ADVANCE TOWARD LILLE

Enemy's Attempts to Break Thru Lines Are Proving

LONDON, Oct. 20, 9.20 p.m.-Fightbringing to a halt the advance of the

lies are making an attempt to advance toward Lille for the relief of that city, some time, and are also pushing on to the north and south of Arras. French Line Holds.

To the southward, at the bend of the line, the Germans continue to make furious but unavailing attempts to break the French line. In the east, along the Meuse, the Germans have, according to the French account, essayed in vain to repulse the French troops who debouched along the territory in which the Camp des Romaines now in the hands of the Germans, is situated, in an attempt to cut out that portion of the German army which is thrust towards St. Mihiel.

Generally speaking, the French claim to have made some detailed progress on various points of the front.

A Supreme Struggle.

Both sides are bringing up reinforce-

ments to the western front, where one is on. The Germans are not bringing new troops from the east, but are throwing every available man in Belgium into the firing line. They seem to have the railroads working well. altho they must have been seriously damaged during the battles of August and September. Troops are being transported over them and Dutch sources report that train after train of wounded is being taken back to

where the men have not the protection they have on the Aisne, the losses mus be very heavy, especially where endea-vors have been made to carry positions by assault.

LONDON, Oct. 20.—The Belgian army today made good its excellent beginning against the German advance toward Dunkirk and the other French channel ports. Heavy fighting along the River Yser resulted in complete defeat of the Germans. They have ceded from two to five miles of ground all along the northern bank of the river. Their losses are said to have been considerable.

Ypres was again the centre of desperate fighting, French and British troops gaining strategic positions of value and materially strengthening the movement against the German left flank in Bel-

Along the battle line from Arras to the coast heavy reinforce ments are concentrating on both sides and it seems probable that a decisive engagement may take place here between formidable forces.

It was reported from several sources today that an English son from that city supported by the guns of the fleet lying off the port. This information was passed by the censor, but without confirmation of any kind. However, Ostend is of but small importance in a military sense and it is believed that the foothold of the kaiser m is so precarious that the Belgian watering place is likely to

be occupied by the advancing allies at almost any time.

The last definite statement of the position of the Belgian forces places their advance at Roulers, thirteen miles northwest of Courtrai and but a short distance from Ostend. If this wedge should penetrate further, Ostend would be isolated from the remainder of the

NO RESULT SO FAR.

Out of the mass of conflicting messages stands the fact that the Germans in Belgium are attempting two major operations, first, to cut thru the Belgians between Nieuport and Dixmunde, and second, to throw back the Franco-British army around Arras. All of their skill and the full weight of their powerful army has been directed to this

end, but without any result whatsoever. With rain falling in sheets the flat coastlands along the channel are extremely unfavorable for the movement of troops and almost impassable where heavy artillery is concerned. This has prevented the Germans bringing their big guns into play, altho reliable reports tell of a great movement of reinforcements of men and cannon from Amsterdam and other points. Indications of sanguinary character of the fighting in Belgium are contained in a despatch from the Flushing correspondent of The Evening News, who wired on Monday as

"On Sunday seventeen trains of forty cars each brought German wounded back to Bruges.

"The northern columns of the Germans have been increased with reinforcements brought at night by train from Bruges, where there are now but few Germans left."

HEAVY FIGHTING AT LILLE The statement made yesterday that Lille had been retaken by the allies proves premature. The town is invested on three sides and advantage in the fight for its possession rests plainly with the Germans. They have erected strong fortifications and have some of their best regiments in the trenches around the town. The kaiser is said to place much importance on holding the city and there can be no question that the conflict at this point will be stubborn and long

In distinction to the success of the Germans at Lille is the progress made by their foes to the west of that point. Here the allied troops have driven the Germans backward and Lille now stands well forward in territory held by French and British forces.

This is also true of St. Mihiel, held by the crown prince, now

the most southerly position of the Germans. It is regarded as one of the most surprising developments of the war that Frederick William has been able to maintain himself at St. Mihiel, with the French winning on both sides of the town. Altho his stubborn resistance reveals a resolute spirit that commands the highest respect, it is agreed by all military authorities that he is none the less in a very serious predicament and is risking capture or destruction of a good them silenced the German battery. part of his army by holding on to a position that is almost hopeless. The day was marked by French concentration on the right bank of the Meuse, further endangering the haughty German heir. Despite a desperate counter attack delivered by his forces in the vicinity of Camp des Romains, the French gained considerable ground around that town. Etain continues to be the objective of a fierce French attack and its fall would mean a complete severance of the crown prince's communications with Metz.

