

# The "Fraternal Monitor" Discusses the I. O. F.

## ITS GREAT FINANCIAL STRENGTH COMMENTED UPON.

We publish below an article called "A Glance at the Independent Order of Foresters," published in The Fraternal Monitor of April 1, 1904, the leading independent insurance journal upon this continent.

### A GLANCE AT THE INDEPENDENT ORDER OF FORESTERS.

Although founded in 1874, the Independent Order of Foresters really began its work in 1881, when it was reorganized by the present leader of its forces, Dr. Oronhyaktha. Its history, therefore, is practically only twenty-three years. It is instructive to glance at the results which it has achieved in spite of very considerable difficulties which it had to encounter.

This order has probably been attacked more than any other of the reputable societies. The reason is to be found in the facts:

- (1) That its leader was a fearless foe, never sparing in his blows to his opponents, and
- (2) That under his guidance the Order pursued a very vigorous and aggressive policy and has, therefore, come to be looked upon as a captain in the forces of fraternalism.

A society with such a man as its fighting hawk at its head might be expected to occupy just such a place. It is fair, however, to say of the Supreme Chief of the Foresters that, while he has battled for his order first, he has nevertheless done it in such a manner, and with such ability, that his victories have been victories for the general cause, and have inspired the fraternal forces everywhere with fresh determination and vigor for the struggle in which they are engaged.

The history of the twenty-three years of the Order demonstrates the value of the application of careful medical tests. The Foresters have sometimes been criticized because of the severity with which their supreme medical board has dealt with applicants, but the Supreme Physician seems to have gone on the idea that he owed nothing to the applicants but everything to the Society, and, therefore, felt that even at the expense of growth, it was his duty to keep down the death rate. We notice that, in 1882, the deaths per thousand in the I. O. F. were 11 and in 1885 they were 7.75. Never since the latter year has the death rate been as high as even 6.75 in the thousand, and only in seven different years of the eighteen has it reached 6.00. In 1902 it was less than in 1901, and in 1903 slightly less than in 1902, being 5.46. In considering these figures it ought to be remembered that this Order accepts applications up to fifty-five years of age, a maximum considerably higher than that adopted by many of the societies and, therefore, to be taken into account when comparisons are made.

It is, however, in the creation of a reserve fund that the I. O. F. stands out in such bold relief among the fraternal societies. In this matter it is only just to say that its example has been a powerful factor in influencing the different orders to abandon the hand-to-mouth system. At the beginning of 1882 the total assets of the I. O. F. were \$2987.83. It is almost incredible that this small sum has been increased year by year until at the beginning of 1904 it had reached the enormous total of \$7,453,000. To say that this result has been a surprise and disappointment to the old-time enemies of this Order is unnecessary. Indeed we may be pardoned if we express the thought that it is a result achieved not without surprise by the leaders of the Order. They were laboring with the hope of securing good results, and their methods proved perhaps even better than they had anticipated.

However that may be, it is safe to say that the piling up of this enormous sum by the Order has been a constant inspiration to the different societies to persist in their efforts to get together a respectable emergency fund.

The table giving the increase in the I. O. F. funds from year to year reads almost like the story of the blacksmith and his "penny per nail" price, with the privilege of doubling at each nail. It will be of general interest to fraternalists to have before them the figures recently published by the Order in tabular form and giving the increases which have been made in the different years. We therefore insert the table here:

It will be noticed that in 1903 the unprecedented addition of over a million and a quarter dollars was made, or an increase per every working day of the year of considerably over \$4000, while the Society paid out in death claims, sick, funeral and disability benefits during the year, for each working day, only about \$6000. We confess to a good deal of toleration for the jealousy that such results create—not because we are not delighted that the Foresters have been able to accomplish this marvelous result, but because human nature does feel somewhat for the smaller individual in the fight.

**ASSETS AND LIABILITIES.**  
The 1903 record of the Order shows that the insurance at risk has increased only 4.97 per cent. and the assets 19.75 per cent. We should think that the membership will view such a result with profound satisfaction, and that with even still greater satisfaction they will note the fact that the assets of the Society, per capita of its membership, is at the present time double what it was ten years ago and more than triple what it was twenty years ago. These figures, taken in conjunction with the death rate, which, as shown above, is much less than it was some years ago, and which has been practically stationary for a number of years back, shows a wonderfully improved and constantly improving position.

While the Order is occupying several foreign fields, its chief strength is in Canada and the United States, and from what we can gather from widely different sources, the membership is loyal to the Supreme Executive, and active in the efforts to extend the Order. We congratulate both management and membership upon this fact, as well as upon the splendid position which the Order occupies among life insurance institutions.

