THE GOVERNMENT WINS TRIUMPHANT

Almost a Clean Sweep--All Opposition Leaders Go Under--But Two Liberals Elected.

The Fleming government has been returned with supporters from every constituency save Madawaska, which sent two Liberals, Gloucester, where the election is deferred until Monday, and Northumberland which elected two opponents.

In Carleton county the Premier's majority was more than twice what his supporters had hoped for. The full government ticket was elected in Carleton as it was in every county except Madawaska and Northumberland, where two Opposition Conservatives were elected.

The Opposition was snowed under yesterday. The snow will disappear—it always does—and what has been concealed will spring up more vigorous.

The province is in the iron grasp of a grading monopoly. The great corporation did not mean that the government should lose. We are sold out.

Brighton S. S. Convention.

The annual convention of the Parish of Brighton Sunday School Association was held in the Methodist church at Hartland on Tuesday.

The afternoon session was opened by Rev. H. S. Dow leading devotional exercises, reading 2 Tim. 2. He gave an address on the duties of Sunday school superintendents. After singing, the minutes of the last annual meeting and the meeting held last March at Windsor were read.

Mrs. S. S. Miller reported the United Baptist school in place of W. D. Keith the appointed delegate, who was absent. Mrs. H. N. Boyer reported the Reformed Baptist school at Hartland, and Rev. A. Tedford reported the Rockland school. Mr. Noble reported the Lower Brighton, and T. H. Forest the Windsor schools. Mrs. J. K. Flemming gave a detailed report of all the schools in the parish. Rev. A. Tedford gave a very interesting paper and a talk on "The Boys."

At the evening session Rev. H. T. Smith led the devotional exercises. Mrs. Miller sang a solo. Rev. J. C. Cory gave a very interesting talk to parents. After music by the combined choirs of many friends, for their kindness the village churches, Rev. H. S. and sympathy during the sickness and death of our son, temperance and the cigarette and

tobacco habits. Rev. E. C. Jenkins also delivered a masterly address.

The convention was very instructive and interesting, probably more so than any convention in recent years. The success which marked the sessions was almost wholly due to the untiring work of the parish secretary, Mrs. J. K. Flemming.

Methodist Conference.

The annual meeting of the N. B. and P. E. I. Methodist conference was held in Fredericton last week, when the clergymen from the Woodstock district were appointed as follows:

Woodstock, R. W. Weddall; Canterbury, To be supplied; Jacksonville, George Ayers; Hartland, Percy A. Fitzpatrick; Richmond, Alfred J. Gould; Centreville, Henry Penna; Florenceville, E. C. Turner; Lindsay, Geo. T. Wetherall; Andover, A. C. Bell; Tobique, Arthur Whiteside.

Card of Thanks.

We through the columns of your paper, wish to thank our many friends, for their kindness and sympathy during the sickness and death of our son, Mr. and Mrs. J. C. Hunter.

SPECIAL June Sale!

For the Summer Season we have Stocked up with an adorable line of

Lawn Blouses, Skirts, House Dresses, Children's Dresses, White Wear

and are offering a very high class of goods at prices that will suit every customer. We offer something

Very Special: Black Silk Underskirts for \$3.50

Baby Clothes, Cloaks, Coats, Slips, etc

THE UNARMED BATTLESHIP

STEEL PLATING OF NO USE AGAINST NEW GUNS.

Orion's Batteries Can Pierce 12-Inch Armor at 12,000 Yards.

The possibilities of a return to the day of the unarmored battleship is canvassed by Mr. Charles Gaunt in a letter to the London Times. He says:

"At first sight this is an apparently ridiculous matter, and you turn from it instinctively as from the queries of a madman. Yet let us stop and consider the theory now quite often put forward: That the armor plating on our battleships is unnecessary and even dangerous.

While it is startling in its revolutionary nature, the idea is not without a certain soundness. It is based upon the superiority of the gun over the armor plate. From the time of the epoch-making armored French batteries engaged at Kinburn down to the present day a bitter duel has been fought between the gun and the armor plate. Sometimes the armor plate has won, but always the gun has regained the mastery; and this mastery over the armor plate obtains to-day, with the additional factor that for its given weight something like finality has been reached in armor plate resistance. And the big guns of to-day shoot through this finality with ease.

POWERFUL GUNS.

To-day the 12-inch weapon at ranges under 3,000 yards is credited with a penetrative power to pierce all armor carried by battleships afloat at the present time; while at 3,000 yards the 850-pound projectile pierces no less than 17 inches of Krupp steel. But it is rather to the future we should look. The new 13.5-inch weapon mounted on the battleships of the Orion class and cruisers of the Lion class throws a 1,250-pound shell which pierces 12 inches of Krupp steel at 12,000 yards! To go further, the new German 14-inch gun is credited with a penetration of 49 inches of steel at the muzzle. This gun is of 50 calibre and weighs 93 tons. But this is not all. Rumor credits the appearance of a 16-inch gun in the near future. So much for the indictment of the armor plate.

To-day the heaviest armor carried by super-Dreadnoughts is in England 12 inches, the United States and France the same, while 11 inches only obtains in Germany. Of course it must be admitted that the armor will keep out the shells of the secondary armament, which, by the way, is largely of an anti-torpedo boat nature. But nowadays battles are not fought with secondary armaments. In the past, for instance, when the Americans smashed the Spanish fleet, the secondary armament did the execution, and on examination of the wrecks of the Spanish vessels after the principal engagement scarcely a trace could be found of the work of the biggest guns of the American warship, the whole destruction being done by the

6-INCH AND 8-INCH WEAPONS.

Truth to tell, shooting with the 12-inch gun was very much in its infancy in those days. But all that is changed to-day. Now one or more hit per minute per 12-inch or 13-inch gun is confidently looked for in the British navy—where three hits in a minute have been attained—and with ten of these guns firing a 1,250-pound shell, and each scoring one hit a minute, it is inconceivable that any armor could keep out for long the concentrated fire of nearly six tons of metal crashing home every minute. Therefore it hardly seems worth while to burden our ships with armor to keep out the fire of the anti-torpedo armament when five minutes' accurate fire of the bigger weapons would reduce the finest battleship afloat to a scrap heap.

Such is the belief, right or wrong, of the anti-armor theorists.

Accepting this very revolutionary theory for the moment, the question arises: What advantage will an unarmored ship have over an armored one to more than balance the undoubted, if only partial, protection of armor? The answer is—greater speed and heavier guns and more of them, the conviction of the anti-armor theorists being that the weight of the armor could be better utilized. The weight of a battleship's armor is certainly not less than 5,000 tons. That transmuted into the propelling and gun power would produce a "capital" ship as revolutionary and epoch-making as that bolt from the blue.

THE DREADNOUGHT.

Imagine a super-super-Dreadnought with a speed of 40 knots and armed with 20 16-inch guns firing projectiles weighing about a ton apiece. Such a ship could destroy a squadron of present-day battleships by reason of the terrible smashing power of its guns and its ability to choose its range and cut-steam and manoeuvre its

opponents. The imagination reels at the conception of the power of its gunfire.

Whether the "no armor" theory will ever obtain acceptance cannot be decided now. It possesses a prima facie and plausible case, well worthy of examination and discussion. Certainly many naval men wear by speed as a protective medium, and no one quite knows what miracles of propulsion the internal combustion engine may possess. That it will revolutionize present-day propelling practice seems certain. The next decade will show us exactly what the motor engine is capable of. But there is little doubt of its success. Whether the unarmored battleship will be contemporary with it remains to be seen. Rumor declares that the British Admiralty is not unacquainted with the theory; and after all it must not be forgotten that destroyers are meant for attacking battleships, and rely upon their speed for protection. Therefore let us keep an open and unbiased mind regarding the theory of unarmored battleships.

ELECTRIC NIAGARAS.

French Scheme for Draining the Clouds of Electricity.

Assuming that electricity in the clouds is the sole cause of the production of hail, experiments are being made in France with apparatus designated as "electric Niagaras" to "drain" the clouds of electricity. In installing the apparatus huge copper points, bound together by bands of the same metal, are placed on the summit of a high tower or chimney, very much in the same way as lightning rods.

These are connected with a copper band, which leads to the ground and ends in a reservoir filled with water. By this route, says Popular Mechanics, the atmospheric electricity flows down into the earth. The first sudden charge is replaced by a permanent one, which empties the clouds, so to speak.

The experiments with "electric Niagaras" have been carried on for some time, but M. Violle, a member of the French Academy of Sciences delegated to judge the results, reports that it is still too early to estimate the practical value. A test on a far larger scale was recently necessary, and quite recently the installation of an apparatus of exceptional capacity was completed on the Eiffel Tower.

Almost at the summit of the tower has been placed a group of points that resemble a huge garden rake. They are bound together with bands of pure copper, and a heavy copper band leads to a tank of water in the ground. During the coming summer this apparatus, it is hoped, will prove the practicability of the idea, but three or four years will probably be required before it is possible to place an exact estimate on the true value of the system.

KNOWS NOW.

Doctor Was Fooled by His Own Case For a Time.

It's easy to understand how ordinary people get fooled by coffee when doctors themselves sometimes forget the facts.

A physician speaks of his own experience: "I had used coffee for years and really did not exactly believe it was injuring me, although I had palpitation of the heart every day. (Tea contains caffeine—the same drug found in coffee—and is just as harmful as coffee.)

"Finally one day a severe and almost fatal attack of heart trouble frightened me and I gave up both tea and coffee, using Postum instead and since that time I have had absolutely no heart palpitation except on one or two occasions, when I tried a small quantity of coffee which caused a severe irritation and proved to me I must let it alone.

"When we began using Postum it seemed weak—that was because we did not make it according to directions—but now we put a little bit of butter in the pot when boiling and allow the Postum to boil full 15 minutes, which gives it the proper rich flavor and the deep brown color.

"I have advised a great many of my friends and patients to leave off coffee and drink Postum, in fact I daily give this advice." Name given by Canadian Postum Co., Windsor, Ont.

Many thousands of physicians use Postum in place of tea and coffee in their own homes and prescribe it to patients.

"There's a reason," and it is explained in the little book, "The Road to Wellville" in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

One cannot resist temptation with mere stubbornness.

Many of the Shire horses which are shown at the annual Shire Horse Show, London, weigh over a ton.

NEW MUSEUM IN LONDON

A REMARKABLE SHOW OF ROYAL DRESSES.

One Little Plaid Frock Worn By Queen Victoria When a Child.

Something new in the museum line has just been presented to London inspection. A collection of relics of the great city's past was recently opened there and the interest it has is decidedly keener and more living than most museums can boast.

This is due to the fact that the exhibits come right down to date and include such recent relics as personal belongings of Queen Victoria, King Edward, Queen Alexandra and the present King and Queen. These collections are of especial interest to women. Most of the dresses have been lent by Queen Alexandra.

Apart from the association many of them have with great public events these beautiful gowns give a review of the fashions of almost a century. It is wonderful how fresh and bright the fabrics have remained. This is true even of the court dresses worn by the Duchess of Kent, mother of Queen Victoria, or that plaid velvet frock which was worn by the little Princess Victoria herself somewhere about 1830.

BEAUTIFUL GOWNS.

Prominent among the dresses of comparatively modern interest is the beautiful wedding gown worn by Queen Mary and carried out in white and silver brocade. The close-fitting bodice and the fairly full skirt are draped with flounces of fine lace and garlanded with orange blossoms. The gloves worn by the Queen, also the lace fan and the handkerchief she carried, are shown too.

Side by side with this wedding gown is Queen Mary's traveling dress made in ivory white Irish silk poplin elaborately embroidered with gold. Another beautiful exhibit in the same case is the white and gold brocade gown worn by Queen Mary at the coronation of King Edward VII. and embroidered in pearls and gold.

A quaint little dress, in tartan velvet with lines of brilliant color on a black ground trimmed on the front of the bodice with small bows of plaid ribbon, is of special interest, says the Lady's Pictorial, as it was worn by Queen Victoria when a child. This is shown in a small case with other interesting exhibits, including the uniform in which Queen Victoria appeared when she reviewed the troops on their return from the Crimea; and the bonnets which she wore at the opening of the 1861 exhibition, and also on the occasion of the first jubilee in 1887, and the Diamond Jubilee ten years later.

Some other exceedingly beautiful dresses have been lent by Queen Alexandra, and are shown in the case opposite the long windows which look upon the Round Pond. Among these is

A HANDSOME COURT GOWN.

worn originally by the Duchess of Kent, and made in a wonderful brocade, patterned with bouquets of gayly tinted flowers and green leaves woven into a background of gold tissue. The court bodice with its long point in front and the full underskirt are of ivory white moire, and the whole gown looks as fresh as though it had only just left the dressmaker's hands.

