A candidate applying for a license of any grade, making the required average, but mis-spelling more than 12 words, shall receive a license of the Grade next below the one applied for, but candidates for the Third-class licenses shall, in this case, receive a special Permissive license good for one year.

Each Candidate whose application is regular, shall receive from the Superintendent of Education, through the Inspector, a certificate of admission to the Examination at least one week before Examination begins; and a list of such candidates shall be furnished to each Inspector. Candidates may enter in their application such Station as best suits their convenience, but in respect to these counties which have had two examination Stations, the right is reserved of confining the Examination to the Central Station in charge of the Inspector, if expediency shall so dictate; in which case due notice of the change will be given to all concerned.

For examination purposes the work of each subject will be divided into three sections of equal value as follows: (a) prescribed text-book and lectures; (b) Practical and original work, such as dissecting, experimenting, &c.; (c) Collections, mountings, apparatus. The purpose of this arrangement is to lay the stress on *real* knowledge of a practical character, rather than on knowledge derived chiefly from text-book.

The lecture and demonstrations during the session of the school are intended especially elucidate facts and principles that are more or less obscure, and to exhibit the best method of teaching elementary science. All laboratory work will be done by the aid of the simplest equipments such as are within reach of the common schools of Nova Scotia.

A prize of \$10.00 will be given for the best set, and another prize of \$5.00 for the second best set, of home made apparatus adapted for the use of common schools in illustrating the principles of Physics and Chemistry.

Excursions to the Coal Mines, Glass Works and Nova Scotia Steel Works, will be arranged. In addition, there will be numerous excursions in various directions for collecting specimens in Botany, Zoology, and Mineralogy.

Besides affording its students an opportunity to become acquainted with the best methods of acquiring and teaching the natural sciences, the Summer School brings together in pleasant holiday association many of the best teachers of the province; and so not only enlarges each one's circle of acquaintance, but helps to promote a higher professional enthusiasm and to cultivate a more liberal educational spirit.

In addition, Pictou with its bracing air, magnificent harbor, and unique scenery, is unsurpassed as a summer resort; and those interested in the object of the school cannot spend two weeks elsewhere in midsummer more pleasantly and profitably.

To defray necessary expenses a tuition fee of \$3.00, payable in advance, will be charged. Board may be obtained for \$3. per week. Prescribed books may be had at the Pictou bookstores. It is expected that reduced rates will be available on all railway and steam-boat lines.

Application from those wishing to attend the school should be made to the secretary as early as possible—at latest, before June 1st, 1888. In order to facilitate the construction of a time table, the applications should specify the courses which the applicant intends to take.

Further information may be obtained from the president, the instructors, or the secretary.

Truro, March 1st, 1888.

J. B. HALL,
Secretary.

OFFICIAL NOTICES.

SUMMER VACATION.

Attention is particularly directed to the following regulations of the Council of Public Instruction respecting the Summer Vacation in Public Schools, by which, so far as the correct School year is concerned, all regulations heretofore in force on the same subject are superseded:—

1. The vacation shall begin on Saturday, July 7th, and, except as hereinafter provided, the Schools shall re-open on Monday, August 13th.

2. In County towns, and at the option of Trustees in all other towns with Schools embracing four or more departments, the Schools shall re-open on Monday, August 20th.

EXAMINATION FOR TEACHERS' LICENSES.

These examinations will begin at 9 a. m. on Tuesday, July 10th. They will be held at the usual Stations throughout the Province. Candidates will particularly observe that their applications for admission for examination are to be forwarded to the Inspector of

the District in which the Station at which they wish to be examined is situated, and not to the Deputy Examiner of the Station, if he be not the Inspector. Printed forms of examinations (though not required) may be obtained from the Inspectors after May 1st. The place entered in the form of application should be that to which the candidate wishes his certificate of admission to examination to be mailed. The revised Regulations of Council (re-published in this number of the JOURNAL) should be carefully read by intending applicants.

Candidates will please notice carefully the date of Examination—A week earlier than usual.

PROFESSIONAL EXAMINATION.

Candidates for all Grades of license are informed that in consequence of the inability of the Department of Education to supply copies of the School Law Manual, no questions will be set at the ensuing Examination under 1 (a) of "Requirements common to B, C, D Grades," or 1 (a) of Professional Requirements for Grade A license. Questions under 1 (b) of both of the above specifications will be incorporated with questions on *teaching* in one paper, called "School Management and Teaching." This re-adjustment is for the present year only.

TRUSTEES' RETURNS.

As the Act passed at the Session of 1887, for the further regulation of teachers' grants takes effect at the close of the current term, trustees and teachers will find it to their interest to have their returns placed in the hands of the Inspectors at the earliest possible moment.

