Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

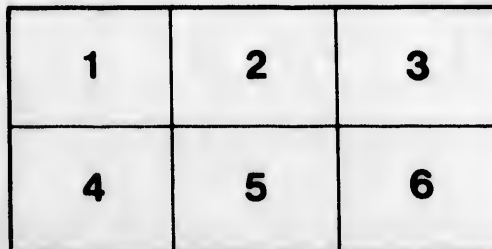

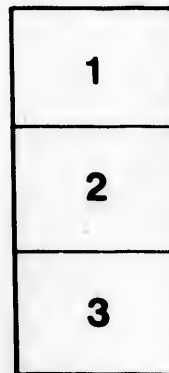

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BANK OF BRITISH COLUMBIA

(INCORPORATED BY ROYAL CHARTER.)

CAPITAL PAID UP. - \$600,000 - \$3,000,000
RESERVE FUND. - - \$200,000 - \$1,000,000

HEAD OFFICE: 50 LOMBARD STREET, LONDON, ENGLAND.

Court of Directors.—Robert Gillespie, Esq., Chairman; Alex. Colquhoun, Esq., Vice-Chairman; James Anderson, Esq., Genl. Mgr.; R. Hanson, Esq., Mr. Charles Fraser, Bart., Thos. Gillespie, Esq.

General Manager.—H. Hughes, Esq. Bankers: Messrs. Smith, Payne & Smith.

BRANCHES.

San Francisco, California; Portland, Oregon; Victoria, New Westminster, Vancouver, Kelowna and Kamloops, British Columbia; Seattle and Tacoma, Wash.

In England, National Provincial Bank of England; North and South Wales Bank, Liverpool; Bank of Liverpool. In Scotland, British Linn Company Bank. In Ireland, Bank of Ireland. In Canada, Bank of Montreal. In New York, Messrs. W. Watson and A. Lang. In South America, Buenos Aires Bank of Mexico and South America. In India, China and Australia, Chartered Bank of India, Australia and China. Hong Kong and Shanghai, Banking Corporation, Hong Kong.

The Bank in London grants Letters of Credit and Drafts on its Branches at San Francisco, in California; Portland, in Oregon; and Victoria in British Columbia; and similar credits are granted by the British Linn Company, the North and South Wales Bank in Liverpool, and the Bank of Liverpool.

The Bank also purchases or forwards for collection Drafts on the above places. At the Branches Advances and Discounts are negotiated at current rates. Drafts on all parts of the world are issued. Bullion and Gold Dust purchased, and a general Banking business transacted.

Victoria, British Columbia, 1888.

W. C. WARD, Manager.

ST. LOUIS COLLEGE,

NEW WESTMINSTER, B. C.

St. Louis College is conducted by the B. B. Fathers Oblates of Mary Immaculate, and is under the patronage of the Right Rev. Bishop Paul Durien, O. M. I., Vicar Apostolic of British Columbia.

The general purpose of the College is to impart a Commercial as well as a Liberal Education to the young men received in the Institution. Hence the various branches of a Commercial course are taught thoroughly; while great attention is paid to the study of classics, ancient and modern.

TERMS—Boarders—Board and Tuition, per session of five months, \$75.00; washing and mending, \$10.00; bed and bedding, \$3.00.

Day Scholars—Senior Students, \$3.00 per month; Junior Students, \$2.00 per month.

PREFACE.

In this issue a much finer class of work is one feature, thinner and better paper being used.

There are one hundred pages more than there were in the 1889 Directory; while the price remains the same.

The names of places are arranged alphabetically as far as possible.

This Publication will be sold largely in the East; it is one means of advertising the country, that the business men of the province will appreciate.

The book has as usual caused a large expenditure of money within this province, and given employment to a number of persons.

The Cities generally show a solid growth. The population in each is increasing rapidly. New Westminster has exceeded even the expectations of her energetic citizens, and to-day is one of the most solid cities on the coast.

Vancouver is forging ahead and fulfills her position as the terminus of the only all rail route, under one management, in operation on the continent from the Atlantic to the Pacific, and is destined to become one of the largest cities in the Dominion.

As an illustration how Nanaimo has prospered, real estate of all kinds has more than doubled in value during the last two years; and new fields for industry are constantly opening up.

Victoria the capital is prospering and building up in every way that justly entitles her to the name "Queen City of the Dominion on the Pacific."

There are homes for thousands within the province; and the opportunity for the establishment of paying industries are most excellent.

TIME TABLE No. 15,

Takes Effect Jan. 1, 1991

BURRARD INLET ROUTE.

VICTORIA TO VANCOUVER AND MOODYVILLE, daily except Monday, at 3 o'clock.
VANCOUVER TO VICTORIA, daily except Monday, at 14.30 o'clock, or on the arrival of
the C. P. Railway Train.

PUGET SOUND ROUTE.

S. S. PREMIER will leave as follows:—Vancouver, 14 o'clock, Mondays and Thursdays;
Returning, leaves Seattle Wednesdays and Saturdays, at 6 o'clock, arriving in Vancouver
about 18 o'clock.

NEW WESTMINSTER ROUTE.

Leaves VICTORIA for New Westminster, Ladner's Landing and Lulu Island, Sundays at 23
o'clock; Wednesdays and Fridays at 7 o'clock. (Sunday's steamer to New Westminster
connects with C. P. R. train No. 2, going East Monday.)
For Plumper Pass—Wednesdays and Fridays, at 7 o'clock.
For Moresby Island—Fridays, at 7 o'clock.
Leave NEW WESTMINSTER for Victoria—Mondays at 14.30 o'clock; Thursdays and
Saturdays at 7 o'clock.
For Plumper Pass—Saturdays at 7 o'clock.

FRASER RIVER ROUTE.

Steamers leave New Westminster for Chilliwack and Way Landings every Tuesday, Thursday
and Saturday, at 7 o'clock.

BARCLAY SOUND ROUTE.

Steamer MAUDE leaves Victoria for Alberni and Sound Ports when sufficient inducements offer.

NORTHERN ROUTE.

Steamships of this Company leave for Fort Simpson and intermediate ports on the FIRST and
FIFTEENTH of each Month. When sufficient inducements offer will extend trips to
West Coast points and Queen Charlotte Islands.

The Company reserves the right of changing this Time Table
without notification.

STEAMERS LEAVE BY STANDARD TIME.

ALBERNI

Including Sayward-Alberni and Beaver Creek.

The traveller or tourist leaving Victoria by steamer for the West Coast of Vancouver Island, first passes by the Race Rock Lighthouse, and then leaving Sooke Harbor and Port St. Juan on his right hand, at a distance of some 90 miles from the capital, Cape Beale Lighthouse is reached, which is situated immediately at the entrance of the well known waters of Barclay Sound, the headquarters of the sealing fleet during the first part of the fur sealing season. After having entered either of the navigable channels, the steamer ploughs its way among the almost innumerable Islands, both small and great, which dot that wonderful inland sea, until it narrows into what is called the Alberni Canal, and at a distance of some 40 miles from the entrance at Cape Beale the head of the Canal is reached, when all at once a magnificent panoramic view of the fertile and extensive Alberni Valley appears to view, surrounded by mountains covered with a dense growth of valuable firs and cedars. Instead of everlasting rocks, fir and hemlock timber, and barren soil, and instead of the monotonous sameness in the landscape seen along the coast and up the canal, the traveller, on approaching the mouth of the Somass River (where the Alberni townsite is situated), is at once struck with the luxuriant vegetation which meets his eye in every direction, instead of scrubby firs and hemlocks and trapean rocks seen everywhere along the coast. Here is to be found, in abundance, the beautiful maple, the dogwood, crab apple and alder, and all kinds of berry bushes are seen growing and thriving everywhere; rich and tender grass, studded with lovely flowers, meet the eye everywhere, and in the rich soil all along the river, in the shade of such a forest, many kinds of tender and beautiful ferns are found in the glory of their element. In this valley good land is to be found in unlimited quantities; fine fruit and vegetable gardens where all kinds of fruit grow to perfection, and where can be seen, in its season, the peach and grape, the water and musk melon, tomatoe and Indian corn growing to satisfaction. With the exception of 3 or 4 old pioneer settlers (who have now passed beyond the scene of action), the present settlement may be said to have started in with July, 1884, when the Steamer Sardonyx landed in Alberni a party of excursionists among whom were the late Hon. Wm. Smith, C. C. L. & W.; Mr. Fell, ex-Mayor; Mr. Trotter Johnson, Hudson Young, and some 20 others. Among the passengers was John C. Mollet and family, who were the first settlers in the place, excepting those before mentioned. From that time the settlement commenced to go ahead and increase, until within two years there were some 100 claims taken up for agricultural purposes.

Outside the Indians which are numerous, and the Chinese, of which there are but 4 or 5, the population numbers 178. There are 4 post offices, viz: Sayward, Alberni and Beaver Creek, in the settlement, and one at Clayquot on the coast. There are two schools under one board of trustees, five mission stations, one for the Presbyterians and one for the Roman Catholics at the settlement, and three Roman

The Canadian Pacific

Passes through the MOST MAGNIFICENT
CANYONS in the World.

Catholic along the coast, chiefly for the benefit of the Indian Population. There are two good stores on the townsite at Alberni, besides five others along the west coast. Also a boarding house and sawmill at Alberni, and one mail weekly overland from Nanaimo, which is some 54 miles distance; there is also a pump factory.

At the last session of the local legislature the constitution act was amended, by which Alberni was formed into a separate electoral district and therefore entitled to one member in the Local House. There are 22,507 acres of land taken up in the settlement, which is assessed for the amount of \$61,712. There are still large areas of good vacant land in the valley, which only requires to be opened up by good roads to make them valuable and accessible to the Landing. These lands can be purchased at \$3 per acre, payable in 4 payments, with interest at 6 per cent. Roads and bridges are being constructed all over the settlement and are being improved from year to year. The rivers and lakes are teeming with the various species of salmon and trout in their season, and game of all kinds is very abundant.

The large area of good land in a compact body, the resources of the place in timber and fish, in pasture and minerals, the mild climate and lovely scenery, the splendid water power and privileges and abundant supply of the purest water all over the valley, and, last but not least, the geographical position of Alberni; all these facts, when taken into consideration, only tend to one solution, viz., that Alberni is destined at no distant day to become a place of importance and wealth. All it requires, to take its proper position, is development of its resources and railroad communication with other places.

A steamboat (The Boscowitz) is subsidized by the government to make 7 or 8 trips a year to Alberni, and horses and vehicle can be had from Mr. Armstrong (mail carrier) from Nanaimo, overland or vice versa.

Advertisement for Further Particulars.

ALERT BAY.

This place is on Cormorant Island, about 240 miles from Victoria, and is in New Westminster electoral district.

It is accessible by all steamers leaving Victoria, which call here going and coming. The C. P. N. Co. run a boat twice a month in the summer time, and the steamer Boscowitz also calls twice a month, so, practically, there is weekly communication. Here Messrs. Spencer & Earle have a salmon cannery and get their fish from the Nimkeesh river, just opposite, on Vancouver Island. They have a store in connection with the cannery, and the post office is at their store.

The Church Missionary society have a resident missionary here, the Rev. A. J. Hall, who, with his wife, has labored zealously among the Kwagiult Indians the last 14 years. He has also succeeded in starting a steam sawmill in connection with the mission, which supplies all kinds of lumber to the neighborhood. There is also a store with the sawmill.

Cormorant Island is only a small island, containing about 1,100 acres, heavily timbered with hemlock, spruce and a sprinkling of red fir; and the land for the most part is almost worthless. Here the Nimkeesh Indians have their village, and there is a school for Indians on the reserve. The Indian agent for the district has his residence here also.

The land in the vicinity is all heavily timbered with hemlock, spruce and cedar, and here and there are portions of fairly good land.

Settlers are few and far between. Mr. W. May lives at Klicksiwy, 11 miles above Alert Bay, and Mr. Robert Hunt occupies the old Hudson Bay trading post at Fort Rupert, in Beaver Harbor, sold by the company to Mr. Hunt some few years ago, which is about 21 miles from Alert Bay; and about 12 miles again above Fort Rupert. Mr. E. Frigon has a small trading store at Port Alexander. Ten miles above this the steamers leave the Vancouver shore and cross Queen Charlotte's Sound on their northward journey.

Coal underlies all the country between Alert Bay and Fort Rupert, and is found right across Vancouver's Island to Rupert Arm on the West coast. At Malcolm Island, a little to the north of Cormorant Island, the Christian Temperance Commonwealth society have established themselves, the government of British Columbia having granted them a tract of land on certain conditions. Mr. Joseph Spencer is the head of it at present and may be addressed to Malcolm Island. About 4 miles above Alert Bay is Haddington Island, where Messrs. Huson & Rudge have recently found a very valuable kind of sandstone, and can be seen at Mr. Rudge's marble works in Victoria. It is said to withstand fire equally as well as fire-brick. About 5 miles below Alert Bay is Beaver Cove, and a few miles up a small river running into this an excellent

quality of white marble is found. Salmon, in more or less quantities, are found in all the streams that run into the sea, during the months of June, July, August and September. Halibut are also taken in large quantities by the Indians, chiefly at the north side of Hope Island and the islands across Queen Charlotte's Sound towards Kingcomb Inlet. Knight Inlet, which lies to the eastward of Alert Bay, and which is on the mainland of British Columbia, is about 80 miles in length and well repays the trouble of a visit there, the scenery being magnificent nearly all the way up.

CEDAR HILL—See Victoria District.

CHEMAINUS.

Including Oyster Bay, Thetis and Kuper Islands.

In the electoral district of Cowichan, is situated on Horse Shoe Bay, which affords excellent anchorage and protection for the ships which load lumber there. The mills have been purchased by the Victoria Lumber and Manufacturing company. A new

sawmill has been built and will soon be in good running order. It is 72x384 feet will turn out 200,000 feet per day and give employment to between 150 and 200 men. Most of the lumber will be exported. The company has a lumber yard in Victoria. About quarter of a mile from the mill is Lewisville. The Victoria Lumber and Manufacturing company purchased a body of land in the immediate vicinity of the mill and will not allow liquor to be sold on their ground. Lewisville has two hotels, one kept by S. G. Lewis, the other by S. Gray. The railway station is close to Lewisville and the mill.

COMOX.

The district of Comox is the largest and most important farming district on Vancouver Island. It is situated on the east coast of the island, about 57 miles northwest from Nanaimo. Its growth has been steady and gradual, but, owing to its being the terminus of the steamboat line and being somewhat isolated, it has not increased as it would have done had it been more centrally situated. It consists of a fertile valley about 13 miles long and about 3 miles wide, of natural prairie with a large amount of good arable land on all sides of it. According to Prof. Dawson's survey, it is a regular coal bed, but so far but little has been done towards developing the untold wealth which lies beneath it. The Union Colliery company have opened large coal mines near

Comox Lake, about 6 or 7 miles from the centre of the valley. A good wagon road has been constructed to the mines, and though these mines have only been opened about two years, they have advanced the interests of Comox considerably, as it affords a good cash market for all the produce. The Vancouver Coal company have bonded 2,000 acres of land in the heart of the valley for two years and are prospecting at present, but with what result we are unable to say at the time of our going to press. Should they be successful (as there is little doubt that they will), Comox will spring into a place of great importance. With two mines in operation, with its immense forests of timber close at hand, its large scope of good land, who can foretell what it may amount to in the next few years?

Besides the open prairie land already referred to, there is an immense body of good land, which is comparatively heavily timbered, surrounding it. This belt is about fifty miles in length, and from 6 to 12 in width. The cultivated land yields a good crop. The valley is well watered, having two rivers and numbers of streams. The roads are excellent throughout the district, which, for beauty and appearance, reminds one of an English park. From the steambot landing can be seen three glaciers, which so far have never been ascended, though they are not 20 miles away. The harbor, though small, is very good and is entirely land locked. There are three hotels, five stores, blacksmith shops, shoemaker's shops, sawmills, etc., and room for many more.

Comox is veritably a sportsman's paradise. The fishing is excellent, while all kinds of game abounds. Deer, elk, grouse, waterfowl, can be found at any time, while close at hand there are plenty of wolves, bear and panthers.

There are three schools, three churches and three postoffices, though at present there is only communication once a week with Nanaimo. The settlers in Comox are anxiously awaiting railway development. Any railway running to the north end of the island must run through the heart of the settlement. Mr. Joseph McPhee has laid out a townsite on the bank of the Courtenay river which he has decided to call Courtenay.

The three post offices are Comox, Sandwich and Grantham.

For C read Comox; for G, Grantham, and S, Sandwich.

CORFIELD.

Corfield, a postoffice district in the electoral district of Cowichan, comprises that portion of Cowichan commonly known as the flats. It is situated at the head of Cowichan Bay, and is within 2 miles of Cowichan wharf, MacPherson's or Koksilah stations on the E. & N. railroad. It is the largest tract of fertile land in Cowichan District, and is enormously productive. The largest part of this belt is an Indian reservation, but the Indians there are much more civilized than in most of the districts in British Columbia, and do considerable farming. Two large rivers, the Cowichan and Koksilah, flow through this tract into Cowichan Bay and afford excellent fishing, and in winter wild waterfowl are very numerous. Mr. Geo. T Corfield, the postmaster, has a large and well-fitted general store and is engaged extensively in raising small fruits, which do wonderfully well in that section.

COWICHAN.

The Electoral District of Cowichan is the most important agricultural district on Vancouver Island. It has eleven postoffices, viz.: Shawnigan (Cobble Hill), MacPherson's, South Cowichan, Corfield, Koksilah, Duncan's, Quamichan, Somenos, Shopland, Cowichan Lake, and Chemainus. The E. & N. railroad runs through the district, and has done a great deal towards its advancement. It is well watered, having three small rivers, the Chemainus, Cowichan and Koksilah, besides numerous lakes

and streams. Its sub-districts are Cowichan, Comiaken, Chemainus, Somenos, Silt-lam and Quamichan. There are large Indian reservations in the district, and most of the Indians are highly civilized. Each one has his own plot of ground, which he tills himself. They own some fine horses and cattle. There are good wagon roads through the whole district, while its geographical position gives it a great many advantages. The principal industries are agriculture and lumbering, although there are several quarries in the district. Game and fish abound in all sections of the country. In the back districts, such as Cowichan Lake, elk are still to be found, and bear are numerous.

