DEATH OF LORENZO FREDERICK

Former Glencoe Business Man and Public School Teacher

The death occurred at his home in Seattle, Washington on Friday last of Lorenzo Frederick, a former resident of Glencoe. Mr. Frederick had been in ill health for some months but the end came unexpectedly, as he was quite active and partook heartily of his usual meals on the day before.

The late Mr. Frederick was born in Caradoc township and taught in No. 3 school, Ekfrid, and other township public schools in his early manhood. Like many of the public school teachers in those early days he qualified himself for the profession by combining with his hard labor on the farm. Early in the seventies he came to Glencoe and went into business in the books and stationery line, subsequently in the hardware and tinware business. He was also associated with his brother, the late Samuel Frederick, who was principal of Glencoe public school, in the publication of the Transcript during its first year or two.

After leaving Glencoe he taught in the public schools in Northern Michigan, where he subsequently held the position of school inspector. A few years ago he took up his residence in Seattle. Mr. Frederick was a Mason for 47 years, having been initiated into that order in Lorne Lodge No. 282, Glencoe.

Funeral services were held at the home in Seattle on Sunday afternoon, conducted under the auspices of the Masonic order.
Mr. Frederick, who was about 70 years of age, leaves his wife, formerly Miss Hannah Sutherland, of Glencoe, and three sons and two daughters. One of the sons is Chas. W. Frederick, postmaster and editor of the Record at Peace River, Alberta, and a daughter, Myrtle, is superintendent of the Washington Red Cross Nurses' Training School.

MASONIC INSTALLATION

On Tuesday evening installation of the following officers of Lorne Lodge No. 282, A. F. & A. M., Glencoe, was made by W. Bro. Angus Graham, of Thamesville:—

Wor. Master.....Bro. R. J. Mumford
S. W.Bro. L. H. Dignon
J. W.Bro. L. W. M. Freese
Treas.V. W. Bro. E. T. Huston
Secretary.....W. Bro. C. G. Yorke
S. D.Bro. J. A. Jones
J. D.Bro. E. M. McPherson
D. of C.W. Bro. G. A. Parrott
Chap.W. Bro. J. T. Lethbridge
I. G.Bro. A. B. Sinclair
S.Bro. W. T. May
J. S.Bro. F. I. Abbott
Tyler.....Bro. J. W. Munro
Auditors, W. A. Currie & G. Dickson
Exam. Board.....W. Bros. Lethbridge, Parrott and Harley
Sick Committee.....W. Bros. Huston, Davidson and Lethbridge
After the installation refreshments were served.

THE LATE ANGUS McTAGGART

A London paper says:—Deep regret is expressed amongst a wide circle of friends at the death of Angus McTaggart, of this city, who died this past week in his 76th year.

Mr. McTaggart was born near Appin. His parents were Lechan and Mary McTaggart, who came to Ontario from Scotland. Early displaying love of learning, he worked his way through grammar school and the Toronto Normal School.

He then began his active teaching career and taught schools at Point Edward, Hensall and Clinton. His memory is treasured by many men and women of affairs who were instructed by him, amongst whom he was beloved for his devotion to their welfare and respected for his patience of disposition and quietness of manner.

The funeral service, held at his home, was conducted by Elder Slawson, of the old school Baptists, of which faith he was an ardent adherent. The speaker, whose parish extends from the Detroit River to just east of Toronto, paid a beautiful tribute to the life and work of the dead teacher. Sweet old Highland hymns were sung and the body was carried to the grave.

He is survived by his widow and two sons, Victor and John, attending the London Central Collegiate Institute.

SCHOOL REPORTS

S. S. No. 3, Mosa
Jr. IV. to Sr. IV. (pass 570)—Ma.y Watterworth 821, Florence Fry 718. Jr. III. to Sr. III. (pass 510)—Jas. Squire 747, Nellie Squire 690, Alex. Miss Sara McKillop, who has been assistant in the Dutton post office for about ten years, and acting postmaster since the death of A. A. McKillop a year ago, has received the appointment of postmistress of Dutton, although not yet officially notified.

CALLED TO FORM MINISTRY

The lieutenant-governor of Ontario on Tuesday afternoon formally invited Hon. Howard Ferguson, leader of the Conservative party, which was swept into power by a huge majority in the elections on Monday, to form the next government of the province.

This action was taken after Premier Drury, following a meeting of the Cabinet, had tendered his resignation to the lieutenant-governor to take effect on July 16.

Mr. Ferguson, in accepting the responsibilities of office, stated that he would be ready to assume the premiership as soon as the position was vacated by Mr. Drury.

The standing in the Ontario elections is as follows:—
Conservatives.....76
United Farmers.....16
Liberals.....14
Labor.....4
Independent.....1

WEST MIDDLESEX MAJORITIES

Returns from the different polling divisions in West Middlesex give G. Lethbridge, U.F.O., a majority of 204 over Chas. M. Macfie, Liberal. The majorities of the two candidates are as follows:—
Lethbridge.....Macfie
Lobo.....227 Ekfrid.....49
Caradoc.....140 Glencoe.....192
Delaware.....84 Newbury.....64
Mosa.....99 Wardsville.....25
Indian Res.....16
550.....346

APPIN

A large number from here attended the Baptist meeting on Sunday.

Miss Adie McMaster and Jeanette Lotan, of Victoria Hospital, London, spent Monday at their homes here.

The baseball game between Mount Brydges and Appin was called off on Monday owing to rain. The boys played four innings, with Appin in the lead. The game at Mount Brydges on Friday was also called off.

Sacrament of the Lord's Supper was dispensed in the Presbyterian church here on Sunday.

Appin Junior baseball team played at Tait's Corners on Thursday last week. The score was 9 to 5 in favor of Appin.

McBourne ball team will play here on Friday at 5.30. Come and cheer for the home team.

Miss Adie McMaster, of Toronto, is the guest of her sister, Mrs. D. McIntyre, Jr.

Mr. and Mrs. Thos. Howe spent a few days with their daughter, Mrs. C. Leverat, Newbury, last week.

A welcome rain fell on Monday evening. It was accompanied by heavy wind which did some damage in this district.

Good program, strawberries and ice cream at the social at Appin on Thursday, June 28th—all for 25c.

WALKERS

Ralph Collier has purchased a house from David R. Eddie, of Ekfrid, and intends having it moved to his lot immediately.

Ed. Klumpp, of the corner store, is busy drawing gravel and intends putting a foundation and cellar under his house which he moved here a few months ago.

George Giles, of the M.C.R., is putting a cement foundation under his house.

With the thermometer registering 102 in the shade and the section at its hottest, it's no wonder we had a hall storm Monday evening.

