

SUPPLEMENT TO "GRANGE BULLETIN."

TORONTO, APRIL, 1884.

NOTE.
Owing to a surplus of matter, we this month issue a Supplement, which increases the regular size of our paper by one quarter.

VEGETABLE SEED LIST FOR 1884.

The seeds we offer are all fresh, are put up by the producers, and will be shipped, freight paid, at prices quoted, when going with other goods amounting to \$10. As the seed business is confined to a very short time, the pressure of work just at the sowing season is very great; and as each will have to wait their turn we would ask you to send in your orders as early as possible, and so give us a chance to get them filled before the rush. You will find this a convenience to yourselves as well as to us. You will note that we have given no quotations for Field Seeds, as the market for these is continually changing, and any prices only hold good from one day to another. When an order is sent in for Timothy, Clover, Seed Grain and such like, with the money accompanying, we will purchase at the best advantage possible; otherwise, all orders of that nature will be handed over to some reliable seedman to fill on his own account.

Awarded a Diploma at the Provincial Exhibition, Guelph, and First Prize wherever exhibited. Price \$2500 F.O.B. at Simcoe. Terms cash with order. Manufactured and for sale only by the Inventor and Patentee.

Warning to Ladies.

In consequence of the great success that has attended the sale of our N.M.T. Sewing Cotton, owing to the uniform excellence of quality and its special fitness both for Hand and Machine Sewing, imitations have appeared in which the exact SHAPE AND COLOR of the N.M.T. Spool have been adopted.

We would, therefore, respectfully ask Ladies to see that the spools offered them bear our Trade Mark—the letters N.M.T. ON EVERY LABEL—this being the best guarantee of their obtaining that quality of Cotton which will both WORK and WEAR well.

NOTE THE PRICE.

STEEL BARBED WIRE FENCING.

Hardly a Farmer in the Country but thinks all Galvanized Barbed Wire is of equal strength. This, however, is a mistake. The Canada Wire Company's manufacture, handled by the Grange Wholesale Supply Co. has not a tendency to break from a grip given the wire near the barbs as is done by the machines which make nearly all the wire now in the market. This is the Manitoba Locked. The Barbs are invariably at right angles, and the machinery that puts the barbs in is so perfect that it does not injure or weaken the wire cables, as is the case with other Barbed Wires. The wires are evenly twisted and of equal length, the strain comes evenly on each wire forming the cable, and both barbs pass through the stranded wires. While the barbs are firmly put on, they are not knotted to the wires and do not bind them so tightly as to prevent expansion and contraction. We have given considerable attention to the different Barbed Wires, and we have seen no other make to equal it in any respect. We have no object in recommending this to you, as there is a bond among the manufacturers preventing one maker underselling another, no matter what the make, consequently we can buy any other make quite as cheaply as we can this, but we consider the object of the Grange Wholesale Supply Company is to introduce the best of everything that lays in its power.

Galvanized Barbed Fencing made from Steel Wire makes the cheapest; the most durable; it is not affected by fire, wind or flood; does not cause snow drifts; takes fewer fence posts; stock cannot push it down; it protects itself—acts on the defensive; it takes but little room; you can cultivate close to it; it requires but little labor to put it up; you can draw in one load enough to fence a good sized farm; it is going to be the fence of the country. There is no use in waiting for your neighbor to test it before you buy. Have your own order sent in soon so that you can make your fence early in the spring when little else can be done on the farm. The Grange Wholesale Supply Co., has already supplied a great many tons to the Order. We give it to our Patrons at Manufacturers prices to the merchants, and guarantee the quality. We are paying cash and ask you to remit promptly for this wire as there is no money in it to the Company.

This Company will supply it to the Grange in any quantity.

Toronto Ordered Clothing Co.

Spring Tooth Cultivator.

