function naturally every day. Unfortunately, six out of ten women, it is estimated, are risking their good health constantly because of the fact that these toxic poisons do not naturally move out of their systems. And the result is that their beauty, which has been recommended by leading physicians for this purpose. A spoonful in a glass of water before meals is all that is required. Results are really marvelous. Health is restored, appetite returns, that heavy feeling disappears, the circles under the eyes vanish, complexion becomes natural, and full of vitality, mind alert, one's beauty is recaptured and enhanced.

DOCTOR ADVISED OPERATION FOR MRS. PENN

She Escaped It by Taking Lydia E. Pinkham's Vegetable Compound

Windsor, Ont.—"After the birth of my first baby I was very much run-down in health and the doctor said I must have an operation as I was suffering from a displacement. A friend wanted me to try your medicine—Lydia E. Pinkham's Vegetable Compound—and I took it steadily for a year. During this time I was carrying my second baby and I felt real well all the time and did not have a hard confinement. I feel sure the Vegetable Compound did me a lot of good, and all my people do, too. One sister in Leamington, Ontario, takes it, and both sisters praise it as a good medicine. I am more than pleased with the result."—Mrs. W. PENN, Windsor, Ontario.

Mrs. Corbin Relieved from Pain
Stewacke, N. S.—"I had pains across my back and in my side for two years after my first baby was born. My mother had taken Lydia E. Pinkham's Vegetable Compound and I read about it in the papers, so I tried it and the pains all left me. I have a family of three children now, and the medicine helped me during the months before they were born. I recommend it to my friends."—Mrs. CAROL CORBIN, Main Street, Stewacke, Nova Scotia.

James Madill of Dundalk lost approximately \$200 in the death of sheep and lambs this spring.
Two hundred and sixty-three fishing licenses were issued during the last two weeks in May at Eugenia.
Motorists and others have remarked upon the apparently large number of caterpillar tents on the trees adjacent to some of the highways this year. While most of the farmers eliminate this destruction in their yards, the trees by the side of the road are easy prey.

Wit and Humor

Anxious to Please
"Well, Tommy, you got the cane in school to-day?"
"Yes, but it didn't hurt."
"But you certainly have been crying!"
"Oh, I wanted to let the teacher have a little pleasure out of it."

Not An Idler
Old Gentleman—My little boy, have you no better way to spend this beautiful afternoon than by standing in front of the gate idling away your time?
Small Boy—I ain't idling away my time. There's a chap inside with my sister who is paying me sixpence an hour to watch for pa.

"They say Temyson frequently worked a whole afternoon on a single line," said the literary enthusiast.
"That's nothing" said the poor clod seated beside him. "I know a man who has been working the last eight years on a single sentence."

How They See It
The boys and girls mean well, but they are sometimes off in their answers. The following was written by a youngster in a recent examination: "Women's suffrage is the state of suffering in which they were born."

The examiners got an eye full when they came across the following essay on "The Goat"
"A goat is about as big as a sheep if the sheep is big enough. A female goat is called a buttress, a little goat is called a goatee. Goats are very useful for eating things up. A goat will eat up more things than any animal that ain't a goat. My father had a goat once. My father is a fine man. Everything he says is right even if it ain't so. That's all I know about goats."

The ship was doomed. With pale faces the passengers buckled on life belts and waited the order to take to the boats. Suddenly above the storm rose the cry of an anxious man:
"Is dere anybody here vat wants to buy a fine gold vatch and chain?"

The reason why we refused to hire a Stenographer the other day was we noticed her stockings bagged at the knees.

While delivering a good milk cow which he had sold to Mr. Chas. Guyer of the Lake Range, Saugeen, a few days ago, Mr. James Heron saw the eighty bucks which he was to receive for the bovine fade into thin air when the beast stepped on a sharp pointed stick which upended and passed clean through the cow's udder, making a painful and destructive wound which bled profusely. The beast was taken home and the sale called off.—Port Elgin Times.

The barber shops are busy,
It's the latest fad today,
Shingle belles, shingle belles,
Right close to your dome;
Oh, what fun it is to know
There's that much less to comb!

MUST PASS EXAMINATION
In view of the increasing number of motor accidents, it is understood the Department of Highways will recommend to the Ontario Government that the legislation already passed to require every driver of a motor vehicle to pass an examination preliminary to having a license is to be proclaimed and made effective next year. For some time officials of the department have been studying the question of accidents and have about reached the conclusion that the situation demands more stringent restrictions on drivers of motor vehicles. If and when the law respecting drivers is proclaimed, it is expected that examination posts will be established throughout the province and all drivers will be notified to present themselves for examination according to some system that will be worked out.

Of the applicants for divorce presented to the Senate 183 were from residents in Ontario, 18 from Quebec, one from Saskatchewan, one from British Columbia, and one from Prince Edward Island.

THE PROMENADE
A contemporary writer bewails the passing of the old custom of "promenading" on pleasant evenings, and wishes that it might be restored. There is reason in his plea. Not so long ago, the summer twilight in almost every community found groups of people—nice people—strolling quietly along the streets, stopping to chat with other groups and combining social intercourse, mild-after-dinner exercise and enjoyment of the best part of the day in a fashion as inexpensive as it was charming and conducive to health and neighborliness. As the champion of the promenade points out, it is a pity that the fashion of tearing about in motor cars with little result but the exhaustion of purse and nervous energy has so completely superseded this calmer method of enjoyment. "Use your legs," he urges. "It is cheaper than riding and more restful of mind and body." Those who have the courage to adopt his suggestion and leave the car standing in the garage for a few nights while they promenaded, unhonked and unhonking, in the peaceful twilight, will find that he is right.

CLIFFORD
Mr. Jos. C. Thomson, Burnside Farm, Howick, has been remodeling his barn, and had a successful raising last Wednesday. A large crowd gathered for the event and the young folks of the neighborhood enjoyed a dance on the new laid floor. The present structure is 60 x 76 feet, and was raised by block and tackle, under the able management of J. Schneider, Shelburne. Melvin Milligan's team was on the draw line. The contract was let to Peter Thomson & Sons of Mansfield, who have been most successful with their building operations in this section. Last season Meyers Thomson had the contract of rebuilding the Johnson's fine barn on the 17th of Howick, and also Henry Krueger's barn, which was destroyed by lightning, and was rebuilt in two weeks, a record time.

Binkle—Kaufman
A very pretty wedding took place at the Normanby Lutheran Church on Wednesday afternoon, June 30th, when Matilda R., daughter of Mr. and Mrs. H. Kaufman, of Carrick, became the bride of John J. Binkle, son of Mr. and Mrs. C. Binkle, Minto. Rev. G. Brackebush performed the ceremony in the presence of a large number of guests. The bride was given away by her father, and was becomingly gowned in a dress of ivory silk radium lace over silk crepe de chene trimmed with pearl beads, and wore a bridal veil, banded with a brilliant bandeau and carried a bouquet of ophelia roses and maiden hair fern. The bridal couple were attended by Miss Eva Binkle, sister of the groom, and was prettily attired in a lace brocaded satin, and carried pink carnations, and by Mr. Henry Kaufman of Clifford. The groom's gift to bride was a handsome wrist watch and to the attendants a brace-

LAKELET
There was a lot of work put on the roads out this way last week, and it is being continued this week. Out west the crushed stone was put over quite a piece of road, and they have gone farther west this week. Robt. Nay had six teams on last week putting gravel on his division of the County road to Fordwich. R. Milligan is working on the Clifford-Lokel-et road and putting on nice fine stuff. We have no grounds for finding fault with the roads out this way. Were it not for the Blind Lake everything would be o.k.
Writing of the Blind Lake, we learn that as yet the engineer has not given his report, but it may be looked for at any time now. Then the township council will meet and decide whether to ditch or build a new road.
We learn through good authority that we were mis-informed re the ditch being the basic factor in the school trouble at Belmore, which was recently ventilated in the court at Walkerton; that any ill feeling over the ditch matter had been healed and that a real friendly spirit prevailed among former participants in that controversy up to the time of the annual school meeting.
Mrs. F. C. Mahood left this week for the West, where she will spend two months visiting sisters and other relatives in the prairie provinces.
We learn that the trustees here engaged a Miss Ranton of Harriston as teacher for the ensuing school year, at an initial salary of \$1000. Miss Cooke is re-engaged at No. 1, Eldon Dettman will likely remain in his Barrie school, and Allan Darroch is re-engaged east at Fordwich.

