TRAIN AND MAIL SERVICE FOR TORONTO AND COBALT FULL OF INCONVENIENCES

Simple Rearrangements
Which Would Benefit
Travelers and Trade, But
Which Railways and Postal
Department Shudder At.

Cobalt is 330 miles from Toronto,
Montreal is 333 miles from Toronto,
practically the same distance. The C. P.
R. will carry you from Toronto to
Montreal in 9 or 10 hours. By the
G. T. R. the trains vary from 12 to 9
hours, there being four a day.

To get to Cobalt from Toronto by present
arrangements one leaves at 10:15
p.m. and arrives at 11:19, a distressing
journey of 13 hours, if the train is on
time.

The Grand Trunk is held responsible
for the delay by the T. & N. O. railway
authorities. Formerly the Grand Trunk
ran a train at 9 p.m. and another at
11 p.m. These have been amalgamated
since the falling off of summer
traffic into one train leaving at 10:15.

The Grand Trunk people say that the
change in traffic since the C. P. Ry. line
was opened to Sudbury is also a factor,
rendering the new arrangements necessary.

The 10:15 p.m. makes connection with
the trains arriving from Detroit at 10
from Buffalo at 5:30 from London at 10,
from Montreal and local points at 9:45,
and from the Midland lines after 9 p.m.

The Grand Trunk people declare that
the Cobalt traffic can be carried in one
car, and that it would not be possible
to run an earlier train, or to expedite
the present service.

The T. & N. O. Ry., leaving North
Bay at 7:45 a.m. makes the 103 miles to
Cobalt in 3 hours, 24 minutes. It takes
the Grand Trunk 9 hours and 55 minutes
to make the 227 miles to North
Bay.

The Grand Trunk Railway Company
declares it is impossible to expedite this
pace of 25 miles an hour.

T. & N. O. will be willing to
start their trains to connect with the
G. T. R. at any time in the morning
they could arrive. The former sur-
veyor train reached North Bay about 5
o'clock a.m., and Cobalt was scheduled
for breakfast. If the Grand Trunk
hour, which is not really terrific, North
Bay might be reached by 6 o'clock and
Cobalt by 9:30 in the morning. These
two hours are the business men at
the station, and the increasing traffic and
importance of the centre of the silver
district, makes it imperative that the
Grand Trunk take the matter into con-
sideration.

To the railway man the demand ap-
pears unreasonable, but it is by want-
ing and getting up the matter with
the authorities, so that whatever respon-
sibility exists for the present unsatis-
factory service rests upon the Grand
Trunk.

Lists Sent Out by Special Train.

OTTAWA, Oct. 25.—(Special).—The three bush polls in
Algonia will probably be opened
to-morrow morning after ail.
On Saturday, the voters' list
for Bellevue arrived, was printed
and mailed. This morning the
other two reached the capital and
were printed with all despatch
and sent west by special train.
It is expected that they will
reach the polling places in time.

Australia is To Control Employers

LONDON, Oct. 25.—(C.A.P. Cable).—
At Melbourne the drafting of the
amendment of the constitution for the
purpose of legalizing the new protection,
has been completed. Deakins' pro-
posals involve control of the con-
ditions of employment of all protected
industries in the fullest sense of the
word, embracing a minimum of wages,
regulation of hours and limitations of
boy labor.

SERBIAN CROWN PRINCE PLANS TO VISIT RUSSIA

May Endanger Peace Parleys—
Berlin Expects Conference
Will Be Called.

ST. PETERSBURG, Oct. 25.—No an-
nouncement was made to-day by the
foreign office as to the progress of ne-
gotiations at Berlin between M.
Iswoysky, the Russian foreign minister,
and Prince von Buelow, the German
chancellor. The conference, so far as
can be learned, has scored no definite
results and will be continued Mon-
day.

Advices from Berlin, however, have
in no wise lessened the confidence here
that the proposed international con-
ference will ultimately be accepted by
Germany, altho the negotiations are
not to be continued for some time after
the return here of M. Iswoysky. The
conference, therefore, will be correspondingly
delayed.

M. Iswoysky, in an interview with
The Novoye Yermys, from a Vienna
correspondent to-day, declared that the
Berlin treaty was a blow at the Slavs,
vital interests, and that the indigna-
tion of the Russian press and public
could easily be understood; but he
asked the people to suspend judgment
with regard to his return to Russia,
when he hoped as with the Emperor's
permission, to make a statement before
the Duma.

Canon Law.

TAFT WILL WIN WITH LEAD OF 40

New York Herald's Forecast
Indicates, However, a Big
Falling Off in Republi-
can Plurali-
ties.

NEW YORK, Oct. 25.—New York
State will be the storm centre of the
closing week of the political campaign.
Both the Republican and Democratic
political nominees will tour the state
and some of the ablest speakers at the
command of the national committee
have been assigned to participate in
the battle for votes. With the excep-
tion of a brief speech in New Haven,
Conn., Mr. Taft will spend the entire
week with the Empire state. Mr.
Bryan will devote four days to New
York State and on Friday will enter
Ohio, which, like New York, has a
place in the doubtful column. Indiana,
another uncertainty, will be toured by
Mr. Bryan on Saturday, the Democratic
candidate closing the week's cam-
paigning with a night speech in Chi-
cago.

Vice-Presidential Candidates.
Jas. S. Sherman will also be busy.
He has a week's campaign outlined in
New York State, while the other
vice-presidential candidates, Mr.
Carter, Mr. Kern, who had expected to de-
vote the week to speech-making in In-
diana, depend upon the condition of his
sick son.

Members of President Roosevelt's
cabinet will take an active part in the
week's campaign. Secretary of State
Root will speak in Ohio and New York.
Secretary of the Navy, Mr. Bryan, will
speak in New York; Secretary of the Treas-
ury, Mr. Clegg, in New York and Secretary
of the Interior, Mr. Garfield, in Ohio.

