Yet thousands of children and adults die every year through neglect of parents to attend to the early symptoms of bile and foul stomach.

Superfluity of bile may always be known by some unfavorable symptom which it produces, such as sick stomach, headache, loss of appetite, bitter riste in the mouth, yellow fitst of the skin, languidness, costurness, or other symptoms of a similar nature. Almost every person are at times bilious, the neglect of which a sure to being on some dangerous disorder, frequently terminating in death. A single 25 cent bot of Dr. Halsey's Gun-coated Forest Pills, are sufficient to keep a whole family from bilious attacks and sickness from six months to a year. A single dose, from I to 3 of these mild and excellent Pills for a child from 3 to 4 fer an adult, and from 5 to 6 for a grown person, carry off all bilious and morbid matter, at restore the stomach and bowels, curing and preventents. NOTICE TO THE PUBLIC. In 1845, Dr. Halsey's Fills were first made known to the public, under the denomination of "Halsey's Sugar Coard Fills." Their excellent qualities soon gained for them a high reputation, and the sannal sale of many thousand b.xes. This great success excited the avarice of designing men, who commenced the manufacture of common Fills, which they coated with Sugar, to give them the sutward appearance of De. Halsey and the surface of them under the good hand by curing thousands

(FROM OUR OWN-CORRESPONDENT.)

Bill for Postage Reduction — Mileage Reform in Congress—Land Reform—United States Coinage for the Past Year—The Culture in America—Bill for Reciprocity with Commercial Matters—Miscellancome.

New York, February 3, 1850.

A Postage Bill was offered in the Houne a few days since by Mr. Assumurs, of Massachusetts, which provides for a wariety of important regulations and reductions. Among other improvements, is the Abolition of the Franking Privilege. The aniform rate of Postage on half-ounce laters is recommended at Two Canya; more than a half-ounce, and not more than one ounce, four centr; two ounces, eight centrs; four additional, for every ounce of greater weight. These rates to be preplid; otherwise, the present rates to continue. The pistage of Congress to be paid out of a Contingent Fund, on the Abolities of Franking, under such regulations as seach House may prescribe for itself. Newspaper postage is not mingled with these provisions at all—but here the reform is not quite so urgently required. We shall have that presently.

At last, Congress has taken hold of the Mills and Franking, under such regulations as seach House may prescribe for itself. Newspaper postage is not mingled with these provisions at all—but here the reform is not quite so urgently required. We shall have that presently.

At last, Congress has taken hold of the Mills as a special contract of the state of the of

should be remedied. You will remember the buzz created in last year's House on the introduction of this subject by HORACK GREXIEV. It has, since then, excited great debate and high-toned excitement amongst the Hon. gentlemen who figured most conspicuously in the expose. Now, Mr. Swerter, a Member from Ohio, who owes his election to the "Mileage," reports to the House from the Cemmittee on that subject, a Resolution covering the "direct route" all along advocated by the friends of Greeley's measure. Should the Resolution ultimately prevail, it will save to the Treasury, yearly, over \$73,000, if applied to House and Senate—or \$52,326, if made available for the House alone.

But the most remarkable event of all, in the

toned excitement amongst the Hon. gentlemen who figured most conspicuously in the expose. Now, Mr. Swexferse, a Member from Ohio, who owes his election to the "Mileage," reports to the House from the Committee on that subject, a Resolution overing the "direct route" all along advocated by the friends of Greeley's measure. Should the Resolution ultimately prevail, it will save to the Treasury, yearly, over \$73,000; if applied to House and Senate—or \$52,326, if made available for the House alone.

But the most remarkable event of all, is the courrence of a debate in the Senate on the Farebon of the Public Lands, growing out of a Resolution presented by Sam. Houston, the states Senator. Land Reform in the United States Senate is an era in the history of that astute body; and that by the Representative from Texas. Verily! the world does nieve. Mr. Houston's Resolution—which he sustained in a very fair and straightfarward speech—looked to a grant of 140 acres of the Public Lands to every family, not landholders or owners of property, to the amount of \$1500, who are citizens of the United States; or to emigrants, who are now here, or may arrive previous to the 44th of March next. When these families shall have resided upon the land so granted three years continuously, erected buildings and cleared ten acres of ground, in the Burstings and cleared ten acres of ground, in the service of the property to the amount of \$1500, who are citizens of the United States; or to emigrants, who are now here, or may arrive previous to the 44th of March next. When these families shall have resided upon the land so granted three years continuously, erected buildings and cleared ten acres of ground, in the service of the propers to be from; and the preventage of the propers to the propers to the form and the preventage of the propers to the propers to the form and the preventage of the propers to the pr next. When these families shall have resided upon the land so granted three years continuously, erected buildings and cleared ten acres of ground, the proposition is that a patent shall issue from the Government therefor, free from all cost to the grantee. This was originally intended as an amendment to the former Resolution of Governor SEWARD, but that not being called up, Mr. Houstron thought proper to present his in an original form; and it is accordingly, before the Senate for consideration. This was on Wednesday, and the subject has not since been renewed.

