GENERAL ANNOUNCEMENTS.

QUEEN'S COLLEGE has, under its Royal Charter, "the style and privileges of a University."

The Fifty-eighth Session will open on Wednesday, the 28th of September, 1898.

☞A compilation of statutes and by-laws containing information for students is published separately. Copies are to be obtained from the Registrar.

BOARDING.—Lists of boarding houses are prepared before the opening of the Session, which may be obtained from the Registrar.

REGISTRATION.—All students are required to have their names, with other particulars, entered in the University Register. Before Registration they must pay the required fees, or produce the Treasurer's receipt for them. They must also present a certificate of character from their clergyman or other competent person, and sign a declaration promising due obedience to the University authorities.

ATTENDANCE AT CHURCH.—All students are expected to attend the churches to which they profess to belong, and produce certificates of attendance from their clergymen when required.

THE LIBRARY contains about 35,000 volumes. Students are entitled to the use of it subject to by-laws.

THE OBSERVATORY.—The Astronomical Observatory, which was founded in 1858, by the joint assistance of the City Corporation and private subscriptions, was transferred to the University in 1861.

The building, which stands adjacent to the Science Hall, contains a transit room, an equatorial room and working room, besides a room under the equatorial room, which is at present used as a store room.

The instruments are a Beaufoy transit loaned by the Royal Astronomical Society, an equatorial by Alvan Clark & Sons, a small transit by Troughton & Simms, a sidereal clock by Fauth & Co., a mean-time clock, and several smaller instruments.

Time is supplied to the city, and mathematical and engineering students are taught how to make and reduce the more commonly occurring astronomical observations.

Courses of lectures given upon Descriptive Astronomy and on Practical Astronomy, in alternate years, are open to the citizens of Kingston.

THE MUSEUM.—The geological collections, embracing rocks, minerals and fossils, contain the following:

1. The Bell collections, illustrating a north and south stratigraphical section across the Province from Lake Erie, 1,000 specimens. Section across the Ottawa river, 500.

2. Specimens of rocks and minerals from various sources, 3,600.

3. Specimens of fossils, 5,000. The rocks and minerals contributed and collected during late years are deposited in the collections of the School of Mining.

4. The Botanical collections contain 1,200 genera, 3,650 species, and 9,450 sheets of mounted plants. The private herbarium in the museum contains 2,157 genera, 8,654 species, and 14,731 sheets. These include large collections of Tasmanian, Australian, South African, European. and Asiatic species. The flora of the British Islands is almost completely represented.

5. The zoological collection contains: Mammals, 26; birds, 130; fishes, 40; invertebrates, about 200 in alcohol and 150 dry, a small collection of reptiles, and another of insects; the mollusca are represented by about 2,600 shells. A large addition has been recently made to the herbarium.

ACADEMIC COSTUME.—All graduates and undergraduates, when attending class or any college meeting, shall wear the costume prescribed by the University.

Each Degree has its distinctive hood, as follows: B.A., black bordered with red silk; M.A., scarlet; B.Sc., black silk, bordered with yellow silk; D.Sc., black silk, lined with blue silk, bordered with white; M.D., scarlet, bordered with white; B.D., white, bordered with crimson plush; D.D., black silk, lined with white silk; LL.B., blue, bordered with white fur; LL.D., black silk, lined with blue silk; Ph.D., black silk, lined with purple, bordered with white.

FACULTY OF ARTS.

ARTICLE I.—PASS MATRICULATION.

GENERAL REGULATIONS.

The Classes in the University are open to unmatriculated students, but candidates for a Degree must pass the matriculation examination before being admitted to examination on the University Courses.

Any person presenting a Departmental Certificate of Matriculation will be admitted as an undergraduate upon paying the Registration fees.

Any person presenting a Junior Leaving Certificate will, on passing the April examinations in Junior Latin and Junior Greek or Moderns, be considered a student of the second year's standing in these subjects.