While New York will be the centre of
political activity, Ohio and Indiana will
be stamped by both parties.
Forecast Favors Taft.
The Herald (Independent), but with
a tendency towards Bryan, publishes
an extensive forecast this morning,
which is epitomized as follows:
"That Taft's star is now in the 62-
cent position, that the majority is inclining
towards the Republican party, and that
New York, the battle ground, the great
pivot state in the presidential cam-
paign, is in the hands of the Republi-
cans, is the forecast of the Herald. It
forecasts 242. The reports on which
the forecast is based give the Republi-
can candidates 166 electoral votes, and
the Democratic candidates 100. The
forecast is based on the following con-
ditions: That the majority is in the
hands of the Republicans, and that
New York, the battle ground, the great
pivot state in the presidential cam-
paign, is in the hands of the Republi-
cans, is the forecast of the Herald. It
forecasts 242. The reports on which
the forecast is based give the Republi-
can candidates 166 electoral votes, and
the Democratic candidates 100. The
forecast is based on the following con-
ditions: That the majority is in the
hands of the Republicans, and that
New York, the battle ground, the great
pivot state in the presidential cam-
paign, is in the hands of the Republi-
cans, is the forecast of the Herald. It
forecasts 242. The reports on which
the forecast is based give the Republi-
can candidates 166 electoral votes, and
the Democratic candidates 100. The
forecast is based on the following con-
ditions: That the majority is in the
hands of the Republicans, and that
New York, the battle ground, the great
pivot state in the presidential cam-
paign, is in the hands of the Republi-
cans, is the forecast of the Herald. It
forecasts 242. The reports on which
the forecast is based give the Republi-
can candidates 166 electoral votes, and
the Democratic candidates 100. The
forecast is based on the following con-
ditions: That the majority is in the
hands of the Republicans, and that
New York, the battle ground, the great
pivot state in the presidential cam-
paign, is in the hands of the Republi-
cans, is the forecast of the Herald. It
forecasts 242. The reports on which

AN ELECTION ROORBACK OVER SENTINEL ARTICLE

Cons. Claim Libs. Have Been Playing a Trick on Mayor Stewart—Two Days' Happenings.

HAMILTON, Oct. 25.—(Special).—The labor men wound up the campaign with a meeting Saturday night in a tent at the corner of King and Walnut-streets. The tent was 60 by 40 feet and it was jammed. There were no seats, but the crowd remained for the speeches of Candidates Sam Landers and Allan Studholme, M.L.A., and cheered their hoarse.

Landers says he has a perfect organization for getting out the vote and all his workers are volunteers. Saturday night he scored both his opponents. He said he was told that the reason Premier Whitney refused to speak here in the interests of the Conservatives was because he and his cabinet were displeased with Mr. Landers' vote for the Radial Bill, which was a slap at provincial rights. As to Mr. Eastwood, Mr. Landers repeated his charges that some of the mechanics employed on the drill hall were paid below union scale and that the fair wage officer so reported to the government. The campaign has been very quiet here, but some desperate tactics have been employed and there will be a very strenuous battle Monday. Both the old parties appear to have lots of money. The electors have been furnished with clippings from The Orange Sentinel, Toronto, re the Autonomy Bill. The clippings were enclosed with Mayor Stewart's picture. The Conservative workers have enclosed this literature out and the Liberal charge Conservatives with it.

A Libel Suit.—Cyrus Navin is suing the Dundas Banner for alleged libel. In a report of a burglar the paper said Mr. Navin could not have been connected with the affair because he was in jail at the time. The Banner apologized, laying the blame for the statement on a typographical error.

Under the terms of the contract the city council made last July with the Cataract Power Co. for supplying electric energy to the city it is stipulated that no motor may be run by the city unless the company approves of it. The fire and water committee has ordered two new motors for the water works, but cannot install them until the company approves of the motors.

Private Detective Huckle, who was arrested on a charge of blackmail and extortion, has indicated that he would consult the attorney-general's department, and get out warrants for the arrest of some police officers.

The local police have been asked to look out for Wm. Watcher, Jr., Doncaster, who is accused of bringing voters to the interests of the Liberal candidate.

The congregation of St. George's Church celebrated its 18th anniversary. Rev. Canon Dixon preached.

Mrs. Stella Givens, 183 Northeast-avenue, took a dose of carbolic acid by mistake on Saturday afternoon and was taken to the city hospital in a serious condition. The doctors succeeded in bringing her around all right, however, and she was reported to-night as being out of danger.

John Platt of Millgrove was brought to the city hospital with a bad fracture of the leg. He is related to Drs. McNeil and Davey.

Wm. Blades of the Saturday night was struck by a street car on Saturday night and badly shaken up. He was able to leave the hospital to-day.

Mrs. Julia Ann Bell, 116 North Catharine-street, died on Saturday afternoon in her 90th year. She formerly lived in Dundas.

Mrs. Martin, Canon and Ashley-streets, died while on a visit to her daughter at Clarksburg, Ont. The body will be brought here for interment.

Word was received here on Saturday night of the death of John H. Hahn, 64 Wilson-street, who was on his way to California, where he was going for the benefit of his health. He was formerly a milk dealer and well known. The body is expected to arrive here about Wednesday.

Geo. Birrell, 21 Southeast-avenue, the well known hardware manager, died to-day at his home. He had been ill only a few days. He was a prominent member of the Masonic Order and an enthusiastic sportsman. He was 48 years old.

The Doctrine of Healing.—Rev. Sub-Deacon Sutherland to-night preached on the neglected doctrine of healing in St. Mark's Church. He said the movement known as the Inman movement was started in Boston about two years ago by Rev. Dr. Worcester, the purpose of which was to bring before Christian people the fact that the healing of the sick was entrusted to the church as well as the saving of souls, and he thought this should be as part of a minister's duty as preaching the gospel.

Caleb Fonger, Aldershot, went to the City Hospital about midnight on the 21st with several fingers on one of his hands chipped, and it was necessary to amputate his index finger at the first joint. It is understood that he met with the injury in a fight.

The New Receiver.—Petition for Receiver.—CLEVELAND, O., Oct. 25.—In behalf of the Ingersoll-Rand Company of New Jersey, manufacturers of electric appliances, a petition was filed in the federal court last night asking that a receiver be appointed for the Municipal Traction Company.

Mayor Johnson when asked concerning the matter, said that all bills would be paid and that no receiver would be appointed.

HEART ROMANCES ARE TREATED TOO LIGHTLY

Rev. E. C. Laker Asks Parents to Take Interest in Young Folks' Love Affairs.

Taking for his subject "Social Relationship of Young People," Rev. E. C. Laker, at the Clinton-traced Methodist Church, last evening traced the romance and various interpretations of love.

The Bible, he said, spoke much of love, and love played a large part in human life. The word "courtship," he thought, is of exalted etymology, as it often has the idea of court, while its original idea was loyalty.

"The heart romances of young people's lives are too often treated as trivial, and relegated to the place of humor and laughter," declared the minister, "but it is an ill-timed humor."