Appreciation
Canadian Car Buyers
Recognize Values

The best evidence of value in the New Star Car is the testimony of the buying public, as shown by the constantly increasing sales.

During the period ending June 30th, 1926 the sale of New Star Cars showed an increase over the corresponding period of 1925 of . . . **35.5%**

The New Star Four and the New Star Six are acknowledged leaders from the standpoint of Economy, Durability, Performance and Beauty.

Agricultural representatives from district, convened at the Carrick all over the province are in conference this week, at the O.A.C. Guelph. The conference which is an annual affair is planned to give the representatives a chance to meet together and review the year's work.

The inquest in connection with the finding of the body of a newly-born male infant in the Saubis River at Invermay a week ago was resumed at Tara on Tuesday, when the coroner's jury brought in a verdict that the body was that of a still-born child, as there was no evidence to show that the child had lived after its birth.

Colin McArthur, son of Mr. and Mrs. Neil McArthur, Paisley, underwent an operation recently for appendicitis, says the Advocate. The case was a very unusual one, as the appendix, instead of being pointed downward, as is usually the case, was located upward, and back toward the right kidney, causing considerable pain in that region. The appendix was unusually long and at its farther end was unusually large and gangrenous, and contained three stones very similar in size and shape to gall stones.

The League of Christian Endeavor of the Evangelical Church, Ontario
Last summer farmers' in Henderson County, Illinois, decided to follow the lead of the city man and make Saturday afternoon a half-holiday. The arrangement worked successfully—nobody seemed to be any the worse off because no work was done on Saturday afternoons. As much work as usual seemed to be done in the five and a half days worked each week. Baseball teams were got together and a regular schedule of games run off. Men who never knew what recreation meant learned how to enjoy themselves. "A lot of farm folks do not know how to play," observes the Nor-West Farmer. "Never having had what might be called leisure they had never got the 'hang' of having a good time, or playing where there was nothing else to do. If Saturday afternoon half holiday will help people to enjoy life better we are for it."

NOTICE TO CREDITORS

In the matter of the Estate of John G. Weber, late of the Village of Mildmay, Carpenter, Deceased.

NOTICE is hereby given pursuant to section 56 of the Trustees Act that all Creditors and others having claims or demands against the estate of John G. Weber, late of the Village of Mildmay, in the County of Bruce, Province of Ontario, Carpenter, deceased, who died on or about the 26th day of May A.D. 1926, are required to on or before the 17th day of July A.D. 1926, to send by post prepaid or to deliver to J. A. Johnston Mildmay, P.O., agent for the executors of the said deceased, their names, addresses and descriptions with full particulars in writing of their claims, a statement of the accounts and the nature of the security if any, duly verified.

AND FURTHER TAKE NOTICE that after such last mentioned date the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice and the Executors will not be liable for any claims, notice of which shall not have been received by them at the time of such distribution.

Dated this 29th day of June, A.D. 1926.

JOS. KUNKEL (Executors)

SHOW SOMETHING

A citizen of Brant has suggested to us a slogan which he says would work effectively for building up the declining fall fairs and it is: "Show Something" says Chesley Enterprise. This farmer says he never took much interest in a fair until he showed something. There's a whole lot of people who do not show anything because it would inconvenience them and they have the nerve to say when inspecting exhibits: "I have something in that same class and section at home that would beat the head off the exhibits that have taken the prizes." If everybody talked that way the fair would soon die a natural death. All honor to the exhibitors, but none for the critic.

Every director should set a good example by showing something, if at all possible, and he should encourage others to show. The directors can consider this an open letter if they wish. We are doing our best to prevent dry rot setting in for the country show, and we are in hearty sympathy with the idea of the progressive Brant farmer who suggests the slogan, "Show Something." There's a lot of people who do not even put in an appearance themselves and the

slogan, so far as they are concerned, would be "Show Yourself," but, if they have an exhibit, there will not be much likelihood that they will fail to attend themselves.

No sporting team will be a success with a lot of laggards in it, and neither will a Fall Fair Board, and the best thing for a disinterested director to do is to resign and let a live-wire take his place.

MINISTER FINDS EDITOR'S CHAIR IS HARD TO FILL

Yakima, Wash., June 30—No one can run the other fellow's job as well as his own, though he may, until he is able to do so, said Rev. D. Ferry here after a week as editor pro tem of the Yakima Daily Republic.

The Presbyterian minister took the position after a series of arguments with the editor, C. W. Robertson, about the Republic's editorial policy, especially in regard to the prohibition law and its enforcement.

"Lots of persons think they could run newspapers and write editorials without the least difficulty," said Mr. Ferry. "I wish they could all try it once. It would develop a fine spirit of tolerance, though after the experience they might not survive long enough to exemplify it. If I had to retire from the ministry I certainly am not going to try and find any rest in the editorial chair. It isn't there." Ferry said that he had learned that preaching every Sunday is nothing like the strain of filling editorial columns day by day. The demands of newspaper space and time are so relentless that I could not stand up under them long."

JUNE ACCIDENT LIST HIGHEST THIS YEAR

The benefits awarded under the Workmen's Compensation Act during the half year ending June 30, amounted to \$2,723,321.98, as compared with \$2,723,916.96 during the corresponding half of the year 1925. The compensation for the half year amounted to \$2,225,339.89, and the medical aid to \$497,982.08.

The number of accidents reported for the past half year was 29,631, of which 147 were fatal, as against 27,266 for the corresponding half of 1925, of which 152 were fatal.

The average daily benefits awarded for the half year were \$17,457, and the average number of cheques issued daily was 682.

During the month of June, 5881 accidents were reported, 29 of which were fatal, this being the highest number this year, and higher than for any month during 1925. The benefits for June amounted to \$35,408.15.

The construction of the world's tallest building, which will ascend 81 stories above the street level in Detroit was started last week. Book Tower, as it will be known, will be 873 feet high, nearly 100 feet taller than the Woolworth building in New York, and comprise 23 more floors. In height Book Tower probably rivals the Tower of Babel.

Bogus money, estimated by the police to total more than \$2,000,000 was discovered on Saturday in the basement premises at 142 Tenth Street, Hillhurst, (Calgary) where Reginald Garrett, 32 years old, now under arrest at Victoria, B. C., ran a job-printing shop. The bills, in \$20 and \$10 notes, are forgeries of the Bank of Montreal currency, with the picture of the President and Vice-President shown as on the genuine bills, and they are a clever impression.

AGED CHEPSTOWE MAN IS VICTIM OF DROWNING

Joseph Caskanette, an old resident of Chepstowe, was drowned while fishing in the Teeswater river, just west of Chepstowe, last Thursday.