On the centre the situation remains in statu quo, both the French and German lines having been weakened until artillery play is practically the only activity. KAISER IS ALARMED.

North of Bagny, on the road to Metz, the Germans today combated the French most savagely. The hand of the kaiser is seen in the increased resistance in this vicinity. He has evidently taken alarm at the close approach of the republic's army to that strong fortress. Yesterday it was asserted that German trenches, only nine miles from Metz, had been assaulted.

A casualty list of non-commissioned officers under date of Sept. 17, just issued, reports 95 wounded and 900 missing, of whom over 600 belonged to the Royal Munster Fusiliers. Another casualty list dated Oct. 16 and Oct. 18 reports five officers killed and 12 wounded.

Four hundred German prisoners were taken. One of the places where the French had been most harassed is near the elbow of the western line. The important position there had been taken and retaken frequently during the last three weeks. Every time the Germans had been obliged to abandon the position they returned in greater force and pushed back the French by weight of numbers.

Caught Germans by Mine.

The French took the position for the twelfth time and held it for tenhours. Then came a shock of the human battering ram and the French gradually gave way. The Germans began fortifying the place, but while they were engaged in this task the earth heaved and a deafening explosion occurred. The ten hours the French had held the point had been sufficient to mine every rod of the ground. It is estimated that three

French had held the point had been sufficient to mine every rod of the ground. It is estimated that three German battalions were annihilated. The strength of the German positions north of Reye which facilitated their movements toward Lille, is explained by the fact that they were occupying an unfinished canal extending as far as Roisel. The Germans found in the deep, broad cutting magnificent entrenchments in which they had only to instal batteries of artillery.

Spence Motions Beaten. Two motions to have Alderman F. S. Spence replace present members of the harbor board were defeated by council last evening. Alderman Walton first moved that the ex-represen tative of the Dominion Government or the Toronto Harbor Board replace Con-

Alderman McBride thought it most egrettable that a motion of this charcter should have to be discussed before the men interested, but stated that there should be no change in the personall of the board so long as no omplairs had been made as to the existent members.

Controller Simpson declared that the dropping of Alderman Spence from the board was simply the workings of a patronage system; the Liberal government when in power appointed him and the Conservative government took up the reins of power and dropped him. If he were the alderman he would take his medi-

cine without squealing.

The motion to place Controller Church and Home Smith on the board was opposed by all but the Mayor and Aldermen Wanless and Smith. Controller Church opened opposition to the erection of stores by the Housing Company by declaring it would give unfair opposition to storekeepers.

King Edward Hotel last evening, the minister said:

"We learned some time ago that the imperial government was purchasing supplies in the United States, and we at once notified the war office that all, or nearly all, these supplies could be purchased to advantage in Canada. The war office at once saw the propriety of throwing all the business they could our way, and almost immediately some very large orders were received. For example, they ordered \$00,000 pairs of blankets, but we were only able to furnish 500,000. Then, thru the war office, we received orders for harness, saddles and saddlery hardware from the allies, amounting to ware from the allies, amounting to at least \$4,000,000. The war office also at least \$4,000,000. The war office also sent over F. W. Stopart, well-known in Canada, who was for years in business in Winnipeg. He brought with aim orders for supplies amounting to several million doilars, and is receiving additional commissions daily. He has ordered a million shirts, a million sweeters and many other supplies.

I. C. R. EMPLOYES GIVE LIBER-

Tying up Canadian Banking Reform With the French Revolution!

We hope our readers will pardon our dipping into ancient history, but it seems necessary to expose a cunning effort being made by the banks, thru their newspapers, to hoodwink the Canadian people and prevent their improving or even examining into their present inadequate and antiquated system of banking and currency. Hardly a day passes but some journalistic friend or poor relation of the chartered banks publishes a long editorial review of what purports to be a great work recently produced by A. D. White on "Flat Money in France." Mr. White is heralded as a great American statesman, president of Cornell University, who is giving to the world some valuable lessons in finance. As a matter of fact, Mr. White never posed as an authority on finance, but he was a faithful follower of the Republican party and a pretty steady office holder while that party was in power. His "Flat Money in France" was a political pamphlet issued a generation or more ago and iong since consigned to oblivion. But now it is exhumed, published in Canada and circulated as a campaign document against a national currency, a national bank of rediscount, and in favor of the banks retaining their present monopoly. The Montreal Gazette extols it.