Miss May Munroe, of Detroit, is spending a few days at her home here.

We are glad to report that John A. Patterson has been successful in his exams, and is now a full-fledged M.D. J. D. McIntyre and Archie McCallum are busy getting their houses in order for the cement contractors, who will take charge in a few days. With all the improvements going on in this burg, it looks as if cement might take a jump.

Mrs. John M. Graham is spending a few days at her old home here.

Mr. and Mrs. Fred Gough and daughter, Edna Marie, of Glencoe, called on friends here on Friday.

The Walkers soft ball team have yet to taste defeat, having played four games with the following results:—First game—Walkers 45, Napier 36; second game—Walkers 16, Cairngorm 4; fourth game—Walkers 19, Cairngorm 6. The team has won as follows:—Elsie Walker, pitcher and captain; Jean McNaughton, catcher; Mary McNaughton, first base; Jean Patterson, second base; Janet McCallum, third base; Jean Munro, shortstop; Wilhelmina Munro, left field; Edna Osier, centre field; Minnie McNeil, right field.

Games of Walkers baseball team and results:—May 24—Newbury 6, Walkers 1; May 30—Walkers 21, Bothwell 4; June 5—Walkers 10, Melbourne 1; June 12—Walkers 12, Inwood 1; June 15—Inwood 8, Walkers 6; June 20—Walkers 5, Inwood 1; June 20—Newbury 20, Walkers 6; June 23—Walkers 9, Glen Oak 2. Games played, 8; won 5, lost 3.

Miss Catharine E. McGill and John H. Patterson were united in marriage at the Presbyterian manse, West Lorne, by Rev. A. L. Carr on Wednesday, June 20th.

WAS GLENCOE'S FIRST REEVE

John W. Campbell, Former Prominent Glencoe Man, Dead

The death occurred at his home in Detroit last week of John W. Campbell, one of the prominent residents of Glencoe in the early days of the village. At the first election in Glencoe after incorporation, which was held in January, 1874, Mr. Campbell was elected reeve.

Mr. Campbell was engaged in the saddlery and harness business here for a number of years, after which he was appointed manager of Glencoe's first bank, known as "The Glencoe Bank," which began business in 1876. This bank ceased business in 1885 when a branch of the Traders Bank was established here. Shortly after this Mr. Campbell moved to Detroit where he continued to reside up to the time of his death. His wife died about two years ago. One son survives, Dr. J. A. Campbell, of 156 Woodward Ave., Detroit.

The remains were brought to Glencoe on Sunday and interment was made at Oakland cemetery. A short service was conducted at the graveside by Rev. D. G. Paton, minister of the Presbyterian church.

Out of respect to the deceased, Glencoe's municipal flag was at half-mast on Saturday.

ANNUAL MEETING OF WEST MIDDLESEX W. I.

The annual convention of the West Middlesex Women's Institute was held in the New Methodist church, Kerwood, on Wednesday last. There were nine branches represented. Activities noted included improving local cemeteries, community parks and hospitals. Particular mention was made of the Strathroy hospital. The address of welcome was given by Mrs. Hall, of Kerwood, and replied to by Mrs. Matthews, of Delaware. The district report was given by Mrs. James Lotan, of Appin. Out of the nine branches represented, Appin heads the list for membership with a total of 59. Strathroy is second with 57.

The total balance in the treasury for the whole district is \$1,394.27. Miss Powell, from the department of agriculture, gave an interesting address, as did also Mrs. Stivers, Rev. Mr. Moorehouse, of Kerwood, spoke in kindly terms of the Women's Institute and of the good they were exercising.

The meeting was interspersed with vocal and instrumental music from the different branches.

During the afternoon session Mrs. DeGex was elected district president for the next year. Mrs. Brunt was re-elected secretary and treasurer. Mrs. Lotan was appointed district representative to the convention in London. Federation representative, Mrs. John Macfie, Miss Walker, of No. 9, Mosa, presided over the meeting as last year's president.

EKFRID BASEBALL LEAGUE

At a meeting in Appin on June 6th the following schedule was adopted for the Ekfrid Baseball League:—
June 29—Appin at Gore.
June 30—Tait's Corners at North Ekfrid.
July 5—Gore at Appin.
July 7—North Ekfrid at Tait's Corners.
July 11—Gore at Tait's Corners.
July 14—Appin at North Ekfrid.
July 19—Tait's Corners at Appin.
July 21—North Ekfrid at Gore.
July 28—Gore at Tait's Corners.
July 28—North Ekfrid at Appin.
August 3—Appin at Gore.
August 4—Tait's Corners at North Ekfrid.
August 9—Appin at Tait's Corners.
August 11—Gore at North Ekfrid.

ARMENIAN RELIEF FUND

Previously acknowledged.....\$96.10

R. M. McPherson, Treasurer.

Garden Party

A Garden Party under the auspices of Tait's Corners Ball Team will be held on

FRIDAY, JUNE 29

on the

School Grounds, Tait's Corners

Prof. King, of Hagersville, will render several musical selections on five different instruments.

Singing by Young Harry Lauder, of Tait's Corners.

The Loughton Orchestra will furnish music.

Violin selections by Wm. Coad.

Readings by Miss Mayne Grant, of Glencoe.

A dance will be given after the program, music for which will be furnished by the Loughton Orchestra.

Admission—Adults, 25c; children, 15c.

Refreshments served on grounds.

A Wise Purchase is the Best Economy

"SALADA"

TEA
is the wisest purchase you can make.
Pure, Fresh and so Delicious—Just try it.

TO MAKE A ROSE JAR.
Gather the petals early in the morning and dry in an airy place, then put them in a large stone jar, sprinkling a little salt over half-inch deep layers of petals. Add to this every morning until the roses are gone. After the last of the petals have been put in, allow them to stand in the jar for ten days, stirring the mass once a day. Have an ounce each of cloves and allspice, coarsely ground, and the same amount of stick cinnamon broken into tiny pieces. Pack in another jar, scattering the mixed spices in layers alternately with the flowers. Cover tightly and stand in a dark place for three weeks. Make another mixture containing one-quarter ounce each of mace, allspice and cloves coarsely ground, half a nutmeg (grated), half an ounce of cinnamon (broken fine), one ounce of powdered orrisroot, and a quarter of a pound of dried lavender flowers. Mix all together in a bowl and fill the rose jar with alternate layers of the stock and this other mixture. A few drops of one or more of the essential oils—rose, geranium or bitter almond—may be dropped upon the layers. Over the whole pour one ounce of fine cologne. This is sufficient to fill two quart jars and will keep for years. Rose-geranium, sweet clover, lemon verbena or other fragrant leaves may be added from time to time. It is not at all important that all of the ingredients should be used. One or more may be omitted if desired.