The Department of Education will not be in a position to take a single step towards the distribution of grants, until complete sheets

from every County or District have been received. To prevent general inconvenience and loss from the negligence of individuals, the Inspectors are instructed to report on such returns as shall have come to hand on the 7th of May (or November.) Delayed returns run the risk of postponement until the next terminal distribution. In reply to inquiries, it may be stated that it is impossible to predict the exact date at which teachers may expect to receive their grants under the new arrangement. A general assurance is given that no unnecessary delay will take place. As a careful collation of the returns from the entire Province is now necessary, involving calculations both minute and extended, payments need not be expected at dates as early as these at which grants have heretofore been paid in some Counties sending in prompt returns. Still it is hoped that with due promptitude on the part of all officials concerned, the grants will be ready for distribution somewhere about the average time of previous payments.

SCHOOL LAW MANUAL.—The edition of 1885 being completely exhausted, a new and greatly improved edition is in press. The issue of the latter has been delayed in order to secure the benefit of a few necessary verbal revisions at the recent session of the legislature. The new Manual will not, as in the case of former editions, be distributed gratuitously by the Department of Education, but will be on sale generally in the book stores throughout the Province, at a retail price not exceeding fifteen cents.

TEACHING DAYS.—The number of Teaching days for the current term, closing April 30th, is 117.

The number of Teaching Days for the ensuing term, beginning May 1st, is 105.

ADDITIONAL HOLIDAYS.—To enable teachers more conveniently to aid Trustees in preparing returns for transmission to the Inspector, the Council of Public Instruction has been pleased to order that hereafter "the 30th of April and the 31st of October shall be holidays in the Public Schools, and when either of these days shall fall on Saturday or Sunday, the preceding Friday shall be a holiday." At the request of the Board of School Commissioners, the Public Schools of the City of Halifax are excepted from the operation of this Regulation.

SATURDAY AS A TEACHING DAY.—The Council of Public Instruction has ordered that to existing regulations denoting the limits within which school may be kept on Saturdays (see Manual page XV), there shall be added the following: "Provided that nothing contained in these Regulations shall prevent a teacher from teaching on Saturdays in order to make up for *not more than two teaching days* necessarily lost at the beginning of the term in travelling from a distant section in which he (or she) had been previously engaged."

COUNTY ACADEMY RETURNS.—In addition to the special returns to Education Office, Trustees will send the usual returns to Inspectors. In no case should drafts for County Academy grants be drawn on the Superintendent of Education without previous authorization.

ARBOR DAY.—To encourage the proper adornment of school grounds, and thereby a cultivation of a taste for the beautiful in nature on the part of the pupils, the Council of Public Instruction has ordered the publication of the following Regulation:—

"On such one of the first thirty teaching days of the summer term, as according to season, weather, or other circumstances may be deemed most suitable, Trustees are authorized to have substituted in the regular school exercises of pupils, the planting by the latter of trees, shrubs and flowers on the grounds surrounding the school house. The day devoted to this purpose shall be known and entered in the Register as 'Arbor Day,' and when duly observed full credit will be given for it in the apportionment of public funds, on the basis of the actual attendance of pupils as ascertained by roll call at the beginning of the exercises, or other convenient time during their progress. Additional value and interest should be imparted by mingling with the practical duties of the occasion short addresses from the teacher and other competent persons on the aesthetic and economic importance of arboriculture. During their summer visitation, Inspectors shall take note of all schools in connection with which 'Arbor Day' has been observed."

There will be found subjoined some practical suggestions which will be serviceable to those who wish to make the occasion a really profitable one. A day has been fixed by the Maritime Provincial Grange as an "Arbor Day" within the jurisdiction of that body, for the purpose of impressing on the public mind the importance of restoring and preserving our forestal resources. Where the season suits, there might appropriately be a co-operation of the Grangers and the school authorities.

In selecting trees, it is well to avoid those that bear flowers or edible fruits, as such in the flowering and fruiting season are apt to meet with injury from ignorant or mischievous passers-by, and to offer temptation to the pupils. Butternuts and Horse Chestnuts are not to be commended as shade trees. The Balsam Fir is objectionable from the liability of its balsam to stain the hands and clothing. Deciduous or broad-leaved trees are easily grown, their

fibrous roots rendering transplanting a comparatively simple operation. If care is taken the young saplings of the elm, maple, and ash, as found in the under growth of the forest, can be transplanted without difficulty.