The book deals with the irredeemable paper money issued in France during the revolution. France was bankrupt, all the civilized world was in arms against her, and her government at that time is known in history as "The Reign of Terror." Having neither money nor credit, the revolutionary junta printed forty billions of francs in paper currency which proved to be worthless. The book also contains some reference to John Law, a Scottish adventurer, who started a bank in Paris in the early part of the 18th century. He engineered the "Mississippi Bubble" specusome reference to John Law, a Scottish adventurer, who started a bank in Paris in the early part of the 18th century. He engineered the "Mississippi Bubble" speculation, which ruined a great many people, altho the government of that day came to his assistance by making his bank virtually a government bank of issue. Law was only in Paris four years, all told, and the "Mississippi Bubble" differed not a great deal from the English "South Sea Bubble" and other speculative manias which at one time or another have impoverished the people. All Mr. White set out to prove was that a national currency should be issued in good faith and with business caution. That is, the government should limit its volume and keep on hand sufficient gold for ordinary purposes of redemption. hand sufficient gold for ordinary purposes of redempti

Now we have no quarrel with all this. We hold no brief for the memory of John Law, and we certainly have never advocated "flat money." Yet The Montreal Financial Times falls into a frenzy of rapture over the White pamphlet and believes that it has disposed of all persons bold enough to suggest that a bank monopoly of the country's currency is not the last word in modern finance. The Financial Times brackets W. F. Maclean with Robespierre and Danton, and by implication at least, the good people of Canada are asked to believe that an issue of national currency would immediately be followed by convulsions similar to those which rocked France in the days of her great revolution. But we have not seen any guillotines erected in London since Lloyd George began to issue a national currency, nor do the people of the United States feel any apprehension from having two or three billion dollars of paper money in circulation. That France, swept by a revolution and threatened with invasion from every corner, was unable to turn waste paper into forty billions of money, does not prove that a rich country like Canada could not maintain at issue of five hundred million dollars of national currency based upon the wealth and credit of the country and supported by a gold reserve adequate for all ordinary purposes of redemption.

The effort, of course, is to mislead, to make the people believe that Mr. Maclean favors an unlimited issue of irredeemable currency. The blood-curdling details of the French Revolution are thrown in for good measure. The Montreal Gazette, as in duty bound, has a column and a half editorial iaudation of Mr. White's brochure which has been so suddenly and mysteriously exhumed for the edification of the Canadian people. It regards the republication of this work in Canada at this time as opportune because:

Canadian people. It regards the republication of this work in Canada at this time as opportune because:

In the United States there is some call for issues of government circulating notes, based on stocks of raw cotton deposited in warehouse, and in Canada voices have been raised in favor of a national note currency, to replace permanently that which the banks now have authority to put out. But The Gazette would have us believe, without saying so, that a national bank of rediscount is doomed to failure because two hundred years ago a brilliant but penniless adventurer, in conjunction with the dissolute Prince Regent of France, managed to wreck a bank of this character and impoverish a great number of people, thru wildcat speculations based upon the fabulous wealth of the then practically unexplored and unknown valley of the Mississippi. The Gazette, however, has nothing to say about the Bank of France, the Bank of Germany, and, for that matter, the Bank of England, which altho not strictly speaking a government bank, is a great national bank of issue and discount. It does not even condemn the Federal Reserve Act being put into operation in the United States, altho it is based entirely upon the idea of government banks of rediscount aided by an issue of national currency.

Would it not be better for the banks and their newspapers to defend their position honestly? Can they not find some man in Canada who understands the financial question and is prepared to discuss it? Calling everybody who favors banking and currency reform a socialist or a Robespierre will not carry them very far. Denouncing John Law as a reckless speculator and inveighing against an unlimited issue of irredeemable paper currency, does not arrive at the point which just now is engrossing the attention of a great many people in this country. They Prominent Red Cross Worker

are quite free to say what they please about the 'Mississippi Bubble,' or the flat money of the French Revolution, but why not defend their claim that issuing money is a bank monopoly instead of a sovereign power of the state? Why not demonstrate, if it can be demonstrated, that scarce money and tight credit are desirable?

