DR. WILSON'S HERBINE BITTERS.

You know what headache is. You have often had it; perhaps you have it now. Perhaps it is a sick headache and you feel sick at the stomach and your head feels as if it would split open. You feel a throbbing in the temples, or a severe pain in the back of the head. What gives you that headache and that sick stomach? If you do not know we will tell you. Your digestive organs are out of order, and when that is the case your whole system is demoralized. The blood rushes to your head, and that is what gives you the pain there. That is why your head is so hot and why you feel that horrible throbbing. Now, you do not like to feel that way; do you? You would give anything to be rid of that sick feeling. Not only for the time but all time to come. Your desire can be easily gratified if you use Dr. Wilson's Herbine Bitters.

Dr. Wilson's Herbine Bitters strengthens the stomach, clears the blood, relieves the congested brain, and tones up the whole system. Try it and see for yourself if it does not do what is claimed for it.

Perhaps you have a nervous headache, caused by too much mental work or worry. Your nerves are unstrung, and you show it in your eye and manner. Take a rest; for you require it to bring the system back to its normal state. But you must have something else—a tonic. Dr. Wilson's Herbine Bitters is the best tonic made. It has never been known to fail; and it will build you up and effect a permanent cure. Take Dr. Wilson's Herbine Bitters and you will be well and happy.

Perhaps your kidneys are out of order. You can tell if they are if your urine is scanty and highly coloured, and it sometimes contains a deposit like brick-dust. When you find yourself in that condition use Dr. Wilson's Herbine Bitters and you will be cured, otherwise your kidneys will become congested and inflamed.

Perhaps you have trouble from your liver. Dr. Wilson's Herbine Bitters cures every disorder of the liver. It improves the appetite, gives tone to the digestive organs, produces a healthy urine, dissipates the dull, heavy, sleepy feeling which is a characteristic of liver complaints, and makes you a new man.

Many people suffer from liver complaints but their sufferings would cease if they would use Dr. Wilson's Herbine Bitters

Perhaps you have jaundice. If your eyes are yellow and your finger nails are yellow, and your skin is dry, and your urine is high-coloured, then you have the jaundice. If you let it go on it will shorten your life by many years. Dr. Wilson's Herbine Bitters is the latest remedy manufactured for the curing of this disease—and it does cure it.

Women use Dr. Wilson's Herbine Bitters. They find it has a marked beneficial effect upon diseases peculiar to them. They find it a safe remedy for all irregularities, suppressions, or urinary difficulties.

You are a student, perhaps, working your brain from morning till far into the night. Your brain at times gets into a perfect whirl and muddle from overwork. This arises from the fact that the blood is drawn from the digestive organs and they are weakened. You become weak and your system begins to break up. Now is the time to use Dr. Wilson's Herbine Bitters, for you must have something to supply the wants of the body, which you are not able to give by the course you are taking. Dr. Wilson's Herbine Bitters purifies the blood, tones up and strengthens the digestive organs, the stomach, the liver and bowels, and brings back good health.

Dr. Wilson's Herbine Bitters is a remedy made from herbs and roots, and you know that these are blood purifiers, which the world has used, with more or less effect, from time immemorial, but never before have they been prepared so as to give the perfect effect as in the form of this well-known and respected remedy

People who have used it have sung its praises and involuntarily sent in testimonials to the manufacturers, Messrs. Brayley, Sons & Co., of Montreal.

Bear in mind that, if you have indigestion Dr. Wilson's Herbine Bitters will cure you.

If you have dyspepsia, Dr. Wilson's Herbine Bitters will cure you.

If you have biliousness, Dr. Wilson's Herbine Bitters will cure you.

If you have a disordered liver, Dr. Wilson's Herbine Bitters will cure you.

If you have dizziness or headache, Dr. Wilson's Herbine Bitters will cure you.

Mark it well!

TURKISH DYES GIVE PERFECT SATISFACTION.

ECLIPSES.

In the year 1895 there will be five eclipses: three of the Sun and two of the Moon.

I.—A total eclipse of the Moon, March 10th-11th; visible at Montreal and over Canada. Moon enters shadow, 9h. 00m. evening; middle of eclipse, 10h. 45m.; leaves shadow, 0h. 30m. morning, Montreal mean time.

II.—A partial eclipse of the Sun, March 26th; visible over Eastern Nova Scotia, New Brunswick, and Newfoundland. Mean time of Conjunction, 6h. 42m. morning, Montreal mean time.

III.—A partial eclipse of the Sun, August 20th; invisible over Canada; visible in Central and Northern Asia.

IV.—A total eclipse of the Moon, September 3rd-4th; visible at Montreal and over Canada. Moon enters shadow, 11h. 05m. evening; middle of eclipse, 1h. 03m. morning; leaves shadow, 3h. 0m. morn.

V.—A partial eclipse of the Sun, September 18th; invisible over Canada; visible in New Zealand, Eastern Australia and Tasmania.

THE ART OF DYEING

What it was and what it is.

Nearly three thousand years ago purple dye was so extensively used that it brought wealth and prosperity to the cities of Tyre and Sidon. When the Romans conquered the East they so liked the colour that they reserved it under penal statutes for imperial use. Its production from that time declined and eventually both the material and the art of using it were lost. A great pity. There was, indeed, purple after that, for investigators were enabled to rediscover the shell-fish which yielded the dye, but the colours furnished by it were neither so bright nor so permanent, and the imperial purple was even less beautiful than that produced by the most common dye of the present day.

In the days of Moses, long before the flourishing days of Tyre and Sidon, dyes were used, but to a very limited extent. Then it was not a common art, and a person wearing a garment of blue, purple or scarlet, was one of distinction. The purple made at Tyre was produced from a drop in the throat of a shell-fish, and was purple, blue, or violet, according to the treatment. The vermilion of the ancients was a dull red, such as is seen on the monuments, where it has preserved its tint for many years. Those colours were indeed fast colours. Homer, Strabo, and Herodotus, wrote of colors, and it is clearly shown that the manufacture of colored tissues was carried on by the ancient nations. Westward, the knowledge of the art spread slowly, but up to the thirteenth century there are few records of its existence to be found. Apparently the Jews held the secret of the dyeing art during this long period, for, from scant records, they carried on the business in Jerusalem and Italy, and the trade was entirely in their hands. It is somewhere said that the Archbishop of Pannonia, in the year A.D. 853, endowed the Convent of the Bleeding Heart, at Tirnova, with the secret of the art of dyeing, and that institution prospered and grew wealthy through it. It is not supposed, however, that the art of dyeing was exclusively controlled by this convent or that it was ever completely lost: the domestic records of all modern nations speak of

dyers and dyed clothes. Curious were some of the laws enacted in respect to the using of colors. In Ireland, in its early days, there was a law laying down the number of colours that may be employed in the dress of various classes of society, the monarch alone being permitted to wear seven colors. From this it may be inferred that if the Irish, at a very early period, were not dyers, they, at least, had variously dyed articles.

Very few ancient examples of the dyer's art have been preserved. There is, however, one account of a cloth containing dyed yarn which may have been in the dyer's hands in Egypt 1000 years before the Christian Era, and there are still in good preservation ecclesiastical vestments containing dyed silks which are certainly 600 to 700 years old. From old manuscripts is discovered the means by which dyes were made, and various data point to the fact that dyeing was well understood in Europe in the 15th Century, and that the materials at the command of the dyer were sufficiently numerous and varied to enable him to produce all desired shades of color. From that time until the commencement of the present era of artificial dyeing there was not any very great change in the principles of coloring. The discovery of America was followed by the introduction of many new materials for the production of dyes of a superior character: such as cochineal, logwood, and later on catechu. In 1858 commenced the discovery and application of a series of artificial colouring matters, which have created a distinct era in the history of dyeing. Mr. Perkin was the first to practically produce a dyeing material from aniline, the well-known mauve or purple shade so much in vogue for many years. Other discoveries rapidly followed and in the course of a few years about a hundred patents were taken out for methods of making artificial coloring matter from aniline, supplying the dyer with every shade and hue which could be desired. Since then rapid advances have been made in the production of dye stuffs by chemical processes, and to-day we have the benefit of the long years of thought and labour of eminent chemists in the use of the famous Turkish Dyes, which have gladdened the heart of many a fair damsel. Many a shabby dress in these hard times has been claimed from the rag bag and made to look like new by the judicious use

TURKISH DYES ARE BRIGHT, PURE AND LASTING.

PLANETS IN JANUARY, 1895.—The Moon is near Mars on the 5th, close to Jupiter on the 9th, passes Saturn on the 18th, Uranus on the 19th, and Mercury on the 26th. Saturn is 90° from the Sun and overhead at 6 m. on the 26th. The Moon is near Venus the same day.

NOTE.—The third column gives the Moon's places in the "Signs," the cross heads give the Planets' places, "Mars in Aries," etc., which denote the "Constellations."

TURKISH DYES ARE THE CHEAPEST.

of these dyes shades that

The variety of beautiful can be produced by Turkish Dyes almost beyond conception, and when one wonders at the trifling cost involved in making an old article new in appearance it is something which the human race should be truly thankful for.

In the use of Turkish Dyes the long lost art of producing fine shades has been restored. They procure pure, rich colors that will not wash out. They are unequalled for simplicity of use and brilliancy of color. Soap can be used in washing goods dyed with the Turkish Dyes, and that is something that cannot be done when other dyes are used. There is every variety of shade imaginable, and the user has the choice of about 80 shades in Turkish Dyes. This is something to think upon and shows to what perfection the art has arrived. They will dye wool, silk, and cotton equally well. Old and soiled ribbons are made to look like new. The Turkish Dye stocking black was the first stocking black ever made to answer the purpose fully. It will dye a brilliant jet black and will not smut.

The Turkish Dyes are extensively used, and in sections where they are well known no other dyes are sold or asked for. One great feature about the Turkish Dyes is that every package is perfect, "no shading colors" being required to reach the desired tint. They are simple in their use, and anybody can use them with great satisfaction. The color of goods can be changed by the use of Turkish Dyes; for instance, a yellow can be made a brown, a terra-cotta a mahogany, a scarlet a green, as one wishes, and red, blue, gold, green, violet, purple, slate, or drab, can all be changed to other colors. These are advantages that our good old grandmothers never had, and we should be thankful that we live in the progressive age of Turkish Dyes.

OMELET.—Six eggs, whites and yolks beaten separately; half pint of milk, six teaspoons corn starch, one teaspoon baking powder, and a little salt; add the whites, beaten to a stiff froth, last; cook in a little butter.

MOTHS IN CARPETS.—Persons troubled with carpet moths may get rid of them by scrubbing the floor with strong hot salt and water before laying the carpet, and sprinkling the carpet with salt once a week before sweeping.

