The copy filmed here has been reproduced thanks to the generosity of:

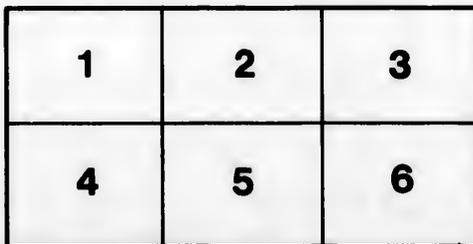

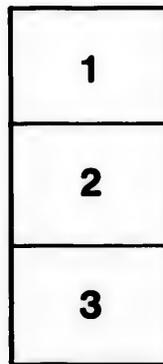

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

REPORT
OF THE
BOARD OF INSPECTORS
OF THE
PROVINCIAL PENITENTIARY,
FOR 1838.

The Board of Inspectors of the Provincial Penitentiary, near Kingston, in submitting herewith for the information of His Excellency the Lieutenant Governor, the annual returns of its proceedings during the fiscal year, ending October, 1838, and which many unavoidable circumstances have heretofore delayed, would most respectfully beg leave to observe, that the various Documents marked from A to K, together with the Warden's Report, and those of the Chaplain and Surgeon, embrace so ample a statement in detail of the several matters connected with its management, as to need but little comment at their hands. There are, however, some questions bearing on its Finances that require something more than a passing remark, as the Board have had some difficulty in meeting the demands, from the circumstance of the last annual grant falling so far short of the amount estimated for its support. It may seem from Document G, that the estimate for the support of the Establishment for the present year is unusually large; but when the present state of the Institution is duly considered with reference to Documents L and M, it will be at once seen that the gain to the Province, in the actual value of the Buildings now in course of erection, and absolutely necessary to its success, does not fall far short of the several grants made by the Legislature for

its support, and the Inspectors are of opinion that if the like work had been done by contract it would have cost a much greater sum ; it is moreover essentially necessary that whilst so large a portion of the available labour of the Convicts is applied in the erection of the Buildings required by the improved system of arrangement that the annual appropriations should at least be commensurate with the unavoidable expenses of Materials and Superintendence, with the salaries of the officers of the Institution.

The erection of an outer wall around the establishment is also an object of the greatest importance, and which the events of the last twelve months have brought prominently forward, shewing that it must not only embrace security against the escape of the Convict from within, but sufficient to repel danger from without—the Inspectors having reason to believe that the liberation of the Convicts formed a part of the plans of the disturbers of the peace of the country. The fear of this has been a cause of the greatest anxiety to the officers in the immediate charge of the Penitentiary calling for their utmost vigilance ; increasing very materially their ordinary duties, and the relief afforded by extra night guards has added considerably to the general expense ; an especial appropriation would appear to be required to meet this emergency, seeing by the Warden's Report that by Convict labor it could not be effected under a period of two years at least.

The Inspectors, keeping in view the spirit of the Resolution of the Honorable the House of Assembly, that in the employment of the Convicts, their labor might not be brought into injurious competition with the Artizan and Tradesman, have had under their consideration the

propriety of establishing a Rope work and Duck factory ; manufactures which they conceive can be carried on to an advantage by Convict labor,—would interfere with no present vested interests, and might be made subservient to the Agriculturist, by promoting the cultivation of Hemp in the country.

The Board would most respectfully ask the attention of His Excellency to that part of the Warden's Report soliciting a supply of the printed documents of the proceedings of the Institution, to enable them by an exchange with similar establishments in other countries to ask for the results of their experience, in the management of the great objects sought to be obtained by Penitentiary discipline.

All of which is most respectfully submitted,

JAMES NICKALLS,

President of the Board of Inspectors.

Kingston. March 15, 1839.

To the Inspectors of the Provincial Penitentiary :

GENTLEMEN,

Since my last annual Report 105 male and 6 female Convicts have been received into the Penitentiary, being an increase of 40 above the number of prisoners received in the preceding year. Of these, seven male convicts are under second convictions, whose previous sentences did not average more than seventeen months, a term that has been found by experience too short on which to effect any lasting improvement in the habits of men who have lived in the commission of crime.