# WHY NOT ASK FOR MORE SECURITY FOR \$500 LOAN

## Mr. Whitney's Sarcastic Comment on Premier's "Bookkeeping Extravaganza."

### ALLIANCE WORKERS CALLED TO CONSIDER SITUATION

#### Position "Critical and Serious, The Encouraging" and Supreme United Effort Asked.

Premier Ross moved the second reading of the \$500 guarantee bill yesterday afternoon, fully explaining the chief features of the contract. At the same time there was laid on the desks of the members a return of documents relating to the Lake Superior enterprises. The premier traced the progress of the \$500 and dwelt on the supreme importance of the province of having the vast enterprises which were the outgrowth of F. H. Clergue's genius restored to their former greatness. He informed the house that the actual expenditures on all the industries at the \$500 totalled \$28,259,177.06, and that it seemed to be a sure thing that with the credit of the province behind the re-organized company it should be able to secure capital to put the works on their feet again. The cause assigned for the smash was the financial depression only in the States, the capitalists who had invested their money in the company being squeezed so tight that they were unable to meet any further demands to furnish the necessary grease for the machinery.

**Speyer's Making Money.**  
Coming down to to-day, the Speyer Company were paying out \$40,000 a month in wages in the plants they are operating, and the premier was informed that they were making the industries pay. The liabilities of the old company are these:  
Speyer & Co. mortgage, \$5,000,000.  
Secured and unsecured creditors, \$2,390,708.98.

Some of these creditors are secured by collaterals and liens upon certain parts of the property. There is a lien on some of the coal and nickel on hand, and on parts of the machinery, and some of the creditors are willing to postpone payment a year beyond the time their claims would become due. These amount to \$588,285, so that Speyer & Co. have to provide \$1,804,423.35 for claims that must be met immediately. Must Have Eight Millions.

It is proposed that the company shall have a million of working capital, and \$100,000 for incidental claims beyond the ones provided for. In order to provide for this the re-organized company must have \$8,504,423.35. That will pay the Speyer loan, pay the banks for wages advanced on the authority of the government, discharge the Foley loan the Algoma Central, and remove all other liabilities pressing.

The government was confronted with the question whether it would be in the public interest to assist the company of the industries to lapse. The American capitalists who had invested their money had done so only for their own enrichment but for the benefit of the people of the province as well. It would be to encourage future investment of American capital, the government felt that the industries should be revived.

### Policy of Government.

It was the policy of the government to spend large sums in railway development in New Ontario, and in assisting the Algoma Central. This demand it had two objects in view: To add to the value of the timber and the minerals, and to secure the future of the province. The construction of the railway had already brought revenue to the province. Similarly the development of the nickel mines was a good thing. Have we not an interest in pushing the Algoma Central to the C. P. R. and the other railway lines to the east of Lake Superior? If the railway is helpful in promoting the industries that are the basis of additional support. The industries are subsidiary to the railway. The steel plant, the most important of all, cost \$2,000,000 and it will require \$100,000 to put it again in operation. The plant had shown its efficiency, and three great systems were under way. Mr. Whitney interjected: Is it a fact that a large quantity of rails was rejected by McKenzie & Mann because of the quality?

That was disputed, Mr. Ross said. He enlarged on the importance of the steel rail industry and said if it were not for establishing a precedent the province would be justified in giving a bonus to the enterprise.

### Protection Not a Bonus.

"Don't give a bonus, give protection," observed Hamilton's Carcalan. Mr. Ross approved protection, and went on with his story. The rail will be in a position to turn out 100,000 tons a year. This demand is 200,000 tons and the railways have to go to Belgium, Germany and Great Britain. Following the manufacture of steel rails would come the manufacture of structural iron.

"As a business proposition it is attractive in every aspect. Eight millions have to be provided, and we contribute only 25 cents on the dollar, and our security is such that it is absolutely certain that every cent will be returned."  
It will take \$1,140,700 to complete the portion of the railway under construction to Josephine Junction, and beyond that to the C.P.R. another 25 miles, it will cost \$500,000. For this the subsidy of the Dominion government will be \$787,500. The total length of railway will be 225 miles. The proposed route is from the C.P.R. on the railway, as well as the Manitoulin and North Shore Railway, and the 16 or 18 steamers of the company, valued at \$250,000. The total security of the railway is \$7,870,000, a tolerably wide margin.

"Pretty nearly all margin," was Mr. Whitney's cute observation.

### Gets Stock, Too.

Then the province gets stock of the Algoma Central amounting to \$10,000,000 and stock of the Manitoulin Railway, amounting to \$24,000,000, as well as collateral bonds of the reorganized company to the amount of \$23,000,000.

The company is reorganized with 40 millions capital, which the province's share is five millions.

The premier read the names of the capitalists who had invested in the company, and declared they were men of standing, some many times millionaires.