COWICHAN (South).

South Cowichan, or the wharf, as it is commonly called, is situated on Cowichan Bay. Before the construction of the E. & N. railroad, this was the principal shipping point for the whole Cowichan District, and good roads run from here to all parts of the district. Now, however, it has decreased in importance, even the steamers only calling occasionally.

COWICHAN LAKE.

Cowichan Lake settlement is a new settlement. It is reached by stage from Duncan's station, a distance of 24 miles. A number of farms have been taken up but are not worked much as yet. Mr. Angus Fraser has a large logging camp on the lake and owns the hotel there. He supplies logs to McIntyre & Hewlitte, the owners of the Cowichan mills.

DUNCAN'S.

This village was formerly part of the Quamichan section of Cowichan district, but is now separate and distinct. It is a station on the E. & N. railroad, almost midway between Victoria and Nanaimo. A townsite has been laid out, and a number of lots sold and houses built thereon. Lots sell at \$100 each. It is a great resort for sportsmen, being within easy reach of town. The Cowichan river is about a quarter of a

SOLID TRAINS ACROSS THE CONTINENT

via the CANADIAN PACIFIC RAILWAY.

mile from the railroad station, and during most of the season is literally teeming with trout. There are two hotels, two stores, two blacksmith shops, harness maker, shoe shop, lumber mill, sash, door and pump factory, etc.

There is every indication of Duncan's being quite a large town during the course of a few years, as it is the centre of the agricultural district of Cowichan. The Cowichan Agricultural Society have their hall and show grounds here, and hold a show there annually.

ESQUIMALT.

Including Colwood, Langford Plains, Goldstream, Happy Valley and Parson's Bridge.

Esquimalt, in the Electoral District of Esquimalt, is situated on a peninsula and is about three miles from the Victoria Post Office. It is the headquarters in the Pacific Ocean for Her Majesty's ships. The harbor, though not very large, is a very excellent one, having a good depth of water and good anchorage. The harbor can accommodate comfortably a fleet of 75 or 80 vessels. The Dominion Government Drydock is situated here. This dock is one of the best, if not the best on the Pacific Coast, being 457 feet long, 57 feet wide, and having a depth of 27 feet. It is built of sandstone and granite and Portland cement. Esquimalt is connected with Victoria by the Electric Tramway, which has lately been completed, and which has already proved to be of great advantage to Esquimalt, besides enhancing the value of property along the tramway line. The whole district between Esquimalt and Victoria is rapidly building up, and in a few years we can expect to see Esquimalt the shipping point for Victoria.

POSTMASTER J. S. HOWARD.

Colwood, on the Sooke and Metchosin road, is a flourishing country district. There is a large lime kiln here owned by Peatt Bros., in which, however, most of the labor is done by Chinese.

POSTMASTER, ARTHUR PEATT.

Langford Plains are situated on the Goldstream road, about $1\frac{1}{2}$ miles from Colwood Post office. A great many picnic parties visit these plains every week during the summer months, as they are within easy distance of Victoria and on the line of the E. & N. Railway. Post office address, Colwood.

Goldstream, on the E. & N. Railway, is about two miles from Colwood. It takes its name from a stream in which gold was found a few years ago, causing considerable excitement. The gold, however, was not in sufficient quantities to pay for the working; but the place had become very prominent, and is still one of the most fashionable resorts. Mr. James Phair keeps a large hotel there and is always ready to welcome any strangers. The drive from Victoria to Goldstream is one of the most beautiful that can be found in the neighborhood.

POSTMASTER AND STATION AGENT, JAMES PHAIR.

Happy Valley is a small valley between Colwood and Metchosin. It is chiefly agricultural. P. O. address Colwood.

METEOROLOGICAL STATION.

Edmund Baynes Reed - - - Chief Officer.

Meteorological Station--Since July 1st, 1890, a station has been established in Esquimalt under the charge of Mr. E. Baynes Reed.

The station forms part of the extensive system of the Canadian Meteorological Service, under the management of the Director, Mr. Charles Carpmael, of the Toronto Observatory.

The Esquimalt station is for the Victoria District, and is well-equipped with the modern instruments for recording and observing the weather, such as an electric anemograph for recording direction and velocity of the wind; standard barometers; self-recording aneroid barometer; standard thermometers; maximum and minimum thermometers; nephoscope for observing the clouds; rain gauge, etc. The observations are taken every four hours day and night, and are telegraphed twice daily to Toronto, and from thence to Washington.

The station forms the most westerly and northerly telegraph reporting station on this continent, and will, it is anticipated, prove a valuable addition to the meteorological service, carrying on, as it does, the valuable work hitherto so faithfully performed by Mr. W. T. Livock, of the Hudson's Bay Company in Victoria.

FORT RUPERT—See Alert Bay.

FULFORD HARBOR—See Salt Spring Island.

GABRIOLA ISLAND.

Gabriola Island, in the electoral district of Nanaimo, is situated to the east of Vancouver island, just below the city of Nanaimo. It is one of the most fertile and productive islands in the gulf of Georgia. It is about $9\frac{1}{2}$ miles long and has an average width of about 3 miles. The surface generally is comparatively level, having very few ridges or rocks on it. What few ridges there are on the island are fairly well timbered and afford excellent pasturage. So far the settlers have mostly followed agriculture and engage in what is known as general farming. Many of the farmers have quite large herds of cattle and sheep. The land which is under cultivation yields an abundant harvest and, like all the other islands in the gulf, is splendidly adapted for fruits of all kinds.

Gabriola Island, independent of its agricultural resources, is destined to become quite an important centre, as it is situated in the centre of a large coal deposit and the head of the island is within four miles of Nanaimo.

Between Gabriola Island and Vancouver Island are the narrows known as Dodd's Narrows, through which the tide runs sometimes at a speed of 10 or 12 knots per hour.

KOKSILAH.

Koksilah, one of the sub-districts of the electoral district of Cowichan, is situated about midway between Victoria (38 miles) and Nannimo (35 miles), and is a station on the E. & N. railroad. It lies close above the district of Corfield, which, for soil and productiveness, it closely resembles. There are over 30 farmers in this section, many of whom are men of capital and who have invested in farm property there. The station is only $1\frac{1}{2}$ miles from Duncan's, and is half way between the Cowichan and Koksilah rivers. Excellent fishing is to be had in both rivers, while the valley of the Koksilah is noted as one of the best deer preserves on the island.

MAPLE BAY--See Shopland.

MAYNE ISLAND.

Mayne Island is one of the principal islands in the Gulf of Georgia. It is centrally situated between Victoria, New Westminster and Nanaimo; has a population of 60, a school, postoffice (money o. o.), and wharf, besides a good hotel. Steamers call regularly twice a week. Some of the best fruits in the country are grown. The outlook for coal is very promising, and good harbors all round the island. Fishing and shooting are excellent.

METCHOSIN.

An adjacent suburban district, reached from Victoria by a charming drive of fourteen to eighteen miles. The roads and scenery are excellent, and it is a justly famous rural section, destined, at no distant period, in this age of electric railways and rapid transit, to become a most important addition to Victoria's lovely surroundings.

The anticipated future Harbor of Becher Bay is situated in the southern part facing the Straits of Juan de Fuca, and in full view of the grand Olympian Range. A number of excellent farms are situated in the valleys and fertile portions of this section.

Pedder Bay, William's Head, Albert Head, Race Rocks Lighthouse, Rocky Point and Happy Valley are situated within Metchosin District.

MILLSTREAM---See Esquimalt.

MOUNT TOLMIE---See Victoria District.

NANAIMO.

The city of Nanaimo, the fourth city in size in the province, is situated on the east coast of Vancouver Island, about 70 miles north from Victoria. It is a very important place, as it is the centre of the coal mining industry of the province. It has a population of nearly 5,000, with about 3,000 more in the near vicinity. Nanaimo was formerly only a trading post of the Hudson Bay company, who had prospected for coal on many parts of the island before they found the rich carboniferous strata that are now being worked around Nanaimo. This discovery was made in 1854, and the first shaft (which has long since been worked out) was sunk near the old fort or bastion, which has given the name to Bastion street. The Vancouver Coal and Land company owns mineral and surface of about 33,000 acres of land, a portion of which is on the islands adjoining Nanaimo. On Newcastle islands are the remains of a mining shaft and paraphernalia. Besides this there are several other mines in the neighborhood which have been worked out. The main shaft of the company is the esplanade or No. 1 shaft, which is inside the city limits, near the edge of the bay. This mine has been worked upwards of a mile under the bay towards Gabriola island, and here occurred the disastrous explosion of 1887. The Vancouver Coal company, besides No. 1 shaft, are working mines at Southfield and Northfield. Besides these, the mines of the East Wellington Coal company and Messrs. Dunsmuir & Sons are within easy reach. The monthly pay roll of these three companies is about \$175,000 per month for wages alone, most of which is spent in Nanaimo.

The town is very irregularly laid out, there having been no regular plat made until after a number of houses had been built. The lay of the land also tended to produce the irregularity in the streets. During the past few years the town has im-

JOHN HILBERT, **NANAIMO, B. C.,** **MANUFACTURER and IMPORTER of FURNITURE,** **UNDERTAKER.**

proved very much, both in size and importance. A great many new buildings have been erected which are much larger and more substantially built than the older buildings.

Nanaimo harbor is one of the best on the coast, being easy of entrance and having a good depth of water, with good anchorage. It consists of a bay enclosed by islands, the principal of which are Newcastle and Discovery islands. The former of these islands is used as a sheep range, while the latter is uninhabited. The harbor usually presents a very lively appearance, owing to the number of ships loading coal for the various markets.

The E. & N. R. R. connects Nanaimo with Victoria, over which line there is daily communication, while on three days of the week there are two through trains per day.

Nanaimo has a very good water system, the water being carried in pipes from Chase river, which has been dammed at a height of over 300 feet above the level of the town, thus securing ample pressure without the use of steam pumps. The Chase river rises in Mount Benson and at present supplies sufficient water for the use of the city, but if it continues to improve as it has done there will be a necessity of making a connection with the Nanaimo river, which project has already been under consideration. There are about 24 hydrants in the city, besides a steam fire engine. The fire company, though a volunteer one, is one of the most efficient on the coast.

The district which surrounds Nanaimo can hardly be called a farming district, though there are some very good farms in the neighborhood. The principal districts are North and South Cedar, which lie about six miles from the city. However, the timber is very valuable and is gradually being utilized.

The Hamilton Powder company have lately erected a factory for explosives near Nanaimo, and will soon be able to supply powder, etc., to the whole Province. There is also a large saw, planing mill, sash and door factory, etc., owned by A. Haslam, Esq., late M. P. P. for Nanaimo. The Vancouver Coal and Land company have large machine shops and foundry. A large tannery has lately been erected. Besides these there are a great many industries carried on in a smaller scale.

Nanaimo is well supplied with churches, having church of England, Presbyterian, Methodist, Roman Catholic and Baptist churches, while the Salvation army hold regular meetings in the town hall. There is also a good opera house and two public schools, besides the high school and several private schools. There are two banks,

viz.: Bank of British Columbia and Dominion Government Savings Bank. The fraternal and benevolent societies are well represented.

The climate of Nanaimo is very mild and salubrious. The rainfall is greater than Victoria, but much less than Vancouver or New Westminster, while fogs are almost unknown. Labor of all kinds is in constant demand, the wages being higher than any other place in the Province. Its central location and its mineral wealth will always make Nanaimo a prosperous town.

NANOOSE BAY.

This farming district is situated about eight miles north of Wellington, with which it is connected by wagon road. It is a comparatively new settlement as yet. It embraces a section of country about 12 miles long by six wide, which is, however, only sparsely settled. The bay, four miles long by one and a half miles in width, affords good shelter for vessels. The wagon road to Alberni, via Parksville, runs round the head of the bay.

PARKSVILLE.

Or Englishman's River.

Parksville, or Englishman's River, as it is usually called, is a farming district on Vancouver Island, about twenty miles northwest from Nanaimo. It is a comparatively new settlement, but is improving very rapidly. It has weekly communication with Nanaimo and Comox. There are good roads all through the district. There is a good wharf, which has been recently built. Parksville is on the wagon road from Nanaimo to Alberni, all mails for Alberni going that way. Mail leaves Nanaimo 9 A.M. Thursdays, and Parksville on Fridays, returning leaves Alberni Tuesdays, Nanoose and Parksville on Wednesdays, reaching Nanaimo at 3 P.M.

LOUIS WIDIN, PROPRIETOR.

SAANICH.

The peninsula of Saanich comprises the districts of North and south Saanich and Lake. It is situated north of Victoria, and comprises about 40,000 acres, most of which is farming land. Many of the best farms in the district have been beaver meadows and swamps, which, when drained, yield enormous crops. During the summer of 1889, the crops of grain were so heavy that they lodged and consequently, caused considerable loss. The soil is a rich black loam in the bottom lands and red loam on the ridges. Fruit grows abundantly, the orchards being larger and better cared for than almost any other place on the island. Its close proximity to Victoria gives Saanich a good market and most of the farmers are independently wealthy.

In South Saanich there is an extensive limestone quarry and kiln. A brickyard is in active operation. At North Saanich Messrs Brackman & Ker have an extensive flour and oatmeal mill. The east and northern coast steamers call, at frequent intervals, at the wharf situated close to the mill. The agricultural society has been established some 20 odd years and annually holds an exhibition in the hall which is inclosed in a bout 4 acres of land. There are two English churches with a resident rector, the Rev. Christmas, one Catholic church and 4 public schools. The east and west roads run the entire length of the peninsula at a distance of from 2 to 3 miles from one another, with numerous cross roads. During the season salmon are very plentiful in the Saanich arm, which separates Saanich from Cowichan, and good trout fishing can be had in the streams and lakes in the district. Near the head of the peninsula are numerous small islands which are mostly peopled by Sandwich Islanders. Game of all kinds is abundant.

Saanich Agricultural Society: President, S. Sandover ; vice-president, McIntyre Dean ; secretary, H. Brethour, treasurer, Edwin John ; committee, Julius Brethour, John Brethour, William Thompson, Edward Sadler, Geo. Harrison, Thos. Mitchell.

SALT SPRING ISLAND.

See Vesuvius Bay--Burgoyne Bay.

Salt Spring Island is the largest of the islands in the newly created Islands Electoral District. It is reached by steamer from Victoria (50 miles) and Nanaimo (40 miles), the steamer calling at Burgoyne and Vesuvius Bays, while the C. P. N. Co.'s steamers occasionally call at Beaver Point. All the good agricultural land has been

settled for some years; excellent roads have been constructed to all parts of the island. The remainder of the island is very rocky, but promises to be rich in minerals. As a fruit-growing or sheep-raising district, it stands unrivalled. Croppings of coal are found in various places, but so far it has never been thoroughly prospected. A silver mine is being worked at the southern end of the island by Brethour Bros., of Saanich. In the north end of the island are numerous salt springs, from which the island takes its name. Excellent free stone is found in numerous places. The stone for the construction of the Drydock at Esquimalt was obtained from a quarry near Vesuvius Bay. Near the centre of the island is Cushion Lake, a lovely little sheet of water. The climate is healthy and invigorating, and the scenery magnificent.

Assessor and Collector for the whole Island, Sam. Maxwell.

SAYWARD-ALBERNI—See Alberni**SHAWNIGAN.**

Including Cobble Hill.

Shawnigan District, one of the sub-divisions of the Electoral District of Cowichan, has its centre on Cobble Hill, on the E. & N. Railway. There are good roads leading to all parts of the district, which is principally agricultural. Here there is limestone of excellent quality, which is being quarried and burned. An extensive granite quarry has recently been opened, which gives employment to upwards of twenty men.

Mr. Geo. Phillips, of View street, Victoria, is the owner and manager. At the Cobble Hill Station, Mr. Porter has a large and comfortable hotel and general store. The hotel has been in operation about two years, and is a very convenient place for sportsmen, as the rates are reasonable and fish and game are plentiful. Silver has been discovered in the mountains, a few miles off, and will shortly be worked. A good waggon road has been opened from Cobble Hill station to the mine.

Shawnigan Lake is now one of the most fashionable watering places, as it is within easy reach of Victoria, and the sport in the neighborhood is very good. Messrs. Lossee & Morrison have lately erected a large saw and planing mills, and have obtained a timber lease all around the lake. They are erecting a number of residences in the neighborhood of the mill, and we may shortly expect to see a small village there.

Last but not least of the attractions at Shawnigan is the hotel of the same name kept by that well known and popular pioneer, Mr. Charles Morton.

SIDNEY ISLAND.

A small island near the Saanich Peninsula, one and one half miles east of James Island.

Graham, Thomas, fmr

Graham, William, fmr

SOMENOS.

One of the most important districts in Cowichan. Its chief industry is agriculture. Its scenery is more grand than any other portion of the district, excepting, perhaps, Cowichan Lake. Mount Provost lies in this district, and though somewhat difficult of ascent, still the view from the summit well repays one for the labor of climbing. There is a good general store at the station, but no hotel.

LOUIS WIDIN, Proprietor.

SOOKE.

Is a thriving settlement amongst the first on the Island, situated about 23 miles south-west from Victoria. It is very healthy, and bound at no very distant date to become the favorite watering place of Victorians and others wishing to combine coast and country for their holidays. In summer they enjoy a fine, cool breeze, and in winter it is much milder than Victoria. This is one of the favorite hunting grounds, a large number of deer being killed annually. Pheasants, grouse and quail are plentiful, brant and ducks are found in abundance. There is good fishing in fresh and salt water. There are two schools in the district, and church service is held once a month. The soil is black loam, and clayey loam with clay subsoil, and very productive. Cereals, fruit and all kinds of vegetables thrive well. Iron of a good quality, and copper are in the district. Sooke harbor is a splendid sheet of water and salmon are very plentiful in it. The "Woodside Mill," owned and run by Muir Bros., carry on a lumbering business; this mill is capable of turning out thirty thousand, or at a push, forty-five thousand feet per diem. Mr. James Keill, cooper, does a good business.