JACK MATCHLOCK'S YARN

"I'll never forget it," said Jack, throwing fresh wood upon the camp fire, causing a volume of sparks to fly upward, for a moment brilliantly illuminating the forest and the faces of the three other sportsmen who sat by enjoying their pipes. "It was just like this," continued the speaker, after a pause and perceiving an enquiring expression upon the faces of his comrades. "Jim and I were at that time on a hunting expedition some miles west of Pembroke and had travelled from daylight till noon without striking a track. We sat down on a log for a few minutes to take a rest and a bite to eat, for I tell you, boys, we were pretty hungry by that time. We also discussed the situation, and I favored retracing our steps, but Jim was ambitious, and expressed a desire to proceed further into the forest. He had never shot a moose, in fact had never seen one, and he hated the idea of having to go back to town without taking with him the evidences of having enjoyed good sport. I yielded to his entreaties to go on a little further, although I knew it would be dark before we got back to camp, and the snow was deep enough to make it hard plodding and would tire a man like Jim who was not much used to the work. We had not gone far when we were startled by the cracking of some underbrush just in front of us. I halted immediately and cautioned Jim to keep silent. His rifle was in position ready to fire as soon as anything appeared, and I could see he was all excitement. I whispered to him to remain where he was while I made a short detour through the wood in order to get a glimpse at whatever was in the underbrush, for it was very thick. I had moved only a few paces when there was another crash of the dry wood, and there sprang out in full view a fine big bull moose with head erect and eyes staring straight at us. I raised my rifle to fire, for I had a splendid chance to hit him behind the shoulder, but I had hardly got my rifle up when Jim fired. Well, he missed the animal and spoiled my chance. I pulled the trigger, however, as the moose was bounding away, and I had the satisfaction of knowing I hit him, for on following up the track we discovered it pretty well

PLANETS IN FEBRUARY, 1895.—Venus and Mercury are in Conjunction on the 1st. The Moon is near Mars on the 2nd. Mars is 90° from the Sun (overhead at 6h. ev.) on the 5th, when the Moon is near Jupiter. Mercury is visible in the eastern sky after sunset about the 9th, when he is at Greatest Elongation East of the Sun. Venus is near him (for the second time this month) the same day. The Moon is near Saturn on the 14th, Mercury on the 24th, and Venus on the 26th.

TURKISH DYES DO NOT SMUT.

marked with blood. I had hit him hard. Jim could hardly speak with excitement, and he led the way along the track like a steam engine. I shouted to him not to run so fast, but it was no use, and it was not until he was completely pumped out of wind that he slackened his pace. I said to myself, 'Young man, you will pay for this.' I knew that Jim was not only a tenderfoot hunter, but that he had been troubled for some time back with bronchitis and other lung troubles and was not fit for such work. He was not feeling well that morning and I thought it risky for him to start out, but he was so enthusiastic about getting a moose that he insisted on going. I had even cautioned him at Pembroke, but he not heeding it I prepared myself for all emergencies by procuring a bottle of Dr. Wilson's Cherry Balsam at a drug store in that town. Well, as I expected, Jim completely broke up after going a little further, and he sat down, coughing frightfully and complaining of pain. My first thought was of the Cherry Balsam, and taking it out of my knapsack, I put the bottle to his lips, and he took a little pull of the remedy. It immediately eased his coughing, and he remarked that he felt better. Of course, it was out of the question for him to follow up the track, but I knew of a lean-to near by and, leading him to it and making him as comfortable as possible, not forgetting to give him the bottle of Cherry Balsam, I followed up the track alone. I had not gone far when I discovered the wounded animal and despatched him in quick order by a shot from my rifle. Of course, Jim was heartily delighted when I returned and told him of our luck, but I could see he was hardly himself. He complained of a pain in the back, but I did not despair for I had also supplied myself, through that good druggist at Pembroke, with a bottle of French Magnetic Oil, and an application gave him much relief. He considered my foresight wonderful in making these medicines a part of our equipment, and he vowed he would never start out anywhere, no matter how far from home, without a supply of Dr. Wilson's Cherry Balsam and the French Magnetic Oil. Well, after a rest and Jim had recovered enough to gain his feet, we took a short cut back to camp, having decided to send out some lumber-men we knew back after the

moose in the morning. We were both tired and hungry when we got back to camp, and made up our minds to settle down to a quiet night of it. Supper had hardly been disposed of, however, before a couple of lumbermen walked in, one groaning like a bull. I said to myself, 'What is up now? There is something the matter with that fellow, and no doubt.' I had hardly stopped thinking when one of the chaps said, 'I say, my pard here is awful sick with cramps and I brought him around here knowing that you always have some of that there Oil that you gave one of us chaps last year. Bill Smith said he saw you pass this morning and he expected you would camp here tonight, so we tramped, for there is no doctor for miles.' By the time he had spun this out I had taken the French Magnetic Oil out and given the poor fellow a good dose. It fixed him up like a charm, and he was so thankful, he could not say enough in praise of me and the remedy. How he could reward me bothered him some, but I thought of that moose, and it was arranged that he and his chum should quarter it and bring in some of the meat and the head. Well, Jim went home from that trip as happy as a king, with the moose head in the baggage car. He writes me often and he never mentions that experience without saying a few words of praise of Dr. Wilson's Cherry Balsam and the French Magnetic Oil. It was lucky we had them, wasn't it?" All agreed it was.

Dr. Wilson's Cherry Balsam will cure coughs and colds in all stages, and is the handiest, the easiest, the most pleasant of all remedies for such troubles. Dr. Wilson's Cherry Balsam will cure asthma, bronchitis, and other throat troubles. It is an excellent remedy for catarrhal inflammation, which is the most common of all the diseases of the throat. Dr. Wilson's Cherry Balsam will cure croup, and should always be kept on hand when children are troubled with it. Whooping cough is another common complaint which Dr. Wilson's Cherry Balsam cures.

Dr. Wilson's Cherry Balsam is composed of the purest materials, all of which are vegetable. These are condensed to great strength, so that a small dose of this medicine is very powerful and effective in its action. Besides being a good remedy for lung and bronchial troubles it is a good tonic, its use producing a healthy appetite.

WHEN YOU WANT SUCCESSFUL DYEING, USE TUI KISH.

PLANETS IN MARCH, 1895.—The Moon is near Mars on the 3rd, passes Neptune on the 4th, in Conjunction with Jupiter on the 5th, is eclipsed on the 10th, passes Saturn on the 14th and Uranus on the 15th. Jupiter is at Quadrature (90° from the Sun) and overhead at 6h. ev. on the 17th. The Moon is near Mercury on the 23rd, Venus on the 28th, Neptune and Mars on the 31st.

TURKISH DYES DYE EVERYTHING.

WHY SUFFER?

Why do you limp like that?

You limp as if all the bones in your body were unhinged, and you look as if you hadn't a friend in the world.

Rheumatism, eh! Well, well!

Did I ever have it? Well, I should say so, and as bad as you have it now.

How did I get rid of it? Simply enough, I used the French Magnetic Oil.

If you want to get well go to your druggist and get French Magnetic Oil; rub your limbs with it and you will walk as you used to walk, and smile as you used to smile. My friend, you are suffering agonies which are unnecessary when the French Magnetic Oil is to be had.

Why suffer the pains of rheumatism, cramps, lumbago, sciatica, when for very little cost you can be cured?

If you limp it is your own fault.

If you have pains in the back you should suffer if you will not take the advice of a true friend.

You have the remedy at hand, why not use it?

If you once use the French Magnetic Oil you will always use it when you find occasion to do so.

Here are some of the many ills it will cure:—Neuralgia, Rheumatism, Cramps, Lumbago, Sciatica, Pains in the Back and Side, Chilblains, Frost-bites, Bruises, Sore Throat, Quinsy, Diphtheria, Growing Pains in Children, Enlarged Veins, Chronic Ulcers, Gatherings, Milk-leg, when used externally; Coughs, Colds, Influenza, Stomach Ache, Flatulence, and Diarrhoea, when used internally.

And still more, it drives from the system acrid humors, festering and corrupting the blood upon which rheumatism feeds. Thus it is seen that its range of cures is marvellous.

There are few pains that are not relieved by it.

But mark, it not only relieves the pain but drives it away entirely, and thus it cures.

Some preparations simply deaden the parts when applied and the relief is only temporary. Not so with the French Magnetic Oil, which not only stops the pain instantly, but it acts as a counter-irritant, a diffusive, an agent removing inflammation. It acts like a soothing balm to the half-frantic sufferer.

Then why suffer?

The poorest need not suffer pain while the French Magnetic Oil may be obtained at a small cost at almost any store in the country. If your druggist does not keep it, send to Brayley, Sons & Co., Montreal.

If you suffer it is your own fault.

Whenever you feel a slight pain or twinge, use the French Magnetic Oil and the trouble will stop right there.

If you have been suffering for years with any of the maladies above mentioned, use the French Magnetic Oil and you will be cured of them,

Ask any person who has been cured by the use of the French Magnetic Oil as to its efficacy, and he or she will say it is a boon to suffering humanity. Hear what Thomas Porrer, of Shinniekburn P.O., N. B., says:—"I was laid up for months with a swelling on the ball of my foot. Could not walk without a crutch. Tried a doctor, but could not get any relief. I finally used the French Magnetic Oil, and was cured." This is straightforward testimony, and to the point. You perhaps have a swelling on the foot.

French Magnetic Oil is a new and rapid cure for Rheumatism.

There are many written testimonies to this fact. Read some of them:—

W. H. Bennett, of Harley, Ont., says that he used the French Magnetic Oil for rheumatism and other ailments of a similar character and found it a very efficient remedy. He says, in the future he will use no other remedy and will always recommend it to his friends.

And here is another testimony which Mr. Lefler, of New Durham, desires to give to the public. He says:—"I was laid up with disease of the kidneys, and had it so bad that I was obliged to give up my blacksmith's shop. I used the French Magnetic Oil and now I consider myself thoroughly cured."

Still they come! Harrison Bayley, of Falkland, Ont., bought a bottle of the French Magnetic Oil from William Tigh, of Harley, and used it for sciatica, rheumatism and bowel complaint. He says:—"I got completely cured after being laid up for two years with these complaints."

NAPLES BISCUIT. — Beat eight eggs light; add to them one pound of fine white sugar, and one pound of sifted wheat flour; flavor with a teaspoonful of salt and Brayley's essence of lemon or orange-flower water; beat it until it rises in bubbles; bake in a quick oven.

TURKISH DYES GUARANTEE PERMANENCY OF COLOR.

THE TURKISH DYES.