**No New Capital.**  
Mr. Whitney insisted that these men had put no new money into the enterprise, but merely transferred their stock into the new company, and the amount of their investment had put in a million of new money.  
If the company defaulted the government would take over the railway, and it would be another case of government ownership.  
**Hanna Can't Wait.**  
Mr. Hanna said the report brought down did not give the names of the secured and unsecured creditors of each of the companies, and the amount of each claim, as ordered by the house.  
The premier said it would include thousands of names, and Mr. Hanna, demanding whether the return would come down, was answered "Next week."  
Mr. Whitney said he hardly knew

how to commence the discussion of this remarkable transaction. At one moment he was lost in admiration, and the next with a feeling of regret at the qualities of Shyleek displayed by the premier. If any proof was wanted that the premier was about to take his departure from this house that proof had been given. He called the transaction a bookkeeping extravaganza and then moved the adjournment of the debate. It will be continued on Tuesday.

## ALLIANCE WORKERS CALLED TO CONSIDER SITUATION

### Position "Critical and Serious, The Encouraging" and Supreme United Effort Asked.

An important circular has been issued by the executive committee of the Ontario branch of the Dominion Alliance, calling a long delayed provincial convention of the temperance workers of Ontario in the Guild Hall, McGill-street, on Thursday morning at 10 o'clock, the 21st inst. It reads:

To all friends of the temperance cause: The executive committee of the Ontario branch of the Dominion Alliance in announcing the above representative convention of all friends of temperance and prohibition in this province, desire to call attention to the critical and serious, the encouraging, position of the temperance cause, and the necessity for such prompt, wise and determined effort as the situation demands.

This annual gathering is recognized as the great provincial parliament of those who desire the suppression of the evil of intemperance. Every church congregation, every temperance society, every organization for the advancing of temperance and Christian efforts, is entitled to be represented in this convention, and the alliance officers earnestly request every such society to at once appoint a full delegation of its best and wisest workers, so as to secure as thorough and careful consideration, and as useful conclusions as the present crisis requires.

The strong public opinion of the electors of this province in favor of the abolition of the bar-room system and the imposition upon the liquor traffic of such further restraints as our legislature has power to impose, has been most frequently and emphatically expressed. It is now so recognized by legislators that it has become an important political question that will not be settled until it is settled right. Let us have a rousing rally of faithful, fearless, devoted men and women, resolved to unite in a supreme effort, regardless of all personal or party considerations to secure the deliverance of our people as far as possible from the terrible evil the now works such widespread degradation, destruction and distress.

BORDEN-LIKE AND BRYAN

Member for Hants Against Public Ownership, But Member for Grey Strong for It.

Ottawa, April 8.—(Staff Special).—The only contributor to the debate on the Grand Trunk Pacific Railway contract today were Dr. Russell of Hants and Dr. Sproule of East Grey. The house adjourned at 6 o'clock, feeling that the debate had been well advanced during the week, and that a few more days would bring the discussion to a close.

Dr. Russell is a fluent speaker, who can perhaps jam more words into a given space of time than any other man in the house. He spoke with exceptional fluency to-day, but weight was not a prominent characteristic of his argument.

Dr. Sproule is a different mind was Dr. Thomas Sproule, who argued that public ownership of railways was rapidly gaining ground, and was meeting with public endorsement on all sides.

Dr. Russell said that if the opposition were not convinced by the speeches of the interior of the benefit of the project, they would not be convinced were they to rise from the dead.

It had been said last session by the opposition that the Grand Trunk Pacific Railway Company, how was it?

Dr. Sproule, who replied, described the speech of the member for Hants as the letter's valediction prior to the acceptance of a judgeship.

Bottles of Gas Make One Bottle of Liquozone

We require 1,250 cubic inches of gas to make one cubic inch of Liquozone. The gas is made in large part from the best oxygen producers. The process of reduction takes 14 days. It is this astounding condensation that gives Liquozone its power—the power to do what oxygen does.

A Million 50c Bottles Free.

The virtue of Liquozone lies in the fact that it does what oxygen does. Oxygen is the vital part of air. It is Nature's great tonic, the very source of life. It is oxygen that turns the blue blood to red, and every function of life so depends on it that we could not live three minutes without it.

We Paid \$100,000

For the American rights to Liquozone—the highest price ever paid for similar rights on any scientific discovery. Before doing this we tested the product for two years, through physicians and hospitals, in this country and others.

Kills Inside Germs

But the vital value of Liquozone lies in the fact that it kills germs in the body without harm to the tissues. There is nothing else known which will do that. Any drug that kills germs is a

4000 IN A WEEK.

Halifax, N.S., April 8.—By this day week the population of Canada will have been increased by nearly 4000 souls from across the seas. Ships now due here and at St. John and number of passengers by each are: C.P.R. liner Lake Erie, due at St. John Sunday next, 1151; Allan Line's Pretoria, with the mails, due at Halifax, 400; Allan Line's Siberia, due at Halifax next, 300; C.P.R. liner Mount Temple, due at St. John Sunday, 400; Hamburg-American liner Arcadia, due at Halifax next Monday, 1663; Canadian liner Milan, due at Halifax Monday, 157. Last year the total number landed here reached the 4000 mark, and this year it is expected to reach 8000.