A WINDOW COOLING BOX.
A form of insect refrigerator consists of a box a foot deep, as wide as the window and the height of the lower sash. The back of the box and a part of each end are removed and the openings covered with screen wire. The entire box, with the exception of the front side next to the window, is covered with burlap, and it is then set on a shelf or supported by brackets just outside the window. Shelves are put in at convenient distances apart and the box secured in place and made to fit snugly inside the window casing, so that when the sash is raised the inside can be reached from the kitchen and when the sash is lowered it serves as a door for the box. In place of the sash, if the housewife prefers, a temporary screen can be used. The box is preferably placed in a north window or where the sun is not on it for long during the day. Set a large pan of water on top, and use some broad wicks of flannel or felt to connect the burlap covering and the water in the pan. Thus the water follows the wick and keeps the burlap moist whereby the air in the box is cooled and kept several degrees cooler than that of surrounding objects. These cooling boxes are more successful in a dry climate than in regions where the atmosphere is moist.

SUMMER GROWTH FOR FERNS.
I learned years ago that if I wanted the finest ferns in winter I did not want to encourage them to make their growth in the winter. They should grow in summer when the strong light will make the fronds dense and finely divided. The newer types from the Boston fern have very fine foliage if grown in a good light and the soil

is rich. Potted in a fresh soil in the summer months will make a handsome specimen from a pan planted with a half-dozen small plants, such as you can buy at any greenhouse for a few cents each. The shallow pan is better than the pot for the ferns do not root deep and all the soil deeper than two or three inches is not occupied by even the largest ferns, and makes a heavy weight to handle. The potting soil for ferns should be well filled with humus. If a garden soil is used, leaf mold or the loose black, rotted straw, and manure from around an old straw stack where cattle have fed, should form a third of the whole, and bonemeal should be mixed with it. Do not make the young plants too thick in the pan. Three for an eight-inch pan, or six for a twelve-inch, will be right. A tablespoonful of ammonia in a gallon of water makes a good liquid fertilizer to be applied frequently all summer. Nitrate of soda may be used instead, and may be sprinkled on surface.

A PRETTY SEASONABLE FROCK.
4363. Quaint and altogether charming is the "period" style. Embroidered voile with pipings in a contrasting color, and with organdy for sleeve puffs and kerchief would be nice for this model. The puffs and kerchief may be omitted. This style is also good for taffeta and crepe. It is a very youthful design.
The pattern is cut in 7 Sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 7 1/2 yards of 36-inch material. To make underbody of lining requires 1 yard. For kerchief and puffs of contrasting material 1 1/2 yards are required. The width of the skirt at the foot is 3 1/2 yards.
Pattern mailed to any address on receipt of 15c in silver or stamps, by the Wilson Publishing Company, 78 West Adelaide St., Toronto.

USES FOR HAM FAT.
Many people, particularly children, dislike the fat of ham, so perhaps a few simple ways of disposing of it will not come amiss in large families. We fry the fat with the lean and then cut off a generous rim, leaving the lean part for the table. The fat which is cut away is fried a little longer than for the table, then cut into dice and used when baking beans. The children who say they "hate fat meat" will eat the crisp tender bits with the beans and never know it. We also use the ham fat for flavoring bean soup. Fry the pieces (after cutting them finely), pour off the surplus fryings and put them with any meat that is left in the soup kettle. The fat of boiled ham is run through the meat grinder and used for baked beans, for baked macaroni, for bean soup, for mixing with ground beef for meat loaf, for seasoning string beans or succotash, and for every purpose where a nice ham flavor is liked. It saves the lean ham and lends flavor to many foods which lack zest.—H. R.

CHAPTER VIII.
"David, when we leave this meshwork of a Pekin thoroughfare I'm going to give all reins to my Mongol. If I don't, by the time we reach Culver's temple in the hills every ounce of self-confidence will have evaporated. There's nothing like stony silence to give one the creeps."
"I beg your pardon, Grace." David managed to navigate his pony through a medley of carts, a lunch vendor's equipment, and a couple of rickshaws, and reach his cousin's side. "I wonder what would happen if some of the New World energy were to suddenly lodge in half the population of China?"
"Headlong and sidelong collision, no doubt. Right of way being unknown, there would be a general smash-up, and Peking would gasp out its last on its own streets. Look, would you! What do you think of that for nonchalant stupidity?—if there could be such a thing!"
David followed his companion's gaze. Three donkey riders and half a dozen carts, overtopped by two camels, had met from four directions. As no right of way regulation existed, no one thought of allowing the other to pass, consequently the medley were all crowding closer and closer and making more inevitable a hopeless tangle. But might and dignity saved the day. The camels moved forward stately and invincible. The others stepped aside and, behold, a way was cleared.
"Three cheers for the kings of the desert!" laughed Grace, as her pony bore her through the clearing made by the camels. "Poor old China," she commented as David reached her side again, "she finds the Old World chains hard to break."
"And yet her people aren't so different from us," replied David reminiscently.
"Listen to the boy! I won't deny they have muscles, a tongue, and even eyes, but so have monkeys. But even monkeys have a little sense of cleanliness."
"Now, now, dear girl, you are leaving out the soul part."
"Their souls are covered up with layers of antiquity one seldom gets a glimpse of them."
"That may be the case with some, but even China has her shining examples of humanity. Mr. Wong Toy, for instance; a more intelligent, refined gentleman would be hard to find even in Europe or America."
"Indeed?" A dimple showed in Grace's cheek. Turning her head she became suddenly interested in the other side of the street.
"You haven't met him, of course," continued David.
"I have his niece, though."
David straightened in his saddle. Grace felt indignation eyes boring into the back of her head and the dimple increased to two.
"Perhaps"—David's voice was decidedly cool—"I mistake the meaning in your words and think you are less my memory is decidedly unreliable, not long ago I heard you sing exuberant praises of Miss Wong Toy."
"Can't one's mind change?" Grace hadn't seen her since, and I'm beginning to think that in my first judgment I was mistaken."
"No, you weren't," denied David, heatedly. "She is the fairest thing China or any other country could produce, a pure lotus blossom."
Grace turned quickly. The dimples had fled.
David flushed as he met the grave question in his cousin's eyes. "Well?" there was a note of defiance in his voice.
Grace's eyes grew soft as she noticed the tense lines in his face. "I suspected this, David, and was going to ask you to be fair to the girl, but I see you, too, are going to suffer."
"Suffer? Why should either of us suffer?" David's voice was almost irritable.
"You would marry her, then?"
"Why not, if she loves me?"
"Yes, love is a great power, a great panacea in most women's lives; but forgive me, David, I don't think even your love would make little Tu Hee happy. What is more, I know you agree with me, David."
David's head was bent. Grace grew uncomfortable at the silence that ensued. Had she said too much?—presumed on her relationship and friendship? Had she proclaimed her convictions without fact? A little frightened, she turned. She must say something to break this horrible silence. David was gazing straight ahead, his lips set in a hard, firm line. Reaching out a hand she laid it rather timidly on his saddle.
David looked at her, then covering her hand with his own, he said: "You are right, Grace. I have argued with myself until I have almost broken my own will, but, thank heaven, my love for her is too great to let me see my own shadow where her happiness is concerned."
"I am sure she is as much Western as Eastern in her make-up. Her eyes proclaim that." Grace seemed to be searching for a loophole for her cousin. "But against her Eastern education and her love for her own people, I'm afraid the Western strain would weaken to nothing."
David did not reply, but words were unnecessary. The shadow on his face affirmed he agreed with her.
Mechanically Grace guided her pony from a break in the road, as she pondered over the cruel prongs of fate. War-weary and battle-scarred, the man at her side was yet destined for wounds; for David, Grace knew, was one of the men who love well once in a lifetime. Why, she asked herself, did life make such a hopeless scrawl of some lives? She sighed heavily.
"What's this I hear?" David forced his voice to a banter. "Your friendship, nay, kinship, is the boon of my life—my salvation. Why that am 'Fortunate Youth' No. 2, so don't