If you want to dye ribbons, dresses, yarn, stockings, feathers, scarfs, wrappers, cloaks, mosses, everlasting flowers, hair, leather, coats, hoods, fringes, carpets, rugs, or any other material, use the Turkish Dyes. By using them you will have entire satisfaction, and that is something that cannot be said of any other dyes manufactured. The Turkish Dyes will dye everything made of wool, everything made of silk, and everything made of cotton. The Turkish Dyes are fast and will not wash out. Now this is especially desirable in the case of stockings. Unless the dye is fast it will color the feet, and that is anything but pleasant. There was a young man, once upon a time, who had a decided objection to red stockings. They were nice and warm and strong, for his mother had knit them, but they were not the right color to suit the fastidious individual, and he insisted on their being dyed black. His mother was indulgent, and procuring some black dye from the store, dyed the stockings according to instructions, and with the greatest care. Next day, Jack, for that was his name, took a journey to the city to visit his brother and remained with him over night. Before returning, however, they both went to the baths for a swim. In the darkness of the dressing room Jack did not notice his feet, particularly, but when he entered into the light his eyes were attracted by the shouts and laughter of the other brothers. From the ankles to the tips of the toes Jack's feet were nearly as black as coal. He realized at once what was the matter, and being a good natured fellow, made the best of it. When he informed his astonished brother what was the matter with his feet he laughed and said he really did not know that his mother knew so little about dyes. "She should have used the Turkish Dyes," he said. "Everybody who wants to dye socks or stockings use the Turkish Dyes. All Turkish Dyes are good, but in dyeing stockings they are pre-eminent. Its stocking-black is a perfect black, and so firm fixed that not one speck of it will come off on the feet." "I wish mother had known that," said Jack, looking down at his ebony extremities.

Do not be afraid to use the Turkish Dyes in dyeing stockings.

The results when the Turkish Dyes are used are sure. There is no mistake about the quality of the Dyes. Every package of any one color is exactly like every other. The quality is always the same, and the results are always the same.

Then the colors—they are beautiful. The Turkish Dyes are fast and brilliant. Soap will not fade them, neither will scouring. Steaming does not alter the shade, neither does light. One package is enough to impart a beautiful color to two pounds of wool or silk. Mind you, the color is beautiful and everlasting. It will last as long as the wool or silk lasts.

The Turkish Dyes comprise all the known colors and their various shades. There is not a shade you desire but you can have it by using the Turkish Dyes. You can get all the new shades in the Turkish Dyes. Another great feature about these Dyes is their cheapness. A package only costs ten cents, so you need not be afraid of giving them a trial, if you already have not tried them. Those who have tried the Turkish Dyes are using them right along, and will use no other. They are put up in neat packages, upon which the directions are plainly printed that anyone can easily understand.

The Turkish Dyes are famous for their beauty.

The Turkish Dyes are cheaper than any other dyes, for the reason that a package of it will color more material than the package nearest it in color of any other dye.

There is nothing poisonous about the Turkish Dyes. They will not exterminate rats like some dyes, and there need not be any fear in using them. The Turkish Dyes are absolutely non-poisonous; they are harmless. The Turkish Dyes are complete in themselves. They require no mordant. This simplifies their use and makes it impossible for the user to make any mistake.

Be sure you get the Turkish Dyes.

GOVERNOR'S SAUCE.—One peck of green tomatoes, four large onions, six red peppers, one teacup grated horseradish, one teaspoon Cayenne and one of black pepper, one teaspoon mustard, half cup sugar; slice the tomatoes and sprinkle one teacup salt on, and lay all night; drain well in the morning, then simmer all together till cooked through.

TURKISH DYES ARE THE BEST VALUE.

THE BACHELORS' BALL.

And how the Mulberry Girls prepared for it.

All was excitement in the household of Augustus Mulberry the afternoon the invitations for the ball were received by the two eldest Miss Mulberrys. It was the Bachelors' Ball, and the girls had hoped right along that they would be asked to go, for it was the event of the season and one not to be missed. As soon as Miss Mabel Mulberry took the mail from the postman she rushed upstairs into her sister's room and, quite out of breath and her heart beating with excitement, she said in a half screech, "Here they are, Maud. I knew they would come," and handing one suspicious looking square envelope to her sister and throwing herself on the sofa, she tore open her own letter, exclaiming, in girl-like glee, "Oh, isn't this jolly." There was the formal invitation, which requested the pleasure of Miss Mabel Mulberry's presence at the fourth annual, etc., etc., and then there was a little private note besides, a matter for which the committee of management, it must be distinctly understood, were not responsible. Miss Mabel read this note eagerly, and when she had finished she exclaimed, "Oh, Jack, but you are a good old fellow." "He is not any better than Harry," said Maud, feigning to pout and turning her head away so as to hide her flushed face.

"Ha! ha! ha! my dear Maud. Wait until you see which of us gets the nicest bouquet for the ball," and Mabel, bounding off the sofa, threw her arms around her sister's neck and kissed her.

"But, Mabel, just think, what are we going to wear," said Maud, drawing out her pretty face as long as a parson's.

"That's so," replied Mabel with a reflective air. "It is too bad we have always to contend with this question when any event presents itself. Oh, how I wish dear papa were rich."

Both girls sat musing for a while, each revolving in her own mind the best means to adopt in regard to that great question of dress.

"I suppose that Smithers girl will be there in a brand new costume," said Maud with just a slight curl of the lip. Harry had shown Miss Smithers a little

attention at the last social event and that was perhaps the reason why that young lady was uppermost in Maud's mind at the moment. "Yes, and Matilda Jones never wears the same costume to two events," replied Miss Mabel with a heavy sigh.

"I am just sick of wearing that blue silk," continued Mabel after a pause.

"And I of my pink," joined in Maud. "What shall we do for something new to wear?"

"Our ribbons, too, are getting so awfully crumpled and shabby."

"It is most distressing," said Maud, her eyes filling with tears. "I really don't know what to do."

"Neither do I. Suppose we refuse the invitation."

"But Harry would be with that Smithers girl all evening. I couldn't stand that."

"And Matilda Jones would have Jack all to herself. That would never do. We must go somehow," and Mabel stamped her little foot in a manner which showed she meant it.

The two girls discussed the question for half an hour, and they hauled out their dresses and tried them on with feelings of despair.

"That white cashmere of yours is not so bad, Mabel, only it is a trifle soiled and requires fixing over."

"I was just thinking," replied Mabel, "if I were to dye it how it would look."

"Splendid!" shouted Maud, somewhat excitedly. "You have just struck the right idea. Why did we not think of that before? Do you know that Alice Smithsonton told me in secret last summer on my visit to Guelph that that beautiful dress she wore the night of the party was nothing else but an old one done over with Turkish Dye, and you know how much admired it was. She even told me how to use the Dyes, which can be procured at any drug store in the country, she said. How stupid of me not to think of it. You're a brick, Mabel."

The girls talked so rapidly about dresses and ribbons and colors and Turkish Dyes that it would be impossible to relate the conversation. Suffice it to say that they put on their things and walked to the nearest drug store with hearts beating with joy.

They asked for dyes, and the obliging clerk immediately handed them a sample book with many beautiful colors on it.

TURKISH DYES ARE BRIGHT, PURE AND LASTING.

PLANETS IN APRIL, 1905.—The Moon is near Jupiter on the 1st, close to Saturn on the 10th, near Uranus on the 11th and Mercury on the 23rd. Saturn reaches Opposition to the Sun (brightest) on the 24th, when he is overhead at midnight. Mars and Jupiter are in close Conjunction on the 25th. The Moon is near Venus and Neptune on the 27th, Jupiter and Mars on the 29th, and Venus is near Neptune the same day.

When you want a Dye you can recommend, use Turkish.

There were dyes for cotton, dyes for wool and dyes for silk, all the colors in every imaginable shade. Would they dye ribbons? The clerk assured them they would; so the girls made their selection and hurried home as fast as their feet would carry them.

They gathered together their dresses and ribbons and repaired to the kitchen and commenced operations. They washed the goods thoroughly. Maud remarked that it was necessary to have them thoroughly cleaned and that borax was a good thing to use in the water, or washing soda if not used too strong, but if soap alone were used, the goods must be rinsed thoroughly, as there was danger of some of the grease adhering to the garments, which would prevent an even color. In every case the goods should be well washed and rinsed. The dyes were put in clear vessels and boiled until thoroughly dissolved. After the liquor was perfectly made they let it cool down and put the goods in, stirring them with a stick for about ten minutes, applying the heat again slowly until it came to a boil and the goods thoroughly obtained the full depth of color they required. For light shades they let the goods boil in the dye for about fifteen minutes, and when they used the dark shades they let it boil from thirty minutes to one hour and a half, according to the depth of color they desired. They allowed the dye to penetrate every part of the garment and never allowed the goods to float on the top while in the dye. Immediately after taking the goods from the dye pot they washed them in clear water and allowed them to dry quickly. After that the garments and ribbons were pressed and the girls were astonished and delighted at the results. The goods were bright and looked just like new. It took the rest of the day to alter and trim the dresses to suit their tastes. The ribbons were lovely. The day following Mr. Augustus Mulberry walked homeward, tired and sick at heart. He knew his daughters had been invited to the ball, and like a good father who takes an interest in his family, he wanted them to look at their best. But—that awful but—he had all he could do to put food into their mouths without buying new and costly dresses. He was sorry for his daughters, for he knew that they had a certain pride in them which was hard to overcome, and he was unable to

uphold them in their ideas. He loved them. As he entered his home Mabel and Maud greeted him with the usual kiss. At supper he thought the girls were unusually jolly and he could not make it out, but he decided to say nothing but keep up his end of the jokes that were passing. He noticed, too, that his daughters rose from the table earlier than usual and disappeared out of the dining room. He asked his wife what they were up to, but she gave him little satisfaction, and, taking up the evening paper, he sought his easy chair, and in a few moments was deep into an account of a battle between the Chinese and Japs. He was so interested that he did not hear anyone enter the room.

"Good evening, papa," said Mabel. No answer.

"Ahem!" joined in Maud, with as little effect.

"Ahem!" shouted the both together in a manner that would have made the sphinx turn its head.

This brought Mr. Augustus Mulberry to his senses, and on looking up he beheld both his daughters gaily attired in beautiful new dresses, as he thought.

"Where in the name of common sense did you get those?" he gasped.

"Guess."

"There are no fairy godmothers in these days, I'll be bound," said Mulberry with an intense look of surprise in his eyes.

"No? That is all you know, then."

"Well, where did you get them; they must have cost quite a lot," continued the father with much interest.

"No, not so much as you think," said Maud. "Only a few cents; Turkish Dyes did it."

"Well, I be blowed; who would have thought it. Why, I never saw such brilliant and beautiful dresses, and what beautiful ribbons."

No wonder he was surprised, for the dresses were, indeed, beautiful, and he praised the girls for their tact and ingenuity.

The ball came off, as all balls do, and the two Mulberry girls were voted the belles by all the nice young bachelors present. Miss Smithers remarked that Mulberry must be getting rich, and Miss Jones had no word to express her feelings of disgust at being outshone, for she had gone to extra trouble in procuring a costume for this ball. Mabel and Maud were in high spirits, and

PLANETS IN MAY, 1895. — Mercury is at Superior Conjunction with the Sun on the 4th. The Moon is near Saturn on the 7th and Uranus on the 8th. Venus and Jupiter are in close approach on the 18th, and Mercury and Neptune the following day. The Moon is near Mercury and Neptune on the 25th, passes Jupiter on the 26th, Venus on the 27th, and Mars the same day.