A party of young men who had been attending a picnic about a mile from the scene of the tragedy, took a trip up the river in a motor boat and found the body of the aged man lying in a rowboat with his hands hanging over the edge of the boat and his head under water. It is believed that he was seized with a stroke, became unconscious and was drowned. The boat in which he was found contained a large pike, along with fishing supplies. He was about 75 years of age, and had been a resident of Chepstowe for about thirty years. He is survived by a widow.

NEXT YEAR'S MARKERS

Hon. George S. Henry, minister of highways has announced, that the contract for the 1927 motor vehicle license markers had been awarded to Canadian Colortype, Limited, Hamilton. The contract has been let on a unit basis at 7 1/2 cents per set of markers. Figured on this year's probable registration of 380,000 motor vehicles, the 1927 contract for markers would involve an expenditure by the Ontario Government of approximately \$30,000. The price secured by Mr. Henry on next year's markers is viewed with satisfaction by government officials, who point out that the plates in use today cost the Government between 9 and 10 cents a set. Not only does it represent, they say, a reduction over 1926, but a favorable contrast with the 23 cent price paid on one occasion during the administration of the late Drury Government. The 1927 markers will have a light green background. The lettering will be black. There will be some changes in the present arrangement of the lettering. "Ontario" is to be spelled out in full and is to be placed beneath the registration figures. "1927" will be stamped on a line with the word Ontario.

DYNAMITE EXPLODED

Last Wednesday evening an explosion of dynamite in the cook stove in the home of Mr. and Mrs. Archie Fraser in the West Ward came within an ace of inflicting bodily harm to one of their children and Mrs. Fraser. It appears that one of the boys had discovered small sticks of dynamite in a nearby field, when he was picking strawberries. Believing that they were wood, he deposited them in the cook stove, with the inevitable result—explosion. The stove was destroyed. Mrs. Campbell narrowly escaped being struck by one of the lids as it passed her head and lodged in the ceiling. It is understood that the dynamite was thrown carelessly in the field last fall, after being brought here by a boy, who had been roaming in the Hydro quarry. Naturally the neighbors were greatly startled by the report of the explosion.—Telescope

CALENDAR REFORM PROGRESS

The calendar reform experts of the League of Nations, according to current reports, are moving slowly but surely to the conviction that the year should be divided into 13 months of equal lengths instead of the present system of 12 months. By this system each month would have 28 days and the day needed to complete the 365 would be added to the end of December as a 29th day, becoming the eighth day of the last week of the year. The new thirteenth month would be inserted between June and July and presumably would be called a solar midyear month. When Leap Year arrives, the scheme provides for the insertion of an extra day at the end of June to be known as an international holiday. The committee has reached a tentative agreement that Easter should be fixed on the second Sunday in April. The program of the committee is to submit the advantages and disadvantages of all plans placed before it to all interested bodies.

BUILDING BRIDGE PIERS

The firm who were awarded the contract of building the two huge concrete piers at the railway bridge have men here this week making preparations to proceed with the work. As we mentioned previously, the railway management, intends putting in a long fill of earth to replace the steel trestlework, but whether this will be done during the present season is not known. Economy in its rich drawing freshness.

THE RADIO DETECTIVE

BY ARTHUR B. REEVE.

CHAPTER IV.—(Cont'd.)
Dick was too well trained to cry out, or even to show by his expression that he had seen, but, aside, he joggled Ken's elbow and motioned to Ken to look.

Ken, too, saw and the boys had just about determined not to let Hank know that they knew he was watching, but to contrive some way to get around him and, in turn, watch the spy, when Hank took the bolder course. It showed how essentially crafty the boy was.

Hank stepped boldly out from the shrubbery now. There was a sudden change in his attitude. He might be brazen, but he was on the job.

"How do you hear?" Ken still grasped the soldiering iron. One never knew what a treacherous lad like Hank might be up to.

"Over my radio. I bought a new set, you know. You ought to get one like mine. Five tubes!"

Hank knew the psychology of jealousy. It seems to be born in some people. However, he missed out in expecting Ken Adams and Dick Gerard either to be jealous or to engage in any hero worship. Neither of them had much money, but that was because their allowances were strictly limited. It was a part of their education. There was a catch in it somewhere and they determined to find out. They were human. They were curious.

"That's great, Hank," commented Ken. "Where did you get the money?" Hank adopted a sort of swagger. If either of his two questioners had had their way they would have knocked his block off, and very properly, for that swagger. However, they did the more manly and clever thing; restrained themselves, kept temper and poise.

"Earned it!" was Hank's superior response. He might have been a multimillionaire in his own estimation, a self-made Hank.

Again Ken restrained himself. There was no use picking a fight with a man from whom you wanted information. "Is that so?" he inquired, calmly.

Those who are wise fail hardest. Hank was disarmed by Ken's ingratiating manner. "Working for boats in the harbor," he replied.

"I tried that, but didn't make much."

"You didn't pick the right boats."

"Which one did you pick?"

Hank hesitated. "You can't horn in there. I'm sold with those people. I don't mind if I do tell. The 'Scooter' is used to be a sub-chaser until these rich people bought it and made a yacht out of it. Some boat to work for when it's in port. Well, so long. That reminds me, I got a date now."

Hank had been looking at his watch. He made off and, as he did, both Ken and Dick did not look up so as to let him know that they cared.

"If you believe that I'll tell you another!" exclaimed Dick, the doubter. "Is he gone down the trail?"

"Yes."

"That fellow will stand watching. Dick, I wanted him to get out of sight before I made a move. But he

said something to me the other day about Vira and Ruth, too, that I didn't like. I'm going to watch that fellow and you'd better come along, too. He took the upper trail on the cliffs. We'll take the lower on the shore. I'd like to know some more about that 'Scooter'. It's a mystery craft, anyhow. It's suspicious—Hank knowing all about the robbery so early and all that; hanging around here, watching until we caught him at it. Come on!"

The two scouts disappeared down the shore trail.

**CHAPTER V.
THE MYSTERY CRAFT.**

Swinging idly in the snappy south-west breeze, out in the Rockledge harbor, lay a rakish converted scout cruiser which had seen duty during the war, but now had been sold by the government and overhauled, refitted as a yacht. She was a very business-like looking yacht, too, and not the least noticeable thing on her was her radio aerial on the mast.

It was evident that although her captain, Nelsen, was aboard, her owner was not. The "Scooter," as her name appeared on the stern, was anchored quietly in Rockledge, but that did not mean that she was not actively in commission. Far from that. Nelsen was a captain always on the job. Nevertheless if one had had a closer view of her crew, and in fact, of Nelsen himself, one would not have been much impressed. The crew of the "Scooter" was not such as to inspire confidence. Indeed it was quite the reverse. One might have said that the crew was evil looking. And he would not have been far wrong.

From below now appeared a boy. It was Hank Hawkins. He had evidently come aboard to impart some information to Captain Nelsen which the captain was later to transmit somewhere at a pre-arranged time over the radio. As Hank stuck his head out he scanned the shore very closely, then reached for marine glasses, turned and spoke below.

"There's that boy, Ken Adams, on the shore, now, where he followed me. It looks to me as if he was coming out here. Give him a hot reception."

"You bet! No spies!" came a gruff rejoinder.

Hank was right. On the landing stake on the shore of the harbor Ken and Dick were standing. He hastened in trailing Hank, but Hank had had a start of them, had arrived at the landing stage first and they had seen him putting off in a tender for the "Scooter."

For some time Ken and Dick stood on the landing stage, debating. "Of course we want to find out about Hank and that 'Scooter,'" considered Ken.

"But then you remember the other day, before he told us about buying this radio, he said he was buying a flivver, had paid a deposit of a hundred dollars on it to Charley Randall? I'm going to take the Parr's rowboat that's here and go out to the 'Scooter.' But you, Dick, go on up to the village and see what you can find out about Randall and the flivver, see if it is true, and, if you can, find out where Hank got his money. I'll gamble he never got it from his folks."