Lifebuoy may be safely used on the tenderest skin.
It is wonderfully cleansing for little hands, faces, and bodies.
It leaves a delightful freshness and softness.

The Purpose of Garden Paths.
Garden paths should always go somewhere, says W. S. Rogers in "Planning Your Garden."
"Paths which start nowhere and end at a blank wall suggest purposelessness. It may be taken as an axiom that the principal path should commence at some point conveniently near, and preferably facing, the door by which the house inmates enter the garden. Its direction should be through the flowers, and it should have a natural termination, or final destination. The best terminal to a garden path in my opinion is the summer house, and when that feature is nonexistent, an arbor, or some other erection, should serve the purpose. Failing that, the path might terminate in a square expansion, in which a seat, sun-dial, or other appropriate object might be placed.
"It would be better to end it at a tool house or garage, or even at a potting-shed, than to allow it to stop suddenly nowhere."
Fortitude.
Though the Omnipotent decree That I descend into the mire, Yet will His hand reveal to me In smoking fax the unquenched fire.
For in the darkness I shall find Brave comrades, nurtured not to yield Enfranchised from the shifting mist, The craven heart, the nerve unsteered.
Out of the land of gloom and shade Him will I worship and extol, Who of all great things, greatest made The unconquerable human soul.

STORIES OF WELL-KNOWN PEOPLE

To Design War Memorial.
After months of consultation and study the French Government has finally decided upon Andre Ventre as the artist to design the monument to be erected at the mouth of the Gironde River by the people of France in honor of the arrival of Gen. Pershing and the first of the American Expeditionary Forces.
M. Ventre, who has for long been regarded as one of the foremost architects in Europe, has prepared a tower design for the monument, which will enable it to be seen for a great distance. Work has not yet been started on the monument, but it is expected to be completed before the end of the year, and a great celebration is being planned for its dedication.
Ralph Connor and the County Jail.
Rev. Chas. W. Gordon, of Winipeg, the well-known preacher and author, visited a certain jail on one occasion in order to take notes for an article he was writing on prison life.
On returning home he described what he had seen, and his description made a deep impression on his little daughter.
A few weeks later the author and his offspring were in a train which stopped at a station near a gloomy building.
A passenger asked, "What place is that?"
"The county jail," promptly answered another.
Whereupon, Ralph Connor was greatly embarrassed by his little daughter asking in a loud, shrill voice, "Is that the jail you were in, father?"
Cupid's Radio-Call.

Lady Pleasance Ross, daughter of the third Earl of Strathmore, Governor of Victoria, had the paternal blessing on her marriage with Mr. Owen McKenna, a wireless operator, and son of a Lanarkshire wagoner.
Lady Pleasance met Mr. McKenna on the liner on which he was employed—and to which he will return after the honeymoon—while on a voyage to Rangoon to visit a friend. When the liner was nearing port she asked Mr. McKenna to sign his name in her autograph book, but as there was not much space left she offered him her passport.
It was then that Mr. McKenna learned of her real identity. On reaching Rangoon she sent a cablegram to her parents saying she had become engaged and intended getting married as soon as convenient.

The Piano Often Called the People's Orchestra.
Three boys in a Western Ontario High School were called upon recently to give impromptu speeches before a general assembly of the students of that institution. Strange to say, the first one to speak was assigned the subject, "The Piano." With only a couple of minutes to collect his thoughts, he commenced something like this:

"Mr. Chairman and Fellow Students: I am very glad that I have chosen the subject I have, viz., 'The Piano,' as I have often wanted to express the great debt of gratitude we as human beings, owe to the inventor of the pianoforte. At this very moment you will notice on the platform beside me one of these instruments with its beautiful white ivory keys, awaiting only the deft fingers of the musician to stir our emotions and lead us into paths of high endeavor. And just think how this piano, which incidentally has been called the people's orchestra—and rightly so—just think, I say, how often this piano serves us without, I fear, our giving it the least bit of thought in return."
"Why, only yesterday afternoon the girls were going through their callisthenics with the aid of the piano. Today at noon our boys' choir was rehearsing for the annual concert, the piano being used for the accompaniment. And I dare say at the conclusion of our little gathering this afternoon, one of the pupils will come forward and play 'God, Save the King,' on this kind of instrument."
"I therefore ask you all to give more thought to the piano and when you hear it under all kinds of conditions and in all manner of places, remember that it is worthy of your highest regard."
With that, he sat down amid the ringing cheers of his fellow students. But he was not so selfish as to think it was he whom they were cheering. It was "The Piano," he stated—"the people's orchestra," for which they were expressing their appreciation and homage.

Light at Last.
The skipper was examining the ambitious young man who wanted to be the gunner's mate.
He asked him several questions, and was not at all pleased with the answers he received, and at last he said in desperation:
"How much does a six-pound shell weigh?"
"I don't know," the other confessed.
"Well," was the next question, "what time does the twelve o'clock train leave?"
"Twelve o'clock."
"All right, then; how much does a six-pound shell weigh?"
"Ah!" said the youthful mariner, as he suddenly saw light. "Twelve pounds."

Canada's Fifty-Sixth Birthday

Canada, on arrival of her fifty-sixth birthday, is yet a land of small and sparse population, and, taking account of this aspect alone, people in other lands frequently ascribe to the Dominion attributes and qualities of insignificance in other phases of her national life.