Much has been said about the Beecher Bay railroad, but the best route lies through Sooke. A safe and splendid harbor could be made outside Sooke harbor by building a breakwater at the foot of Muir's Plains, and from there an easy grade to the E. & N. Railway. There is communication twice a week with Victoria by a good wagon road; mails go over this route once a week. A sloop plys between Sooke and Victoria at intervals. There are three post offices in Sooke called Sooke, East Sooke and Otter Point.

VICTORIA.

Population, 24,000.

Victoria, the Capital and largest city in British Columbia, is situated on a slightly elevated plateau near the southern extremity of Vancouver Island. It has the most beautiful situation of any city or town on the Pacific Coast. The site was selected by the Hudson's Bay Company, who erected a fort and storehouses, and upon the discovery of gold in Cariboo thousands of miners flocked into the new Colony, and hundreds usually wintered in Victoria. This gave the city its first start. The limits of the city at present enclose a space of about six square miles, but private residences have been erected far beyond the same.

Victoria, or rather its suburb Esquimalt, is the headquarters of Her Majesty's fleet in the North Pacific Ocean. This tends to make Victoria of importance. Here also is situated the Dominion Government Drydock, one of the largest, if not the largest, on the coast. Its length is 576 feet; breadth of entrance, 55 feet; and depth 27 feet; thus affording ample accommodation for any vessel that at present navigates these waters. The harbor of Esquimalt is an excellent one, as the water is deep close to the shore and affords good anchorage. Victoria is also the headquarters for the province of the Canadian and local militia, "C" battery barracks being at Macauley's Point, just outside the corporate limits. The harbor of Victoria is small, but is being steadily improved. Just at the entrance of the harbor is the "outer wharf," which affords a landing place at all stages of the tide for the largest vessels afloat. Mr. R. P. Rithet, one of Victoria's most enterprising citizens, owns the wharf and is now having constructed a large breakwater and extension to this dock. When this is completed it will very materially increase shipping accommodations. The Pacific Coast Steamship Co.'s steamers call here twice every five days on their way to and from San Francisco. Arrangements have been made for the China steamers to call here each way.

Though situated on an island Victoria has a central location. It is distant 38 miles from Port Townsend, 18 miles from Port Angeles, 100 miles from Seattle, 128 miles from Tacoma, 72 miles from Vancouver, 73 miles from New Westminster, 72 miles from Nanaimo, and 750 miles from San Francisco. With many of these ports there is daily communication. With the ports on Puget Sound there is communication twice a day, one steamer leaving every morning, except Sunday, at six o'clock, and another every evening except Saturday at 8:30 o'clock. The Canadian Pacific Navigation Company's palatial steamship *Islander* leaves every morning at 4 a. m. except Monday, for Vancouver, connecting with the C. P. R., while various other steamers run to and fro at different times.

Victoria is the distributing point for most of the wholesale trade of the province, while all, or nearly all, the trading posts on Vancouver Island and the North West Coast of the Mainland obtain their supplies here. The fur sealing trade of British Columbia is almost entirely owned and controlled by Victoria capital, and the vessels

Beautifully Illustrated Pamphlets furnished Free on application to any Agent of the CANADIAN PACIFIC RAILWAY.

employed in the business are built here, winter here, and are fitted out from this port. This trade is one of the most important in the Province, as it requires very large capital to engage in it and usually yields large returns. Victoria is probably more affected by the "Behring Sea" difficulty than any other port in Canada.

The Esquimalt and Nanaimo Railway from Victoria to Esquimalt has its station near the foot of Johnson Street, and crosses the harbor by means of a swing bridge, which is left open all night after 9:30 p.m. There are daily trains each way, and on Saturday, Sunday and Monday two passenger trains each way, besides the freight trains. Most of the traffic with Nanaimo is carried on by means of this line, although there are steamers plying back and forth. Large quantities of building stone come over this line from the numerous quarries. It is confidently expected that this railway will be extended as far as Seymour Narrows or Comox at no distant day. This will cause a large tract of land, hitherto unoccupied, to be opened up and become tributary to Victoria.

The electric street railway system has done much towards the advancement of the city, as it has made all points easy of access. The inauguration of this modern improvement is largely due to the energy of the Hon. D. W. Higgins, the president of the company. It is expected that, in the spring, cars will run every eight minutes instead of twenty, as at present. The system has been extended to Esquimalt, which is now only ten minutes distance from the centre of Victoria. It is intended to still farther extend the road to Beacon Hill and Lake View. Property has increased in value along the line of the tramway, and residences are being built farther out of town.

The streets in the city are all well macadamized, and are kept in excellent condition. Outside the city limits the roads are equally good, and quite numerous. It would take a long time to go over all the excellent drives in the vicinity.

To the tourist Victoria offers many attractions. The scenery is grand, the drives and resorts many, and the climate all that could be desired. Just across the Straits are the snow-capped Olympic range of mountains, which render the climate always cool and pleasant in the summer. The evenings are somewhat chilly even then, but never cold in winter. The thermometer rarely falls below 16 degrees above zero. The tourist who comes to Victoria should be sure to drive to one of the small hills in the neighborhood, such as Mount Tolmie or Mount Douglas, and the view would well repay him for his trouble. From the summit he would obtain a panoramic view of hill and dale, rocky mounds and fertile plains, country and city, while all around would lie the glassy surface of the Straits of San Juan de Fuca, Haro and Rosario. Should the day be clear, he would see in the far distance across the Straits the thriving towns of Dungeness and Port Angeles, while the smoke from Port Townsend and Port Crescent can easily be seen. To the eastward lies the Gulf of Georgia, dotted with innumerable islands. To the northward can be seen the range of hills which runs nearly the whole length of Vancouver Island.

The climate is remarkably dry for this section of the country, the average rainfall only being about 34 inches. On no other point on the coast north of San Francisco is the rainfall so small. The air, however, is sufficiently charged with moisture to prevent drought. The winter of 1889-90 was exceptionally severe all over the country, but yet in Victoria there was only one day's sleighing.

Among the many industries of Victoria a few might be mentioned particularly. Messrs. Hall, Ross & Co. have lately opened a large roller flour mill in connection with their rice mills. The flour mills have a capacity of 200 bbls per day and the rice mills about 20 tons per day. The wheat is partly raised in the interior of British Columbia and partly in the neighborhood. The rice is imported in the paddy from China, Japan and Siam, and is cleaned and made ready for market in the mills on Store street. The Albion Iron Works are the largest iron works on the coast north of San Francisco, and are managed by W. F. Bullen, Esq. They manufacture stoves and all manner of brass ware, besides engines of all descriptions and boiler making. Messrs. Spratt & Gray have a large foundry and machine works. The estate of Wilson Bros. & Co. also do an extensive foundry business. Besides these there are several smaller establishments in the same line of business. Messrs. John Weiler and Jacob Sehl have each an extensive furniture factory. The Ames-Holden company have a large boot and shoe factory, supplying goods to the whole province. Besides these industries, ship building, sash, door and lumber mills of all kinds, blacksmiths, farriers, blank book manufacturing, rubber stamp making, manufacturing jewelers, brick makers, marble works and other businesses too numerous to mention.

The press in Victoria is well represented, as there are two daily papers, each publishing a weekly edition. The Colonist, the pioneer newspaper in the province, issues every morning except Monday, while the Times issues every evening except Sunday. Ellis & Co., the proprietors of the Colonist, have a large jobbing printing business, and do lithograph work of all kinds at moderate prices.

Victoria has progressed wonderfully during the past year. New buildings have sprung up on all sides. A company has been organized and incorporated to build a very large hotel to be known as the Canada Western. This building is expected to cost over half a million dollars, and when finished will be second to none on the coast. The site commands a fine view of the harbor. In the way of church edifices a great showing has been made. The St. Andrew's Presbyterian church was completed in January last. Since then the Methodist denomination commenced and have almost completed a magnificent stone church. The Roman Catholics are actively engaged in building a large cathedral, while the Church of England people are also taking active steps towards building a cathedral. Besides these buildings a number of fine business blocks have been erected. One very noticeable feature in all these buildings is their solidity and appearance in comparison with the older buildings. The most prejudiced mind must admit that the prospects for Victoria are very bright. Better means of communication are being made year by year and the population is steadily increasing. The building improvements during the year 1890 amounted to about \$2,000,000. In spite of the many dwelling houses erected, houses are at a premium, it being quite difficult to get a house. In many instances houses are engaged long before they are finished. Rents, however, are very reasonable.

VANCOUVER, B. C.

Rates--\$1.00 to \$1.50 per Day

LOUIS WIDIN, PROPRIETOR.

Beacon Hill park, which lies to the south of the city, is a most magnificent natural park. The city fathers have expended large amounts of money in rendering it even more beautiful. Two artificial lakes have been located near the centre of the park, one of which is stocked with goldfish. There is also a collection of wild animals. During the summer months a band plays every Sunday afternoon, rendering it a favorite walk for both citizens and strangers. The park takes its name from a small circular mound called Beacon hill, round which is a race track. Most of the games are played on the park grounds. The Wanderers, Victoria's bicycle club, have weekly races on the track during the cycling season. There is also a splendid race track in Victoria driving park about two miles from the post office. This park is owned and kept in repair by the British Columbia Jockey club, who hold periodical races there.

Victoria keeps well to the front in the way of modern improvements. The streets are well lighted by means of electric light, while many of the business houses and private residences are lighted by the same medium. The telephone system is good and is well patronized. During the month of September last the ratepayers voted to borrow a large sum of money to be expended on sewerage, which, for some years past, has been a bone of contention. When this work is completed it will prove of great advantage to the city, besides giving employment to a large number of men. Labor is in constant demand and is well paid. Mechanics get from \$3 to \$4 per day of 9 hours. Laborers \$2 to \$2.50 and all other labor is in proportion.

VICTORIA DISTRICT,

Also, see **Victoria City**, including the **Arm, Beacon Hill, Cadboro Bay, Cedar Hill, Clover Point, Craighflower, Gordon Head and Mount Tolmie.**

Victoria District contains about thirty square miles around Victoria City. It comprises all that country between Victoria Arm (a branch of Victoria Harbor), Lake District and the Straits of Haro. It is the most densely populated district on Vancouver Island. At Oak Bay, about three miles from Victoria City, a company has purchased a plot of land and intend, during the year, to erect a large and substantial hotel thereon, which will be used as a summer resort. The Street Car Line to the Jubilee Hospital has raised the price of property on the Cadboro and Oak Bay roads, but it is fast changing hands. Residential plots of from half an acre to five acres are being bought throughout the whole of this district, and handsome residences are being erected. It is intended to extend the Street Car Line to all these suburbs, so that easy and cheap communication can be had with the city at all times. There are good carriage roads through the whole district, which is extremely picturesque throughout, abounding in hill and dale, lake and stream. In the neighborhood of Cedar Hill and Cadboro Bay there are some very large farms. Near Mount Tolmie most of the land has been and is devoted to fruit growing. Small fruits of every kind do remarkably well. There are several churches and schools in the district. The climate is excellent, extremes of either heat or cold being unknown. However, there is a good deal of wind both in winter and summer, which, doubtless, is the cause of the mildness of the climate.

P. O. Address, Victoria.

WELLINGTON.

Wellington is a coal mining district about 5 miles north from Nanaimo. It comprises North, South and East Wellington and Northfield. Departure bay, about 3 miles from Nanaimo, is the shipping point for all these mines and here are to be found large docks for loading coal. The coal from the Wellington mines is the best found on the coast and finds a ready market in San Francisco, Los Angeles, Portland and other places south of the line, as well as a large local demand in the province.

Messrs. Dunsmuir & Sons are the owners of the mines at North and South Wellington; the East Wellington Coal Co (R. Chandler, Esq.), at East Wellington, and the Vancouver Coal and Land Co, of Northfield.

Wellington is the terminus at present of the Esquimalt & Nanaimo Railway. At North Wellington are situated the railroad station, store, hotel and offices in connection with the mines. The population of Wellington at the time of compiling this work is very small, owing to a strike on the part of the miners which has lasted some time. Messrs. Dunsmuir & Sons have four pits in operation, which, when in full operation, turn out about 200,000 tons of coal yearly, employing about 700 men. The pay of these men will range from \$3 to \$6 per day of 8 hours, the majority of the mining being done by contract. There are several large farms managed by the same firm on which is raised provender, etc., for the horses and mules employed in the mines. There is an abundant supply of good water, each house having a well. Two lakes in the immediate vicinity afford excellent bathing and fishing. The place is well supplied with churches, having presbyterian, Methodist and Roman Catholic edifices, each having one or two services every Sunday. A large and commodious school house has just been built, which provides ample accommodation for educational purposes.

At Northfield a new mine has lately been opened by the Vancouver Coal and Land Co close beside the East Wellington Co.'s shaft

The East Wellington Coal Co. have two large shafts about midway between Nanaimo and Wellington. The coal from both these mines is similar in quality to the celebrated Wellington coal.

There is a magnificent wagon road connecting Nanaimo with Wellington, which passes East Wellington and Nanaimo on the way. This wagon road runs through to Alberni and formerly extended as far as Comox, but severe floods swept away the bridges and the road fell into disuse.

RUBBER STAMPS and BLANK BOOKS

R. T. WILLIAMS,

28 BROAD ST., - VICTORIA, B.C.

TOBACCO PLANT.

COME ye citizens and strangers,
Miners, sailors and western rangers,
Listen to the truthful story
Of Frank Campbell of Victoria.

He in truthful words will tell you,
Just the goods he has to sell you ;
Mind ye, now, he isn't joking,
If you are fond of chewing or smoking.

Or, if you are given to snuffing,
What he keeps does not need puffing ;
He has brands will suit you really--
Tobacco users prize them dearly.

From all parts of the "Old Dominion,"
He has stock, and his opinion
Is, that none will suit you better--
They will please you to the letter.

His Cigars, just from "Havana,"
Smoke in the most lovely manner ;
Meerschaum pipes of style and fashion,
Just to suit the taste and passion.

And it is in Canada stated
His tobaccos are celebrated ;
Green Seal, Straight Cut, all go,
Big Lick, Big Cut, Wind Sap, also.

And the Fine Cut brands for chewing,
That your teeth will never ruin ;
Pipes to suit the inveterate smoker,
Cards for playing sinche or poker.

Pipes of briar, and stems of cherry
More than any man can carry ;
It would take a week to tell you
All the things he has to sell you.

While in town you may be stopping,
At the "Adelphi Corner" drop in ;
Campbell you'll find at that location,
Ready to give you information.

Or to see you well provided
With what is by all decided--
The smoker's and the chewer's glory--
The best and cheapest in Victoria.

AGASSIZ.

Agassiz or, as it was formerly called, Ferney Combe, is situated on the right bank of the Fraser River, having a frontage of 12 miles on the river. It is a beautiful, level valley and is entirely devoted to agriculture. The C. P. R. runs through the valley, and has a station, express and telegraph office there. The station is 72 miles from Vancouver. The Dominion Government Experimental Farm is located here, and is under the able management of Mr. Sharpe. Here passengers to Harris on Hot Springs take stage, a distance of five miles. There are a hotel and a store at this station. Fish and game are abundant and the scenery grand and picturesque.

ALDERGROVE.

This thriving young settlement is partly in Langley municipality and partly outside of any municipality, and lies between Langley and the American boundary. There are good roads through the settlement, the chief being the Yale and New Westminster Waggon Road. A road known as the Boundary Line Road runs north and south through the settlement, connecting Langley with Lynden and Whatcom on the American side. There is a weekly mail service, mail arriving every Saturday, but it is considered very inefficient by the settlers. There is only one store in the district, which is kept by R. Shortreed. The soil is a clay loam, which requires very little draining. There is an abundant supply of fresh spring water all the year round. The timber is principally highland alder, birch and cherry, with an occasional cedar and fir. It is easily cleared, as compared with most timber land. The first crop is generally poor, but after that the yield is good. The flies are not troublesome in this section. Fruit does remarkably well, and many of the farmers are making a specialty of fruit and hops. This is a new settlement, having been settled during the last six years, and taking everything into consideration the growth and present appearance of the place speak well for the industry and intelligence of the people. Last season Messrs. Broe Bros. sold over 15 tons of hops.

ASHCROFT.

Ashcroft, in the electoral district of Yale, is situated on the South Thompson river the Bonaparte river entering the Thompson about one mile from the town. It is one of the most important stations on the Pacific division of the Canadian Pacific Railway; distance from Vancouver, 207 miles; from Montreal, 2,698 miles; altitude, 1,075 feet. Extensive stock raising is carried on in the vicinity. It is the departure and trading posts for Cariboo, Clinton, Lillooet and other settlements in the northern interior of the Province, and daily may be seen pack mules and trains of freight waggons heavily laden drawn by oxen arrive and depart. A large flour mill is located on the junction of the Bonaparte and Thompson rivers, and the B. C. Express Co. have their headquarters in the town; their stages leave weekly for Cariboo and three times a week

ONLY \$30.00 TO BANFF HOT SPRINGS AND RETURN

Including Stop Over at Glacier, Field and Harrison Springs.

for Clinton, connecting at Clinton with a stage for Lillooet. The climate is exceptionally mild, dry, and extremely healthy. Several first class hotels are near the station. The Ashcroft and the Cargile are both first class.

BARKERVILLE.

Barkerville, in the electoral district of Cariboo, situated on Williams Creek at the termination of the Cariboo waggon road, is reached by the B. C. Express Co.'s stages from Ashcroft, distance 285 miles. This creek has supplied many millions of the dollars taken out of the Cariboo district. The shallow and easily worked portion being nearly exhausted, hydraulic pipes now occupy the attention of the placer miners; washing away banks from 40 to 90 feet deep by the help of a great pressure of water. Many quartz reefs are to be seen cropping out in and about Barkerville, and it is hoped that with the aid of the Government testing mill about to be erected, much of the latent wealth of the district will be made available. Here are located the Government agent and assay offices, court house, school, post office, churches, etc. The mail arrives weekly.

