The World has already given the partic-lars of the suicide of young Law, he ex-clerk of the bank of British h America in this city, and of the vents which led up to it. No unpreju-niced person who has perused our reports of this sad affair can fail to have been im-pressed with the objectionableness of the system of which he was a victim.

There has been a loud and very proper itery against the importation, under consact, of Hungarian, Polish, Italian and linese laborers, who come hither, not as rs, but more in the character of animals, to undermine the free ready here, or who may come their own volition. This ate result must be to degrade our rs to the slave level. That such a ation cannot take place without rethe paltry remuneration attached to such employment. Why, then, do our great financial institutions import competitors for these vacancies? Partly, we believe, because they are still under the thrall of tain a system of white slavery that is both disgraceful and dangerous. Poor young Law sliently submitted to the extortion practised upon him, but supposing he had directed his desperation against another before turning it upon himself? Then we should have had a double tragedy, and much moralizing upon the wickedness of young men. All young men are not Laws, and some day an imported white slave may be moved to put his lead where it will do the most good. Our banks—or such of them as are in it—ought go out of talking nonsense. What our contemporary probably means is that St. Paul is a natural market for Exhibition Grounds northwestern Canadians to buy in. That is what the St. Paul men think, of course, but the people of Ontario take a different view of the matter. DR. McDonell,—Allow me to pen a few words to the Association and yourself. Iknow nothing I may say can in any way measure my debt of gratitude for health restored, but may possibly show a little of my appreciation. After years of sickness and its attendant miseries, my husband persuaded me to consult your Association. Not, however, before we had tried every available method in the way of medical attendance and advice, both here and elsewhere, only to be assured by all that my case was hopelees.

Canada, Mail Building, Toronto:

Gentlemen,—It is with feelings of great thankfulness that I write this to show you how sincerely grateful I am to you for what you have done for me in restoring me to perfect health. When first my poor mother brought me to your office little did she or my self think that under your treatment I would so soon improve in health, but I did, and under God and your skill I can safely say that now that dreadful disease which threatened to cut me off at an early age is completely removed. For a length of time I was under the care of the best doctors in this city, but they did me no good at all. But even in a few weeks after I commenced your treatment, to my great surprise and delight I began to get better. I am now strong and never enjoyed life or knew what it was to be well before. I hope that all those afflicted as I was, will be wise enough to go under your care,

Yours very respectfully,

Catarrh for Twenty Years. After twenty years suffering with disease of the Nasal passages, and after consulting the leading physicians both here and in several cities in the United States, and having spent two seasons in the south, I returned, but not improved; in fact I was much worse off, for the discharges had become so very offensive that I was obliged to withdraw from society. Seeing one of the papers, "Guide to Health." in your city some time in February, I called upon your staff, who, after a careful examination, discovered a Posterior Nasal Polipi, which was removed without much pain, and a month's treatment advised. I can state that I am well and hearty now, and thank your experience and careful management for my good health.

"They are not as good sailors, but they have greater endurance."
"Here they any pluck?"
"Plenty of it in defending themselves about decks. The white sailors do not impose on them aboard ship. They can take their own part every time. If you compare them in this respect with Frenchmen I should say that in a stand-up fight the Chinaman would knock out his opponent. But when you come to man a ship with Chinese and expect them to make a first-class crew, you find yourself in a bad pre-licament. The Chinese navy has no show whatever against the French. Their navy a composed of two classes of ships, the composed of two classes of ships, the steamers and the junks. The junks re well represented by the pictures you have seen in books of travel. They are all armed with six or eight guns each, but what can they do? So far they have served as coffins for their crews who were drowned after they had surrendered. lany of the iron steamers were built in ngland. They were constructed on exbellent principles, and are very fine ships.
They are armed with heavy modern guns.
White men were engaged to train the crews. But with all that the ships and the crews are not a match for the great iron-clads of the French fleet. The num-ber of iron steamers in the Chinese navy is very large. They have launched six or very large. They have launched six or eight gunboats themselves at Shanghai the past year to my knowledge. These boats were built under the direction of European and American naval architects. They are first-class of their kind, but they are too small. China has no hope at sea."

"You let me alone. I know my biz."

The mule blazed away and landed the tickler across the barnyard against the fence kerswat.

"There, didn't I tell you?"

"Well, whatif you did?" said the tickler, gathering himself up and returning to his tickling only to be raised back with more force than before.

"Well, you're an infernal idiot," said the passer, starting to go.

"Nell, you're an infernal idiot," said the passer, starting to go.