A gown which comes nearer to our own period is that beautiful dress in which Queen Alexandra made so gracious and lovely a figure at Queen Victoria's Diamond Jubilee. This gown is carried out in pale mauve silk, covered entirely with cream net and lace, glittering with fine silver embroidery and finished with a draped belt of mauve satin ribbon. Equally interesting is the beautiful fancy dress worn at the Devonshire House ball by Queen Alexandra.

In the same case there are a number of other very interesting gowns of the crinoline period, including one in cream silk of the kind which stood alone, the skirt arranged with three deep flounces, each one bordered with a brilliantly colored satin tartan design, and a handsome court gown in ivory moire antique, shot with gold and trimmed with gold lace and bows of blue velvet.

Of special historic interest is the beautiful coronation robe worn by Queen Victoria. The gown itself is of white satin veiled with Brussels lace, and over this is worn a gold mantle and a magnificent "super-tunic" of

CLOTH OF GOLD.

brocaded with shamrocks, thistles and roses and lined with bright crimson satin, bordered with gold lace and heavy gold fringe.

A curious contrast to the gorgeous robe of state is shown in a charming little frock worn by Queen Victoria as a small girl of 7 or 8 years old, and made in white silk, veiled with white embroidered net. The bodice fits closely and is finished at the waist with a band of white satin ribbon. Close to this little dress may be seen a pair of

baby shoes in black satin and a tiny cap in fine white lawn, both of them worn by Queen Victoria.

The evening gown worn by Queen Victoria on her wedding day, February 10, 1840, seems to strike a curiously modern note. It is composed of very rich white corded silk, and arranged with a pleated skirt, the front of which is draped almost exactly in the fashion of to-day, with flounces of white figured net headed by rouleaux of white satin and caught with white satin ribbon bows. Except that the bodice is made with the customary long point in front, it might almost belong to an evening frock of the early twentieth century. The short satin sleeves and the draperies of net which outline the décolletage have almost their exact counterpart in our modern fashions.

VICTORIA'S WEDDING GOWN.

Very dignified in its perfect simplicity is the white satin wedding gown worn by Queen Victoria. The pleated skirt is trimmed in front only with a very deep flounce of lace, while the pointed bodice has a deep lace berthe and short sleeves finished with lace frills to match. With this may be seen the orange blossom wreath worn on the same occasion, and the wedding bonnet, the latter being carried out in a large poke shape covered smoothly with white, corded silk, and finished on one side with a cluster of orange blossoms.

A simple little black silk gown worn by Queen Victoria at her first Council fastens over on one side, and is trimmed with double frills of the same silk. Draped round the shoulders there is a fichu of cream lace caught in the centre with a cameo brooch. The long sleeves are turned back at the wrists with cuffs of white embroidered lawn edged with Valenciennes lace, and exactly similar to those which are worn to-day.

Queen Victoria's dress worn in 1855, on the occasion of her State entry into Paris, might offer some suggestions for the tulle silk frocks of to-day. It is carried out in a lovely shade of blue tulle, and is only very slightly faded. The full skirt is made with three deep flounces, each one edged with pinked out ruffles of the same tulle, exactly like those which are being used by the dressmakers of to-day. The coat bodice has a full basque edged in the same way with tulle ruffles, and fitting closely to the figure. Across the front four ruffles of silk in graduated lengths are arranged over a vest of fine cream lace and muslin.

Other interesting exhibits include the gown worn by Queen Victoria in 1856, on the occasion of the Princess Royal's confirmation, carried out in lilac silk and brocaded with a design representing festooned lace flounces in embossed white velvet; a gorgeous fancy dress of gray brocade outlined with gold gait, and trimmed with Venetian point lace and pearls;

A CRIMSON VELVET CLOAK

belonging to Queen Victoria and adorned with Indian embroideries worked in gold; and a quaint little parasol of white silk covered with black Maltese lace, mounted on a very long ivory handle, and tied at the top with a bow of black ribbon.

In addition to these exhibits there are many others of equal interest scattered through the various cases shown in other rooms, and including small shoes and caps and muslin baby frocks worn at different periods of their lives by those who were afterwards destined to rule as kings and queens.

Kensington Palace, where this wonderful exhibition is installed, has many interesting associations. It was here that the news that the young Princess Victoria was to ascend the throne was brought to her one morning while she was still asleep.

"I will be good!" she is said to have declared to the courtiers who knelt to her. In earlier days she was often seen riding a donkey along the lawn and the paths of the flower garden, and she would say "Good morning, sir! Good morning, ma'am!" to the passersby. The Queen in mature years spoke of her childhood at the palace as having been a very dull one.

Kensington Palace nowadays is a home of comfort, and moreover, as its chief occupants, Princess Louise of Argyll and Princess Henry of Battenberg are past mistresses in the art of making a house beautiful, is second to none in London for artistic taste. Princess Mary of Teck, when she came to live at the palace, now many years ago, had all the Queen Anne handles removed from the doors and substituted, but when Princess Henry of Battenberg took up her residence there after Queen Victoria's death the crystal handles were made to go and Queen Anne's brought back again.

She—"And how did you like the meeting, George?" He—"Fine. Especially the talk by that pretty little Mrs. Featherly." She—"Mrs. Featherly! Why, the silly creature hasn't an idea in her foolish head." He—"Maybe not, my dear, but she's awfully cute." She—"On second thought, George, you needn't go with me again."

UNIQUE CUSTOM IN BRITANNY

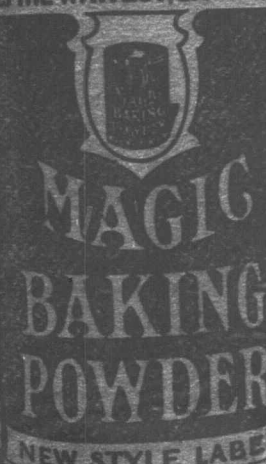

All Weddings Are Held Upon an Official Day.

In the city of Plouargat, in Brittany, France, all marriages take place on one and the same day. The men are all fishermen, many of them going as far as the Newfoundland Banks, and are at home only during a few months in the winter. One day in early February is set apart for the weddings, says Leslie's. Little courting is done, but much haggling over the dowry of the girls. They have to bring a certain quantity of linen, chickens, pigs, and vegetables. Frequently a match is broken off because a father refuses to add a sack of potatoes to the dowry.

On the day set the inhabitants of the entire region go to Plouargat. The whole population goes to church to hear mass, to take communion and to witness the wedding ceremonies. Often fifty and more couples are united on the same day. Bride and bridegroom do not walk together until the ceremony has been completed. For the rest of this and the whole of the next day every house is open to receive guests and to provide food and drink for them. On the evening of the second day the young men carry the dowries of the brides to the houses of the bridegrooms. There they dance and frolic until early morning, and after they leave the couples are for the first time together and alone.

The area of British dominions beyond the seas, exclusive of India, is seventy-eight times that of the United Kingdom.

Secure & Profitable Bonds Paying 6%

Price Bros. & Company have been in business in Quebec over 100 years. It is the largest industry in Quebec Province. Their holdings of pulp and timber lands are 6,000 miles in extent, and have been valued by experts at over \$13,000,000. The net earnings in 1910 were \$448,000.00. The new pulp mill now under construction will double these earnings. Timber limits are insured with Lloyds of England against fire.

Price Bros. & Company First Mortgage Bonds pay 6 per cent. interest on their present price. They will assuredly appreciate in value. Considering interest return, security, and future increase in value, they are an unusually attractive investment.

On application we will send you literature fully describing these bonds.

Catalogue also gives a complete list of dealers. Cost 5 cents to cover mailing cost.

TORONTO CORRESPONDENCE

INTERESTING GOSSIP FROM THE VERY PRESENT DANGER OF BUYING HIGH YIELD AGREEMENTS OF SALE.

Toronto's Reputation for Intolerance
Judge Mabee Honored in Death—Who Will Receive the Vainest Position?
—Canadian Club Officers, etc.

(We have arranged for a weekly letter about Toronto affairs, which we believe will be of great interest to many of our readers. These letters will be from the pen of one of Canada's foremost journalists, a man who has covered some of the world's greatest happenings and now occupies a leading position on one of the Toronto dailies.)

The intolerance of Toronto has been a theme of discussion before this but never so forcefully as recently. "Toronto is the home of international hatred," declared Mr. Justice Riddell in a recent address. "Toronto, without exception, is the most intolerant city in the world," said a speaker at another meeting.

These remarks do not apply particularly to Toronto's reputation for Sabbath observance, and similar virtues, but to the fact that Toronto is impatient of its own opinion that does not agree with its own. It is this arrogance of opinion, which gives such bitterness to Toronto controversies, whether it be on Sabbath observance, religious issues or merely political. Perhaps we will mellow with age.

HONORED MR. MABEE

Rarely has the death of any Canadian called forth such widespread expressions of sorrow and esteem as has that of Hon. J. P. Mabee. A Premier could have had scarcely more attention, and indeed it has been stated that the position which Mr. Mabee made for himself as Chairman of the Dominion Railway Board was second in importance only to that of the Premier of Canada.

Though a man of the world, Mr. Mabee was particularly happy in his domestic relations, according to the testimony of intimate friends. He was the apple of his mother's eye. She predeceased him only recently, as did also his wife. They spent their summers always at Port Rowan, the late Judge's birthplace. The surviving family consists of a young son and daughter.

WHO WILL SUCCEED HIM?

The filling of his position is the biggest place of patronage the new government has had to deal with since it came into power. Conjecture as to what Mr. Mabee's successor will be, is as lively as the speculation as to what Mr. Mabee's successor will be. Some say Mabee's death will immediately open the way for Darcy Scott, Vice-Chairman of the Board, might be promoted. He is a son of Senator Scott of Ontario, and comes of a family that often gets into the High Court Judges might be offered the position. The names of prominent members of the bar, such as Mr. Wallace, K.C., T. F. Hellmuth, K.C., and Mahlon K. Cowan, K.C., were early mentioned.

Mr. Mabee was particularly interesting in view of the fact that he has always been an active supporter of the railway, and his death has been regarded as a serious loss to the railway. Others thought that the position should go partly as well as for familiarity with railway matters, and in this connection the names were discussed of some of the former assistants for the position of Minister of Railways, such as E. A. Lancaster, K.C., M.P. for Lincoln, W. F. Macdonald, M.P. for South York, W. Armstrong, M.P. for East Lambton, Arthur Meighen, M.P. for Portage La Prairie, and C. A. Macrae, M.P. for Medicine Hat.

The latter has a wide knowledge of the transportation needs of the country, though he lacks the legal and judicial knowledge which, hitherto has been regarded as a requisite for the position.

It is interesting to note that when the name of H. E. Clayton, K.C., Corporation Counsel for Toronto, was mentioned, it was pointed out that he is already drawing a salary of \$14,000 a year, while the Railway Commissioner's position is worth only \$5,000. A civil salary of \$14,000 is something that Toronto justly takes credit for.

CANADIAN CLUB OFFICERS

The Toronto Canadian Club, the parent organization of the movement which is spreading widely, has just elected its officers for the next year. Much of the success of this organization has been due to the judicious selection of its officers. The new President is Dr. A. H. U. Colquhoun, Deputy Minister of Education, who will guide the destinies of the club with care, and will be an ideal presiding officer. In Toronto Dr. Colquhoun has an unusually wide circle of personal friends.

The First Vice-President is Mr. T. A. Russell, an Ontario boy who has emphatically made his mark in Toronto. Russell comes from Huron county, and, like hundreds of other country boys, aspired to a University degree. He graduated in 1899.

It is said that the late Prof. Goldwin Smith was greatly disappointed when, upon graduation, he did not return to farming. Instead he took a position as secretary of the Canadian Manufacturers' Association, and then displayed an executive capacity which was chiefly responsible in making that body the powerful organization it is today. In a short time Russell entered private business, and is today head of one of the largest commercial enterprises in Toronto.

The Second Vice-President is Arthur Hewitt, Manager of the Consumers' Gas Company, a gentleman who is coming into prominence, and the other members of the committee are young men, energetic and enthusiastic. The Vice which already Canada is making distinctively its own.