No school grounds should be without a suitable number and variety of the standard deciduous trees. However, during the winter season they are bare and unattractive, and afford little or no shelter. On the other hand, evergreens, such as Spruces, Pines, Hemlocks and Cedars, retain their foliage and provide a shelter as useful in winter as it is grateful in summer. Trees should always be planted according to a definite plan, being arranged either in curves or straight lines, according to circumstances, and with an obvious relation to the building and fences. They should not be placed so near the school house as to interfere with the free play of light and air.

Our native trees grow so freely in the woods that we are apt to suppose that they are merely to be taken up by the roots and transplanted, to start at once into as vigorous growth as before. This is a mistake. Great care should be taken in digging up the tree to preserve the fibrous roots; long runners should be cut across with a sharp knife, and not torn. All trees thrive best in well-drained soil, varying from sandy loam to clay. A clay loam suits all descriptions. The holes for the trees should always be made before the trees are brought on to the ground. They should be too large rather than too small. In filling in, the better soil from near the surface should be returned first, so as to be nearer the roots, but where the soil is at all sterile, and generally, there should be put below and around the roots, some well-rotted compost, mixed with sand and sandy loam, in order to promote the growth of the rootlets. In setting the tree it should be placed a little deeper than it stood before, and the roots should be so spread out that none are doubled. When finally planted the tree should be tied to a stout stake in such a way as to prevent chafing of the bark. Some mulch or stable litter should then be thrown around the stem to protect the roots from drought. Stirring the ground is preferred by some cultivators to mulching. In transplanting evergreens, the roots should not be exposed to air or light—especially to the heat of the sun—more than can be helped.

Several varieties of shrubs planted together in clumps produce a very pleasing effect, while the care of judiciously arranged flower beds will be to the children an important means of education.

Trustees are notified that a person calling himself Angus Smith, who at various times during the past few years has sought to impose himself as a licensed teacher on sections in Halifax, Guysboro', Richmond, and probably other Counties, holds no license, and is therefore incompetent to enter into a valid engagement.

Erratum.—In Journal of Education for October, 1887, page 14, "County Fund for Term ended Oct. 31st, 1887," should be Oct. 31st, 1886.

The attention of Principals of County Academies and other High Schools, is particularly directed to the following:—

ANNUAL SCHOOL MEETING.

The date of the Annual School Meeting for the current year is *Monday, Sept. 24th*. Trustees should carefully observe this date, and not fail to legally announce the meeting by notices posted in three public places within the Section at least five days previous to date of meeting.

In Sections in which schools are organized for the first time, and which consequently are without Trustees, notices should be posted by the Inspector.

The following is an outline of the order of business of annual meeting:

(1.) To elect a chairman of the meeting. (2.) To elect a new Trustee or Trustees. (A majority of votes, i. e., *more than half*, is required for this election.) (3.) To receive and pass upon the report of the Auditors of Accounts. (4.) To receive the report of the Board of Trustees concerning educational operations of the year and the requirements of the Section for the ensuing year. (5.) To determine by a vote of the majority of the ratepayers present what amount shall be raised by the Section during the ensuing year for any, or all, of the objects authorized by law; and if any sum is included for the purchase and improvement of grounds or for the purchase of building of school-houses to fix the period (not to exceed twelve years) within which the sum voted for these purposes shall be collected; and, if necessary, to authorize the Trustees to borrow money for the procuring of houses or lands. (6.) To transact any other necessary business.

BOTANICAL SPECIES.—The following *fifty* common species (occurring in almost every School Section of the Province) are named for analysis and classification in connection with the *Botany* of the First Year of the High School Course. A description of the *genera* and *orders* in which these species are included should also be required. This list should be regarded as a *minimum*

Few teachers really interested in teaching science will find much difficulty in adding another fifty, which should include a few specimens of *mosses*, *liverworts*, *lichens*, *fungi*, and *algae*, as well as some additional *phanerogams*. This list will, of course, be revised from time to time.

1. Ranunculus repens.	26. Mentha canadensis.
2. Capsella bursa-pastoris.	27. Solanum tuberosum.
3. Viola blanda.	28. Syringa vulgaris.
4. Drosera rotundifolia.	29. Chenopodium album.
5. Cerastium vulgatum.	30. Polygonum aviculare.
6. Acer Rubrum.	31. Ulmus Americana.
7. Trifolium repens.	32. Fagus ferruginea.
8. Prunus Pennsylvanica.	33. Myrica gale.
9. Fragaria Virginiana.	34. Betula.
10. Pyrus malus.	35. Populus tremuloides.
11. Ribes nigrum.	36. Pinus strobus.
12. Epilobium angustifolium.	37. Abies Canadensis.
13. Pastinaca sativa.	38. Habenaria or cypripedium.
14. Aralia nudicaulis.	39. Iris versicolor.
15. Cornus Canadensis.	40. Smilacina bifolia.
16. Sambucus.	41. Juncus effusus.