"Nell a in't, stranger. I do this every morning before there's going to be a game. You see, I'm a baseball umpire and—"

"He'll kick you into kingdom come." said Everyone competing must send one dollar with their answers, for six months subscription to Truth. And aside from the rewards themselves, they will find that they have made the best investment of one dollar they ever did. Truth is full and big value for the money. Bear in mind that you pay nothing extra for the privilege of competing for these costly rewards, as you will get Truth for six months in any case for your one dollar, which is the regular subscription price, and will also get one of these rewards, provided your answers are correct, and reach Truth directs special attention to the fact that clergymen are not permitted to compete, neither are persons who in previous competitions won prizes exceeding one hundred dollars in value. TESTIMONIALS SELECTED. Toronto, April 12th, 1880.

I hereby certify that I have examined samples of JOHN LABATT'S INDIA PALE ALE, submitted to me for analysis by James Good & Co., agents for this city, and find it to be perfectly sound, containing no ascetic acids, impurities or adulterations, and can strongly recommend it as perfectly pure and a very superior malt liquor.

BEAVER HALL HILL, Montreal, Dec. 20, 1880.

I hereby certify that I have analysed several samples of INDIA PALE ALE and XXX STOUT from the brewery of JOHN LABATT, London, Ont. I find them to be remarkably sound Ales, brewed from pure malt and hops. I have examined both the March and October brewings, and find them of uniform quality. They may be recommended to invalide or convalencents where malt beverages are required as a tonic, Signed JOHN BAKER EDWARDS, Phy., Professor of Chemistry and Public Analyst.

The Sensation Caused by the Arrival of a Canadian at the Virginia Springs.

White Sulphur Letter in the St. Louis Globe-Democrat.

A personage conspicuous, but not for size, a Bishop Hellmuth of London, Canada—nishop general of the provinces his full sitle is. He is, in stature, the smallest man at White Sulphur, but his clothes look as if the tailor had measured him by s intellectual greatness. The skirts of a broadcloth coat are absurdly near the cound, while his pantaloons are reefed up cound his ankles in a manner to present the alternative of a wanton waste of cloth in o "galluses." The little bishop cometes this odd costume with a small-cowned, broad-brimmed, black felt has, which he wears well drawn down on the ack of his fread. There is no lack of outling of hats as he passes bears witness. This deference seems to be a source of bringled gratification and wonderment to im. Sometimes after returning an unsually reverent greeting he will turn and book after the departing form with a half-leased and a half-puzzled expression as if Irginia manners were a matter for some touty. ctual greatness. The skirts of

Out of the bishop's hearing there is a little good-natured fun poked at him and his queer ways. "Did you see him the night before he got here?" asked one. "Well, he was pretty near distracted about his valies, a little rusty affair. When I saw him I thought he must be a jewelry peddler with his stock in that 'bag,' as he called it. 'I say,' he exclaimed excitedly to the porter as soon as he got out of the bound of the bound of the same wasn't used to such quick talk, and all he could stammer out was: 'I dunno, sah; but 'spec not, sah.' When he registered he aid down a half dollar and you ought to have seen that clerk stare."

From the Hamilton Spectator. Ald. Evans, president of the great central fair, who was in Toronto a day or two ago attending the Toronto a day or two ago attending the Toronto exhibition, was seen this morning by a Spectator reporter. "I saw nothing in their exhibition that was worth while copying," said Ald. Evans. "The fact is, in several departments, especially in machinery and agriculture, the exhibition is greatly inferior to last year's.

Great Negligence.

There is great neglect with most people to maintain a regular action of the bowels, which causes much disease. Burdock Blood Bitters cure constipation.

A failure to relieve or cure summer complaints can never be truthfully applied to Dr. Fowler's Extract of Wild Strawberry. All dealers sell it. 2.4.6

The secret of economy lies in the buying fupholstering, such as parlor or drawing-room suites, in the purchaser going to an establishment where they make it a specialty of manufacturing first-class goods. T. F. Cummings, 349 Yonge street, has the reputation of being an experienced workman, who thoroughly understands his business. You can rest fully assured of getting what you want, and at reasonable figures.

People who wish to note the progress Toronto is making ought to visit West Toronto Junction. It is within a few minutes of the Union station by the trains of either the Ontario and Quebee and the Grand Trunk or the Northern. The junction station of the C. P. R. is now in full blast and freight and passenger trains are stopping there every short while. New houses are going up all round while the plans of many handsome ones are still in the hands of the architects. Real estate in the neighborhood has steadily risen in value and promises to advance still more rapidly. A lot or block in this locality is the best investment a workingman or capitalist can go into. It will double itself in two years just as Parkdale, Brockton and the whole west end has done. Some of the best lots in West Toronto are to be had from George Clarke, 295 Yonge street.