Canadian Press Despatch.

LONDON, Oct. 20.—Millicent, Duchess of Sutherland, who recently went to the war zone as head of the Red Cross Hospital, and Major Percy Desmond Fitzgerald of the 11th Hussars, were quietly married last week at Roehampton. The duchess has returned to her Red, Cross work in France.

The Duchess of Sutherland is the fourth daughter of the Earl of Rosslyn. She was married in 1884 to the Duke of Sutherland, who died in 1912. She is deeply interested in social operations.

The Edmonton Capital is not worrying its head about John Law or Robespierre, but it is concerned with the fact that the Canadian banking system has utterly broken down so far as stimulating production is concerned. It quotes The Financial characteristic for a saying that the banks have four hundred million dollars tied up in Wall street. Thus it would appear that about one hundred million dollars tied up in Wall street. Thus it would appear that about one-haif the banking power of the country was dissipated in carrying stock speculations, with the result that there is no money to help the producers to expand their business. The Capital evidently thinks that the government bank of rediscount is urgently needed. After reviewing the stock market situation and the way in which Canadian banking capital has been entangled to the deeply interested in social organized, cannot possibly extend to the western farmer the accommodation that he needs if he is to go in for mixed farming and raise poultry, cattle and horses, and we read: and we read:

Manifestly, what is wanted is a new deal. Something in the nature of a rediscounting system under federal auspices, by which prime farmers' paper could be taken to a federal reserve board and hypothecated against a rediscount of anywhere from 75 to 90 per cent., might achieve the desired result provided it were undertaken upon a sufficiently comprehensive scale. Such a system, however, would require to be safeguarded—thru the intermediary of some interest sufficiently closely in touch with the farmers of each locality to be intimately acquainted with the moral risk of each. Otherwise it would inevitably become loaded up with the bad paper of slovenly and unsuccessful farmers. Furthermore, such a system would require the shifting of the franchise to issue notes from the banks back to the government. Otherwise the chartered banks would retire the federal notes as rapidly as they were given circulation thru the discounting house in order to substitute their own. just as they are now retiring gold from circulation and shipping United States

The effect of such an action upon the part of the banks would be that the government would very quickly be carrying all the capital, instead of the public carrying several millions of it in the form of federal notes in circulation in the ordinary process of business.

With such an arrangement, the chartered banks could go right ahead doing their regular business in the same way they are today, except for the circumstance that they would be without the franchise to issue notes. Cer-

tainly the government would be invading no territory of theirs when it undertook to arrange for accommodation to the agricultural business.

Such an arrangement would, however, invade a franchise—the note-issuing franchise—which some very powerful interests in Canada regard very jealously, and, for this reason, and for the reason that most of our public men are friendly to, if not actually committed to, these interests, the legislation necessary to bring it about is not likely to be secured except as a concession to a most vigorous demand from the people of Western Canada.

The signs portend that this demand will surely come.

MOUNT DENNIS BUILDERS HAVE PLENTY OF WORK

Small Army of Men Busy With Kodak Company's Fine New Factory.

The demand for building lots for houses and stores in Mount Dennis continues brisk. Messrs. T. Goddard & Son report the sale this week of eighty feet of land on the Weston road, on a cash basis, and last week of 88 feet of inside property. Conditions in Mount Dennis, it is said, are not materially affected by the war, building, which showed some decrease on the outbreak of hostilities, maintaining now a normal level. Some 700 carpenters and concretors are employed in the erecand concretors are employed in the erection of the reinforced concrete walls and floors of the new Kodak factory on Eglinton avenue. These men are working night and day, and splendid progress is reported.

Church Held Up.

The Anglican Church of the Good Shepherd, the walls of which are now up to roof level, is standing still at the present time for want of a loan of \$2000, which sum would pay for the roof and complete all the work of the church. The church, so far as the building has advanced, together with the land on which it stands, is free from all encumbrances, and it is stated that the land alone could be easily sold for \$6500. The church is situated on the Weston road, Rev. Gore M. Barrow being pastor.

To Build New School.

The trustees of the Mount Dennis School Section, No. 28, of York Township, have been authorized by the ratepayers to erect a school on the east, or Silverthorne, side. Until such time as funds can be raised and a new school built, the trustees are renting two rooms in the Methodist Church, to care for the children of this rapidly-growing district.