24. Lisimachia stricta.	49. Osmunda cinnamomea.
25. Veronica serpyllifolia.	50. Lycopodium clavatum.

Where the genus alone is mentioned the teacher is supposed to select the species most available in the neighbourhood. Some of these flowers are very minute, and their study will require the use of a cheap botanical lens. It is important that each student should own a lens, and be taught how to use it. Students should be exercised in drawing the small parts enlarged on the black boards and in their note books. As a specimen of the mosses is recommended "The Common Hair Cap," *Polytrichum*: of the Liverworts *Marchantia*; of the Lichens, *Usnia*, *Sticta* or *Cladonia*; of the Fungi, *Agaricus campestris*, the "edible mushroom."

INDUSTRIAL DRAWING FOR HIGH SCHOOL COURSE.

1. For first year. Nos. 5 and 6 of the American Text Book of Art Education (retail price 15 cents each.)

2. For second year. Nos. 7 and 8 of the same series, (retail price 25 cents each.)

The above books belong to the same series as those already used in our Common Schools. Nos. 5 and 6 are accompanied by a Manual for Teachers, giving full directions in regard to the use of the books. The retail price of this Manual will not exceed 60 cents. A small Manual accompanying Nos. 7 and 8 will be supplied gratuitously to teachers whose circumstances require them to use those books. It is not supposed that for the year about to begin many schools will require anything in advance of Nos. 5 and 6. As it has been thought well to omit No. 4 entirely from the Course of Study, the following hints are supplied:—

Before beginning work in Book No 5, pupils should be taught to draw by freehand the following plane geometric figures, and these figures should be drawn or derived from the geometric solids—thus,

The Circle from the Sphere,
The Oblong from the Oblong Block,
The Right-angled Triangle from the Square Prism,
The Isosceles Triangle from the Square Pyramid,
The Equilateral Triangle from the Equilateral-triangular Prism,
The Ellipse from the Ellipsoid,
The Oval from the Ovoid Form,
The Hexagon from the Hexagonal Prism,
The Pentagon from the Pentagonal Prism,
The Octagon from the Octagonal Prism.

By deriving the plane geometric figures in this way pupils will have a more definite conception of them than if drawn from flat copies or from blackboard copies alone. As a rule, the shortest dimension of each figure should be four inches.

For definitions in regard to these plane geometric figures consult pages 35 and 36 of the Manual, Part III., accompanying Drawing Book No. 5. The drawing should be made on Manila paper and pupils should be practised on rapid work. Where no previous instruction in Drawing has been received, attention should be paid to the holding of the pencil and the character of the line produced. The pencil should be one of medium softness.

TEXT BOOKS.

Comment.—In performing the duty of selecting and prescribing text-books for the Public Schools, the Council of Public Instruction, has availed itself as fully as possible of the knowledge and experience of those who are engaged in the practical work of education. The sole aim of recent modifications has been to secure, at reasonable cost, a series of texts, adapted for use in schools. Change in authorized books is in itself a very undesirable thing; and it is hoped and believed that matters may remain where they are now for years to come, without substantial alteration.

The general effect of recent changes has been to largely and permanently reduce the cost of text-books, especially to pupils pursuing an extended course. The Council is engaged in inquiries and efforts with a view to still further diminish expense by securing, wherever practicable, a lowering in price and an improvement in the mechanical quality of the prescribed texts.

Inspectors and teachers are reminded:

1. That the Course of Study for Common Schools encourages an economical expenditure for text-books by providing a system of oral instruction for junior classes. Too many teachers try to satisfy themselves in respect to their more youthful pupils by placing in their hands text-books not needed in any case, and worse than useless when unaccompanied by proper oral exposition. A text-book should not be required for a child until he is prepared to use it intelligently.

2. That the regulation which makes it illegal and improper for a teacher to introduce unauthorized texts, by no means hinders him from giving his pupils the benefit of other treatises to whose explanations he may attach importance. The progressive teacher will always have such aids within reach, and will so use them as to impart variety and interest to his instructions.

Dr. Edward Smith's Manual of Health (A. & W. Mackinlay.)

Dawson's Handbook of Zoology (Dawson Bros. Montreal.)

N. A. Calkin's (Boston) Primary Object Lessons (Harper Bros., New York.)

NOTE.—Prang's Natural History Series of botanical and zoological drawings and cards is accompanied by an excellent manual of directions. The whole series, with manual complete, can be obtained from A. & W. Mackinlay at \$9.50. Steps are being taken to recommend a cheaper series for the smaller class of schools.
