DISTRICT AND GENERAL

There were 282,971 fewer horses in Ontario in 1921 than in 1916.

William Dunlop, one of Petrolia's prominent citizens, died suddenly last week in his 52nd year.

A Massachusetts man, who has held automobile license No. 1 for 20 years, has refused \$5,000 for it.

Twenty-six convictions have been registered against federal income tax delinquents in the London district.

The Michigan Central will construct new yards at St. Thomas at a cost of nearly half a million dollars.

In New York a woman claimed \$280 for boarding the baby of a roomer, and held the child as hostage for her bill.

The W. C. Altvater Company, of Chicago, coal dealers and exporters, have just declared a 1.300 per cent. dividend.

Motion pictures and automobiles are blamed for the crime increase by Dr. M. G. Schlapp, professor of neuropathology in a New York hospital.

There is an epidemic of influenza among the horses in the vicinity of Brynaston. Some of the farmers haven't a horse that is able to work.

The township council of St. Edmund's refused the request of a largely signed petition asking them to grant a license for a pool room in Tobernory.

Malcolm L. McLachlan died of pneumonia at the family residence, 12th concession of Brooke, Thursday afternoon, in his 37th year. He leaves six young children.

Susanah Livingstone died in Victoria Hospital, London, last week, aged 85 years. She leaves three sons—Frank, of Detroit; Joseph, of London township, and Albert, of Metcalfe.

Prohibition agents have no right to search a man's clothing without a warrant, a Hartford, Conn., judge ruled, and ordered a bottle of whiskey returned to a man who was arrested for having it in his pocket.

Despite increasing power costs the Chatham Public Utilities Commission completed the year 1922 with a surplus of over \$17,000, according to the yearly financial statement presented to the meeting of the commissioners.

Wm. Mitchell, a Detroit man, whose automobile ran down and killed H. E. Keyes, a highway employee, near Chatham several weeks ago, has been barred from the use of Ontario roads for two years by the provincial highways department.

Alex. D. Campbell died at his residence, Lawrence Station, on Friday morning in his 86th year. Deceased came from Argyleshire, Scotland, when five years of age. He leaves his wife and one daughter, Mrs. J. A. Turnbull, of St. Thomas.

A West Virginia farmer, W. Marks, was killed when kicked by a horse which he acquired in a trade with another farmer. Now the man from whom he got the horse is held on a murder indictment, because he failed to warn Marks the horse was dangerous.

D. M. Ross, the U.F.O. member for North Oxford, adheres to his determination not to accept the \$600 bonus granted the Ontario legislators last session. He was granted a cheque for \$600, which he returned to the provincial treasurer, and it now appears in the public accounts as a refund.

B. F. Haanel, of the mines department at Ottawa and member of the Canada fuel board, warns Canadians that this country is soon to be faced by a permanent fuel shortage. The visible supply of anthracite coal will last only 80 to 100 years and America's visible oil supply will last only 25 years.

A poll of sixth-grade pupils in St. Louis revealed that of 5,376 children questioned 49 per cent. had never seen a sheep, and 17 per cent. had never looked upon a pig. Of every hundred children, 12 had never seen a cow. It has been suggested that a cow and a pig be placed in the municipal zoo.

Escaping only with their lives the family of Thomas Kimmerly, living near Albury, Prince Edward county, sustained heavy losses when their home was burned to the ground. They owe their lives to the alertness of their dog, which barked and growled and finally broke a pane of glass in its efforts to warn the inmates of their peril.

The death occurred in St. Thomas of Mrs. James Toles, who had reached the age of 94 years, being the oldest pioneer in the district, where she was born. In her girlhood, St. Thomas was connected with London and Port Stanley by a corduroy road, over which a huge stage coach plied daily. Her father operated the first grist mill in the district. One daughter survives her.

The Parkhill Gazette says:—Two weeks ago agents for a concern which deals in enlarged picture monstrosities visited homes in Parkhill and through their nervy insistence secured orders for their goods. This week they came back to deliver the orders and their charges seemed to have increased miraculously in the interval. A fine of \$12 was imposed on them for giving a receipt for a sum larger than \$10 without affixing a stamp. This fine was imposed by Mayor Pedlar, before whom complaint was laid by some of those who were finding experience a dear teacher.

Canada's wheat production increased 70 per cent. in 10 years.

DEATH OF ERNEST WALKER

The community was deeply grieved to learn of the death at Norwich on Wednesday, February 28th, of Ernest B. Walker, after four weeks' illness of pneumonia followed by heart trouble.

Deceased was a highly esteemed and promising young man and had many friends here. He was a son of the late Mr. and Mrs. Mark Walker, who predeceased him some three years, and was in his 39th year, having been born in the township of Mosa near Glencoe November 27th, 1884.

After graduating at the high school here he entered the druggist profession, serving an apprenticeship with J. A. Scott at Glencoe. Since then he spent some time in Strathroy, Paris and other towns, and went to Norwich in October of last year, making many staunch friends during the short time he was there. He was a member of St. John's Anglican church, Glencoe.

After a short service at the residence of W. H. Millar, in Norwich, the remains were brought to the home of his brother here, and the funeral was held on Saturday afternoon. The service was conducted in St. John's church by Rev. Mr. Holland, of Norwich, who attended him throughout his illness, assisted by Rev. Wm. Willans, rector of St. John's church. The bearers were F. C. McRae, Andrew Gardiner, W. D. Moss, J. N. Currie, Savil Simpson and Jas. Simpson. Interment was made at Oakland cemetery.

Those who attended the funeral from a distance were Rev. Mr. Holland, Norwich; J. M. Tate, Paris; Mrs. Harrington and W. Otton, Leamington; Dr. and Mrs. Coates and G. Willett, Bothwell; Mrs. V. Guest and W. J. Elliott, London.

Deceased is survived by one brother, Isaac, on the homestead, who, with his wife, was with him at the time of his death.

THE SEASON

Mr. and Mrs. Robin arrived from the south on Friday. Two or three days of balmy air and sunshine have dissipated the snow without creating any of the usual spring flood conditions. The winter may now be said to have spent its force. It was an ideal one in every way, with the greatest amount of sleighing for the season.

With the least quantity of snow that anyone can recollect—and all the time the roads were good for wheeled vehicle traffic as well. The trying time for the wheat and clover crop is yet to come, however, with alternate freezing and thawing. Good maple sugar weather is always hard on the wheat, say the farmers, although this is exceptional when there is a good depth of frost as at present.

SOME INTERESTING HOCKEY

An interesting hockey match between the West Lorne senior team and a Glencoe sextette was played at the Carman arena on Friday night. Although the ice was soft and the playing somewhat slow, considerable enthusiasm was manifested in the event, which proved an easy success for the home team, the score being 6-2.

Glencoe's line-up—Leitch, goal; Davenport, McLachlan, defense; C. Davenport, centre; Aldred, Humphries, wings; R. Quick, Weaver, subs. E. Smith, referee.

Appin and Walker's hockey team met at the rink here on Wednesday evening of last week in a friendly game, in which the score was 6-4 in favor of Appin. Walker's team was substituting for the Melbourne team, which was unable to reach here.

DIRECTORS ELECTED

At the annual meeting of the Ekfrid Mutual Fire Insurance Company the two retiring directors, J. G. Lethbridge and Peter Gardiner, were re-elected, and Dan A. McCullum was elected a director in place of Alex. S. McDonald, deceased. There was a large attendance at the meeting and the management of the company was expressed as highly satisfactory. Before closing, a resolution of condolence with the family of the late Alex. S. McDonald was carried with a unanimous vote.

A PENSION AND BENEFIT PLAN

As is well known, the Bell Telephone Company in 1917 set aside half a million dollars as a fund from which to provide pensions for employees of stipulated age and service, and also to serve as a sick benefit and employees' accident fund. The plan, which calls for no contribution from the employees themselves, has worked out so far with immense benefit to telephone workers, and the directors of the company have each year appropriated sufficient from revenue to offset payments from the fund and restore it to the original half million dollar mark.

During 1922, payments from the fund to employees and dependents amounted to \$300,780. These covered 11 death benefits, 348 accident benefits and 1,902 sickness benefits. Thirteen employees were added to the roll of those receiving pensions, bringing the number of pensioners up to forty-three.

MIDDLESEX A LEADER

According to the yearly statistics compiled by the Ontario department of agriculture for the year 1921, Middlesex led all the counties in the province in the raising and sale of cattle, poultry and milk cows and stood second in horse breeding.

DEATH OF WM. R. DOBIE

Falls Down Stairs at His Home With Fatal Results

While preparing to retire to his bed on Tuesday night, Wm. R. Dobie, aged 81 years, a well-known and esteemed retired farmer, fell down stairs at his home on the Mosa and Ekfrid townline, near Strathburn and was instantly killed. Dr. McIntyre, who was called, found that deceased had sustained a fracture and dislocation of the neck at the base of the skull. There was also a large scalp wound. Coroner Freese was notified and on enquiring into the circumstances found that death was purely accidental and decided that no inquest was necessary.

Mr. Dobie resided for many years on his farm near the River Thames in Mosa township, and a short time ago retired from active life and was living at what is known as Willow Hill, between Glencoe and Strathburn. He leaves his wife and family of one son and three daughters—Wm. Dobie, of Los Angeles; Mrs. J. E. Orange, of Radisson, Sask.; Mrs. John Gilbert, of Glencoe, and Mrs. John Crockery, of Killam, Alberta.

The funeral service will be held at his late residence on Thursday, March 8th, at 2 p.m. Interment in Oakland cemetery.

BETTER FARMING SPECIAL

In co-operation with the various breed associations, the Provincial and Federal Departments of Agriculture and the railways a "Better Live Stock Special" is being sent through the older counties of Ontario. The train is composed of 16 cars, as follows:—3 stock cars for hogs, 1 car for food hay, etc., 3 cars for bulls, 1 car for market beef cattle, 1 car for dairy cattle, 1 canopy demonstration car, 1 canopy car for hogs, 1 car for market hogs, 1 car for sheep and wool, 1 car for poultry, 1 passenger car for lecturing, 1 tourist sleeping car, 1 cafe parlor car.

On this train specimens of the best breeds of cattle, sheep, swine and poultry will be exhibited. The best type of steers for the domestic and British markets will be on view, as well as a demonstration of the value of using pure bred sires in the beef industry. In the hog car are shown samples of good and inferior types with the live swine in pens and typical sides of bacon on the walls above. Some good types of sheep are shown, with a special exhibit of the various grades of wool and samples of cloth made from the same. Graded eggs are shown, and demonstrations will be given in culling in poultry wherever desired. The main utility breeds of hens are carried on the "special."

In the lecture car competent authorities will address farmers on various live stock subjects at points en route.

The train will be at Glencoe on Friday, March 23rd; Chatham, March 24th; Petrolia, March 22nd, forenoon; Alvinston, March 22nd, afternoon; Lawrence, March 28th, morning.

C. K. Howard, general tourist agent, will represent the Canadian National Railways on this trip.

NORTHERN LEAGUE GAMES

The final games in the Northern Hockey League are announced. Tonight (Wednesday) Glencoe goes to Galt, and the return game will be played here on Friday night. These will undoubtedly be the most interesting games of the season. An overflow audience is expected at the Carman arena on Friday night. The game, it is announced, will be played rain or shine.

SAYS POLICE SYSTEM FARCE

Just retired, after more than 27 years' service with the county of Middlesex, both as deputy sheriff and subsequently as high constable, B. F. Watterworth characterizes the entire system as a "farce." The former official, who was deputy sheriff until the inception of the U.F.O. administration at Toronto, explains that it was not by reason of incompetence that any member of the force has been relieved of his duties under the new government.

EKFRID STATION

Mrs. W. P. Cornell and Fred Eaton are visiting friends in Toledo.

Mrs. Bernice Galbraith and daughter Pearl are spending a few days with Mr. and Mrs. Webster, of Jeanette's Creek.

Miss Agnes Switzer, of Lawrence, is visiting with her mother, Mrs. Catherine Switzer, for a few days.

Everybody had a good time at the dance last Friday night.

Alex. and Duncan Galbraith spent the week-end at Jeanette's Creek.