So much of life's weal or woe depends on the choice of life's companion that the pulpit ought occasionally to preach an earnest sermon on this subject," he said, and believed it more serious when a woman makes a mistake than when a man does.

A Divine Institution.—"The heart of the world," said he, "stands at the marriage altar, and marriage is a divine institution. It is the most momentous play between the cradle and the grave. Flippant carelessness of the holy vow of matrimony is to profane a holy institution, which is mockery of the throne of God. Marriage is desirable, but desirability is not a necessity, for sometimes financial, physical or mental reasons, and marriage should be a natural choice."

Mr. Laker deplored the evidence then shown in the church of hypocrisy, counterfeit womanhood and polished rascals. He was on a pessimist, but on the contrary, considered this the golden age of life.

Appeals to Parents.—Concluding, the preacher advised parents to take a deeper interest in the love affairs of young people and made an earnest appeal to all to manifest a tender and honest love and for all to live a religious life.

GRENS SHOW ESTEEM FOR THEIR COMMANDER

Three Beautiful Presentations to Mrs. A. E. Gooderham on Silver Wedding Anniversary.

A pleasant event—or series of events—testifying to the love and esteem in which Lieut.-Col. and Mrs. A. E. Gooderham are held by the Grenadiers, was the presentation to Mrs. Gooderham of a number of beautiful tokens on Saturday evening, the occasion being the celebration of the 25th anniversary of her marriage.

The first intimation that the recipients had of the surprise to come was the sudden striking up outside the residence of Dean Croft's residence, of the stirring strains of the regimental march, "The British Grenadiers," the brass band of the regiment having volunteered to parade full strength under the command of the officers of the regiment, with the exception of two out of the city, were in close waiting and invaded the residence, bearing with them a magnificent sterling silver punch bowl. The presentation was entrusted to Lieut.-Col. (Dr.) King and he in a few happy remarks conveyed the gift to Mrs. Gooderham. Major Brock and Major Mason, D.S.O., also added felicitations.

Shortly afterwards, a deputation from the Royal Grenadiers chapter, Daughters of the Empire, brought a beautiful sterling silver-fruit bowl on behalf of the chapter. The deputation were Mrs. E. E. King, Mrs. Bewley, Mrs. Watson and Mrs. Sprinks.

At 10.30 p.m. the sergeants of the regiment in full strength arrived with their testimonial in the form of two very striking sterling silver vases.

The bowl is very handsomely hand-crafted with festoons of maple leaves on either side of the body, branches of maple leaves overhanging, which with leaves form unique side handles. The same design of decoration is introduced on the foot and around the inside of the bowl at the top. The 10th Royal Grenadiers' crest is embossed on the front of the bowl, and on the opposite side is this inscription:

"Presented to Lieut.-Col. and Mrs. Albert E. Gooderham, by the officers of the 10th Royal Grenadiers, on the occasion of the twenty-fifth anniversary of their marriage, Toronto, Oct. 25, 1908."

"Four hand grenades form the feet, the flames being gold relief. The bowl is gold lined. The design, which is very unique in character, was largely thought out by Colonel Edmund E. King, and the work, which was executed by the Toronto Silver Plate Co., is a splendid specimen of Canadian silversmithing."

John E. Seales Drops Dead.—LONDON, Oct. 24.—John Ennis Seales of New York, the famous singer, aged 80, dropped dead in Waterloo Station last night.

MUST APPEAR FOR TRAIL AS CONSELING MURDER

Serious Charge Preferred Against an Italian District Constable in Parry Sound.

PARRY SOUND, Oct. 25.—Arling out of what has come to be known as the Eno robbery, some time ago, there are some very startling matters just come to light by a confession which has been made by the Italian prisoners, Seperanzo and Pezzano, confined in the jail here, as a result of which Constables McRae and Madigan went to Byng Inlet and there arrested Joseph W. Moore, an Italian, on a warrant charging him with inciting to murder.

The story told by the Italian prisoners is a remarkable one, and it is understood that other charges may be preferred against the accused man, Moore.

In their confession the prisoners in question state that Seperanzo, who was convicted of the recent assassins of shooting at Constables Knight and Madigan and sentenced to twelve years' imprisonment, had nothing to do with the Eno robbery; but they allege that the persons who actually committed the robbery were boarding at the establishment of the accused man, Moore, before the robbery and after, and they go so far as to say that Moore was the instigator of the whole thing. They allege that when the robbery the stolen money was taken to Moore's store at Byng Inlet, and it is understood that Moore has admitted that there was found behind his store a tin containing \$400, which was the money of the robbery and of away with. As a fact, one of the men originally arrested in connection with the robbery at Eno's was taken by Moore's store.

It is also alleged by this confession that after the men who had been arrested in connection with the robbery had broken jail, the circumstances of which were not given, they went back to Moore's store. This statement is confirmed by one of the constables who saw a suit of clothes hanging in Moore's store, which was let when one of the accused men was arrested, and that subsequently this suit was found at Guelph in the boarding house, where the little Italian, Pezzano, now in jail here, was recaptured.

The confession of Seperanzo went on to state that the Italian, Moore, declared he would get revenge against Murdoch Watts for his action in connection with an affray which took place at Byng Inlet, as Watts had prosecuted certain of his countrymen, Moore's friends, for a boat and offered him \$150 if he would go and shoot Watts and offered him a gun to do it. Moore also stated that he was peatedly told him that Moore would get revenge upon Watts, and that if he (Seperanzo) would kill Watts he (Moore) would take Seperanzo to French River in his gun boat and he could go to Port Arthur and escape.

In the course of his confession Seperanzo alleged that Moore had defrauded his creditors by removing goods prior to the making of an assignment. He also stated where some of the goods of the firm were hidden, and that he had been told by the property of the creditors, which were found in a stable on Still River, about four miles from the store.

The most remarkable feature of the case is that Joseph W. Moore, who after the Eno robbery, came to Parry Sound and offered his services as a constable for the purpose of tracking down his countrymen, the perpetrators of the robbery, and, being duly appointed, at once seemed to busy himself in the matter and expressed himself as able to effect the arrests very shortly.

The accused man Moore was brought before the police magistrate charged with counselling 4 persons to murder Murdoch Watts and was committed to stand his trial.

AN EMPTY BOMBSHELL IS REPLY OF LANGLOIS

Declares Le Nationaliste Has Made a Mistake in Regard to Pamphlet Circulation.