WHEN THE BALL TEAM LOSES

When the baseball team is losing there are a lot of disgruntled fans about town. Generally very little of their railing is the light of day in the newspapers. For the sporting editors, as a rule, are loyal supporters of the home team. But the bleacherite bases his opinion on what he sees, not what he reads. And his opinions are generally forcibly expressed. Here is what some of the critics are saying: "That the winning team is not good enough; that it lacks a single high-class artist."

Catching staff ditto. Fletcher got in wrong with 15,000 fans on opening day by a fool throw to second, to stop a sure run when there was a man on third who scored easily on the play. "Bonehead," said the knoekers. Wilson is an unknown quantity.

That Tim Jordan is not there with his mighty swats often enough in the pitcher's box, that when a hit means the winning of the game a good pitcher can strike him out.

That O'Hara, a home-bred boy, is ready for a less pretentious league than the International. And that there is a lack of team play and of snappy fighting spirit in the whole organization.

That's what the critics say when the team is losing.

Little Folks, when seriously taught the importance of little things, when they grow up to be big folks, will more fully realize the importance of the bigger things.

"You must not talk all the time, Ethel," said the mother who had been interrupted. "When will I be old enough to, mamma!" asked the little girl.

MAKING SAFE INVESTMENTS

THE VERY PRESENT DANGER OF BUYING HIGH YIELD AGREEMENTS OF SALE.

New Some Easterners, Under the False Impression That They are Going to Make a Very High Return on Their Money, are in a Very Fair Way to Lose Most of It.

The articles contributed by "Investor" are for the sole purpose of guiding prospective investors and, if possible, of saving them from losing money through placing it in "wild-cat" enterprises. The information may be relied upon. The writer of these articles and the publisher of this paper have no interest in any of the securities mentioned in this matter other than those of the reader.

(By "Investor.")

I was reading a Canadian financial paper just before sitting down to write this article and my attention was attracted by several advertisements offering investment agreements of sale at prices to return them from 10 to 25 per cent, and it struck me quite forcibly that no doubt it struck many people who purchased such securities under the wholly erroneous impression that they were making a reasonably safe investment.

When the purchaser of a property is unable to pay down a sum sufficient to justify the vendor giving him title to the property, or for other reasons, a document called an agreement for or of sale is given. The title of the property remains with the vendor who, however, if the agreement is registered—as it may be—cannot transfer the property to anyone but the other party to the agreement unless some term of the contract is not complied with. The agreement usually bears interest at the usual rate for mortgages in the part of the country where executed and has as security the ownership of the property. The small equity represented by the cash payment and the covenant to pay the balance in fact it is in many ways quite like a mortgage.

In the West, where ready money is scarce and nearly everybody is land poor, these agreements of sale are frequently sold by the owners at a very severe discount from the face value. Now, just as count from the face value, a return of 25 per cent, if sold low enough, may return as high as 50 per cent, the amount of return indicating in some measure to what sample an agreement of sale bearing 5 per cent, with two years to run, and sold at 60 per cent, of the face value, would add something like 10 per cent, margin as security.

Now, anyone who has much to do with mortgages, when looking for absolute security, will seldom loan at better than 60 per cent, of the face value on an agreement of sale, discounted at an above average rate. The margin of 10 per cent, of the purchase price were paid in the present, an agreement of sale bearing 5 per cent, is unimproved. So, even examined casually, such an investment could not be considered conservative.

But owing to the circumstances surrounding it, generally speaking, an agreement of sale is safe only when there is a rising market in real estate. Just now, to all appearances, the Western real estate market is not, decidedly overdone. The suburbs of many western cities have been subdivided into lots, and there are building lots on the market that would accommodate a population of from five to ten times their present population. Even at their present rapid rate of growth, therefore, there is little chance of much of the subdivided land being really valuable for many years to come. Consequently and conversely there is every probability that much of this land will fall sharply in price as soon as people realize this fact, and they are beginning to realize it at the present time.

If you had a bill of sale on some of this property, how would you fare? That is a question that many people are asking, and it appears to me that they have every reason to feel uneasy.

Those who have followed this column from the first, know that even in Canada one can get in income of over 6 per cent, with safety only on rare occasions. As we have seen, the agreements of sale bearing 5 per cent, are by no means safe, but peculiarly enough—and you will see why when you come to think it over—the same agreement netting 6 per cent, is even less safe. The reason is clear. The agreement netting 5 per cent, is selling at a heavy discount, while the one netting 6 per cent, sells at par. In other words, other things being equal, the one netting the higher percentage of security back of it. However, to get either security or a return of 6 per cent, the agreement must be paid off at maturity at par and this, judging from the present appearance of the market, is just what is unlikely to happen, taking them on an average. The moral is, if all this is not too obvious, DO NOT BUY INVESTMENTS SO CALLED WHICH RETURN A HIGH AMOUNT OF INCOME. THEY ARE DANGEROUS.

There is one sure and ample proof that what I have said of all this is correct. Canadian Insurance Companies and Canadian Loan Companies are glad to get the highest possible rates on their mortgages yielding from 6 per cent, to 8 per cent, after careful investigation by their large staffs of inspectors and valuers. I have yet to hear of any of them—I do not speak of the high speculative loan companies of the far west—buying agreements of sale. If they were worth buying they would never get past the insurance companies. I don't think I could possibly be wrong.

The holders of many agreements of sale will make up some day to find their interest or principal unpaid, when they will then proceed to sell the property. If they can do it they will probably find that at the market price no small part of their capital has vanished and they still will have to pay incidental legal expenses. "It's better to be safe than sorry" is a good rule, particularly in the matter of investments.

CLOCK MADE OF GLASS

A clock constructed throughout of glass is the result of six years' work on the part of a Bavarian glass polisher. The plates and pillars which form the frame work are of glass and are bolted together with glass screws. The dial plate, hands, shafts, and cogwheels are of glass, and glass wedges and pins are used for fastening the various parts of the running gear together, says London Tit-Bits. Like the clock itself, the key by which it is wound is of glass. The construction of the remarkable timepiece was a matter of infinite pains. Some of the parts had to be made as many as forty times before a clock that would go could be produced.

A bushel of wheat weighs, on an average, 60 lb.; barley, 47 lb.; and oats, 38 to 40 lb.

NEW LIGHT ON OLD EGYPT

FOUND IN RECENT SEARCH BY PROF. PETRIE.

Gods and Lamps From Labyrinth Reveal Mysteries of Early Times.

Prof. Flinders Petrie made important discoveries last season on the site of the Labyrinth by the Hawara Pyramid in the Fayum.

Lying in the debris of the brick core of the pyramid he found a few traces of the twenty chapels or small temples. The principal objects discovered were double statues in red granite representing Amenemhat III., who, says Prof. Petrie, was undoubtedly the builder of the Labyrinth.

The crocodile god Sobek was evidently the cult of the precinct and many statues of this god, with some others, were found. These are of great interest, as they are the earliest examples yet discovered of animal gods.

Prof. Petrie also found several

new specimens of Egyptian lamps. These were made of limestone, bowl shaped, but slightly hollowed out with a ring or raised ridge in the centre of the top surface. The centre of the ring was more deeply hollowed.

EXPLAINING HERODOTUS.

These lamps explained the mysterious statement of Herodotus that "the Egyptians fed their lamps with salt water." As a matter of fact, the salt water was placed in the outer hollow, soaking into the stone. Then oil was placed in the central cavity and the wick was lighted. In this way the oil did not penetrate the water soaked stone and the salt retarded the evaporation of all the water.

Prof. Petrie also found an unknown divinity crowned with palms and a new god, Ra-hes-hotep, "He who was in the fields." He completely cleared the cemetery of the Greeks, Italian and Macedonian residents of this district, with their important and beautiful portraits in wax colors painted upon canvas and wood panels.

The female Macedonian type is recognized from the curls which hang down the neck. The custom of wearing the hair in this fashion

is also observed in all the Ptolemaic queens.

200 ALABASTER VASES.

Prof. Petrie in the lecture delivered in Cairo, from which the foregoing points are taken, brought out the interesting facts that the Ka figure was succeeded by mummy-form statuettes in the twelfth dynasty, and it is known that from these the "Slaves," or "Onsewers," began to be made in the seventeenth dynasty.

Prof. Petrie mentioned very briefly his important work this year at an early cemetery, where over 200 alabaster vases were found, with numbers of pottery vases and inscriptions, which identify King Narmmer with Menes, while at Memphis the largest statue known in alabaster, representing Ramesses II. as a Sphinx, weighing between seventy and eighty tons, was found. Further afield he found a fortress discovered the foundations of the temple walls of the great building at On of the Bible. The fortress was protected by three distinct walls, one of which was over fifty feet thick.

The hands are for the hardness of toil; the heart is for tenderness.

MODERN FACILITY.

The ease with which the "promoter" counts chickens that are not yet hatched, from eggs that are not yet laid, appeals when it does not amuse the business man of conservative methods.

London newspapers are repeating a story told by Mr. Harcourt, Secretary of State for the Colonies, of a man who was "something in the City." He approached a rich American with a view to floating a rubber company in British North Borneo. The American was favorably impressed with the scheme.

"How many trees have you?" he asked.

"We have not got any trees," replied the promoter.

"How much land have you?"

"We have no land."

"What, then, have you got?" asked the amazed American.

"I have a bag of seeds," returned the Londoner, composedly.

And many an enthusiastically floated undertaking has not even this!

"You look annoyed. What's the matter?" "Bertha told me a secret the other day, and I can't tell you what it is."

"Why not?" "I've forgotten it."

If You Like a Little Quiet Fun

Ask some pompous person if Grape-Nuts Food helps build the brain.

Chances are you get a withering sneer and a hiss of denunciation.

Then sweetly play with the learned toad.

Ask him to tell you the analysis of brain material and the analysis of Grape-Nuts.

"Don't know? Why, I supposed you based your opinions on exact knowledge instead of pushing out a conclusion like you would a sneeze."

"Well, now your tire is punctured, let's sit down like good friends and repair it."

The bulky materials of brain are water and albumin, but these things cannot blend without a little worker known as Phosphate of Potash, defined as a "mineral salt."

One authority, Geohegan, shows in his analysis of brain, 5.33 per cent. total of mineral salts, over one-half being Phosphoric Acid and Potash combined, (Phosphate of Potash) 2.91 per cent.

Beaunis, another authority, shows Phosphoric Acid and Potash (Phosphate of Potash) more than one-half the total mineral salts, being 73.44 per cent, in a total of 101.07.

Analysis of Grape-Nuts shows Potassium and Phosphorus (which join and make Phosphate of Potash) is considerable more than one-half of the mineral salts in the food.

Dr. Geo. W. Carey, an authority on the constituent elements of the body, says: "The gray matter of the brain is controlled entirely by the inorganic cell-salt, Potassium Phosphate (Phosphate of Potash). This salt unites with albumin and by the addition of oxygen creates nerve fluid or the gray matter of the brain. Of course, there is a trace of other salts and other organic matter in nerve fluid, but Potassium Phosphate is the chief factor, and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elixir of life."

Further on he says: "The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

Brain is made of Phosphate of Potash as the principal Mineral Salt, added to albumin and water.

Grape-Nuts contains that element as more than one-half of all its mineral salts.

Every day's use of brain wears away a little.

Suppose your kind of food does not contain Phosphate of Potash.

How are you going to rebuild today the worn-out parts of yesterday?

And if you don't, why shouldn't nervous prostration and brain-fag result.

Remember, Mind does not work well on a brain that is even partly broken down from lack of nourishment.

It is true that other food besides Grape-Nuts contains varying quantities of Brain food.

Plain wheat and barley do. But in Grape-Nuts there is a certainty.

And if the elements demanded by Nature, are eaten, the life forces have the needed material to build from.

A healthy brain is important, if one would "do things" in this world.

A man who sneers at "Mind" sneers at the best and least understood part of himself. That part which some folks believe links us to the Infinite.

Mind asks for a healthy brain upon which to act, and Nature has defined a way to make a healthy brain and renew it day by day as it is used up from work of the previous day.

Nature's way to rebuild is by the use of food which supplies the things required.

"There's a Reason" for Grape-Nuts

Made by Canadian Postum Cereal Co., Ltd., Pure Food Factories, Windsor, Ontario, Canada.

VOL. 4 JUNE. 20. No. 1

AFTER THE BATTLE.

By the time this paper shall have reached its readers the bitterest political contest in years shall have ended. Half of the candidates will have been elected. At this writing—the day before election—it looks as though all would be elected, judging from the information that both sides willingly give.

The first page of The Observer will be held over until a result of the contest can be obtained and the papers will be mailed as soon thereafter as possible.