KILMARTIN

Hughdell McIntyre, who underwent a severe operation in Victoria Hospital, is home and improving.

Jack Calderwood, of Detroit, spent the week-end with Duncan McKellar. The many friends of Gordon Hayes, who has been in poor health for some time, will regret to learn that he is not so well.

Mrs. Russell, of Butler, Pa., is spending some time here.

A number from here attended the golden wedding of Mr. and Mrs. Hugh McLachlan, of Brooke.

Sorry to report that John Munroe is in the hospital at London this week undergoing an operation on the ear.

Be better nourished

prevents that sinking feeling

DRAW ONE FROM THE DISCARD

BY HARVE PARSONS.

PART II.

Probably ten minutes later Tim ac-

costed the hotel clerk.

"Tell me all about this fellow," he

demanded.

"Sure," replied the clerk. "He came

in here and registered—that's him, H.

F. Nolan, K.C., and the boy went up

with him, carryin' his bag. It's up

there yet—I'm goin' to get that much

back, anyway."

"Forget it," interrupted Tim. "Send

for that bag—let's dump the bricks

out and see if there's any clue-of

where it came from."

But the rather shabby bag didn't

contain bricks—just plain rocks,

wrapped in newspapers. The papers

were old, of widely divergent publica-

tion, probably stolen from the reading

rack of some hotel. There were no

marks on the bag to indicate its his-

tory.

"No, I don't care to hear about his

wooden leg or his birthmark or his

gold teeth," said Tim. "But if you can

remember the color of his eyes or

hair, height, clothes or hat, you might

help."

"Who'd ever think of such sidelines

as that when a guy is marked up like

a picture book?" demanded the clerk.

"It's a cinch you wouldn't," replied

Tim as he walked out. He didn't go

near Abe or a lot of other victims

named over by the chief, but from the

hotel his steps led to a novelty store,

far down the street, one of the last

places to report the decorated stran-

ger. Arriving, Tim paid no attention

to the hostile greeting of the prop-

rietor, who had been far down the

list of those reporting wooden legs

and gold teeth, and therefore as a

simple victim of being the last straw

of a heavy load had received the latest

and best cussing delivered by Messrs.

Viles and Judson, detectives. The pro-

prietor, after they were gone and he

had recovered from the shock, thought

up an excellent scathing, almost

scorching comment on detectives in

general. He was disappointed when

Tim ignored him and walked back in

the store as if to make a purchase.

The proprietor resumed his vigil at

the door, intent on telling every

possible fellow-lawman of the out-

rageous conduct of the detectives

when he started to give them a per-

fect description of the cheque artist.

So he didn't hear Tim as the ancient

jawbreaker spoke to the pretty little

girl, combination clerk and book-

keeper.

"Oh, that fellow? He had an arti-

ficial er—limb and gold teeth and—"

"Yes, yes, Nellie. All the rest, as

you noticed him little marks, but

you're a smart girl, and I had hopes

you'd do better than the others. First

howja know he had a wooden—uh—

limb?"

"Why," replied the girl, "anybody

could hear it squeak, and he limped—

just a little, like Benny Adams, who

got run over with a freight. And then

while Mr. Jenkins was examining the

cheque he offered the fellow stool

right here and kinda rested his lam-

er—limb on this box, and tapped on

it, kinda absent-minded like, with one

of these hardwood rulers. It sounded

MOTHER! MOVE

CHILD'S BOWELS

"California Fig Syrup" is

Child's Best Laxative

Even if cross, feverish, bilious, con-

stipated or full of cold, children love

the "fruity" taste of "California Fig

Syrup." A teaspoonful never fails to

please the liver and bowels. In a few

hours you can see for yourself how

thoroughly it works all the souring

food and nasty bile out of the stomach

and bowels, and you have a well, play-

ful child again.

Millions of mothers keep "California

Fig Syrup" handy. They know a tea-

spoonful to-day saves a sick child to-

morrow. Ask your druggist for genu-

ine "California Fig Syrup" which has

directions for babies and children of

all ages printed on bottle. Mother!

You must say "California" or you may

get an imitation as a result.

When they try to bury the hatchet in the East they strike oil.

—Harding in the Brooklyn Eagle.

EASY TRICKS

The Wizard's Ring

No. 21

Here is an excellent parlor trick

requiring the use of a little appara-

tus that is easy to obtain.

The entertainer has his wrist

tied as in the illustration. Specta-

tors may be invited to seal the knots

with pieces of adhesive plaster if

the wizard desires to make the

trick very impressive.

While his wrists are being tied

the performer is calling attention

to a large harness ring or celluloid

bracelet. He asks the spectators to

satisfy themselves that the circle

is complete—that there is no hid-

den opening.

Taking the ring in his hands, the

wizard turns his back. In a mo-

ment he faces the spectators. The

ring is on the string as in the draw-

ing. The string must be cut to get

it off.

How is it done?

The fact is that there are two

rings, just alike. Each ring is just

the enough to go over the perform-

er's hand—preferably the left hand

as this is a trifle smaller than the

right in most cases. One of the

rings is forced over the hand and

up the arm where it is hidden by

the coat sleeve. While his back is

to the audience, the performer slips

the unannounced ring into his inside

coat pocket and pulls the hidden

ring down over his hand and on

the string.

(Clip this out and paste it, with

others of the series, in a scrap-

book.)

Editorial Troubles.

The troubles of an editor in a small

town are many. Besides the difficul-

ties inherent in making up his paper

satisfactorily, he often has to live up

to a reputation for limitless knowl-

edge. For many persons he is an

oracle, and the column headed "Notes

and Queries," or something similar, is

his mouthpiece. A Western paper re-

ceived a communication, bearing per-

tinently on this matter. It ran as fol-

lows:

"Dear Editor: Will you kindly in-

form me by return mail what number

of seeds are contained in a seventy-

three to seventy-five-pound pumpkin,

as I wish to settle an argument."

A parallel to this request lies in an

unpleasant experience of an editor who

one morning received two letters from

subscribers. The first, an anxious

father, wrote to find out the best way

to bring up his twin babies in health

and happiness, while the other, a farm-

er, wanted to know the quickest meth-

od of getting rid of grasshoppers.

The editor hesitated; then, out of

the fullness of his knowledge, he

wrote two letters in reply. But in the

haste of business he put the letters in

to the wrong envelopes.

The next morning the father of the

twins received this interesting an-

swer:

"Cover them carefully with straw

and set fire to it. After jumping in

the flames a few moments the little

pests will be speedily done for."

And the man who was troubled with

grasshoppers was bidden to "Give cas-

tor-oil regularly in moderate doses and

rub their gums with a bone."

Safe Secrets.

I will carry terrible things to the grave

with me;

So much must never be told.

My eyes will be ready for sleep and

my heart for dust.

With all the secrets they hold.

The pitious things alive in my memory

Will be safe in that soundless dwell-

ing.

In the clean loam, in the dark where

the dumb roots rust

I can sleep without fear of telling.

—William Alexander Percy.

Minard's Liniment for Corns and Warts

Wonders of the World.

What are the seven wonders of the

Ancient World, the Middle Ages, and

the world to-day? We believe this to

be the best answer: The Ancient

World—pyramids of Egypt, Pharos of

Egypt, hanging gardens of Babylon,

statue of Jupiter by Phidias, mauso-

leum of Artemisia, colossus of Rhodes

and temple of Diana at Ephesus. The

Middle Ages—Coliseum of Rome, cata-

combs of Alexandria, Great Wall of

China, Stonehenge in England, lean-

ing tower of Nankin and mosque of St.

Sophia at Constantinople. Authorities

differ in answering the wonders of the

world to-day, but we believe The Pat-

finder's list to be the best. Here it is:

Telephone, radio, aircraft, radium,

antitoxins, spectrum analysis and X-

rays.

College Girl: And, mother, I've

been put on the scrub team!

Mother: Then I hope you'll know

something about house work when

you come home at the end of the

term.

After the Old Man.

"What's your little girl's name?"

asked the colored parson of the lady

who was enrolling her daughter in his

Sunday school.

"Her name am Opium Bryant," was

the reply.

"Opium? That's rather an odd

name for a girl," ventured the parson.

"How did you ever come to pick that

name?"

"Y' see, pabson, 'twas disaway.

Deay opium comes from wild poppy,

an' so when dis chile was born, Ah

decides to name her Opium 'cause her

poppa suah am wild."

"What stars are made of, how fast

they are moving, and how far away

they really are, can be told by means

of a spectroscope.

Minard's Liniment for Coughs & Colds

Bakers Bake It For You

—no need to bake at home

HERE'S your old-time fa-

vorite—full-fruited raisin

bread with at least eight

tempting raisins to the slice

—already baked for you by

master bakers in your city.

Simply phone your grocer

or a neighborhood bake shop

and have a fresh loaf for

lunch or dinner to delight

your folks.

We've arranged with bak-

ers in almost every town and

city to bake this full-fruited

raisin bread.

Made with big, plump,

tender seeded raisins. The

raisin flavor permeates the

bread. You've never tasted

finer food. Order a loaf now

and count the raisins.

Raisin bread is a rare com-

bination of nutritious cereal and

fruit—both good and good for

you. Serve at least twice weekly

to get the benefits.

Use Sun-Maid for home cook-

ing of puddings, cakes, cookies,

etc.

You may be offered other

brands that you know less well

than Sun-Maids, but the kind

you want is the kind you know

is good. Insist, therefore, on

Sun-Maid brand. They cost no

more than ordinary raisins.

Mail coupon for free book of

tested "Sun-Maid Recipes."

AN INSPIRING ROMANCE

The growth of Western Canada is an

inspiring romance. It is only fifty

years ago last July that the first home-

stead was filed on the Prairie, by John

Sanderson, who still lives on his farm

near Portage la Prairie, Manitoba. It

is only forty-one years ago last Sep-

tember that the first quarter section

of Canadian Pacific Railway land was

sold by W. D. Scott, the present As-

sistant Deputy Minister of the Cana-

dian Department of Immigration and

Colonization. At that time compara-

tively few people had any conception

of the enormous possibilities for agri-

cultural development of that fertile

plateau running westward from Wina-

peg to the foothills of the Rocky Moun-

tains.

The Province of Manitoba had a

population of 62,240, compared with

613,000 last year. Winnipeg was fron-

tier town with 7,500 people, and Bran-

dton, which was regarded as a far-dung

outpost of the West, boasted of a few

hundred in population. Calgary, Ed-

monton, Regina, Saskatoon, Moose Jaw

were mounted police outposts or Hud-

son's Bay trading posts. The main

line of the Canadian Pacific Railway

ran as far as Portage la Prairie, about

50 miles west of Winnipeg. Now there

are three transcontinental lines span-

ning the Prairies and extending on to

the Pacific Coast. Manitoba now has

4,000 miles of railways, Saskatchewan

6,000, Alberta 4,000 and British Co-

lumbia 4,100. Calgary, Edmonton, Re-

gina, Saskatoon, Moose Jaw are thriv-

ing and modern cities. Winnipeg is

known as the metropolis to the Cana-

dian West, with a population of over

200,000. Vancouver is one of the great

seaports on the Pacific, with a popula-

tion of over 150,000.

Western Canada's Development.

Numbers of the early pioneers of

forty years ago are enjoying their de-

clining days in the communities they

wrested from the wilderness, prosper-

ous, contented, with their children's

families gathered about them or seek-

ing their own fortunes still further

westward or northward. They have

seen civilization step in to the West

and the wilderness swept out. To-day

are thriving cities and towns where

bleaching buffalo bones marked the ox

trails of forty years ago. To-day are

mighty freight trains, each with its

thousand-ton cargo of wheat or mer-

chandise, roaring down the roads

where the old carts creaked. To-day

are schools within walking distance

of every farmhouse, churches within

driving distance of every home. To-

day are telephones and every modern

convenience linking communities over

vast distances by the common bond of

the spoken word.

The wilderness of forty years ago

has become one of the great granaries

in the world, truly an abnormal de-

velopment. But this is not all. In

1881, when W. D. Scott sold that sec-

tion of land to the father of a present-

day newspaperman, there was scarce-

ly any farm livestock in the West.