ICE AT THE 800.

Sault Ste. Marie, April 8.—The ferry between the two 800s will probably commence its regular trips to-morrow. After working pretty hard she succeeded in breaking the ice near where she had been moored all winter and got into clear water in the centre of the river. This has been open for a few days. She broke the ice near both government and ferry docks on this side with ease and left it in a position for her regular trips. This will also assist in clearing the river of ice.

Some Interesting Facts About The Days of Maidenhood

The Life of Every Young Girl is Like a Rippling Brook, Its Course Obstructed by Many Obstacles, Crossed by Many Dark Shadows.

"Brooks make rivers, rivers run to seas," sings the poet Dryden in his oration of Aesculapius, the first known physician of the past. The poet has penned his verse in praise of the ancient practitioner, how aptly his beautiful lines apply to the life of a woman. The chattering brook of a young girl, the wild and turbulent stream, sometimes flowing smoothly, then dashing over rocks and down into muddy depths, at last becoming a mighty river, bearing ships upon its bosom, is the woman with her broadening and deepening possibilities.

RATEPAYER'S OPINION

Editor World: As a public school supporter I feel humiliated to-day to think that gentlemen elected by the people should so misrepresent the views of the public school supporters of this city as those members of the board of education did who broke up the quorum rather than voice their opinions on the subject now pending the public mind.

Gertie Trust Asks Annulment of Marriage Forced on Her.

Washington, Iowa, April 8.—Clad in a dress that scarcely cleared her knees and with her dark brown hair falling in long curls over her shoulders, Gertie Trust, eleven years old, filed to-day a petition before Judge Scott for the annulment of her marriage with John Leeper, sixty years old, a resident of Brighton, Iowa, whom she had been forced to wed, she declared, when she was nine years old.

The girl's story is a shocking revelation of the primitive theory of life followed by the scarcely civilized dwellers in the wild mountainous districts of Missouri.

Two years ago, according to her story, she lived with her mother in one of the most inaccessible regions of the Ozark Mountains, near Lebanon, Mo. She was there scarcely nine years old. It was there she first met Leeper. He made a contract, the details of which she does not know, with her mother. Leeper stayed in her cabin, then a traveling preacher—Buck was his name so far as the child could remember—came to the cabin.

There was a ceremony, the nature of which she did not understand, and she was told she was Leeper's wife. More than that, her mother told her, she said, that she was Leeper's slave and must obey him in all things as long as he lived.

## WANT TO BE RIFLE SHOTS VARSITY BOYS LINING UP

Great Interest Manifested by the Young Men in Their New Association.

University men have always been prominent in the arts of peace, but what has taken place in the last few days indicates that they realize the necessity for British subjects of a knowledge of the art of war. Another student society has been organized. It is what promises to be a large and efficient civilian rifle association within the university.

In the days before 1880, when Alfred Baker (now Prof. Baker) resigned the captaincy of K company, Q.O.R., the military spirit of the students found expression in the support of that company, which, until that time, was largely composed of university men. Prof. Baker was the last university man to command the company, and after his resignation the university membership in it decreased rapidly. The need of some military organization for the students was partly met by the formation of the Engineers, a company which, thanks to the untiring labor of Major Lang and his lieutenants, has reached a high degree of efficiency. Unfortunately, however, the Engineers have to content themselves with the old Lee-Enfield rifles, and there is no provision for training in marksmanship. Besides this, the wide scope of the field operations which the Engineers must master necessitates a large amount of drill and occupies more time than the average student can spare, especially if he is to maintain a good record in the class and in the athletic field. The great need for training in rifle shooting was therefore called on to take up arms was seen in the South African war. The Canadian militia department was not slow to take the hint, and the result was the general order of 1901 providing for the formation of rifle associations. It is in accordance with this general order that the University Rifle Association has been formed, and the students feel that they will make by no means the least skillful of marksmen.

**Plans ready for support.**

The credit for the formation of the rifle club is largely due to S. A. Cadmore, a prominent junior in the department of classics in University College. He conceived the idea last spring, and found, on talking it over with a few fellow-students last fall, that they were very ready to support the plan. Accordingly, Mr. Cadmore brought the matter before a large and representative gathering of arts men, held about the middle of February, this year. The meeting endorsed the scheme, and a preliminary meeting was announced for Feb. 23. At this meeting about 40 were present, and all facilities were well represented. The government regulations with regard to rifle clubs were read and discussed, and the formation of a university company carefully explained. Among others present were Prof. VanderSmitsen and Prof. Baker. Prof. VanderSmitsen was a member of the old university company in 1866, and was only wounded in the Fenian Raid. He was only wounded in the Fenian Raid. He was only wounded in the Fenian Raid.

to begin their musing course in October. That the association is being widely taken up is shown by the number of those who have signed a promise to join. This unofficial enrolment is as follows: University College, 70; Toronto Medical School, 25; School of Science, 27; Victoria University, 7; in all faculties, 129.