The President's Special Message on California, with its accompanying documents, and the supplemental communications relative to the affairs of New Mexico, etc., have not yet officially appeared. They are, at any rate, of comparatively slight importance, unless taken in connection with other circumstances, to which I shall refer hereafter.

The total Cornage of the United States for 1849—as appears from the Reports from the four Millens, and Dahloug-a—amounted to Eleven Millions, on this — Honage Green the Millens, on this incerty One Million; or \$936,786, were Gold Dollars, the new coin. The deposits at all the Mints during the year smounted to over Fourteen Millions, of which better than Twelve Millions are in Gold. The Gold of 1847 was chiefly foreign, left for re-coinage; that of 1849 is mostly agrice—being an actual investage of our Gold cur-expect to see "signs and wonders," and to hear of Sonk is approaching, we may, believing Scripture, expect to see "signs and wonders," and to hear of Sonk is approaching, we may, believing Scripture, expect to see "signs and wonders," and to hear of specific properties agrice—being an actual investage of our Gold curforeign, left for re-counage; that of 1849 is mostly native—being an actual increase of our Gold currency, owing mainly to the heavy arrivals from California. The aggregate of California Gold brought to the United States Missts since its first discovery, has so far been \$6,191,696; and every steamer furnishes a fresh supply. When shall we have the Mint in New York, where it should have been located at the outset?

An interesting experiment on the culture of the Tee Plant in America has been some months on trial in South Carolina, in the hands of a Mr. Junius Smith. We have accounts from his "Golden Grove Plantation" which warrant a belief that eventually the culture of that plant may be made to succeed here. If so, there will be another revolution in the channels of Trade; quite distant enough at present to preclude any degree of serious contemplation.

A Bill establishing Reciprocity with Canada was reported to the House of Representatives at Washington on Tuesday last, of which I annex a copy. It is the same as that of Mr. Grinnell of 1348, which was entrasted to Gen. Dix and not acted upon in the Senate. It is now brought forward by Mr. McLean, of Maryland, Chairman of the Committee on Commerce, and is as follows:—

THE POWER OF BEAUTY.

First or the train that tempts the longing eye,
For beauty's self, majestic queen we spy;
Whether in man or maiden's form adored,
Still mightler than the sceptre or the sword.
This ravshed him who wak't the world's alarm,
Subdued his heart and nerveless made his arm,
Thus Alexander knelt at beauty's shrine,
And Anthony felt Cleopatra's charms divine;
Celestial beauty—daughter of the skies,
Fair-skinned, rose-cheeked, and lily-necked arise!
Tell each poor mortal who for thee would hope,
Try Radway's Chinses Medicated Soa?!
This, this alone! each form will purify,
And make the uglicst handsome to the eye!
This for pimples, tetters, blotches, rheum,
Will bunish all before its rich perfume;
No ring-worm, scurf, mesquito bites, nor Tan
Can stay its force on face of maid or man,
But all who test it will, at Radway's Soap is truly a friend tothose who wish for beauty's glow divine—it imparts
health, sweetuess and elusticity to the shrivelled skin, and
beauty to the dark, asilow complexion—emoves pimples,
blotches, pustules, letters, rash, sun-burns, chops, chafes,
and rough skin.
The most deficious Soap in the world is Radway's Medicated Soap, it instartly removes all reduces and other ananying spots from the skin. For Shaving, Toulet, and
the Nursery, it is the ne plus ultra of its kind.