WHEN YOU GET TIRED OF COMMON DYES, USE TURKISH.

from that day they never mentioned the ball, among themselves of course, without giving the highest praise to the Turkish Dyes, which helped them out of their great dilemma. These young ladies were married to Jack and Harry, and now are well off, but they are still true to Turkish Dyes, and whenever they have a chance of using them they do.

HOW TO SAVE MONEY.

If you can make an old and soiled garment look like new in appearance so that you are able to wear it longer and look decent you are saving money. If by the expenditure of ten cents and a little labor you are able to reclaim dresses from the rag bag, and made to take the place of a ten dollar dress which you would otherwise have had to buy, you are just saving nine dollars and ninety cents. Money is thrown away every day that might just as well be saved with the exercise of a little care and forethought. It is just as well to know this fact and profit by it. A ten cent package of the Turkish Dyes will save you ten dollars in value. You have lots of garments which you will not wear for the reason that they are soiled or faded, but otherwise perfectly good. Now, why throw them away in dark corners for mice and moths to feed upon? You are throwing away good money. Don't do it. Don't do it. Use the Turkish Dyes and make your garments like new. People who are, perhaps, better off in this world's goods than you, do it. There is nothing will justify waste.

The Turkish Dyes have a wide range; they will dye dress goods, whether silk, wool, or cotton. They will dye straw, feathers, artificial flowers, hair, leather, cane, and mosses. There is no limit to what the Turkish Dyes will dye.

The Turkish Dyes are simple and easily used, and there is no trouble, no waste, no delay, no danger of failure in using them. The Turkish Dyes produce sure and certain results.

Turkish Dyes produce colors that will last as long as the materials, and remain bright to the end.

It is easy work dyeing with the Turkish Dyes. Follow the directions which accompany each package. You are sure to succeed; and to succeed in dyeing is to save money.

DR. WILSON'S

ANTI-BILIOUS AND PRESERVING PILLS

Who is there that has not some ailment of a more or less troublesome character?

Search the wide world over and there will be found few, if any, individuals who enjoy perfect health. The body is always being assailed by one or other of the hundreds of complaints that man is subject to. A slight change in diet is enough sometimes to make the hitherto healthy man ill. Strong men sometimes become weak by the mere change of climate, for the body being used to a certain condition of things, revolts at any change in those conditions. The organs are very delicate, more than most people think, and it takes but very little to put them out of order. At first the trouble is small and people are apt to think little of it. It is just at that time that steps should be taken to cure the trouble, and with a little attention it is easily done. But if no care is taken the trouble grows and ultimately becomes chronic. Then the patient suffers day in and day out, and wonders why. With a little care in the first place there would not have been this suffering. Still, there is hope as long as there is life, and if the sufferer adopts the proper means the ailment or disease may be conquered.

Perhaps, one of the most distressing maladies is indigestion. It is the mother of most of the diseases which prostrate mankind. Under it food becomes useless. It causes irritation, injurious gases are formed, and the whole system becomes deranged. Out of indigestion arise, liver complaint, diarrhoea, dysentery, jaundice, waterbrash, heartburn, colic, flatulence, costiveness, sick headache, and all the diseases of the digestive organs.

There is a remedy for all these ailments in Dr. Wilson's Anti-bilious and Preserving Pills. Use this remedy and all your dyspeptic ailments will disappear. Use it and your stomach will retain the food placed in it — your appetite will be restored.

The liver is a most important organ in the human organization, and when it refuses to work properly the results are most distressing. It affects the whole body. Splitting headaches are the usual symptoms, and the eyes are hot and

PLANETS IN JUNE, 1895.—The Moon is near Saturn on the 4th. Mars and Venus are in close Conjunction on the 5th. Neptune is in Conjunction with the Sun on the 6th, and Mercury near Jupiter the next day. The Moon is near Neptune on the 21st, close to Mercury on the 23rd, passes Jupiter the same day, is close to Mars on the 25th and Venus the same day.

WHEN YOU WANT SUCCESSFUL DYEING, USE TURKISH.

painful. It is then that Dr. Wilson's Anti-bilious and Preserving Pills are sadly in need. A dose or two of these Pills will cure the sufferer. They have cured thousands and there are thousands to bear testimony to it.

The proper time to cure a trouble is when it is in its first stages. It is then easily cured, and a dose of Dr. Wilson's Anti-bilious and Preserving Pills is all that is necessary. That is why these Pills should always be kept on hand. For the minor troubles one dose is sufficient, but when the disease becomes seated more are necessary.

They are "Preserving" Pills, inasmuch as they have the quality of keeping up the strength of those who use them; and there is no period of depression after their use. The great objection to the use of pills is that they are commonly supposed to gripe the bowels, and to induce weakness and depression for a short period after their use. Dr. Wilson's Anti-bilious and Preserving Pills do not do this, but they preserve the strength. That is the advantage they hold over the ordinary pills. They produce good effects only. They are void of any bad feature.

Dr. Wilson's Anti-bilious and Preserving Pills will cure dysentery or bloody flux. They will cure piles, a very common complaint, and a very annoying and painful one. Sometimes it reaches a stage when the surgeon's knife is necessary to effect a cure. But this is not necessary when Dr. Wilson's Anti-bilious and Preserving Pills are used. It makes the evacuations easy and natural, and through time the piles disappear.

One of the most terrible results of indigestion is jaundice, but Dr. Wilson's Anti-bilious and Preserving Pills will cure it.

All diseases of the digestive organs are cured by Dr. Wilson's Anti-bilious and Preserving Pills, and the cure is pleasant, speedy, and permanent.

In female diseases Dr. Wilson's Anti-bilious and Preserving Pills are of great service, and may be safely trusted. They correct irregularities, relieve stoppages, cure leucorrhoea or whites, and are specially useful about the turn of life, when so many chronic diseases are apt to show themselves.

The Pills will preserve life, and it is the duty of everybody to keep them on hand to check any disorder or relieve any trouble. The old adage, "A stitch

in time saves nine," is applicable here. One of Dr. Wilson's Anti-bilious and Preserving Pills, if taken in time, will save the necessity of having to take nine and having to pay a doctor's bill.

Keep the body in perfect health by using Dr. Wilson's Anti-bilious and Preserving Pills. By doing so you are performing a duty to yourself and to the whole of mankind generally.

DR. WILSON'S BEEF, WINE AND IRON.

Some people are old before their time. They have used their bodies without giving them the care and attention they required. The result they find out when it is too late, and they find it difficult to keep their bodies in anything like working order. The body is like a delicate piece of machinery, which should be taken great care of in order to perform the duties day after day in the manner that is expected of it. When any part of a machine ceases to work smoothly a good machinist will immediately ascertain the trouble and have it attended to. The careless machinist lets the machine run on as it is, saying that the trouble is slight and unimportant. Later on some other trouble arises, and it is passed over in the same way, and the machine is still run to its full capacity. Of course it does not run so smooth as it might, but what matters. Again something goes wrong and the machinist can't help but see that the machine is beginning to work badly, and he concludes that it will have to be repaired soon. But there is no time now to stop to repair it, but he will do it some day when he has leisure. Suddenly the machine stops short and ceases to do any work at all. The machinist examines it and finds that some parts are almost worn out. He wonders why it is so. His neighbor has a similar machine which was procured at the same time, but is running smoothly every day and is just as good as new. He knows too well what is the matter with the machine, and he regrets that he did not take the care of it that it required. When parts got loose or rusty he did not tighten or oil them immediately. The result is a broken down machine before its time. Now it

NO MORDANT REQUIRED WITH TURKISH DYES.

is the same with many people. They are too careless as regards their own health, but the time comes when they are forced to acknowledge that their systems are completely broken down and they regret that they did not take proper care of themselves. The body becomes overworked and the ordinary foods and stimulants cease to keep it up to that state of perfection in which it should be. Then is the time to take measures to build it up again and prevent such diseases as arise from overwork and worry.

Dr. Wilson's Beef, Wine and Iron will do the building up for you. It is made for that purpose. It contains in a concentrated and palatable form the life-giving properties of beef, wine and iron. It is stimulating and nutritious. It acts rapidly on the system and stays it in its downward course to chronic ill health and disease. It rebuilds and strengthens. It gives tone to the stomach, vitality to the brain and blood and strength to the muscles. It restores the spirits, and the man that once was sick and dejected is restored to health and happiness.

A bottle of Dr. Wilson's Beef, Wine and Iron will do you a great deal of good and make a new man of you.

Dr. Wilson's Beef, Wine and Iron can be readily taken by men, women or children in almost any condition of health. It is safe to use this remedy at any time and under any conditions.

Use Dr. Wilson's Beef, Wine and Iron and you will never regret it.

DR. HOWARD'S QUININE WINE

As an appetizer and a tonic Dr. Howard's Quinine Wine has no equal. It is acknowledged to be the best preparation of quinine and wine on the market, and there are thousands ready to testify to this fact.

Dr. Howard's Quinine Wine fortifies the system against all diseases and likewise is a remedy for many ills. When one begins to feel "run down" then is the time to use Dr. Howard's Quinine Wine regularly. It gives tone and vigor to the nerves and strength to the muscles; it strengthens the appetite and aids digestion. It invigorates the system and through it one is able to

keep a bold front in face of the most trying circumstances. A preparation of this sort is needed everywhere and at all times, but, perhaps, it shows to best advantage in those districts where fever and ague have control of the inhabitants. There it is a champion, warding off the attacks of the vile malaria, and protecting the lives of the people who have to live there. By its use one need not fear being attacked by fever and ague.

Dr. Howard's Quinine Wine will cure sleeplessness, twitching of the muscles, or trembling limbs, and all nervous diseases. If you have had a severe illness and the system is "run down" Dr. Howard's Quinine Wine will build you up. After you have regained your health and spirits it is the best preparation to keep you in good health. This is an important thing for convalescents to know.

Dr. Howard's Quinine Wine is a first-class remedy for neuralgia, which is often a nervous disease. When the body is strengthened and invigorated the excitable nerves are still.

If you are feeling wretched and miserable, and you are nervous and cannot sleep, Dr. Howard's Quinine Wine will do you a great deal of good. It will bring sleep, and in the morning the man, who, the evening before, thought the whole world dark, will rise with head clear and body refreshed, and ready to meet the day's worries and labors with renewed confidence. After using this preparation a short time your spirits begin to rise, although, you may have been in a chronic state of despondency.

No one need suffer the pangs of indigestion as long as a bottle of Dr. Howard's Quinine Wine can be procured.

Dr. Howard's Quinine Wine has met with great success. Its merits as an anti-periodic, anti-pyretic, anti-neuralgic, and as a tonic, are so well-known and appreciated that the sales of this remedy are rapidly increasing on all sides.