The return marked A, will shew the number of convicts received into the establishment from the several

Districts during the last fiscal year, together with a statement of the crimes of which they have been found guilty, and the terms of their respective sentences.

The number of prisoners discharged from the Penitentiary during the preceding year is 80, of whom

Sixty-six	were by expiration of Sentence,
Ten	“ “ Pardon,
Four	“ “ Death,

A statement of which is given in the Return marked B, containing a full description of their persons, the Districts in which they were tried, the crimes for which they were convicted, and the terms of time for which they were severally committed.

In my last Report I stated that the prisoners on their liberation were subjected to certain questions in order to ascertain from them (so far as dependence can be placed in their statement) the advantages derived from the system of Penitentiary discipline in the punishment and reformation of convicts.

This practice has been continued and with the like results.

In the return marked C, will be found a statement of the convicts in confinement on the 30th September last, with an account of their crimes, date of sentence, term of imprisonment, and the District from which they were sent. From this it appears there has been an increase of 36 convicts above the number stated in my last Report, of whom 19 were for the crime of High Treason. The average number of Prisoners for the last year was 105, and that during the present is 153, being an increase of rather more than 45 per cent over the year preceding. The total number of prisoners received into the Institution since the prison was opened, in the

year 1835, is 280, of which 8 are under sentence of second convictions.

During the past year the conduct of the prisoners has been generally good, and notwithstanding the great increase in the number of convicts received, the punishment which it has been necessary to inflict has not exceeded the average proportion of last year, when the number of prisoners received was far less, a sufficient proof that the discipline of the Institution is still in a state of improvement, as it is generally found that a greater share of punishment is unavoidably inflicted upon those recently received into confinement than upon convicts who have been longer in prison. There have been some few attempts to escape, the idea of which has no doubt been suggested by the apparent insecurity of the fence, the scaling of which would be of easy accomplishment, were there not other precautions taken, as well for their safe keeping, as for discovering their absence.

The labor of the Convicts since last spring has been principally devoted to the erection of the East Wing, and the completion of the Roof and Front of the North Wing. The walls of the former, which were only commenced in the month of May last, are now carried to their proper height, with the exception of the Cornice, which it is intended to complete next year, the stone for which will be prepared during the present fall and ensuing winter. As the number of cells in the South Wing will, in a very short time become too limited for the reception of the Convicts who may be sent here, it was absolutely necessary that the building of the East Wing should be commenced, for had it been longer delayed it would have been impossible with the small

number of prisoners whose labor could be appropriated to this purpose, to complete it before it would be required for the reception of Convicts.

In the statements of work done by the Convicts since my last Report, it will be seen that as much as possible has been devoted to the support of the Institution, although but a small amount in proportion to the annual expenditure of the establishment. The building operations and other works carried on at the Penitentiary during the present year have been performed altogether by the labor of the convicts, whose proficiency in their several trades is such that the work performed by them is of the best description.

The Return marked D, contains an account of the value of the labor of the convicts during the past year, describing what amount has been devoted to the building and support of the Prison, and how much has been earned by the convicts who have been employed in the manufacture of articles made for sale. From this statement it appears that the labor of the prisoners during the last year exceeds that of the preceding by 4 1-4 per cent. per man.

The Board having directed that the labor of a certain number of convicts should be set apart for making shoes and boots for sale, a large quantity of these articles has been manufactured which will no doubt meet a ready demand during the ensuing winter, as they are of a description more properly suited to that season.

The principal work to be performed during the present fall, should the season continue long open, will be the excavation for and building of the main drain, a work which is much required as it is so essentially necessary to the health and cleanliness of the prison.

of th

Much of the labor of the convicts during the ensuing year will be required in fitting up the North Wing, the lower floor of which is particularly required for the kitchen and dining hall, the present use of the areas in the South Wing, for the latter purpose being found to be extremely inconvenient, and the positions of the convicts at the dinner table, as at present arranged, do not afford that facility of oversight which is desirable.

The Cells of the East Wing, the building for which it is proposed shall form part of the work of the convicts next year, will not probably be fit for occupation until the summer of the year after next, by which time, should the number of convicts increase in the same proportion as they have done during the past year, the South Wing, which at present is the only one fit for the reception of prisoners, will not be sufficient to contain those that may be sent to the Penitentiary.