"That's all right, Ken, but how are you going to get away with the radio, you get out to the 'Scooter'? What are you going to tell them?"

"The truth, of course—at least as much as I want them to know. My allowance is shot. I'll tell them I want to earn some money just like Hank. Maybe they'll let me on, give me a job, and I'll learn something about them. The thing looks suspicious to me—this mystery craft anchored out there."

Ken stepped in the skiff and started. "So long, Dick."

"So long, Ken. See you later."

Ken pulled lustily at the oars, for he was a born water rat, had been raised about Rockledge harbor, knew swimming and boats from almost his baby days. It was not long before he was approaching the converted cruiser. No one seemed on deck.

"'Scooter' ahoy!" shouted Ken as he roved about looking for some signs of life and how to get aboard.

"Whatever want?" A roughneck sailor had come on deck and was answering the boy ungraciously.

"I want a job," returned Ken.

"You do, eh?" The sailor reached down to the deck, seemed to pick up something, then to turn a valve. "You want a job, do you? Well, take that!"

He straightened up and as he did so he pointed a hose connected with a powerful pump, full at Ken. Ken was resting on his oars. He received the full force of the water and it almost bowled him overboard. It was not the drenching that Ken feared. It was the rapid filling of the skiff. He would soon be sunk. He seized the oars and in three or four strokes was well beyond the range of the hose. As he pulled off, Ken heard a raucous laugh

from the hold. He could have sworn that was the voice of Hank Hawkins. Chagrined and wet, Ken bailed out the skiff, then pulled back to the shore. He sat down on the landing stage to wait and to think. He had time. He would wait until Hank came ashore. It was well that Ken had time. Hank was in no hurry to come ashore. But the morning sun was sultry and the time was not wasted. At least Ken was drying out after his drenching. Any other boy would have consumed his time in thinking of ways of getting even. Ken was human. He wanted to square accounts with Hank. But there was greater, more important business in hand. Ken waited with mixed motives.

It was the better part of an hour before Ken could discern a boat lowered from the davits of the "Scooter," and then make sure that it was Hank putting off in it for shore. Ken kept on the side of the dock where the sun shone hottest but where Hank could not see him and through the plies he could watch the progress of the boat from the cruiser to the landing stake.

Just as Hank moored the rowboat to the float and turned to ascend to dock, Ken emerged. Ken was quiet but there was a look of gleaming in Ken's eyes that boded no good for Hank.

"Well," began Ken. He had been about to say something of his involuntary shower bath, but thought better of it. It is always well in a case like that to let the other fellow do the talking. Then you can gauge your actions by him, take advantage.

Hank laughed in his irritating smart-aleck manner. Still Ken restrained himself. His righteous anger was mounting by the moment. "Say!" taunted Hank with an exasperating bravado. "Was that robbery an inside job?"

Ken was no less angry at Hank for what had happened, for he knew the sailor had been put up to it by Hank. It was conducted clearly unbecoming a scout. But here was a new issue injected into the matter by Hank.

"What do you mean, inside job?" returned Ken.

Hank laughed in a superior manner. "You don't know, but I know." He lowered his voice. "Your sister, Ruth, and the bunch, all of them, Ruth, Vira, Glenn, Rae, Dick, Professor Vario—just a lot of money last week!

1222

THE SIMPLE FROCK IS BY FAR THE SMARTEST FROCK.

This pretty frock of brightly-printed crepe is appropriate for all day wear. Cut with a little standing collar opening back to form a Y, it slips on over the head, and has a few gathers in the shoulders of the straight bodice, which accents the low waistline, where it joins the flaring skirt front. The back of the frock is plain, and the long sleeves gather into narrow wrist-bands. No. 1222 is for the miss and little woman and is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 4 3/4 yards 36-inch figured crepe. Price 20c.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.
Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

"To Eat Humble Pie."
This phrase has no literary distinction, no exalted origin. It represents one of those perversions both of spelling and sense which often arose in an age when few could read.

In early Norman days the Saxons were mostly serfs, or "villains," and whilst the lordly Normans feasted at the high table on the venison that was strictly preserved for their hunting, the Saxons were relegated to a place far "below the salt"—another phrase belonging to the same age—and given to eat a huge pie made of the "numbles," or inferior parts of the carcass of the deer.

Thus, not only during this early Norman period, but much later, "numbles pie" was a common and quite wholesome dish served to humble folk. It passed into a sort of proverb—that one who was obliged by circumstances to partake of this pie either belonged to the lower class or had been reduced to their level.

Presently, when the connection with venison was forgotten, and the custom of hunting the stag had died out, people began to think that "humble pie" was somehow connected with "humble pie," because the phrase certainly meant "to take a man down a peg," to humble his pride, to humiliate him. Yet the connection did not exist.

Minard's Liniment for Rheumatism.
Pardnable.
His wife had gone to visit her mother and had telephoned that she would not be returning until the morning.

When she got back she said to her husband: "You managed to find something to eat last night, didn't you, dear?"

"Oh, yes," he replied, cheerily. "I had the steak that was in the pantry and fried it with some onions I found in the cellar."

"Onions!" she gasped. "Darling, you've eaten my bulbs!"

His Name.
"I can't accept this application—your name is omitted."
"Faith, an' you're wrong, sor! Me name is O'Flaherty!"

Industry Developing Rapidly.
The raw fur catch of British Columbia has in the last five years vacillated between 11,000,000 and 15,600,000 in value yearly, but much greater significance attaches to the manner in which the fur-farming industry is growing in the province. Between 1923 and 1924, fox farms in British Columbia more than doubled, and importations of foundation stock into the Kootenay, Okanagan, Thompson River and the Fraser valleys in 1925 were yet more marked. Vancouver Island in particular seems destined to be a great fox farming centre and become for the Pu-

Convertible Establishes Fur Auction.
Now British Columbia is exhibiting ambitions in the same direction, and local sales have already been successfully held. The fur trade of the Pacific coast province has long been seriously neglected, and the disposition of the provincial pack passing out of its hands about the time of the Klondyke rush, no effort had been made to secure re-control of it. With its intimate association with fur trading and trapping it is just beginning to realize the anomalous position it occupies with the greater bulk of its production going across the line for sale. British Columbia is now striving to make Vancouver the centre of the Pacific Northwest fur trade, an effort which should be attended with success in view of the province's substantial raw fur catch and the marked progress it is making in the fox and fur farming industry.

FURS IN BRITISH COLUMBIA

One of the outstanding features of Canadian progress in the post-war period has been the Dominion's assertion of her right to market her own fur production. For many years it was the custom to despatch the greater portion of the annual catch to markets in London, New York, St. Louis and other fur centres, the Canadian industry having practically no control over the disposition of its own pelts. In 1920 tri-annual fur sales were established at Montreal, which have steadily increased their prestige and assumed a greater international character. Pelts have come from the United States, Russia, Siberia, China and other countries to swell the Canadian pack for disposition and buyers have been attracted from the neighboring Republic, England, France, Germany, Sweden, Ruesia and Japan. In the five years of sales, pelts to an aggregate value exceeding \$25,000,000 have been disposed of in the Canadian metropolis.

Montreal's success has generated ambitions in other Dominion centres, which are points for the collection of a greater international character. It claims to be the largest primary receiving point for furs in Canada, has been most active in following in the steps of Montreal. The great Western city is drawing in furs from the Arctic circle, the Mackenzie River basin, James Bay, Northern Manitoba and the Hudson's Bay. It is estimated that last year over \$5,000,000 worth of furs were handled in Winnipeg, \$2,000,000 of which represents the value of pelts sold through the fur auction, and as much as \$1,000,000 has been secured from a single sale. It is considered that fur sales are now firmly established as part of Manitoba's and Winnipeg's business.