Dairying was not engaged in at all.

To-day there are 6,988,317 farm an-

imals on the prairies, of which 881,899

are milch cows; and dairying is only

second in importance to grain grow-

ing. But development and progress

have been general in every phase of

life. The term Western Canada is now

synonymous with modern progress,

not only in agriculture and commerce,

but in the more essential and finer el-

ements necessary to a full life. More-

over, from out of that erstwhile wilder-

ness marched a great army of the

actors of the hardy pioneers of two

generations ago to the Great War, im-

pelled by their inherent love of de-

mocracy and right.

While progress and development in

the older parts of Canada have not

been so remarkable in recent years as

they have been in the West, yet in the

last forty years there has been a phe-

nomenal growth in every direction.

Optical Stunts.

What strange liberties our story

writers take with their characters'

eyes. Here are a few examples:

"Her eyes roamed carelessly around

the room."

"With her eyes she riveted him to

the spot."

"He tore his eyes from her face and

they fell on the letter at her feet."

"He drank her in with drowning

eyes."

Their eyes met for a long, breath-

less moment and swam together."

"Marjory would often take her eyes

from the deck and cast them far out

to sea."

"He tore his eyes away from hers,

causing intense pain to both." We

should think it would.

Reverence.

Two little sisters, the daughters of

a preacher, were quarreling for the

prettier nightgown. The older child

usually yielded and did so this time,

but she didn't propose to wear the

plain gown.

Taking off the dainty garment, she

threw it at her sister, saying: "Take

the old gown. I'll sleep without any."

It was all right, to her notion, to

crawl between the sheets naked, but

not proper to talk to the Lord that

way. Snatching up her little umbrella,

she raised it and knelt to pray.

One pound of pure saccharine has

the sweetness of a quarter of a ton

of sugar.

TURKS SEND NEW COUNTER-TREATY, ULTIMATUM DEMANDING ACCEPTANCE

British Cabinet Takes Serious View of the Situation But Will Oppose Any Further Concessions and Refuse Consent to a New Conference.

London, March 4.—The Turkish Government has virtually decided to send a new counter-treaty to the Allies, with an ultimatum demanding acceptance.

The ultimatum will fix a certain date and if the Allies have not swallowed the new treaty by that time, or agreed to call an entirely new peace conference, the Mudania armistice agreement will be denounced. Turkey will then resume a technical state of war with Greece and the Allied powers.

Such is the startling turn which the debate on the Lausanne treaty has taken. Information to this effect is contained in confidential messages reaching official quarters to-night.

The Cabinet takes a most serious view of the situation. Premier Bonar Law and most of the other members of the Cabinet, with the backing of the Admiralty and Colonial Office, have decided finally to take a most firm position. They will oppose any further important concessions, and under no condition consent to a new full conference.

The Angora messages convey the information that Fevzi Bey, Turkish Chief of Staff, who is dominating the debate, announced in the Grand National Assembly that the General Staff had ordered large military movements and preparations in the direction of the British position at Mosul.

Foreign Secretary Curzon is less positive in his attitude and there are signs he would go further than the

Premier in future dealings with the Turks. However, the Foreign Secretary finds little or no support in the Government for weakening in the face of the Turkish manoeuvres.

Of course, there are all kinds of ultimatums, and the Allies have come to look upon the Turkish variety as less dangerous than the others because the Turks have a habit of changing their minds at the last minute. Nevertheless the new ultimatum in preparation is taken much more seriously because of the latest details of the Angora discussions.

Ismet Pasha, chief delegate at Lausanne, has been reduced to the rank of a mere expert on territorial and military questions. The voice of the moderate party has been drowned out by the extremists. That portion of the Lausanne delegation which favors war is in the ascendancy, while the treaty advocates are in the background.

Riza Nur Bey, the strongest opponent of the Armenian National Home, has been left to deal with the minorities' problem. The famous lawyer, Tahir Bey, has argued against any special judicial regime for foreigners. Hascan Bey declared Turkey would settle all questions of concessions and economic privileges with separate treaties with the powers.

Officials here explain the Turkish propensity for mind changing may modify this new ultimatum or bury it altogether, but the whole trend of the Turkish Government is now toward a more warlike position.

FRANCE OCCUPIES THREE MORE CITIES

Karlsruhe, Mannheim and Darmstadt Taken Over as Counter-Sabotage Move.

Paris, March 4.—Three great German cities with nearly 1,000,000 inhabitants—Karlsruhe, Mannheim and Darmstadt are now as good as occupied by a French expeditionary force.

At the Foreign Office this afternoon the correspondent was informed the advance was a counter-sabotage move.

The Darmstadt railway centre and the Karlsruhe and Mannheim ports were taken over yesterday, although the cities themselves had not been occupied.

Troops backed by armored automobiles and cavalry moved forward at dawn across the Rhine, meeting only a chilly, sleepy welcome. Not more than 1,000 soldiers were engaged for the occupation of each strategic point.

The occupation of the cities themselves, demanding the use of at least two divisions, can be only a matter of time. In order to fill the gap behind, as these troops are brought up, colored soldiers are likely to be moved in.

In some quarters it is asserted the new French advance has not got so much to do with turning the thumb-screw on Germany, as with checking the reiterated refusal of General Godley, British commander, at Cologne, to allow the French to use the main left bank Rhine railway through the British area.

It is stated that with the further move forward to Marburg it will be possible for the French to organize a direct railway system on the right bank of the Rhine from Essen to Straßburg, via Frankfurt. But to do this it will be necessary to occupy Frankfurt.

It is reported here French and Belgian Governments have agreed on a settlement with Germany which would render the Versailles Treaty null and void, at least as far as France, Germany and Belgium are concerned.

German Ambassador Lunches With British Sovereigns

A despatch from London says:—For the first time since the war, the German Ambassador, Dr. Gustave Stahmer, and his wife, lunched with the King and Queen at Buckingham Palace on Thursday.

Six Million for Agriculture
Hon. W. R. Motherswell, Minister of Agriculture, has had estimates totaling \$6,000,000 passed in the Dominion House for his department.

H. H. Stevens, M.P.

In reply to queries in the House at Ottawa made by Mr. Stevens, Dr. Beland stated that Canada has 9,500 drug addicts. Prince Edward Island is the only spot in the Dominion free of drug peddlers and addicts. Thirty Chinamen have already been deported and two hundred more are in custody charged with handling drugs.

CIVIL WAR CEASES CRIME WAVE FOLLOWS

What London Express Correspondent Found to Exist in Ireland.

A despatch from London says:—Civil war in Ireland has ceased and given place to a widespread orgy of crime without political significance which the forces of law are steadily crushing. This is the substance of a lengthy survey of the situation in Ireland sent by the Dublin correspondent of the Daily Express. He says the Government has the rebel forces completely on the run and is likely to keep them so until the trouble ceases.

He describes them as merely scattered roving bands under robber chiefs and robber gang organizations. No district, adds the correspondent, can long be termed a rebel stronghold and the Government grows stronger daily.

Ice-Shooting Started in Niagara Gorge

A despatch from Niagara Falls, Ont., says:—Ice-shooting for the spring has commenced in the Niagara River gorge. Employees of the Niagara Gorge Railroad Company started their annual work of dislodging overhanging ice from the walls of the gorge.

The ice during the early thawing weather is dangerous to traffic on the trolley tracks at the foot of the cliff, and all masses that appear to be loosened are shot with a heavy charge of explosives.

Residents at the north end of the city consider the shooting one of the best signs of spring.

Hawaii's Sugar Harvest Largest for Eight Years

A despatch from Washington says:—Hawaii's sugar cane harvest during the year ended last September 30 was the largest in eight years, according to an estimate by the Department of Agriculture. Production for the year was placed at 1,184,000,000 pounds, or 13 per cent. more than that for the previous year, and larger than the average for the previous ten years.

THE U.S. SHIPS GOLD BACK TO BRITAIN.

It must have been a cheerful sight for Britain to see the incident above. Gold bullion is again being shipped back across the Atlantic to Great Britain. The dock-workers shown in the picture are handling solid gold bricks, which are on their way back to the money centre of the world, London. In spite of the efforts made to wrest that position from the British capital, financiers are satisfied that London's position is as secure as ever it was in relation to the commerce of the world.

POINCARÉ ADOPTS THREE METHODS OF DEALING WITH RUHR DIFFICULTY

A despatch from Paris says:—Premier Poincaré has decided upon three important measures to subdue the Ruhr. They involve:

1. Infliction of the death penalty—upon all Germans responsible for fatal railroad accidents.

2. Imprisonment of all defaulters of the 40 per cent. coal tax until they pay.

3. Movement of "colored" troops distinct from "black" troops into the Ruhr.

These steps have not been decided upon without grave deliberation, and the decision regarding colored troops is said to be due to the insistence of Marshal Foch that the colonials have been absorbed to such an extent in the French army that there is no reason why Moroccans and Annamites should not be used for purposes of occupation.

Several of the Ministers have suggested that keeping the 1922 class with the colors will be sufficient, but this idea has been out-voted, and the alternative presented was either par-

tial mobilization or use of colored troops. Partial mobilization would imperil the Poincaré Ministry, in view of the Premier's statement on the day the Ruhr was occupied that no soldier or railroadman would be mobilized, so colored troops are apt to be used.

A despatch from Düsseldorf says:—Two decisions having an important bearing on the administration of the Rhineland and the Ruhr by the Allies are announced at French headquarters here. The first is the final step in giving necessary powers to the French and Belgian commanders to administer the German railroads and the second provides for the collection of an internal revenue tax on tobacco and alcoholic beverages.

In the decree promulgating these decisions the Inter-Allied High Commission's right to operate the railroads along the left bank of the Rhine is turned over formally to the army authorities, partly as a precautionary measure to guarantee the safety of the troops of occupation. The Cologne bridgehead area occupied by the British is not included in this order.

French General Issues Proclamation

A despatch from Cologne says:—General Degoutte issued a proclamation that all Germans in the Ruhr who obey the orders of the French military authorities, and pay the taxes being levied upon them, will be protected from charges of treason by the German Government.

It is also proclaimed that the Allies will not leave the Ruhr until all penalties for obeying the occupational forces have been revoked.

France Receives Coke From Czechoslovakia

A despatch from Vienna says:—One thousand tons of coke are being shipped from Czechoslovakia over Austria to France daily, and the Austrian Government has ordered railroads to expedite the shipment. It is said Austria fears sabotage by railroad men would lead to unpleasant complications.

Czech miners who were being transported to France, and who were held up in Austrian territory, were allowed to pass upon the Government's order. Should Austria provoke them to it, the Czechs might cut off her coal supply.

Miss Muriel Corkery, of St. John, N.B., was admitted to the bar before the Court of Appeals recently. Miss Corkery enjoys the distinction of being the only woman barrister practicing law in the province, her predecessor, Miss Mabel P. French, who was admitted as a barrister in New Brunswick on November 21, 1907, having since removed from the province to British Columbia.

Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

The area of Ontario is 407,262 square miles, of which 365,880 square miles is land and 41,382 square miles is water. The province's population in 1921 was 2,933,662, of whom 1,226,379 were rural residents and 1,707,283 were urban. The population represents an average of 8.92 per square mile. There are in the province 25 cities of 10,000 and over and 46 cities and towns of 5,000 and over. In 1921 of a total immigration into Canada of 148,477, 42 per cent., or 62,572 settled in Ontario. There were, in 1920, 686,344 pupils attending public schools, and \$30,628,435 was expended on education in schools under public control.

Two Members of Famous Light Brigade Dead

A despatch from Belfast says:—Thomas Finlay, who as bugler sounded "charge" for the gallant Light Brigade at Balacava, and thus started the wild ride immortalized by Tennyson, died on Tuesday at Drogheda. Finlay's death follows closely that of Thomas Shaw, a member of the famous brigade, who died at London, Ont., Sunday night.

CANADA ATTAINS STATUS OF NATION WITHIN THE BRITISH EMPIRE

Signing of International Fisheries Treaty With the United States by Canadian Minister, Apart from British Ambassador, Marks a New Departure in the History of Canada as a Self-Governing Dominion.