The gradual decay of the present wooden fence as well as the safe keeping of an increased number of prisoners, will soon render it necessary to commence the building of the boundary wall work, which, if performed by the labor of convicts, will require at least two years in its performance, as the number of men who can be employed as masons will be too few to complete it in a shorter period.

Before the labor of the convicts can be rendered available for the maintenance of the Penitentiary, it will become necessary to build the shops as originally designed in order that the various branches of trade in which the convicts are to be employed may be successfully carried on. The only buildings so used at present, exclusive of the stone shed, are the carpenter's, blacksmith's and

shoemaker's shops, which are put up in a slight temporary manner, and the two latter will soon go to decay.

Some proportion of the labor of the convicts is continually required for the immediate purposes of the prison. Several are employed in sweeping and cleaning the buildings, and providing the daily meals, besides those who are engaged in making and washing the clothing. The occasional making and repairing of prison furniture and utensils, also requires the employment of several of the prisoners during the year.

Until the buildings which are now in progress of completion, and the shops which it is intended to be built, can be finished, no amount of the labor of the convicts of any consequence can be devoted to the support of the Institution. To accomplish so desirable an end it would require the constant labor of at least two hundred convicts to be set apart for that purpose.

The increased price of the necessaries of life has caused a corresponding advance on the cost at which the provisions are now furnished for the support of the convicts.

The rations are divided into three classes, two of which supplied are at the rate of $8\frac{1}{2}$ each, and the third at seven pence three farthings, making an average of seven and *twenty-seven twenty-eighths of a penny* per day. A diet table agreeable to the scale recently adopted by the Board, is hereunto appended.

The disturbed state of the country during the last winter having required increased watchfulness for the protection of the Penitentiary, every precaution was taken to put the establishment in as fit a state of defence as the means placed at my disposal would admit. The duty on the part of the officers for several weeks was

such as to require their services by night and by day, but this duty becoming too burthensome and of a nature to unfit them for the proper discharge of their more appropriate services during the day, it was deemed advisable by the Board to employ an extra guard for the special purpose of attending to the outward protection of the Penitentiary by night. The number of men employed in this particular duty has been latterly reduced, and it would not perhaps be prudent to discontinue their services until a military guard be stationed in this neighborhood, which it is to be hoped will soon be the case, as a guard-house and barracks sufficient for the accommodation of forty men have recently been erected on the Penitentiary ground by direction of the Commander of the Forces. The presence of the small detachment of Militia, which was for a short time placed here, was found to be particularly serviceable, and had it been continued from the time the guard-house was completed, it would have saved the expense necessarily incurred in continuing the extra night guard.

By reference to the Inventory of Goods, materials, and other property on hand, it will be seen that the greater part of the tools and other articles in use at the Penitentiary, have been made by convict labor.

The statement marked G, describes the particulars of the estimate of the sum required for the support of the Penitentiary for the ensuing year. This amount appears larger than that of former years, but is not greater than is necessary to complete the buildings at present in an unfinished state as well as to maintain the convicts and pay the officers and others engaged in carrying on the discipline of the Institution. The sum voted by the Legislature at its last Session was £1377 2s. 1d. less than the estimate laid before Parliament.

This deficiency, together with the additional expense of building the East Wing this year, for which no estimate was made, and the extra disbursements arising out of the disturbed state of the country have created a debt against the Institution amounting to £1794 1s. 7d. including three months pay to the officers and guard of the establishment which at present there are no means of discharging as the funds of the Penitentiary are exhausted.

By the Statute 4th Wm. 4, c 37, I am directed to preserve in the Penitentiary at least one set of copies of all official Reports made to the Legislature respecting the same, for which purpose a suitable number of such Reports when printed were to be supplied to me. These printed copies have never been furnished, and although copies of the same are carefully preserved in the Books of the Office, the want of a supply of the printed documents has hitherto prevented me from obtaining much valuable information in regard to matters connected with prison discipline, as I am unable to exchange Reports with the officers of similar Institutions in other countries.

An account of the various employments in which the convicts were engaged at the close of the last fiscal year will be seen in the Return marked H.