Godfrey Langlois, M.L.A., managing director of "Le Canada," Montreal, has wired The World the following statement in reference to The Nationaliste story which was outlined in The Sunday World:

"Le Nationaliste" publishes with glaring headings the statement that the famous article of The Orange Sentinel entitled "The Duty of the Hour" was printed and published in circular form by the undersigned, so as to raise the passion and enmity of the Province of Quebec against the Conservative party.

In support of that statement the article of The Orange Sentinel is reproduced in the Protestant declaration from Mr. A. Menard, the printer, who states that he was handed a printed circular entitled "The Duty of the Hour" with order to print five hundred copies of it, which he did print, and send to the Maritime Provinces.

As the so-called sensation undoubtedly he wired to the undersigned press of the Dominion, in order to try and influence the public opinion at the late hour, I hasten to make the following declaration:

"I was informed from various sources that this circular reproducing the article of The Orange Sentinel was being circulated in the Protestant districts of this province and copies of this circular were sent to various parts of Montreal from these districts. At the same time I received from the Maritime Provinces a demand for this circular in order that the platform speakers of the Liberal party should be enabled to show up the methods and duplicity of their opponents. As I had no time to follow up the story distributors of the tract I ordered the reprinting of five hundred

EATON'S FOR CLOCKS & "EATON" WATCHES

Read of one of the Most Interesting Clocks We Have Ever Shown

'WAY BACK IN 1680, WHEN OLD CLEMENTS WAS STRIVING MIGHT AND MAIN TO COMPLETE HIS FIRST GRANDFATHER CLOCK, WHICH WOUND FROM THE TOP, HE LITTLE KNEW THAT, DESPITE ALL THE YEARS OF LEARNING, THE IMPROVEMENTS AND WONDERS OF SCIENCE, PRACTICALLY HIS IDENTICAL DESIGN WOULD BE ON THE MARKET IN 1908.

SEE THE ONE ILLUSTRATED

The makers have combined here all the most artistic parts of the very earliest clocks. The "Grandfather" style originated owing to no mechanism being invented to permit the pendulum to swing in a confined space—before that the clock hung upon the wall—hence the large base and narrow case.

In William III.'s time and around the time of Queen Anne these clocks were beautifully embellished—the faces of gorgeous metal scroll work and engraving, the long doors had moulding corresponding to the period of their manufacture, with elaborate top and pillars.

ALL THIS THE MAKERS HAVE CAREFULLY REPRODUCED

in the beautiful piece of work illustrated. The old piece of glass or bullseye in the door has given place to heavy bevel plate glass, and uncertain wooden works are supplanted by a movement of perfect accuracy, with a wonderfully rich, deep, muffled hour strike and cathedral chimes; the face has most elaborate scroll work with the old double circle—in use before minute hands were invented. On top of the dial is a disc showing the moon's phases—this came into existence about the latter half of the 18th century, when there was such a demand for moving figures on the clocks, and has been reproduced in the old-fashioned moon-face. It gives an exact reproduction of Westminster Chimes, is wound by pulling down the heavy polished brass weights. Case of solid mahogany, made in Canada, and thoroughly clim-

Mission Style Grandfather Clock

The most popular style of house decoration at present is the Mission Style—Oak Furniture, Oak Frames, Moulding, etc. These Mission Clocks are made to match the styles, and as well as being a most serviceable timepiece, are a handsome ornament.

At 37.50 Made of Solid Mission Oak, Colonial design, with leaded glass door with strong lock. Heavy brass weight and chains, raised metal figures, oak dial, square shape, standard cathedral gong, hour and half hour strike. High grade American movements, guaranteed perfectly accurate; visible pendulum.

At 77.50 Golden Oak with genuine Westminster Chimes on nickel tubing every fifteen minutes; also hour strike, on nickel tubing. Leaded glass doors, showing tubing and pendulum; raised metal figures on oak face; fancy hands, square colonial case, about six feet high.

Den Clocks in Grandfather Style

THE ONE ILLUSTRATED \$31.75

A UNIQUE NOVELTY—One of the most novel clocks we ever showed is this Cellarette Den Clock. It's arranged with large complete cellarette in base, with heavy wooden latch, and at the top from a gable point hangs a large antique bent iron lantern with Dutch glass, complete with lamp inside. A fringe of green glass beads completes the old Dutch effect. The clock has quaint old-fashioned hands, exposed pendulum, hour and half hour strike, and brass numerals, fine 8-day American movement—a perfect timekeeper. To form any idea of the novelty of the clock, you must see it. It's a sample, and the only one we have of its kind. **31.75**

Price only **18.00**

DEN CLOCK AT \$18.00—'Twould make a most serviceable and acceptable gift for a man. Open slat design, solid weathered oak, about 5 ft. high—has standard gong, half-hour and hour strike, 8-day American movement; has centre shelf suitable for bric-a-brac, pipes, books, etc.; square oak dial with elaborate brass hands and numerals, perfect, accurate—we'll guarantee it. Price only **18.00**

THIS CLOCK \$185.

THIS CLOCK \$31.75.

Every Man and Woman Needs to Know the Time

THE "EATON" OUR OWN WATCH; Read About It

WHY WE GOT IT For years we've been on the lookout for a watch that we could guarantee to be perfectly accurate, and high-grade, yet be within the reach of everyone in price. Away off in Switzerland we found a man who had proved a reliable, experienced and skilful maker of high-grade watches; he almost suited us, yet

WE WEREN'T SATISFIED.

HOW WE GOT IT Certain points in his watch were not up to the EATON Standard; so, after securing the services of several experienced watchmakers, we added improvements; then, with the assistance of our old maker, who brought all his skill and experience to our aid, we produced a watch with which we are

SO THOROUGHLY SATISFIED that we've given it our own name, and when we put our name on a watch,—with our strongest guarantee back of it,—you can be sure we're well satisfied, before we send it out, that it's going to be all we

The 'EATON'

TELLS IT
CORRECTLY.

promise—perfect in workmanship, first-class in material and the highest in watch value.

THIS IS IT The better grades of the "Eaton" have been through an actual test at Kew Observatory, England; the 17-jewel, in a test lasting six weeks, received the highest award ever given any watch of that grade. The remarkable feature of the "EATON," and one we want to keep

before you, is the Extra Big Value—the wonderful quality and grade of the movement for the price. For instance, we're selling the "EATON" 15-jewel for less than you pay usually for a 7-jewel of the same size.

In three sizes, popular 0 for women, and either 12 or 16 for men; all have the latest improvements, and are made in 15, 17 and 21-jewels.

SEE THE 17-JEWEL MOVEMENT AT \$8.50.