Converting Rubbish into Fuel.
Cheaper than throwing it away, according to estimates made recently by an English engineer. His plan is to remove the tin cans, crush the refuse into powder, and then press it into little bricks which can be treated with tar oil or coal to aid ignition. He estimates the cost at \$1.80 per ton, while the present disposal is \$1.75 a ton.

Huge Aerial Masts.
So huge are the masts supporting the aerials of the new superpower radio station at Rugby, England, that there is an electrical elevator, having a capacity of three persons in each mast. The masts are 820 feet high. There are twelve of these masts carrying three miles of aerial.

BICYCLE BARGAINS
New and slightly used, \$10 upwards. 7 manufacturers spread. Write for Price List. PERLESS BICYCLE WORKS 188 Dundas Street West, Toronto

BABY CHICKS
Eight weeks old Pullets from select and registered Canadian Day-laying Cornish stock for sale. Chicks, 12c each. 100 per cent. live arrival guaranteed. Price, \$1.00 per 10. 50c per 50. Fertility guaranteed. **THE IDEAL POULTRY FARM** Walter L. Cudman, Courtenay, Ontario

A BUSINESS OF YOUR OWN
Earn money—and get it every week. Sell fruit pies, covering sheets, shade trees, hedges, roses and evergreens. Quills furnished. Old established firm has an attractive proposition for man or woman of good standing and energy. **E. D. SMITH & SONS, LIMITED** Toronto

Carry it always with you!

GETTING MOST SERVICE OUT OF ROPE

Some Practical Suggestions for the Farmer.

BY F. W. DICKERSON.

In securing long life and maximum service out of a rope or any other material on the farm, several things must be taken into consideration.

First, the rope selected must be of good quality and the proper size for the work to be done. Good ropes are made of properly selected new fibres which has been prepared and handled in such a way as not to injure the natural strength of the fibres but unfortunately, some manufacturers cheapen the rope by mixing with the new, certain percentages of fibre which has been injured by over-tension in cutting and preparing, or by age, and in some extreme cases a considerable proportion of old fibre is mixed in.

The best guarantee of getting first-class rope is to buy some of the trade brands, or of a reliable dealer who can guarantee that he buys only the proper size, this will depend on the work to be done and the probable stress the rope will have to meet. Other things being equal, it is better economy to buy a size larger than that actually called for, since the difference in first cost is usually very small indeed.

Second, the rope must not be chafed or kinked while in use, as these are the two chief ways in which ropes are damaged. Chafing may be caused by dragging across a sharp corner on a timber, or a roof, or stone, by two ropes rubbing over each other, by a pulley which is too small or has sharp projections, or which does not swivel easily. Any kink or sharp bend puts a terrific stress on the outside fibres of the rope, and if any heavy pull comes on such a bend, some of the fibres are likely to be ruptured and the rope will probably fail at this place. Kinks are particularly destructive to wire ropes. Any knot acts somewhat like a kink, and hence the most successful types of knots are those which do not bend the rope too sharply.

The usual cause of kinks is too

much twist, and this is the reason why so much care must be taken to keep a rope from twisting. Twisting is due to the fact that when a rope is pulled through two or three pulleys with a heavy load on it, the twisted strands bearing on the pulleys have a tendency to give a screw-like turning which increases the twist in the rope. Various methods are used to keep down too much twist:

1. Turn the rope end for end occasionally.
2. Drag the rope through stubble.
3. Coil the rope and lay in tub of hot water.
4. Use ball-bearing swivel where attached to a fork carrier.

Of these the last is by far the most effective; since the twist is naturally worked toward the carriage end, and if freely turning swivel is provided here, the twist will be worked out as fast as it collects. Such ball-bearing swivels can be purchased on the market for a very small sum, or can be made from an auto or bicycle ball-bearing. Dragging the rope fills it full of dirt and grit, and probably causes excessive wear. Reversing the rope end for end, helps about taking out twist, but takes quite a lot of time and trouble.

Rope should be protected as much as possible against dust and grit, which produces excessive wear, and against dampness, which is likely to produce rotting. A rope should not be coiled and stored while wet, but should be thoroughly dried first. Some authorities recommend lubricating a rope with hot tallow or hot lard oil, but it is doubtful if this pays for ropes that are kept dry and free of dust.

Very important factors in securing long service are proper whipping, crowing, splicing, and knotting, and every farmer and farmer's boy should be thoroughly posted on how these things are properly done. At least, it is easy to secure bulletins giving the necessary details, from the State Agricultural College. Most of the rope manufacturing firms also put out very valuable booklets.

Spraying Potatoes for Blight.

Late blight, a disease of potato foliage, is most destructive, and in some years causes great loss. This loss can be greatly reduced, if not entirely eliminated, by careful and thorough spraying with Bordeaux Mixture, made up of 4 pounds of copper sulphate (bluestone), 4 pounds quicklime and 40 gallons of water. Spraying should begin about the middle of July, using about 60 gallons per acre, the amount being increased as the plants grow larger. As many as five or six sprayings are necessary and the later ones should be applied with the utmost care. If potato beetles are prevalent one and a half pounds of arsenate of lime should be added to each 40 gallons of solution as an insecticide. Spray before rather than after rain.

In making the solution for spraying it is more convenient to use stock solutions and dilute them as required. The following instructions for preparing stock solutions are given by J. B. MacCurry, Plant Pathologist of the Dept. of Agriculture at Ottawa. The blue-stone stock solution is prepared by dissolving 40 pounds of copper sulphate in a barrel containing 40 gallons of water. For the lime stock solution 40 pounds of fresh quicklime are slaked in a barrel by gradually adding water, while thoroughly mixing, until the barrel contains 40 gallons. These barrels of stock solution should be kept carefully covered. When ready for spraying transfer 4 gallons of the stock solution of bluestone into the spray tank and add 32 gallons of water, then add four gallons of the lime stock solution, pouring it through a fine mesh strainer. Keep stirring the solution in the tank while adding the lime.

It is desirable to increase the proportion of copper solution in the later sprayings, using the formula 6-4-40. In preparing the stronger mixture the only difference is that six gallons of stock solution of bluestone are added instead of 4, and 30 gallons of water instead of 32.

Prevention and Control of Cutworms.

1. Prevention.—Cutworms lay their eggs in late summer and autumn in grassy or weedy lands, hence, if a crop is going to be put in such places that fall or next spring, the field should be plowed in late summer or early fall, and cultivated to keep down weeds and grass, thus preventing cutworm infestation. The cleaner gardens are also kept the less will be the trouble in them the next year from cutworms.

2. Method of Killing Cutworms.—Use a poison bait made as follows: Bran, 25 lbs.; Paris green or white arsenic, 1 lb.; molasses (cheap grade), 1 to 2 qts.; water, about 2 gals.

Mix thoroughly the bran and poison dry in a large receptacle or on a clean smooth floor of boards or of cement, pour the molasses into the water, stir and then pour the liquid on the bran. Mix until the bait will fall like sawdust through the fingers.

Note—Liquid arsenite of soda may be obtained from the Deloro Chemical Co., Deloro. One pint of this is quite as good as one pound of Paris green or white arsenic. Being a liquid it is dangerous to the operator from poisonous dust is removed by using it.

If the cutworms are known to be in the soil before the crop is sown or set out, prepare the ground well and an evening or two before planting scatter the bait at sunset thinly over the surface as if scattering seed grain (20 pounds are sufficient for one acre).