It is hoped that a number of graduates will soon be enrolled in the company. Several have sent in their names already. This additional bond between undergraduates and graduates will be an immeasurable benefit to the alumni.

It is found by the present executive that the most enthusiastic members of the new association are those who have had experience in cadet associations at the collegiate institutions, in which they were prepared for the university. It is only within the last two years that cadets have been allowed to shoot, and the stream of cadets is as yet only beginning to flow through the university. The class of '08 will most likely bring with it many whose short acquaintance with rifle shooting in the cadet companies will have been sufficient to ensure their hearty support to the larger and more mature association of the university.

The rifle company is being formed not only with the entire cordiality but with the hearty support of the university authorities. President London views the project with great favor, and candidly expects that the board of trustees will sign the bond required by the militia department as security for the rifles which they will send. In the event of the board failing to do this, it is understood that President London will sign it himself.

**Roll of Present Members.**

It is necessary for every member to swear allegiance before being allowed to share the privileges of the association. The swearing-in is now going on before Col. D. Delamere, who has kindly consented to swear the men at his office, in the services organized in the parliament building.

The general manager of the Crown Bank of Canada, Mr. O'Grady, went to Ottawa last night, taking with him gold certificates for a quarter of a million dollars, which he will deposit with the treasury department on behalf of the Crown Bank as a preliminary to obtaining the necessary license for the transaction of business. Mr. O'Grady will also file a list of nearly 400 stockholders, amounting to considerably more than the \$500,000 which the Bank Act requires. The institution is now on a sound footing and will be prepared to open business as soon as the necessary formalities are completed and the building on King-street remodelled, probably about the end of May. In the meantime the offices will continue at 23 West King-street, Bank of Commerce building.

## SOMETHING IN THE AIR.

Nobody has yet been able to explain the premier's reply to Rev. J. A. Rankin. The interviewers have elicited various opinions from the leaders of temperance thought in Toronto, and these opinions do not agree; but it is not a strange thing that some of the interviewed, from whom expressions of disappointment were expected because of their known loyalty to "the cause," are now berating the premier.

One clause in the premier's letter is affording them satisfaction: "If the government evening paper headed its chief news article with the question in bold type, 'Does Premier's Letter Provoke a Campaign on a Prohibition Basis?' Those who think that the premier has been giving the temperance people another 'stand off' are entitled to think again."

## PREDICTS A BIGGER STORM.

Free to Men Until Cured. For nearly 40 years I have successfully given new life, strength and vigor to weak men. Think of the wonderful merit of a remedy that has stood this test! Think of the experience I have gained in making strong, vigorous men out of the wrecks who suffer from disipation, who are feeble, suffer from varicose veins, neuritis, rheumatism, lame back, etc.

No Pay Until Cured. Not a penny is to be paid me or placed on deposit in any way until you are cured or fully satisfied, and then the price is only \$4 in many cases. I have made the greatest success over known, in curing my cure with sufferers on their merits, and will not be satisfied until every such one has tried it. Being a crowning success, my little art of "Horse" medicine, etc. My valuable advice I give only out from ripe experience and is mine alone. It is given freely until my patient is well—bait and advice all without charge until cured.

PUBLIC AMUSEMENTS.

"In Convict Stripes," a play of the heart and home, will be the attraction at the Majestic Theatre next week.

J. Arthur O'Brien, Willis L. Holmes, Hiram Cornell, Louis Culberson, W. La Rue and others.

The output of turkeys from St. Louis reached a greater total than the statistics of this "festive" bird show.

Ralph Stuart brings for the first time to this city, at the Grand Opera House next week, the Russo-American play "By Right of Sword."

Miss Lillian Albertson, Miss Eleanor Reynolds, Miss Alice Lorraine, Miss Clara Burke, J. R. Armstrong.

His splendid physique, together with one of the most marvelous tenor voices this country ever heard, made him one of the most popular men in the stage.

It is rarely that a performance in Toronto has had such a commendation as the production of the Temple of Fame last evening in the West Association Hall.

HER HUSBAND WAS A DRUNKARD

A lady who cures her husband of his drinking habits writes of her struggle to save her home.

"I had for a long time been thinking of trying the Tetter's treatment on my husband, but was afraid he would discover that I was giving him medicine, and he thought I was a charlatan."

Another big feature will be John T. Sullivan & Co. in "Capt. Huntington," said to be the best legitimate sketch in vaudeville.

APPEAL TO THE WEAK

Are You Suffering from Varicocele, Nervous Debility, Loss of Vitality, Loss of Ambition, Loss of Strength? I Will Cure You.

HOW many men are suffering miseries from the want of a simple remedy? They do not live; they simply exist.