MEN'S 12 or 16 size, perfectly adjusted and tested in five positions; has breguet hair-spring, exposed winding, patent regulator, double sunk enamel dial and 24-hour system of numbering. Below are cases to go with this movement, or, if you have a good case of your own, we'll fit it.

Nickel, open face, 16 size \$ 0 50
Sterling Silver, open face, 12 or 15 size, 925-1000 fns 2 25
Gold Filled, guaranteed 20 years, 12 or 16 size 4 50
Gold Filled, guaranteed 25 years, 12 or 16 size 6 50
Solid Gold, 14k, 16 size 35 00
Solid Gold, 14k, 12 size 30 00

Other prices for men's 16 size, to fit any of above cases:
15-Jewel Adjusted Nickel Movement \$ 4 50
21-Jewel Adjusted Nickel Movement 16 50

PROVINCIAL MINING INDUSTRIES.

At the present moment Canada is creating an unusual degree of interest in the old country. This not only from the pending federal election, but along many lines opened up by the numerous reports of mining, farming and other experts and visitors with more general objects who have during the past season been touring through the length and breadth of the Dominion.

All these descriptive accounts and the regular articles appearing in the principal newspapers explanatory of Canadian affairs and movements lead point to Lord Northcliffe's remark that Canada is better known to the people of Great Britain than Great Britain is to Canadians.

There are of course other reasons for this since a country in the making is more easily comprehended than are the complex questions that emerge in an old, densely populated and compact community, where the modern democratic spirit still has to contend with inherited influences and prejudices.

On their return to England several of the gentlemen who visited Canada for the purpose of inspecting its chief mining industries as the guest of the Canadian Mining Institute, spoke of the impression they had received. They noted in particular the enormous mineral deposits in the north and northwest of Ontario, and in British Columbia.

"It is obvious," one of the visitors is reported to have remarked, "that Canada is extremely rich in minerals and large development is to be anticipated. For that development, it is often declared, more capital is wanted. The emphasis should be put rather on the need of men. If the right men are put at the head of the industry—men of sense as well as of science—such as we have actually seen at work on some of the best propositions—the capital will soon be forthcoming."

This opinion exactly agrees with that of visitors to Canada specially associated with British financial circles. The demand always is that the men who control industrial concerns give the British public a "straight" deal.

The people of Ontario are intensely interested in the wise and prudent administration of the vast provincial resources, both of the forest and the mine. They do not want any more of the policy that has allowed valuable ore deposits to pass into alien hands, and to become merely the feeder of foreign industries.

The resources of Ontario should be used to build up our own provincial industries, and that on terms which will give them a clear competitive advantage over other producing countries that have failed to protect the public interest. On every side that over-capitalization is the bane of industry.

Over-capitalization in the case of the Rand gold mines led directly to all the labor and political troubles out of which came the South African war, and the later importation of Chinese contract labor. To pay dividends the cost of labor must be cut down to the lowest point. Ontario does not want more of this kind of thing or to see profits that should go to the genuine operator, the worker and the province anticipated by company promoters and speculators.

IN THE LAW COURTS

HIGH COURT.

Announcements. Osgoode Hall, Oct. 24, 1908. Single court—Only motions of a strictly urgent character will be heard on Monday. All other motions will stand enlarged till Wednesday.

Divisional Court. For plaintiffs' motion on Monday, 26th inst. Peremptory list for Tuesday: 1 Rex v. Calcutt E. & M. Co.; 2 Walker v. Wabash; 3 Falvey v. Falvey; 4 Boland v. Falvey; 4 Grip v. Thompson; 5 Vickers-Shear v. Turville; 6 Elliott v. St. Catharines.

Monday, Oct. 26, having been fixed as the polling day for the general election, the sittings for that day at Brantford, L'Orignal, Chatham, have been adjourned till the 27th inst.

Masters' Chambers.

Before Cartwright, master: Sovereign Bank v. Wilson Publishing Co. W. J. Britton, plaintiffs, moved for adjournment. Grayson Smith for defendants. Reserved.

McPherson v. Hassett—Trelvean (Kappel) for plaintiff, moved for order limiting time for appearance to 10 days. Order made.

Leadley v. Allen—Trelvean (K. & K.) for plaintiff, moved for an order discharging the attaching order issued on Sept. 18. Order made.

Jones v. Hewitt—R. H. Parmenter for plaintiff, moved for order for issue of a concurrent writ for service out of the jurisdiction. Order granted.

Re W. A. H. Oronhyateka—A. T. Hunter moved for an order allowing service out of the jurisdiction of an originating notice. Order as asked.

Divisional Court.

Before the chancellor, Magee J., Latchford J.: Leigh Cobalt Silver Mines v. Heckler—Judgment (G.). We all agree that the amount of the attaching order is correct. The notes given by Shiner to the order of Heckler with the signatures of Kicklein and Blake on the back underneath the words "We guarantee payment of the within notes" are valid securities. These notes are precisely what was called for in the terms of the settlement. If their enforcement is refused, it is a breach of a guarantee there is sufficient evidence of corroboration in the giving of time to bind them as guarantors; but having no longer been taken to represent the case of Slinger v. Elliott, T. S. O. R. 48, the fair conclusion is that Locke v. Reid is no longer law.

An appeal by the defendants from the order of the mining commissioner dated Sept. 2, 1908, J. M. Clark, K. C., for appellants. Grayson Smith for the respondents.

The following writs have been issued at Osgoode Hall: Kate Smith v. Smith for \$284, claimed to be due under an agreement.

Chancellor Boyd has issued an order directing E. R. C. Clarkson, receiver, to retire from possession of the assets in dispute between W. W. H. Edler and Harry Statham. Application for writs to find up the partnership has been made.

W. J. Elliott, acting for the Turbine Steamship Company, moved before Judge Hodgins for an order directing the defendant to pay to the plaintiff the satisfaction of the company's claim for \$250 damages and \$241.50 costs. The Turbine Company's claim was for damages to the Turbine when the roller boat broke away.

Referee Kappel has issued an order acknowledging the claim of W. J. MacIntosh for salary and expenses to the amount of \$207.18, but dismissing his claim for damages for alleged wrongful discharge by the York County Loan & Savings Company.

An order for directions was asked for at Osgoode Hall Saturday in the case of L. H. Robertson against the City of Toronto for \$6000 for personal injuries sustained by falling from his bicycle, said to have been caused by defective pavement.

Default Judgments. The Sovereign Bank has signed default judgment against L. E. Wilson of Ft. Gribble, Mich., on notes for \$4,337.50. Another judgment has been signed against F. W. and Charles Thornley of North Kappel for \$1,098.07.