I beg also to lay before the Board my yearly general Accounts of Receipts and Disbursements on account of the Penitentiary.

The Documents accompanying this Report are as follow, and are severally marked as stated against each, viz :

been made : still there is some encouragement to proceed in an undertaking accompanied by so many disappointments and difficulties ; for if even only one out of every fifty should be reclaimed, this would authorize the continuance of increased exertion in behalf of the rest.

The fact, that several re-committals during the year now ended have been registered, may at first serve to call in question the utility of the Institution ; but when the obduracy of the heart, enslaved for years, (and in many instances from childhood) is considered in connexion with the shortness of the term for which they were imprisoned, all doubts respecting the successful working of the establishment must vanish. Besides the very circumstance that so very few have returned, out of the number discharged, is itself a decided proof, that some good has been effected.

The experience of the last year has satisfactorily proved, that a short sentence tends only to harden the heart and produce a repetition of crime ; for how can it be otherwise ? The prospect of a speedy liberation, alleviates the punishment, banishes reflection, by bringing before the mind the *scenes* of riot, so gratifying to their nature, and even encourages them to form schemes which feed their passion, and render them, when released, a far more terrible scourge to society. If the evil habit, whether it be of drunkenness, theft or idleness be not entirely broken, no change of heart *can* take place. I do not mean to say, that long sentences will entirely break the habit, and prevent a recurrence of crime, but that if good is to arise from the Penitentiary system, the object is more likely to be attained by long rather than by short sentences.

There exists a very serious evil, which ought, if possible, to be remedied; an evil, which acts very unfavorably to the growth of those improved habits, which may have been acquired within the Penitentiary. It has happened frequently during the past year, that many convicts have been released, upon the expiration of their sentence, within a short time of each other, and have remained in the town. Independently of the danger to which society may be exposed from the union of these men, it is evident that temptations will arise peculiar to their situation; the well disposed become a prey to the designing through fear of exposure, and this is a very powerful instrument when wielded by a base mind. They are induced to yield to their invitations to frequent the public house, under the hope, and with the inward feeling that no further temptation awaits them; but, when once the poisonous draught is tasted by those, who were previously addicted to intemperance, then the seeds of reformation are scattered to the winds, then the door is opened for a fresh commission of crime. It moreover seems natural for convicts, upon finding themselves in possession of liberty, to celebrate their freedom from confinement, in the first public house that lies in their path. There is a possibility, if not a probability, that if one convict at a time were discharged, he might elude the temptation which might otherwise overcome him. I have seen the ill effects of this association and have the testimony of a convict, who left the prison with a thorough determination to walk uprightly, but being waylaid by others, whose hearts were only hardened by their temporary deprivation of "liberty," was unable, from the absence of a confirmed principle, to withstand the jeers and seductions of his companions.

To this short indulgence he attributed his downfall ; I need not say, that now he is a drunkard.

As regards the duties of my office, I have endeavored to impress upon the convicts the absolute necessity of an acknowledgment of their guilt, the *justice* of their punishment, as well as an undeviating *conformity* to the rules of the Institution laid down for their observance. Many, who at first boldly denied their guilt, have, upon reflection, made an ample confession, and acknowledged that punishment was not awarded according to their deserts.

I cannot complain in the least of the want of attention given to the word preached, or to advice offered for their consideration ; the chief cause of discouragement is, that so little profit has arisen. When in confinement, there seems to be something like enquiry, about the way, in which they should walk ; but so soon as all restraint is laid aside, and they become masters of their own actions, then vanishes speedily, in too many instances, the pleasurable prospect of a renewed spirit. The number admitted during the last year was 110 ; 80 have been dismissed, the re-committals have been seven, three of these under very aggravated circumstances.

In the majority of cases, the commission of crime is to be assigned to the want of religious instruction in childhood ; in very many instances evil habits have been strengthened by the immoral conduct of parents and guardians ; some have been thrown upon the world without a friend to counsel, and have unfortunately fallen into company, the very hot-bed of sin ; some disliking wholesome parental restraint have unhesitatingly yielded themselves up to licentious living ; some by indulging their lustful passions have attempted the most brutal deeds ; some by suffering *anger* to overcome rea-

son have been driven unwittingly to imbrue their hands in the blood of their fellows. The love of change, the encouragement of seditious meetings and the attempt to revolutionize, have increased the number of the Penitents; and the very means adopted for the suppression of Rebellion, have also contributed to swell the lists of the Prison. The enrolment of militia has produced crime; as sedition ceased, idleness ensued, and with it entered the prolific cause of evil, Drunkenness.