It is a matter for regret that in elections in this country people take their respective parties so seriously. We all know that neither party is all bad, and neither is far from being all good. Yet in the heat of the campaign "all speak words of high disdain and insult to his heart's best brother." After a time the people feel foolish for the intensity of zeal which at the best profits but little.

The Observer has been severely criticized in its stand against the Flemming administration, and as is invariably the rule, a few, ten to be exact, have with considerable bluster paid up what they owed the paper and declined to renew. Thus we have \$5.00 less outstanding than we had. We regret to lose patronage, and a scheme to boycott the paper by certain people will not work. That is small tactics that will not become popular.

So far as an article personally affecting Mr. Flemming is concerned, this paper shall feel a humility too profound to express when it can be shown that the article was not essentially true. We find no fault with Mr. Flemming for having made his vow not to use money, rum or other means to corrupt voters, nor with those who took that vow with him. That he flagrantly and repeatedly has violated that pledge lays him open to the severest censure. Writers in the Press have sought to blacken the Observer and to whitewash Mr. Flemming. They seem to have the idea that at this time it was base and slanderous to print the truth. A well written article by "A Hartland Voter" would have been much more effective had it appeared in a less scurrilous paper than the Press. Week after week that paper has permitted in its columns articles of bitterest scorn and hatred against the editor of this paper for no purpose than for wanton ridicule, and through no motive than that prompted by heartlessness and a want of the common kindness one may have toward another.

CANADA.

Looking over the past, we find that the brightest and most heroic deeds that sparkle in history's pages were those inspired by love of country. The man who cannot rise above personal and selfish interests to an intelligent sympathy with the prosperity of his country is not worthy to share the blessings of citizenship.

What a grand object of love and patriotism we have in our Empire and in our Dominion! We feel proud that we belong to this great Empire which "holds dominion over palm and pine." Taking a general survey of the parts of the map of the world colored red, we are reminded of the prophecy of that ancient Druid priest:

"Regions Caesar never knew
Thy posterity shall sway,
Where his eagle never flew,
None invincible as they.

We appreciate our many privileges as subjects of King George and as individual factors of our great nation, but, as Canadians, we love our own

Dominion best of all; and, in the words of Holmes, with gentle irony we may be tempted to say of the British Isles:

"Our home! This western giant smiles,
And twirls the spotted globe to find it,
This little speck the British Isles!
'Tis but a freckle—never mind it!"

Every Canadian heart should thrill when he thinks of this brightest gem in Britannia's crown. We must be true to Canada. We must be patriotic. The true patriot of Canada is the true man, whatever his calling; the man who respects himself, who tries to do his duty by himself, his neighbors, his town, his country. It is he who brings Canada higher. Then sound Canada's praises by doing as the ancient Jew, who walking around the walls of Zion, told her people:

"Mark ye well her bulwarks and consider her palaces, and tell it to the generations following."

Let us take this advice to ourselves. I wonder if we ever stop to think that it is not only oneself one is dealing with, but all with whom we associate daily. The example each one sets before those under his care, or influence, in any way, will leave its impress indelibly printed on their minds, and thus it will shine out in their lives. Do you know how much you are influencing Canadian citizenship and patriotism today, or how much your example will inspire, when you are gone, in other Canadian hearts? Remember we are sowing the seeds of future generations will reap. Let us ask ourselves whether or not by our everyday life, we are impressing our fellowmen with such deeds of loyalty as shall inspire in them a purpose tending to raise our country up to a higher level.

Again, I think it is the duty of every Canadian citizen to broaden his mind by taking advantage of the splendid privileges of education which Canada affords. Let us learn all we can about our Empire and country—its faults, then do our part of setting them right. Canada needs broad minded educated men to take charge of her affairs; nor do we mean to say that only our statesmen need education, but every Canadian citizen, that each may execute his duty, however small, beyond the realm of narrowness and self.

"Beneath the rule of men entirely great,
The pen is mightier than the sword;
Behold the enchanter's wand; itself a nothing,
But taking sorcery from the master's hand,
To paralyse the Caesars, and to strike
The loud earth breathless,—take away the sword,
States can be saved without it!"

Let us patronize the word of the pen in which are the "sorceries taken from the master's hand," let every Canadian broaden his mind by taking into it the thoughts of greater minds, and thus, as a nation, we will learn to see and respect the rights of other nations. Then we may say, "Take away the sword, states can be saved without it."

We have said that all Canadians should love Canada and try to better it in every way which lies in our power. Why should we love our country? Someone has said it is an instinct born in us. This probably is true, but there surely are other reasons why we love her. Our Dominion, bounded by three great oceans has the greatest extent of coastline; the greatest number of miles of lake and river navigation; the greatest extent of coniferous forest; the greatest coal supply; the most varied distribution of precious minerals; the most extensive salt and fresh water fisheries; and the greatest extent of fertile land, of any country in the world.

Then we would love our country if we fully appreciated the just laws under which we are placed, and the wise government we enjoy. When we compare our system of government with that of many other lands, enslaved by ignorance and crushed by despotic powers, we can say with the poet:

"Fair land of Peace, to Britain's rule
And throne adherent still,
Yet happier than alone,
And free as happy, and as brave as free."

How many of the oppressed of other nations are making Canada their home! Coming to our land of glorious possibilities for the future where:

"Soon on her welcoming soil
Cities shall palpitate; Myriads toil."

Again, where is there a more beautiful country than ours—beautiful especially in all of nature's gifts. Here in our own province we have the Rhine of America—the St. John river, the magnificence of which we may all enjoy. Every sort of natural beauty is to be found somewhere in Canada, vast prairies in the west, golden in time of harvest with the world's best grain; the beauties of our Island province, "The Garden of Canada," the majestic Great Lakes; and the noble rivers:

"For the west shall be a garden,
And its glories be unfurled,
Till its beauty is a by-word,
With the people of the world."

Thus we must feel that our land has been blessed, and the pride of all lovers of nature and of nature's God rises within us, as we look at the

boundless beauty, and we say it is truly "God's Land." It has been given to us as our home, and its destiny under a kind Providence will be just what we will make it. We will make it grand by doing our duty every day; by remembering that "righteousness alone exalteth a nation," by remembering that if a noble future is to be ours, out of the past and present it must grow; and by asking guidance of Him who gave Canada her glory, and who honored us by leaving it in our care.

Beatrice A. Lipsett.

[The writer of the foregoing essay is a pupil in the Hartland school, and the paper was read at the Empire Day exercises. Miss Lipsett's home is in Jacksonville.]

Life Insurance may be summed up briefly as a matter of DOLLARS and SENSE. It would take a cyclone to raise the house off your property, but a Life Insurance Policy with The MANUFACTURERS' LIFE will raise the Mortgage.

C.P.R. Special.

The C.P.R. Farming special which arrived here at nine Saturday forenoon and remained until 11.30 drew a very large crowd of village people but not nearly so many farmers as would have great ly profited by a visit to the train. Every one of those present, however, were highly pleased with the exhibits, the courtesy of the attendants and the information given by the lecturer. Perhaps the exhibit that attracted most attention was that of insects, moths, caterpillars, etc. These were all mounted specimens and showed all forms of development. The browntail

Hotel for Sale

I wish to sell my hotel property in the village of Hartland, the house is two story with commodious office, parlor, dining-room seating 30. Ample kitchen and pantry room, eleven bed-rooms, bath room and all sanitary conveniences. Good stables. Apply to Joseph E. Clowes, Hartland, N. B.

Teacher Wanted.

For School District No. 12, parish of Brighton, Carleton county, a second class male teacher. Apply stating salary to E. A. Britton, Windsor, N. B.

moth and caterpillar was shown and the lecturer stated that he did not believe that any browntail moths survived the rigors of last winter in Carleton county. He knew many nests had been found but did not know that any had been found with living caterpillars in them. The only caterpillar in New Brunswick that has red spots similar to the browntail is the tussock caterpillar. This is a native here and does no real harm although it infests trees at the same time the tent caterpillars are about, and people are lead to believe that the havoc wrought by the latter is due to the tussock. The exhibit of harmless and beneficial insects showed a greater variety than the injurious ones.

A sprained ankle may as a rule be cured in from three to four days by applying Chamberlain's Liniment and observing the directions with each bottle. -For sale by all dealers.

Card of Thanks.

Mrs. E. A. Rockwell of Waterville and family wish to thank their many friends for the kindness shown to them in their late bereavement.

Local News and Personal Items

Miss Grace Parker spent Saturday to Monday in Houlton.

F. E. Sayre has just unloaded a carload of Five Roses Flour.

Joseph Whiteley, the well known piano tuner, has been in Hartland for a few days.

Church of England service will be held in Burt's hall next Sunday morning at 11 o'clock.

Mrs. Eugene Grant of Patten has been visiting at the home of her uncle, W. H. Sippell, Somerville.

You can get a high grade American 8 Day Clock for \$2.00 at Arthur Estabrooks' closing out sale.

Miss Etta Shaw of Boston arrived last week to visit her parents, Mr. and Mrs. B. N. Shaw at Victoria.

H. N. Boyer is unloading a car of shingles this week. It would be to your advantage to see them before purchasing elsewhere.

J. T. G. Carr does not have as large a stock of boots and shoes as his competitors, but he can beat their prices on what he has as he is closing out this line.

James Montgomery, intending to go west is disposing of his stock of stoves, tinware, pumps, piping, guns, ammunition, kitchen utensils, cutlery, etc. at really less than the wholesale price.

Miss Ella McCormack of Somerville was operated on for the removal of adenoids and enlarged tonsils on Saturday. Dr. McIntosh was the surgeon and Miss Marion Stevens attending nurse.

On Friday evening last a pleasant event was a social given the new members of the Baptist church. A most enjoyable time was spent by new and old members and some other friends.

The wet weather has already done much to injure the potato crops, and a long period of warm sunshine is necessary to save any of the crop. In some sections fields that had been planted to potatoes have been ploughed again and grain sown. All crops are suffering from the excess of moisture.

Saunders W. DeWitt, who formerly was in the produce business here but who a year or so ago went to Cuba has been back to New Brunswick on a business trip. He spent Sunday with his parents at Somerville. Going away again on Monday he was accompanied by his father, George M. DeWitt, who will go to Cuba with him.

FOR SALE—A building containing large basement, store and dwelling, with a barn in connection. This building is lighted by a Pitner Gasoline system and heated by a McClary Sunshine furnace. The dwelling contains a bathroom. Will sell at a bargain. Also have for sale a kit of tin and plumbing tools, and a small stock of tin plate, sheet and galvanized iron. Will sell tools with or without stock. A good business in connection.

Writing from Rockland to the Observer, Samuel N. Estabrooks says: "I would say to all friends that I have had a tedious winter, six months in bed; but now there is a great change. My appetite is good; I take my meals with the family and move around some out of doors. I want to thank all friends that visited me for their kind words, also those who wrote, phoned, or in any way that word was sent and would also thank the editor of this paper for kind words."

Arthur Estabrooks has a few iron beds at prices you can't afford to miss.

Bliss A. McQuarrie of Upper Kent was visiting friends here this week.

Flour, feed, fertilizer, garden and field seeds, coarse salt, brick, etc., at Carr's.

Miss Lena Mulheron of St. Thomas left on Tuesday for Saskatchewan.

Mr. and Mrs. Linden F. Shaw of Riverside, Calif., are here to spend the summer with relatives.

Miss Martha McCollom left on Saturday for Amherst where she will visit her friend, Miss Helen Fuller.

If you buy "Page Fence" of H. N. Boyer you get what you pay for, which cannot truthfully be said of all fence sold on this market this season.

Mrs. James Montgomery, Mrs. Chas. Allen, Mrs. W. F. Thornton, Misses Sadie Barnett, Julia McCollom and Annie Davis visited Woodstock on Tuesday.

LOST—Between Mansfield Ellis, Bannock, and Rockland, a new rubber boot for carriage. Will the finder leave at A. S. Estabrooks' store and oblige Joseph A. Cahill?

Died, at Waterville, June 5, Walter Rockwell, aged 83 years and 6 months, leaving to mourn, his mother, one brother and two sisters. The funeral was attended by Rev. E. C. Jenkins.

The 10th Field Battery and the Brighton Engineers are to go to Camp Petawawa, near Ottawa. The special train that will carry them will leave Woodstock on Sunday morning and go to Edmundston and over the Temiscouata railway and I.C.R.

Arthur Estabrooks reports a big sale of boots and shoes and he has a good stock of same yet and can offer Ladies Low shoes and slippers, mens shoes of all kinds, and a few pairs of Mens Long Boots at prices to suit the customer.