Actions Brought. A. McPherson of Longford Mills is suing M. F. Hassett of Cobalt to recover \$341.54 alleged to be owing for lumber.

THANK THE LORD FOR RAIN. OTTAWA, Oct. 25.—(Special).—Wellcome rain has fallen almost continuously since last night. For weeks the fields in the districts have been parched, wells and brooks run dry, and rivers dwindled to mere streams. Prayers of thankfulness were offered in all the churches to-day.

STRATFORD, Oct. 25.—(Special).—The opera house was crowded last evening for the concluding Conservative rally, and fully 200 remained standing through. The time was divided between G. T. Blackstock, K. C., and A. Kelly Evans of Toronto with a few concluding words from Col. MacLaren, the candidate. The addresses were exceptionally interesting, and Mr. Blackstock's was one of the very finest oratorical efforts ever heard here.

Mr. Kelly Evans gave very much the same speech as at Welland on Friday evening, but scored Premier Laurier on a local opportunity. At a Liberal rally on Friday evening one of the spellbinders in his peroration referred to Sir Wilfrid as one who loved his country, loved its rivers, its lakes and its streams. Kelly Evans said that all things were appraised with a money value and the measure of Sir Wilfrid's love for his country was well shown in the way in which the government had leased immense fishery waters at \$10 per annum.

Mr. Blackstock held the audience spellbound. He traced the history of the Conservative party in Canada, and declared that invariably the Conservative party was responsible for all the great measures which had brought the country to its present prosperity. He expressed in a striking manner the want of faith shown by the Laurier administration and how all promises had been broken. Sir Wilfrid was admitted for his "glad hand" and "sunny smile," but why should he not have these pleasing characteristics? Considering the ample treasury produced thru the policies of the Conservative party, and which he had in no case changed.

For some time after the meeting the streets in the vicinity of the theatre were thronged, with the meeting the topic of conversation. It is believed MacLaren will increase his majority.

At North Bay, Justice Britton sentenced Thomas Wright to seven years in prison for stabbing a comrade in

COBALT--Buoyant Demonstration Closes Week at Mining Markets--COBALT

All Interest Centres in Cobalts Week of Heavy Transactions

Confidence in the Camp Has Broadened and Shows Itself in the Demand for Securities.

World Office, Saturday Afternoon, Oct. 24. The interest in Cobalts, in Cobalt's future, in Cobalt's securities, in Cobalt speculation and in Cobalt investments is the sensation of the week. The interest is growing, is becoming more and more apparent and amongst the most optimistic and the most enthusiastic the outcome of it all is not yet in sight.

The furious and almost unprecedented activity in speculative circles which is limited almost to Cobalts is surprising. The consequence is logical. Nearly every other speculative interest on the market has suddenly waned and Cobalts have stepped to the front in a manner that two years ago was undreamed of.

The enthusiasm is of a genuine sort and in the midst of the many sincere advocates of solid transactions, wild "cat" schemes have been forced to the woods by the overwhelming influence of legitimate business.

The strength displayed by the market is marked and there appears a great lot in reserve—lying idle, so to speak, and a widening interest in Cobalts throughout the entire continent and in Europe.

It is impossible to say which Cobalts attract most attention. At one point people are interested in one mine and at another, point they are interested in another. For instance in New York, Cobalt Central has been given a reception that sounds good, in a place where such speculators are supposed to be peculiarly alert.

In England, Cobalts are making a "hit" to use an Americanism. R. G. Pyne of Woodstock, of the Cobalt, Union Mines, has returned from London, where he was successful in getting for his property a hearing that looks well for Cobalt in general.

Engineers are digesting reports from their own engineers and the result has been productive of increased buying. In Montreal the interest is widening and in Vancouver it is said Cobalts are creating sober and business-like attentions on the exchange.

In Toronto—the home of operations—the weekly feature has been the raising of the price in a phenomenal manner, almost 45 points, from the figures it started out with at the opening of the week.

The new vein, which has been located on this property is said to be of exceptional value, containing as it does the pure stuff in a fissure over three feet in width. The Gifford flotation, and the eager manner in which the shares have been reached for, would seem to indicate very forcibly the attitude of the people.

In the incredibly short time of three days the stock has been subscribed for, from points far and near. The low capitalization of \$100,000 and the excellent location of the mine should prove it to be one of the best investment properties in the camp.

Among the buyers of the stock were brokers in New York and other American cities. A feature of the buying that is considered particularly satisfying is the fact that a great many Cobalt people, who should be in a position to know "the whys and wherefores," were among the heaviest buyers.

Beaver has been active during the week and promises a similar liveliness for some time. Chambers-Perland, Nipissing, La Rose, Crown Reserve, Kerr Lake, Nipissing and Trethewey experienced a singularly active period during the week.

The Electrical Ore Finding Co., Limited is negotiating for the purchase of the mining rights on 40 square miles of territory.

PRESIDENT OF FOSTER

Issues a Statement of the Company's Present Condition. Under date of Oct. 23, the president of the Foster Company has issued the following statement:

To the Shareholders of the Foster-Cobalt Mining Company, Limited: The annual general meeting of the shareholders of the Foster-Cobalt Mining Company, Limited, will be held at the Conkey's Restaurant, West End Hotel, Toronto, on Wednesday, Nov. 4, at 2 p.m.

approved by examining engineers. The products of the mine have been marketed to the best possible advantage, and although the net result is not up to expectation, the whole phase of the situation may change at any time. Your property is situated in a district which is showing up marvellously well of late, and there is no reason to expect that we shall not some day participate in some of the excellent finds. Such a condition is a part of the fortunes of mining, and is not similar to other commercial undertakings, hence it remains speculative, and any attempt at prediction of forecast would be as futile as it would be misleading.

The company consists of some forty-three hundred shareholders, no one shareholder or body of shareholders holding any large blocks of shares. Your directors assumed their duties not as parties interested in stock speculations but as trustees for the shareholders, and as such have aimed faithfully to secure the very best results for the individual shareholder. While the shareholders have very generously voted an allowance for directors' services, you board has not drawn upon it for several months past. Four directors, if you desire their continuance year without remuneration, or until such time as the property is upon a paying basis, assuring a faithful and economical administration of the affairs of the company. A detailed report of the affairs of the company, a report by the engineers and a report of the annual meeting will be duly

mailed to all shareholders following the annual meeting. In their New Church. The congregation of the Westmoreland Methodist Church occupied the basement of their new church, corner of Hallam and Westmoreland-avenue, yesterday for the first time. At the morning service 55 new members were received. Rev. S. W. Falls, pastor of Woodgreen Methodist Church, preached to a large congregation in the afternoon and the pastor, Rev. I. G. Bowles, preached morning and evening.