Government Agent and Gold Commissioner—John Bowron.

Government Assayer—E. A. Martin.

Head Constable and County Court Registrar—George Cowan.

Sheriff—John Stevenson.

Post Master—James Stone, Money Order Office and Telegraph Office.

BLAINE.

INCLUDING WHITE ROCK.

P. O. BLAINE, WASH.

Just where the International boundary line strikes Semiamho Bay a town site has been located on both sides of the line. The growth on the American side has been really wonderful. A year ago there was nothing. Now there is a town of over 2,000 inhabitants. Although a great many lots have been sold on the Canadian side of the line, very few buildings have been erected as yet. Messrs. Heffren and Murphy have a large hotel, The St. Leonard, which is right at the boundary.

At White Rock, one-and-a-half miles from the iron post which marks the boundary, the Royal City Planing Mills Company have built a wharf, hotel and store. They have also opened a lumber yard and intend erecting a sawmill. Lots sell at from \$150 to \$300. The shipping facilities are much better here than at Blaine, as there is deep water close to shore, whereas at Blaine wharf approaches are over a mile in length.

BROWNSVILLE.

P. O. NEW WESTMINSTER.

Brownsville, opposite New Westminster, is the Western termination of the Yale and New Westminster Waggon Road. A steam ferry boat runs across every hour from New Westminster. Here passengers take stages for Clover Valley or Halls Prairie or for Elgin and Blaine. The country immediately in the neighborhood of Brownsville is low and level. About half a mile above the wharf is the site selected for the crossing of the New Westminster Southern. This site has been laid out for a town, and rejoices in the name of Liverpool. At present Liverpool consists of a wharf and a prospect.

CACHE CREEK.

INCLUDING BONAPARTE VALLEY.

Cache Creek Valley, in the electoral district of Yale, is situated on the Cariboo Waggon Road, six miles from Ashcroft. All stages running from Ashcroft to Barkerville pass through the centre of the valley. It is almost entirely devoted to agriculture, some of the best farms in British Columbia being found here. Besides farming, large numbers of horses and cattle are raised. The cattle are driven off to the hills and valleys adjacent, for summer pasturage, and this district furnishes a great part of the meat for the Victoria and Vancouver markets. The Bonaparte Valley is settled as far as 124-mile house, when the Cariboo Waggon Road turns off northward. The

BUY YOUR TICKETS VIA CANADIAN PACIFIC

AND AVOID CHANGES AND DELAYS.

climate throughout this section of the country is dry, but root crops of all kinds, as well as fruit, do remarkably well. In winter the thermometer often registers 40° below zero, but the air is so clear and bracing that one hardly feels the cold.

CASSIAR.

INCLUDING McDAME CREEK AND LAKETON.

The district of Cassiar is situated in the north-western portion of the Province. It is almost entirely a mining district, there being only a few farms along the Stickeen river which supply the miners with vegetables. The features of the country are meuntainous. The rivers and lakes are numerous and teem with fish, while game of all kinds abound.

McDame Post or Sylvester Landing is on the left bank of the Dease River, just below the junction of McDame Creek with Dease River. The Hudsons Bay Company has a trading post here.

Liard Post is on the left bank of Liard River, opposite the confluence of the Dease and Liard Rivers. Here also is a Hudson Bay Company's post.

Black River post, on the left bank of Black River, a little below the confluence of the west and south branches, about 100 miles from McDame Post.

Centreville, or McDame Town, is about 14 miles north-west of Sylvesters Landing, on the left bank of McDame Creek. Here is situated the Court House, Calbraith, Grant & Cook's general store for the supply of the miners, with Edward Metcalf store-keeper and collector of revenue for the Government of British Columbia. The principal mining on McDame Creek extends about a mile above the town and two miles below, while about four miles above town is Halloway's Bar on the right bank of McDame Creek.

Estimates of gold taken out of these sections during 1889 was \$28,310. The Chinese here have a small farm, and raised in the summer of 1890 about seven or eight tons of potatoes, besides other vegetables. The population consists of 18 whites, 2 colored, 1 Mexican, and 41 Chinese. Communication in the summer once a week by H. B. Co.'s boat from Porter's Landing, foot of Dease Lake. In the winter there is only very occasional communication.

CENTREVILLE—See Chilliwhack.

CHEAM—See Chilliwhack.

CHERRY CREEK—See Ashcroft.

CHILCOTEN.

Chilcoten, in the electoral district of Lillooet, is an open country. At present stock raising is the only industry, as the means of communication are very bad. Game is wonderfully plentiful, and occasional hunting parties go from the coast there for the sake of sport. The climate is very dry but healthy, while the winters are rather cold. Crops require irrigation, but water is plentiful. As soon as the country becomes a little more opened up, Chilcoten will be all settled, but at present the population is very sparse. At present it is reached by trail from Ashcroft, the journey taking three days.

CHILLIWHACK.**INCLUDING CENTREVILLE, CHEAM AND POPCUM.**

The municipality of Chilliwack, in the electoral district of New Westminster, is situated on the left bank of Fraser River, about fifty miles above New Westminster, with which it has daily steamboat connection. At present it is the head of steamboat navigation on the Fraser River, as the C. P. R. has taken all the trade higher up the river. It is a fertile valley, from 10 to 15 miles wide, surrounded by high mountains. The soil is a clay loam and very rich, the crops raised being only excelled by some of the land at the mouth of the Fraser. All kinds of fruit, vegetables and cereals ripen to perfection. Chilliwack enjoys a remarkably fine climate, and the people are known all over the province as being thrifty and intelligent above the average. Very little land remains vacant, and most of what is taken up is under cultivation. There are two post offices in Chilliwack, one called the Chilliwack Post Office, which is located at Centreville, the other at Sardis, about four miles from Centreville. There are several schools, three churches, besides the Indian mission at Cheam, and good roads all through the settlement.

There are two hotels, but, so far, no liquor licenses have been granted, and unless the sentiment of the people changes there will be no liquor sold in the municipality. The river has been encroaching upon the settlement at the steamer landing, and has already swept away half of one farm. An attempt was made last summer to drive piles to prevent the water coming any further, but the high water washed them out.

Centreville, so called from its central locality, is a pretty little village at the crossing of Yale and New Westminster Waggon Road, and the main road to the steamboat landing. Most of the business of this district is transacted here. There are several large stores, blacksmith and carriage shops, churches, with their ministers' residences, the post office, savings bank and money order office. Driving eastward on the Yale and New Westminster Waggon Road you pass through the Cheam district, and when about 10 miles from Centreville you reach the Indian village of Cheam.

TRAVEL EAST BY THE CANADIAN PACIFIC

AND AVOID CHANGES AND DELAYS.

The Indians here are highly civilized, having good houses and orchards. They do a good deal of fishing, and many of them work in Messrs. Knight Bros.' mill in Popcum. About three miles above Cheam is Popcum, which lies snugly nestled at the foot of Popcum Mountain. Here Messrs. Knight Bros. have their large saw mill, planing mill, shingle mill and lathes, all run by water power. They get their water from a pretty little lake, about three-quarters of a mile from the mill. They have a power equal to 400 horse power. These enterprising gentlemen have obtained a lease of all the islands in the river above Nicomen Island, upon which the Balm of Gilead, or, as it is commonly called, cotton wood, grows. They have lately set up a steam mill alongside the saw mill for the manufacture of excelsior from cotton wood. This is an entirely new industry in British Columbia and well deserves patronage. Popcum and the upper part of Cheam are outside the municipality of Chilliwack, and are in the electoral district of Yale.

There is an agricultural society in Chilliwack, which has a show ground and buildings at Centreville. The annual Fair there is considered to be the best of any of the local fairs in the province.

their way up and down. The Post Office here is a distributing point. There are some very fine farms in the vicinity which yield excellent crops of grain; while fruit of all kinds grow in abundance. Grapes ripen in the open air and have a very superior flavor. A number of gold quartz ledges have been located near Clinton, but are not developed sufficiently to be able to predict the future of Clinton as a mining centre.

CLOVER VALLEY.

(SEE ALSO SURREY.)

Clover Valley, so called on account of the abundance of wild clover, is that part of Surrey municipality lying between Hall's Prairie and Surrey Centre. It is a level tract of land, but sufficiently high to be readily drained. Morton Bros. have recently built a mill on Nicomekl River, which cuts lumber and shingles, besides running planing mill and feed crusher. This valley seems specially adapted for fruit, peaches ripening readily in the field.

CONNOLLY LAKE—See New Caledonia.

COLUMBIA LAKES—See Kootenay.

COUTLIE'S.

(SEE ALSO NICOLA.)

Coutlie's, in the electoral district of Yale, forms part of Nicola Valley, and is situated about 40 miles from Spence's Bridge and 65 miles from Kamloops, from both of which places it can be reached by stage. It is almost entirely devoted to agriculture and stock raising. For further description see Nicola Valley.

CRANBROOK—See Kootenay.

DELTA MUNICIPALITY.

POST OFFICE ADDRESS, LADNER'S LANDING.

This large and important section of the electoral district of New Westminster occupies the left bank of the Fraser River near its mouth. It is bounded on the north by Fraser River, on the east by municipality of Surrey, on the south by Boundary Bay, and on the west by Georgian Gulf. It embraces about 40,000 acres of the richest agricultural land on the Pacific Coast, the crops grown being simply enormous. Mr. Calhoun, who owns one of the largest farms in this section, asked the writer to see his crops. In one field there were seven mowing machines at work. He drew particular attention to a hundred-acre field of Egyptian side oats, which he considered rather above the average yield. They stood all over the field at an even height of above 5½ feet. The heads were over a foot long. On one stock, which looked like a fair average one, there were 112 kernels of corn and an average of four stalks to the root. This field he thought would yield on an average 120 bushels per acre, with a weight of 40 lbs. to the bushel.

Hay crops run from 2½ to 4 tons to the acre; oats, 60 to 100 bushels; wheat, 40 to 70 bushels; barley, 60 to 90 bushels; potatoes, 10 to 20 tons; turnips and other root crops, 20 to 40 tons. The soil is a clay loam sediment in places, covered with a black vegetable deposit. As the whole country is below extreme high water mark it requires deepening to keep out the water. This has, however, already been done.

A good waggon road runs through the valley from west to east, connecting with

the New Westminster and Yale Waggon Road, and numerous side roads render any spot easy of access. One great drawback to the place is that the land is divided into blocks which are too large, and many of the owners are unable to till one-fourth of what they own, consequently there are thousands of acres lying totally unused and unimproved. This unimproved land sells at from \$30 per acre upwards, and some of the improved land is held as high as \$300 per acre. This seems a very high figure to pay, but when one takes into consideration the small quantity of available agricultural land in the province, together with the certainty of a good yield, no matter what the season may be, it does not seem so very far out of the way.

The main outlet of this district is Ladner's Landing, called after one of the pioneer settlers here. There is already quite a village here, having six stores, four hotels, livery stables, saw mill, real estate office, town hall, and seven canneries.

These canneries give employment to upwards of 1,500 hands during the season, but they are mostly Indians and Chinese. When the fish are running well some of these canneries put up as many as 1,000 cases per diem. In the summer months there is always good demand for labor of all kinds, particularly farm labor, at good wages. The climate is very mild in winter and not very hot in summer, being tempered by a breeze from the Gulf. Snow rarely lies more than two or three days at a time, and cattle require very little extra feed during the winter. Fruit of all kinds does well, but so far has not been grown extensively. Mr. E. Hutcherson has a large nursery and supplies trees to all parts of the province.

Game is very abundant, particularly ducks and geese, and every autumn numbers of sportsmen avail themselves of the opportunity to fill their game bags with comparatively little trouble.

There are several sloughs, as they are called, running through this section. The largest one, called Canoe Pass, separates Westham Island from the mainland. A canal scheme has been projected, by which direct water communication can be had between Boundary Bay and Fraser River without having to go round Point Roberts, a distance of about 70 miles. The length of the canal will be less than five miles. This will not only benefit the Delta, but all the lower part of the municipality of Surrey.

Ladner's Landing is about 62 miles from Victoria, 12 from New Westminster, 20 from Vancouver, and 40 from Nanaimo, all of which places form the market for the farm produce raised here. Boats call every day, and mails are left six times a week.

DONALD.

Donald is situated on the right bank of the Columbia River, in the district of Kootenay. It is the end of Pacific Division of C. P. R., and has workshops, stores, etc., in connection with that work. The town is growing rapidly, some fine buildings having been erected during the past year. Among others a court house. Donald is the commercial centre of the East Kootenay mining regions. There is an excellent reading room and circulating library in connection with the C. P. Railway.

DRYNOCK.—See Spence's Bridge.

ELGIN.

SEE ALSO SURREY AND MUD BAY.

A country post office in Municipality of Surrey on Nicomekl River. It is on the wagon road to Blaine, from which it is distant five or six miles, and it is distant from New Westminster 13 miles. Stages run daily from Blaine to New Westminster, calling at Elgin on the way. There is a good hotel and store here, owned by Samuel Clay of Victoria. There is some remarkably fine farming land on this flat, but it requires dyking, as it is very little above ordinary high tide mark. A large dyke has just been constructed across Mud Bay from Blackie's Spit to the high land on the Delta, which will reclaim a large tract of land hitherto worthless.

EMPIRE VALLEY.—See Dog Creek.

ENDERBY.

Enderby, in the Electoral District of Yale, is situated on the banks of the Spallumcheen River, at the head of navigation, being 26 miles from Sicamous, the nearest C. P. R. station, 7 miles from Lansdowne and 28 miles from Vernon, and is the most important town in the Spalumchun district. There is a large roller flour mill here, known as the British Columbia Milling Co. mill, which is owned by R. P. Rithet & Co. of Victoria, and having a capacity of over 100 barrels per day. The flour made in this mill is entirely from wheat grown in the vicinity, and owing to its superiority has gained a wide reputation. The Shuswap and Okanagan railway is now almost complete, and will when completed, overcome the difficulty of transportation from this region. A small steamer makes regular trips from Sicamous to Enderby, and stages run three times a week.

FAIRMONT SPRINGS.

In the Kootenay district, near the lower end of the Columbia Lakes, are situated a group of hot springs known as Fairmont Hot Springs. They are of considerable medicinal value, containing lime, magnesia and sulphur. Four of the springs bubble up at the bottom of a ravine close to an ice-cold mountain stream. Two others are on the summit of a hill, the sediment having formed natural bath tubs round the openings.

GOLDEN.

Golden is a mining town in Kootenay district, and is situated on right bank of the Columbia River. Steamers make weekly trips from here to the headwaters of the Columbia River. It is a distributing point for mails in the East Kootenay district. A large smelter has been erected, and will shortly be in operation. Gold, silver and copper quartz ledges have been located, which promise immense wealth to their owners.

GRAND PRAIRIE.—See Kettle River.

GRANITE CREEK.

In the Yale Electoral District, is entirely a mining district. Below we give some extracts from Professor Dawson's report on the mineral wealth of British Columbia:

Granite Creek joins Tulameen River from the South, nine miles above its mouth. Gold discovered in 1885, and caused considerable excitement, resulting in a rush to the Creek in the same year. The Creek has been worked (and in most cases with good results) for the first four miles up, or from the mouth, but above this, the creek has not been bottomed, though coarse gold has been found. Nearly all the gold has been obtained below the First Fork, or in the first three miles and a half in length of the creek, in which bed-rock was found at a depth of a few feet. There is very little beach or side ground along this part of the creek, though an old higher channel, with good pay, is occasionally found running across points (as at the Gladstone claim). Several nuggets worth from \$90 to \$100 have been found. The yield of the creek is estimated at \$90,000 in 1885; \$170,000 in 1886, and \$90,000 in 1887.

RAPID TRANSIT, LOWEST RATES & DIVERSIFIED SCENERY BY THE CANADIAN PACIFIC.

Collin's Gulch, south side of Tulameen, opposite Otter River. Heavy gold found and a little work done; a small ravine only.

Cedar Creek, south side of Tulameen, above the last.

Slate Creek, south side of Tulameen, four miles from Otter River. Gold discovered in 1885. Work in progress since 1886. Gold coarse and associated with platinum.

Bear Creek, north side of Tulameen, one mile above last. Creek runs on bed-rock at mouth, and here a nugget worth \$320 was found. Above the mouth, ground deep and has not been bottomed. Much gold on the Tulameen below mouth of this creek, which appears to deserve further work.

In addition to these creeks there are four more, viz., Hine's Creek, Eagle Creek, Champion Creek, and last, but not least, Boulder Creek, which joins Otter River from the west. Most of the work done on this creek was in 1888, but it is still being worked near the mouth.

HALL'S PRAIRIE.

INCLUDING SYDENHAM—See also Surrey.

Hall's Prairie, a sub-division of Surrey Municipality, lies just north of the International boundary. The soil is mostly a clay loam and is high and dry. It is connected by road with Blaine district, 7 miles, and New Westminster district, 18 miles. Mr. H. T. Thrift runs a stage twice a week from Brownsville, carrying mails and passengers for Surrey Centre, Clover Valley and Hall's Prairie. Crops of all kinds grow abundantly, and the land being high, the seasons are earlier than in most of the districts. The opening of the New Westminster Southern Railway will materially benefit this section, as so far all communication is by wagon road.

HARRISON HOT SPRINGS.

Harrison Hot Springs are situated on Harrison Lake, five miles from Agassiz station. The drive from the lake to the station, or vice versa, is a lovely one, and the road is good. These springs are noted for their wonderful curative qualities, particularly for such complaints as rheumatism and dyspepsia. Below is a copy of analysis made for Prof. Selwyn, Director Geological and Natural History Survey of Canada, by G. Charles Hoffmann, chemist and mineralogist to the survey :

	Sulphur	Potash
	Spring	Spring
Temperature of Spring	150 F	120 F
Specific gravity	1001.13	1001.00
	(60° F)	(60° F)

Silica.....	4.634	4.102
	<hr/>	<hr/>
	90.048	81.200

At the lower end of the lake is the St. Alice Hotel and baths. This hotel has accommodation for 130 guests. A small steamer plies on the lake. There are also numbers of small boats. The fishing and shooting is excellent. Forty miles from the hotel are the ruins of the old town of Douglas, which was a flourishing business place during the Cariboo gold excitement, but now only a few Indians live there. Fifteen miles from the hotel a large mine of Sienna is being opened up. This Sienna has been pronounced by experts to be equal to the Italian Sienna. Many of the buildings in the neighborhood are painted with it.