But with her population this atomic element ceases. In all her aspects Canada is to be thought of in terms of immensity. A land created on a Titan plan, of towering mountains, sweeping forests, horizon-bound plain, fertile valleys, expansive lakes and mighty rivers; all enterprise is conceived on a mammoth scale, and so in bringing these magnificent natural assets under human control, undertakings have in many instances surpassed in magnitude anything previously undertaken. The occasion of

of the world, with a 1922 production of over 380,000,000 bushels of such quality that uninterrupted for ten years the Dominion has carried off the world's first honors for that crop.

This country, to which are ascribed such inappreciable qualities, has a virtual monopoly of certain valuable mineral deposits. With but one-half of one per cent. of the world's population she produces 90 per cent. of its cobalt, 88 per cent. of its asbestos, 85 per cent. of its nickel, 12 per cent. of its silver and 4 per cent. of its gold. She possesses 17 per cent. of the coal resources of the globe and 71 per cent. of those of the British Empire.

Canadian enterprise has of necessity been planned and carried out on a scale compatible with these extensive resources. At Niagara Falls, Canada has great development of electrical energy, while the Queenston

Canada's 1922 wheat crop would make over 12 billion loaves of bread, and to carry it would require trains over 2,000 miles long. Canada raises more wheat and consumes more bread per capita than any other country. 200 million of the 388 million bushels were moved during the season.

Canada won the world's wheat championship in 1893; for ten years successively the world's first wheat honors went to the Canadian West, and in world wheat competition in 1921, Canada secured 22 of the 25 prizes. Seager Wheeler also captured the world's wheat championship five times, and created a world production record with 82 bushels to the acre.

another birthday to the Dominion is sufficient excuse to make a rough survey of some of these.

Canada's coastline totals in length nearly one-half of the circumference of the globe, with 12,000 miles of sea coast and 220,000 square miles of freshwater fisheries; she possesses most extensive and potentially wealthy fishing grounds, and in Lake Superior shares with the United States the largest body of freshwater in the world and its most extensive inland fishery.

Her forest resources are second to none and she is the world's first fur producer. She is surpassed by only one country in the production of pulp and paper and by only in the wealth of water powers.

Canada has a great reserve of virgin agricultural land with more than 200,000,000 acres of arable land in the Western provinces as yet untouched by the plow and many attractive fertile farms available for immediate settlement in the East. Yet, with what she has under cultivation, she has already assumed second place amongst the wheat-growing nations

power plant features the world's largest water-wheel-driven generator. At Bassano, watering the Canadian Pacific's vast eastern irrigation tract, is the continent's greatest irrigation dam, and at Gouin, at the head of the St. Maurice River, P.Q., is the world's biggest dam with a capacity double that of the Assuan on the Nile.

Among other features in which Canada leads is the possession of a vast game preserve in the Rocky Mountains, Alberta. This national park has an extent of 4,400 square miles and gives protection to 10,000 Rocky Mountain sheep alone.

These are but some few of the many big things Canada possesses—natural, agricultural, commercial and engineering—features of which a country yet in its infant growth may well be proud. Canada may yet be small in the number of her citizens, but time will remedy this; the stage is set and ready for that bigger population which, when it does come, will transform this country into one of the leading—if not the first—country of the world.

Dr. P. E. Doolittle re-elected president of the Canadian Automobile Association at the Hamilton convention.

Fire Situation Serious in New Brunswick

Fredericton, N.B., June 24.—There is no cessation of the forest fire menace in this province, and in a statement given out to-day Hon. W. C. Robinson, Minister of Lands and Mines, says that the situation is very grave. No word has been received since Saturday from Rocky Gulch, about ten miles from Campbellton, in Restigouche County.

At latest reports the village was threatened with destruction. One of the most serious fires is now situated in a heavily timbered and very dry forest area to the southwest of the Miramichi River.

Don't try to save money by saving food, like the man who traded his Leghorns for Bantams.

SECURITIES MOVED WITH WARLIKE CARE

Negotiable Wealth Guarded Through N.Y. Streets by 14 Armored Cars and 100 Police.

New York, June 24.—Fourteen armored motor cars, with portholes bristling with machine guns, followed each other in rapid succession yesterday afternoon through the crowded streets of Manhattan, transferring \$202,000,000 in negotiable securities from the old to the new home of the Bowers Savings Bank. Besides machine guns, the guards, drivers and other members of the trucks' crews were provided with side arms.

Silently and swiftly, the cars moved from the old Bowers Savings Bank establishment, Bowers and Grand street, up the Bowery. Fourth and Park avenues, to the new building of the banking institution at 42nd street and Park avenue.

More than 100 police were required to clear the route for the armored cars as they sped along, one following the other at five-minute intervals.

The fleet of armored cars was operated by the Adams Express Company.

Caterpillars Delay Train For Four Hours

Moncton, N.B., June 24.—Saturday's Canadian National Ocean Limited, from Montreal, was delayed four hours between Bathurst and Newcastle by swarming caterpillars, which have been giving a lot of trouble on certain sections of New Brunswick railways of late. Near Bathurst River, sectionmen, train hands and soldiers on the Ocean Limited worked for some time sweeping the insects from the rails before the engine could pull the train up the grade. At some points the rails were completely covered with caterpillars, the pest being the worst experienced in recent years.

The Flag of Old England.

All hail to the day when the Britons came over
And planted their standard with sea-foam still wet!
Around and above us their spirits will hover,
Rejoicing to mark how we honor it yet.

Beneath it the emblems they cherished are waving,
The Rose of Old England the road-side perfume;
The Shamrock and Thistle the north winds are blowing,
Securely the Mayflower blushes and blooms.

Hail to the day when the Britons came over
And planted their standard with sea-foam still wet!
Around and above us their spirits will hover,

Rejoicing to mark how we honor it yet.
We'll honor it yet, we'll honor it yet,
The flag of Old England! We'll honor it yet.

In the temples they founded, their faith is maintained,
Every foot of the soil they bequeathed is still ours.

The graves where they moulder, no foe has profaned,
But we wreath them with verdure, and strew them with flowers!

The blood of no brother, in civil strife poured,
In this hour of rejoicing encumbers our souls!

The frontier's this field for the patriot's sword,
And cursed be the weapon that faction controls.

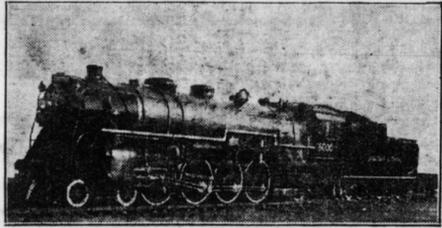

—Joseph Howe.