Washington, March 4.—The treaty between Canada and the United States to control halibut fishing in North Pacific waters was ratified by the United States Senate to-day just before adjournment. It had been blocked temporarily last night by Senator Jones, Republican, Washington, but was approved to-day with an amendment by Mr. Jones providing that its restrictions against Canadian halibut fishermen should apply to all other British nationals.

The treaty establishes a closed halibut season from November 16 to February 15 and creates a joint commission to regulate North Pacific halibut fishing.

When Hon. Ernest Lapointe, Canadian Minister, signed with United States Secretary of State Charles Evans Hughes the international fisheries treaty between Canada and the United States a new constitutional departure was made, under which Canada takes a position of autonomous nationhood within the British Empire. Heretofore such treaties and conventions have been attested also by the British Ambassador.

It is understood that the decision

to have the treaty signed by the Canadian Minister was reached after several official communications passed between London and Ottawa and Washington. It is known the original expectation was that the treaty would be signed on the part of Canada by both Ambassador Geddes and Minister Lapointe.

On Mr. Lapointe's arrival in Washington he was met by representatives of the British Embassy, and proceeded at once to a conference with the British Ambassador, where, it is believed, communications from the British Government were awaiting him authorizing him to be the sole signatory on behalf of Canada. United States Secretary Hughes likewise paid a visit to the White House, and conferred with President Harding in relation, it is understood, to British messages announcing that Canada would deal directly with the treaty through her own Minister.

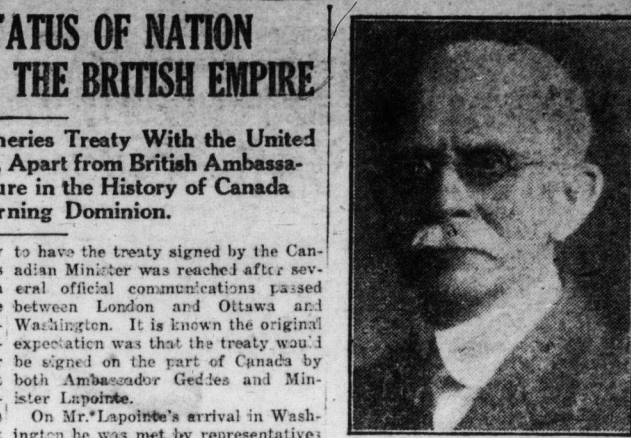

As this is a change in the attitude heretofore followed by the British Colonial Office, it is interpreted by officialdom here as marking a new departure in the history of Canada as a self-governing British Dominion.

United States Navy Owns Biggest of Zeppelins

A despatch from London says:—The construction of the new Zeppelin ordered by the United States Navy, will be finished soon at the Zeppelin works at Friedrichshafen, according to a despatch from Berlin. The airship will be the largest ever constructed and will start from Berlin for Chicago early in June. It will fly under the American flag, but operated by German mechanics and airship experts. The trial flight will begin in April and several over the Alps are proposed. When everything is perfected the airship will start for Berlin, where the final preparations for the trans-Atlantic flight will be made.

Century Old Man Has Had Only 25 Birthdays

A despatch from Winnipeg says:—Although technically he has had only twenty-three birthdays, J. S. Stevenson of Winnipeg has entered his hundredth year hale and hearty. Mr. Stevenson was born February 29, 1824, and has been cheated out of about 75 birthdays. He even skipped a leap year, because the day was rightfully his in 1900, when by a quirk of the calendar he was missed again. Mr. Stevenson came to Canada when he was nine years old, and forty years ago moved from Ontario to Manitoba.

Heads Educational Association. Joseph Grey Elliott, of Kingston, president of the Ontario Educational Association, which meets in Toronto in Easter week, in conjunction with the National Council of Education. Mr. man, is on the executive committee of both organizations.

Wings.

While men aspired to fly and the fulfillment of the dream was apparently remote much was said of the resemblance there would be between men and angels after the wings came. But while we were developing the power of wings the war occurred, and the first widespread use of wings was not angelic but diabolic; wings were used to help men kill one another. Often man seems to have the key to natural resources surrendered to his finite wisdom ere he is ready to make a proper use of it.

The mere thought of wings is ennobling. We think of them as lifting up above the sordid and the mean, seraphically, celestially. Our mortal poverty, our human weakness, our every limitation, falls away. We exult in a consciousness of strength, the capacity to do what we mean to do.

The sense of wings comes to us in several ways. It may come by the reading of a book. A great many books nowadays represent a basic abdication of an intellectual throne by the writer. He might be a priest at an altar—he prefers the muck of a sty. He is ready to write down to any level, if it will pay him in money. But there are books that lift and help the race and bring, at the same time, a reward to the author of them. To such books a world of readers gives heed, and by such books the many are translated to another sphere in the imagination. Those who have wings or nothing are fed and warmed, are blest and comforted. He who writes such literature is a benefactor.

There is painting, there is sculpture—perhaps it is a figure of a national hero, or a commemorative statue, or a bas-relief—which inspires us when we come into its presence. There is the radio, which puts us in touch with all the world and brings us infinite riches in a little room. There is wide space, the openness of sea and sky, the movement of winds and rivers, the splendor in the heavens at dawn or sundown. There is the beauty of flowers and the beauty of the human countenance, of quiet, kindly virtues and unselfishness and sacrifice. There are wings in all of these.

Above all, there is the personal influence for the sake of which we live up to the best we know and are true to our own selves. If we had but self to consider, we might be content with indifferent and slipshod living. But there is another whom we cannot disappoint. That other puts in the clouded firmament a star that guides our wandering craft. It is a scheme and an invigoration to know the light is there and that it is unquenchable. No inspiration that comes from things, however lovely they may be, is equal to that which comes from another life that is lived not in the thought of what is to be worn or to be eaten, but in fealty to the unseen.

Montreal, Que.—A despatch from London, Eng., testifies further to the superior qualities of Canadian bacon received in the British Isles, the Dominion product being in greater favor than that of Denmark and threatening to seize its market.

Men of every nationality secured status of citizens of Canada during the fiscal year ending March 31, 1922. Altogether 10,860 foreigners were naturalized. Americans with 2,206 and Russians with 2,060 led in the number of persons who became naturalized Canadians.

It is estimated that unless something unforeseen happens between now and berry-picking season, there will be an enormously increased production of berries in British Columbia this year. In fact, the surplus of raspberries alone, over what has recently been the total output of raspberries, is more than the total production of about four years ago.

Plans are being rapidly completed in connection with the proposed Canadian train to France to contain exhibits of the products of Canada. After the completion of the tour of France, which will embrace all the principal centres, a stationary exhibit will be put up in one of the large buildings in France. One proposal is to erect a large diorama giving a bird's-eye view of Canada, at the stationary exhibition.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.24.
Manitoba oats—Nominal.
Manitoba barley—Nominal.
All the above, track, Bay ports.
American corn—No. 3 yellow, 91c; No. 2, \$1.22.
Barley—Malting, 59 to 61c, according to freight outside.
Buckwheat—No. 2, 78 to 80c.
Rye—No. 2, 84 to 86c.
Peas—No. 2, \$1.45 to \$1.50.
Milled—Del., Montreal freights, bags included: Bran, per ton, \$26; shorts, per ton, \$28; middlings, \$28.50; good flour, \$2.00.
Ontario wheat—No. 2 white, \$1.14 to \$1.16, according to freight outside.
Ontario corn—Nominal.
Ontario flour—Ninety per cent. pat., in jute bags, Montreal, prompt shipment, \$5.10 to \$5.20; Toronto basis, \$5.05 to \$5.15; bulk seaboard, \$4.95 to \$5.00.
Manitoba flour—1st pat., in cotton sacks, \$7.10 per bag; 2nd pat., \$6.60.
Hay—Extra No. 2, per ton, track, Toronto, \$14; mixed, \$11; clover, \$3.
Straw—Car lots, per ton, track, Toronto, \$9.50.
Butter—Finest pasteurized creamery, solids, 50 to 51c; prints, 51 to 52c; ordinary creamery solids, 46 to 48c; prints, 48 to 49c; dairy, 29c; cooking, 15 to 18c.
Eggs—Fresh gathered, 37 to 39c; held, 26 to 29c.
4 to 5 lbs., 22 to 25c; turkeys, young, 10 lbs. and up, 25c; do. old, 20c.
Live poultry—Chickens, milk-fed, over 5 lbs., 25c; do. 4 to 5 lbs., 22c; do. over 5 lbs., 22c; do. 4 to 5 lbs., 18c; do. 2 to 4 lbs., 15 to 18c; hens, over 5 lbs., 25c; do. 4 to 5 lbs., 18c; do. 3 to 4 lbs., 15 to 18c; roosters, 12 to 15c; ducklings, over 5 lbs., 25 to 30c; do. 4 to 5 lbs., 22 to 25c; turkeys, young, 10 lbs. and up, 25c; do. old, dressed poultry—Chickens, milk-fed, over 5 lbs., 30c; do. 4 to 5 lbs., 26c; do. over 5 lbs., 25c; do. 4 to 5 lbs., 24c; do. 2 to 4 lbs., 22c; hens, over 5 lbs., 25c; do. 4 to 5 lbs., 24c; do. 3 to 4 lbs., 22c; roosters, 22c; 15c.
Ducklings, over 5 lbs., 28 to 30c; do. Potatoes—On track, Toronto, 75 to 80c per 90-lb. bag.
Smoked meats—Hams, med., 26 to 28c; cooked ham, 33 to 40c; smoked rolls, 28 to 29c; cottage rolls, 32 to 35c; breakfast bacon, 30 to 33c; ap-

cial brand breakfast bacon, 35c to 38c; backs, boneless, 34 to 40c.

The Value of Good Judgment—

You are considering the purchase of a Car. You are not quite sure of your judgment. You desire to know what the judgment of other car buyers has been. It has been the well-ordered and considered judgment of forty-seven car buyers out of every hundred who have bought cars to buy a Ford Car. Of the remaining fifty-three, the highest number who purchased any one make of car was sixteen. Forty-seven people will average among them better judgment than sixteen. And it was the well-ordered and considered judgment of these people to buy Ford cars. These people were scattered from Halifax to Vancouver—with the average transportation needs to solve for themselves and their goods. They bought Ford Cars. Their judgment was based on—
Lowest Initial Cost.
Lowest Upkeep Cost.
Ability to obtain parts readily and anywhere.
Ability to obtain service at any one of 3,000 Service Stations—in a straight line from Halifax to Vancouver these Service Stations would be only one mile apart. The knowledge that the price of car, the repair parts and service labor is standardized to the lowest possible point.
The well-ordered and considered judgment of forty-seven purchasers out of every hundred purchasers of cars to buy a Ford Car should be the determining factor on your part to buy a Ford Car.
The Price of the Touring Car is \$645.
Freight and Government Taxes extra.
And it can be bought on a monthly payment plan.

A. DUNCANSON - GLENCOE

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO 722

Here and There

Renfrew, Ont.—Mr. Ritchie, the station agent of the Canadian Pacific Railway, has received instructions from headquarters to rigidly enforce the no trespassing order on the property of this company. This is particularly in reference to people walking down the railway track. When accidents happen it always entails a trouble to the company and lately there have been complaints that school children have been using the railway as a thoroughfare.

Vancouver.—"I have been in the Alps and the Pyrenees, but I have never seen anything that can compare with Banff," said William Faversham, famous English actor, when speaking at Hotel Vancouver. Mr. Faversham spoke of the wonderful international dog races staged at the winter carnival, and said that he had on special invitation visited the great motion picture plant at Banff.

Invermere, B.C.—An appropriation had been passed for the building of a depot at Lake Windermere by the Canadian Pacific Railway. Lake Windermere is the depot for the whole of the Lake Windermere district. It enjoys the distinction of being the only station on the Lake Windermere branch between Golden and Fort Steele, which has enjoyed the benefit of an agent since December, 1914. A modest little portable depot, a box car on the ground, has done duty all these years but with the proposed opening of the Banff-Windermere road on the thirtieth of June, it is no doubt thought that it is time the old box car took a move.