The scenery in the neighborhood is very grand. The lake lies snugly nestled amongst the mountains, and is of that beautiful clear color peculiar to mountain water. The Glacier on Mount Douglas, 8,000 feet in height, is visible from the Hot Springs.

This district is rich in resources, and its future is unlimited. Besides the Sienna already mentioned, coal croppings have been discovered at Eagle Falls, but have not been properly prospected yet. Marble is found near the head of the lake. Gold is found in many of the creeks which flow into the lake.

THE CANADIAN PACIFIC PASSES THROUGH

THE MOST MAGNIFICENT CANYONS IN THE WORLD.

HOPE.

Hope, in the electoral district of Yale, is situated on a beautiful little flat of about 200 acres on the left bank of the Fraser River, opposite Hope Station. It is about 85 miles from New Westminster, and is practically the head of steamboat navigation on the Fraser, although occasionally steamers go as far as Yale. It was once a prosperous town, and is still of considerable importance, being the chief trading post for the hunters and miners going to the Similkameen and Rock Creek country. Silver ore has been discovered in the mountains near Hope, which promises to be very rich. The Eureka Silver Mining Company is located within seven miles of the town. Gold is also found. The town was visited by fire last summer and the two hotels both burned to the ground. These have been rebuilt; otherwise the town looks exactly the same as it did fifteen years ago. The Hudson Bay Company and Mr. James Wardle have each a store here. There is also a public school.

ILLECILLEWAET.

A station on C. P. R., 407 miles from Vancouver, has post office and telegraph station. The town is situated in a defile in the mountains. In the near vicinity are numerous quartz ledges which are being opened up, and which make promise to be very rich. The quartz is shipped over C. P. R. to Revelstoke and smelted there. The chief mine being worked at present is the ore owned by the Selkirk Mining Company. The galena from this mine is of very rich quality. Game and trout are very plentiful.

KAMLOOPS.

Kamloops, in the electoral district of Yale, is beautifully situated at the confluence of North and South Thompson Rivers, and is an important divisional station on the C. P. R., 252 miles from Vancouver. There were practically two towns, the old and the new, the latter being close to the depot, but they are now built into one. It is a distributing centre for the Nicola and Priest Valleys, and O'Kanagan and Spallumcheen country, which are the chief agricultural sections of the upper country. Extensive stock ranges abound in the immediate vicinity, the bunch grass being very nutritious. The Shuswap Milling Company have a saw and grist mill in full activity. Quite an excitement prevails over the recent discovery of rich quartz on the North Thompson River. The town is well supplied with churches, almost every denomination being represented. The climate is very dry, and healthy, fruit of all kinds does remarkably well. The writer had the good fortune to attend the Show held by the Inland Agricultural Association in October, 1890, and took some samples of fruit and grain to Eastern Canada, which were pronounced by experts to be equal in quality, and much superior in size, to any grown there. There is a good weekly paper, *The Inland Sentinel*, which has a very fair circulation. There are a number of first-class hotels in the town.

KETTLE RIVER.

INCLUDING GRAND PRAIRIE.

The Kettle River, which follows a general easterly course along the boundary line, is now fairly well settled. All kinds of fruit, vegetables and grain can be grown in abundance on the rich sandy loam composing the river banks, while the mountain

OCCIDENTAL HOTEL VANCOUVER, B.C.,

RATES:
\$1.00 to \$1.50 PER DAY.

sides are covered with luxuriant bunch grass. Game of all kinds abounds, and the Kettle River has long been famed as a trout stream. At the lower end of Kettle River, known as Grand Prairie, there is a thriving settlement, the farms and gardens being a credit to the energy and industry of the owners. Just within the international boundary line, Kettle River passes through a narrow gorge and falls of over 200 feet are formed. The land in the vicinity of these falls has been purchased with a view to utilize this magnificent water power for milling purposes. The surrounding country being well timbered, a thriving industry is likely to result in the near future.

KOOTENAY DISTRICT.

This district embraces the whole Columbia Basin in British Columbia. The geography is puzzling in the extreme. The Kootenay River rises (latitude $51^{\circ} 15' N.$) in the Rocky Mountains, and flows south into Montana and Idaho, passing the sources of the Columbia, its parent stream. The Columbia flows north (from lat. $50^{\circ} 12'$), forming a great bend beyond the Canadian Pacific Railway, and returning southward to a point 15 miles north of the International Boundary, there it receives the Kootenay tributary upon its return from the United States. There is thus an actual island six hundred miles round embraced in the great bends of the two rivers, and comprising the whole Selkirk and Purcell Ranges. East Kootenay consists of the upper Kootenay and Columbia valleys between the Rocky and Selkirk Ranges. Great Bend is the sweep of the Columbia north of the Canadian Pacific Railway round the northern end of the Selkirks. West Kootenay is the Columbia Valley from the Canadian Pacific to the International Boundary, and the Kootenay Valley from the return of the river from the United States to its junction into the Columbia. Kootenay Lake is comprised in this western valley of the Kootenay.

East Kootenay, the district lying between the Rocky Selkirk systems, is some 2,300 feet above the sea, and its valleys of the Upper Kootenay and Upper Columbia enjoy a fine dry climate, and are well suited for cattle raising. Open forests, fine timber, and benches covered with bunch grass, are the leading characteristics, and the climate and scenery make the district especially desirable for those making new homes in the west. At the principal town Golden, on the Canadian Pacific, there is being erected a smelting plant for treatment of the ores of neighboring silver mines in Mount Stephen and the Spallumcheen Valley, and these are expected to sustain a considerable population.

Donald is situated at C. P. R. crossing of the Upper Columbia and has a divisional terminus. A wide canal has recently been constructed by the Kootenay Valley's Company, connecting the Kootenay River with the sources of the Columbia, and here is situated the town site of Grohman.

Further down the Kootenay, and at the mouth of Wild Horse Creek, famous for the gold excitement of 1863, 1864 and 1865, when a thousand men were getting from one to three oz. a day to the hand, is Fort Steele and Galbraith's Ferry. This is the point of departure by the Moyea trail for West Kootenay. In Crow's Nest Pass, at the head of Elk River, there are fifteen seams of coal in one section, and some of them are very large.

GREAT BEND.—This region is an undeveloped mineral country of great importance, as shown by operations on the western portion round McCullough Creek. It is yet difficult of access and little known.

West Kootenay consists of two distinct regions. The first is the Columbia Valley territory to Revelstoke on the C. P. R., which is also at the outlet of the Illecillewaet Valley. Silver is the principal product, for besides the mines in the Great Bend country, heavy shipments may soon be expected from Illecillewaet, where there is a flourishing camp. Upon the Columbia are the beautiful Arrow Lakes, a body of water lying between the Selkirk and Gold Ranges.

145 miles south of Revelstoke and 15 miles north of the Boundary, is the outlet of Kootenay River. This river, after passing round its great bend through Montana

and Idaho, re-enters British Columbia between the Selkirk and Purcell Ranges, and then falls into Kootenay Lake, which runs northward some 65 miles. Half way down its course is the branch, called the West Arm, whence the Lower Kootenay descends by a series of five cataracts to the Columbia at Sproat's Landing. Upon Kootenay Lake are the Warm Springs and Hendryx mining camps, and at the former is the town of Ainsworth, with, at this time, a population of about 50. The camp has several hundred silver claims, most of which show remarkably fine prospects, and some are of exceptional promise. At the Hendryx camp is the Bluebell Mine, where two contiguous ledges of about 80 feet each are being prospected at an immense outlay, by Eastern capitalists. The Nelson Camp, in the West Arm, includes the magnificent Silver King Belt of silver claims on Toad Mountain, and the scarcely less remarkable gold belt on Eagle and Forty-Nine Creeks. Copper in large bulk has also been found, and the Queen Victoria claim has just been bonded for \$50,000 by Canadian Pacific Railway officials. Nelson, the central depot for this camp, has already about 40 houses and rapidly growing into a city. Sproat's Landing, above mentioned on the Columbia, will soon be a flourishing town, and the Canadian Pacific Company are now connecting it with Nelson by the first link of what will ultimately become the railway system of the Southern Interior. The Spokane Northern Railway is now heading for the boundary on the Columbia, and the Northern Pacific will probably build a line this year to near the boundary on the Kootenay, both with the design of tapping the silver camps on Kootenay Lake by means of steamboat connections.

The scenery on Arrow and Kootenay Lakes, and the splendid cataracts on the Lower Kootenay, no less than the almost unequalled fishing of the district, are well calculated to attract tourists.

Access may be had by steamer from Revelstoke on the C. P. R. to Sproat's Landing, and thence by pack trail to Nelson. The steamboat fare is \$7.00. The distance by trail is 20 miles, and saddle horses are to be had at moderate charges.

Access from Kootenay, Idaho, on the Northern Pacific, is by stage 32 miles, for \$3.00 to Bonner's Ferry, and steamboat thence to Nelson is 160 miles, for \$5.00. 50c. is the general charge for meals or bed. There is ample scope for profitable investment, but little for laboring men without means.

Postmasters—J. Gilker, Nelson; G. B. Wright, Warm Springs; T. A. Sproat, Sproat's Landing.

Recorders—H. Anderson, Warm Springs; T. H. Griffin, Nelson.

LADNER'S LANDING—See Delta.

LAKETON—See Cassiar.

LANGLEY MUNICIPALITY.

The municipality of Langley is situated on the left or south bank of the Fraser River, about seventeen miles from New Westminster. It has a frontage on the Fraser of ten miles and a depth of about nine. It is almost exclusively an agricultural district, and contains some really fine land. At Fort Langley the Hudson

SOLID TRAINS ACROSS THE CONTINENT

VIA THE CANADIAN PACIFIC RY.

Bay company have a store, and about 2½ miles from the Fort a large farm. The soil in the whole region is a rich loam on a clay subsoil. There are three post offices in the municipality, namely: Fort Langley, Langley Prairie and Aldergrove. It is also well provided with churches and schools. The district is well watered and well drained. Besides the Fraser River there are two small rivers, the Salmon and Nicomekl. These latter rise near the east of the municipality at points not far distant from one and another. The former, which flows northwest into the Fraser, near the Fort, drains the northern slope; the latter flows westerly into Mud Bay, draining the southern slope. Trout are plentiful in both these streams.

Fort Langley, as the steamboat landing is called, was in early days selected as the site for the capital of British Columbia by Colonel Moody, who afterwards changed it to New Westminster. Here the mails arrive daily, excepting Sundays and Mondays, while steamers call daily. There are several stores and hotels here, while within a short distance are a sawmill and a grist mill.

Just across the ridge from the Fort is the Salmon Prairie, which is supposed to be the old bed of the Fraser River, but which is now used as a pasture ground. It comprises some 2,000 acres. Water fowl abound here during the autumn and winter, affording excellent sport.

A few miles in the rear of the fort is Langley Prairie, the best agricultural belt in the municipality. It is well supplied with roads, schools and churches.

The farmers through this whole section are going largely into fruit raising. The climate is much warmer than on the coast, and both peaches and grapes ripen readily.

MUNICIPAL OFFICERS:

LILLOOET.

INCLUDING PAVILION.

In the district of Lillooet, is situated on the right bank of Fraser River, and is reached by stage from Ashcroft 50 miles, from Clinton 47 miles, and from Lytton, by trail, 40 miles. The stages make close connection at Clinton with those for Ashcroft and Cariboo. The valley is about six miles long by four in breadth. The famous Seton Lake is three miles south, the length of which is fifteen miles, and is within one mile of Lake Anderson, which is about seventeen miles in length. The agricultural land is very rich. Numerous quartz leads have been discovered, and a number of claims located. The climate is dry and healthy.

LYTTON.

Lytton is situated at the confluence of Thompson and Fraser Rivers, and is a station on C. P. R., 156 miles from Vancouver. There are a telegraph office and post office here. The dry climate of the upper country may be said to begin here. Fruit and melons of all kinds grow remarkably well, but the arable land is somewhat limited.

MAPLE RIDGE MUNICIPALITY.

PORT HAMMOND.

This important and extensive municipality is situated on the right bank of Fraser River, on which it has a frontage of 16 miles. It extends from Stave River on the east to Pitt River on the west. It is for the most part lightly timbered and easily cleared, but very little remains vacant. At Pitt river there are large prairies, known as the Pitt Meadows. These meadows comprise from 30,000 to 40,000 acres of level land, but are so very little above the level of the Fraser that they are subject to annual overflows from that river. This renders them worthless for anything but dairy purposes. Dyking has been tried to prevent the encroachment of the river, but so far without avail, as the sub-soil seems to contain so much quicksand that the water rises inside the dyke to the same level as the outside. A company received a charter for dyking these lands, but it expires during the course of the current year, and they have up to date accomplished little. The rest of the land in the municipality is high land, being a loam with a heavy clay subsoil. This clay makes a superior class

STEVESTON

LOTS FOR SALE.
BEST INVESTMENT IN THE MARKET.
 See Ad. on Page 4.

of bricks. Outside of the brickyards, agriculture and fruit growing are the principal pursuits. The land yields an abundant harvest, and the close proximity of the municipality to the markets of New Westminster and Vancouver renders it a very desirable place for the growing of small fruits. The Canadian Pacific Railway runs through the district, close to the water's edge. Trains both east and west stop here, and the steamers plying up and down the river all call, thus affording the best communication. There are three post offices in the municipality, viz., Port Hammond, Port Haney and Whonnock. It is also well supplied with both educational and religious advantages.

Port Hammond, 24 miles from Vancouver, 16 by rail, 12 by water, from New Westminster, has for some years been laid out for a town site. Lots have been changing hands at a figure ranging from \$100 to \$250 per lot, 66ft. x 120ft. A large boarding house has lately been erected, and Messrs. Lazenby Bros. have opened a large general store. Here are situated the money order office, and express and telegraph office for the whole municipality. About half a mile from the station are two churches, belonging respectively to the Church of England and Methodist denomination. There are also a school and town hall.

MUNICIPAL OFFICERS :

Reeve—W. J. Harris, J. P.

Councillors—John Callaghan, John McIver, John Stevens, Hector Ferguson, Thomas Haney.

Clerk, Assessor and Collector—D. C. Webber.

Postmaster—Arthur L. Lazenby.

MOODYVILLE.

Moodyville is situated on Burrard Inlet, just across from Vancouver. Years ago Messrs. Moody Bros. saw the importance of the place and erected very large sawmills here. These mills have been added to largely since then. The annual shipment of lumber from the Moodyville Sawmill Co. amounts to about twenty millions of feet, finding a market all over the world. There is a good hotel in the village, besides churches, schools and stores. The population numbers about 400, most of whom are employees of the Moodyville Sawmill Co.

MOUNT LEHMAN.

A farming district in the Electoral District of New Westminster, is situated on the left bank of the Fraser River, thirty miles above New Westminster, with which it has daily communication by boat. The country is very hilly and comparatively heavily timbered. It has a good road system and a plentiful supply of water. A wagon road connects it with the Yale and New Westminster wagon road. The soil is a rich clay loam, and when once cleared yields magnificent crops, but owing to the rolling nature

of the surface, is more adapted to fruit and grazing than for grain growing. It has a good school and is well supplied with religious services. Strawberries grown at Mount Lehman took the prize in New Westminster.

MUD BAY.

SEE ALSO ELGIN AND SURREY CENTRE.

Country post office in municipality of Surrey at junction of Semiamho, Kirkland and McLellan roads. Includes part of Mud Bay flats and highland on north side. There is some very fine alder bottom and maple land in the district. At the base of the highland, are to be found very fine springs of water. For general description see Surrey.

THOMAS WELSH, Postmaster.

NEW CALEDONIA.

The New Caledonia District is one of the largest of the Hudson Bay Co.'s trading districts, being upwards of 300 miles square. It comprises part of three electoral districts, viz, Cariboo, Cassiar and New Westminster. It includes most of that district commonly known as the lake country.

The resources of this district are confined to peltries and gold. The amount of furs procured annually is very much less than in former times, owing to the fact that the country has been burned over so frequently of late years. It is now hard to find any extent of country that has not been burned over quite recently. If the government does not take active measures to prevent Indians and others from allowing fires to spread, the whole country will be ruined so far as timber and furs are concerned.

Gold is found on the Fraser, Parsnip and Nechaco rivers, and in the Finlay branch of the Peace river. The whole of the northeastern portion of the district is considered auriferous, and no doubt the near future will see many new mines developed.

Fort St. James on Stuart's Lake, about a mile from its outlet, is the head post of the district. The fort is built on rising ground and commands a beautiful view of the lake and surrounding mountains. Agriculture here has always been fairly successful, but has been confined to barley, oats, potatoes and vegetables. Wheat has been tried, but with no measure of success.

Fort George, at the junction of the Nechaco with the Fraser, is the most southerly post. Here is an Indian village in the vicinity. Farming operations are here conducted on about the same scale and with the same measure of success as at Fort James.

Mr. Charles Ogden is the officer in charge of the Post. There are no white residents.

Fort Fraser is another post on a lake of the same name. There are two Indian villages but no white residents. Good crops of barley, oats and potatoes are raised, the company wintering most of their horses and mules here. Mr. William Sinclair is in charge of the post.

Stony Creek Post is situated about 30 miles east of Fort Fraser. It is a post of

little importance, as the country around it has been hunted and trapped over so much that the furs are quite exhausted. There are two Indian villages, but no resident whites. Nothing in the way of farming can be done here, owing to the frequency of summer frosts.