ATTACKING THE DISHWASHING PROBLEM.

S I watched Lucy (aunt's household helper) clear away the breakfast things this morning it came to my mind that I was mighty glad I didn't have to wash those dishes. We'd had broiled mackerel which left the plates fishy and sticky and unpleathe plates fishy and sticky and unpleasant to handle. Aunt is such a lover of all housework that I wondered how she ever got herself to like dishwash-

The only thing left to do is to make this really monotonous task just as easy as possible. met a woman who enjoyed dishwashing. The only thing left to do is to make this really monotonous task just as easy as possible, and I believe that after trying 49 ways and means during the last seven years the plan we now use makes dishwashing less distasteful than any way I've heard of.

"First, we stack all the dishes on the tray, and wheel it into the kitchen at the right of the sink. Each plate is carefuly scraped with this little hardwood plate scrape. Then plates are placed in this special sink dishpan. You'll notice that it is obiong in shape so that it fits exactly, and on the bots) that it fits exactly, and on the bottom the title is a drain which permits the while sitting on the kitchen chair.

Even dishwashing seems to lose water to pass off so that we never have to lift the pan of water and dump it, genious ideas to use, it seems.

Sincere gratification was reflected from the cheery countenances of all the Samaritan "camp aignettes" at yesterday's luncheon, when Mr. Dun-bar announced that at the half-time mark 2681 members had been secured, well over half of the number aimed for. Nearly \$1000 had already been hanked and another thousand was banked and another thousand was ready for the same treatment.

New Phase of Hydro-Electric Development.

Agriculture and the intelligence of the farmers of the townships lying east of Toronto have been amplyvindicated by the fine vote on the hydro-electric radial railway bylaws. It is true that two little villages stayed probable that partisan feeling had omething to do with the result, and in the case of Newmarket everybody knows the real reason.

Newmarket has had a solid concrete platform built for years for the heavy traitorous guns that are used to play upon all public ownership policies which come that way. And Newmarket bears the traces of such lack of enterprise. Instead of being another Brantford or Galt the place remains simply Newmarket and will remain in

With the opportunity of having the finest and cheapest kind of competition in transport, the hydro radial line Beck has remarked, the most profitable part of the plan has been carried. We sympathize with men of intelligence like Mayor Allen and Reeve Hunter who gave a sensible lead to the Newmarket people, but they were fit of the unemployed; and if the peoevidently wedded to their idols. The distribution of the load always helps the reduction of prices. proposed revision of the Railway Act ter for the consumer.

The time will probably come, in the interests of the consumers, when the hours of factory labor may be changed in the eastern and western parts of the province, in order to shift the power load. Instead of having the whole heavy load between five and six, the hours could be changed so that half of it would fall between 4.30 and 5.30 and the other half between 5.30 and 6.30. This reduction of the peak load would result in a saving of thousands of dollars a year. It is merely by accident that the time meridian is fixed at Windsor instead of, say Hamilton. It would be inconvenient to change the actual time of the province, but factories and places of business might agree to change their time half an hour each way to the east and west of Hamilton and thus reduce the peak. But the reduction will take place, to a large extent, by the extension of business as well as by the artificial alteration of time tables.

The new phase of power exploitation which is involved in the construction of the hydro radials means a great increase in the consumption of power, not only in the district in

"Home Rule" in Drinking

The bewildered voter in Ohio this fall will be asked to vote upon two constitutional amendments, one providing for state-wide prohibition; the other taking away the power of the legislature to pass a prohibitory law, while permitting local option to the township or municipality, as the unit. If both amendments pass, and stranger things have happened, a curious situation will be created.

The liquor question can now be kept pretty well out of politics in Ohio, hecause the people may amend the laws, in the same way, provided these us. do not infringe upon the constitution

The history of the liquor legislation of the Buck Eye State is peculiar and interesting. For half a century they amendment brought about a great deal of untaxed and unlicensed drinking, and after sixty years the state restored the licensed system. Now the temperance people are urging statewide prohibition and the liquor men are pleading for "home rule," as they call it.

The indications are that for the present at least local option will be preferred to state-wide prohibition.

"What is the cause of the revival in popularity of Beer and Ale as table beverages?" asks the London "Pall Mall Gazette."