Rev. Percy A. Fitzpatrick of Port Elgin received the appointment as pastor of the Hartland Methodist church in succession to Rev. Hubert T. Smith, who intends to go to Mount Allison University. The new pastor who is a graduate of Sackville and received ordination last Sunday, will take up his labors here on July 7.

Mrs. Mark Palmer who recently died at the home of her son, Joseph Palmer, at Avondale, leaves also another son, Mark, at Mount Pleasant, and two daughters, Mrs. Frank B. Stottard of Ansonia, Conn., and Mrs. Wm. Barrett of Charleston. She was 83 years of age and had been bed-ridden a long time. Her funeral service was conducted by Rev. E. C. Jenkins.

Frederick Harding Hale, who represented Carleton county in the Dominion parliament for fifteen years, died on Saturday in Vancouver. He is survived by his wife, formerly Miss Angelina Faulkner, of Kings county, and five children, also one brother and one sister. Mr. Hale was born in the parish of Northampton and at an early age entered the lumber business. He entered politics in 1887, was sent to Ottawa for three terms. In 1902 he removed to Vancouver, where he was very successful in business, accumulating a fortune estimated at a million dollars. — Exchange.

Perth.

Bill Green leaves for the west Monday.

A big crowd attended the moving pictures at the opera house Thursday night.

Mason Johnson is getting his new hotel repaired.

Myles McCrea has moved in his new house again.

Dr. Dickinson has bought the church building.

Mr. and Mrs. George Larlee is spending the week end with friends in Waterville, Me.

Johnnie Flood who has been working for Myles McCrea the last year and a half has resigned his job.

Burnis Green has moved in his new restaurant near the Perth hotel.

Four fellows from the Fort were fined \$10. for running their horses in the team bridge on Sunday.

Five new autos have been received at the station at Perth recently.

The ones that have bought new autos are sorry they did not get motor boats instead.

Will Drake passed through this place one day last week.

A. R. Foster of Simonds was here on business one day last week.

Johnnie Flood of Perth went to Woodstock on Tuesday, returning on Wednesday.

Perth mill is in full swing, employing about 35 men.

When your child has whooping cough be careful to keep the cough loose and expectoration easy by giving Chamberlain's Cough Remedy as may be required. This remedy will also loosen the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by all dealers.

Muniac.

Mrs. Alphens Gray of Somerville was visiting her sister, Mrs. S. E. Giberson on Saturday.

Rankin Smith of Woodstock was here by auto Friday. He was a caller at the Miles House.

Mrs. Warren Rideout, Mrs. Odber Tracey and Mrs. Perry Bishop were guests of Mrs. W. Miles Friday.

Mrs. G. E. Giberson visited friends at Bath this week.

Miss Annie Carr entertained a number of her girl friends at tea on Saturday evening.

McDougall Bros. had a barn raising Monday. About thirty were present and a fine barn was erected.

John Fitzherbert and Miss Delia Tompkins drove to Fort Fairfield Tuesday and were quietly married. They returned in the evening and the boys gave them a lively serenade at the home of Walter Wright.

Mrs. A. B. Mavor and Mrs. F. Taylor were calling on T. O. Morehouse Monday.

W. H. Miles spent Sunday at Kintoe.

Mrs. James Gray is very ill at her home in Upper Kent.

W. Miles is building a new shed. James Young is the carpenter employed.

A. A. Grant made a business trip to Perth Tuesday.

It is now well known that not more than one case of rheumatism in ten requires any internal treatment whatever. All that is needed is a free application of Chamberlain's Liniment and massaging the parts at each application. Try it, and see how quickly it will relieve the pain and soreness. Sold by all dealers.

Upper Brighton.

Rev. and Mrs. J. M. Mallory of Simonds had dinner with Mr. and Mrs. Gordon Luskey on Sunday.

Mrs. C. M. Howard and daughter, Mildred of Boston and Mrs. H. E. Novers of Perth spent a few days of

last week with their brother, Charles Carr.

A. McNeil the sawyer at Sayer's mill, was called suddenly to Nova Scotia on the account of the illness of his son.

Miss Beatrice Dickinson of Victoria spent Sunday with her cousin, Alice Day.

Rev. M. Mallory of Simonds will hold meeting in the Primitive Baptist church on June 30, at 12.30 a.m.

Some friends from Blaine were visitor's at Mr. and Mrs. Scott Hall's on Sunday.

Mrs. George Wallace of Cloverdale is visiting at Mrs. Robert Blackie's.

Mrs. E. Corbett who has been quite ill is some better.

Mr. and Mrs. A. Miles of Lowell, Mass., are visiting Mrs. Miles sister, Mrs. W. B. Dickinson.

Important Real Estate Announcement!

Having made a mutual agreement with a leading Real Estate agency of St. John all property enlisted with us receives more than local advertising and has an equal chance with any other in the province to be placed with the prospective Old Country Settlers.

WANTED
We want you to list all Real Estate you have for sale.

Improved Farms
Abandoned Farms
Wood Lots
Lumber Land
Town Lots
Mill Sites, etc.

It costs nothing to list. Get busy and partake of the coming prosperity in New Brunswick. Buyers would do well to see our list before purchasing.

Carleton Real Estate Agency.
Hartland, N. B.

DO IT NOW.
It is well known to experienced salesmen that the largest and best business in Fruit trees is done during the summer months. The man first on the ground secures the cream of the trade, therefore
SECURE YOUR AGENCY NOW.
We want a good reliable man for this district, because the demand for fruit trees never was so good. Good Pay. Outfit free. Whole or part time agreement, and you represent a firm of thirty-five years experience with over six hundred acres of land under cultivation. Write, PELHAM NURSERY CO., Toronto, Ont.

WANTED—Old Coin, old church communion token, old postage stamps used 50 years ago, which are worth most if on original envelopes; also all kinds of old antiques.

Queen Street, Woodstock, N. B.

For Sale

A building containing large basement, store and dwelling, with a barn in connection. This building is lighted by a Pitner gasoline system, and heated by a McClary Sunshine furnace. The dwelling contains a bathroom. Will sell at a bargain. Also have for sale a kit of plumbers tools, and a small stock of tin plate sheet and galvanized iron. Will sell tool with or without stock. A good business in connection.

J. W. Montgomery
HARTLAND

For some time past we have been handling

Real Estate in the West

and have made very satisfactory investments for our clients.

It looks now, as if NEW BRUNSWICK was beginning to come into its own. We have therefore decided to work on properties in St. John, where in addition to the Large Harbour Development taking place, money will be spent by MILLIONS in the establishment of Manufactories, Public works, &c.

The following are some of the amounts being spent or about to be spent in and around St. John:

New Theatre in Kings Square, construction started	\$100,000
New Building, Bank of B. N. A.,	100,000
New Drill Hall, construction started	250,000
New post Office, construction to commence at once,	250,000
One-third Share Harbour Bridge voted by city, to be built in conjunction with the Federal and Prov. gov'ts.	300,000
Voted by Prov Govt. for the construction of a third bridge at the Falls,	800,000
New concrete Dock, west side of harbour, commenced,	
For Development of Minto Coal Areas and construction of Branch Railway,	2,500,000
N. B. Hydro-Electric Co. developing electric energy on two rivers for transmission to St. John,	3,000,000
For Dredging, Wharf Construction, and Terminal Facilities, West Side,	3,500,000
For purchase of property and construction of largest Paper Mills in Canada, to start at once,	5,000,000
St. John Valley Railway, under contract to be completed in 1915,	9,600,000
Contract awarded Norton Griffiths Co. for constructions of Piers, Dry Dock, etc., in St. John Harbour,	11,500,000
Ultimate expenditure in St. John Harbour, east, in 5 years	20,000,000

With these amounts expended and many others later, St. John must enjoy a season of prosperity such as it has never seen in the past.

NOW is the time to invest in REAL ESTATE. Prices are bound to advance.

Wire, write, or Phone, for further information,

SCIENCE OF ELECTRICITY

WAYS IN WHICH THE PUBLIC ARE CONFUSED.

Powers Placed in Hands of Doctors By Electricity Are Very Great.

Some day a great educationalist will arise who will demand that every child in the kingdom shall learn something about the science of electricity says the London Standard. When that time comes the members of two great professions will be profoundly thankful. Engineers will be glad to escape the thousands of foolish questions that are asked them daily, and doctors will be able to instil a little sanity into those of their patients who demand "electrical treatment" for all kinds of ills under the idea, at one time largely advertised and still largely believed, that "electricity is life."

Only a little while ago a nurse—a well educated and highly skilful woman—said to the writer of this note: "I am always full of electricity." The statement might under ordinary circumstances have been taken as a fanciful way of expressing a feeling of strong vitality, but it was nothing of the sort. She had just been helping at an operation, in which a piece of steel had been taken out of a man's eye by means of an electro-magnet. She had often heard the expression "animal magnetism," and as she had just seen that there was some connection between magnetism and electricity she evidently believed that the great soothing power she could exert over nervous patients was a purely electrical effect.

It was a strange confusion of ideas, but a very common one. Many words that have a definite scientific meaning are used in a semi-poetic way to express something quite different and are used so often that the second meaning gradually becomes a part of our everyday language. Electricity is one of these. It is a wonderfully satisfying word. If you are asked how the trains in the Underground Railway manage to travel without locomotive engines you have only to say "electricity" and two out of three of your questioners will be satisfied with the answer. In the same way the British public has a remarkable belief in any kind of "electrical" treatment, especially for the more common ailments, such as nervousness or rheumatism.

POWER FOR GOOD.

In the skilled hands, both of the physician and the surgeon, electricity is becoming daily a greater power for good. The number of ways in which it can be applied is enormous. Electrotherapeutics, as electric healing is called, has now become a science by itself. It is complicated enough in detail, but if every one had learned the elements of electrical measurements in his school days it would be a very easy task for a doctor to explain any particular kind of treatment he might recommend. Moreover, this slight addition to the general knowledge of the nation would be a perfect protection from some of the most impudent frauds that have ever been perpetrated on suffering humanity.

One of the most amazing series of frauds perpetrated under the name of electricity was the one known over twenty years ago in England as the Mattei Cure. He sold small bottles of distilled water which

BOVRIL

IS THE GREAT BODY-BUILDER

See the British Medical Journal, Sept. 16, '11, and the Medical Times, Nov. 18, '11.

when diluted to an almost indefinite extent were supposed to cure cancer. No analyst could possibly discover anything but water in them. That was because their wonderful ethereal constituents were "fixed by electricity." How or why was the secret of the inventor. Electricity in some way or other hid the subtle drug from the enquirers who came to look for it armed with all the powers of science. People believed in it because of the wonderful word electricity. Very few of these frauds reached England, but France, Switzerland and Italy were full of them. Any number of waters were sold that would cure everything because their unknown and for the most part non-existent curative properties were "fixed by electricity."

In later years there were the electric belts, which led their proprietors into trouble with the law courts.

X-RAYS AND RINGWORM.

In spite of all the fraudulent uses of the word and the quackery that has risen around it, electricity is now employed to a remarkable extent by both sides of the medical profession. Mention has already been made of the electro-magnets which draw pieces of steel from the eye. Every one has heard of the marvels accomplished by means of the X-Rays. Causteries undreamed of in delicacy a few years ago are easily prepared to-day. The finest point of platinum may be rendered white hot for a second or so where ever it is placed, and so seal a spot without injuring anything in its neighborhood.

The physician may remove a ringworm by a delicate measured dose of X-rays. He may stimulate a jaded patient with an unfelt application of high frequency current, which will at times act like a liqueur brandy. He may use electric baths, or may drive a drug or a definite part of a drug through the skin by cataphoresis. The powers placed in the hands of the doctors by electricity are great, but they need more than ordinary skill both in prescription and administration.

Sufferers who are in need of such treatment should see that they get the prescriptions from a qualified physician, and have the work carried out at an institution where neither more nor less than the prescribed treatment is given them.

STORY OF A STINGY HUSBAND.

An Instance Where One good Man Went Wrong.

In a lively article in Farm and Fireside, on the relations between husbands and wives on the subject of home finances, there are several interesting reports of actual cases. Following is a report of a stingy husband.