Dr. Howard's Quinine Wine is a standard medicine. It has performed in thousands of cases, remarkable cures, and is most thoroughly liked wherever known.

Remember that Dr. Howard's Quinine Wine is useful in fortifying the system against disease, and when you begin to feel the least bit out of sorts you should take this preparation, for it is easier to keep well than it is to be cured after you become sick.

TURKISH DYES ARE THE BEST VALUE.

HERBINE BITTERS.

The Sovereign Remedy.

You are utterly miserable. Anyone can see that. You show it in your face and in your manner. You are not what you used to be. What is the matter? You are low-spirited at times and anyone would think you had not a friend in the world. What are your symptoms? A terrible emptiness in the stomach in the morning. Yes.

A precarious appetite, ravenously hungry one day and looking at the least morsel of food the next with indescribable loathing. Exactly so. Frequently taken with sudden dizziness; head aches at times as though it would split, and troubled with blurred eyesight. Very true. Frightfully nervous and irritable. At one time flushed all over, at another feel cold and clammy. Sometimes the feet are like ice and the head at the same time burning. Drowsy during the day and exceedingly wakeful at night. Enough; you are suffering, and have suffered for a long time. You might have been spared this and enjoyed good health, if, when you felt the first symptoms, you had taken Dr. Wilson's Herbine Bitters. But it is not too late; you can be cured and your miseries turned into joy by the use of Dr. Wilson's Herbine Bitters.

A few doses of Dr. Wilson's Herbine Bitters will tone up and relieve the system; will dissipate the headache, strengthen the stomach, strengthen the muscles, clear the sight, raise the spirits, line up the nerves, and give to you the perfection of health.

Why not be healthy when you have the means so close by to make you so? Every responsible druggist in the country sells Dr. Wilson's Herbine Bitters. If you live in the country districts where there are no drug stores, you can get it by applying to the store at which you generally deal. Should, however, it happen that you cannot procure it there do not hesitate to send to the manufacturers, Brayley, Sons & Co.

Dr. Wilson's Herbine Bitters is a positive cure for dyspepsia, indigestion, and all diseases from similar causes. No one can afford to be without Dr. Wilson's Herbine Bitters, for it means health, wealth, and happiness. Try it and be

convinced. A trial will only cost you twenty-five cents, and one bottle will do you a world of good.

Dr. Wilson's Herbine Bitters is made from herbs which grow in the Canadian woods, and are known to thousands of good housewives in the country. This remedy has in it dandelion, mandrake, wild cherry, and burdock, compounded so that their good qualities are brought out to the best advantage. This is proven by its good results, to which thousands of persons who have used it can testify. No remedy has ever received such an enthusiastic reception at the hands of the public as Dr. Wilson's Herbine Bitters. There is always a great demand for it. The reason is plain; the diseases it cures are very common, and it cures them very rapidly. And Dr. Wilson's Herbine Bitters does not make merely a temporary cure, but a permanent cure.

Here are some of the testimonies of reliable people throughout Canada that have been cured by using Dr. Wilson's Herbine Bitters. Read and learn.

Castleford P.O., Ont.

Your Herbine Bitters is the best medicine I ever took for biliousness and purifying the blood. I only took half a bottle, when I was perfectly well and my appetite fully restored.

JOHN CAETWRIGHT.

Upper Ottawa Gov't Boom.

Clementsport, Annapolis Co., N.S.

Nov. 21, 1891.

DEAR SIRS,—This is to certify that I have used your Herbine Bitters for complaints arising from a disordered liver with the utmost satisfaction, and heartily recommend it to all who are suffering in any form from disorders arising from the same cause.

Yours, A. S. BRUNO.

ICE-CREAM CAKE.—Make good sponge cake, bake half-an-inch thick in jelly-pans, and let them get perfectly cold; take a pint thickest sweet cream, beat until it looks like ice-cream, make very sweet and flavor with Brayley's vanilla, blanch and chop a pound of almonds, stir into cream and put very thick between each layer.

EGG BALLS FOR SOUP.—Boil four eggs; put into cold water; mash yolks with yolk of one raw egg, and one teaspoonful of flour, pepper, salt, and parsley; make into balls and boil two minutes.

PLANETS IN JULY, 1895.—The Moon is near Saturn on the 1st, and passes Uranus on the 2nd. Jupiter reaches Conjunction with the Sun on the 10th, and Venus Greatest Elongation East, when she is very brilliant as an "Evening Star," on the 11th. The Moon is near Mercury on the 20th, and close to Jupiter on the 21st. Saturn is 90° from the Sun on the 23rd, when he is overhead at 6 ev. The Moon is near Mars on the 24th, Venus on the 25th, Saturn on the 25th, and Uranus on the 29th.

WHEN YOU WANT A GOOD DYE, USE TURKISH.

STRONG'S SUMMER CURE.

What is commonly known as "Summer complaint" is a most distressing malady. You have had it and know what it is, and you will have it again, for it comes each year with the Summer, and as certain vegetation is troubled with pests which blight it, so is the human race troubled with summer complaint and kindred diseases, and by them weakened unless means are taken to check their ravages. Summer complaint is brought about in various ways, but principally by sudden change of diet, sudden change of weather or climate, and by improper food. It is known in its various stages as dysentery and diarrhoea, and, a disease peculiar to the country, as "Canadian cholera." These diseases are common, but they cannot be trifled with. When allowed to continue unchecked extreme weakness sets in, and the whole body becomes racked.

When you find yourself in that condition it is well to know that Strong's Summer Cure will cure you. But you should not allow the trouble to go so far if there is a bottle of Strong's Summer Cure to be had in your district. Take this remedy when you feel the first symptoms and you will not suffer the pain and distress peculiar to summer complaints.

Strong's Summer Cure acts easily and produces a rapid cure.

Children are peculiarly subject to summer complaints, and they suffer much pain, while their mothers suffer much care and worry in consequence. The use of Strong's Summer Cure will relieve the little sufferers, and it is the duty of every mother to keep a bottle of this remedy on hand.

Canadian cholera is the dread of the people during the spring and summer months. It is brought about by the injudicious eating of green vegetables and fruit, and the results as you know are most painful and distressing. It seems hard that the human race cannot indulge in those things which it likes without bringing about such dire effects; yet the fact remains that the cucumber, or innocent looking apple or peach, will often give you diarrhoea or dysentery to such an extent that you vow never to eat either vegetable or fruit again. It is to relieve you of this distress of body and

mind that Strong's Summer Cure is manufactured, and it is from the fact that the public has recognized its efficacy that it is manufactured in immense quantities. If you have never used Strong's Summer Cure, use it now, and when once you use this remedy you will use no others.

Use it and you may enjoy the fruits of the earth without fear of bad results. It keeps the bowels always in a healthy state and helps you to enjoy life as you should. Travellers are troubled a good deal from dysentery or diarrhoea, brought about by change of climate and diet, and those who wish to be free from the pain and annoyance of these troubles should provide themselves with a bottle of Strong's Summer Cure before starting out on their journey. It is in fact absolutely necessary that travellers should carry a bottle of this remedy with them wherever they go. Owing to the many changes which a traveller is necessarily subject to, the intestines become inflamed and refuse to act properly. Now, by taking Strong's Summer Cure that portion of the body is always kept in perfect order, and no matter what the conditions are, one may be free from the pain and inconvenience of bowel trouble. That is one reason why a traveller should provide himself with Strong's Summer Cure no matter how well he may be before starting out on his journey. Very often the pleasures of a holiday trip to the seaside or country resort are marred by summer complaints. Remember that these troubles can be prevented. Remember that they can be cured.

Remember that Strong's Summer Cure will prevent summer complaints, and will cure summer complaints.

When your child cries from the pain of diarrhoea remember that Strong's Summer Cure will immediately relieve it and work a cure.

Remember that Strong's Summer Cure can be procured from all leading druggists. Remember that it is the best cure ever made for any or all of the summer complaints, and it can be had for the small price of 25 cents.

COMPOSITION CAKE.—Five cups of flour, two cups of butter, three of sugar, one of milk, five eggs, one teaspoon of soda, two of cream of tartar, fruit as you please, cinnamon, nutmeg, and clove to taste.

PLANETS IN AUGUST, 1885.—The month opens with a Conjunction of Mercury and Jupiter on the 1st. On the 8th Uranus is 90° from the Sun and overhead at 6 ev. On the 17th Mercury is at Superior Conjunction (beyond the Sun). The Moon is near Jupiter on the 18th, passes Mercury on the 20th, close to Mars on the 21st, alongside Venus on the 22nd, in Conjunction with Saturn on the 24th, and beside Uranus on the 25th.

TURKISH DYES ARE THE LADIES' FAVORITE.

GILT-EDGE HINTS FOR BUTTER-MAKERS.

How to make Dairying a Success.

VALUABLE INFORMATION FOR DAIRYMEN WHO DESIRE A PERFECT COLOR IN BUTTER.

Canada occupies a leading position among the countries of the world in its production of cheese and is fast becoming noted for its production and superior quality of butter. Up to within recent years the amount of butter exported was small, but the business is increasing in volume year by year, and the time will come when it will be ranked among the most important industries of the countries. The exports of butter from Montreal alone, in 1890, amounted to 40,549 packages; in 1891, 84,069 packages; in 1892, 115,461 packages; and in 1893, 84,481 packages. The receipts at Montreal were 150,903 packages for 1890; 211,978 for 1891; 221,867 for 1892; and 111,092 for 1893. The increased shipments of the past two years have stimulated the make of the finest grades, and England has acknowledged that Canadian exports of creamery are again competing favorably with those from Ireland and Denmark. It is necessary, then, in order to retain foreign favor, to keep up to the standard at all times, and to improve the butter as much as possible. The fact, also, must not be lost sight of, that Australia and New Zealand are strong competitors for the English market, and are making every effort to capture the trade. Now, the butter desired in England, and in every other place for that matter, must not only be good to the taste but pleasant to the eye. The matter of color is an important one. The butter must not be too light—like fat or lard—nor is it desirable to have it too highly colored, for then it becomes repulsive to the eye. It must be about of a straw shade, after the natural golden tint of June butter. As all butter cannot be made in June, and bear the beautiful natural tint, it is necessary to resort to artificial means to produce the desired color and make the article look like butter, and not like lard. It is a common thing for lady-shoppers in the city to pass by light butter for the reason that they have their suspicions that it is not pure,

although they are assured that it is as pure as any butter made. Now, a little judicious coloring would have made the article salable. If any article does not look what it is, it surrounds itself with suspicion and depreciates its value. It is absolutely necessary, then, that butter should have a uniform color.

The material used for coloring must produce the natural tint, be tasteless, and free from any injurious qualities. The "Canadian Butter Color" is an article of this kind. Messrs. Brayley, Sons & Co., of Montreal, made extensive experiments in the matter of butter coloring and succeeded in producing a coloring material which was pronounced by leading dairymen to be the most perfect yet produced.