[Comparative Statements of the Rates of Premium adopted by the various Life Assurance Companies transacting business in Canada have, from time to time, appeared in the public prints, placing the Colonial Company, in some instances, at an apparent disadvantage with other Companies. Lowness of Premium of itself is but a poor criterion of the stability or standing of a Life Assurance institution, or of the advantages to be derived by Assuring with it. The Statements, moreover, though attractive at first sight, ought surance institution, or of the advantages to be derived by Assuring with it. The Statements, moreover, though attractive at first sight, ought not to go for much. The example selected for comparison is invariably taken at the Age and from the perticular class of Rates most feworable to the Company advertising. Were an energe of the Rates selected, the comparison would often show a very different result. Without meaning to attach much weight to the fact, nevertheless it may be remarked, in proof of the fallacy of these Comparison Statements, that the average Rate of Premium on the Participation System, on which searly four-fiths of the transactions of the Colonial Company are based, is lower than the average under a similar class of Rates of the great majority of Companies transacting business in this Country. The Rates of the Colonial Company have been most carefully framed from the best statistics that could be procured—(statistics which, it is believed, are far more perfect than are in the possession of any other office.) They are as resonable as present information justifies; and until some good ground is afforded for making a change, either from fuller statistical information than as at present in existence, or from an experience much more extended than that which has already been obtained, the Directors will rigidly adhere to them, being resolved not to enter into a dangerous competition for business by lowering their Rates, in order to outbid others, but to do either a safe business, or none at all.) ness, or none at all.]

They are entirely composed of extracts from rare
and powerful plants, the virtues of which, though
long known to several Indian tribes, and recently
to some eminent pharmaceutical chemists, are alteguither unknown to the ignorant pretenders to
medical science; and were never hefore administered in so happily efficacious a combination.

The first operation is to longen from the coais of
the steinach and bowels the various impurities and
crudities constantly settling round them; and to
remove the hardened faces which collect in the
convolutions of the small intestines. Other medicines only partially cleanse these, and leave such
collected masses behind to produce habitual Costiveness, with all its trein of evils, or sudden Diarrhon
with its imminent dangers. This fact is well
known to all regular anatomists who examine the
tuman bowels after death; and hence the prejudice of these well informed men against the quack
medicines of the age. The second effect of the
VEGETABLE LIFE MEDICINES is to
cleanse the kidneys and the bladder; and, by this
means, the liver and lungs, the healthful action of
which, entirely depends upon the regularity of the
urinary organs. The blood, which takes its red
color from the agency of the liver and lungs, before
it passes into the heart, being thus purified by them,
and nourished by food coming from a clean stomach,
courses freely through the veins, renew every part
of the system, and triumphantly mounts the banner

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infal-

lible:
DYSPEPSIA, by theroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and sorid kind; FLATULENCY, Lose of Appetite, Heartburn, Headische, Restlessness, Ill-temper, Anxiety, Languor, and Melancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.
Costiveness, by cleansing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the bewels costive within two days.

the intestines with a sortest process, and where violence: all violent purges leave the bowels contine within two days.

Distributes and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by premoting the lubricative secretion of the mucous membrane.

Powers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others.

The Live Medicians have been known to cure RHEUMATISM permanently in three weeks, and GOUT in half that time, by removing local inflammation from the muscles and ligaments of the joints.

Dropsies of all kinds, by freeing and strengthening the kidneys and blodder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the bowels the slimy matter to which these creatures adhere.

of the bowels the slimy matter to which there or attree adhers.

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseases.

Scury, Ulears, and Inveterate Scres, by the perfect purity which these LIFE MEDI-CINES give to the blood, and all the humors.

Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all eruptive compluints, sallow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a

striking improvement in the clearness of the skin.

FILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself affilicted with this complaint for upwards of white the valuable Medicines was himself affilicted with this complaint for upwards of white very remedy prescribed within the whole compans of the Materia Medica. He however at length tried the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was curied in a very short time, after his recovery had been two-neunced not only improbable, but absolutely limposible, by any human means.

PEVER AND AGUE For this accurge of the western country these Mediciaes will be found a safe, speedy, and certain remedy. Other medicines heave the system subject to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SATISFIED, AND BE CURED.

Bilious Fevers and Liver Complaints.

General Debility, Loss or Appetrs, and Demans of Females—these medicines have been used with the most beneficial results in cases of this description — Kine's Evil., and Schonysta, in its west ferms, yields to the mild yet powerful action of these remarkable Medicines. Name Sweats.

NERVOUS DESELTY, NERVOUS COMPLAINTS of all kinds, PALSTTATION OF THE HEART, PALSTER COLIC, are speedily cared.
MERGURIAL DISEASES.

Persons whose constitutions have become impaired by the injudicious use of Manouray, will find those Medicines a perfect oure, as they never full to eradicate from the system all the effects of Mercury infinitely sooner than the most powerful proparations of Sarauparilla. A single trial will place them beyond the reach of competition, in the astimation of every putient.