Ottawa.—The Canadian National Parks Branch of the Department of the Interior is commencing the construction of a hydro-electric generating station in Cascade creek in Banff National Park to supply light and power for the town of Banff, Alberta. The dam at the outlet of Lake Minnewanka constructed in 1912 to provide storage facilities, will be utilized and will ensure a steady flow of water for power purposes without further impairing the scenic attractions of the locality. Electric power for Banff is at present obtained from the steam plant of the Bankhead Mines. The work will be undertaken by day labor.

Winnipeg.—Seven thousand cars of grain have been loaded between September 1, 1922, and Feb. 1, 1923, for the western coast by the Canadian Pacific Railway. This represents 10,234,000 bushels of grain for export from Vancouver. The shipments comprised 6,175 cars of wheat, 162 cars, 16 barley and 50 rye. Exports from the western coast were destined as follows: The Orient, 896,880 bushels, and the United Kingdom 987,905 bushels. As at January 31, there were 900,000 bushels of Canadian Pacific grain in the elevator at Vancouver and 500 cars in transit carrying 735,000 bushels of wheat. The present movement was averaging 25 cars a day.

WHY ADVERTISING PAYS

Plainly the newspaper is a good advertising medium, because, in the first place, all those who read at all read a newspaper some time during the day. People who buy a newspaper read and demand the news of advertising as well as the news of the world.

Newspaper reading is a fixed habit, and nothing is so close to a man or a woman as the particular newspaper of their individual choice.

NORTH NEWBURY

Abner Burr received a large shipment of roofing this week for his new buildings.

It looks as if March is going to give us a little winter after the lovely spring days we were enjoying.

David Armstrong and Albert Brownlee were in the neighborhood last week shipping a carload of horses.

Mr. Johnston, representing the Christie-Brown Blast Co., Toronto, was in the burg on Friday.

Mr. Huis, wood buyer, made a business trip to Windsor last week.

Mrs. David Armstrong left for London Tuesday to wait on her sister, who is ill in that city.

Mr. Robinson, of Edy's Mills, arrived from the West via C.P.R. Saturday evening.

The wood shipping is still booming at the C.P.R. yards, five cars being shipped out during the past week.

WOODGREEN

A number from here attended the play and dance at Wardville Thursday night.

Miss Florence Mitchell, of Detroit, and Mrs. Walker spent Tuesday at H. Harvey's.

Mr. and Mrs. H. Harvey entertained a number of young folks on Friday evening. An enjoyable time was had by all.

Mr. Robert McKellar and children visited at Mrs. Andrew Clannahan's last week.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Canada is bounded by three oceans.

Some Indian-treaty payments are now made by airplane.

WALL PAPER Solves every decorating problem

Now is the time to freshen and beautify the home interior. Do not let this Spring go by without that re-decorating which every home requires. If you would have your new wall decorations in accord with the latest conceptions of the best authorities, insist on papers bearing the name

BOXER Master Makers of Wall Papers

In their collection you will find just what you are looking for. The patterns are applicable to any interior.

These new patterns are 2 1/4 inches wider than the old type of Wall Paper; which,

besides enabling you to paper a room with fewer rolls, means easier hanging, more beautiful designs and the improved appearance which results from fewer seams.

Look for the name "Boxer" on the selvage.

GLADNESS IN SERVICE:—Serve the Lord with gladness. Enter into His courts with thanksgiving, and into His courts with praise; be thankful unto Him, and bless His name. For the Lord is good.—Psalm 100: 2, 4.

Born
GOUGH.—On Thursday, March 1, 1923, to Mr. and Mrs. Fred R. Gough, Glencoe, a daughter—Edna Marie.

TOWN AND VICINITY
The weather changes are fast if not furious. Gasoline has gone up another cent in price.

Russell Parish has sold his residence to G. W. Sutton. Lots of folks want to put in radio but don't like to ask the small boy next door how to do the thing up.

The final oratorical contest for the Lethbridge medal will be held in No. 9 school house, Friday, March 16th. Mrs. Duncan A. McCallum, of Moss, who has been in ill health for some time, was reported yesterday to be very low.

An experienced business man says: "The only man who thinks a dun an insult is the one who would dodge payment if he knew how."

A special song service will be given by the Presbyterian choir next Sunday evening. Miss Nona Dobson, of Chatham, is expected to assist.

The final game of the Northern Hockey League to decide the winners will be played between Galt and Glencoe at the Carman arena here on Friday night, March 9th.

Don H. Love was in London on Monday and secured a manufacturer's license for the manufacture of different kinds of iron and wood products. In addition to his present business. See adv.

On top of the wholesale price of gasoline there is the sales tax and transportation charges, which the retail dealer has to foot. The consumer is apt to overlook this fact when calculating the dealer's profits. Allan McPherson, reeve, was in Toronto last week, being one of a delegation from the county council and other organizations to confer with the government in regard to the establishing of a juvenile court for Middlesex county and the city of London. Sheriff D. A. Graham has automatically taken over the duties of high constable of Middlesex county, succeeding B. F. Watterworth, whose appointment has not been renewed. It

is understood this will be but a temporary move pending the reorganization of the county police force.

During the summer months of 1922 Middlesex county constables summoned 500 automobile speeders, for which they received fees totalling about \$1250. The majority of convictions were obtained in Westminster township and were registered against automobile owners who were either in a hurry to reach Port Stanley or anxious to get home from the lake side.

Jean Wing, a Chinese laundryman, is returning to his native country after a successful business career in Alvington. A number of the citizens of that village presented Mr. Wing with a handsome gold watch as a mark of their esteem. He wishes through these columns to express his thanks for the kindness and hearty support extended to him by the public during the period of his residence in Alvington.

There was a largely attended meeting of the Presbyterian Guild on Monday evening. The literary committee had charge and presented an attractive program. Rev. Wm. Willans gave an inspiring talk on the life and teachings of John Wycliffe. Musical numbers consisted of a cello solo by Miss Hazel McAlpine and a vocal solo by Miss Elsie King. Miss Evelyn McLaughlin, Chas. Cumming and Joe Grant gave interesting accounts of the Young People's Rally held recently in London.

Now that the name Grand Trunk Railway is to become a thing of the past it is interesting to note that the Grand Trunk Railway was given a charter in 1850, and a Railway Act was passed making provision that the G. T. R. could be built as a public work by the Canadian Government in co-operation with the municipalities most affected. The London and Gore Railway was chartered in 1854 and became the nucleus of the Great Western Railway, constructed from London to Windsor in 1852-54, which in 1879 was merged into the Grand Trunk Railway system.

SPECIAL NOTICES

Good cook stove for sale, cheap.—P. E. Lumley.

Good seed barley for sale. Apply to Tom Walker, Glencoe.

Lost — old-fashioned gold earring. Reward if left at this office.

For sale—good seed peas.—John A. Campbell, Route 1, Walkers.

Monday, March 12, is the date of Fashion Show at Mayhew's. See ad. on front page.

Call at Scott's shoe store and get quality shoes and rubbers at a moderate price for cash.

Don't smoke that strong pipe when you can buy a French briar for 25c. at Central Billiard Parlor.

Car of shelled corn expected to arrive today. For particulars apply at Co-operative store, phone 39.

Ladies! Attend the opening display of spring millinery at Hill's Cash Store, Saturday, March 10.

The box social advertised last week for March 16th has been changed to Thursday evening, March 15th, at U. S. S. No. 17, Moss, under the auspices of Kilmartin athletic club.

The Woodgreen dramatic club will present their play, "Aunt Cleopatra's Courtship," at S. S. No. 7, Moss, Friday, March 9. Admission, 25c. Come and enjoy a good program.

Coming! Rodney dramatic club will present "The Jonah" in Glencoe opera house, Wednesday evening, March 14, under the auspices of Glencoe Memorial Hall. Admission—adults, 50c; children 35c.

The Walkers dramatic club will present their play, "Aaron Slick from Punkin Creek," on Friday evening, March 9, in Napier town hall. Come one, come all and enjoy it. Don't forget the lunch and old-time dance afterwards.

The Pollyanna Mission Circle of the Methodist church will hold their annual bazaar in the basement of the church on March 17, when there will be on sale a variety of homemade cooking, candy, fancy articles. Lunch will be served.

Is C.N.E.'s First Farmer President

MR. ROBERT MILLER

of Stonyville, elected head of the Canadian National Exhibition. Mr. Miller is said to have imported more pure-bred live stock to America than any other man. He is of the third generation of farmers in Canada and has been a member of the Exhibition Association since 1907 and a Director since 1915.

PERSONAL AND SOCIAL

—Mrs. McPherson, of Kincardine, is visiting her son, R. M. McPherson. —Robert Hollingshead, of Toronto, spent the week-end with his mother here.

—J. G. Lethbridge, member of the Legislature, was home from Toronto for the week-end.

—Mrs. L. W. Clue, of Windsor, spent the week-end with her sister, Mrs. C. O. Smith.

—Miss Alta Johnston, of London, and Miss Leota Sutherland, of Delaware, are visiting Mrs. R. Singleton.

—John A. McCallum returned on Saturday to Scotsguard, Sask., after spending the winter with relatives here.

—Mrs. E. F. Reycraft has returned home after spending two weeks with her daughter, Mrs. D. L. Mitchell, of Detroit.

—Mrs. (Dr.) McIntyre, of Carmel, Cal., formerly of Glencoe, is visiting friends and relatives in Alisa Craig and vicinity.

—Mr. and Mrs. Calvert Reycraft attended the funeral of the latter's niece, little Evelyn Howe, of Windsor, last week.

—Mr. and Mrs. Elliott Douglas and family, of Windsor, were here last week attending the funeral of the late James Douglas.

—Mrs. Gordon Hall and children, Helen and Jack, of Peace River, Alberta, spent a couple of weeks with Mr. and Mrs. Lou Hull.

—D. C. Gillies accompanied his sister to Harper Hospital, Detroit, on Sunday, and visited Mr. and Mrs. W. D. McIntyre before returning.

AUCTION SALES

Readers are reminded of the sale of farm stock and implements of G. W. Sutton, at lot 21, con. 4, Ekfrid, Thursday, March 8, commencing at 1 o'clock.

No doubt a very large crowd will attend Geo. W. Smoker's auction sale at lot 29, con. 9, Euphemia, on Wednesday, March 14. About 30 head of pure bred and grade milch cows, heifers and steers will be sold as stock must be reduced, owing to the death of his son. Several good pigs must also be sold regardless of cost. Anyone desirous of improving their herds have a chance to do so by attending this reduction sale. Come and talk the matter over with Geo. E. Brown, auctioneer.

On lots 22 and 23, range 4 south of Longwoods Road, Ekfrid, on Tuesday, March 20, at 1 o'clock:—1 Clydesdale mare, 8 years old, in foal; 1 Clydesdale horse, rising 4; 1 good work horse, 11 years old; 1 Clydesdale colt, rising 2; 1 blood mare, rising 4; 1 spotted cow, due about 1st of June; 1 red cow, due about 1st of April; 2 red cows, milking good; 1 roan heifer, due July 23rd; 1 red heifer, due July 25th; 2 roan heifers, yearlings; 1 spotted steer, yearling; 2 roan heifer calves; 2 red steer calves; 1 Chester sow, due to farrow in April; 1 York sow, due to farrow about 1st of May; 3 young sows, due to farrow in June; 2 shoats, about 150 lbs.; 5 young pigs; 4 choice ewes, with lambs; 1 collier pup; 1 two-horse corn cultivator; 1 wagon, 2½-inch tire; 1 two-furrow walking plow; 1 Oliver walking plow; 1 set lance-tooth harrows; quantity of inch lumber; 1 set light harness; scythe, wheelbarrow, neckyoke and whiffletrees, forks, shovels, and other things too numerous to mention.—D. N. Allan, auctioneer; L. L. McTaggart, auctioneer.

Margaret Marshall will give an address on the British Empire. Miss Marshall won the silver medal in the oratorical contest for Western Ontario. Other numbers will be on the program.

George Wood is moving out to the McCracken farm this week.

Signature of

CANADIAN GOVERNMENT ANNUITIES

A Canadian Government Annuity is a fixed yearly income payable by the Government of Canada for life in quarterly instalment, unless otherwise provided. It is a safe and lucrative form of investment for persons of all ages and circumstances, whether immediate income purposes or as provision for old age.