4 The Canadian Butter Color always produces an attractive natural color, which is not affected by light and never changes. This butter color does not color the butter-milk; it has not a disagreeable taste like some butter colors in the market, and it always produces an exceedingly clean, fine, and natural color to the butter. The Canadian Butter Color has been subjected to very severe tests, and those who have tried it say it is the best preparation for the purpose of coloring butter yet put in the market. Mr. J. S. Grimshaw, of Stayner, reported by post card dated July 13th, 1894, that his customers consider the Canadian Butter Color good.

Here is another testimony from a reliable quarter:—

Londesborough, Sept. 10th, 1894.
Messrs. Brayley, Sons & Co., Montreal.

GENTLEMEN, — In reference to the Canadian Butter Color samples, I would say that I have just now received a report from the lady who tried one of them, and she says it is splendid, and likes her butter better with it than without.

Yours truly, R. ADAMS.

L. H. Yeomans, of Mount Forest, says that the best butter-makers in the neighborhood are using the Canadian Butter Color, and they consider it second to none.

The Canadian Butter Color has undoubtedly been a revelation to butter makers, and they see in it an improved butter and better prices.

It requires only one or two teaspoonfuls of the Canadian Butter Color for each ten gallons of cream, but it can be increased or diminished according to the ideas of the user of the proper tint desired.

PLANETS IN SEPTEMBER, 1895.—Mercury and Mars are in Close Conjunction on the 1st, Venus and Mercury are near each other on the 5th, and Mars and Venus in close approach on the 9th. Neptune is 90° from the Sun (overhead at 6 mo.) on the 10th and near the Moon on the 11th. The Moon is near Jupiter on the 15th and passes Venus on the 18th. Venus is in Inferior Conjunction with the Sun and becomes a "Morning Star" on the 19th. The Moon is near Mars on the 19th, Mercury on the 20th, Saturn on the 21st, and Uranus on the 22nd.

TURKISH DYES ARE BRIGHT, PURE AND LASTING.

WORMS,

And how to get rid of them.

Your child is peevish. It is unwell, otherwise it would be bright and happy. What is the matter with the little creature? Ten to one he is troubled with worms. Worms have taken up their abode in his intestines and are preying upon his vitals. The dear little fellow is pining away, growing weak day by day. - His appetite is variable, sometimes voracious, sometimes not to be tempted by delicacies. He has an unhealthy doughy complexion, puffiness of the face and eyelids, dark circles under the eyes, a swollen stomach. He is troubled with frequent attacks of a teasing, mucuous, slimy, greenish diarrhoea, and his breath is fetid. His tongue is large and marked on the sides by pressing it against the teeth. He passes restless nights and grinds his teeth in sleep. These are the symptoms of worms, and as soon as they show themselves steps should be taken at once to rid the child's body of these horrible pests. Should nothing be done in the early stages to rid the worms worse troubles will follow: convulsions and fits, and the child's health becomes so broken up that it is known to have even led to idiocy. Such things are terrible to think of, but, nevertheless, it is true, and parents should not neglect for a moment to take means to cure their children of this very common complaint.

The most effective and pleasant remedy for worms is Dr. Wilson's Dead Shot Worm Stick. It is safe and will not injure the child. But it kills the worms in quick order. One great feature of Dr. Wilson's Dead Shot Worm Stick is that it is pleasant to take, and therefore adapted for children, who will readily take it without worry or force.

If you have never used Dr. Wilson's Dead Shot Worm Stick, give it a trial, and you will not be disappointed with the results. There is nothing in it that will do harm either to the child's health or temper, and it will effectually destroy the worms. This remedy can be used at any time and without fear of bad results. If there are no worms no harm can be done by the remedy, and if there are worms they will be easily and quickly expelled. But it must be borne in mind that although the worms may be de-

stroyed in the bowels they do not always make their appearance whole in the stools, either alive or dead, for if the remedy meets with them high up in the bowels, and destroys them there, the dead worms will be acted upon by the digestive fluid and come away with the excrement.

There are three kinds of worms which infest the bowels: the tape worm, which is of immense length, and infests the whole course of the bowels; the long round worm, which makes its home principally in the small bowels, and occasionally the stomach; and the thread worms, which infest the fundament.

Dr. Wilson's Dead Shot Worm Stick should be immediately used when there is reason to believe that worms are present. A single Stick has been known to have worked wonders, as many as from twenty-five to five hundred worms having been counted in the subsequent stools.

Mothers can place the utmost reliance in this remedy, and need not have any hesitation in using it whenever they think the symptoms demand a remedy for worms.

Worms are brought about through the eating of bad and improper food, such as unripe, unsound, and uncooked fruit; and much green vegetables, underdone pork, sweets, and want of salt in the food. It is just as well to know this and try and guard against the malady, but should worms assert themselves be sure and use Dr. Wilson's Dead Shot Worm Stick, and they will soon disappear.

But worms are not confined to children only, for adults are often troubled with them, and Dr. Wilson's Dead Shot Worm Stick will be found to be an effective cure.

Another feature of Dr. Wilson's Dead Shot Worm Stick is that it will not separate or melt, and will keep its proper condition for a long time.

Dr. Wilson's Dead Shot Worm Stick has been used for years, and its popularity is increasing rapidly, for the very good reason that there is no other remedy that can surpass it, much less equal it.

Dr. Wilson's Dead Shot Worm Stick kills the worms, cures the patient, and is a boon to parents.

Dealers, remember, it is the only Worm Candy manufactured that does not melt on your shelves.

NO MORDANT REQUIRED WITH TURKISH DYES.

NURSE WILSON'S SOOTHING SYRUP

A baby in good health never cries except for a good reason. A baby cries only when it is in pain or suffering from neglect. If the baby has all the care and attention that a fond mother can bestow upon it, and yet is fretful, you may rest assured that it is not well. Babies, being so tender, are liable to many troubles. There is wind colic, from which hardly any baby is free, and from the day of their birth until they grow out of their swaddling clothes lead their mothers a wearisome existence. That is, if they do not take the proper means to relieve the little dear ones of their trouble. But any mother that gives her baby Nurse Wilson's Soothing Syrup will not have any anxiety in regard to the health of the darling. Nurse Wilson knew all about babies, enjoying during a long life-time a large practice as nurse and lady physician, and knowing exactly what babies required to make them healthy, compounded a syrup to suit her own ideas. She found it was exactly the thing wanted, and after using it extensively in her private practice, gave to the general public the benefit of her experience. Nurse Wilson's Soothing Syrup will relieve the infant of wind colic. Wind colic is brought about by the mother's milk not agreeing with the babies and nourishing them as it ought. They vomit it almost as soon as it is taken, or passes through them in curds unaltered, or mixed with greenish slimy discharges passes with much pain and distress. As a consequence, instead of being plump and hearty, the babies look wizened and shrivelled; their skin loose and wrinkled. They do not gain flesh, their limbs are cold and drawn up, and their whole system is disordered. Their stomach and bowels being so irritated their food does not nourish the body, while the constant pain and loss of sleep worry and weaken them so that they cannot gain strength. Of course, when the baby is sick and fretful the mother is worried, and it effects her in health so that she cannot furnish good nourishing milk. This is one of the reasons why so many children die young. But in such cases Nurse Wilson's Soothing Syrup acts like a charm. The mother or nurse should give from six to ten drops of the syrup two or three times daily, or as often as it may be

found necessary, to relieve the pain or prevent the frequent vomiting. Give your baby Nurse Wilson's Soothing Syrup and the vomiting and the curdy, slimy, greenish discharges will cease; the child will have its proper sleep from which it will awaken refreshed. There will be no more wailing and tears, but, instead, happy smiling faces and a quiet home. By the use of Nurse Wilson's Soothing Syrup the child will thrive and gain in strength daily.

Teething is the most critical period of childhood. The first symptom is the desire of the infant to bite anything with which its mouth comes in contact. On examination of the gums they will be found to be more or less red and swollen, showing the markings of the teeth which are pushing their way through the skin. In time the child becomes irritable from pain and loss of sleep arising therefrom, and its bowels become deranged, and its system generally disorganised. As soon as the child shows symptoms of teething Nurse Wilson's Soothing Syrup should be given to it, and the little creature will be saved a great deal of unnecessary pain. But in any stages of the necessary ordeal of teething the syrup will be found to render a great deal of good, and bring the child back to good health. Nurse Wilson's Soothing Syrup should be given in the dose of a small teaspoonful three or four times daily, graduating the dose and its frequency by the relief experienced. It will be found to give ease and strength to the child. The child will sleep properly; the vomiting will cease and the digestion will be assisted. There is no fear of the child having fits or convulsions when Nurse Wilson's Soothing Syrup is given to it.

Always keep Nurse Wilson's Soothing Syrup on hand if you have young children. Diarrhea is a pregnant source of trouble and danger to children in their earlier years, and it carries off many of the little ones every year. Diarrhea is generally caused by indigestion, sourness of the stomach, and irritability of the bowels, and may always be prevented by the use of Nurse Wilson's Soothing Syrup.

Nurse Wilson's Soothing Syrup is safe, certain, and efficacious.

BEEF PATTIES.—Chop fine some cold beef; beat two eggs and mix with the meat and add a little milk, melted butter and salt and pepper. Make into rolls and fry.

TURKISH DYES GUARANTEE PERMANENCY OF COLOR.

DR. DOW'S STURGEON OIL LINIMENT.

There is no remedy better known throughout Canada than Dr. Dow's Sturgeon Oil Liniment. It is known as a remedy that will do all that is claimed for it. It has been tried everywhere and found true. It has reached the position it now occupies as one of the best remedies manufactured, through pure merit and nothing else. It did not take thousands of dollars for advertising and booming to place it in a prominent position to catch the eye of the public, as has been the only recommendation of many other remedies, but it grew in public favor from the fact that it was a good remedy and one that could not be done without. Dr. Dow's Sturgeon Oil Liniment was discovered by Dr. Dow, an eminent physician of New Brunswick, and at first was used only in his daily practice. But so efficient was it as a cure that there was a spontaneous demand for it in New Brunswick and soon its fame rapidly spread throughout the Dominion. What better testimonial could any remedy have? The public wanted it and had to have it. Its success was marvellous, and it is safe to say that no remedy has given more satisfaction than this. There is no one who has applied this remedy to their rheumatic limbs but what can say that it cured them. It has brought relief to many an aching body and smiles to many a pain-wrecked and care-worn face.