All candidates for Junior Matriculation shall take the following subjects: Latin, English, History, Mathematics, French or German, and either (1) Greek or (2) the second Modern Language with Physical Science (Physics and Chemistry).

The examinations may be taken at once, or be divided into the following two parts, which may be taken in different years: (I.) Arithmetic and Mensuration, English Grammar and Rhetoric, and the History of Great Britain and Canada; (II) Greek, Latin, French, German, English Composition, English Literature, Ancient History, Algebra, Geometry, and Chemistry. Physics of either the II or III Form of the High School course must be taken with either Part I or Part II.

The percentage for Pass shall be thirty-three and one-third per cent on each paper, at the examination taken by the candidate.

The marks for sight work on each of the "Authors" papers shall constitute at least thirty-three and one-third per cent of the whole of the marks for the paper.

Junior leaving certificates will be accepted *pro tanto* at both Part I and Part II of the Pass Junior Matriculation examination, but candidates who desire to compete for scholarships or relative standing will not be granted this exemption in the case of Part II.

Candidates for Honours will be examined only on the Honour papers in a department, always provided that such candidates may receive Pass standing on these papers.

Senior leaving examination certificates, and certificates of work done in institutions recognized by the Senate, will be accepted *pro tanto*.

Honour and Pass Matriculation examinations are held annually at the University in September. See Academic Year, page 1.

Matriculation Scholarships will be awarded on the results of the Departmental midsummer examinations. (See article on Matriculation Scholarships.) Due notice of these examinations will be given by the Department.

Candidates for scholarships must notify the Registrar to that effect not later than May 19th, stating distinctly where they intend to write, and declaring their intention to enter on a course of study in Queen's University.

Subjects of Pass Matriculation for 1898-99.

PART I.

English Grammar and Rhetoric.

The main facts in the development of the language. Etymology and Syntax, including the inflection, classification and elementary analysis of words, and the logical structure of the sentence. Rhetorical structure of the sentence and paragraph. As far as possible the questions shall be based on passages from Authors not prescribed.

Arithmetic and Mensuration.

Arithmetic—Proofs of Elementary Rules; Fractions (Theory and Proofs); Commercial Arithmetic (omitting Annuities).

Mensuration—Areas of rectilinear figures, and volumes of right parallelopipeds and prisms; the circle, cylinder, and cone.

History of Great Britain and Canada.

Great Britain and Canada from 1763 to 1871, with the outlines of the preceding periods of British History.

The Geography relating to the period prescribed.

Physics.

An experimental course defined as follows: Metric system of weights and measures; use of the balance; phenomena of gravitation; matter attracts matter; laws of attraction; Cavendish experiment; attraction independent of condition; illustration of weight of gases, liquids, and solids; specific gravity.

Meaning of the term "a form of matter." All matter may be subjected to transmutation; "Chemistry"; application of measurement by weight (mass) to such transmutation leads to the theory of elements. Matter indestructible.

Meaning of "Force." Various manifestations of force, with illustrations from the phenomena of electricity, magnetism, and heat. Force measured in gravitation units; consequent double meaning of the terms expressing units of weight as mass, and units of weight as force.

Meaning of "Work." Measurement of work in gravitation units. Meaning of "Energy."

Effects of force continuously applied to matter. Laws of matter in motion. Velocity. Acceleration. Statement of Newton's Laws of Motion. Definition of "Mass." Meaning, value, and application of "g." Mass a measure of matter.

Conservation of Energy. Energy, like matter, indestructible and transmutable.

Study of the three states of matter. Properties and laws of gases, liquids, and solids. Laws of diffusion.

Elementary laws of heat. Mechanical equivalent. Latent heat. Specific heat. Caloric.

Regulations affecting Students in the Faculty of Practical Science.

1. No person will be considered to be a student in Practical Science until after he has registered as such.

THE SCHOOL OF MINING.

The SCHOOL OF MINING, affiliated with the University, is a branch of the *School of Mining and Agriculture*, incorporated by Act of the Legislature of Ontario.