Among the advantages to be obtained from the purchase of a Government Annuity are:—

That it is the safest investment that can be made, as it has behind it the security of the whole of the Dominion of Canada.

That it is free from taxation for Dominion purposes.

That it is payable for life.

That it is not transferable.

That it cannot be alienated.

That it cannot be forfeited.

That it cannot be stolen.

That it cannot be seized or levied upon by or under the process of any law or court.

That it is not affected by the fluctuation of business, or trade depression.

That the purchaser does not have to die to win, but enjoys a personal participation in the fruits of his labor.

That the Annuity gets the full benefit of all that his money earns, as the expenses of management are borne by the Government.

The postmaster at Glencoe will be pleased to give any information relating to Dominion Government Annuities.

When sending parcels through the mails any post office in Canada or the United States, ask to have them insured against loss or damage. It costs only a few cents. The limit of weight for a parcel is 11 pounds.

MODEL CENTRE

The last literary meeting was a decided success when No. 7 debaters championed in Public Ownership vs. Private Ownership, against No. 5 debaters. A piano solo by Robert Caruthers and violin selections were other features of the evening. Another meeting of the society will be held on Friday, March 9, when Miss

LINKING CANADA AND THE STATES

THE automobile has become a national institution for transcontinental touring and in United States five million persons last year are recorded as having whirled from one national park to another. Boston to the Pacific Coast by motor is getting to be as casual as train travel. With a camp outfit tied to the running boards and a few additional auto parts, the motorists are able to dress in their sports clothes, throw care to the wind and search out Nature with the help of a little gasoline.

Hotels are only used on bath nights, as the chief fun is to pitch the tent in the open and cook over a camp fire, or, as is the case throughout the West, over specially built camp stoves established in the open places. Rustic camps are also placed in most of the national parks

where motorists may rest for a few days or weeks, in cabins rented at a moderate price and within a short walk of a community house and dining hall.

The Canadian Pacific Rockies are this year to be opened to all such motor tourists, for the Canadian Government in co-operation with the Canadian Pacific Railway, has completed the Banff-Windermere automobile road which throws open Banff, Lake Louise and Windermere Valley to motorists.

Bungalow camps are being planned at convenient and beautiful points to accommodate just such travel in addition to the regular travel which comes by rail.

The new road will be formally opened on June 30th and will permit the whole tide of motor traffic up and down the Pacific Coast to travel from San Diego to Portland,

thence up the Columbia Highway to Spokane and so on, through the Canadian border, up the Windermere Valley, through the Canadian Pacific Rockies to the famous resorts of Banff and Lake Louise. From Lake Louise the motorist may go to the Valley of Ten Peaks and Moraine Lake. This is entirely new country for the autist approaching from the West, although the road from the East, Calgary to Lake Louise, through Banff, has been in operation two years.

The connecting of this link makes it possible for motorists from the East to tour all the National Parks of the United States and visit those in the Canadian Pacific Rockies as well. The roads from one end of the country to the other are generally excellent. The cost of such motor trips is cheaper than staying at home, say the motor tourists.

Care of Flock at Lambing Time.
Breeding ewes should be put in a good thriving condition and kept in that condition throughout the winter up to lambing time, care being taken to have them neither too fat nor too thin. Ewes that carry excessive flesh usually develop a good deal of fat inside, which prevents the proper development of the lamb and very often is the direct cause of so many ills at lambing time. On the other hand, ewes that are too thin have not sufficient nourishment for the proper development of the young, either before or after birth. A good ration for breeding ewes is a mixture of one and one-half parts of oats to one part of good wheat bran, fed at the rate of one-half pound per ewe per day along with two pounds of good roots and two to three pounds of good clover hay per day. Roots should be reduced in the feeding ration one month previous to lambing time.

At weaning time the shepherd should keep a watchful eye on the flock both night and day, very often a little careful attention to the newly born lambs means an extra one added to the flock. This is particularly true with the young mothers and in cases of twins or triplets. Very often one of these is weaker than the other, and should it become chilled may die before it gains sufficient strength to take nourishment from the mother.

When the lambing season is early a comfortable lambing pen is essential; in fact it is profitable at any time, for very often ewes with twins or triplets when left in the flock will drown their lambs. Furthermore, ewes after lambing require more generous feeding, and the lambing pen makes this possible. A careful watch to assist the weak ones will reduce the number of losses. In cases of heavy milkers, milk fever may occur. In such cases the udder should be bathed in warm water, thoroughly dried and rubbed with pure hog lard as hot as the eye can stand. If the teats become sore from lambs biting them, two or three applications of vaseline per day will help them. All wool on the udders that prevents the lambs from feeding properly should be clipped off with the shears.

It has been noted that lambs soon begin taking a little of the grain mixture fed to their mothers, therefore it is advisable to have a small run made at one end of the pen into which the lambs only may go and be fed separately. A good grain mixture for lambs is two parts of wheat bran, one part of crushed oats, one part of finely ground corn meal and from one-quarter to one-half part of oil-meal. Whole oats will do, but the former is preferable. Should a ewe not have sufficient milk for her young, the lamb may be materially helped out by giving it two or three feeds per day of cows' milk.

All lambs should be marked a few days after birth, thus saving trouble later on. All ram lambs that are undesirable as breeders should be castrated and all lambs docked at the age of two or three weeks.

As many of the failures in the sheep industry can be attributed to carelessness and negligence during the breeding and lambing seasons, it is most essential that careful study and attention be given to the flock at this time if success is to be assured.

Keep the Cow Comfortable.
The dairy cow, to give a large yield of milk of high butter-fat per cent.

must be made comfortable. Most dairymen stable their cows most of the time during the winter. I find that on an average, my cows are stabled twenty-three out of every twenty-four hours. Mild days I allow my cows to remain in the yard from one to two hours, but in chilling weather they are in the yard just long enough for watering. I believe daily outdoor exercise adds to the health and comfort of the dairy cow.

My cows are tied with swinging stanchions. These stanchions are suspended on a short chain about six inches long and are also fastened at the bottom with a short chain about the same length. I like this stanchion as it gives the cows a great deal of liberty, yet they are properly tied. I do not like the rigid stanchion. For years we tied our cows with chains about the neck, attached to a vertical bar. This tie was far ahead of the rigid stanchion from the standpoint of comfort of the cows, but the swinging stanchions are the most satisfactory of all.

To stable cows comfortably, a properly arranged and constructed stall is essential. We have used plank floors, cobblestone and block floors in our stable, but the cement floor is the most satisfactory, beyond all question. It is easy to keep clean and sanitary and because of this there is no unpleasant odor about the stable. I consider foul gases about the stable as injurious to the health of the cows as to the dairymen himself. I believe a smooth, tight floor an important factor in the sanitary stabling of cows.

The stable should have plenty of windows on all sides, if possible, and especially on the south side. During winter the days are short and many days are cloudy. Unless there are plenty of windows the stable will be very dark and gloomy. The dairy cow, like a human being, enjoys sunshine. My cows are stabled along the south side of my barn so that the sun can shine directly upon the cows.

Good ventilation is absolutely necessary to the health and comfort of the cows. Few farm barns are equipped with an adequate system of ventilation. However, fresh air may be brought into the stable in various ways if care is exercised to avoid direct drafts. One or more windows may be raised several inches and a board fitted across the opening in such a manner as to allow fresh air to come in without draft. A door may be left partly open on the side opposite the prevailing wind. Abundance of fresh air is essential for the health and comfort of the dairy cow.

To consume her food profitably the dairy cow must have a comfortable bed to lie on. Plenty of clean, dry bedding not only provides comfort but assists in keeping the cows clean, and the stable sanitary. I like to use all the bedding I possibly can, in my stable as it not only keeps my cows clean and makes them comfortable, but materially increases my manure supply.—Leo C. Reynolds.

Study the Individual Cow.

From various experiments in feeding dairy cattle, and from observations made through the records of cow-testing associations, it has been found that good feeding will increase the milk flow of the average cow from 25 to 50 per cent., says Mr. A. H. White, Chief Dairy Promoter of the Dominion Dairy and Cold Storage Branch, in his recently issued pamphlet on cow-testing. To bring this increase about, it is not sufficient for the dairymen to know the requirements of his herd as a whole; he must know the necessities of each individual cow in order that she may produce the most. This knowledge can be obtained only by keeping records of each cow; but, as Mr. White points out, where there is a milk shed, it is an easy and simple matter to asperction the grain ration according to each animal's production. It is no uncommon thing to find dairy cows being fed a ration of silage, hay and straw with a little oat chop and no grain at all. Yet they are expected to produce milk profitably! As the author further says, protein is a necessity and should be supplied either in good alfalfa or clover hay or in such concentrates and grains as all meal, cotton seed cake, gluten meal, bran, oat chop, and other meals.

Small Profit in Scrub Stock.

To secure quality and early maturity in beef animals (and it might be added for economy), a good pure-bred bull is essential. With present prices it would pay most farmers to buy such an animal now, or if not, to set about making arrangements for the use of a pure-bred bull in the spring. If there is no animal of the kind near, the Dominion Live Stock Commissioner has arrangements for overcoming the difficulty, and will furnish information on request.

Died Bald.

The pupils had been writing a history essay, and when the teacher was correcting the papers she was puzzled to find this remark in one of them: "King John died bald."

On being questioned, the boy who had written this said: "Well, teacher, you said he died without hairs!"

TO WREST WEALTH FROM THE HINTERLAND.

When geologists, mineralogists and prospectors all agree that Northern Quebec has the richest bit of wealth producing land yet untapped in Canada, it can be readily expected that there will be the next great gold rush. In spite of intense winter weather thousands of gold seekers are already in Rouyn Township seeking the precious metal. An unprecedented rush is predicted for the spring when the waterways open up. It lies just east of the Quebec border and not far distant from the rich ore fields of northern Ontario. The water route to the new field will be by a chain of lakes and rivers from the head of Lake Temiskaming.

HOGS

The feeding value of alfalfa for hogs has been demonstrated in numerous instances, but it would not seem amiss at the present time to offer a brief discussion on the matter. Because of its suitability in a variety of forms, it has proven to be a boon to the hog raiser.

When used in the form of green feed either as a soiling or pasture crop, when cured and used as hay, or ground into meal, it has been found that almost invariably this feed has taken a foremost place when compared with the other legumes.

In the cured state as hay it is particularly well adapted to meet the requirements of mature hogs as a roughage. The hogs consume only the finer portions of the stems and the leaves, and it is, therefore, very important when harvesting this crop to preserve as many of the leaves as possible.

Analysis shows that alfalfa contains upwards of 16 per cent. of crude protein and about 8.5 per cent. of mineral matter or ash. Both these constituents are relatively important in the case of the hog, for the protein is one of the most expensive constituents of the ration. When this produced from alfalfa hay, which is a

relatively inexpensive source, it permits of a material reduction in the cost of the ration of mature stock.

There is little advantage to be gained from chopping alfalfa or grinding it into meal, except for young pigs, because of the fact that the increased value has not proven sufficiently great to offset the additional cost. In the case of young pigs, however, which are incapable of handling any appreciable quantity of roughage, alfalfa can be used in the form of meal to good advantage.

Because of the peculiar limitations of the hog in the handling of roughages, this class of stock cannot make substantial gains on alfalfa pasture alone without the addition of concentrates. Some form of meal is necessary in order to produce economical gains. Experimental results have shown that when on alfalfa pasture the most economical as well as the most rapid gains are realized when from 2½ to 3½ pounds of corn or barley meal are supplied for every pound gain in live weight. It was further found that the most economical gains on alfalfa pasture are obtained from hogs which weigh in the proximity of 100 pounds when placed on the pasture.

It is a generally accepted fact that somewhat greater gains may be obtained where a system of soiling is practiced than when hogs are pastured, but the not inconsiderable additional labor and expense involved in the cutting and hauling of the crop has resulted in the production of pork by this method being fully as expensive when compared on the basis of cost per pound of gain in live weight.

Grading of Eggs.