"A girl I knew in my youth was married after a short acquaintance to a scholarly professional man. He had been brought up under hard conditions in a strenuous school of poverty. She was the daughter of wealth and had never been denied a reasonable wish. Her husband was what is called a good provider. He bought amply for the table, and was not averse to having plenty of fuel and sufficient house furnishings to keep his home comfortable and dignified. He simply declined to let Betty buy so much as 5 cents' worth of anything. He did not wish her to have accounts at shops, nor did she desire them. When she wanted to buy anything for herself or the children, he accompanied her, superintended her purchases, examined every pair of stockings and every yard of muslin, and frowned upon ruching and trimmings as needless, drawing out his well-filled pocket-book and paying the bill with a flourish when the shopping had been done to his satisfaction. She never had any money in her possession except when her mother sent it to her as a gift, and when this was done, she took excellent care to keep Reuben in ignorance. Once the good man, for in some ways he was good, was compelled to leave home for a few days. He carefully counted the amount that his wife would spend for the house during his absence. Then he lost his train and had to wait over for another day. Coming home, he asked her for the cash, and put it back in his own pocket for the next 24 hours.

Mr. Henpeck—"Is your beef tender to-day?" Butcher—"Yes, sir, it's as tender as a woman's heart." Mr. Henpeck—"Then, I'll take a pound of sausages."

PICKERING'S PEERS.

As his father, the Earl of Clarendon, is no longer a young man, Lord Hyde's much-talked-of action in emigrating as a farmer to Canada with his wife and children and his brother-in-law, Lord Somers, has not that air of permanent exile about it which lends, as a rule, a definitely depressing quality to such actions, says the London Bystander. Indeed, it is probable that

Lord Hyde.

health considerations, especially for his children, are the prime reasons for a step which is certainly an unusual one for a former young man about town, the heir to a rich earldom and a fine estate, and the son of a life-long courtier. In Edwardian days Lord Hyde, who is dark and well set-up, though slightly lame, was one of the few young

Lord Somers.

men about the Court, and it was at Dublin in the gay days of the Dudley Vice-royalty that he met his fair-haired, blue-eyed wife, the daughter of that Mrs. Somers Cox who was the adopted daughter of the painter Watts. Her brother, Lord Somers, though he had a long minority, succeeded to a somewhat attenuated fortune, the bulk of the Somers estates.

TWO METHODS OF SUICIDE.

One Chose Fire, Another Used the Steam Roller.

Two unusual forms of suicide are reported. At Cirkenica, Austria, a woman named Krulj built a pyre of firewood in the court of her house, drenched it with paraffin, and lighted it after placing herself on the top with her little daughter clasped in her arms. The child's shrieks were soon stifled by the suffocating smoke, and by the time the neighbors came to the rescue they found the dead bodies of the woman and child enveloped in flames. Frau Krulj is believed to have been driven to this desperate deed by the threat of her husband, from whom she was separated, to take her child away from her.

In Vienna the driver of a municipal steam roller used the machine as a juggernaut for his own immolation. He first set the engine so that it would automatically stop after rolling ten yards, in order that it should not run wild after his death, and then deliberately laid himself down on the freshly-laid metal of the street in front of the roller. The horrified passers-by who rushed up, were bespattered with blood, and only found, when the roller had passed, what looked like red mud crushed into the roadway. Domestic troubles are said to have been the motive for the suicide.

Prisoner—"I didn't steal the horse. I only took him from the fellow what stole him." Captain—"Shore. I phoned that to the vigilance committee, but it's no go. They phoned me hang up the receiver."

Stern Parent—"Quite so, quite so! You tell me that you have proposed to my daughter; but—er—you say nothing about your position. Nervous Suitor—"My position, sir? Oh—er—the usual one, I believe—on my knees, you know."

"Was your first meeting with your wife romantic?" "Oh, very! I was trying to carve a turkey, and some of the stuffing squirted into her eye!"

HABITS OF THE ANT.

How Do They Find Their Way Back to Their Nest.

Most people at some time or other have lain upon the ground and watched an ant making her way through a forest of grass, and have wondered that the tiny insect can go into such a wilderness and still get back safe to her nest. Does the ant take note of landmarks on the outward journey, and mentally record a fallen twig here, a stone there, for use as guides on her journey home?

Many observers have carefully studied the habits of ants in this particular, and all agree that landmarks are not necessary to the ant; it can find its way back to the nest just as well when the landmarks are all altered. A German scientific man, Bethé, held that ants return to the nest as a dog tracks a fox, by scent; that is, by following the smell of their own footsteps.

But the most recent investigator of the subject, a Swiss naturalist, Cornetz by name, who has made records of more than a hundred trails actually followed by ants to and from their nests, is quite sure that they do not depend on smell. The ant's path back to the nest, he says, is never the same as the path she followed on her outward journey.

According to Cornetz, the ant has a curious power of remembering the general direction of her course, in spite of having to climb over and creep under obstacles, and to make occasional excursions to right and left in search of food that she wishes to carry home, she is able to turn herself about so as to follow exactly the reverse direction home. She acts as if she bore a minute compass in her small body. In proof, Cornetz cites an experiment in which an ant returning to her nest was transported on a leaf beyond her nest; she continued to travel in the direction that she had been pursuing, although she was now, of course, moving away from her home.

The homeward journey, Cornetz finds, is always in a course roughly parallel to that of the outward journey. A man who has tried to keep the same direction through miles of thick woods, on a cloudy day, without a compass, and with no chance to "view the landscape o'er" from high ground, must respect the ant for something more than mere industry.

ALWAYS ON THE HUNT.

Death Only Stop to Bedouin's Search.

From the time that a Bedouin is 18 years of age until he dies of old age, he is more or less looking out for new wives. By law Mohammedans are never allowed to have more than four at the same time, but they easily evade this regulation by divorcing one, which simply means sending her back to her parents. This is often because she has borne him no sons. So it happens that the old sheikhs almost always have young wives.

It is considered effeminate for a man to show the least affection towards his wives, at least openly. One of the young sheikhs of the Adwans, Mouthafy, who recently lost his young and only wife acknowledged to be the prettiest girl in the tribe, shed tears at her grave. For this he was much laughed at by his companions, who said: "If a man's wife die he can easily procure himself another." But for a deceased father, brother, or even a mother, they think it does not show weakness to mourn, because from where could he get another? This seeming indifference to women has undoubtedly grown out of the false idea the men entertain that to express appreciation of them would be weak and unmanly. From personal observations I know that the Bedouins, in private, treat their wives with more consideration than is generally shown among Orientals, especially so if they have borne sons. Bedouin women can go about alone and no one dare molest them on pain of death.

Immorality is scarcely known among them, for should a girl go wrong, her own relatives would put her to death. European women are not likely to be subjected to any indignity at the hands of these roving sons of the desert.—Wide World Magazine.

Debt is a temple that has more entrances than exits. Wooden bedsteads are again the fashion. They should be wiped over every three months with turpentine to keep them perfectly clean.

Pongee silk must not be wrung when washed; hang in the shade and let drip dry, then iron with a moderately hot iron without sprinkling.

Kid slippers, belts, gloves and purses are best cleaned by rubbing them with French chalk.

It is a good plan to close the eyes for five minutes every few hours. This will not only rest the eyes, but prevent the wrinkles known as "crow's feet" from making their appearance as early as they would otherwise do.

Old potatoes are apt to turn to a dark color in the boiling. The way to prevent this is to add a tablespoonful of sweet milk to the water in which you boil them. You will find them nice and white when done.

Make The Teapot Test

Put "SALADA" TEA in a warm teapot—pour on freshly boiled water—let stand for five minutes—and you will have the most delicious cup of tea you ever tasted.

"SALADA"

HAS THE FLAVOR! THE FRAGRANCE! THE DELICIOUSNESS that makes Ceylon Tea the beverage of delight. In sealed lead packages ONLY. BLACK, GREEN or MIXED

FIGHT WITH A DEVIL-FISH.

A Terrible Struggle With One of These Monsters.

One of the largest of fishes—perhaps the largest of true fishes, since the whale is a mammal—is the manta or giant devil-fish of tropical waters. A man who catches one of these monsters knows he has been fishing, for he often stands in no small peril of his life before the creature is landed. In the Wide World Magazine a writer gives this lively account of his experience with an unusually large manta.

We were fishing from a gasoline launch some fifteen miles down the coast from Manzanillo, Mexico. I was standing in the bows, ready to harpoon a large fish that had bitten, and was being pulled to the surface.

Suddenly fish and line were snapped away, and through the clear water I saw a huge dark purple mass, scarcely a fathom below the boat. Shouting to our Mexican engineer to start the launch, I threw the harpoon with all my strength. It struck home, and instantly a great disturbance took place. Some monstrous creature rose to the surface and dashed at the boat, striking out with what looked like two great wings.

The strokes were terrific, and we had the utmost difficulty in keeping clear. Had one of these "wings" touched the boat, it would have been smashed like match-wood, and, as sharks were watching the disturbance, our fate would soon have been decided.

Although the water all around us was seething from the fury of the monster's onslaught, we kept our heads, and did our best to disable the creature.

We embedded three harpoons in it. We also fired three revolver bullets into it, each of which produced volumes of dark exudus; and every time the madly flapping wings came near enough, the man in the bows gave them a lance-thrust.

Gradually the manta's struggles grew less, and it began to yield to the strain on the ropes. It was a long battle, however, for every now and then the great fish, seeming to regain strength, would attack us with renewed ferocity. Eventually, after a final flurry that caused the water to heave as if with an earthquake, it ceased its struggles, and we towed it ashore, escorted by shoals of sharks.

Tying the boat up at the wharf, I got permission from the comman-

dant of the port to land our prize. Making it fast, we hoisted it on the crane, and ran it along to the railway office, in front of which we photographed it. It measured eighteen feet three and a half inches from tip to tip of the wings, and sixteen feet one inch from head to tail; near the centre it was over nine feet thick.

We estimated its weight at five tons. When we had photographed the great fish, we cast it off the end of the wharf, and the sharks demolished the carcass in an incredibly short time.

He (after popping the question)—"Why do you cry, my angel? Did I offend you by my proposal?" She (still sobbing)—"Oh, no, dear, it is not that; I am crying for joy. Mother always said to me: 'May she said, you are such an idiot that you would not get even a donkey for a lover,' and now I have got one after all!"

She (tearfully)—"Our engagement is at an end, and I wish to return to you everything you have ever given me." He (cheerily)—"Thanks, Blanche! You may begin at once with the kisses!" They are married now.

Well, Well!

MAXWELL'S HIGH SPEED CHAMPION

Is the Washer for a Woman

In the first place, Maxwell's "Champion" is the only washer that can be worked with a crank handle at the side as well as with the top lever. Just suit your own convenience.

Another Maxwell feature—Lever and Balance Wheel—are so accurately adjusted and work up such speed that the washer runs along even when you have stopped sucking the lever. There's no doubt about Maxwell's Champion being the easiest running washer on the market. Write for new illustrated booklet from dealer. Does not handle Maxwell's Champion Washer. MAXWELL, 11, Bay St.

AN INVITATION TO SICKNESS

Thin, Watery Blood Leads to a Breakdown in Health.

Thin, impure blood is an invitation to sickness. The blood is at work day and night to maintain the health and any lack of strength or purity in the blood is a weakness in the defense against disease. Anemia is the doctor's name for lack of blood—watery blood. There may be an actual loss in the quantity of the blood, or one or more of its constituents may be lacking. The surest symptom of anemia is pallor. The trouble is particularly common among young girls between the ages of fourteen and eighteen, but it is also found in women of all ages, and quite frequently attacks men. It is nearly always present and prevents recovery after grippe, fever, malaria, and operations and for this reason a tonic medicine is required in all these cases. To enrich the blood, build up the nerves and restore health and strength. And there is no other tonic as good as Dr. Williams' Pink Pills, as has been proved in thousands and thousands of cases, among them that of Miss Annie Turner, Marie Joseph Post Office, N.S., who says:—"Dr. Williams' Pink Pills have been of inestimable benefit to me. I was so badly run down that I could hardly go about, was not able to help in the work about the house. As my health grew worse the trouble brought on some species of fit, and when these attacks would come on I would sometimes remain unconscious for half an hour. After many other medicines had failed to help me, my brother got me a supply of Dr. Williams' Pink Pills and I began taking these. In the course of a few weeks I felt much better, and after taking the Pills for a time longer I was again in the full enjoyment of good health. I feel that I cannot praise Dr. Williams' Pink Pills too highly and I recommend them to all weak girls."

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

When the Panama Canal is opened the sea passage from New York to all American ports north of the Isthmus of Panama will be reduced by 8,413 miles.