Weekly Market Report

TORONTO.
Man. wheat—No. 1 Northern, \$1.25; Manitoba oats—No. 2 CW, 55½¢; No. 3 CW, 52¾¢; No. 1 feed, 51½¢.
Man. barley—Nominal.
All the above, track bay ports.
Am. corn—No. 3 yellow, \$1.00½¢; No. 2, \$1.03.
Barley—Malting, 60 to 62¢, according to freights outside.
Buckwheat—No. 2, 70 to 71¢.
Rye—No. 2, \$1.40 to \$1.45.
Peas—No. 2, \$1.40 to \$1.45.
Milled—Del. Montreal freights, bags included: Bran, per ton, \$26; shorts, per ton, \$27; middlings, \$35; good feed flour, \$2.16 to \$2.25.
Ontario wheat—No. 2 white, \$1.21 to \$1.22.
Ontario No. 2 white oats—50 to 51¢.
Ontario corn—Nominal.
Ontario flour—Ninety per cent. pat., in Jute bags, Montreal, prompt shipment, \$5.10 to \$5.20; Toronto basis, \$5.05 to \$5.15; bulk seaboard, \$4.06 to \$5.
Manitoba flour—1st pat., in cotton sacks, \$6.90 per barrel; 2nd pat., 70¢.
Hay—Extra No. 2 timothy, per ton, track, Toronto, \$15; No. 3 timothy, \$13 to \$14; mixed, \$12.50 to \$13.50; lower grades, \$8.
Straw—Car lots, per ton, track, Toronto, \$9.50.
Cheese—New, large, 19¢; twins, 20¢; triplets, 21¢; Stiltons, 22¢. Old, large, 32¢; twins, 32½¢; triplets, 33¢; Stiltons, 33½¢. New Zealand old cheese, 28 to 30¢.
Butter—Finest creamery prints, 36 to 37¢; ordinary creamery prints, 34 to 35¢; dairy, 24 to 25¢; cooking, 22¢.
Eggs—New laid, loose, 28 to 29¢; new laid, in cartons, 32 to 33¢.
Live poultry—Chickens, milk-fed, over 5 lbs., 30¢; do, 4 to 5 lbs., 28¢; do, 2 to 4 lbs., 20¢; hens, over 3 lbs., 26¢; do, 4 to 5 lbs., 25¢; do, 3 to 4 lbs., 20¢; roosters, 17¢; ducklings, over 5 lbs., 30¢; do, 4 to 5 lbs., 28¢; turkeys, young, 10 lbs. and up, 25¢.
Dressed poultry—Chickens, milk-fed, over 5 lbs., 35¢; do, 4 to 5 lbs., 30¢; do, 2 to 4 lbs., 25¢; hens, over 3 lbs., 29¢; do, 4 to 5 lbs., 26¢; do, 2 to 4 lbs., 20¢; roosters, 17¢.
Corn—Am. No. 2 yellow, 98¢. Oats—Can. West No. 2, 60½ to 61¢; do, No. 3, 58 to 59¢; extra No. 1 feed, 57½ to 58¢; No. 2 white, 66¢. Flour—Manitoba spring wheat pat., 1sts, 86.90; do, 2nds, 86.40; strong bakers', 87.75.

4 lbs., 22¢; roosters, 24¢; ducklings, over 5 lbs., 30¢; do, 4 to 5 lbs., 28¢; turkeys, young, 10 lbs. and up, 30¢.
Beans—Can. hand-picked, 1b., 7¢; primes, 6½¢.
Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25¢.
Honey—60-lb. tins, 10½ to 11¢ per lb.; 3-2½-lb. tins, 11 to 12½¢ per lb.; Ontario comb honey, per doz., No. 1, \$4.50 to \$5; No. 2, \$3.75 to \$4.25.
Smoked meats—Hams, med., 28 to 28¢; cooked hams, 39 to 42¢; smoked rolls, 26 to 28¢; cottage rolls, 25 to 28¢; breakfast bacon, 30 to 34¢; special brand breakfast bacon, 34 to 35¢; baeke, boneless, 37 to 42¢.
Cured meats—Long clear bacon, 50 to 70 lbs., \$18; 70 to 90 lbs., \$17.50; 90 lbs. and up, \$16.50; lightweight rolls, in barrels, \$36; heavyweight rolls, \$38.
Lard—Pure tines, 15½ to 15¾¢; tubs, 15½ to 16¢; pails, 16 to 16½¢; prints, 18¢. Shortening, tines, 14½ to 15¢; tubs, 15 to 15½¢; pails, 15½ to 16¢; prints, 17 to 17½¢.
Choice heavy steers, \$8.35 to \$8.75; butcher steers, choice, \$8 to \$8.25; do, good, \$7.50 to \$7.75; do, med., \$7 to \$7.50; do, com., \$6 to \$6.25; butcher heifers, choice, \$7.50 to \$8; do, med., \$7 to \$7.50; do, com., \$6 to \$6.50; butcher cows, choice, \$6.25 to \$6.50; do, med., \$4 to \$5; canners and cutters, \$1.50 to \$2; butcher bulls, good, \$5 to \$5.75; do, com., \$3 to \$4; feeders, \$2.50 to \$3.50; do, med., \$7 to \$9; do, com., \$5 to \$6; lambs, spring, \$16 to \$16.75; sheep, choice, light, \$6 to \$6.50; do, choice, heavy, \$4 to \$4.50; do, culls and bucks, \$2.75 to \$3.50; hogs, fed and watered, \$8.35; do, f.o.b., \$7.75; do, country points, \$7.50.

MONTRÉAL.
Corn—Am. No. 2 yellow, 98¢. Oats—Can. West No. 2, 60½ to 61¢; do, No. 3, 58 to 59¢; extra No. 1 feed, 57½ to 58¢; No. 2 white, 66¢. Flour—Manitoba spring wheat pat., 1sts, 86.90; do, 2nds, 86.40; strong bakers', 87.75.

THE LARGEST PASSENGER ENGINE IN CANADA
Sixteen new passenger engines are shortly to be put in operation over the nationally-owned railway lines in Canada, of which the engine in the picture above is the first. The engine is ninety feet long and it weighs 390 tons. The engines are built in Kingston and represent the last word in development of speed and power locomotives.

MANITOBA TEMPERANCE ACT DEFEATED BY A SWEEPING MAJORITY

Government Control and Sale of Liquors Endorsed by Over 30,000 Majority in Winnipeg — Rural Polls and Small Towns Disappoint the Prohibition Workers.