The only exported farm product, excepting fruit, in which we do any grading worth mentioning at the present moment is eggs, and when it comes to eggs Canada ranks highest, next to the home article or the Holland article, which of course, reaches Britain inside of twenty-four hours. Thirty dozen crates, "Canada Firsts," were quoted some shillings higher than American selected eggs. Americans being naturally our greatest competitors," testified the Deputy Minister of Agriculture of the Dominion in a delivery on his return from a personal investigation of the British market. In connection with this statement it is interesting to note that Canada is the only country in the world with egg standards based on the actual quality of the egg. These standards are based on weight, size of air cell, visibility of yolk, firmness of the white, and cleanliness. In the standards, eggs are divided into three classes—fresh, storage and preserved, cracked and dirty. The class for fresh is again divided into the grades, specials, extras, pullet extras, first and seconds, and the class for storage and preserved into the grades, extras, firsts, and seconds. If, inspected eggs are intended for export and are up to grade, they receive the Government mark, consisting of a maple leaf design bearing the words "Canadian Eggs" "Government Inspected."

A system of inspection for imported eggs has also been adopted and came into effect on October 7, 1922, since which time inspectors working under the Dominion Department of Agriculture have been able to report an improvement in eggs from the United States compared with shipments earlier in the season. In ship-

ment, the selling and purchasing of eggs for home consumption by grade has been encouraged, and retailers report complete satisfaction in the method of grading adopted. An advertising campaign with this object in view has just been concluded by the Department, covering the significance of grading and the culinary uses to which the different grades may be put. A provision in the regulations relative to grading requires wholesalers and retailers to live up to any grade names they may adopt, and to be sure that the eggs sold under those names meet the requirements and definitions when candled.

Safety first, and all the time. Harnesses in good repair are accident insurance.

Brantford Concrete Mixer
Add Concrete Improvements to Your Farm
The farmer of to-day realizes the advantages of concrete built ditches, troughs, fence posts, etc. The "Brantford" is the biggest value for money size 22 inch. Loads and unloads from either side. Made on skids, or mounted on trucks, with or without engine. Write for booklet. Good Shapley & Sons, Ltd., 500 Wellington St., Brantford, Ont.

Irrigated Farms in Southern Alberta

The Famous Yampouli District
Now River Irrigation Project
An especially good location for mixed farming and dairying. Splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. **THIS IS NOT PIONEERING**, the first 10,000 acres are fully settled and another 10,000 acres now ready for settlement. Most fruit districts from railroad, seven miles. Good roads, telephone, schools. Easy payments, extending over 15 years. **This is the Best Land Buy in Alberta.** Write for further information to: **CANADA LAND AND IRRIGATION**, Medicine Hat, ALBERTA.

KENDALL'S SPRAIN TREATMENT

Keep Kendall's always in the barn. A strained muscle, a sprung tendon, a job or a knock demands immediate attention. A few hours' delay will result in a long lameness—perhaps in the loss of the horse. Kendall's Spavin Treatment has saved more horses than all the other known remedies. Under the name of Kendall's Spavin Cure, it is the forty-year-old standby of horsemen, farmers and veterinarians.

Get a bottle of Kendall's today. Ask, too, for the Free Book or write for it to **DR. R. J. KENDALL COMPANY, ENOSBURG FALLS, N.Y., U.S.A.**

AMBITIOUS MEN AND WOMEN

make big money selling our English-made, four-ply knitting wools. Sell on sight. Profits 15 cents and 31 cents. Shoddy samples free. Write today. **English Wool Company**, Dept. W1, BOX 691, MONTREAL.

Corrugated Galvanized Steel Roofing

Direct from Manufacturers to Consumer. Write for Prices. **The Metallic Roofing Co., Ltd.**, 1124 King St. W., Toronto.

Give Your Chicks a Strong Start

Every chick you lose means real money wasted. Give the youngsters a fair start, and you can carry them to healthy maturity on **Pratts Buttermilk Baby Chick Food**—the original "Baby Food for Baby Chicks." Contains every food element needed for the first few weeks. Mechanically predigested. Takes the strain off the delicate digestive organs. Prevents bowel troubles. Insures rapid growth and vigorous health. Positively no other food like it in existence.

Your Money Back if YOU Are Not Satisfied. **PRATT'S FOOD CO. OF CANADA, Limited**, 2129 Carlaw Avenue, Toronto.

PRATT'S 51st YEAR OF SERVICE

THE CHILDREN'S HOUR

A Ride in a Dog House.

Willie and Donald were playing hide and seek, and Willie was looking for a good place to hide. In the next yard he saw a dog house, which Mr. Willis, the carpenter, had just finished. He crept inside it.

It was very comfortable in the little house, and Willie fell asleep. Donald searched for a long time before he thought of the dog house. He peeped in and, seeing Willie asleep, thought he would play a little trick on him; so he quietly closed the door and slipped the bolt and then went home to supper.

Donald ate his supper, forgot all about Willie and went to bed. But sometime in the night he awoke and remembered what he had done. He put on his clothes, crept downstairs and went into the darkness. He found his way to Mr. Willis's yard, but he could not find the dog house. He was very much frightened, but he knew he must find Willie. He pulled the heavy knocker. It sounded all through the house. Mr. Willis came down with a light in his hand.

"Why, Donald!" he said when he saw the small boy. "What is the matter?"

"I locked Willie in the dog house and it is gone," he said in a frightened voice.

"Of course it's gone," Mr. Willis replied. "I just finished it yesterday for a man down at Millville, and I sent it over on the evening train. I remember that the box felt rather heavy when I lifted it on the car. Does his mother know what has happened?"

"No. Willie goes down every night to stay with his aunt while his uncle is away."

"I see. She thinks he is down there. Perhaps he is, Donald. Go back to bed, and in the morning we'll look him up."

Donald did not say anything more. He ran home to his room, but he could not sleep. He thought of Willie in the dog house, alone in the dark and without any supper.

Again he crept down to the kitchen. He put a biscuit in his pocket and started to find his friend. He knew that if he kept to the railroad track he would finally reach Millville. It was a long way off—nearly ten miles, but he meant to go there at once.

As Donald walked on through the darkness he felt very much afraid. He had to rest a great many times, and his feet blistered and grew very sore. It was getting very light when he reached Millville. He looked for the dog house, but it was not there, so he sat down to wait until Mr. Willis should come to help him find Willie. He felt a little better now that morning had come, and, laying his head against the station door, he went to sleep.

"He's gone, Donald!" somebody cried. He sat up and rubbed his eyes. There was Willie with the ticket agent.

"You are a fine boy to lock a fellow up and forget him," said Willie, taking it for granted. "How did you get here?"

"I walked," Donald said wearily. Willie seemed to enjoy the adventure. "I never woke up," he told Donald, "until the man lifted the dog house off the train. I peeped through the hole, and then I knew what had happened."

"And he barked so loud," said the ticket agent, "that we opened the door. Out crawled a boy instead of a dog, and I had to take him home and feed him."

Just then Mr. Willis came along in his car. "I see the lost dog has been found," he said, laughing. "How did you get here, Donald?"

"He walked ten miles in the dark," the ticket agent answered.—Evangeline Weir, in Youth's Companion.

Cresosote in Stovepipes.

To prevent creosote running down the stovepipe when wood is used in place of coal, just leave the check draft in upper or feed door open all the time.

A certain farmer decided that he wanted no careless shooting on his place. So the family prepared the following: "No Hunting on This Farm." After the sign was finished, they thought that the owner's name should appear upon it. There was only one space where there was room for it, so when the sign was nailed up, it read:

**NO HUNTING
JOHN SMITH
ON THIS
FARM**

HOW HE MOVED
Teacher: Why are you so slow, John? You seem to move by inches!
John: But, teacher, anybody can see I move by feet!

The Reach of a Life.

A freight train was slowing down at the switch to take the siding to avoid a passenger train that was due. It was on a downgrade, and the freight was long and heavy; the engine ran ten or fifteen feet past the switch before it came to a grinding halt. In a moment the wheels were reversed, and it started back. Puff! Puff! Four long blasts from the stack, and the car next to the engine bumped the car behind it. That car in turn bumped the one next to it, and so on and on the cars bumped one another until at last the caboose jarred suddenly and then began slowly to move back up the grade.

A life runs smoothly down grade, not necessarily a steep grade, but a grade that means ease and pleasure, indifference and carelessness. Suddenly that life, hears the orders of the Master to halt and turn back. It obeys, and backward on the upgrade the long journey begins. The face is set to another goal; the life is being worked out on other principles than those of ease and selfishness. It suddenly becomes a power; it is not rolling easily down grade but under high pressure is pushing upward.

The life nearest that one, perhaps the wife of the man, feels the impact of the change; then the children feel it through the mother; then the school friends feel it through the children; the teacher feels it through the pupils; and then the circle of the teacher's friends is touched, and the change comes to them. More distant friends feel it through the letters that go out. The church, the community, the city, the nation, and the foreign lands through the missionaries and through Christian business all feel it. The change may be slight, yet it is felt to the ends of the earth, and the whole train of those who have experienced the impulse moves upgrade to better things.

Golden Glassware.

Cups and saucers, plates and other articles of tableware which look as if made of purest gold command fancy prices in the shops. They are very beautiful.

Yet this manufacture is a simple process, and taking into consideration the cost of their production, they ought to be much less expensive than they are. For they are nothing but ordinary glass coated with gold dust.

The glass, cup or other article is heated to a high temperature—to a red heat, in fact—causing the material to expand. Then it is placed on a slowly-revolving disc while a spray of finely powdered gold is directed upon it from the nozzle of a little machine held in the hand, which is operated by compressed air. Owing to the expansion of the hot surface, the metal particles are absorbed by the latter, becoming intimately incorporated with it. The surface layer of the glass becomes golden. Of course the last of a cup or jar must be treated in this way as well as the outside.

All of the beautiful metallic-hued glassware so much admired nowadays is produced by this simple process. Oxides of various metals—manganese, nickel, copper, cobalt, etc.—are used for the purpose of giving exquisite iridescent hues. Sometimes gold dust is mixed with copper oxide. Wineglasses made in this way are a delight to the eye, and no two of them are quite alike.

A Popular Role.

Mrs. Gates had the barrel of russet apples placed in the attic because they were not quite ripe enough to eat, and she warned her three boys, whose ages range from five to eleven years, not to touch them.

Then one rainy day, when she sought the attic to get something from a trunk, she came full upon her sons, surrounded by apple cores. At her approach, two of the boys drew closer together; but the third, a little distance off, who lay on his stomach, contentedly munching an apple, apparently paid no attention to his mother's entrance.

"John! Henry! William!" she exclaimed, reproachfully. "Didn't I tell you not to touch them?"

"Yes, mother," replied John, the eldest, "but we're not really eating them. We're acting the Garden of Eden. Willie and I are Adam and Eve, and Henry, over there, is the serpent, trying to lead us to our downfall by showing us how good the apples are."

"But," began the mother, as sternly as she was able, "you two must have been eating apples; Henry hasn't done it all. I see as many as ten cores around you."

"Oh, yeth," returned Willie, the youngest, "we've all been taking turns being the serpent."

Checking His Reputation.

A young Negro walked into a post-office and asked to use the telephone. He left the door of the box open, and the postmistress overheard the following:

"Dat yoh, Mist Johnson? Ah've bin wonderin' if yoh need a boy ter cut yoh grass an' help around the house?"

Yoh got a boy does it? You puffy satisfied with him? Uh-huh, all right, Mist Johnson."

The postmistress said to him, when he was going: "I can give you a job. We need someone useful."

"Much obliged," said the Negro. "But Ah've got a job. Ah works for Mist Johnson. Ah jus' bin checkin' mahself up."

"Too much holiday is as bad as too little," says a well-known doctor.

Fresh water eels travel a distance equal to a quarter of the earth's circumference, about 6,000 miles, in their lives.