If the crop is up before the cutworms are observed, drop a little of the bait (a thimbleful) near the base of each plant late in the evening. Cutworms may also be killed in some cases by spraying the plants with arsenate of lead powder (2 lbs. to 40 gals. of water).

Caution—Guard against poultry or livestock having access to the bait.

Saving the Crumbs.

Quite by accident the writer discovered that bread crumbs, especially the crumbs of whole-wheat bread, are an amazing improvement over cracker crumbs in scalloped dishes. They give a much richer flavor and have none of the pastiness which cracker crumbs cannot help having. It is well to keep a box of bread crumbs on hand at all times. Broken and dried pieces of bread should be stored in an open receptacle (to prevent molding) and when a suitable amount has accumulated and has dried out well, the bread must be run through the grinder and the resulting crumbs stored away. One should not keep them in a box or bag which is too tightly closed as this will give them a strong taste. This method of utilizing bread crumbs combines improvement in cooking with economy of food stuffs.

Making Mince-meat Gradually.

Throughout the summer one may have one's winter supply of mince-meat in the thought. Often there are jellies which do not "jell," marmalades and preserves which do not turn out perfectly, syrups left over from watermelon pickle and spiced fruits. These should be stored away all on the same shelf and when the time for making mince-meat arrives they are easily brought forth for use in it, adding much to the flavor of the finished product and saving more sugar than one might at first imagine.

THE CANADIAN HOMEMAKER

A series of weekly articles covering: PLANNING . BUILDING . FINANCING . DECORATING . FURNISHING . GARDENING
Copyright 1928.

A PLEASING COLONIAL DESIGN

By H. B. Little, Architect.

The house is of the Colonial type and measures 36' 3" long by 25' 3" deep, has added to this a sun room, front and rear entrance porches. The house was built at a cost of \$9,600, or 50c per cubic foot.

The ceiling heights are as follows:
Basement to ground floor 8'
Ground floor to first floor 9'
First floor to attic floor 9'

The exterior woodwork is all painted white. The roof is covered with red Flexstone Asbestos Strip Shingles, and the walls with wet dash rough cast stucco of a light cream color. The front entrance is of pine painted white and the steps and landing are of concrete.

The construction consists of balloon frame sheathed both sides with pine shiplap. Then on the outside comes two layers of paper, wood counter lath, lath and stucco. On the inside paper, counter lath, lath and plaster. The space between the shiplap boards is packed with granulated cork and there is four inches of cork in the first floor ceiling and the ceiling of the sun porch.

This has been found to be a very satisfactory construction and the house is of a uniform warmth during the severest winter weather.

The ground floor is laid out with the entrance, hall and stairs in the center. On the left is the living room and on the right the dining room, kitchen and pantry. There are small rooms for the telephone and coats each side of the vestibule. The whole floor is of birch except the kitchen and pantry, which are of spruce covered with painted canvas.

The living room is a large room 24' by 12' 6" entered by glass doors and lighted by large three-light windows. Two glass doors lead to the sun room and the effect from the hall is one of

cheerful spaciousness which gives the house the appearance of being much larger than it is. There is a fireplace of Milton Pressed Brick with wood shelf and a colored cement hearth marked off to resemble tiles. The plaster walls are tinted a buff color and all the woodwork is in white enamel except the doors which are of fir stained mahogany. The room is lighted with bracket lights and by lamp standards wired to base plugs.

The sun room has eight double-hung windows and a door to the garden. The plaster walls and ceiling are sand finished and the woodwork is white enamelled.

The hall is of ample size, 11' 9" by 9', well lighted through the glass doors to the living room, dining room and vestibule. The stair ascends to the first floor from this hall and it has birch treads, newels and handrail. The handrail and newels are stained mahogany; the treads are oiled and polished. The risers and balusters are of pine painted white. The coat room and telephone room windows are in leaded glass and there is a leaded glass fanlight over the entrance door.

The door itself is of pine with solid raised wood panels.

The dining room is 13' by 12' 6" with two large triple-light windows. There is a corner china cabinet and a plate rail extending around the whole room. There is a central pendant light as well as two brackets and in the floor is a floor plug for a buzzer and electric toaster. A swing door leads to the pantry from where a door leads to the entrance hall, another to the rear entry and cellar and a third to the kitchen. The kitchen is 10' 6" by 8' 6" and contains an electric range, sink with drainboard, and cabinet. It is cross ventilated by two windows. A switch here controls the electric water heater in the basement, and an annunciator indicates the ringing of a

bell at the front or rear doors, or the dining or living room buzzers.

The first floor partitions come over those below wherever possible and this gives the central hall with the bathroom at the rear, the large, master's bed room and sleeping porch on one side and the two bed rooms on the other. The entire floor is of birch except the bath room, which is of spruce covered with linoleum. The bath room is 7' 9" by 5' 10" with a 5' tub and a large pedestal basin. There are two medicine cabinets and a mirror over the basin. The wall is marked off with squares in Kenees cement and enamelled to form a wainscot 4' high.

The master's bed room is 16' 6" by 12' 6", with a large closet, a sleeping porch and two windows. The sleeping porch is 9' by 7' with four double hung windows. The two other bed rooms are both 12' 6" by 10' 6", with closet and two windows each. A stair ascends to the attic, which is unfinished and unheated.

The basement contains two cement laundry tubs, a cold room under the sun porch and a coal bin. The boiler is a No. W6 Newport magazine feed coal burning water boiler burning gas coal. As this coal can be bought at a cost of \$9 per ton and it is estimated that it will require six or seven tons for the season it will be seen what a saving is made possible in the fuel bill.

As the city drainage does not extend to this suburb, the house is drained to a septic tank and distributed over an absorption area in the garden by means of tile pipe lines laid with open joints about 1' 6" below the surface of the soil.

Readers desiring further information regarding the plans and specifications of this house should communicate with the architect direct. Address Mr. H. B. Little, Architect, 81 Fraser Bldg., Ottawa.

Care of the Neck.

There are two kinds of necks that sometimes come to us as we grow older—the "pitiful" neck and the neck that knows no bounds. Naturally no woman wears a neck that even a flattering collar can't convert to lovelessness. And certainly no woman wants her neck to spread and billow and pie chin upon chin.

The answer of course is "safety first." You must train your neck in the way it should go—and take no chances.

So far as I can discover, the best preventive for a thin neck is general good health. I've seen mature women, by breathing deep, correcting posture and fattening themselves up, round out their necks into beauty. But this does not mean that I am above trying local methods on my own neck. The firmest, whitest, most like-a-column neck I know belongs to a beauty specialist who advocates a suction system of slapping with the cupped palm, starting under the ears and working down and front from each side. This, in connection with her creams and oils and stimulants, she assures me, will

take the "pitiful" out of almost any neck.

Look out for posture. Keep your chin and abdomen in and your head and chest up. This exercise is sometimes used: Stand erect with chest up. Let your head drop forward loosely and roll to the right, then back to the left and front in a sort of flexible rolling circle. Do this a few times and then reverse the direction.

At night cleanse the thin neck thoroughly and apply cold cream or tissue cream, cow's cream or warm cocoa butter. In the morning dash cold water over the neck to tone it up. Fat necks and double chins are really easier to correct than the too-thin neck, for you can be rough with them. (This, obviously, does not apply to the woman who may be suffering from goitre. I mention this merely because I receive many letters on this subject, and because a goitre, of course, should be put under a physician's care and never tampered with inexperience.)

One of the best things for a double chin is slapping with the back of your hand under your chin. Slapping also works on the roll of fat at the back

of the neck. Reach your hands over your head and slap with alternate paws.