Relief for Suffering Everywhere. No whose life is made miserable by the suffering that comes from indigestion and has not tried Parlee's Vegetable Pills does not know how easily this formidable foe can be dealt with. These pills will relieve where others fail. They are the result of long and patient study and are confidently put forward as a sure corrector of disorders of the digestive organs, from which so many suffer.

The mere fact that you are not having a good time while you are young won't necessarily keep you out of the county infirmary when you get old.

Ask for Minard's and take no other.

SUPERIOR CREATURES.

"Women are certainly the mental superiors of us men."
"What makes you say that?"
"Seeing my wife spank the baby, read a book, and carry on a conversation with her month full of hairpins all at the same time."

Skin All Covered With Eruption

Tried Many Remedies 3 or 4 Years. Cuticura Soap and Ointment Cured.

A Quebec man, N. Henri Tardif, of St. Cosme, writes in a letter dated May 31, 1911: "I had a very bad skin, all covered with eruption, eight years ago. I have had all of both my shoulders covered with it, and the high part of my arms, and my face, but I was the worst on my shoulders. I tried many different remedies to cure it, but nothing was any good. At last I went to an apothecary. He asked me if I had ever used Cuticura Soap and Ointment. I told him no, and I bought a box of Cuticura Soap and Ointment. I spread the Cuticura Ointment on all my sore parts, and I think that in washing my face with the Cuticura Soap, it hindered my eruption from itching and burning. I tried many remedies during three or four years, but Cuticura Soap and Ointment cured me." (Signed) N. Henri Tardif.

Cuticura Soap and Ointment are sold throughout the world, but to those who have suffered much, let hope and are without faith in any treatment, a liberal sample of each with a 25-p. booklet on the skin and scalp will be mailed free, on application. Address: Fetter Drug & Chem. Corp., 60 Columbus Ave., Boston, U. S. A.

DREAMS OF THE BLIND.

Sight Lost After Seven They Can Distinguish Objects.

Curious data have been gathered abroad with reference to the dreams of the blind. It appears that all dreams of normal persons are sight dreams, and that a dream is spoken of as a vision. If the blind have not been born so, it is said they may remember enough of what they have seen to enable them to imagine how things look, and, when the imagination has free play in sleep, to picture themselves as in full possession of the sense of sight.

Physiologists would explain this, remarks a writer in Harper's Weekly, by saying that during the years in which the subjects possessed the sense of sight a certain part of the brain had become educated to receive and interpret all these messages which the eye sends, and that when this part of the brain acts spontaneously in sleep the person dreams of seeing.

Of some two hundred blind persons of both sexes who were questioned, it was found that their fifth year became blind before their fifth year and never dreamed of seeing. Of those whose sight was lost between the fifth and seventh year some did and some did not see in their dreams, while all whose eyesight was lost after the seventh year had quite as vivid dream visions as normally endowed persons.

The fifth to the seventh year is thus shown to be the critical period. This period corresponds with the age which authorities assign as the limit at which a child becoming deaf will also become dumb, and also with the age of one's earliest continuous memory of oneself.

It is interesting to note that blind persons dream quite as frequently as normal people, and that with these who do not see in their dreams, hearing plays the principal part. When dreaming of home, for instance, they will hear the voices of relatives, and perhaps will feel the familiar objects in the household.

MOTHERS PLEASED WITH BABY'S OWN TABLETS

A mother who has once used Baby's Own Tablets for her little one never fails to show her pleasure at the result. She at once realizes that they are the ideal medicine for baby—being absolutely safe and free from injurious drugs and at the same time a sure cure for all the little ills from which babies suffer. Mrs. P. Theriault, Paquetville, N. B., writes:—"Please send me another box of Baby's Own Tablets. I was extremely pleased with the last. My baby was greatly troubled with constipation and vomiting, but the Tablets quickly cured her." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

DOGS AS CUSTOMS OFFICIALS.

Dogs are being employed by the Austrian customs authorities to hunt down smugglers. They are a cross between a greyhound and a wolf, and are trained to detect persons endeavoring to cross the frontier with contraband by attacking the dogs employed by them. The smugglers' dogs have shown themselves of great use in carrying packets of contraband and eluding the revenue officers at the outposts. Now they are being "hunted" and killed by the customs officials to the trail. The smugglers trained their dogs by a course of whipping on one side of the frontier and feeding on the other. Then the dog—usually a comparatively small animal—was fitted with the skin of a larger dog, usually a poodle, and the space between filled with saccharin, tobacco or other contraband.

CURED BY CIN PILLS.

Bridgeville, N. S.
"For twenty years I have been troubled with Kidney and Bladder Trouble, and have been treated by many doctors, but found little relief. I had given up all hope of getting cured when I tried Cin Pills. Now, I can say with a happy heart that I was cured."
"DANIEL F. FRASER."

Write us for free sample of Cin Pills to try. Then get the regular size boxes at your dealer, or direct from us—50c. a box, 4 for \$2.00. Money refunded if Cin Pills fail to cure. National Drug & Chemical Co. of Canada, Limited, Dept. W.L., Toronto.

A QUESTION.

Clerk (to woman who has fingered over everything in the store without buying anything)—"Excuse me, madam, but are you shopping here?"
Customer—"Certainly. What would I be doing?"
Clerk—"I thought perhaps you might be taking an inventory."

One Gleam of Hope.—Wife—"Dearest, if you and I were thrown on a desert island what would you do?" Husband—"Thank heaven, I can swim."

Be sure you understand a subject before you talk about it—then you can cut out most of your talk.

Keep Minard's Liniment in the house.

BORDERING ON THE MIRACULOUS

JOHN McELROY'S HEART TROUBLE CURED BY DODD'S KIDNEY PILLS.

Could Not Work all Summer, and Doctor Failed to Help, but Cure Was Quick When He Used Dodd's Kidney Pills.

Benton, N.B., May 13 (Special).—Bordering on the miraculous is the cure of John McElroy, a young man well-known here. He was suffering from heart trouble and was so bad that all last summer he was not able to do a day's work. Dodd's Kidney Pills cured him. In telling the story of his cure, Mr. McElroy says: "I went to a doctor who said I had palpitation, but his medicine did not seem to reach the spot. I suffered for over a year and all last summer I was not able to do a day's work. My sleep was broken and unrefreshing. I felt heavy and sleepy after meals and I was always tired and nervous. I perspired freely with the least exertion. "After I had finished taking the doctor's medicine, and as I felt no better, I read in an almanac what Dodd's Kidney Pills could do and made up my mind to try them. Before I had finished the first box I felt different, and by the time the second was half gone I was working in the woods and doing good work."

SOLVE SERVANT PROBLEM.

Woman's Industrial Council of London Start Investigation.

The Woman's Industrial Council of London, England, is just now grappling with a solution of the domestic servant problem. To gain reliable information on the subject they have addressed a series of questions to employers of house servants, asking about their requirements, what they are willing to pay, what they expect to obtain in the way of service, what working conditions they provide and what their troubles with servants have been.

Another series of questions have been addressed to domestics, asking about their experience at service, as follows:—
1—Did you have any training before you went to your first place?
2—How long have you been in service?
3—What are your wages?
4—How much free time have you each day (1) out of the house, (2) in the house?
5—How much free time have you on Sundays (1) out of the house, (2) in the house?
6—Have you a bed to yourself?
7—How long holidays have you in the year?
8—Are your wages paid during your holidays?
9—Why did you go into service?
10—Would you advise any young friend to go into service? If not, why not?

Nearly all children are subject to worms, and many suffering by using Mother Graves' Worm Expeller, the best remedy of the kind that can be had.

If it's the unexpected that always happens, it's a wonder we don't get to expect it.

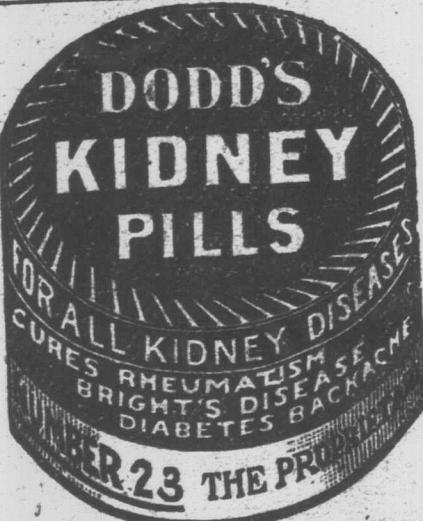

It Rubs Pain Away.—There is no liniment so efficacious in overcoming pain as Dr. Thomas' Electric Oil. The hand that rubs it in rubs the pain away and, on this account, there is no preparation that stands so high in public esteem. There is no surer pain-killer procurable, as thousands can attest who have used it successfully in treating many ailments.

CAUGHT.

De Broke—"Very sorry, but I can't pay you to-day. My shoe-maker has just been here, and—"
Tailor—"Yes, I know. Just met him on the stairs. You told him you couldn't give him anything because you expected your tailor. Here's the bill."

MENTAL ARITHMETIC.

Teacher—"Why, Willie, these problems are all wrong! What is the trouble?"
Willie—"I dunno. I worked awful hard before I could even get 'em wrong."

ED. 4

ISSUE 20-12

SOME RUG SUPERSTITIONS.

Oriental Maidens Weave Their Thoughts Into Carpet.

The little cottage Oriental rugs often made by girls who are shortly to be married, in Turkey, Persia, on the Armenian plateau and in Afghanistan, carry with them all the poetry and mysticism of the Oriental girl's mind, as she is just budding into womanhood.

She weaves into the rugs almost her very thoughts—so much is the rug-weaving a part of the Oriental life, and so little is it a purely commercial pursuit. Time is not counted of value in the East when rugs are made. Consequently, Americans have found it impossible to compete with the Orientals in the manufacture of these practically everlasting products.

In some parts of the Oriental rug countries, it is considered wrong to have the rugs seen in the making by Christians. If such an accident occurs, and one from the western world views one of the rugs, the workman offsets the suspected by weaving a small white spot in the rug, to keep away the "evil eye."

Sometimes, when the rug is not made for sale, but as the dowry of some girl at the time of her marriage, and when something inauspicious has happened, a little break is left in the border of the rug, by which it is hoped that the devil may escape from the household. Were the border continuous, the Orientals believe that the devil would run around and around the rug and never leave the house.

MINISTER PRAISES ZAM-BUK.

Tells How It Cured His Wife's Bad Sore.

Rev. Henry J. Munton, of Blackfolds, Alta., writes: "My wife had a very bad sore foot, which it seemed impossible to get anything to heal. The sore would heal to a certain point and then fester again, and so on. I procured a box of Zam-Buk, and after persevering with this herbal balm for some time the sore was completely healed."

"I have since recommended Zam-Buk to several of my parishioners, and it always gives satisfaction."

Another instance in which Zam-Buk proved of unequalled value is told by Mr. N. L. Gerry, of Brandon, Man. He says: "I had my left foot run over by a wagon loaded with wheat. The foot was very badly crushed, and my little toe and the next toe were laid open. I applied Zam-Buk, and only had to miss work for two days. Zam-Buk healed the wound so quickly that on the third day I was able to put on my boot and walk to my work. In a very short time my toes were quite healed, and the foot is now as sound as ever, thanks to Zam-Buk."

Just as good for chronic sores, ulcers, piles, blood poison, burns, scalds, eruptions, eczema, and all skin injuries and diseases. 50c. box at all druggists and stores, or Zam-Buk Co., Toronto. Try Zam-Buk Soap, too, 25c. per tablet.

Mrs. Kowler—"So your daughter is in Paris having her voice cultivated. Does she intend to enter professional life?" Mrs. Blunderby—"Oh, yes, indeed. She is studying to be a belladonna."

A Purely Vegetable Pill.—The chief ingredients of Parlee's Vegetable Pills are mandrake and dandelion, sedative and purgative, and have a most healthful effect upon the secretions of the digestive organs. The dyspeptic and all who suffer from liver and kidney ailments will find in these pills the most effective medicine in concentrated form that has yet been offered to the suffering.

Nautical—"I hear Jones the sea captain is in hard luck. He married a girl and she ran away from him." "Yes, he took her for a mate, but she was a skipper."

When Your Eyes Need Care Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak, Watery Eyes and Granulated Eyelids. Murine is a natural product of the body, compounded by our Oculists—no "poisonous" medicine. Now recommended by the Physicians for many years. Now designated by the Public as "The Eye Remedy." 50c. and 10c. per bottle. Murine Eye Remedy Co., Chicago.

One interested listener an orator has in himself.

Minard's Liniment used by Physicians.

SIZES.
Lady (to shoe clerk)—"I should like to get a pair of shoes." What size?"
Lady—"Size three."