That there is a return of their ancient vogue in the restaurants of London is noted by Charles Pond, restaurant-owner. "Beer has been coming into fashion again for some time," he says, and the tendency is becoming more marked. I was dining in a West End restaurant last night and was surprised to notice how many men were drinking beer. People have found out, I suppose, that beer is one of the best and purest of foods, and realize its value as they have not before.

DEATHS.

The judge passed some strong remarks upon the frequency of auto accidents. He pointed out at the close of the sittings yesterday that three consecutive cases of motor accidents had come before the jury. In each case a young girl had been killed and yet no one had been punished, no one made responsible. HOW TO STOP STOMACH TORMENT

Seund Advice From A Well-Knewn Physician.

Men and women who suffer from what they call Dyspepsia, Indigestion or just plain "stomach-trouble" usually seek they call Dyspepsia, Indigestion or just plain "stomach-trouble" usually seek regular relief in the form of some pepsin pill or tablet, or other artificial digestant. This, experience teaches me, is a serious error. In nine cases out of ten, the distress is caused by the development of acids in the stomach—formed by the fermenting of the food. Instead of a digestant being required, something should be taken to disspive or neutralize this acidity, when normal digestion will follow as a matter of course. This acid matter is distinctly poisonous and unless it is dissolved, digestion merely carries the mass of fermenting food from the stomach to the intestines, where its poison is absorbed by the blood and carried all over the body.

over the body.

If all the great army of people who suffer after nearly every meal would make it a point to take a teaspoonful of Bisurated Magnesia in a quarter glass of water after each meal, there would be no formation of acidity and consequently no distress or discomfort. Sour, acid, gassy stomach, heartburn, beiching bloating, etc., would then be a thing of the past. "Bisurated Magnesia" is a physician's prescription. It is inexpensive and can be obtained at any drug store. It is prepared for just such trouble and the best proof of its efficiency is that it will stop the sharpest, biting stomach distress in five minutes from the time it enters the stomach, simply by dissolving the acids that have been formed these. over the body.

ree Mulock Cup games were decide sterday, and owing to late starts it s dark before the teams could declare Winner. Junior School and Junior Arts ool, 14 to 7. It was much closer than score would indicate, as Arts were ing hard in the last quarter, and

ted as if they might have tied it up. More than two-thirds of the points scored were the result of mistakes, School grabbed two loose balls in the third quarter and fell on them behind the line for tries. Arts' try in the last round was secured from a loose ball. Both back divisions made mistakes, but both teams are shy on practice and will improve. Arts' line held School from bucking over twice, but gave way several times at midfield. The tackling was fair on both aides, but Arts showed the best kicking half-time.

sides, but Arts showed the best kicking half-line.

Arts forced a rouge in the first quarter for the only score. School repeated in the second, and the half-time score was 1-all. In the third quarter School held Arts scoreless, forced a rouge, and grabbed two loose balls for tries, the score standing 12 to 1. A safety touch was the only score for School in the final period. A try and a rouge brought Arts points up to seven at the finish. Teams:

Junior School (14)—Flying wing, Mc-Donald; halves, Birdsall, Poole, McGaven; quarter. Scott; scrimmage, Shoebottom, Huestis, Leagate; insides, Burwash, Dale; middles, Barker, Garvey; outsides, Young, Mayberry.

margin."

"However, the defeat was a good thing for us," Izzy continued. "It will bring the players to a realization that they have to work to win and it will also result in an interesting argument for the championship. It is my opinion that the battle will now develop into a fight between Argos and Tigers, with a play-off most likely. Ottawa is very weak this year and we should win both games from the Senators, even the game in Ottawa. Montreal may be strong, but I hardly think they can be good enough to do any damage. They have a fast team, but they will have to be vastly improved upon past form to amount to much, and just how they can show that improvement with the same lot of players in the game as last year, remains to be seen. Tigers and Argos should win their remaining games and then, for a struggle at the end."

The Tigers will use the intermediate as the practice dummies this week, an several hard workouts against the second squad are planned by Coach Marriott.

Everything is quiet at Rosedale. The Argonauts are not boasting about their win in Hamilton, but are working har in preparation for their important gam in Montreal on Saturday.

Hamilton Rowing Club play their first home game on Saturday when they en-tertain the Ottawa St. Patricks. It will be played at the cricket ground.

Hamilton Times: Gerald Wagie has consented to act. The big line plunger of two years ago, who did wonderful work for the jungle kings and then went to the Toronto Argos and helped them to win the Interprovincial League, will be a member of the Tiger team from now, and the big fellow will likely be used in Saturday's game at Ottawa.