Military Funeral. With full military honors, the remains of Staff-Sgt. Woodburn of the Stanley Barracks detachment of the Royal Canadian Regiment, were buried in Prospect Cemetery Saturday afternoon. The funeral took place from the deceased's late residence, 679 Palmerston-avenue. The 9th Battery provided the gun carriage. Rev. C. A. Seager conducted the service. Eighteen members of the R. C. R. under Sergeant Dixie, composed the firing party, which delivered the parting salute over the grave. In the cortege was a large representation from all the local units, as well as Sgt.-Major Borland, R. C. R. and Sgt.-Major Shergold, R. C. E., of Wolseley Barracks, London.

NO LIMIT TO DEPTH.

Prof. Hardinge Says Ore Values Have Been Tested to Fifty Feet. H. W. Hardinge, mining engineer of New York, was in the city the other day after an extended inspection of Cobalt properties. He has known Cobalt since the beginning, has represented the Cobalt Central Mining Company in its exploitation of the silver district.

Mr. Hardinge has just finished installing a specially devised concentrator in the Cobalt Central property and reports that it is a great success, saving time and labor and reducing the ore to the finest possible working shape.

Asked for his opinion as to the present and the future of Cobalt he said: "I have this to say. I have found silver at a depth of 500 feet just as good as that on the surface." This being interpreted means that there is practically no limit to the depth to which the silver ore in Cobalt goes.

No better authority than Mr. Hardinge is to be found in America. TO AUCTION PALMER STOCK.

Adjustment of the business affairs of the Palmer Co., which recently made an assignment, is reported completed. The report gives the liabilities of the firm at \$100,000 and assets \$110,000. Disposition of the property, it is said, will be made by public auction.

Fries Sand as Fertilizer. SPOKANE, Wash., Oct. 25.—Frank Rose, a rancher in Columbia County, south of Spokane, is experimenting with sand as a fertilizer for clay soil, and the result is being watched with interest by his neighbors. He has known sand for years, and he says it is the best fertilizer he has ever used.

Day's Doings in YORK COUNTY ANNEXATION INTEREST KEEN IN TORONTO

Rev. T. W. Powell Delivers Strong Address in Favor of Union With the City.

NORTH TORONTO, Oct. 25.—(Special.)—Never in the history of the Ratepayers' Association was there such a keen interest taken in a public meeting as was on Saturday evening, when the question of annexation was discussed from the standpoint of individual views. Some of the speakers took a broad and liberal view of the situation, while others narrowed their remarks down to individual interest and launched out with personalities.

The gem of the evening's speeches was that delivered by Rev. T. W. Powell, after President W. G. Ellis opened the proceedings with an explanation of the purpose of the meeting, showing that the plebiscite vote of a year ago is responsible for greater activities shown in the annexation movement.

Rev. T. W. Powell's belief was that some people may be benefited while others may not be benefited, but it should be the burden of duty to look after the interest of the poorer class of people as well as after the well-to-do class and admonished the ratepayers should discuss this question from all standpoints and know what their are about to do.

Some time ago the school board passed a resolution that every teacher of the town should be paid within the limits of the town from whence they receive their salary. If this resolution were carried to a logical conclusion, then all the men and women who earn their living in the city, should live in the city. Most of the town people are their living in Toronto and if they and those who sell their farm and garden produce in the city had to become citizens of Toronto, per force North Toronto would be wiped out of existence.

Let us open up the whole district," the speaker pleaded, "so that the laboring man receives the same comfort as his richer brother. There would be a great possibility to benefit the poor man by this annexation. Park lands could be purchased while yet the land is cheap. The city would become a rich man by this annexation. What are the people getting in this town for their taxes? What has the town done for anybody outside of Yonge-street? Who compels the people to walk one and one-quarter of a mile to a street car on Yonge-street instead of opening up parallel roads and the Avenue-road car line extended up west of Yonge-street and the Sherbourne-street car line east of Yonge-street? Where are the intersecting roads for the convenience of vehicles? Ask the delivery men and they will tell you what they think about it.

Consider the school accommodation, and why should not be permitted to take an interest in the educational affairs of the town? The school accommodation is miserable. The teachers don't get an adequate salary. Meriton street needs a school independent of the Davison-avenue school. Bedford Park needs a school. A high school is a blessing to any community, but can the town afford to give us these blessings and comforts? The City of Toronto will give it to us if we are part of the city and every son and every daughter of North Toronto is entitled to all the education they can get and if both municipalities become one we will get these blessings.

West Toronto North Toronto East Toronto

can show better assets for their debt than North Toronto.

The reverend gentleman having exceeded his promised time limit about three times, therefore was anxious to retire. Messrs. D. D. Reid and H. H. Ball moved a hearty vote of thanks to the speaker of the evening, which was carried unanimously.

Urged to Slow. Councillor Parke urged to be slow in being annexed and become a part of an enormous civic debt amounting to about \$21,000,000. That the council were slow in their action to make overtures to the city can be accounted for and the secretary of the Ratepayers' Association is to be blamed. "Yes," said Councillor Irwin, "it was he that swiped the speech address, which was prepared for the mayor to read at the board of control and published it in the Toronto World before his worship had a chance to deliver it."

And this caused delay," said Councillor Brown "for the council had to prepare another plan. The council was slow, I admit, but if the council had done what the Ratepayers' Association demanded of them, the town's civic debt would be enormous. The Ratepayers' Association is composed of land speculators and I warn you workmenmen to vote against annexation," said Socialist Strout, "we do not want to look at brick walls but to have our homes a park-like appearance with large tracts of vacant land with trees."

It would cost at least \$400 to submit this by-law to the electors," said Mr. Ferguson to the speaker, "and I do not see any reason for such an expenditure." Petition Well Signed. The petition in circulation for annexation contains more than the required 150 names and will be presented to the council at the first meeting they are holding, asking the council to submit a by-law to the electors to say if they desire annexation or not at the polls.

F. J. Allward, European traveler and manager of the whitewear factory of the T. Eaton Co., is starting to excavate and to erect a \$9000 dwelling on the corner of the corner stone of the Masonic Hall on Yonge-street near Eglinton. The work was performed according to the Masonic ritual on Tuesday at 2 p.m.

