Bands playing the Russian national anthems and the Mazurkas were heard from every side. At eight o'clock the torches were lit and the torches were lit and the torches were lit.

Major Ferraro gave his luncheon in the name of the municipality at 11 o'clock. After the luncheon he presented a gold champagne cup to Admiral Avelan and a silver champagne cup to the Russian officer. MUST COMPROMISE.
 In No Other Way Can Republicans Gain Anything from the Senate.
 WASHINGTON, Oct. 16.—Notwithstanding the interesting and important character of the bills now pending in the House upon the question of Chinese immigration and registration, the silver situation in the Senate, with its relative subject of rules for the management of that body, easily holds first place in public attention. At the earliest possible moment, it is believed that any change will come in the immediate future. As to the silver question, the most conservative opinion is that a promise will be brought forward on the Democratic side and presented to the Senate, with a view to its enactment into law. The probable course of events meanwhile is a continuance of the debate for a few days at least.
 A vote will be reached by unanimous consent of the House at 3 o'clock this afternoon on Mr. Creary's bill, to amend and modify the Geary Chinese restriction and registration act. Several amendments will be offered to the bill as reported from the Committee on Foreign Affairs, which will not materially alter the measure.
 Immediately after the vote on the Chinese bill Mr. Cox (Texas) will call his bill for the better regulation of National banks, and when this is out of the way the bill to establish a uniform system of bankruptcy throughout the United States will be taken up, and its consideration will doubtless exhaust all the remainder of the week.

GRIEF

The first great grief that comes into a life is hard, for the heart has known no pain.
But when each day brings greater care and strife,
And life endures, the heart must hope again.
Then looking back to pain from which we shrink
To story ways we walked with bleeding feet
In other days to us would now seem sweet.

THE PULSE AND THE TEMPERATURE

If you take a thermometer on a hot summer day and watch it until it runs up under the influence of the sunshine to 98.4, you will see it when it reaches that point the exact temperature of your body if you are in normal health.
Your temperature may fluctuate a fraction above or below 98.4, according to the time of the day or night, but it never varies to any extent until fever or some other kind of disease sets in.
Then the temperature begins to do what the pulse would not do—tell just how dangerously sick the person is.

How Edison Took Up Electricity

"Now that you have left electricity, how did you first come to enter it?"
"I will tell you. It was by a peculiar incident. I was selling papers on a street running out of Detroit. The news of the great battle of Shiloh, 60,000 killed and wounded, came in one night. I knew the telegraph operator at Detroit, and I went to him and made a trade.
He promised him Harper's Monthly and the New York Tribune regularly if he would send out little dispatches along the line and have them published in the paper. I went to the Free Press and took 200 copies. That was my first trade.
I was selling papers on a street in Detroit. I managed to get up to his desk and make a strong impression upon him, and then yelled out, 'Give this man 200 papers.' I took 200 papers out. I was taken off my feet when we reached the office. The editor in chief was crowded with men wanting papers. The next station it was worse, and I raised the price of the papers to 10 cents.
At the third station there was a mob, and I sold out with papers going at 25 cents apiece.
'Well, do you know, that episode impressed me so that telegraphy was a great thing, and I went to the office and tried to electricity.'—Chicago Inter Ocean.

The Influence of Ivy

There is a widespread belief that ivy trained against the walls of a dwelling house is productive of damp walls and general unwholesomeness.
This is really the case. If any one will carefully examine an ivy clad wall after a shower of rain, he will observe that the overlapping leaves have conducted the water from point to point until it has passed every crevice of the structure which will afford a firm hold and act like suckers in drawing out particles of moisture for their own nourishment.
Care should be taken by means of occasional planing that the ivy does not force its way into the interstices of the masonry, for in the rainy season it will grow and water a house cool in summer and warm in winter, and its influence cannot be otherwise than beneficial.—Brooklyn Eagle.

A Dainty Lizard

There is found on the edge of Death valley in California a lizard somewhat similar to the Gila monster, although more agile.
It is strictly a vegetarian. One fellow in the called the chuckawalla by the Cochilla Indians, who are said to be very fond of his flesh.
The lizard is a very fine, tastes like chicken, and Americans who have eaten it are reported not to have returned with their appetites at all.
Apaches hate fish and reptiles of all kinds and never eat them, even if starving.—Exchange.

The Dear Girl

Maud—Ned proposed to me last night.

A MISTAKE MADE BY MANY MOTHERS

The mother who walks after her children, picking up the clothes and hanging up their hats, folding their napkins and performing other little duties for them, which they should attend to themselves, does them a wrong, for she is soiling their brains with the seeds of idleness, which can never be wholly eradicated.—Housekeeper.

A Football Report Revised, In the report, which appeared in your issue of the 20th, of the football match between Sealey's and Harlem there are some statements that need correction.