Fort McLeod, on McLeod's Lake, was once a very good fur post, but furs are now very scarce. The waters of this lake find their way to the Arctic ocean by way of the Peace River. Mr. E. S. Peters is in charge of the post.

Fort Connolly, on the lake of the same name, is situated among the mountains, and is somewhat inaccessible. There are no residents, either Indian or white. The post is visited periodically by a few Siccanies and Atnas. The trade is inconsiderable. The salmon ascend to this place, and form the main subsistence of the Indians, and it may be said that the salmon form the main subsistence of all the Indians in the whole district, except those who hunt on the last of the divide. Mr. T. R. Alexander is at present in charge of the post.

Fort Babine, on the north end of Babine Lake, has no white residents, excepting the officer in charge, Mr. Angus McIntosh. The waters of this lake find their way to the Pacific Ocean by the Skeena River.

There is no postal system through this district, letters only being conveyed occasionally by the H. B. Co.'s pack trains. There are no roads, only trails, made for the pack horses. Most of the miners who frequent the Omineca winter elsewhere. There is some excitement just now concerning a new creek near Vital creek.

NEW WESTMINSTER JUNCTION.—See Port Moody.

ALONG THE C.P.R. IS THE TOURIST'S PARADISE.

NICOLA LAKE.

In the Dominion electoral district of Yale and Kootenay and Province of Yale, distance 50 miles from Spence's Bridge and 60 miles from Kamloops, and is reached by stage from both places.

The Government office for Nicola division is located here, with a commodious hall, court house and lock-up.

There is a Presbyterian church, a first-class roller grist mill, with a capacity of 36 barrels per day, and an extensive lumber yard. There is also an hotel (The Driard) and a private boarding house.

NICOLA VALLEY.

INCLUDING COUTLIES AND STUMP LAKE.

Nicola is centrally located, being distant from Kamloops 60 miles, Spence's Bridge 48 miles, Hope 80 miles, Granite Creek 60 miles, Semilkameen 60 miles.

A good and well-kept waggon road extends from Kamloops to Spences' Bridge, and is improving wonderfully, passing through nearly all of Nicola Valley.

OCCIDENTAL HOTEL

VANCOUVER, B.C.,

RATES:

\$1.00 to \$1.50 PER DAY.

A mail coach makes weekly trips over the entire route as follows:—Clark's Express leaves Kamloops with mails, express and passengers every Monday morning, and reaches Nicola Lake Post Office at night; on Tuesday proceeds to Spence's Bridge; returns from Spence's Bridge to Nicola Lake every Thursday, arriving at Kamloops on Friday evening.

The mail service on this route is well equipped, passenger rates, etc., are moderate. The line is provided with good horses and comfortable coaches.

The Post Office facilities in Nicola Valley are first class.

There are five offices in the Valley—Lower Nicola, Coutlies, Nicola Lake, Quilchenna and Rockford.

Douglas and Minnie Lakes mails are dropped at Quilchenna office. Nicola Lake and Coutlies are money order offices.

Lower Nicola is a thriving little settlement, contains two general stores, public school, saw and grist mill.

Its surroundings are pleasant; white population; farmers and stock raisers; a large Indian reservation is adjacent.

Lower Nicola is the forwarding point of Granite and Princeton mails.

Coutlies is a centre of importance; has a large general store (Blair & Co.): good hotel, blacksmith and butcher shops.

Coutlies is surrounded by large agricultural, pastoral and mining interests. coal deposits in immediate vicinity are extensive; the article is pronounced excellent by competent authorities; the deposits are to be developed shortly, which will be the cause of large trade and good business in general throughout the district.

The quartz ledges are being developed, and the prospects are that this will be quite an important branch of the mineral line in this district.

Nicola Lake has, so far, been the chief centre of the district; contains a large general store, kept by A. E. Howse; in connection with the store is a lumber yard, and portable steam saw mill, planers and other modern attachments. Mr. Howse has under way, and will shortly have completed, a first-class roller grist mill, with a capacity of 36 barrels per day. It is furnished with the most improved machinery that could be procured. It is not only an improvement, but will be of great benefit to the people of Nicola.

The Government Land Office, Court House and jail are located here; church, public school, hotel and private boarding house, blacksmith, carpenter and butcher shops; Chinese laundry and baker shop; Presbyterian and Methodist parsonages, besides a number of imposing and comfortable private residences.

Quilchenna is the distributing point of Minnie and Douglas Lake. It is the headquarters of the cattle men. Stump Lake has attained public notoriety through the rich quartz leads found there. The London Nicola Mining Company are expending large sums of money in testing the extent and character of the ore found in their property.

Nicola has always been known as a stock raising centre. Its position renders it

of great importance as a meat producing district, and is accessible at all times of the year. Agricultural pursuits have so far only been followed to supply local wants, hardly doing that, though roots, cereals and fruits do well.

NORTH-WEST COAST.

The North-West Coast district, as it is commonly called, includes all that immense stretch of our northern coast line extending from Alert Bay on the south to the Alaska boundary line on the north. It belongs, properly speaking, to the Skeena division of the electoral district of Cassiar. It is a section of the Province of British Columbia, which at no distant date will become one of the most important wealth-producing portions of the Dominion, having unlimited possibilities of expansion in fisheries, timber and the products of the mine. As yet the only industry to which attention has been particularly directed, is the canning and salting of salmon, which has wonderfully increased during the past two years; the pack last year having exceeded one hundred and twenty thousand cases.

The waters of the coast teem with fish of almost every description; the most important, so far as known, being the halibut, skit, oolaban, herring and dog-fish. During last year no less than six American schooners were reported on the halibut banks in Queen Charlotte Sound and Hecate Strait, they being engaged in salting the

To Travel in Luxury Take

THE CANADIAN PACIFIC ROUTE.

fish and conveying them to the San Francisco market, where they find a ready sale. This being a profitable business, and our Government not thinking it necessary to keep a cruiser on the Pacific Coast, these schooners continue to poach on the banks with impunity.

The skit fisheries were carried on continuously during last year on the west coast of Moresby Island, Queen Charlotte group. About one thousand barrels of fish were salted, but there does not seem as yet to be any market for them. As a food fish there is not the slightest doubt that the skit or black cod is second to none.

There is, so far, only one dog-fish oil refinery in operation, that of the Skidogate Oil Company on Graham Island, managed by Mr. Robert Tennant. Another one is in contemplation to be erected by a well-known Victoria firm on Bank's Island in connection with a salmon cannery. A ready market is obtained for all the oil at present manufactured.

The salmon canning industry is very extensively carried on at Naas and Skeena Rivers; also at Lowe, Smith, Gardiner and Rivers Inlets.

The timber consists principally of spruce, red cedar, hemlock and yellow cedar or cypress, the latter being especially prized for finishing lumber and turnings, on account of the beautiful polish it takes. There are only three small water-power saw mills located on the coast, and they are all constantly employed in turning out box lumber and other material for the various canneries.

The means of communication are anything but satisfactory. There is no mail contract let, the C. P. N. Co. being paid by the postal authorities at so much per trip for carrying the mail. It is no uncommon occurrence during the winter months for a period of six or seven weeks to elapse between mails, but in the summer season they arrive about once a fortnight. The C. P. N. Company despatch a steamer to Naas and way-ports about twice a month, extending their trip to Queen Charlotte Islands if sufficient inducements offer. The "Old Reliable" of the Northern Coast, the steamer "Boscowitz," under the careful command of Captain Williams, the veteran steamboat man of the coast, can be always depended upon for two trips per month. These steamers call regularly at Alert Bay, Rivers Inlet, Bella-Bella, Skeena, Metlakahtla, Fort Simpson and Naas River in the order named, and occasionally at Smith's Inlet, Gardiner's Inlet and Queen Charlotte Islands. Communication with Lorne Croeks, Forks of Skeena and Omineca is kept up by canoes during the summer months, but during the winter the river is frozen over and consequently there is no traffic from November till the first of May.

OKANAGAN and OKANAGAN MISSION.

These districts, in the electoral district of Yale are reached from Kamloops by stage, distance 100 miles, or by steamer from Sicamous to Enderby, and thence by stage. This valley is one of the best in British Columbia, and many fine farms and stock ranches are to be found here. The valley is over 75 miles long, extending from the head of Okanagan Lake to the fort, at the mouth of Okanagan River. The opening of the Shushwap and Okanagan railway will be of great importance to this region, as it will give good means of transshipping the products, which has hitherto been very expensive. The mission is the Roman Catholic Centre of the upper country.

OSOYOOS LAKE.

The port of entry for the southern boundary, the international line crossing the lake. Osoyoos Lake is the lowest lake in the interior of British Columbia, being only 700 feet above sea level, the spring and fall being the most delightful season of the year. The Haynes' stock ranch, extending from the boundary line some twenty miles up the Okanagan river, embraces some fine meadow land, which yields annually tons of natural hay. At the narrows, a bridge crosses the lake, here Mr. Theo. Kruger has a store and hotel. Osoyoos being the centre of the main lines of travel between Washington and British Columbia, is destined to become, on completion of railroads now in course of construction, an important place, the beauty of its surroundings and its unrivalled climate making it peculiarly adapted to those in search of health and recreation.

PAVILION—See Lillooet.

PENTICTON.

Situated at the foot of Okanagan Lake, is one of the most picturesque spots in the interior. The famous stock ranch of Thomas Ellis, Esq., includes the land on the east side of Okanagan Lake and river for some miles; while the West side of the river is occupied as an Indian reservation. A steamer makes regular trips between Penticton and Vernon, a distance of some eighty-five miles, and a ride on the beautiful Okanagan Lake has to be experienced to be appreciated. The mountains surrounding the Lake are famous for all kinds of game, deer especially being numerous, while the Lake itself, teeming with magnificent trout and the resort of numberless wild fowl, makes a veritable paradise for sportsmen. On the completion of the Shuswap and Okanagan Railroad it will be possible to make the trip between Pen-

POPCUM.—See Chilliwack.

PORT ESSINGTON.—See North-West Coast.

PORT HAMMOND.—See Maple Ridge.

PORT HANEY.

Port Haney, in the Electoral District of New Westminster, forms part of the municipality of Maple Ridge. It is situated on the right bank of Fraser River, 13 miles by water, or 18 miles by rail, from New Westminster, and 26 from Vancouver. It is a flag station on the C. P. R., and has daily communication by water with New Westminster, the steamers running up and down the river calling there. It is a very important point on the river. Here are situated three large brick yards, owned respectively by Messrs. Becket & Co., Sinclair & Purdy. About 150 men (principally Chinamen) are employed here. Large sheds have been erected, under which the brick are manufactured, burned and stored. There is an unlimited and inexhaustible supply of clay, which, by experts, is pronounced to be equal in quality to the celebrated English pottery clay. These brick are all made by machinery, some being pressed and cut by wire, others being machine moulded. The repressed brick made here is quite equal to the imported Santa Cruz brick, and has the advantage of being much lower in price. Vancouver and New Westminster form the chief market for these bricks, which sell in the yard at from \$8 to \$12 per thousand, the repressed being worth \$22. These yards have a railway siding to facilitate loading.

Mr. Samuel Robertson, of Port Haney, is supposed to have the largest bearing orchard in British Columbia, having over 25 acres, from which he gathers an immense crop. There are two stores, two hotels, post office, school and two churches at Port Haney. Besides brick making, fruit raising and farming, there is another very important industry, viz., salmon freezing. The Fraser River Freezing Company has a large establishment here for freezing salmon, employing about twenty hands during the summer months of July and August and part of September. The salmon are laid on wooden trays and enclosed in the receiver, where they are exposed to an icy blast from a refrigerator. They are then packed with ice and stored until the winter, when they are shipped East, Winnipeg, Toronto, Montreal and New York being the chief markets. The capacity of the concern is 150 tons of frozen fish.

Two miles from Port Haney the C. P. R. Co. have a party of men prospecting for coal.

PORT KELLS.

INCLUDING BARNSTON ISLAND AND ANNIEVILLE.

Port Kells is situated on left bank of Fraser River, about 10 miles above New Westminster. A town site has been laid out there and lots are now on the market.

OCCIDENTAL HOTEL, VANCOUVER, B.C.

RATES
\$1.00 to \$1.50 per day.

The town site is situated on a slightly elevated plateau gently sloping towards the Fraser River and Serpentine flats. It is partly in the municipality of Surrey and partly in Langley. There is daily communication with New Westminster and other points on the Fraser, and will have a station on the New Westminster Southern Railway, which is now about completed.

An immense deposit of iron ore has been discovered. This ore has been analyzed and is said to be hematite and limonite of the best quality. So far nothing has been done towards working this mine.

At Annieville, a mile or so below Port Kells, is a large brickyard. The proprietors of the brickyard intend going fully into the manufacture of Pottery, as the clay there is of the very best quality, experts claiming that it is equal in quality to that used in the great potteries in England.

The land is lightly timbered in the whole vicinity.

A school house is to be built immediately.

Port Kells is connected by waggon road with the main waggon road of the New Westminster district, namely, the Yale and New Westminster trunk road, over which in early days all the Cariboo freight was carried.

A bridle path also, called the "Telegraph Trail," connects it with Langley.

PORT MOODY.

INCLUDING NEW WESTMINSTER JUNCTION.

Port Moody is situated at the head of Burrard Inlet on the line of the C. P. R., 12 miles from Vancouver. By the road, it is six miles from New Westminster. It was formerly the terminus of the Canadian Pacific Railway, and as such made a great boom. Property rose to a very high figure and some good buildings were erected. When the terminus was moved to Vancouver, Port Moody dwindled down in population. The bay is navigable for shipping of the largest tonnage and affords good anchorage. However, even though Port Moody is not the terminus, it is still and always will be a thriving little place. It is the centre of a large lumbering business, and has considerable farming country tributary to it. At Barnard, about three miles below Port Moody, Messrs. Ross, McLaren & Co. have erected a large saw mill. Port Moody has now become quite a fashionable summer resort and watering place for the people of New Westminster. Being at the head of a long inlet, the water gets quite warm, affording excellent bathing, of which due advantage is taken.

There are two hotels, one store and a good school. At New Westminster junction, where through passengers change cars for New Westminster, there is one hotel, called the Junction Hotel, and a good farming country. There is good fishing and hunting all through this district.

Junction Hotel, Situated at New Westminster Junction.
 Headquarters for Sportsmen and Tourists.

PRINCETON.

Princeton, in the Yale electoral district, is in the valley of the Similkameen River. Below we give some extracts from Professor Dawson's reports of the mineral wealth of British Columbia.

Stock raising is the principal business in this valley, but some little mining is going on.

In 1866, a little excitement occurred, and forty or fifty Chinese went in to work on the Main River. After this the river was almost abandoned for some years, but in 1882 mining revived, and a few Chinese have been at work, scattered along the river from Vermilion Forks to the 49th parallel ever since. Work confined to river bars and low flats bordering the river. Gold all sealy or fine.

Ashtinoulon River, joining Similkameen from the south; scale gold found, but Indians object to its being worked.

Siwash Creek, or Five Mile Creek and Wolf Creek, prospects obtained.

SOUTH FORK OF SIMILKAMEEN.—Gold discovered by Government prospecting party under Mr. Allison in 1860, and whites and Chinese have been working off and on ever since. \$10 to \$20 a day to the hand obtained occasionally in early years on bars.

Whipsaw Creek, worked since the discovery of gold on the south fork, Skagit River. Prospects found in early years. Nine-Mile Creek, a tributary of the last, and heading near Granite Creek, worked for a mile or two from mouth.

TULAMBEEN OR NORTH FORK OF SIMILKAMEEN.—Some work done on this river as early as 1862, and though nearly all the white miners were drawn away to Cariboo about that time, it is nearly certain that Chinese have been working off and on ever since. Working resumed by whites as well as Chinese about nine years ago. River proved rich from mouth up for about two miles, and paying work still in progress at various places all the way up to two miles above Eagle Creek, 23 miles from mouth. Gold often coarse.

Platinum and native copper are found. It is thought that the extensive benches

in the angle between the Tulameen and South Similkameen would pay for hydraulic work, but it is difficult to obtain water for this.

Pellets of silver-glance, strung through with gold, have been found in sluice boxes above Otter River."

QUESNELLE.

Quesnelle, in the Dominion Electoral District of Cariboo Lillooet, and provincial of Cariboo, is beautifully situated at the confluence of the Quesnelle and Fraser Rivers; and is reached by stage from Ashcroft, distance 225 miles. There are two large stores, not including Chinese. The Hudson Bay Post makes Quesnelle a centre for collecting furs from all the surrounding districts. The Chinese are somewhat numerous, and work bars for gold on both rivers. The farmers around and below Quesnelle raise all the produce consumed by the miners about Barkerville. Messrs. Reid & Johnston's flour mill is situated across the Quesnelle river, from and to the south of the town.

QUESNELLE FORKS.

Quesnelle Forks, in the Dominion Electoral District of Cariboo and Lillooet, and provincial of Cariboo, is reached by a good Pack Trail from 150 Mile House, Cariboo wagon road, distance 60 miles. There is also a good Pack Trail from Soda Creek, distance 54 miles. Quesnelle Forks was one of the first mining camps in Cariboo District, the camp being established in 1859, and there has been continuous gold mining in the South and North Forks, as well as on the main Quesnelle river up to the present time, the Chinese, being the principal miners for the last twenty years, have, to a great extent, worked out the surface diggings, but the immense gravel hill along the rivers have not yet been prospected for hydraulic mines, as the amount of capital necessary to bring water to these places is beyond the means of the ordinary gold miner. Nor has the bed-rock ever been reached on any of the streams in this section, although good pay has been found upon the surface on nearly every stream, while the main Quesnelle, as well as both forks, have yielded large amounts of gold for the last thirty years. Also Keithly and Harvey Creeks, which empties into the North Fork Quesnelle, have been continuously worked during the same time, as well as Snowshoe Creek, "which is one branch of Keithly Creek." All these creeks head in the great Snowshoe Mountains, and gold has been found in paying quantities quite up to the heads of these creeks, and still the mountains, with their vast quartz ledges, "of which there are many in plain sight," remain unoccupied, and are yet to be prospected. In a section of country that has given so much gold for such superficial work as has been done, for the methodical workman, with capital to back him so as to bring water to wash away the gravel hills, or with proper machinery and appliances to get to the bottom of the rivers and to bed-rock in the deep ground, profitable results would be almost certain.