For fad mantles go to the Bon Performed to Death.

The scory of the "filliputian wonder," an infant 9 inches long and weighing 10 ounces, "performed" to death (at Birmingham) in order that its purchaser might profit by the exhibition of "the smallest rom the Pall Mall Gazette. world" is one of the most reme to light for a long ibalism, indeed!

Starving men and disgusting

Starving men and disgusting

cruelty? The love of monstrosities—fat women, dog-faced men, two-headed nightlingales—which is one of the most brutal features of the Englith character, has doubt
less been the cause of many crimes, as it
has led to the perpetuation of much awful
misery. It is too much to hope that the
history of this poor "midget" may have
some effect in restraining decent people
from indulging and encouraging a vulgar
and brutalizing curiosity.

Economical of Space.
From the Chicago Times.
A western circus recently ordered a large dvertising poster to be printed, and then kicked because there was so much sky in it. "I ain't agoin' to advertise the sky," he said to the lithographer. "I paid youto advertise my show. Drop a few camels and stick 'em up there. I ain't agoin' to have all that good space run waste."

—The reason why "Nonsuch Washing Compound" should be used in preference to all other washing preparations. First, It is perfectly harmless. Second, It saves more than half the labor. Third, It is the oheapest in the market. Many more could be given but this should be sufficient. For sale by all grocers. Lowden & Co., Wholesale, Agents for Toronto.

THE NEW STRAWBERRY, JERSEY QUEEN. JAMES JOHNSTON, OF FERM NACH PIACE,

has pleasure in announcing to the public that he is now prepared to supply from one to two hundred thousand plants of three of the best varieties for this climate now cultivated, and the control of the SHARPLESS, widely known and very popular. Hear what

widely known and very popular. Hear what Elwanger & Earry, of Mount Mope Nurseries, Rochester, N.Y.

say about it: Sharpless—Very large, an average specimen measuring one and a half inches in diameter, either way; generally oblong, narrowing to the apex, irregular, often flatiened; clear light red, with a smooth shining surface; firm, sweet, with a delicate aroma; excellent quality; remarkably vigorous and uxuriant; hardy and prolific. In consequence of their vigorous habit, long roots and ample foliage, the plants are capable of resisting severe drought and cold; season medium to the largest and best strawberries in cultivation. Our first description, published in 1877, has been verified to the letter. We can only add that the experience of the last few years confirms the opinion we first formed of its value; but the plants must be set farther apart than other sorts and grown in hills or narrow rows, and the soil must be rich. It is untroductive in matted beds.

JERSEY QUEEN,

great acquisition to strawberry growers.

Just hear what the Honorable Marshal P. Wilder

Just hear what the

Honorable Marshal P. Wilder

says of this great strawberry:—"The largest and most invuriant plant we have ever seen: appearing to thrive under any and all circumstances: easily grown, making vigorous runners, never burning or blighting its foliage, invariably bearing the largest fruit of fine form and first quality; coloring evenly, and perfectly brilliant and beautiful; fine in texture, solid and firm, yet melting, high flavored and lucious. The very best of all to carry and keep. The crop under high culture, in both quantity and quality, and under neglect and abuse, has astonished every one acquainted with its performance. With the terrible heat and drougth pravailing, it neither faltered nor failed in any yeepect, but appeared as thriving and luxuriant as in more favourable seasons. The most trying circumstances do not seem to affect it as under the action of the severe frost of 1878, in the most exposed situation, when every other in its vicinity was nearly destroyed, it seemed but elightly affected, as it bore the largest and finest crop over seen (previous to that time) upon our grounds. The same being exhibited at the New York Horticultural society of that year (1878), held at Gilmore's Garden, New York city, taking First Prize as the best in the exhibition. At the close of the three days trial of very warm, moist weather, it was found that nearly every plate of berries exhibited was a mass of blue mold. Yet the Jersey Queen presented an appearance nearly as firm and fresh as when first placed upon the table, receiving the highest praise from the officers as being unequalled in the most desirable qualities. "The berry is coneshaped, slightly flattened at the point, and in very large specimens partake of the oblong or oval form, yet smooth and perfect, it possesses a brilliant color, between a scarlet and a crimson, as evenly and perfectly distributed as can be approached, in heauty by any other." It succeeds splendidly with us. I will dig, trim, puddle and ship to any order plants and