Dr. McLaughlin's Electric Belt. The product of years of study, the realization of the fondest dreams of the weak and worn invalid.

DON'T DELAY. Try Dr. McLaughlin's Electric Belt at once. No matter what ails you, there is a cure for you in Nature's remedy—Electricity.

THESE MEN WERE MADE STRONG. Two Cured With One Belt. Sciatia Completely Cured.

Dear Sir:—I received two kind letters from you. My sole reason for not answering them was that I found myself improving so well I determined to wait and give you full particulars to date.

Pay Only When Cured. HOW DOES IT CURE? How simple that is to me! I have studied and developed it for years, and I will explain it to you as simply as I can.

FREE BOOK CALL TO DAY. Every man who admires the perfection of physical strength should read my beautifully illustrated book. It tells how strength is lost and how I restore it with my Electric Belt.

Improved Electric Belt—Only \$3.00
The finest Electric Belt in the world is
what I offer. My improved Belt is
superior to any other made. It is not charged
in corroding vinegar. It gives a stronger
current of electricity than is possible with
any "vinegar" belt. It is guaranteed for
three years. One does for eight persons. It
cures Rheumatism, Weak Back, Nervousness,
Dyspepsia, Losses, Debility and
Varicose Leg. It is practically giving the
applied Belt away on trial, as the price has
been put at the lowest possible figure, so that
it is within the easy reach of everybody.
Our prices are from \$3 and there is nothing
at all to pay till you are cured.
We send absolutely free to every person
writing us our beautiful illustrated Medical
Book and the best Electric Belt, together with
an offer of a better article at a lower price
than any other. All writing us receive immediate and skillful treatment.
In every case we undertake to send a legal guarantee to cure you or refund
our best Belt on fair trial. Remember our Belt is positively guaranteed to be
the strongest made and it will cure you. Write to-day. It costs nothing to
try it. Address

Market Turned Soft After Strong Opening—Dominion Coal Permits Evolutions in Locals.

World Office, Friday, April 9.  
 The strong advances in the local securities were maintained to-day, and there were some aggressive tactics in Dominion Coal. Aside from this there was a tone of steadiness that might be called speculative and investment buying. There was nothing in evidence to indicate that the market was likely to continue to rise, but the possibility of price advances is higher, something for which no one appeared confident to assign a probability. The sudden outbreak of buying and selling in Dominion Coal was as much a mystery as some of the previous action in the stock, but it is possible that inside information of the wonderful virtues of this property came to the front during these peculiar movements. The price was carried to a new high, and the close was higher, but the reaction was limited. Sao Paulo was firm and Twin City less active and more speculative. Steel bonds made a moderate improvement, and, with Commerce, displayed firmness at the close. Trading was not well distributed.

Charles H. Co. & Co. R. R. Bondard: In the afternoon there was some pressure in the selling movement on predictions of untoward weather in the winter wheat belt. Sentiment is again somewhat mixed to-day's reaction having taken the steam out of the upward movement for the present. It is believed that the interest under the reaction would not be adverse to function, but it would place the speculation in a stronger position. If left to itself the market would continue to sag, as there is but little outside interest. We believe large interests would support the market, but any aggressive attempt to force lower prices, and will probably renew the bullish manipulation later on. We think the reaction should extend further, but be favor purchases on the weak spots.

Amillias Jarvis & Co. In their circular say: During the past week the public have shown more tendency to take an interest in the stock markets than for a long period. A gradual return of confidence in the situation appears to us to be in progress. As we have expressed ourselves in all our recent letters, the underlying conditions of the situation are more satisfactory than they have been for over a year, and many factors are tending to strengthen still further. The situation is undoubtedly serious, but the rapid recovery of prices existing in the past few days is a very encouraging sign. We believe that the market is being paid to its predictions of evil.

There has been a lot of good investment buying in Sao Paulo, and the stock holders' firm at between 93 and 94. As this is a recent dividend, it is the equivalent of about 2 1/2 per cent. The secretary of the company here has just received a cable which bears out the future profits of this company. The managing director in Sao Paulo has closed a contract for the sale of 600 horse-power. The company has been advertising the great possibilities for the establishment of a power plant. The sale of this power will be to the company between \$400,000 and \$500,000 a year, and is another important increase in the company's income. The bonds of the company are selling at 87 and 88 flat.

The Toronto market has been active in dealing in Nova Scotia Steel, more than the stock changing hands here in Montreal. The buying is mostly for investment. This stock generally moves rapidly, either advancing or declining, and it would not be unreasonable to look for some new recession from recent prices. On any such recession we would regard it as a good buying opportunity.

**On Wall Street.**  
 McIntire & Marshall wired J. G. Beatty, King Edward Hotel, at the close of the market to-day.

The release of the speculation in the stock market into bullishness, with a margin of denser to prices, was variously construed by leading elements. Many believe bull support has been withdrawn temporarily largely with a view of encouraging the creation of fresh interest about interest and to shake out the scattered weak interest, which has been pyramiding on paper profits during the past week's rise.