Dr. Dow's Sturgeon Oil Liniment acts as a counter-irritant. It draws the inflammation from the internal organs to the surface, thereby relieving deep-seated injuries and organic lesions, and for this it is especially valuable. But it will do more; it will free the skin of eruptions and other annoying affections. Where the surface of the skin is not broken, such as in frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons and the like, its applications prove most effective. One very noticeable feature about this remedy is that as soon as it is applied the pain begins to disappear, and soon it is away altogether. If you are suffering the excruciating pains of rheumatism and the night is a period of torment to you do not hesitate to procure a bottle of

Dr. Dow's Sturgeon Oil Liniment as soon as possible. Apply it where the pain is and you will be agreeably surprised at the way in which the pain will disappear. If you have neuralgia it will relieve you of it. If you have lumbago it will cure you of it. If you have sciatica it will cure you of it. It will relieve you of cramps in the muscles; sprains and bruises. Fishermen and lumbermen are subject to a good many ailments through exposure and hardship, and they have found this remedy a great blessing. It is inexpensive, effective and always the same. The wise farmer has found it a good friend, to which he sticks close, for he never knows when he will require it to help him out of bodily trouble. Everybody in the city and country who has used it once has used it again and again and will always use it in preference to any other remedy.

But not only is Dr. Dow's Sturgeon Oil Liniment a remarkable remedy for all the ailments above mentioned, to which mankind is heir to, but it also is a remedy for troubles affecting horses and other domestic animals.

If your horse has weak knees rub them with Dr. Dow's Sturgeon Oil Liniment and you will find that good will result from the application, for it gives tone to the cords and muscles of the knees. Dr. Dow's Sturgeon Oil Liniment cures Bruises, Strains, Saddle and Collar Galls, Cuts, Wounds of all kinds, Scratches, Scurvy, Cracked Heels and Grease. It cools down the inflammation, prevents proud flesh and secures a surface that will heal quickly.

Blood Spavin is reduced by the use of Dr. Dow's Sturgeon Oil Liniment.

Founder, Ring Bone and Hard Hoof are cured by Dr. Dow's Sturgeon Oil Liniment.

Mange is a disease which Dr. Dow's Sturgeon Oil Liniment will cure with a certainty, and in many cases it will cure Pole Evil and Fistula in the withers. This remedy will cure Wind Galls in a remarkably quick time.

There should not be a stable without a bottle of Dr. Dow's Sturgeon Oil Liniment. It is inexpensive, costing only twenty-five cents, and can be got at almost any reliable druggists or store-keepers. It can always be had on application to the manufacturers, Brayley, Sons & Co., 43 and 45 William street Montreal.

PLANETS IN OCTOBER, 1895.—Mercury is visible as an "Evening Star" after sunset for a few days around the 1st, while Mars is invisible, passing behind the Sun on the 11th. The Moon is near Jupiter on the 12th, passes Venus on the 15th, is close to Mars on the 17th, in Conjunction with Mercury, Saturn and Uranus on the 19th. Mars and Mercury are in Conjunction on the 28th. Jupiter is 90° from the Sun and overhead at 6 mo. on the 31st.

TURKISH DYES GIVE PERFECT SATISFACTION.

DR. DOW'S STURGEON OIL LINIMENT.

Dr. Dow's Sturgeon Oil Liniment is a remedy that should have a place in every farm house in the Dominion. In districts where it is known it is highly praised and cherished, for it is a sovereign remedy for man and beast. It cures neuralgia, rheumatism, contracted joints, lumbago, sciatica, cramps in the muscles, strains, bruises, and other diseases which can be cured by outward application. The principal ingredient in this remedy is the oil of the sturgeon, a large fish found in the lakes of North America. The fish has free gills and its body is more or less covered with bony plates in longitudinal rows. It is generally found about six feet in length, but specimens over eighteen feet have been found. Its body is long and slender, its flesh is white, delicate, firm and excellent when fresh. Its oil, properly combined so as to form Dr. Dow's Sturgeon Oil Liniment, has the good effect of dissipating all kinds of pains. This remedy has been before the public for over forty-five years, and each of these years has added to its reputation and increased its sale. The property which it possesses to an extent unknown to any other remedy is that of drawing pain and inflammation to the surface, thereby relieving the affected internal organs. In doing this it does not injure the skin, as the many blisters which often are used, but on the contrary, it has the effect of restoring the skin to a healthy condition in those annoying affections attended with inflammation and eruptions, in which the skin is not broken, such as frost bites, chilblains, burns, scalds, ringworms, boils and felons.

Dr. Dow's Sturgeon Oil Liniment shows to great advantage in the curing of neuralgia. The shooting pains and intolerable agony peculiar to this disease give way before this wonderful remedy, which gives relief instantly on application. Rheumatism is also cured by Dr. Dow's Sturgeon Oil Liniment. This remedy has a magical power on the affected joints, nerves and muscles, and a few applications very frequently enables the sufferer to move around free from pain.

Dr. Dow's Sturgeon Oil Liniment is an excellent remedy to rub upon contracted

joints. It loosens them, and the sufferer regains the proper use of their limbs.

Lumbago and Sciatica are dispersed by Dr. Dow's Sturgeon Oil Liniment and often drawn away altogether.

Sprains and bruises are relieved by this remedy, and this is one very good reason why Dr. Dow's Sturgeon Oil Liniment should always be kept on hand, for one never knows when it may be required, sprains and bruises being a matter of every day occurrence.

Everyone should be prepared for emergencies, and with a bottle of Dr. Dow's Sturgeon Oil Liniment on hand you are ready for many mishaps that may come to you at any moment. It is not an expensive remedy, but it is full of good qualities. Its formula is one of the most skilful ever devised. It is compounded with the greatest care; its results are marvellous.

Just think of it; for twenty-five cents you can get a cure for rheumatism, neuralgia, sciatica, lumbago, or any other of the demon diseases. What a relief one feels after pain has left the body. You are in pain now; experience that blessed relief by using Dr. Dow's Sturgeon Oil Liniment.

But as we said before, Dr. Dow's Sturgeon Oil Liniment is good for beast as well as man. It is a magnificent application for external injuries on animals, and for almost all diseases to which they are liable. Bruises, strains, saddle and collar galls, cuts, wounds of all kinds, scorbutis, scurvy, cracked heels and grease are cured by Dr. Dow's Sturgeon Oil Liniment. It cools down the inflammation, prevents proud flesh, and secures a surface that will heal quickly. Weak knees are strengthened, blood spavin, is reduced, and founder, ring bone and hard hoof are cured by Dr. Dow's Sturgeon Oil Liniment.

Lovers of horses always keep a bottle of Dr. Dow's Sturgeon Oil Liniment under their buggy seats, so that in case of need it may be handy.

Try Dr. Dow's Sturgeon Oil Liniment, and you will be convinced that it is all that is claimed for it.

QUICK WAFFLES.—Two pints sweet milk, one cup butter (melted), sifted flour to make a soft batter; add the well beaten yolks of six eggs, then the beaten whites, and lastly (just before baking) four teaspoons baking powder, beating very hard and fast for a few minutes.

TURKISH DYES NEVER DECEIVE.

PLANETS IN NOVEMBER, 1895.—Saturn is in Conjunction with the Sun on the 2nd. The Moon is near Neptune on the 5th and close to Jupiter on the 9th. Mercury is visible for a few days in the morning sky around the 10th. Uranus is in Conjunction with the Sun on the 12th. The Moon is near Venus on the 13th, close to Mercury on the 15th, passes Mars and Saturn the same day; is close to Uranus on the 16th, when Saturn and Mars are in Conjunction. On the 20th Saturn is near Mercury. On the 23rd Mars and Mercury are near each other. On the 26th Mercury is close to Uranus. On the 29th Uranus is near Mars, and the same day Venus reaches Greatest Elongation West as a "Morning Star."

TURKISH DYES ARE THE CHEAPEST.

DR. WILSON'S CRAMP & PAIN RELIEVER.

Pain brings us face to face with the fact that we are only mortal and that at any time our lives may be snuffed out just as the flame of a candle is extinguished. Man inherits pain. Adam and Eve suffered pain and misery through their sin, and from that time to the present it has been the great dread of man. But pain does not attack every one alike. Some have more pain than others; some suffer nearly all their lifetime, while others have comparatively little pain. When there is pain it is due, generally, to the neglect or contravention of well understood laws which govern our existence. From experience we learn what these laws are and how they should be observed. Dr. Wilson's Cramp and Pain Reliever we know cures pain, whether internal or external, whether inherited or invited—pain received in the performance of duty or pain through ill-doing.

Dr. Wilson's Cramp and Pain Reliever not only destroys the pain as a symptom, but also removes the cause of the pain, and thus does away with it for ever. It is harmless in its action. It does not contain any ingredient which, like opium, simply deadens the pain for a time, but is a different kind of remedy altogether. Dr. Wilson's Cramp and Pain Reliever destroys pain and leaves no evil after effects. It stimulates the system to throw off the evil instead of deadening it so that it cannot perceive that which is evil and wrong. In curing pain in one form it does not cause it in another. It is quick in action, and pain will not return unless new causes for it arise.

Dr. Wilson's Cramp and Pain Reliever taken internally, cures at the commencement of the attack, cholera, cholera morbus, colds, sore throat, chills, cramps, fever and ague, chills and fever, and malaria. Its action is wonderfully rapid. The moment a dose is taken a glow of heat begins to diffuse itself throughout the body, perspiration breaks out, and if care is taken the disease is thrown off very easily. If taken in the early stages of all fevers it is likely to break them before they have fairly begun to run their course.

When used externally, Dr. Wilson's

Cramp and Pain Reliever will relieve toothache, burns, scalds, cuts, bruises, congestion or inflammation of the lungs, pneumonia, pleurisy, rheumatism, and the like. Rubbed briskly into the body, it seldom fails to do good, if it does not entirely relieve the pain and cure its hidden cause.

Dr. Wilson's Cramp and Pain Reliever is invaluable for summer complaints. Dr. Wilson's Cramp and Pain Reliever is a remedy that should always be on hand. Immediate treatment usually means quick cure, while delay means danger. Dr. Wilson's Cramp and Pain Reliever can be obtained at any reliable drug store or general store in the Dominion. It is called for and sold from one end of the country to the other, and there is no excuse for one not having it when required. Have it ready and you will never regret. A bruise bathed in Dr. Wilson's Cramp and Pain Reliever will seldom grow blue or black; the inflammation is extracted and the pain has departed once for all. Many are the testimonials to the efficacy of this remedy. Matthias Marsh, of Consecoon, says that it cured him of lame back, from which he had suffered for a number of years. If you have a lame back do not hesitate to try Dr. Wilson's Cramp and Pain Reliever. It may save you days of suffering.

Dr. Wilson's Cramp and Pain Reliever will positively relieve pain, and that is a great thing in this life of tears.

COTTAGE PUDDING.—One-half cup of sugar, one cup of milk, one pint of flour, three tablespoonfuls of melted butter, one teaspoonful of soda, two of cream of tartar, two eggs, a little salt; bake one-quarter of an hour in small pans.

TAPIOCA PUDDING.—Cover three tablespoonfuls of tapioca with water; stand over night; add one quart milk, a small piece of butter, a little salt and boil; beat the yolks of three eggs with a cup of sugar and boil the whole to a very thick custard, flavor with Brayley's vanilla; when cold, cover with whites of eggs beaten.

