Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

method:

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

JANUARY hath XXXI Days.

1813

The ancient Romans called this Month *January*, in allusion to the Image of *Jannus*, which had two faces, one of an old man and the other of a youth, looking in opposite directions—as the first day of this Month has a respect to both the Old and New Year.

New Moon 6th, at 12 minutes after 7 evening.
 First Quarter 14th, at 20 minutes after 2 morning.
 Full Moon 22d, at 2 minutes after 6 morning.
 Last Quarter 29th, at 18 minutes after 12 evening.

This Month's name is derived from *Aperiendo*, which signifies *opening*—because in it the buds on the trees begin to open, and the earth to vegetate.

New Moon 5th, 20 minutes after 11 morning.
 First Quarter 13th, 27 minutes after 3 afternoon.
 Full Moon 20th, 49 minutes after 7 evening.
 Last Quarter 27th, 40 minutes after 10 morning.

JUNE hath XXX Days.

1818.

Some suppose that this Month had its name from *Juno*, the heathen goddess, but it was generally believed to have been called in honour of Junius Brutus, who asserted the liberties of Rome against Tarquin the Proud, and was the first Pro-Consul.

New Moon 3d, 49 minutes after 6 evening.
 First Quarter 11th, 27 minutes after 6 evening.
 Full Moon 18th, 22 minutes after 6 morning.
 Last Quarter 25th, 22 minutes after 6 morning.

AUGUST hath XXXI Days.

1818

This Month was called *Sextilius*, or the sixth month, by the Romans, till they changed it to *August* in honour of Augustus Cæsar, who had changed his former name Octavius for that of Augustus, to signify the prosperity and happiness of his reign.

First Quarter 9th, 59 minutes after 9 morning.

Full Moon 16th, 41 minutes after 1 morning.

Last Quarter 23d, 48 minutes after 12 evening.

New Moon 31st, 4 minutes after 1 evening.

1818

SEPTEMBER hath XXX Days.

1818.

This Month yet retains its old name, from its occupying the seventh place in the Roman Calendar, though several attempts were made by the Roman Emperors to impose their own names upon it.

First Quarter 7th, 45 minutes after 3 evening.

Full Moon 14th, 50 minutes after 11 morning.

Last Quarter 22d, 32 minutes after 7 morning.

New Moon 30th, 24 minutes after 1 morning.

The Emperors Domitian and Commodus made several attempts to change the name of this Month in honour of themselves, but without success; and thus its old name still continues, signifying the Eighth Month from the entrance of the Sun into the Sign Aries, or beginning of his annual course.

First Quarter 6th, 41 minutes after 9 evening.

Full Moon 14th, 5 minutes after 1 morning.

Last Quarter 22d, 6 minutes after 3 morning.

New Moon 29th, 4 minutes after 1 morning.

MISCELLANEOUS SELECTIONS.

Suppose a Field
of the shape of
this figure to be-
long to 4 people,
who are desirous
of dividing it
amongst them, in
such a way that
each portion shall be of the same
shape as the original field. How is
this to be done?

Five hundred next must find a place,
Then a circle and four more.
Place these aright, and in the sequel,
You'll find a Town which has no
equal.

No. 4.

Let eight dots be placed at equal
distances from each other, as below,
and then, without taking off the pen
or retracing any part, enclose the
whole in a flourish or figure, which
shall resemble a double heart.

CHARADES.

First.

My first the guard of peasant's lonely
cot,
And of my next is happiness the lot;
My whole a harmless form remains,
Of iron laws and slavery's chains.

The following trifles are num-
bered, as we shall give their solutions
in our next:—

No. 1.

From six take nine, from nine take
ten; —
From forty take fifty, and SIX will
remain.

No. 2.

To one hundred and one, six and
fifty unite,
You'll find I am courteous, atten-
tive polite.

No. 3.

Before a circle fifty trace,
And after it set four;

Second.

My first oft forms (in evil hour)
 Fetters which galling prove too
 often ;
 My second, emblem of that pow'r,
 Which can alone their rigours
 lessen ;
 A native of the wood and grove my
 third,
 Where frequently its plaintive notes
 are heard.

Third.

My first is small and spherical,
 And ugly is my second ;
 My whole, in times more clerical,
 A holy faint was reckon'd.

GENELOGICAL PUZZLE.

There now resides in one house,
 the property of a respectable farmer,
 in the parish of Magherameck, coun-
 ty of Antrim, a family related to
 each other in the following manner,
 (the relationship is not traced to any
 person out of the house,) viz.—A
 grand niece—two grand aunts—
 a grandmother—a sister-in-law—a
 a grandson-in-law—three fathers—
 a great grand uncle—a brother-in-
 law—an uncle—two husbands—two
 grandsons—a great grandfather—a
 great grandfather-in-law—two mo-
 thers—a grandmother-in-law—one
 aunt—a daughter—a great grand ne-
 phew—a great grand mother-in-law
 —two nephews—two father-in-laws
 —a grand uncle—a great grandson
 —two sons—a great grand aunt—
 two wives—two grandfathers—a
 great grandmother—a grandfather-
 in-law—a grand daughter—and two
 grand nephews—and the Family con-
 sists of but Seven Persons !!

A PUZZLE.