Others believe the bull movement has culminated for the present chiefly as the result of the development of unfavorable technical speculative conditions, from the elimination of most of the speculative interest, and the absence of any substantial new investment in the market.

Which of these views is correct remains to be seen, but it is a fact that the floating supply of stocks is now approximately 20 per cent larger than at any time for the past several months.

This would seem to indicate that the large market interests who inaugurated the bull movement immediately after the recent Securities decision, was announced, have succeeded in immediately disposing of their stocks, and the apparently have passed chiefly into the hands of the speculative element.

To-day was the first time since the inception of the bull movement that the general market showed evidence of having been overbought. There was the usual burst of activity, and strong buying, but the market was concentrated on Copper and Atholton, and the reaction was not as deep as early as yesterday, and bull tips were too numerous to be healthy.

The market was not so strong as yesterday, which was the feature of the trading in the market to-day, undermined position, and this pressure up to the close, with the liquidation of the market, and the reaction was not as deep as early as yesterday, and bull tips were too numerous to be healthy.

The departure of J. P. Morgan for Europe, and Mr. Hill and Mr. Harrison leaving for a prolonged stay in London, may not have any direct effect on the market, but there has been a good deal of liquidation in general, and the market has been a little better than the general market, and the general market has the appearance of being overbought, and unless active buying is resumed, the market will probably continue to sag, as there is but little outside interest.

The duties and sagging conditions which have developed were the result of the speculative position which has been maintained in the market, and the reaction was not as deep as early as yesterday, and bull tips were too numerous to be healthy.

Irregularity was chief characteristic of today's market, in which there was considerable selling for profit and a moderate reaction occurred, but little stock was sold, and the situation is undoubtedly serious, but the rapid recovery of prices existing in the past few days is a very encouraging sign.

**The Henderson Roller Bearing Manufacturing Co. LIMITED.**

A Successful and Profitable Industry—Dividends Declared.

The Annual Meeting of the Shareholders of The Henderson Roller Bearing Manufacturing Company, Limited, was held in Temple Building on Thursday, April 7th, 1904.

An unusually large number of Shareholders had gathered from various parts of the country.

The Report of the Directors for the past year showed very satisfactory results of the year's operations. The success of the Company was such that the Directors were able to recommend to the Shareholders the payment out of the year's profits of a dividend of 13 per cent. on the amount paid up on stock.

The Shareholders were enthusiastic in their expressions of appreciation of the development of the Company, and a resolution was unanimously adopted expressing confidence in the Board, and thanks for their past services.

The rapid development of this new industry is well illustrated by the fact that the factory, although only nine months in operation, had at the close of the year all the departments fully equipped and employing about fifty men.

The Company find it necessary greatly to increase their capacity, and have had several very liberal propositions made to them, offering locations and concessions for the new factory site which the Company expect to be compelled to provide to meet the rapidly increasing demands of the business.

The concluding paragraph of the Directors' Report embodies very accurately the sentiment of the Meeting, when it says:

"The members of the Board lay the result of the year before you for your favorable and careful consideration, conscious that they have used and employed all their energies for the welfare of the Shareholders and success of the Company, and desiring that they should have the honor and responsibility of laying the foundation of a business, the effect of which will extend from the Atlantic to the Pacific, and be a revelation to the manufacturing, mechanical and transportation portion of the community, and that will afford great satisfaction to those who are fortunate enough to be holders of stock in the Company."

The election of Directors resulted as follows: Albert Ogden, Toronto; W. Vandusen, Toronto Junction; H. Waddell, Peterboro; John L. Gibb, St. Catharines; A. D. Watson, A. Henderson, John J. Main, John C. Eaton, R. I. Henderson, John Ferguson, Toronto; Senator S. Mermer, Berlin; P. H. McKenzie, Lucknow.

At a Board Meeting, immediately following the Shareholders' Meeting, the following officers were elected: President, Albert Ogden; Vice-Pres., A. D. Watson; Secy.-Treas., A. E. Henderson; Manager, R. I. Henderson.

The last named speaker thought that the religious influence of Emerson had been greater than that of any other writer or religious teacher of the past century. Among the speakers who have addressed the club during the season just closed have been Prof. W. J. Alexander, on "Emerson and Carlyle"; Rev. W. E. Gilroy on "Emerson's Friends"; Mrs. Eliza R. Sunderland on "Emerson's Place in the Development of American Literature"; Prof. F. C. Southworth of Meadville, Pa., on "Emerson as a Poet"; Dr. Harold Clark on "Emerson as an Ethical Teacher"; and Prof. F. Tracy on "Emerson's Philosophy". The club has elected the following officers for the coming season: President, Rev. J. T. Sunderland; vice-president, Miss L. M. Hamilton; secretary-treasurer, Miss E. Rowland; councillors, R. T. McKee, A. R. Clute and Mrs. M. G. White. The club will probably devote the coming year to a study of the literary essays and the poetry of Matthew Arnold.