Clerk—"Yes, ma'am. Just let me measure your foot."
Lady—"But I told you the size." Clerk—"Yes, ma'am, but we have three sizes of size three—size three for a size three foot, size three for a size four foot, and size three for a size five foot."

Army statistics for last year show that there were only four foreigners in the British Army.

LATE LOCALS

Election is over.

Mrs. D. H. Keswick is quite seriously ill.

Dr. Beirsto of Lakeville was here yesterday.

George F. Burpee of Avondale was here today.

John N. Perry of Florenceville was at the Exchange on Wednesday.

W. R. Gillin and bride returned from their honey-moon trip today.

T. H. Frauley of Newport, R. I., was at the Exchange hotel on Tuesday.

Joseph Whiteley, piano-tuner, will be at Hartland and Centreville next week.

The last run of the corporation drive is at work at the piers of the bridge today.

T. A. Lindsay, inspector of the Manufacturers' Life Assurance Co., was here today.

The Legislature of Saskatchewan is dissolved and elections will be held on July 11.

Onslow Miller was called to Woodstock on Tuesday by the serious illness of his father.

A. B. Harmon and family came from Fort Fairfield by auto today and are guests at the home of O. A. Miller.

Charles Gillin has much improved the fronts of his houses on Depot street, brightening them up with paint.

R. B. Owens leaves today for a trip to Saskatchewan. R. V. Shaw of St. Andrews is acting-agent at the station in this place.

Rev. William Goss, lay-reader to Rev. A. S. Hazel, Woodstock, was in Hartland on Wednesday afternoon, making parochial calls.

An acetylene plant has been installed in the post office affording a splendid light. Large lights are placed outside each entrance.

Today a special train passed northward conveying in the private car "Metapedia" high officials of the C.P.R. who are on a tour of inspection.

Herbert Aiton who has been telegraph agent at the station for some time has been transferred to Debec and E. M. Morgan of Millville is here in his place.

H. N. Boyer still has on hand a few genuine bargains in second hand stoves suitable for summer kitchens. He will ship one to your railway station freight free. Write him.

The game of ball between the Hartland and Florenceville teams at East Florenceville last Friday evening resulted in a tie at the ninth inning. At the eleventh inning the score stood 5 to 4 in favor of Florenceville team. On Saturday a junior team came up from Woodstock and beat the local juniors.

Rev. H. C. Archer, of Woodstock, has gone to Beulah camp grounds to make preparations for the opening on June 26. The annual camp meetings will be from July 2 to 14. Rev. C. H. Babcock, of Portsmouth, Virginia, and Rev. L. N. Fogg, of Haverhill, Mass., will be the chief workers this year.

Noticeable at the polls today were an unusual number of aged men, some barely able to get about alone, others requiring assistance. Many of these, the majority of them, today cast their last vote; but this is not so gloomy a thought as that also among the voters were many men in the prime of manhood who will not vote again.

C. A. Fanjoy, who last April opened a store here, with Chipman Rockwell as manager, and who did a flourishing cut-price business for a time, suddenly departed last week. Many creditors are left to mourn. Charles Joseph purchased most of the stock and has moved it into the N. B. Telephone building where he is pretty well equipped for trade.

River Bank.

Several of our people attended the political meeting and the supper at Stickney Saturday night. All enjoyed it very much, especially the supper and the trip home after the supper.

Mr. and Mrs. Thomas Wakeling from London, England, have moved in the Thomas Vaughn house. They find the little town of River Bank rather quiet after the bustle and confusion of the great metropolis. We haven't even got our streets named only Main St., or houses numbered

yet. So when a new occupant takes up his abode in one of our vacant houses, we call it by the name of the last owner, hence the "Thomas Vaughn" house.

Not long ago I overheard one person say to another, as they drove by my door, "and this is River Bank." They seemed so surprised (agreeably) to think this was the place. The shade trees on main street are looking their very best. And our side-walk is always in good condition, thanks to our own River Bank government, eh?

Miss Gertrude Chase with Miss Reid of Bridgewater, Me., was visiting her sister, Mrs. F. D. Lovely, Sunday.

W. T. Hunter has got back from Montreal.

Moose and deer seem very plentiful even running up and down the main road, or street I should say.

Mrs. F. D. Lovely and Mrs. K. Ebbett were visiting at Stickney Saturday.

Miss Alice Rideout was calling on Mrs. H. C. Hunter last week.

Mr. and Mrs. John Young and their daughter, Myrtle of Woodstock spent Sunday with his sister, Mrs. C. M. Dow and Mrs. R. Long.

Mrs. C. J. Smalley and Herbert drove to Hartland a few days ago.

Mrs. James and Mrs. Henry Bell was visiting Mrs. Edward Vaughn, lately.

Mrs. Ben Tompkins was a caller at the "Hub" last Wednesday.

Edward Vaughn spent the week end home with his family, taking in the political meeting and supper at Stickney Saturday night.

We are glad to learn that Mrs. Gaynor of McAdam, formerly, Jessie Vaughn, is doing so well after going through a serious operation at the Woodstock hospital a few days ago.

Mrs. C. J. Smalley and Mrs. B. E. Tompkins was calling on Mrs. Jas. Brooks Sunday, also Mrs. Wakeling.

Each age of our lives has its joys. Old people should be happy, and they will be if Chamberlain's Tablets are taken to strengthen the digestion and keep the bowels regular. These tablets are mild and gentle in their action and especially suitable for people at middle age and older. For sale by all dealers.

Deerville.

Patrick Corbett was bargaining for right of ways, through this section, last week.

Mrs. Murray Anderson and daughter, Fernie, are visiting at Bath.

Fred Anderson was in Hartland on Sunday.

Mr. and Mrs. James Lipsett, of St. Thomas, and Preston Kirkbride were the guests of Mr. and Mrs. Samuel Buxton on Sunday.

Henry Gallivan is spending a few days in Johnville.

On Sunday Miss Elva Buxton returned to her school at Carvell.

Mrs. Chas. Gallivan and Dan Callahan were to Woodstock on Monday.

Lee McGuire of Lower Wakefield spent Sunday at John Anderson's.

The Deerville school is going to have a basket picnic on June 21. The young people of the district are going to give a play in the evening.

There is no real need of anyone being troubled with constipation. Chamberlain's Tablets will cause an agreeable movement of the bowels without unpleasant effect. Give them a trial. For sale by all dealers.

Florenceville.

Mrs. John Kearney of Woodstock, is spending a few days with her parents, Mr. and Mrs. Hugh McCain.

Miss Samuel McCain is now confined to her bed.

Herb Gordon of Winnipeg is the guest of his father-in-law, H. H. McCain.

Mr. and Mrs. Allen Watters spent Sunday with Mrs. Hayward.

Mr. Waller and family, moved last week to Waterville, Me.

Fred Ross who is teaching at Bloomfield, spent Sunday with his parents, Mr. and Mrs. Stephen Ross.

Mrs. Chas. Wiggins is spending a few weeks with friends in the village.

Rev. C. S. Freeman returned missionary from India, was the guest of H. H. McCain, to tea Sunday eve.

Miss Nevers of Coldstream, spent Monday with friends in the village.

Cut Worms and Army-Worms

Two species of caterpillar, the cut worm and the army-worm, have been considered by the officials of the Experimental Farms to be of sufficient interest to the crop growers in Canada to warrant the preparation of a bulletin upon them for public distribution. These two common enemies of crops are credited with causing every year damage amounting to a large sum of money, reaching in some seasons hundreds of thousands of dollars. They are both night feeders and are most destructive early in

the season when vegetation is tender and, therefore, easily eaten off. Clean cultivation and the encouragement of birds are recommended as factors in the control of cut worms. The distribution of poisoned bran and fresh clover is also advised where practical whenever the worms are detected. To check the progress of army-worms on march furrows with holes dug at intervals are said to be effective. This illustrated bulletin of 29 pages No. 3 of the Division of Entomology and No. 70 of the Experimental Farms, was prepared at the request of the Dominion Entomologist by his Chief Assistant, Mr. Arthur Gibson. It is published by Direction of the Hon. Martin Burrell, Minister of Agriculture. Copies may be obtained by applying to the Publications Branch, Department of Agriculture, Ottawa.

Warning to Potato Growers.

In regard to the comparative values of Bordeaux mixture and lime-sulphur for the spraying of potatoes, the following from the Farmer's Advocate of June 6th is of interest:

"After a careful test, made by the New York Experiment Station in 1911, it is concluded by the experimenters that, lime-sulphur solution cannot replace Bordeaux mixture as a preventive of potato diseases. The plants in rows sprayed with lime-sulphur were drawn by the fungicide, died early, and yielded about 40 bushels less to the acre than plants in check-rows; while the Bordeaux-sprayed rows produce 100 bushels to the acre more than the checks. Although the conditions were probably more suitable for the Bordeaux spray still the experiment conclusively proves it unsafe to use lime-sulphur on potatoes."

ASKING FOR DEATH.

Requests From Prisoners Which Stagger the Judge.

At the Norwich (Eng.) Assizes in the last week in January a prisoner, accused of the murder of his child, bluntly asked Mr. Justice Channell to pass the sentence of death upon him without a trial. The man pleaded guilty, and refused the judge's offer for counsel to defend him. Naturally, both the judge and jury, and not less the crowd in court, were astounded at such a request from the dock; yet the man was firm in his desire to be at once sentenced to the direst penalty known to the law.

In these rare cases a certain course is taken; and this course Mr. Justice Channell took. Medical witnesses were summoned to testify as to the condition of the prisoner's mind. Though there was a conflict in that evidence, it was found that the accused was in a fit state of mind to plead, and on that finding the only course open to the judge was to pass the sentence which the man himself had asked for.

Though extremely unusual, it is not unprecedented for a man to commit himself in the dock as this man. At Liverpool Assizes in the summer of last year a man accused of a sordid crime faced the judge with a very determined request, often repeated, to be at once sentenced to death without the long ordeal of a trial. He refused to be considered otherwise than as guilty, or to set up any defence or extenuation of his deed. Yet the doctor specially summoned to assist the judge with his expert testimony assured his lordship that the rationality of the man was beyond question. Ultimately the judge and to do as the prisoner had requested.

Almost as surprising, if not in exactly the same category, was the staggering request made to the late Mr. Justice Grantham at the Central Criminal Court, London, last year. A man named Charles Arthur actually asked the judge to order him what even the most hardened criminals dread—the "cat." Notwithstanding this request was made to escape some of the sentence of imprisonment for life passed upon him for shooting at a police constable—he asked the judge to give him a short term of imprisonment and liberal punishment with the "cat," in preference to the life sentence—it was a most surprising request, and has probably not been paralleled in an English court of law. It was not granted.

Max as Story Teller.

"The eternal progression of the imperishable soul," was one of a number of fine phrases let fall in the course of Mr. Max Pemberton's lecture on "Literature and Travel," given recently in London. Illustrating insular ignorance the lecturer told of a countryman who was shown some kangaroos at the Zoo. "What are these?" he asked. "Natives of Australia," was the reply. "Oh, heavens!" he exclaimed, "my sister married one of them!" An American lady who professed to be a reader said she knew Scott well. "Do you know 'Ivanhoe'?" asked a dour Scot. "That's fine!" she said. "The Lady of the Lake?" "Still better." "Quentin Durward?" "A great book." "Scott's Emulsion?" "The finest of them all!"

The following story was told by a judge to Mr. Pemberton just before he came to the City Temple. Two ladies being in Warwick Prison, the governor visited the cells, and said to one of the prisoners: "Of course, you will have to observe all the conventions of the prison." "Yes," she said, "but I wish to make a communication." She was told she must make it in writing. She replied: "It is an urgent communication, and I wish to make it before a witness." The governor sent for the chaplain and the doctor. When they were all in the cell, the prisoner said: "I want to tell you that no gentleman comes into a lady's room with his hat on!"

Cut Out

and mail us this ad. with \$3.00 and we will send you by freight, One Golden Oak Bedstead I Wovenwire Spring with soft-top mattress to fit, both 4ft. wide by 6ft. long.

Fine Illustrated Furniture Catalogue FREE.

Said the Architect — "I have specified B-H ENGLISH PAINT because I have found it the best, and the cheapest in the end. It costs less to apply—covers more surface—protects better—and holds the color longer. It is the 70% Pure White Lead and 30% Pure White Zinc Paint—an ideal formula. Then, too, it is guaranteed by BRANDHAM-HENDERSON LIMITED—and the guarantee is printed on the can. It is the kind of paint for your house, sir."