A lady had occasion to send a
 Diamond Cross to a Jeweller to be
 repaired. To provide against any
 imposition, she had the precaution
 to count the number of Diamonds,

a which she did in the
 o following manner :—
 o She found the Cross
 c o d contained in length
 o o o o o o from A to B, 9 Dia-
 o monds. Reckoning
 o from B to C, or from
 o B to D, she counted
 o a 60 9.—When the
 o Cross was returned,
 b counting them in the

same way, she found the number pre-
 cisely the same ; notwithstanding
 which two Diamonds had been pur-
 loined. How was this managed ?

FEELING AND NO FEELING.

Whilst our troops were in Lisbon,
 an officer went into the shop of a
 barber, to have his hair cut ; at the
 same instant a mendicant friar en-
 tered with the usual request, " to be
 shaved for the love of God." Ten-
 sor, though he at all times preferred
 a penny to a paternoster, durst not
 refuse, and immediately began to
 perform the operation by lathering
 the abundant bristles on the chin of
 the holy father with cold water and
 a little soap, and then to reap the
 stubborn crop with a notched and
 rusty razor. The torture the poor
 priest endured was strongly depicted
 in his countenance, but still the un-
 feeling strap moved on. At this in-
 stant a violent screaming was heard,
 which arose from an unfortunate kirt-
 ten having been seized and almost
 torn to death by a large dog—" What
 is that infernal yell ?" exclaimed the
 astonished shaver ; " Nothing, son,"
 replied the feeling friar, " but some
 poor cat shaving for the love of God ;
 pray put the suffering animal out of
 misery and then finish me !" This
 mild rebuke produced the desired ef-
 fect—the patient priest was shaved
 to his satisfaction, and the repentant
 barber dropped a tear as he received
 a blessing.

ARITHMETICAL QUESTION.

*A Mill there was, in ancient times,
That caused the wonder of mankind;
The Mill Stone made of virgin gold,
Was bright and beautiful to behold.
The radius of the same, I am told,
Was just three feet, nor less, nor more,
The Mill Stone's thickness, was twelve
inches,
Diameter of the eye, likewise twelve
inches.*

*The question is what was the weight
Of this same Mill-Stone, fair and bright
And what the value in sterling guineas,
If coined, with the standard alloy?*

EQUATION OF TIME.

—o—

It is only a few days in the year that a regular clock or watch agrees with the Sun in shewing true time.

Clocks and watches are constructed so as to divide time equal;— whereas the Sun, by reason of the obliquity of the ecliptic and her unequal motion in different parts there- of divides time unequal—hence the difference called Equation of Time. The following Table will show how many minutes should be added to, or subtracted from any hour shewn by a Sun-Dial, in order to regulate a watch to mean time.

Examples.

Required to regulate a Watch to mean or equal time, on 21st Feb.

Look for Feb. 21, and opposite to it you will find 14 minutes to be added to Solar in order to find the mean time, therefore when the Dial shows any hour, set your watch 14 minutes faster.

Required to regulate a Watch on the 3d October, to equal time?

Look for October 3, and opposite to it, you will find 11 minutes to be subtracted from Solar in order to find mean time; therefore set your Watch 11 minutes slower than any hour shewn you by the Dial.

A TABLE

Of the Equation of Time, calcula- ted to the nearest minute for eve- ry day in the year.

Signals made at Partridge Island, and repeated at Fort Howe, when Vessels are coming into the Harbour.

- One ball close for one square rigged vessel,
- One ball half hoisted for two do.
- Two balls close, for three do.
- Two balls separated for four do.
- A pendant of any colour, for five do.
- A do. under a ball, for six do.
- A do. over a ball half hoisted, for seven do.
- A do. under two balls close, for eight do.
- A do. between two balls separated, for nine do.
- A flag of any colour, for ten or more do.

[*The above are hoisted at the east or west yard arm, according to the quarter the vessel first appears in, with the addition of a ball at the centre of the yard until the vessels can be seen, when one or more of the following descriptive colours will be hoisted at the mast head.*]

- An Union for a Flag Ship, with or without a Squadron,
- Do. with a Red Pendant over it, for a Two-decker,
- Do. with a Blue Pendant over it, for a Frigate,
- Do. with a white do. over it, for a small-armed Vessel,
- A red Flag pierced white for a Packet,
- A blue Pendant for a Merchant ship,
- A red Pendant for a Merchant brig,
- A white Pendant for a topsail schooner or sloop,
- A blue and white flag horizontally divided, a Neutral fleet,
- White and blue Pendant, Neutral Man of War,
- Blue flag, Neutral merchant ship,
- A red, white and blue flag, an Enemy's fleet,
- A red, white and blue pendant, an Enemy's Man of War,
- A red flag, an Enemy's merchantman,
- An Union Jack over neutral or enemy's signals, the vessel is detained, or a prize,
- A white flag over any signal, vessel bears a Flag of Truce,
- A ball at the mast head—vessel is on shore or in distress: should immediate aid be necessary, guns to be fired.

Time of going through the Falls.

THE Falls are level (or still water) about three hours and an half on the Flood, and about two hours and an half on the Ebb, which makes it passable four times in 24 hours, about 10 or 15 minutes each time.—No other rule can be given as much depends on the floods in the River St. John, and the time of high water or full sea, which is often hastened by winds, and in the proportion to the height of them.