At first, it was resolved to take no notice of the squib, but the unimportant nature of the matter, and the fact since then has made it necessary for us to say something in our own defence. First, a few words about the so-called "Harlem" team. It consisted of five players from Harlem and the remaining six are borrowed from various places. Delta, Athens and Newboro figuring prominently. The Sealey's Day team, on the contrary, is strictly local, and on the day of the match was weakened by the absence of four players whose places were filled by juniors, a fact well known to the Harlem team.

In his report your correspondent states that the side had it all their own way and that the ball cost constantly on the Sealey's Day team, and is obliged to confess that they won only one goal in an hour and a half.

To any one who knows anything about football such a statement is ridiculous. But that is not the worst of his folly. He evidently realizes the absurdity of the statement and hastens to offer the following excuses for the small score.

First, "the Harlem" team were kicking against a strong wind." Does he forget that goals were changed at Sealey's Day, and consequently the wind for a long time was in their favor? Secondly, he says it was impossible to score, owing to the "pie-shaped" ball. He evidently forgets again that his opponents had to kick the same "pie-shaped" ball, which, however, was no more than the head of your correspondent.

It was decided that a return match be played in two weeks at Delta. As the time approached the Harlem team "blunked" and asked for a postponement till last Saturday. This was agreed to, but on Saturday morning they failed to appear, telegraphing that their team was "busted." Now, if they are as strong players as this one-sided reporter says they are, surely they will not refuse to put up twenty-five dollars on a return match, an amount which will cover by thirty dollars, if the game be played in Sealey's Bay.

The bride was the recipient of many costly and useful presents. After partaking of the sumptuous repast prepared for the occasion, a few hours of social enjoyment were spent in extending congratulations to the happy couple, wishing them a happy and a prosperous life. Music was furnished by the Raton orchestra, assisted by Prof. Lewis, of Addison and Chas. Dailey. The happy couple drove to Brockville and from there took the train for Toronto. NEW LODGER ROOM

A. F. A. M.

Brief Description of the Room Wherein the Brethren of Rising Sun Lodge Will in Future Communicate.

For weeks past workmen have been reconstructing the upper flat of the store of Phil. Wiltsie & Co. to adapt it to the requirements of the Masons who have leased it for a lodge room.

Lately, painters, decorators, paper-hangers and upholsterers have held sway, and yesterday the Reporter, under the pilotage of Mr. J. P. Lamb, had the pleasure of inspecting the interior of the building and noting the results accomplished. The entrance is from the east side and gives ready access to a good stairway of easy ascent, which leads to the society's rooms. The first apartment entered is intended to be used by members for refreshment, and is admirably suited for the purpose. It contains china closets, a dining table the full length of the room, a stove, chairs, etc. Next comes the members' ante-room and, side by side with it, the candidates' ante-room, connected by a doorway and both opening into the lodge room. These three rooms are nicely carpeted and their neatness, order, and general appearance suggest to the visitor to expect something excellent in the lodge room proper. And he is not disappointed. The first impression received on entering the room is very pleasing and a critical examination serves only to increase the measure of his delight. A platform extends around the four sides of the room on which are placed comfortable arm chairs for the members and five richly finished chairs upholstered in plush for the principal officers. Excellent taste was displayed in choosing the carpets. The centre of the floor is covered with Brussels of a light shade of pleasing design and the platform is covered with velvet plush of a darker shade, the two combining very well. The dais of the principal officer is draped with chenille curtains of a soft tone. The lodge is fitted with the writing desk of original design, suited to be used by both the secretary and treasurer. New pedestals, a new altar, new candleabra, and new working tools are among the additions made. The windows are furnished with inside shutters and the blinds are of dark blue with gold lettering, the work of our local artist, Mr. C. C. Slack. The walls and ceilings of all the rooms are deserving of special mention. Neutral tints prevail and they are so disposed as to blend perfectly.

On leaving, the Reporter remarked that with such a beautiful room there should be little difficulty in securing a good attendance. Mr. Lamb replied that there was never any trouble about that. Rising Sun lodge always had a good attendance.

The opening of this new lodge room is an important event in the history of Masonry in the village and suggests thoughts of the past. The charter was granted on March 26, 1859, under the G. L. of Canada, by Grand Master William Mercer Wilson, of Simcoe, Norfolk Co., on petition of the following gentlemen: Florence McCarthy, Seneca Washburn, John Kincaid, John Van Loon, Wm. H. Giles, Hiram Falford, Uria Soper, Thomas Sheffield, Francis Tremayne, H. Cloak.

Mr. McCarthy was the first W. M. For the first few years of the lodge's existence the members of the craft met in an upper room of the present residence of Mr. Geo. Nash, and for the last thirty years they have met in the building erected by the late Armstrong House. Rising Sun Lodge has prospered since its inception up to the present time, and while the nature and appointments of a lodge room may have little effect in increasing or lessening the loyalty and attendance of those who love to "meet upon the compass and part upon the square," such a room as the Athens Masons now have will add very materially to their comfort and enjoyment.

We congratulate them on their possession.

We are informed that it is the intention of the Masons to hold an at home in the near future, and, later, a public Dedication, conducted by Grand Master Robison.