The suction movement I mentioned a while back may be used on a fat neck in connection with an astringent. Beauty salons often bind up chins for a few minutes with a folded towel pinned firmly at the top of the head and holding tightly under the chin a pad soaked in astringent.

Necks do get very dirty, what with fur collars and exposure to dirt. The small boy who is accused of laxity in cleansing methods really has an argument. Often necks must be scrubbed to get off that almost imperceptible dinginess. For further whitening, simple bleaches such as buttermilk or diluted lemon juice or peroxide may be used.—H. R. C.

Kindness in the stable is one of the fundamentals. Abuse and fright have a direct bearing upon the flow of milk. Bear this in mind, and keep the milking stool under yourself, and do not use it as a fall, whatever happens.

Mutton suet should never be used for any dish that is to be eaten cold.

BALANCED MEALS FOR THRESHERS

Every community has its own way of handling threshers, but in a certain section they advanced farther than they realized when they decided that there would be "no supper for the threshing crew."

It has been the rule for years without number for the housewife at the farm where threshing was going on to cook twice a day for the who's crew. Now the men are going home for the evening meal. The automobile helps solve this problem, and the men are content to take the quick run home with a chance to cool off somewhat before sitting down to supper. But best of all, the new custom takes away some of the farm wives' dread of threshing time.

Another thing, farm women are getting together to plan the meals served to threshers. With planning, it is possible to have variety in meals, and to cut down on time and labor. These meals are more appetizing, for foods that fit together can be arranged for.

Time was when any one who went the rounds with the threshing ring would find that dinner invariably consisted of roast beef and boiled potatoes. Whatever variety there was, was in the way of desserts and vegetables. After eating at the first house, you knew just about what was coming at every other house. The big difference was that each succeeding housewife would put a little bit more on the table. But nowadays the wives of members of the threshing rings are getting together before the threshing season opens and planning a series of menus, so that there will be practically no repetition of the main dishes of the meals. It is easy to tell ahead of time, barring accidents or rain, just how many meals the threshers will eat at each farm.

WHAT SHOULD MEALS FOR THRESHERS INCLUDE?

For dinner: Meat; a starchy dish such as potatoes (Irish or sweet), rice or macaroni; a raw vegetable or relish or vegetable salad, and a cooked vegetable; bread or rolls (with butter, of course); fruit, a frozen dessert or simple pudding such as fruit shortcake or gelatin, rice pudding or custard. Cookies or cake are welcome with fruit or frozen desserts. Cakes without icing are better than those which are iced, when served with a full meal; besides, a rich, sweet icing increases thirst.

Supper requires meat, which can be served cold and sliced, or a hearty dish, such as macaroni and cheese, baked beans or fried dried beef, creamed or fried potatoes; a simple salad or relish; bread, rolls, biscuits or corn bread; a simple dessert; tea, coffee and milk.

SUGGESTED MENUS FOR DINNER.

Pot-roast beef, gravy, browned potatoes, buttered beans, lettuce and tomato salad, whole-wheat bread, fruit roll. Baked or boiled ham, spinach, creamed potatoes, corn bread, ice cream with fresh fruit, gem cakes or apples.

Chicken and biscuits, boiled potatoes, corn on the cob, cabbage and peas, rice custard with raisins.

Meat loaf, mashed potatoes, succotash, cole-slaw, whole-wheat bread, apple-batter-pudding.

Swiss steak, boiled or browned potatoes, buttered beans, carrots and peas, bread, relish, fresh fruit with custard.

SUPPER MENUS.

Macaroni and cheese, buttered carrots and peas, sliced tomatoes, bread, jelly or jam, fruit, cookies.

Stew (from yesterday's beef), adding carrots, potatoes, turnips and onions; whole-wheat bread, jelly, apple sauce, hot ginger-bread.

Potatoes scalloped with ham (left from day before), buttered beans, radishes, whole-wheat bread, fresh fruit, cake or cookies.

Sliced meat loaf with creamed potatoes, or creamed eggs with ham and buttered potatoes; tomato and cottage-cheese salad, bread, fruit shortcake.

Potatoes scalloped with sausage, tomato, cucumber and lettuce salad, corn bread, jelly or jam, fruit sherbet, gem cakes.

On wool suits, coats, or dresses, unless buttonholes are well made, they are best omitted.

To work a buttonhole in heavy wool material, first make each one carefully with chalk. Then stitch several rows around them, slightly back from the drawn line. Cut the buttonholes between these rows of stitching and a firm edge remains to work on. If gimp is to be used (and in most cases it should be), baste it carefully around the hole and work with heavy twist.

Buttonholes are marked in the same manner, only on both sides of the material. Small straight-edged strips of material are basted on each side of the mark. (This is done to the outer thickness only.) After the strips have been securely stitched and the corners well fastened, cut the buttonhole in the outer thickness in the shape of a parallel line terminated at each end by a triangle opening outward. Turn in the little triangles thus formed and to the under side. Baste the inner thickness of material around the buttonhole, the mark directly over the hole. Cut along the inner mark the same shape as on the outer portion. Turn in the edges with a needle and whip down to the buttonhole binding. This makes a very pretty buttonhole.

Build up a herd of cows especially suited to your particular branch of dairying. If you make butter or sell cream, choose cows giving milk high in butter-fat. If you sell milk, look for the large flow of milk.

It is not what cows do in brief tests that count for profit; rather, it is the long-continued production that determines the capacity of the animals as definite profit-bringers.

Dairying is one of the nicest businesses in the world if you like it. If you do not, change to something else.

FORMOSA FIRE

(Continued from Page 1)

part of the building could have been saved.

However, when the water supply gave out, there was nothing left to do but to stand and watch the fine building go up in smoke.

This school was erected nearly sixty years ago, the walls of the main building being of solid stone construction. At the rear of and adjoining the school was the brick residence of the School Sisters. It was a fine structure, and the people of Formosa and vicinity have for years pointed with justifiable pride to their fine school, in which two generations, at least, received their education. It was little wonder then that dismay filled the hearts of the onlookers as they witnessed this historic structure being destroyed by the fire demon.

We learn that the loss to the section is covered by \$19,000 of insurance. There was also \$2000 of insurance on the household effects in the convent. A meeting of the rate-payers of the section was held on Monday evening, when it was decided to rebuild at once. It is probable that the old stone school house (now used as a village hall) and the church chapel will be used as school rooms until the new school building is completed.

Mr. Waechter carried \$1900 of insurance on the building, and while this amount will not be near the replacement value of his dwelling, he will be able to purchase another property in that village for that price. We learn that Mrs. Waechter has been quite ill since the fire, suffering with a severe nervous collapse.

O.T.A. CASES IN GODERICH COURT

Goderich, July 11—Two provincial police officers during the past few days have drawn a dragnet about the O.T.A. offenders in Huron and Bruce Counties.

Driving a car with American license numbers, the officers purchased liquor from 13 suspects in the county. As a result, License Inspector Wm. Pellow, of Goderich, laid informations resulting in the conviction, before Magistrate Charles A. Reid, yesterday, of Russel Walker, of Howick Township, for having liquor, and his paying of a fine of \$50 and costs. A brother, Thomas Walker, was convicted on a charge, laid by Inland Revenue Officer Andrew Porter, of the sale of liquor. He was fined \$200 and costs. Stafford Paisley, of Culross Township, pleaded guilty to a charge of selling liquor and is in jail awaiting sentence. Paisley was the assistant of Sigmund Freiburger, who on Friday was fined \$1,000 and two months in jail in the same roundup.