Winnipeg, June 22.—Manitoba has gone "wet" by a sweeping majority which went beyond 30,000 in Winnipeg City, and which was going up slowly as the country was heard from. The bill of the Moderation League was endorsed and the policy of prohibition represented by the Manitoba Temperance Act, the law of the province for seven years, was overturned. The weather also was wet, and a violent electrical rain storm which swept the city at ten o'clock drove the bulletin crowds to cover, darkened newspaper offices and hampered seriously the collection and compilation of returns. It had been shown, however, that the country had reversed its traditional policy of "dryness" and appeared to be voting fairly evenly, while the city, which voted wet in the importation referendum of 1920 by about 7,000, rolled up tremendous majorities in almost every poll and more than tripled that figure.

Prohibition workers admitted by ten o'clock that their cause had met decisive defeat. They were surprised and disappointed at the showing from the rural polls and the smaller towns, and at the size of the majority in Winnipeg. Moderation League workers expressed gratification, and pointed out that they had claimed a change in sentiment throughout the province. Under the bill of the Moderation League, which Manitoba has to-day adopted, the Government will appoint a commission of three members to administer the sale of liquor for consumption as a beverage in the permanent or temporary residences of permit-holders, who may be residents of the province or guests. Breweries will be permitted to deliver direct. The Legislature will meet in July

pledged to enact into law the bill which was approved to-day. A second referendum is to be taken on July 11 on proposal of the Hotel Man's Association for sale of beer and wine in dining-rooms of licensed hotels with meals, and should it be adopted also the two systems will be amalgamated under the administration of the Government Liquor Commission.

Partridge la Prairie was the only major town which had reported a dry majority at ten o'clock, and that was under 100. Brandon was wet by nearly 1,000.

The Pas had a wet majority of 500. The solidly dry farmer vote seems to have vanished. Lakeside was dry by 450, but Morden-Rhineland was wet by 275.

Winnipeg, June 24.—Very little change in the large majority obtained in Friday's referendum in favor of the Moderation League's bill for the Government control of liquor occurred over the week-end, according to the returns tabulated up till a late hour to-night, the majority resting at 32,714. This reports an increase of about 200 since Saturday afternoon, rural polls being responsible for the increase.

There are still one hundred and sixty-eight rural polls to report, it was shown, including one whole constituency, Rupert's Land, from which no returns have yet been received. So far, 166,710 ballots have been counted, of which the Moderation League's bill was endorsed on 94,712, and opposed on 61,998. The Moderationists have obtained a majority of 6,728 in the districts outside of Winnipeg and 25,988 in the capital. The city vote was 46,459 wet and 20,871 dry, and the outside 48,253 wet and 41,627 dry.

\$6.20; winter pats., choice, \$6.05 to \$6.15. Roller—Bag of 90 lbs. \$9.05 to \$11.50. Bran—\$26. Shorts \$29. Middlings—\$34. Hay—No. 2, per ton, car lots, \$13 to \$15.
Cheese—Finest easterns, 16½ to 16¾¢. Butter—Choice creamery, 31¢. Eggs—Selected, 31¢. Potatoes—Per bag, car lots, \$1.25 to \$1.30.
Med. cows, \$4.75 to \$5; do, com., \$3.50 to \$3.75; calves, med. to fairly good, \$6 to \$6.50; well finished veal, \$8; com. sucker, \$5.50; fairly good pulled, \$4.50; sheep, \$5.50 to \$6; lambs, 13 to 16¢; real choice lambs, 17¢ per lb. Good quality local hogs, \$10.25 to \$10.50; poorer lots, \$10; Western hogs, fairly good weight, \$10; sows, \$6.50 to \$7; packers offering \$11 for select baron hogs selected under Government grading.

Lord Amphihill Grand Master of the Grand Lodge of England, A.F. & A.M., who is coming to Canada for the Grand Lodge of Canada meeting in Toronto, July 17, 18 and 19. This is the first time the Grand Lodge of England, the mother of Grand Lodges, has been officially represented on this continent.

Canada.
Canada, Maple land, land of great mountains,
Lake land and river land, land 'twixt the seas;
God grant us hearts that are large as our heritage,
Spirits as free as its breeze.
Grant us Thy fear, that we walk in humility,
Fear that is reverent—not fear that is base.
Grant to us righteousness, wisdom, prosperity;
Peace—if unstained by disgrace.
Grant us Thy love, and the love of our country,
Grant us Thy strength, for our strength is Thy name.
Shield us from danger, from every adversity;
Shield us, O Father, from shame! Last-born of nations, the offspring of freedom,
Heir to wide prairies, thick forests, red gold;
God grant us wisdom to value our birthright,
Courage to guard what we hold.
—Arthur Beverley Cox.

Land of Midnight Sun Views Annual Spectacle.

Dawson, Y.T., June 23.—The land of the midnight sun provided its annual spectacle last night for nearly 20,000 tourists.
"The end of the longest day last midnight found the thousands out of doors, gazing with varied emotions at the big red disc of light, which swung about the horizon at midnight and started again for the zenith without setting.

Bell of St. Patrick's Time Found in Abbey Ruins

London, June 24.—While excavating in the ruins of Nendrum Abbey, in Ulster, workmen dug up a bell which is believed to date back to the time of St. Patrick. The bell, which was found in the wing of the abbey, is made of riveted wrought iron originally covered with a coating of bronze. Except for a crack at the base and a broken handle the bell, though corroded, is in fairly good condition.

Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

While we are accustomed to consider the products of our forests as saw timber and pulpwood, there are many species of trees not suitable for such purposes, and yet are essential for the use to which they are put. The fruit trade, especially small fruits and apples, require immense numbers of baskets and barrels; our cheese and butter trade call for special boxes, and the general movement of trade calls for millions of boxes.

It is interesting to note some of these quantities produced in Ontario alone, as shown in a report for 1920 just issued by the Dominion Bureau of Statistics: Baskets, crates, etc., 1,948,841 Box shooks 5,641,286 Boxes and packing 3,263,114 Butter and cheese boxes 645,965 Tight barrels, kegs, etc. 596,719 Slack barrels, kegs, etc. 614,666

The industry is practically unknown that is not dependent upon the forest for some portion of its product.

Friends.

Much has been written on the immortal theme of friends and friendship. The subject runs no risk of exhaustion. As long as human beings inhabit our planet and discover that none lives to himself alone there will be the expression of a fresh, recurrent wonderment that along life's highway there spring so many flowers of affection if we will but take their fragrance and respond to their beauty as we go. We can have friends, if we are willing to have them. We may form enemies, as we choose to make them. No friendship is worth our while if it is built up at the expense of character; if we surrender our finer impulse and our driving purpose to influences that pull us down and hold us back from all that we ought to be.