Montreal Gazette: Railbirds who witnessed the practice of the McGill Rugby squad on the campus yesterday were given a pleasant surprise when Otto Demuth made his initial appearance of the season. Demuth has been on the ailing list since his return to college with blood poisoning, but has fully recovered, and will now turn out with the McGill team to help them against Queens on Saturday. Demuth played in the scrimmage a year ago, but will this season likely be played at the position of middle wing.

MOTORCYCLE MEET The first and only motorcycle championship race meet of the season is to be held on Exhibition track next Saturday afternoon under the auspices of the Toronto Motorcycle Club, and with sanctions from the Canada Motorcyclists' Association and the Federation of American Motorcyclists. The feature will be a 50-mile thampionship grind, which is double the distance of any previous long race on the local speedway. Big prizes are being offered for this. There are no less than twelve entries already for each of the amateur contests, and it will be highly spectacular to see this brigade kick up the dust in their dashing charges down the stretch.

CLUB HANDICAP TOURNEY. The annual club handicap tourney will commence on Tuesday. Nov. 3. Entries must be made by Oct. 31 to the secretary, Mr. John Powell. 39 Yonge street, or to Mr. R. G. Hunter, the treasurer. Entrance fee, 31, payable in advance. Three prizes will be given, and the winner of the first prize will have his name engraved on the Soundary Shield.

The use of the bayonet as a weapon of attack and defence is a necessary part of the instruction of the soldier trained to fight on foot. The club has one of the best equipments in Canada—spring bayonets, masks, gloves, etc., approved by the British War Office regulations. The course covers about twenty lessons, Great importance is given to these lessons, as it is by means of them that the combative spirit is given, and enables one to see, step by step, the fighting application of each detail which they are taught.

is seen in the assault. At the conclusion of the lessons awards are given for proficiency. In the course, a few very practical hints are given for using the bayonet in action: 1. On nearing the enemy.

2. On getting to close quarters.

3. If opponent commences the attack before you actually deliver your attack.

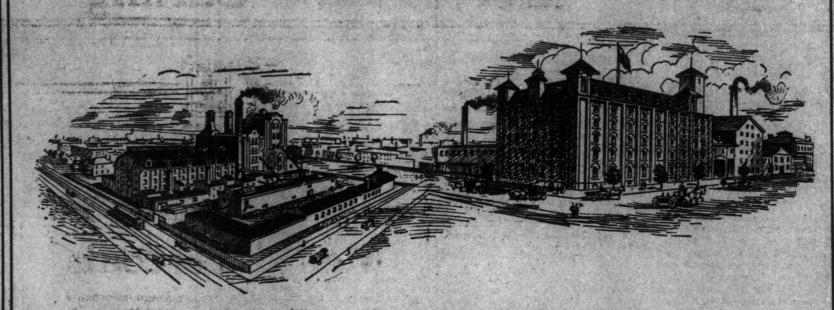

4. Closing with an adversary.

5. Confidence in actual contact.

FEDS TO BE TAKEN INTO THE FOLD

CINCINNATI, Ohio, Oct. 20.—Garry Herrmann, chairman of the National Baseball Commission, today confirmed reports of a peace pact between the Federals and organized baseball when he declared negotiations are on for the sale of the Chicago Cubs to Charles Weeghman, proprietor of the Chicago Federals. Herrmann said, so far as he knew, the contemplated deal was not near completion.

this large amount of gold at this time might prove inconvenient, and England was glad to respond to a proposal that the case be talked about and an effort made to find a way of meeting the difficulty.

"I feel sure that some way will be discovered here by your federal reserve board and the secretary of the treasury, and there is no doubt that eventually the balance of the trade will again be in your favor. In the months to come England will be buying American wheat and cotton. It probably will not cancel the sum owed in a few months, but it is bound to come in time. In the meantime arrangements may be made so that you will not be embarrassed, and yet England will be assured that her money will be forthcoming when wanted."

Sir George said that he believed the London stock exchange would reopen in a short time, and thought it probable that the New York exchange would be opened about the same time.

Few Buyers on Hand
for Produce.