REVELSTOKE.

AT ONE TIME CALLED FARWELL.

Revelstoke, in the Dominion Electoral District of Yale and Kootenay and provincial of Kootenay, is situated about 1½ miles from the station (a railway divisional point) on the Canadian Pacific Railway, distance from Vancouver 381 miles, from Montreal 2,524, altitude 1,475 feet. A new town is fast springing up adjoining the railway station. It is a supply centre for the West Kootenay district. The Columbia River Transportation Company's steamer makes regular trips to Sproat's Landing at the mouth of the Kootenay, calling at Hot Springs and Deer Park. The Columbia is navigable southward to the International boundary, 200 miles, and expands into the Arrow Lakes about 12 miles below Revelstoke. The famous Toad or Mineral Mountain is reached by the steamer, which passes within 26 miles. The hotel accommodation is excellent—two—the Victoria and the Central being located in the old town, and the C. P. R. Boarding House in the new.

RICHMOND MUNICIPALITY.

This municipality in New Westminster District includes the islands at the mouth of the Fraser River, known as Lulu Island and Sea Island, together with all the small islands contiguous to these two. It has been a municipality since 1880. It embraces an area of about 30,000 acres of land, of which every foot is the best agricultural land. The soil is a sediment, in most places covered with a black vegetable deposit and yields immense crops. Oats is the staple grain crop, though considerable barley is also grown. Oats will average about 70 bushels per acre, although there are instances of 120 being grown. This land is all level, and requires both dyking to keep the water off, and thorough ditching to draw off the water already on. The first crop from a field will hardly pay for the trouble, but after that the yield is immense. Very little timber of any kind is found in the municipality, and that is in clumps. Root crops of all kinds yield abundantly. Fruit does well, but has not been grown to any great extent. Mr. O. D. Sweet has 15 acres in orchard, which is just beginning to bear. Two new bridges have been built, connecting Lulu Island and Sea Island with the mainland. They are magnificent structures, built by the San Francisco Bridge Company. The two are only a few hundred yards apart; one connects Lulu Island with Sea Island, and the other crosses from Sea Island to the main land. Both have a swing bridge for the accommodation of steamers. There are good roads all through the municipality. On Lulu Island three roads traverse the island from north to south, and three roads run east and west. On Sea Island one road runs lengthways of the island and one crossways, all connecting with the bridges. From the end of the Sea Island bridge, a splendid wagon road runs straight through to Vancouver, which forms the chief market for this district. There are seven canneries in the municipality: Ewen's cannery, D. J. Munn & Co., English & Co., Duncan & Batchelor, Garry Point Canning Co. (Windsor & Hobson), and the Richmond and Beaver canneries, owned by J. H. Todd & Son. During the season these give employment to a large number of men, principally, however, Chinese and Indians.

There is no land left unowned in the municipality, and it all commands a high price. Unimproved lands sell at from \$25 to \$100 per acre, while the cultivated land is held as high as \$300 per acre. There are four post offices in the municipality, called Steveston, Lulu Island, Sea Island and North Arm. These names give rise to a great deal of confusion. Lulu Island post office is on the south side of Lulu Island, about three miles above Steveston. Sea Island post office is on the north side of Lulu Island, but very few of the Sea Island people get mail at that office. North Arm post office is on the mainland, and supplies mail to Sea Island, the North Arm settlement

ONLY \$30.00 TO BANFF HOT SPRINGS AND RETURN

Including Stop Over at Glacier, Field and Harrison Springs.

and west end of Lulu Island. A petition has been forwarded to the Dominion government to change the names of these offices. They wish the Lulu Island office to be called London, Sea Island office, Sweet, and North Arm, Eburne, each office being called after the postmaster.

The district is well supplied with both schools and churches. A company are proposing to build an electric railway from Vancouver to Steveston, thus traversing the whole length of the municipality. Should this be done it will materially benefit the settlement, although at present they have good communication. Stages run twice a day from Steveston to Vancouver.

For directory of this municipality see Steveston, Lulu Island, Sea Island and North Arm.

MUNICIPAL OFFICERS:

Reeve—J. W. Sexsmith.

Councillors—J. F. Errington, B. W. Garrett, George E. Magee, John Blair, James Whiteside.

Clerk, Assessor and Collector—O. D. Sweet.

RIVERSIDE.

INCLUDING ABBOTSFORD.

Riverside is situated on what is known as Matsqui Prairie, comprising about 10,000 acres of meadow land, which is all dyked. A large portion of this land was utterly useless without dyking, and a company called the Matsqui Dyking Company obtained about 6,000 acres from the government and an assessment from the settlers for building the dyke. This work is now completed, and will be handed over to the settlers during the course of this year. The Dyking Company will sell their land in small farms of 80 or 100 acres, so that in a couple of years this will be a flourishing settlement.

Abbotsford, a new town site, has been laid off in this district, and lots are now in the market. It is on the crossing of the Mission extension of the C. P. R. and the New Westminster and Yale wagon road. The site has been cleared. Messrs. Rand Bros. of Vancouver are the agents for the property.

Riverside was formerly known as Matsqui, and mail came there for both sides of the river, but when the C. P. R. was built, and the mail was left at the mission, that office took the name and paraphernalia of the Matsqui office. This causes considerable inconvenience to strangers.

Grapes do remarkably well on the high land.

ROCK CREEK.

Rock Creek is one of the old mining camps of British Columbia, having been worked more or less for the last thirty years, and like all mining camps has experienced many vicissitudes, having seen a population of 1,500 men dwindle down to a few Chinamen. At present the "Laura Hydraulic Company" are mining the benches at the mouth of the creek in a very thorough manner, and as the ground is paying and the claims extensive, these operations are likely to continue for some years. The company have also erected a very complete saw-mill, and there is a hotel where suitable accommodation can be obtained. The now well known Camp McKinney is situated about twelve miles from here. Large amounts of money have already been expended on some of the claims, and with the advent of machinery a permanent and prosperous camp is likely to be established.

ROCKFORD.

Rockford, in the Electoral District of Yale. The Nicola and Star Mining and Milling Company are developing their several claims, the principal, the Star, is turning out large quantities of fine ore. A tramway runs down the inclined shaft, over which trucks are run, bringing up the ore to the surface.

The Tubal Cain, the Joshua (acknowledged to be the best developed mine in British Columbia), the ore being very rich, composed of sulphurates and lead, carrying gold, silver and gray copper), the King William, the Planet, and many others. The mines are beautifully situated on the shores of Stump Lake, and everything tends to a prosperous and paying quartz mining camp. A large number of Italians are employed.

SAVONAS.

Savonas, originally called Savonas Ferry, is situated on Kamloops Lake, at the mouth of Thompson River, and is a station on C. P. R., 227 miles from Vancouver. The scenery is beautiful, while fishing and hunting in the neighborhood are very good. There are some good farms, or, as they are called, ranches, in the neighborhood.

SIMILKAMEEN.

The Similkameen River, rising in the Cascade Mountains, flows in a south-easterly direction, emptying itself into the Okanagan River, in Washington, a short distance below Okanagan Lake. The valley, which is in British Columbia, is now well settled, and the principal industry, stock raising, is successfully carried on. Messrs. Causton, Richter, Barcelo, Daly, Coulthard and McCurdy, being among the most prominent gentlemen engaged in that business.

At Keremos, at the head of the valley, Mr. Barrington Price has a flouring mill and store. All kinds of fruit and grain grow in perfection; the land a sandy loam, producing, with irrigation, abundant crops.

Several apparently valuable quartz ledges have been discovered in this vicinity, and in the range of mountains dividing the valleys of the Similkameen and Okanagan the new and promising quartz camp, recently named "Fairview," is situated some seven miles above Keremos: the Ashnola River enters the Similkameen, the adjoining mountains being the home of the "Big Horn," who are at times seen in bands of more than one hundred. During the last few years these hunting grounds have been visited by sportsmen, and many fine heads have been taken as trophies to the Old Country and the East.

STEVESTON.

SEE ALSO RICHMOND.

Steveston, in the Electoral District of New Westminster and municipality of Richmond, is situated on Lulu Island, near the mouth of the Fraser River. There is

a daily mail service, excepting Sundays, and all boats running to New Westminster call there. Stages run twice a day to Vancouver, a distance of 12 miles. There are three salmon canneries, a first-class hotel, four general stores, seed store, wagon shop, furniture factory, butcher shop, large opera house, two livery stables and music store besides private residences. A half-mile race track has been laid out, and the British Columbia Jockey Club has arranged to take it over, as it is considered to be the best track on the Pacific Coast. A new wharf has just been completed, having 26 feet depth of water at low water, and is large enough to accommodate any vessel. There are a number of very fine farms in the immediate vicinity. Messrs. M. Steves & Sons, farmers, make a specialty of raising and dealing in pedigreed stock, Holstein cattle, Suffolk Punch horses and Berkshire pigs being their favorites. Mr. W. H. Steves, the owner of the town site, is a prosperous farmer and seed merchant. From its situation and shipping facilities Steveston will develop into a town of some importance. At present the water supply comes from the Fraser River, but the residents are negotiating with an Eastern firm to bore Artesian wells, as experts declare an abundance of water. A large number of lots have been bought there on building conditions, and even now, owing to its being the headquarters of the fishing operations, it is a very busy and thriving little place. Many of the fishermen live in house boats, which they move from place to place, but as most of the fishing is done at the mouth of the river, this is the most convenient place for them to live. In the summer they fish for salmon, and in the winter for salt water fish, finding a ready market in New Westminster and Vancouver.

SUMAS.

In the Electoral District of New Westminster, forms part of the municipality of Chilliwack. The land is mostly low and flat, and suffers from annual inundations of the Fraser River. At Miller's Landing the river has by degrees been washing away the land, and threatens to change its course. The Vedder Creek, a turbulent and rapid mountain river, flows through Sumas. The land all requires dyking, but so far, no active steps have been undertaken to accomplish this end. The farmers are largely dairymen, as dairying suits the land better than cropping it. If, however, it was once thoroughly dyked, it would prove inferior to no place in British Columbia. There are some fine orchards in the district.

SURREY MUNICIPALITY.

This municipality is a very large one, containing 120 square miles. It runs from Fraser River to the International boundary, and from the municipality of Langley to the coast and municipality of Delta. The New Westminster Southern Railway, now almost completed, runs from north to south through this corporation, passing from Brownsville to Blaine, through Port Kells, Clayton, or as it was formerly called, The Serpentine Flats, Surrey Centre, Clover Valley, Hall's Prairie and Kensington Prairie. This road will prove of great benefit to Surrey, as it will make an easy communication with both the Sound Cities and New Westminster. This whole district has made wonderful strides during the last two years. There are now five school districts, viz., Mud Bay, Clover Valley, Hall's Prairie, Kensington Prairie and Port Kells, each having a good school house and resident teacher. There are seven post offices, viz., Mud Bay, Elgin, Hall's Prairie, Clover Valley, Surrey Centre, Clayton and Port Kells, with mails twice a week. The road system is good, and is being improved yearly. Lumbering is carried on extensively, and a saw-mill and feed crusher has lately been started in Clover Valley or Nicomekl river. The soil is very fertile. There is every indication that at one time the Fraser River ran through the Serpentine Flats and along the basin to Mud Bay, this flat being gradually filled up, and now it is one of the most fruitful valleys in British Columbia. At Blaine, two town sites have been laid out, one to be called Blaine and White Rock, respectively, but so far but little has been done towards building. During the summer of 1890 a dyke was built from Blackie's Spit on the Surrey side to the high land opposite, which will

OCCIDENTAL HOTEL VANCOUVER, B.C.,

RATES.
\$1.00 to \$1.50 PER DAY.

prove a great boon to all the settlers in the Mud Bay Flats, and will reclaim a large tract of land hitherto worthless.

The whole district is well watered. Besides the Fraser River, the Serpentine and Nicomekl River flow through the valley, nearly its whole length. As the land on the banks is level and little above ordinary high tide mark, the tide ebbs and flows in the rivers. This makes it very convenient for traffic, as freight can be taken down the river on a scow or lighter with one tide, and the empty vessel brought back on the next tide. A scheme has been projected by which a canal will be cut across the Delta from Mud Bay to Fraser River, a distance of five miles, which, if done, will give easy water communication with New Westminster. The drawback to the outer districts of Surrey is the distance from market, as up to date, freight and produce have to be hauled on wagons to Brownsville, opposite New Westminster, in some instances over twenty miles, so that this canal, if successfully carried out, will prove a great step towards the further advancement of the district.

Surrey is also well represented in church matters, having regular services by Church of England, Presbyterian and Methodist ministers. There is also an agricultural association with a good, strong membership.

Comparatively little land still remains vacant, but farms can be bought at a reasonable figures. The population is estimated at 1,600 souls.

For information and directory of the different portions of Surrey see Mud Bay, Brownsville, Elgin, Blaine, Hall's Prairie, Clover Valley, Surrey Centre, Clayton and Port Kells.

MUNICIPAL OFFICERS:

Reeve—James Punch, res. Brownsville.

Clerk and Collector—H. T. Thrift, res. Hall's Prairie.

Councillors—Joseph McCallum, res. Clayton; John Douglas, res. Brownsville; John Armstrong, res. Mud Bay; Edward Parr, res. Elgin; William Brown., res. Hall's Prairie.

SURREY CENTRE.

(SEE SURREY.)

This portion of Surrey embraces that section round the junction of the Coast Meridian Road and the McLellan Road. It is a rolling section of country, but all the land is good. It is watered by the Serpentine River. There are some very fine farms here.

Lake is on a level with the Fraser, consequently high water in the Fraser raises the water in the lake. So far no practicable scheme of dyking has been tried. The New Westminster and Yale Waggon Road formerly went through this settlement, but now terminates at the lake, as the high water has washed away the road in places, and through neglect the bridges have become unsafe. For some eight or ten miles the lake, lies close at the foot of the mountain, and the road was cut out below high water mark. It is even now passable on horseback in summer, but the way is fraught with many dangers and difficulties.

Most of the farming done is dairy farming, as the produce is more readily shipped.

VANCOUVER.

Vancouver is situated on Burrard Inlet and False Creek, both of which are arms of English Bay. Burrard Inlet has also two arms, one of which stretches inland some twelve miles. False Creek would try to make you believe it did likewise, but being "False" it ends very abruptly, just after making it necessary to go to the expense of bridging it over. These arms of water give to Vancouver a most enviable position. It gives it unsurpassed facilities for drainage. It renders all parts of the city easy of access by water, as well as by rail, which, as can be seen at a glance, is of immense importance to a city of any considerable size. The population of Vancouver is variously estimated at from fifteen to seventeen thousand; the former, at the time of writing, being approximately correct. At the date of its incorporation, April 6th, 1886, it was less than six hundred. It is confidently expected that the past rate of increase will not only be maintained, but materially increased as the years pass by.

Vancouver is at present naturally divided into three parts, viz., the West End, East End, and Mount Pleasant.

From the favorite perch of the photographer, the Hotel Vancouver, situated at the corner of Granville and Georgia streets, if we look to the north we view that favored residence portion which overlooks Coal Harbor, and beyond this, the Vancouver Atlantic Associations' new Recreation grounds, a part of Stanley Park, easy of access either by water or by foot. Beyond are the Narrows, the gateway to Burrard Inlet, Vancouver's magnificent harbor, one of the finest in the world. It is safely navigable for vessels of the deepest draft at all tides. Its accommodation is unlimited. Dotting its shores are numerous boat and bathing houses, owned by clubs and private individuals, which all the season round furnish ample accommodation to those devoted to these forms of exercise.

At the foot of Granville street, close on Burrard Inlet's edge, are situated the C. P. R. freight sheds and station house. Here promptly on time daily, at 2.30, the West bound train delivers its heavy loads of living freight, for part of which the boats stand waiting. One daily, except Monday, for Victoria; another bi-weekly for Seattle, on Monday and Thursday. While at certain intervals the San Francisco and C. P. R. Co.'s S.S. for China and Japan stand waiting for their consignments for the several different ports for which they are destined.

Farther westward we have a view of part of Stanley Park, a natural park of 956 acres, which at present is noted for its grand possibilities. At a comparatively small expense this can be made to rival Chicago's far-famed Lincoln Park, the glory of that Western Metropolis.

Stanley Park, at present, has not only a superb drive encircling it, but various by-paths which intersect it at all angles. It is the favorite resort of the shut-in office-man on his day off. On whatever side you care to ramble you can have the benefit of the salt air, as it is almost entirely surrounded by this reviving element.

Turning our gaze westward, if the day or evening be fine, the loveliest of sights meets our view. English Bay, lolling in the golden sunshine or the dreamy moonlight, as if being rocked to sleep by old Sol himself, spreads itself out before us.

False Creek, creeping up inland on this side, makes the peninsula. English Bay is the paradise of the small boy. For six months in the year, each day, its shores are lined by swarms of these future lords of creation, plunged breast deep in its sparkling waters, and by some more daring spirits still deeper in a state of bliss

and trunkmiddy. And not only the small boy, but those of larger growth, and even their mothers and their sisters, take their share, and dozens at a time may be seen splashing through the wavelets, happy as only women and children know how to be. While they dress, the accommodating street car is waiting to land them at their doors in a few minutes in the very heart of the city. The climate is such that this form of recreation can be enjoyed for six months in the year, and by rugged constitutions all the year round.

This western view takes in that portion known as the aristocratic section of Vancouver, in the best sense of that term. The finest residence portion of the city crowns the summit which overlooks English Bay, and this is decorated with some of the finest palatial residences to be found in British Columbia. Here are found buildings at which rustics and Eastern tender feet gaze with equal wonder and admiration.

