Beauty

Vigor. No matter what the color of the hair, this prepa ration gives it a lus-tre and pliancy that adds greatly to its charm. Should the dry, or turning gray, Ayer's Hair Vigor will restore the color, bring out a new growth, and render the old soft and shiny. For

keeping the scalp clean, cool, and healthy, there is no better preparation in the market. "I am free to confess that a trial of Ayer's Hair Vigor has convinced me that it is a genuine article. Its use has not only caused the hair of my wife and daughter to be

Abundant and Glossy, but it has given my rather stunted mustache a respectable length and appearance."—R. Britton, Oakland, Ohio. "My hair was coming out (without any assistance from my wife, either). I tried Ayer's Hair Vigor, using only one bottle, and I now have as fine a head of hair as any one could wish for."—R. T. Schmittou, Dickson, Tenn.

"I have used Ayer's Hair Vigor in my family for a number of years, and regard it as the best hair preparation I know of. It keeps the scalp clean, the hair soft and lively, and preserves the original color. My wife has used it for a long time with most satisfactory results."—Benjamin M. Johnson, M. D., Thomas Hill, Mo. "My hair was becoming harsh and dry, but after using half a bottle of Ayer's Hair Vigor it grew black and glossy. I cannot express the joy and gratitude I feel."—Mabel C. Hardy, Delavan, Ill.

Now after a lapse of five their winter provisions. The crops are years, Calgary has grown into a city, and really not worth harvesting. the local papers claim that its principal business establishments, bank buildings and hotels, illuminated with the electric light and connected by telephone, would be a credit to Montreal or Toronto. In view of these facts, North-West development certainly means something more than a mere myth. The Calgarians are of course very proud of their city's progress, and claim that while Alberta is the sirloin of Canada, Calgary is the tender-loin of Alberta. The mining and ranching interests of this favoured district are making gigantic strides, and the crops were never so prolific as they are this season, nor the weather so favorable for harvesting them.