RICH BRIDE CAKE.—Take four pounds of sifted flour, four pounds of sweet, fresh butter, beaten to a cream, and two pounds of white powdered sugar; take six eggs for each pound of flour, one ounce of ground mace or nutmeg and a tablespoonful of Brayley's lemon extract or orange-flower water.

PLANETS IN DECEMBER, 1895.—The Moon is near Neptune on the 2nd and alongside Jupiter on the 6th. Neptune reaches Opposition to the Sun on the 8th. The Moon is near Venus on the 12th, passes Saturn and Uranus on the 13th, is close to Mars on the 14th and Mercury on the 15th. Saturn and Venus are in Close Conjunction on the 22nd, and Uranus and Venus in Conjunction on the 28th.

WHEN YOU GET TIRED OF COMMON DYES, USE TURKISH.

Catarrh in the Stomach cured by *Herbine Bitters*.

Messrs. Brayley, Sons & Co.

GENTLEMEN,—For the last number of years my little girl, about eleven years old, was troubled with a bad stomach, which occasionally brought on a very sore throat, which the doctors usually called diphtheria. I had already lost two children with this dreaded disease, and this being the only girl I had I naturally felt very anxious about her.

Early in the fall my husband took a very bad bilious attack, and I was advised by Mrs. J. Mills, of South Woodslee, to try Dr. Wilson's *Herbine Bitters*, a medicine that Mrs. Mills claimed never failed with her in all cases of biliousness. I bought a bottle of your *Herbine Bitters*, and I am much pleased to tell you that it completely cured my husband, and he is now feeling as well as can be. Feeling encouraged with the success of your *Herbine Bitters* with my husband I thought I would try what they would do with my little girl. And this is the reason of my letter of recommendation for your valuable remedy called Dr. Wilson's *Herbine Bitters*. It is common talk of this neighbourhood how nice and fat my little girl is getting, and how healthy she is now. I could see her improving from day to day, and although it is but a short time since she first began to take the *Herbine Bitters*, I can say the girl is now as healthy as any child in the neighbourhood. She can now go out and play with the children, can go to school every day, and is all right in every respect, while, but a short time ago, she used to be bothered almost weekly with a sore throat, arising from, I presume, a sour stomach.

I am now recommending your valuable *Herbine Bitters* to all my neighbours, and I am glad to say it has done a great deal of good in this neighbourhood. I send you this letter so to let the world know what I think of this great remedy called Dr. Wilson's *Herbine Bitters*.

You may use this letter as you see fit. Wishing you every prosperity in your honest endeavour to furnish a cheap and valuable remedy to the world, I remain,

Yours sincerely,

MRS. WM. HARVEY

North Woodslee,
January 12th, 1894.

The foregoing is only one of the many hundreds of testimonials that have been written in favor of Dr. Wilson's *Herbine Bitters*. They have been penned by people who have suffered and know the great good that Dr. Wilson's *Herbine Bitters* has done them. Can there be any testimony plainer and more to the point than the preceding one. Dr. Wilson's *Herbine Bitters* cured Mrs. Harvey's husband of biliousness, then it cured her child of a malignant throat disease. There are other testimonies showing where Dr. Wilson's *Herbine Bitters* worked wonderful cures, and all bear out this great fact, that Dr. Wilson's *Herbine Bitters* is a sure cure. It is a good substantial remedy, sold at a reasonable price, which destroys disease quickly and permanently.

HARD SOAP.—Pour twelve quarts soft boiling water on two and one half pounds of unslacked lime; dissolve five pounds sal soda in twelve quarts soft hot water; then mix and let them remain from twelve to twenty-four hours. Pour off all the clear fluid, being careful not to allow any of the sediments to run off; boil three and one half pounds clean grease and three or four ounces of rosin in the above lye till the grease disappears; pour into a box and let it stand a day to stiffen and then cut in bars. It is well to put the lime in all the water and then add the soda. After pouring off the fluid, add two or three gallons of water and let it stand with the lime and soda dregs a day or two. This makes an excellent washing fluid to boil or soak the clothes in, with one pint in a boiler of water.

FLANNEL CAKES.—Beat six eggs very light, stir in them two pounds of flour, one gill of yeast, small spoonful of salt, and sufficient milk to make a thick batter. Make them at night for breakfast, and at ten in the morning for tea. Have your griddle hot, grease it well, and bake as buckwheat. Butter and send them hot to the table.

SPANISH SAUCE FOR PUDDING.—One-half cup of boiling water, one tablespoon corn starch, two tablespoonfuls vinegar, one tablespoonful butter, one cup sugar, one-half nutmeg.

DELICATE CAKE.—Three cups of flour, two of sugar, three-fourths cup of sweet milk, whites of six eggs, half cup butter, teaspoon cream tartar, half teaspoon of soda. Flavor with lemon.

TURKISH DYES DO NOT WASH OUT.

FOR HORSES AND CATTLE.

With the enterprise that has always characterized the great wholesale druggist firm of Brayley, Sons & Co., they have secured the Sole Agency for Canada for the Remedies, etc., of the world-famed firm of DAY, SON & HEWITT, Proprietors of the Royal Animal Medicine Manufactory, London, England.

This is a step in the right direction and one which will prove of benefit to the live stock of the country. The fact that Day, Son & Hewitt are the leading authorities in Farriery in the United Kingdom, and as such have received a Special Royal Appointment from Her Majesty the Queen and H.R.H. Prince of Wales, is sufficient recommendation to the Canadian farmer and stockbreeder for the use of their medicines, instruments, and literature.

Every farmer, stock-raiser and horse-breeder should know something of the treatment of the ailments peculiar to his stock. There are many troubles that can be removed by any intelligent man with the greatest ease, if he only knows the proper way to go about it, and it is for the purpose of instructing the stock-owners in these things that Day, Son & Hewitt have published a book called the "Key to Farriery."

The "Key to Farriery" is now in its fifteenth edition and meeting with great demand in the United Kingdom. The object of the "Key to Farriery" is to enable stock-owners to employ rational and ready means of cure in all cases of emergency and simple ailments.

In a book of that kind it is most essential to be both brief and clear; brief, that the reader may obtain at a glance the information he requires; clear, that it may be within the reach of his understanding.

In the many excellent works on the diseases of animals that have been issued from time to time, the details are so minute, and language so technical, that they are practically useless to the agriculturist. The object, then, in the "Key to Farriery," is to supply an acknowledged deficiency. In the present day stock-owners are compelled to think and act more than ever for themselves. They have not the time to study long and elaborate books, even had they the inclination. The "Key to Farriery" gives trustworthy and concise informa-

tion in order that the stock-owner may arrive at a correct conclusion regarding the common diseases to which his animals are liable. It gives the symptoms of every disease, and immediately following the treatment in language and terms that everybody can understand. It also gives the cause of the ailment, and treats with all the diseases of horses, cattle, sheep, pigs, and dogs. There are 150 pages of solid information. Beside having a book of this kind in his possession, the agriculturist should always keep a few reliable medicines on hand; for by neglecting this simple precaution valuable animals are sacrificed and much suffering is the outcome. Day, Son & Hewitt manufacture medicines of a very high standard. Their medicines being manufactured upon a large scale, and under qualified veterinary supervision, uniformity of strength and quality is assured; furthermore, none but the finest drugs enter into their composition.

Among their medicines, and which are very largely used, are the following:—

Gaseous Fluid, or Black Mixture, which acts like magic for Fret, Colic, or Gripes in Horses; for Colds and Chills, Hoven or Blown, and all cases of Scour, Diarrhœa, and General Debility in stock. This preparation is universally considered the greatest animal restorative of the age.

The Chemical Extract for mollifying and assuaging pain arising from all external wounds, such as Kicks, Cuts, Bruises, Sore Withers, Swellings, Strains of Ligaments and Tendons, Saddle Galls, etc.

The Red Drench, for Inflammatory Disorders among horses, cattle, sheep and pigs, and for Colds, Indigestion, Costiveness, Yellows, Surfeits, Loss of Cud, Hide-bound, Red-water, etc.

The Gaseodyne used as Laudanum in bad cases of Parturition in mares, cows and ewes. For Broken Wind or Asthma, Bronchitis, Inflammation of the Bowels, etc.

The Red Condition Powders for Starving Coat, Ill-condition, Itching of the Skin, Loss of Appetite and Animation in horses.

The Black Physic Balls for effectually cleansing the system of all impurities.

The Red Paste or Condition Balls, pre-eminent for conditioning horses and producing a mole-like sleekness of coat.

The Diuretic Balls for Derangements of the Bladder and Kidneys in horses,

When you want a Dye you can recommend, use Turkish.

such as difficult Stooling, Thick Water, etc.

The Blister Ointment for Old Tumors and Strains of Ligaments and Tendons, also for Curb, Sidebones, Splints, and Sprains.

The Hornicura, a safe and reliable cure for all diseased conditions of the horse's hoofs.

The Aluminate of Zinc Ointment for Thrush in horses' feet, and for Loo in cattle; also for "Foot Rot" and Sore Feet in Sheep.

Lice, Mange, and Scurvey Wash for horses, cattle, sheep, and pigs. Destruction to ticks.

The Cough Balls, specially prepared for Coughs of all kinds in horses.

Anti-Fly Dressing, a sure preventive of flies attacking cattle or sheep.

Broncholine, the great cure for Husk, Hoose, and Coughs in heifers, calves, sheep, and lambs, and equally beneficial for Tape-worms in sheep.

Day, Son & Hewitt make a specialty of Complete Medicine Chests containing all of the above medicines, as well as others. There are special Lambing Chests; special Calving Chests, and Chests of Medicines for all Dog Ailments. These are things that every large stock-breeder should have.

Day, Son & Hewitt also have a fine line of Veterinary Instruments.

Any of the articles produced by this great firm can be procured by application to Messrs. Brayley, Sons & Co., the Sole Agents in Canada.

Send for "THE KEY TO FARRIERY."

"The Key to Farriery" is a volume of information that should be among the household books of every farmer in the country.

Every stock-raiser and horse-breeder who wishes to bring his business down to the highest paying basis should have his mind filled with information in reference to all matters pertaining to his stock.

By the aid of "The Key to Farriery" horses and cattle may be kept in good health, and many a veterinary surgeon's fee saved. Remember that in "The Key to Farriery" there are 150 pages of solid information. The information is plain and concise, and there is not a superfluous word in the whole book.

Another great feature of "The Key to Farriery" is that it is well arranged and the diseases are classified, so that in a glance one can find just what he wants. "The Key to Farriery" gives the symptoms of every disease peculiar to horses and cattle, sheep and pigs, so that when you find any of your stock acting in a peculiar manner or in any way out of the ordinary you can easily tell what is the matter with the animal. You have the symptoms; right underneath you find the cure.

The cure can be most quickly brought about by the use of Day, Son & Hewitt's medicines. By the use of them a quick and sure cure will result.

Use Day, Son & Hewitt's medicines. With these, the stock breeder is independent of the veterinary surgeon.