**EMERSON CLUB.**

The Browning Club, after devoting six years to the study of the great poet from whom it took its name, decided last fall to give the season of 1903-04 to a study of Emerson. The experiment has proved a marked success. The interest in the work of the club having been the greatest and the attendance upon its meetings the largest in its history. The concluding meeting of the season was held last Wednesday evening, Rev. J. T. Sunderland, the president, occupying the chair. A. R. Clute read a paper upon "Emerson's Religion," and R. C. Clute, K.C., gave an address upon "Emerson's Influence."

**"O.P.'S" JUMPERS.**

London, April 8.—Some important changes in the training of cavalry mounts are likely to result from the enthusiasm with which a number of British cavalry officers have received Major-General F. S. Baden-Powell's account of his recent visit to the French cavalry depot at Saumur.

"O.P." was so much struck by the clever manoeuvring of the French mounts that he asked to see the process of training, and was astonished to find that the horses were trained to leap over a billiard table and to perform numerous extremely difficult feats.

In all of these the animals evinced the liveliest interest, and the inspection-general of cavalry came to the conclusion that their intelligence was awakened by these tricks to a remarkable degree.

On his return to the war office, Major-General Baden-Powell sent a memorandum on the subject to all cavalry colonels, and many are putting the new experiment into practice. It is interesting in this connection to recall the fact that at Curraghmore, the home of the Marquis of Waterford, there is a mahogany dining-table which is severely marked by the hoof-prints of hunters which were jumped on and over it by Lord Charles Bessford and his brothers, Lord Marcus and the late Lord William Bessford, when they were boys. A former marquis, who was killed on the "wild Lord Waterford," and who was killed on the hunting field, also frequently "took" the table in this fashion.

**Must Show Good Faith.**

The sub-committee on the Jenison power bill before the legislature met yesterday to discuss the conditions to be imposed upon Mr. Jenison. This was agreed upon. Before the first of July \$10,000 must be deposited. Before Jan. 1, 1906, \$50,000 work must be done, and during the year 1905 \$100,000 work must be done. At the end of three years the company must be prepared to furnish 5000 horse-power to Fort William. The penalty for non-performance of any of these conditions was left to be settled at the meeting on Tuesday morning.

**DWARFS IN LOVE.**

Paris, April 7.—A serious love affair in the world of dwarfs is just now engaging the attention of Paris, and it is hinted that the outcome may be a duel.

Princess Chiquita, a tiny American woman, who was born in 1881, stands 2 feet 4 inches, in her high-heeled boots, and weighs 19 lbs., is now on exhibition at Bostock's menagerie at the Paris Hippodrome.

Some time ago two dwarfs, who also happened to be in Paris—Auguste, who is 26 years old and stands 3 feet 6 inches high, and Delphin, aged 21, height 2 feet 7-8 inches—went to see the little lady, and both fell desperately in love. Auguste is a Frenchman, and Delphin, a German, and both started writing inflammatory love letters to the little princess, who, as became a well-bred young lady, handed the letters to her papa, a man of normal size and appearance.

The French dwarf is, however, of a jealous and fiery character, and on hearing yesterday that the German dwarf Delphin had been to see the princess, and had handed her a bouquet which had been graciously accepted, is now beside himself with anger. He has threatened that if Delphin continues to pay such decided attentions to the lady he will challenge him to fight a duel. Delphin, on the other hand, says that he is "not afraid of that big French bully Auguste."

Hearing of these things, I went this afternoon to Bostock's menagerie and interviewed the princess. "Is there any truth in the report that you are thinking of getting married, Princess?" I asked. Princess Chiquita, who converses equally well in English and German, answered with a sweet little smile, "Well, really I guess your question is very indiscreet. But, in any case, it is a matter for my papa to decide, and not for me." "But," I said, "how about Auguste and Delphin?" "Oh," she replied, "they are both silly boys; they hardly know me well enough to be so serious." I endeavored to ascertain whether the princess favored one or the other of her suitors, but she merely said that she was quite happy to remain as she was. "I am not at all in the style to which she is accustomed, and I don't attach any importance to the matter at all."

"Two in One" Shoe Polish

The best polish ever made for Ladies' Shoes, because it shines quick as a wink, keeps shoes like new patent leathers, and WON'T SOIL THE CLOTHING. It's A Paste—that shines quicker—hold its gloss longer—and makes shoes wear longer—than any liquid-and-paste polish. It keeps ladies' fine shoes soft and easy—prevents them from cracking—preserves the leather—keeps it damp-proof and water-proof.

At all Dealers. In 10c and 25c boxes and 15c Tubes