Enquiries for Spring Tooth Cultivators have been so numerous of late that we have set ourselves about to look into the matter, and after considerable investigation we have arranged for the manufacture of "THE GRANGE SUPPLY CO'S. SELF GOVERNING SULKY CULTIVATOR," which we believe to be the strongest, most durable and most easily adjusted of any in the market. It has many advantages over other makes, being very simple in construction and not liable to get out of repair. The wheel running over an obstacle does not prevent any of the teeth from continuing the work. Any one or more teeth may pass over a fast obstacle and not prevent the balance of the teeth from working. You can cultivate a dead furrow without the least trouble. It works into hollows and cultivates them thoroughly when others would leave them untouched. It adjusts itself to any surface. It can be fastened down rigidly if required, but would seldom, if ever, be so used. The lever can be fastened out of the Ratchet, leaving the depth of the teeth controlled by a sliding weight. *The thinnest sod can be cultivated without tearing it up, or the hardest ground can be thoroughly worked.*

Don't fail to use the BEST AND ONLY ADJUSTABLE SPRING TOOTH CULTIVATOR MADE.

The draft is light and easy for the horses, being directly from the horse to the points of the teeth.

The great weight upon the horses' necks, which is a serious objection to all other Wheel Cultivators is entirely obviated in this, the Pole being perfectly free and the horses only being obliged to sustain the weight of it alone.

It can be used to CULTIVATE CORN by removing one or more teeth as desired. One bolt only to be taken out to remove a tooth.

It can be had either with or without a Broad Cast Seed Attachment.

GRANGE PRICES.

18 Tooth Cultivator . . . \$34.00
18 Tooth Cultivator with Force Feed Broad Cast Seeder . . . 57.50
18 Tooth Cultivator, with Force Feed Broad Cast Seeder and Grass Seeder Attachment, to sow in front of teeth . . . 61.00
The above with Grass Seeder to sow either before or behind the teeth. 64.50
F.O.B. AT BRANTFORD.

FANNING MILLS.

We have again formed a connection for Fanning Mills and hope our Patrons will appreciate it, as certainly they are now offered a splendid opportunity for obtaining a really first-class Mill at a very reduced price.

The Ceres is a perfect Separator and Grader and in range and variety of work, mechanical principle and construction is, in our opinion, superior to all others; and in capacity and quality of work, adjustability, durability and finish it is unequalled.

The screens used in the "Ceres" cannot be successfully used in other mills, as they are nearly all long meshed, and will clog in any side-shake mill, and they are the only screen that will separate chaff or rye from wheat.

The round hole cockle screen cannot be used in any other mill, and it is the only screen that will separate cockle from all sizes of wheat. There is no clogging of screens with the "Ceres," the motion being sufficient to keep them perfectly clean.

What the "Ceres" does. It cleans with great rapidity all kinds of grains and seeds. It separates and grades oats, barley, wheat, rye, buckwheat, peas, beans, corn, clover and timothy. It takes out every grain of cockle, chaff, rye, oats, pigeon-weed, mustard, plantain, and all foul seeds and broken grains of wheat from the first class or seed wheat, and at the same time makes the second class or market wheat perfectly merchantable.

It takes oats from wheat, oats from barley, oats from buckwheat, and grades the wheat, barley and buckwheat at the same time. It also cleans and grades clover and timothy, and separates all the foul seeds from them. It cleans and grades all seeds and grains perfectly with wonderful rapidity. *Barn-floor sweepings* passed through the "Ceres" will save grass seed enough to pay for the Mill in an incredible short space of time.

GRANGE PRICE.
F.O.B. at Brantford - \$26
ORDER ONE.

Corn Planters.

The lightest and most desirable article of the kind that we have ever seen, we have now arranged for, and hope for a large inquiry during the season. A boy 12 years of age can handle it with ease. Kindly send in your orders early to ensure getting one in time.

Price, each - \$1.00.

All persons desirous of obtaining information respecting the Grange organization will write to H. GLENDINNING, Secretary Dominion Grange, Manilla, Ont., for full particulars.