Raspberries ripening in Ontario on the soth of October! White & Co. were again the proud consignees of another shipment of twenty-six boxes of this luscious fruit from Mrs. Helmer of Lorne Park, who had also sent in four previous shipments in the last six weeks. The berries were choice, many who saw them believing they were artificial, and Mrs. Helmer is to be congratulated, as it is the first time in the history of the market that raspberries have been sent in so late in the season, especially in such large quantities.

H. Peters had two cars of grane fault.

H. Peters had two cars of grape fruit H. Peters had two cars of grape fruit, consisting of 300 and 350 boxes each, selling at \$3 to \$3.50 per box.

Oranges are slightly dearer, advancing about 25c per box.

Jos. Bamford had another car of the Red Riding Hood brand of Valencias.

Belknap had a car of choice mixed grapes, selling at 16c and 17c per sixquart basket.

At a recent meeting of manufacturers the intention was expressed of taking a five per cent. loss during the winter months in order that factories might be kept running and work supplied to employes. This occurred in Toronto. The meeting took place not very long ago. This same feeling is in all probability being felt thruout all Canada.

It means that instead of closing down the shops and thereby putting men out of work the companies are willing to take a loss and keep their workmen busy at least part of the time.

It the feeton was at least part of the time.

If the factory owners are willing to do this, how much more willing

the buying public ought to be to see that as much work as possible is provided for their men.

A campaign such as is being waged just now was carried on in the City of Winnipeg a little more than a year ago. It was done for the purpose of building up Winnipeg. Instructive literature was scattered everywhere and the people of Winnipeg were made acquainted with the goods that are made there. Amongst other things a street car float was constructed. It paraded the principal streets and for a week a special effort was made in the way of advancing made-in-Winnipeg articles.

The idea which prompted this campaign was a purely business one. It was a matter of educating the citizens to the point where they would insist on "home-made" goods for the sake of building up their own city. It was thought worth while and it was.

Now then, the same idea is being pushed, not for the purpose of

Now then, the same idea is being pushed, not for the purpose Now then, the same idea is being pushed, not for the purpose of building up any one city, not for the purpose of concentrating activity on any one point, not for greater profits, but because every man must be kept in employment thruout Canada this winter—and every winter for that matter. If the scheme was good enough for Winnipeg it is good enough for Canada on a larger scale. "A full dinner pail means a prosperous city," has often been heard. Carry the thought further, wider and broader and the same argument holds good in regard to a country.

That is the sum and substance of the whole thing. It is not a campion to increase profits. The first statement of this article proves that

paign to increase profits. The first statement of this article proves that. It is not because any class of business men want to take advantage of the present situation to further their own interests. It is because of the realization that unless you and your household insist on buying, or at least giving preference to goods that are "made-in-Canada," the man who under other circumstances would find employment in making those goods CAN-NOT BE KEPT AT WORK. If he can't be kept at work, he must be kept anyway, and the only other thing he can do is to ask for assistance thru ome organization to which you may be called upon to contribute.

What would you rather do? Wouldn't it be better to form another link in the chain of "home-buyers," Certainly it would. Then buy "made-

NEW YORK, Oct. 20.—Interest in financial affairs today centred mainly around Washington, where further conferences were held between representatives of the British finance minister and officials of the United States treasury, and in which some of the prominent banking interests of the country were participants. The outcome of these meetings, which are to be continued in this city, is expected to have a very direct bearing, not only upon existing foreign exchange conditions, but also upon the broad question of the reopening of the London and New York stock exchanges.

Washington was also the seat of continued negotiations relative to the organization of the proposed cotton pool, in which a hitch was reported. The chief obstacle in the way of this plan is said to be the disinclination of the federal reserve board to assume full responsibility for the project on the ground that other and more pressing duties are now before it for consideration.

Business was very active because of tomorrow's fast steamer. The decline was generally associated with the recent heavy foreign demand for our commodities, and gave especial point to advices from Chicago to the effect that yesterday's grain exports constituted a record-breaker.

The market was rather slow yesterday, The market was rather slow yesterday, not enough citizens attending to make business brisk. Why is it a city the size of this should only have one good market day per week? There surely must be mismanagement somewhere.

Of course, the day was dreary and bleak, which may account in a small measure for the poor attendance, but the market was far from inviting, when one did muster up courage and go. The promarket was far from inviting, when one did muster up courage and go. The produce was all that one could desire, but was certainly discounted materially by its dirty background, as the place was as dirty as usual, and did not smell at all sweet.