A MOTHER'S HEALTH NEEDS GREAT CARE

Care of Home and Children Often Causes a Breakdown.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while hurried meals, broken rest, and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through weakness, headaches, backaches and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well; when ill she must make her blood rich to renew her health. The nursing mother more than any other woman in the world needs rich blood and plenty of it. There is one way to get this good blood so necessary to perfect health, and that is through the use of Dr. Williams' Pink Pills. Mrs. W. T. Riley, R.R. No. 1, Apple Hill, Ont., has proved the great value of Dr. Williams' Pink Pills to mothers, and tells her story as follows:—"Two years ago, after the birth of my boy, I became very weak and run down. Gradually I lost weight and energy until I was unable to do my housework. I could not sleep, my nerves would twitch and jump so that I arose in the morning with heavy aching limbs and head. Indigestion helped to make the misery worse, and my heart would palpitate terribly. I doctored steadily for a year without getting better, but just dragged along feeling that I would never be well again. But one lucky day, on the advice of a friend, I began treatment with Dr. Williams' Pink Pills. I have taken only six boxes, but I wish you could see the difference. I am now able to do my work, go about and enjoy myself. I feel so entirely like a new woman that I advise every weak or ailing woman to try Dr. Williams' Pink Pills and I know they will get beneficial results."

If you are ailing, easily tired or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a fair trial. What this medicine has done for others it will surely do for you. You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

To My Mother.

Deal gently with her, Time; these many years Of life have brought more smiles with them than tears, Lay not thy hand too harshly on her brow, But trace decline so slowly on her brow That like a sunset of the northern clime, Where twilight lingers in the summer time, And fades at last into the silent night Ere one may note the passing of the light, So may she pass—since 'tis our common lot—As one who, resting, sleeps and knows it not.

—John Allen Wyeth.

A crowd of a million persons standing in comfort would cover seventy acres.

Londoners have lost the knack of laughing, according to a German business man who has been in the metropolis for the first time since 1914.

MAN OF LETTERS THANKS TANLAC

Canadian Writer Declares He Never Saw Its Equal for Building One Up.

"Tanlac is a faithful old friend that never fails me," declared James A. Brain, 671 Gerrard St. E., Toronto, Ont., recently. Mr. Brain is one of Toronto's best known citizens, and in addition to being a successful business man, has written many poems and songs that have gained wide popularity.

"I've been taking an occasional treatment of Tanlac for four years, and it keeps me in fine condition. Why, right now, I feel like I could hold ground in a foot race with any man my age in Canada."

"Before taking Tanlac, I was all run-down, had little appetite, and was suffering from indigestion. I wasn't sleeping well and was often so weak and nervous I couldn't attend to business."

"Well, sir, all these ailments disappeared with my first treatment of Tanlac, and to this good day I've been eating, sleeping and feeling fine. In all my seventy years, I've never seen the equal of Tanlac, and I just wouldn't be without it."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Secret.

I know a thing that no one knows
Save only one and I.
So frail it is, a thread seems strong,
So great, it mocks the sky.

I dare not tell it if I would,
And would not if I dared.
It is so shining even gold
Is only dull compared.

But he must tell it—I must wait,
As modest maidens do.
My little heart, will be glad
To find I know it too?

—Helen Frazee-Bower.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Something Worth While.

Guest (inspecting pictures)—"Ah! an old master, I think?"
Mrs. Newrich—"Yes; but the frame is new."

MONEY ORDERS.

Ten years is the average life of an oyster.

Neither Seen Nor Heard.

A small girl was at her first grown-up dinner party, and, being wedged in a corner of the table, she was quite overlooked.

She suffered in silence for some time, until at last, during a lull in the conversation, a pathetic little voice piped up: "Does anyone want a clean plate?"

Surnames and Their Origin

EBERLEY

Variations—Eberly, Eberle.
Racial Origin—Welsh or Cornish. German, possibly Scottish, English.
Source—A locality, a given name, a characteristic.

Here is a family name with several possible sources, which certainly may be assumed to have developed from more than one of them.

Unfortunately it is unusually difficult to get track of it in the Middle Ages, but from known data, considered in the light of linguistic development, the following explanations present themselves.

As a German family name it may be considered the development of a nickname indicating a personal characteristic, from "eber," a "board," and meaning "boardlike," figuratively "force" or "bold." Or it may have come from the given name indicating this characteristic.

As Welsh or Cornish British it would be the development of "aber-lee," indicating a marshy place where two or three streams come together.

The Gaelic equivalent for this would be "anbar," and the name, developing in the section where highlands and lowlands of Scotland fuse, might be due to unconscious redundancy. Those speaking English coming across the locality known as "Eabar" might conceivably add their own descriptive word "lee" to it, not knowing that the meaning of the two words were virtually the same.

As an English family name it may be a development of a Saxon given name of a similar meaning to the German.

SOUTHWELL

Racial Origin—English.
Source—A place name.

This should not be a difficult name to analyze, for it naturally splits itself into the two words "south" and "well." It would therefore seem to be an obvious example of that class of family name which originated in a place name and which was used to indicate the place of residence of its first bearers, or to distinguish them by reference to the place from which they had come.

And that classification is correct. In many cases there is no doubt that it indicated a place of residence near the south well of this, that or the other community.

But there is also another explanation of the existence of the name. There is in Nottinghamshire a place called Southwell, and it is logical to believe that in many cases the family name simply indicated an original residence in this community.

This place name, however, is not exactly what it seems. The "well" in this case, historians believe, is not the word with which we are familiar to day, and which was also in common use throughout England in the Middle Ages. There was another word "well," less frequently used, but none the less quite common in many sections of the country, which indicated a plain, or open field. And it is believed that the meaning of this place name was "south plain."

ITCHY PIMPLES ALL OVER FACE

And Shoulders. Burned Badly. Cuticura Heals.

"My trouble started with pimples breaking out all over my face and shoulders. The pimples were large and red and festered, and itched and burned so badly that I could not sleep. They were very sore and my clothing aggravated them."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample which helped me. I purchased more, and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was healed." (Signed) William C. Steen, 39 Peabody St., Buffalo, N. Y.

Opened Solomon's Pools.

In the solution of the vexed problem of a water supply in Jerusalem the Department of Public Works in Palestine has contrived to combine utility with romance, writes the Jerusalem correspondent of "The London Morning Post." In the days of the Roman occupation, when the population of the Holy Land was no smaller, apparently, than now, Jerusalem was well supplied with water. It has occurred to the department to make use of the Roman reservoirs and aqueducts, of which the ruins can still be seen.

Thus the Pools of Solomon, so called from being near the Gardens of Solomon, and of second century date, three large reservoirs, with a total capacity of 40,500,000 gallons, situated some eight miles from the capital, are again, after centuries of disuse, supplying Jerusalem with water. Some difficulty was found in repairing leaks, but two of the pools have already been sufficiently cleared out and restored to fulfill their original purpose.

The department has even found it possible to use the surface aqueduct and tunnels, which the Romans made, so as to secure connection between the pools and their main source of supply, a spring rising in a cavern named Bir Darrah. This was effected after the removal of much silt and stones. So history is repeating itself at Jerusalem.

Petroleum in Spain.

The Spanish Government will drill two 2,000-metre wells in a search for petroleum in provinces where it is believed to exist.

When a dog barks at night in Japan the owner is arrested and sentenced to work for a fixed time for the neighbors whose slumber may have been disturbed.

MAN OF LETTERS THANKS TANLAC

Canadian Writer Declares He Never Saw Its Equal for Building One Up.

"Tanlac is a faithful old friend that never fails me," declared James A. Brain, 671 Gerrard St. E., Toronto, Ont., recently. Mr. Brain is one of Toronto's best known citizens, and in addition to being a successful business man, has written many poems and songs that have gained wide popularity.

"I've been taking an occasional treatment of Tanlac for four years, and it keeps me in fine condition. Why, right now, I feel like I could hold ground in a foot race with any man my age in Canada."

"Before taking Tanlac, I was all run-down, had little appetite, and was suffering from indigestion. I wasn't sleeping well and was often so weak and nervous I couldn't attend to business."

"Well, sir, all these ailments disappeared with my first treatment of Tanlac, and to this good day I've been eating, sleeping and feeling fine. In all my seventy years, I've never seen the equal of Tanlac, and I just wouldn't be without it."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Secret.

I know a thing that no one knows
Save only one and I.
So frail it is, a thread seems strong,
So great, it mocks the sky.

I dare not tell it if I would,
And would not if I dared.
It is so shining even gold
Is only dull compared.

But he must tell it—I must wait,
As modest maidens do.
My little heart, will be glad
To find I know it too?

—Helen Frazee-Bower.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Something Worth While.

Guest (inspecting pictures)—"Ah! an old master, I think?"
Mrs. Newrich—"Yes; but the frame is new."

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Music can lull to slumber any form of disease curable by science, according to a professor at Cincinnati University.

Minard's Liniment for sale everywhere.

Ten years is the average life of an oyster.

Neither Seen Nor Heard.

A small girl was at her first grown-up dinner party, and, being wedged in a corner of the table, she was quite overlooked.

She suffered in silence for some time, until at last, during a lull in the conversation, a pathetic little voice piped up: "Does anyone want a clean plate?"

Surnames and Their Origin

EBERLEY

Variations—Eberly, Eberle.
Racial Origin—Welsh or Cornish. German, possibly Scottish, English.
Source—A locality, a given name, a characteristic.

Here is a family name with several possible sources, which certainly may be assumed to have developed from more than one of them.

Unfortunately it is unusually difficult to get track of it in the Middle Ages, but from known data, considered in the light of linguistic development, the following explanations present themselves.

As a German family name it may be considered the development of a nickname indicating a personal characteristic, from "eber," a "board," and meaning "boardlike," figuratively "force" or "bold." Or it may have come from the given name indicating this characteristic.

As Welsh or Cornish British it would be the development of "aber-lee," indicating a marshy place where two or three streams come together.

The Gaelic equivalent for this would be "anbar," and the name, developing in the section where highlands and lowlands of Scotland fuse, might be due to unconscious redundancy. Those speaking English coming across the locality known as "Eabar" might conceivably add their own descriptive word "lee" to it, not knowing that the meaning of the two words were virtually the same.

As an English family name it may be a development of a Saxon given name of a similar meaning to the German.

SOUTHWELL

Racial Origin—English.
Source—A place name.

This should not be a difficult name to analyze, for it naturally splits itself into the two words "south" and "well." It would therefore seem to be an obvious example of that class of family name which originated in a place name and which was used to indicate the place of residence of its first bearers, or to distinguish them by reference to the place from which they had come.

And that classification is correct. In many cases there is no doubt that it indicated a place of residence near the south well of this, that or the other community.

But there is also another explanation of the existence of the name. There is in Nottinghamshire a place called Southwell, and it is logical to believe that in many cases the family name simply indicated an original residence in this community.

This place name, however, is not exactly what it seems. The "well" in this case, historians believe, is not the word with which we are familiar to day, and which was also in common use throughout England in the Middle Ages. There was another word "well," less frequently used, but none the less quite common in many sections of the country, which indicated a plain, or open field. And it is believed that the meaning of this place name was "south plain."

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

M. D. advises: "Persons who suffer from severe indigestion and constipation should take after each meal and at bedtime, fifteen to thirty drops of the Extract of Roots known to the Drug Trade as 'Mother Seigel's Curative Syrup.' Get the Genuine. 50c. and \$1.00 bottles."

BACK ACHED TERRIBLY

Mrs. McMahon Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for a run-down condition after the birth of my baby boy. I had terrible pains and backache, and was tired and weak, not fit to do my work and care for my three little children. One day I received your little book and read it, and gave up taking the medicine I had and began taking the Vegetable Compound. I feel much better now and am not ashamed to tell what it has done for me. I recommend it to any woman I think feels as I do."

—Mrs. J. R. McMahon, 153 Harvey St., Chatham, Ont.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has for nearly fifty years been restoring sick, ailing women to health and strength. It relieves the troubles which cause such symptoms as backache, painful periods, irregularities, tired, worn-out feeling and nervousness. This is shown again and again by such letters as Mrs. McMahon writes, as well as by one woman telling another. "These women know, and are willing to tell others, what it did for them; therefore, it is surely worth your trial."

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Coughour, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book, upon "Ailments Peculiar to Women."

Get your vitamins naturally

Vitamin and mineral elements are part of the splendid nutriment which Nature stores in the field grains for nourishing and vitalizing the human body.