All young men in town interested in starting a reading room are invited to St. Clement's school room on Monday evening for organization purposes. The report current in North Toronto and published in The World of the death of Joseph Jones in St. Michael's Hospital is without foundation. While Mr. Jones' injuries were serious, he is making satisfactory progress.

THE TORONTO WORLD

whose untiring energy the undertaking has been completed. Dr. Rankin proceeded to review some of the great factors that have contributed to the progress of the Dominion. Dr. Rankin referred to the potency of the printing press in the education of the people, stating that the press has supplemented the teachings of the public schools. There are 22 cars of stock in the Union Stock Yards for to-morrow's market. The scanty run of cars this week is due to the elections to-morrow, the stock yards officials say.

Citizens of West Toronto and the surrounding suburbs will not need to go to Toronto to receive the electric returns. The World will have a stereoscopic lantern installed on the Elite Theatre on Dundas-street, and the returns will be thrown on a sheet hung on Chisholm's storefront across the street. The results from the various ridings will be flashed on the canvas immediately they are received on the G.N.W. special wire. Incidents of the campaign, humorous and otherwise, will be depicted during the intervals between returns.

IN THE WOODS. Conservatives Are Optimistic in Both Centre and North. The outlook in Centre York is said to be most encouraging to Capt. Wallace, and the friends of the Conservative party. Wallace has practically covered every foot of the ground in the riding, and the vote to-day will likely be one of the heaviest so far pooled in the riding. Woodbridge has the unique distinction of being the home of both candidates, and arrangements are perfected by both the parties for receiving the votes on Saturday night. In North York the rival candidates held their rallies on Saturday night, the Liberal rally in Newmarket where the town hall was filled, and the Conservatives at Scarborough where Mr. Armstrong had a rousing reception in his own home town.

The fight in North York, while lacking some of the spectacular features of other contests, has been carried on with the most intense earnestness. While Hon. Mr. Aylesworth, under a severe handicap has spoken at several points, and conducted a personal canvass, his energetic rival has made a wonderful campaign and proved himself to be a speaker of services of the highest order with good judgment. Little known in the outset, his native Township of Woodbridge has become a hot spot. The fight will be a keen one, but good judges of the situation express the opinion that Mr. Armstrong will win by a small margin.

WOODBRIDGE. WOODBRIDGE, Oct. 25.—John E. Elliott has returned home from a trip to the Northwest. Mr. Elliott is able to be around again after being laid up for three months. The Canadian Wire Screw Co. are installing a large gas producer engine in their factory here. It is the first of its kind in the city. Mr. E. B. Smith, our genial grain merchant, was in town last week attending grand jury.

CANADIAN COLONIZATION Emerson Hough's Original Solution on "The Sowing." "Four-fifths of England live in towns; one-fifth in the country. That is the way England deliberately plots her own ultimate overthrow. It is her own armies that march against her." What a tremendous pronouncement this last sentence is—"It is her own armies that march against her." (England!) How freighted it is with an awful warning! With what appalling truth does it strike the imagination of Canadians, who know that only a Merry England and as a land wherein must dwell peace and plenty.

The passage quoted is from a striking and original story by Emerson Hough, dealing with the problem of Canadian immigration, or looking at what England is doing to her over-crowded and poverty-stricken population, if Canada is not willing to accept the most intense interest in the minds of Canadians from coast to coast. What asks Mr. Hough, shall England die with her towns dwellers who rot and die, the hopeless poor, the submerged stratum which never can be saved? It were only a fool who would say that. The remedy is not in promiscuous colonization; yet only a worse fool who dare say that it can be any other else than in INTELLIGENT colonization.

THE ROBERT SIMPSON COMPANY, LIMITED Monday, Oct. 26. H. H. FUDGER, Pres.; J. WOOD, Man.

"Probs" Advises Raincoats Tuesday \$12.00 to \$16.00 Ones for \$8.95

You may look for wet weather now, and plenty of it. The long dry spell is sure to be balanced up with a run of rainy days and damp misty nights. The plain inference is—get a raincoat. We are showing plenty of them—chosen from the best made.

Your Vote and Influence Respectfully Requested for J. M. ARMSTRONG CONSERVATIVE CANDIDATE IN NORTH YORK Election Monday, October 26.

of the colonies; because the prairie demands strength and not weakness as a premise for success. On the face of it, this may be an unwelcome doctrine to crowded England, who looks to unpeopled Canada for salvation wholesale. But how about Canada? And how about the colonies? If that is not a splendidly sane and virile piece of writing, far-sighted and unmistakable in meaning—then any writing on the subject might as well not be done. Hough hits the nail square on the head: England must first colonize her own people, strong, free and independent; then Canada will take them and put the finishing touches on them and give them a home where they will grow up pure, strong, free and become, each and all, well off in this world's goods. But alas! Canada's pride in her relation to England as a daughter has led her to conceive it her duty to take the off-spring of England just as they are. Mr. Hough submits that this is ridiculous. The question is not Canada's duty to England, but England's duty to Canada, and that duty is, as Mr. Hough puts it, to send out no emigrants until they are first prepared on the English farms for a better life on the Canadian prairies. Whatever be the opinions formed about Mr. Hough's philosophy of Canadian colonization, there can be no doubt that his articles appearing in "The Sowing" are well-reasoned, trenchant, readable and human. Thoughtful Canadians will miss much that is worth

DON'T NEGLECT Your Eyes. A little trouble, if not taken care of in time, may become a great calamity. We can show you how to take the proper care of your eyes and can fit you with GLASSES to suit your particular requirements. F. E. LUKE, REFRACTING OPTICIAN ISSUER OF MARRIAGE LICENSES, 355 1/2 Yonge Street and 11 King Street West

Notice is hereby given that a By-law (No. 245) was passed by the Council of the Corporation of the Township of York on the 19th day of October, A.D. 1908, providing for the issue of debentures to the amount of two thousand dollars (\$2000) for the purpose of enabling the Board of Public School Trustees of York to complete the improvements now under way on the school building in said section; and that said by-law was registered in the Registry Office of the County of York on the 24th day of October, A.D. 1908. Any motion to quash or set aside the same, or any part thereof, must be made within three months after the date of publication of this notice, and cannot be made thereafter. Dated and first published, this 25th day of October, 1908. W. A. CLARKE, Clerk of York Township.

while if they neglect these articles as they come out in "Canada West." 4:05 p.m. or 6:10 p.m. is the Time From Toronto to New York.