OBJECTS.—The objects of the School of Mining are to give a scientific education, both theoretical and practical, to men studying for the profession of the mining engineer, the assayer, the consulting geologist, and the metallurgist; and to provide for prospectors, mine foremen and others interested in the discovery and winning of minerals such instruction as shall make their occupations more interesting and less liable to failure.

SITUATION.—The School has been placed near Queen's University so as to take advantage of the instruction therein provided in English, mathematics, physics, and biological sciences. It has been thus possible to equip and carry on a good technical school on a much smaller revenue than would otherwise be called for to maintain a high standard of scholarship.

MATRICULATION.—Before being admitted to examination on the work of the course, candidates for a degree must pass the matriculation examination, or otherwise satisfy the Faculty of their fitness to proceed with their course. Matriculation consists of the Junior Leaving examination for Ontario in the subjects of English and Mathematics.

The B.Sc. course in chemistry and mineralogy, or in geology and mineralogy, can be completed in one year after graduation in an honour course in chemistry, mineralogy and geology, in the Faculty of Arts.

EQUIPMENT.—The classes of the School of Mining are held in the John Carruthers Science Hall, which is well equipped with chemical, assay, mineralogical and petrographical laboratories and museums. The mining laboratory in an adjoining building is furnished with machinery to illustrate the processes of crushing, stamping, amalgamating, concentrating, cyaniding, chlorinating, &c. This was the first mining laboratory built in Canada, and several important investigations on Ontario ores have already been conducted in it.

For calendar and further information apply to the Bursar, School of Mining, Kingston.

VETERINARY SCHOOL.

The Veterinary School is a Branch of the School of Mining and Agriculture, incorporated by Act of the Legislature of Ontario. Its object is to prepare young men for the practice of Veterinary Surgeons.

BUILDING.

The building in which the didactic lectures on veterinary anatomy and diseases of animals are delivered stands at the corner of Barrie and Clergy Streets and, with the grounds, is the gift of the city to the School of Mining and Agriculture. The main building contains ample class rooms. The dissecting room is in an adjacent building.

COURSE OF STUDY.

The period of study for the Diploma of the School extends over two winter sessions and includes a full course of lectures and demonstrations on the following subjects: Anatomy, chemistry, animal biology, including physiology, materia medica and therapeutics, normal and pathological histology, diseases of domestic animals, and comparative pathology.

Students must pass two professional examinations, one at the end of the first session and one at the end of the second.

REQUIREMENTS FOR THE UNIVERSITY DEGREE OF D.V.M.S.

Candidates for this degree (Doctor Veterinary Medicine and Surgery) must have spent three winter sessions in

the study of Veterinary Science, must have completed the following course of study and must have passed the matriculation and other examinations :

FIRST YEAR.

ANATOMY of the bones, ligaments and muscles of the common domesticated animals; dissections. CHEMISTRY, an elementary course. ANIMAL BIOLOGY, an elementary course, including physiology. MATERIA MEDICA, an elementary course. VETERINARY MEDICINE.

The examination at the end of the first session will be upon anatomy, chemistry and materia medica. Attendance on the other two classes is obligatory.

SECOND YEAR.

ANATOMY of the horse, sheep, ox, and other domesticated animals; dissections. PHYSIOLOGY AND HISTOLOGY, a more advanced course. PRACTICAL PHARMACY AND THERAPEUTICS. VETERINARY MEDICINE.

The examination at the end of the second session will be upon anatomy, physiology, histology and therapeutics. Attendance on the other classes is obligatory.

THIRD SESSION.

VETERINARY MEDICINE AND SURGERY. COMPARATIVE PATHOLOGY. BACTERIOLOGY. SANITARY INSPECTION OF MILK AND MEAT.

The examination at the end of the third session will be upon the subjects of the third year.

For announcement or further information apply to the Bursar, School of Mining and Agriculture, Kingston, Ont.