" And still they gaze, and still the wonder grows,
How four short years could pile up such fine rows "

(of buildings). Mingling with these are the cottages, which are the abode of happy families, the heads of which find remunerative employment in Morse's large lumber mill and Heap's furniture manufacturing establishment, both conveniently situated at the southern foot of Granville street, and furnish work for a large number of hands.

Beyond False Creek Bridge, the newly-cleared Fairview looms up on a pretty incline. This has been only recently laid out in lots, and will make a pretty suburban village in the near future. Its more formidable neighbor, Mount Pleasant, has made, and is making, most wonderful strides towards the making of quite a city in itself. This is destined to become at no distant date a most beautiful residence locality, and when the Electric Car Company fulfils its promise to climb the hill, will be in quite close proximity to the business portion of the city proper. Upon the beautiful heights that overlook the busy lower city, all among those forest trees, are homes in which comfort and refinement are ever blended. Village lanes or country homes could hardly know greater peace and security; they are at present "far from the madding crowd's ignoble strife" in the city below. Here are to be found the nursery, the dairy, the brewery and the tannery.

On this side False Creek are the C. P. R. work shops and Round House, a formidable pile of brick, which at all times of the year has a bee-hive appearance.

Farther to the east are Cassidy's sash and door factory, Hart's furniture manufactory, and Slater's shingle mill, all of which are doing a rushing business, and from their central location enjoy splendid shipping facilities. Not far away, on Homer street, is situated the new B. C. Fruit Canning and Coffee Company.

Leaving Mount Pleasant and the West End, the favorite residential parts of Vancouver, which, although not wholly destitute of the clang of machinery and the snort of the engine, do not offer the same inducements to manufacturing interests, we will now turn our attention to the East End, which no small minority think is the better half of the city. The West End is the home of the merchant and the professional man, the East that of the lumber king and the mechanic.

Let us then take a look at the busy industrial east End of Vancouver City, where on every side is the ceaseless buzz of a dozen mills, which tells the world that thousands of thousands of feet of lumber are being turned out every day of the week

STEVESTON

LOTS FOR SALE.
BEST INVESTMENT IN THE MARKET.
See Ad. on Page 4.

and every week of the year. The output of these mills finds a market in China, Japan, South America, Australia, California and other States.

Adding to these lumber mills, two iron foundries, the Vancouver Electric Railway and Light Company, the Vancouver Soap Works, Candy Factory, Sugar Refinery, San Juan Lime Company's Works, whose smokestacks belching forth clouds of smoke by day, and numberless windows flashing with electric light by night, with the C. P. R.'s engines shrieks as they insinuate themselves in curving lines, all among the uproar, gives to this portion of the city a truly manufacturing aspect, worthy of a much more populous metropolis.

Somewhat unsightly are some parts of this East End. Huge lumber mills, some of which are unadorned with paint or whitewash, and from which the ungainly smokestack pierce the lower clouds; countless piles of lumber, freshly sawn and stored up for use in case of emergency, are only to those immediately interested very beautiful to look at. More inviting are the blocks of wooden homes, the comfortable abode of hundreds of operatives. And occasionally we have blocks of handsome dwellings approaching in grandeur and elegance some of the homes of our aristocrats of the West End.

The new B. C. Sugar Refinery Company's buildings are worthy of special mention. Situated between the railroad track and the inlet, the shipping facilities are unsurpassed. The main building is a stately pile of five stories of white brick. It has given, and will in the future give, employment to a large number of workmen, and promises great things for Vancouver.

The business portion now claims our best attention. Landing in the city by train or boat we will at once be introduced to the main thoroughfare, Cordova street. Those putting up at the Hotel Vancouver, the Leland House, or the Ontario House, will be directed up Granville street. But the great majority will make for Water street, the great hospitality street of the city. Here you can always get any accommodation you may prefer.

Hastings street, west, is fast becoming a business street of no mean appearance. Here are to be found some of the finest blocks in the city. Granville street, in keeping with its aristocratic surroundings, stands out as the solid stone and brick street, and would do credit to any city in the Dominion.

Commencing at the foot of this street, and passing through the main business portion, is the Electric Railway. Take its whirring car and in five minutes you have passed through the wholesale quarter of Granville street; in another minute you are among the real estate offices of Hastings street west. Cambie street leads you into Cordova, which is the general retail centre.

Carrall street jogs you on to Powell street, through which you run, having an opportunity at Westminster avenue to take its car, which in some six months hence the line having been surveyed—will land you in the Royal City. In 20 minutes time

you can view both ends of the city, having travelled 3½ miles for the sum of five cents.

Throughout the length and breadth of the city the electric globes blaze high aloft illuminating the dark places and making it quite safe to venture to any part of the city at any hour of the night.

Across the Inlet from the East End is the location of a saw mill company, **Moodyville**, which communicates with the city by means of a ferry three times daily each way.

Near the Narrows, on the same side and opposite the West End, is the village of the **Red man**, which, white with paint and whitewash, looks beautifully neat and trim in the distance.

The Telephone Exchange has some 300 subscribers.

The Fire Department has two brigades which employ 60 men.

The Water Works plant, built at an expense of \$250,000, supplies the city with the purest mountain water.

Gas and electricity contrive to turn night into day.

The school system is in keeping with the progress of the city.

Two parks are already at the disposal of pleasure seekers, and four others are provided for.

The citizens will now be able to buy their vegetables from the producer, as the market house, a very creditable structure, situated on Westminster avenue, is ready for occupation.

The Cemetery is now easy of access and at a safe distance from the city on North Arm Road.

The Police Department, with headquarters at City Hall, manage to keep the unruly tolerably quiet.

The sick are carefully provided for at the City Hospital, corner Beattie and Pender streets, and at St. Luke's Home, Oppenheimer street.

The Board of Trade numbers the foremost business men among its members.

The new Court House and Registrar's Office at the corner of Hastings and Cambie streets has a very presentable appearance.

The city now has the proud distinction of having two representatives in the Provincial Legislature.

The different orders are well represented, every other man you meet having his badge, button, or other distinguishing mark of honor.

Thirteen churches grace the city.

The news field enjoys unusual prosperity. Its representatives are: *The News Advertiser*, *The World* and *The Telegram*, publishing both dailies and weeklies, and *Home Cheer*, monthly.

Of great importance to Vancouver are its steamship lines—one with China and Japan, and one with Australia, both of which have been handsomely subsidized by the British and Canadian Governments to the extent of \$500,000 to each line.

A large trade is expected to spring up with Australia in manufactured articles. New steamships are to replace the old ones on the China and Japan routes, which will greatly augment the present existing trade. This is to be their home port.

A new Post Office and Custom House is in course of construction. A new house for B. C.'s banking business and new C. P. R. offices will overlook the harbor ere another year comes round.

LOWEST RATES TO THE EAST

ARE ON THE LINE OF THE CANADIAN PACIFIC RAILWAY.

One thing yet remains to be said of Vancouver, and this is of vast importance, that she is fast becoming a city of *homes*.

The three building societies now in successful operation are assisting very materially to bring about this happy consummation, so devoutly to be wished. In the course of ten or twelve years hundreds of growing families will have homes of their own, and instead of having the rent collector calling monthly, each family will own its own home, as lots have been sold all through the city at a small figure, but on building conditions.

Vancouver City Street Directory.**CITY LIMITS.**

Commencing at the Eastern Boundary of District, lot 184 running Westerly along the shore of Burrard Inlet and English Bay to a point in District lot 540; thence Easterly along the Southern boundary of District lot 540 to the Eastern boundary of District lot 264 A, thence Northerly along the Eastern boundary of 264 A and 184 to the point of commencement.

Extracts from the Fire By-Laws.

"No building shall be erected within the Fire Limits unless a permit for the erection thereof shall have first been obtained from the Board of Works."

"No wooden building or part of building within the fire limits, shall be raised, enlarged or repaired; (otherwise than sheds not exceeding 12 feet in height at the peak, or closets not exceeding 10 feet square and 12 feet in height at the peak) but any wooden building may be removed from one lot to another lot within the said fire limits, not otherwise, under certain conditions to be determined by the Mayor and Board of Works."

OUR NATIONAL HIGHWAY TO THE EAST

THE CANADIAN PACIFIC RAILWAY

Trains leave Vancouver daily, and **Run Through Without Change**, making close connection with all steamers from **Montreal, Quebec and New York for England and all European Ports.**

During the season of navigation on the Great Lakes, close connections are made at Port Arthur with the **Palace Clyde Built Steamers** of the Canadian Pacific Railway.

Finest Train Service in the World.

Cheaper than any other Transcontinental Line.

Elegant Palace Sleeping and Dining Cars.

First Class Day Coaches and Free Colonist Sleepers run on all Trains.

The scenery on this line is unsurpassed in its grandeur, and for **Solid Comfort, Safety and Economy** Passengers going East should make sure their tickets read by the **Canadian Pacific Railway.**

For Rates, Maps, Illustrated Pamphlets and other information call or address any agent of the **Canadian Pacific Railway.**

VAN WINKLE OR STANLEY.

Van Winkle, or Stanley, in the electoral district of Cariboo, is reached from Ashcroft by the B. C. Express Co's stages, distance about 280 miles. Van Winkle is entirely inhabited by Chinese, the Europeans having occupied Stanley, a mile westward, and here the Chinese carry on the principal trade. Owing to the want of capital several large shaft houses containing some very fine steam power are allowed to remain idle and rusting. Lightning Creek, running through Stanley, has been imperfectly worked, owing to the same cause. The settlers are living in hopes of times improving and returning once more to the prosperous times of ten years ago.

VERNON.

Vernon, in the electoral district of Yale, is situated on the eastern side of Okanagan Lake. This whole section of country is noted for its rich agricultural lands, while to the eastward are the Cherry Creek mines. Like all the rest of the Spallumcheen and Okanagan country, it has been kept back by the difficulty of shipping its agricultural products, but now that the Shuswap and Okanagan Railway is completed, its shipping facilities will be very fair, and Vernon, together with all the country surrounding it, will receive a great impetus.

WHONNOCK.

Whonnock, or Warnock, or Wharnock, for it goes by all three names, is a flag station on the C. P. R., 34 miles from Vancouver. It is part of Maple Ridge municipality, and is situated on the right bank of Fraser River. There is only one store here, the country being only recently settled. Agriculture is the chief industry, but as these farms have been taken up in the woods within the last six years, they could not be expected to be in a high state of cultivation. Many of these places have

YALE.

Yale, in the electoral district of Yale, is an important station on the C. P. R., and is distant 104 miles from Vancouver. It is practically the head of steamboat navigation on the Fraser River, as the cañon immediately above Yale has proved an impassable barrier for steamboats. At one time Yale was much larger and more important than it is at present, as all freight to Cariboo and the upper country was carried to Yale by steamer, and from there transported by pack teams and wagons to its destination. It is situated on a small level plot totally surrounded by mountains. There are several mining claims located at Yale. The Fraser River Gold and Gravels Company and the Anglo-American Hydraulic Mining Company have offices here. The latter company have constructed a large raft, on which is situated very powerful machinery for forcing water. They intend to wash a large gravel flat or bar, which is situated just across the river from Yale. Fruit does remarkably well in the neighborhood of Yale, and is sold mostly in small quantities to passengers on the trains, thus securing a large return to the venders. A Church of England school for girls, under the control of the Sisters of All Hallows, provides excellent educational facilities. There is also a good public school. The Church of England has regular services every Sunday.

MATSQUI,

OR ST. MARY'S MISSION.

Matsqui, in the district of New Westminster, forms part of the municipality of Chilliwack, and is one of the best agricultural districts on the north side of the Fraser. It is distant 44 miles from Vancouver and about 35 miles from New Westminster. The settlement contains many thousand acres of good fertile land. St. Mary's Mission, with a school for boys and girls, is situated here. A mile below the station the southern branch of the C. P. R. crosses the Fraser. At the time of writing the bridge was not completed. The completion of this work will make Matsqui a central point. Fruits of all kinds do well, grapes ripening in the open air.

ST. ANN'S CONVENT,
FIRST CLASS COLLEGE FOR YOUNG LADIES,
NEW WESTMINSTER.

NEW WESTMINSTER CITY.

POPULATION, 8,000.

The traveller ascending the Fraser River comes, some fifteen miles from the Gulf of Georgia, to a point where the waters of the river divide, to sweep this way and that, around the fertile delta, and at this point the city of New Westminster bursts upon his view, occupying a commanding site on the north bank of the noble stream, and combining in itself the advantages of an ocean port and inland centre.

Other advantages also its citizens are not slow to claim for it—such as a climate owing to its sheltered situation, more soft and genial than that of other coast cities, and a situation as the natural centre of the rich Fraser valley, which makes the future a thing absolutely certain, lifting it quite beyond any chance of being “left out in the cold” by a shifting of lines of travel.

Eight miles from the main line of the Canadian Pacific Railway, New Westminster procured connection by a branch some five years ago, and since that time the place has grown with a steadiness and rapidity which has surprised even its most sanguine citizens, and the fact that this growth has resulted entirely from the development of the resources of the immediately surrounding country, is ample guarantee that it will continue.

The prosperity of the city flows from three main sources—lumber, fish and agriculture.

The Royal City Planing Mills and Brunette Saw Mills, both large and flourishing establishments, and the Mechanics Mill, a newer and smaller, but thriving concern, are within the city limits, and the McLaren-Ross Mill is situated just beyond the town's eastern boundary. The latter, said to rank as one of the largest and best equipped on the Pacific Coast, begins active operations early this year. These establishments give employment to a large number of men and own a small fleet of steamers. Their shipments, both by ocean-going vessels and by railway, are already large and increasing rapidly; while the home demand supplied, may be guessed at from the fact that of residences alone, besides other buildings, four hundred were erected in New Westminster in 1890, and in the same year, over twelve miles of wooden sidewalks were laid in the streets.

Seventeen salmon canneries were in operation on the Fraser, within easy reach of New Westminster, last year, and the lumber required for the thousands of packing boxes used by each of these establishments, is in itself no contemptible item in the business of the mills.

Half a million of money (\$500,000) is a moderate estimate of the amount which will be paid by the mills and fisheries for wages alone during the year.

The agricultural wealth of New Westminster district is dealt with elsewhere; and as New Westminster City is the centre and distributing point for the district, it of course benefits largely. Notwithstanding the competition of the railway, and of roads which are extending and improving year by year, four distinct lines of river steamers find constant employment between the city and the agricultural settlements, and this, of course, implies a large volume of business for merchants and shippers.

A woollen mill, two foundries, three machine shops and carriage factories, three furniture factories, two cigar factories and two establishments which make a business

OCCIDENTAL HOTEL, VANCOUVER, B.C.

RATES
\$1.00 to \$1.50 per day.

of shipping fresh fish to eastern markets, must be added to the list of existing industries, or "going concerns" within the city, and all these give evidence of prosperity.

The city has a high school, a central and two ward schools which are under the care of the government and free to all. There are also several private and denominational schools, a flourishing Y. M. C. A. with its own brick building, a public library, eight churches, two banks (British Columbia and Montreal), an opera house and three public parks. On the improvement of the latter, \$45,000 has been expended during the past two years.

Private and civic enterprise have kept pace with the growth of the city. Wooden buildings are no longer erected in the business part of the town, and the old time structures there have almost disappeared to make way for the solid blocks of brick and stone which occupy their former sites; while on the residential streets, the handsome and costly residences constantly going up, bear witness to the fact that the people of the city have faith in its future. In 1890 the civic authorities expended about \$10,000 on street work, the bulk of it being to open new streets. They also let contracts aggregating over \$350,000 for a water works system, the supply to be obtained by gravitation from a mountain lake. Nearly half the cost of these works will be represented by wages to be paid out in the city during the present year. While this volume is going through the press, the city is putting in an electric plant to light its streets and public buildings, as well as for the supply of private consumers, so that the city owns the electric light and water works. A joint stock company has begun operations on an electric street railway system.

So far New Westminster has progressed, notwithstanding its very imperfect means of communication with the United States territory immediately south of it. This "long felt want" is now supplied. After several disappointing delays, the N. W. & Southern Railway (which has become a part of the Great Northern system) is rapidly approaching completion and before these lines meet the reader's eye, passenger trains will be running from New Westminster to Seattle, in the State of Washington.

Many are confident that the census of this year will give New Westminster a population of 8,000, while others figure it as low as 7,000. The important fact, however, is, that the population for a considerable time has been increasing steadily and rapidly—certainty at a rate not less than twenty per cent. per annum.

THE GAZETTE BUILDING, MONTREAL

The visitor to Montreal can hardly fail to notice an immense six-storey brick building on Craig street, directly in rear of the Post Office: this is THE GAZETTE Building. THE GAZETTE is the oldest paper in Canada, having been established in 1778. It now occupies and owns one of the largest buildings, and one of the busiest of the many busy hives in that city. The building is 100 x 100, and 6 storeys high. The first flat is occupied by the Boilers, Engine and Press Room. Here are three enormous boilers and as many engines, representing an aggregate of 360 horse-power, the required force for the machinery, steam heating, and electric lighting of this extensive printing establishment. In the Press Room there is one of Hoe's Improved Perfecting Webb Presses for THE GAZETTE, a twenty of the most modern Presses for Book and Job Work. On the second floor is THE GAZETTE Business Offices, Editorial Rooms and the Job Printing Composing Room. The third and fourth flats are occupied by the Sabiston Lithographic and Publishing Company, this company having unequalled facilities for all descriptions of the Lithographic, Chromo, Color Printing, Photogravure and Book Binding Art. The Sabiston Company publish "The Dominion Illustrated News," the magnificent Christmas Number for 1890 of which gives a fair idea of the work done by this Company. THE GAZETTE News Composing Room is situated on the fourth floor. On the fifth is the Sabiston Co.'s Bindery, fitted with the most modern and improved machinery. THE GAZETTE Railway and Steamboat Ticket Department is situated on this flat, where all styles of Coupé Book and Card Tickets are printed. The top or sixth flat is occupied by the Electrotyping and Photogravure Departments. There are over 300 employees in the building; Mr. Richard White being Managing Director of THE GAZETTE Printing Co., and President of the Sabiston Co., Mr. A. Sabiston being the Manager of the latter Company.