The Brockville district holiness convention opens in the Methodist church to-morrow at 9 a. m., and the closing session will be held at 7.30 p. m. on Thursday. From reports that reach us, it is apparent that there will be a very large attendance.

Mr. A. Merriman, of Elgin, with one shot, is credited with having killed 7 black ducks out of a flock of 9, in a small pond in his back field, one day last week. If he had killed any more he would probably have said so.

An Elgin correspondent says: Two youths were surprised last Sunday night, while in the act of burglarizing H. Laisley's store. J. R. Dargavel and Constable Sexton, after admonishing the boys, and threatening to inform their parents, decided to let them go.

A provincial health officer visited Carleton Place a few weeks ago to try to locate the cause for so much typhoid fever. He took away samples of water from wells in various parts of the town for analysis. At a meeting of the provincial board of health at Toronto last week a report showed that the water supply was in some cases from impure wells, and it was decided to require the towns to cease their use.

Help for the Rheumatic. The number of well authenticated cases of rheumatism which have yielded to the action of Membray's Kidney and Liver Cure is bringing this preparation before the attention of the medical profession in various localities. Sufferers from this torturing affliction should test its merits. It appears to have a specific action on the liver, kidneys and blood, and quiets and allays the inflammation in an unexpectedly brief period of time.

MARRIAGE.

GALLAGHERS.—At the residence of the bride's father, Harmon, Oct. 11, by the Rev. W. P. Farley, Eliza K. Gallagher to Joseph P. Gallagher, daughter of Albert G. Gallagher, of Beaufort, Leeds Co.

WARY LOBENGULA

He Will Fight a Warring Battle—He Will Kill the Opponent.

LONDON, Oct. 14.—News of the situation in Mashonaland indicates that unless the British forces are able to strike the Matabele quickly the warfare may last some time. The South African Company has partly succeeded in driving the Government into the affair, inasmuch as the Bechuanaland border police have been ordered to draw the Matabele into the British for a speedy conclusion of the trouble rest mainly on the idea that Lobengula will not fight an open battle, but the opinion of experienced South Africans is that Lobengula is too wary to take an open battle, but will attempt to take the troops from ambush, cutting off the supplies, killing stragglers, etc., and will thus try to wear the British out.

Henry M. Stanley in an interview says he thinks Lobengula will be forced by his young blood to fight. He himself recognizes the fighting superiority of the British. He is certain that he will be defeated in any attempt to fight the Matabele. The fight may be protracted and fierce, but can have but one ending. Lobengula, after retreating, will be bound to be crushed.

A South African despatch gives rumors of an open battle, fighting and definite news is expected shortly.

No Hostilities Yet.

CAPE TOWN, Oct. 16.—The Fort Salisbury and the Fort Victoria columns of the Cape Mounted Rifles are now marching along the coast in the hope of driving Lobengula's men out from the bush into open ground. A fight is expected daily.

New Legislation.

BERLIN, Oct. 16.—Several official newspapers say that the complete financial proposals of the Government will be laid before the Reichstag on November 20. These proposals are said to be such as will command the majority of the Reichstag.

After they shall have passed the deputies will be expected to consider several social and economic bills.

The Emperor and Empress passed last week at the shooting lodge Hilsberg, about two hours by train from Berlin.

Wages Should Follow Prices.

LONDON, Oct. 16.—Thousands of members of trades unions and radical clubs are expected to meet at Park Lane on Friday afternoon and collected along the route for the miners' fund. There were twelve hundred members of the unions from their labor leaders addressed the crowd as it to the troubles in the coal districts.

The exploded theory that wages ought to follow prices. Prices ought to follow wages, he said.

Chicago, Oct. 16.—The Governor-General of Canada and Lady Aberdeen arrived on Saturday and passed the night at the World's Fair, where they were received by the Director General.

The next visit to the Victoria house and afterwards went to the Irish village, organized by the staff and workers of the village, the band playing "God Save the Queen" and "The Canadian Anthem." The Canadian commissioners are arranging a special reception for Lord and Lady Aberdeen on Wednesday.

Angus Lamont Still Missing.

OTTAWA, Oct. 16.—On Sunday, Sept. 17, Angus Lamont left his home and up to date no trace of him can be ascertained. He is a young man, about 28 years of age, 5 feet 7 inches tall, dark hair, dark eyes, black hair, and had on a dark tweed coat, striped shirt, and dark trousers.

He has been out of his mind for nearly two years, having violent crazy spells, especially during the winter months, and could not travel far among strangers without attracting attention. Some think he may have committed suicide.

Lost the Postoffice.

FENELON FALLS, Ont., Oct. 16.—The Postoffice here was burglarized yesterday morning. Stamps and cash to the value of \$400 were stolen. An entrance was made by the front door, and the safe was blown open.

Mr. McCarthy was the first W. M. For the first few years of the lodge's existence the members of the craft met in an upper room of the present residence of Mr. Geo. Nash, and for the last thirty years they have met in the building erected by the late Armstrong House.