The *discontinuance* of the School, though a matter of *expediency*, is nevertheless a subject of regret. The numerous applications daily made for instruction afford a gratifying proof of the deep interest, which a desire for learning has excited.—And indeed what greater blessing can there be than a privilege of perusing the word of God, which proclaims the plan of salvation to the sinner? What can tend so effectually to alleviate the misery of silent solitude, as the undisturbed meditation of the wonders of redemption? This is a privilege to which the veriest outcast is entitled; as spiritual knowledge is the only means, whereby we may hope to reform the immoral. If it be true that knowledge is power, what mighty moral effects may be produced, if that knowledge be communicated to the convict, which will enable him both to discern the evil which disturbs his breast as well as discover the antidote. It is to be hoped that circumstances will soon allow the re-opening of the School on a more secure and approved plan.

Upon the whole, the friends of morality have no cause for complaint or despondency, if the extent of reformation meet not their utmost wishes; the attempt has been made, the opportunity has been afforded the culprit to consider his ways; if he has not encouraged reflec-

tion, if he has wilfully rejected the means whereby a change might reasonably be expected, his blood then rests upon his own head—a wide and daily extending field lies before us, which will require on our part increased exertion; disappointment after discourages a further effort; but the consideration, that it is not the will of *Man*, but of *God*, which bends the stubborn heart into subjection, bids us proceed, with the assurance, that in due time we shall reap, if we faint not.

W. M. HERCHMER.

15th October, 1838.

SURGEON'S REPORT.

GENTLEMEN,

I have the honor to report that I have visited the Prison, either in person, or, when unavoidably absent, by the proxy of a qualified Medical Practitioner, daily, since my last annual report. Indeed, as I have noticed in my previous report to you, the disposition to "malingering" amongst the Convicts is so great, that were not the visits of the Medical Officer known to be certain and daily, constant advantages would be taken of his non-attendance; and the discipline officers of the establishment would be constantly perplexed, as being liable to imposition by candidates for the sick list, who have often no other object but a temporary respite from labor. By the vigilance and discrimination of the Medical Officer of such an establishment as this, much impo-

sition may be prevented, and a corresponding quantum of valuable labor secured for the public.

In my two former reports I submitted at some length my views of the duties of the office which I hold; since then I have seen no cause to alter my opinions.

I hereto subjoin two returns—one, of the Patients treated in Hospital, and another of those not so admitted. By the former, it will be observed that *three* deaths have taken place during the year. Their cases have been recorded, as well as those of all other Hospital patients, on the Register, together with a post mortum report of each.

In the latter return will be seen a list of 811 distinct applications for medical aid, by what are termed "cell" or "out" patients. In my last year's report, I stated my reason for not admitting to Hospital, any but those laboring under affections of the more serious nature. Of the diseases detailed in this return, many are of a species visible and demonstrable: while many others are of such a kind, that the assertion of the applicant is oftentimes the only evidence of their existence; and doubtless, successful deceit has frequently been practised on the Surgeon, while on the other hand it is confessed that more than once it has occurred, that applicants have been treated with suspicion, whose diseases in the sequel assumed a serious aspect.

I have the honor to be,

Gentlemen;

Your most ob't. servant,

JAMES SAMPSON,

Surgeon, P. Penitentiary.

Kingston, October, 1838.

No. 1.

Provincial Penitentiary,
1st October, 1838.

Henry Smith, Warden, and Francis Bickerton, Clerk of the Provincial Penitentiary, severally make oath that the foregoing "Return of the Property of the Province, on hand at the Provincial Penitentiary, 1st October, 1838," is correct and true, in every respect, to the best of their knowledge and belief.

H. SMITH.

F. BICKERTON.

Sworn before me, at Kingston, }
this 3d day of November, 1838. }

JAS. SAMPSON, J. P.

G.