Alec Volson, hotelkeeper of Zurich is out on bail pending judgment on a selling charge. Ben Edwards, of Brussels, was fined \$200 and costs and 30 days in jail, or in default, two months in jail, on a similar charge. Awaiting trial on charges of selling liquor and out on bail are Dan Johnson of Seafort; Dave Crawford of the Graham House, Clinton; Mowat McDougall and Harvey Beatie of Goderich Township. In addition, several other similar charges are pending.

ADDITIONAL LOCALS

For real values read Sovereign's ad. Dr. W. H. Huck spent Sunday with friends at Guelph.

Miss Olive Ruetz of Orillia is visiting at her home here.

Mrs. Edmund Schneider visited friends at Kitchener this week.

We sell that good Flour—Walkerton Prairie Pride. Sovereign's.

Mis Mary Uhrich of Toronto spent the week-end with relatives here.

Carrick Council will meet on Monday, July 26th, in the town hall, Mildmay.

Miss Magdalen Stroeder had her tonsils removed this week by Dr. T. A. Carpenter.

Mr. and Mrs. Maynard of Milverton were guests of Dr. and Mrs. Huck on Sunday.

Rev. and Mrs. K. Gretzinger go to Goble's Grove to-day to spend two week's vacation.

Mrs. Illig gives notice that all trespassing on her property on Ellen street is strictly forbidden.

Mr. W. J. Carpenter B.A., of Port Dover, was the guest of his son, Dr. T. A. Carpenter during the past week.

Mr. and Mrs. Geo. Braehler of Oshawa are spending their vacation with relatives here and in Kincardine.

Rev. J. T. and Mrs. Strachan and family of Owen Sound are spending their vacation with relatives in this section.

Miss Gladys Duffy and Mr. Harvey Dahmer of Kitchener are spending a week with the former's mother, Miss Cora A. Fink.

Rev. and Mrs. E. D. Becker, Mrs. H. Beetzger and Mrs. J. F. Eckel of Hanover were guests at Mr. A. Fink's on Tuesday.

Edward Schickler has been awarded the job of constructing the concrete work of a large bridge just east of the village of Neustadt.

Prof. Damm of Northwestern College, Naperville, Ill. conducted a bible study service in the Evangelical Church on Monday evening.

Mr. Chas. Parsill of Goderich spent a few days last week visiting his sister, Miss E. J. Parsill, at the Walkerton hospital, and friends here.

Mr. and Mrs. Donald Taylor and son, Gilbert, and Mrs. J. G. Hossock of Toronto motored to Mildmay on Tuesday evening and paid a short visit to friends here.

Misses Annie Inglis and Helen Pfohl and Mr. John Pfohl of Carrick, and Mr. Wilfred Weiler of Mildmay were successful in passing their Normal Examinations at Stratford.

A little son of Mr. and Mrs. Reuben Bregman of Hanover was run over by a car this week and very badly injured. The boy's skull was crushed, and he has been unconscious ever since the accident.

Keep an open date for the big Lawn Social at T. H. Jasper's, Con. 12, Carrick, on Thursday evening, July 22nd. Fine grounds, electrically lighted, good program and an abundance of choice refreshments.

Miss Clara, daughter of Mr. and Mrs. Peter Weber of Carrick, underwent an operation for appendicitis at the Bruce County Hospital on Thursday. Dr. Carpenter was the operating surgeon. The patient is doing very well.

Advertising Drainage Contract.
We have been informed that Engineer McGeorge is advertising the contract of dredging the Teeswater River, and the work will be proceeded with in due course, following the order given by the Drainage Referee. The estimated cost of the work is about \$90,000.

Lost Their Infant Son.
Clayton, the eleven months old son of Mr. and Mrs. Edward Spielmacher of the 11th concession of Carrick, passed away on Friday of last week, after an illness of two weeks with acute meningitis. Clayton was a bright baby, and the sorrowing parents have the sympathy of many friends in their bereavement. The funeral took place at Formosa on Saturday afternoon.

On Tuesday evening of this week about forty of the girl friends of Misses Anna and Caroline Schnurr, daughters of Mr. Henry Schnurr of Carrick, assembled at their home and presented them with an address and a pair of ivory clocks. The address was read by Miss Georgine Schmidt, while Miss Clara Oberle made the presentation. The Misses Schnurr leave this week to commence a course of training, preparatory to entering the Order of St. Joseph's.

Positions Guaranteed Graduates.
The Wingham Business College has just closed the most successful year in its history, almost one hundred students being in attendance and more than that number on this territory have been engaged in Home Study through the Spotton Correspondence Schools of Toronto. Some unfinished students have left to attend Mr. Spotton's Canada Business College, College and Spadina, Toronto, to complete and take positions there. Under graduate of last year and scores of under graduates have been placed in positions. A position for every graduate is guaranteed by this greatest business college organization in Canada. Write today for particulars.

Mens Straw Sailors 1.50 2.00 2.50 3.00 3.50

HELWIG BROS.

GENERAL MERCHANTS

Western Crop Prospects.
Mr. George J. Brohman, of Edmonton who is assistant manager of one of the largest grain elevators in Alberta, reports that the crop prospects in the three western provinces are uniformly better just now than they have been for years. In former years the crops were very "spotty" but every section of the West, with the exception of small tracts in the dry belt in Southern Alberta and Saskatchewan, are sending in glowing reports. The crop is also several weeks ahead of the average year, and if nothing happens, the West will harvest one of the biggest crops in its history.

CARLSRUHE

Mr. Herb Metzger, who is saving laths near the Saugen river, had a fire on the premises last Wednesday. A spark from the engine landed in the sawdust and when returning from supper had got quite a headway. He blew the whistle and the neighbors were soon at hand and got the blaze under control. It was fortunate that the Saugen river was close by or Mr. Metzger would have lost his entire machinery and wood. His loss is about \$200.

Mrs. John Witter and son, Wilmur, motored to Springville last Sunday. Mr. John Hahn of Heidelberg, Mr. and Mrs. Jos. Brenner of Linwood and Mr. Louis Lobsinger of St. Clements visited relatives here last week. On their return they were accompanied by the latter's mother, Mrs. Louis Lobsinger, who will visit relatives in Waterloo County for a few weeks.

Messrs. Andrew Schneider and J. Huber of Deemerton visited friends here on Sunday.

TORONTO STOCK MARKETS

With the live stock market at the Union Stock Yards decidedly weaker in prices at the opening yesterday for both butcher and export cattle, trade in its initial stages was slow in getting started. With a break lower in prices, ranging from 25c to 35c in exporters and butcher classes, the weigh up at 2 o'clock was about 2308 head, and trade at that hour failed to disclose any overabundance of activity. The outlook was for a possible lower reduction in prices later in the market with a considerable holdover for today.

odd heavy cow taken by buyers for export purposes, making a top to \$4.25 a cwt. Fair cows brought \$4 to \$5 a hundred. Butcher bulls went into slow trading, selling a quarter off from last week's close. A pair of best quality sold at top for \$5.75 to \$6 a cwt., and the balance made the range from \$4.50 to \$5.50. A short supply of baby beef in the Monday offerings sold steady with last week's closing prices at \$11 to \$12 a cwt., with two at \$1.25. Store cattle trade was none too active, with only some half dozen loads included in trading. This class also ranged lower, standing off 25 cents a cwt. from the previous market. Stockers brought \$4.50 to \$6 a hundred, two loads of feeders selling at \$5.50 to \$6 a cwt.

With a fairly heavy run in calves trade was steady, with the market close, \$11 to \$12 a cwt being obtained for the choice vealers. Medium to good calves made \$8 to \$10.50 a cwt., plain veals bringing in \$7.50 to \$7.75 a cwt. There was about 400 grass calves on the market, which sold mostly at \$5 a cwt.