The real friendship involves a responsibility and means the acceptance of a trust. Friends are to help one another. He who has a friend finds his pleasure in giving, not alone in taking. Yet it is a meagre, narrow spirit that refuses to take, if it means that the taking gives pleasure to those who bestow as to him who receives.

What a poor notion of friendship it is that makes it consist of mere reciprocal amusement, the idle frivolity of those without serious purpose, who gather to kill time and drown dull care! The friendships of the idle rich are vague, inane and perishable. Their insecure foundation is in the same rotten soil that underlies their unhappy marriages. If the restless, sensational excitement ceases, then there comes a sense of intolerable boredom; they become anathema and aversion, and to the other. No friendship can live where there is not a swift, eager interchange of human interests, great or small.

By no means must friendship be always on those august mountain tops that are the first and the last to catch the light of the sun. Friendship lives also at life's common level and by the multitude of little, adorable things—on a mere gesture, an inflection, a sudden beautiful light or a contrast of cool and quiet shade. It subsists on the minutiae of everyday existence as well as on the great, exalting moods that lift us above ourselves to the transcendental. Friendship is for the working hours as for the holidays. It brings to the common task the mettle that we need. It lifts us just when we think we must go under.

Remember the love of a friend and the first incentive is yours to do even better than you thought you could. When you have done your best by the one that expected nothing less, then you have kept the faith, as you were bound to keep it when you became a friend.

Fifty-five Armenian Orphans to Embark for Canada.

A despatch from Marseilles, France, says:—Through the efforts of a Paris committee, fifty-five Armenian orphans who arrived from Beirut will be taken to Chabourge, where they will be embarked for Canada.

The total flow of the five chief hot springs at Banff in Banff National park, Alberta, has been found by test to be about 40,000 gallons per hour, or approximately 1,000,000 gallons per day.

Last year a total of 2,590 birds were entered in the laying contests conducted by the Dominion Experimental Farms and these birds laid 391,806 eggs, giving an average of 151 eggs per bird. In average production British Columbia led with 181.2 eggs per bird, Ontario second with 178.5 eggs, and the Canadian Contest conducted at Ottawa, third with 167.1 eggs.

IN RABBITBORO
OH, DOCTOR - DID YOU HEAR ABOUT JUDGE BUCK'S ROBBERY?
NO! WHO'S HE BEEN ROBBING NOW - MISS FLOPPY?
OH! YOU ARE A CASE, DOCTOR WHITEY! - I DON'T KNOW WHAT TO MAKE OF YOU!
WELL - WHY NOT MAKE A HUSBAND OF ME?
Randall

Everybody Wants A Billie Burke Hot Weather Dress

Wonderful values and very attractive styles made exclusively for the "Better Class" trade copied from New York Styles. The Quicker, Better Method of Stable Cleaning

With one of my Toronto Litter Carriers, one man can clean your stable as fast as three in the old way. Do it, too, without the unpleasantness and muss of the wheelbarrow method. Dump the manure into a pile

where you want it or direct into the manure-spreader when desired. The Toronto Litter Carrier has several special features I know will appeal to you. Let me explain the advantages of its chain pull, why it turns on the smallest radius, its unbreakable bucket and others. I have other Toronto Stable Equipment which will make for cleaner and healthier cattle, bigger profits. Ask me about it as well. I have some interesting literature free for the asking.

Reports on Canada's Crops

At frequent intervals throughout the season the Bank of Montreal issues reports on the progress of the crops in Canada. These reports, telegraphed to headquarters from the Managers of the Bank's 600 Branches, cover every Province and form a reliable index of crop conditions.

The reports are furnished free. Upon request at any Branch of the Bank your name will be placed on our mailing list.

BANK OF MONTREAL
Total Assets in Excess of \$650,000,000.00

KILMARTIN
Wm. Robertson and son, of Ottawa, are visiting at the manse.
Mrs. R. E. McAlpine returned last week after spending some time in London.
Mrs. John H. McFarlane has returned to Detroit after spending a week with friends here.
Russell McAlpine, of Sarnia, spent Sunday with his mother, Mrs. P. E. McAlpine.
Mr. and Mrs. Hector McFarlane and little daughter Jean, of Detroit, accompanied by Mrs. Fairbairn, spent a few days with friends here.
The sacrament of the Lord's Supper will be dispensed in Burns' church on Sunday. Preparatory services on Friday at 11 a. m.
The annual Gaelic service will be held on Sunday, July 8th.

NORTH EKFRID
Cairnmore and North Ekfrid baseball teams played a game here Thursday evening with the score in favor of the home team.
The Ladies' Aid met at Mrs. Ben Patterson's last Thursday afternoon, with fourteen members present. The president occupied the chair. The afternoon was spent in sociable talk and a bountiful lunch was served by the hostesses.
Tait's Corners and North Ekfrid baseball teams are to play a game here Saturday evening.
Mr. McIngraves' new kitchen makes a great improvement.
Mrs. Mary Jane McPhail, of Armada, has returned home after spending a few weeks with friends here.
Sacrament of the Lord's Supper was observed here Sunday afternoon. The congregation was small, owing to the heat. Thirty-three members took sacrament and three children were baptised.
Joseph Blackmore had the misfortune to get in the ditch with his new car, but little damage was done.
Gore and North Ekfrid baseball teams played a game here Saturday evening, with score in favor of North Ekfrid.
The windstorm here last Tuesday afternoon did a lot of damage. It blew down Henry Pettit's silo and several of his apple trees. Sanford Laughton's barn was blown down, resulting in four sheep being killed, and several maple trees were uprooted.

WOODGREEN
Haying is the order of the day. Miss Gertrude Lantley, of Detroit, spent the week-end with her sister, Mrs. Roy Palmer.
The public school closes this week for the summer vacation.
Mrs. Thos. Simpson is visiting friends in Windsor.
Mrs. Roy Palmer and Madeline are spending the summer at the lake.

STRATHBURN
A meeting of the Battle Hill U. F. W. O. was held at the home of Mrs. Joseph Gilbert on June 6th. Reports of the convention at Mount Brydges were given, after which lunch was served by the hostesses. The next meeting will be held July 4th at the home of Mrs. D. Sawyer, when the roll call will be answered by giving recipes for summer drinks.

CAIRO
Mr. and Mrs. Gtton and family spent Sunday at the lake.
John McCabe, of Duluth, has returned home after spending a few days visiting his aunt, Mrs. Bentley, and other friends. He gave a very interesting account of his recent visit to the Holy Land in the Presbyterian church here.
Mrs. Annie Smith, of Windsor, is visiting her niece, Mrs. Alex. Munroe.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

DAVISVILLE
Mr. and Mrs. Amos Kelly, of Inwood, spent the week-end with their daughter, Mrs. Lawrence Babcock. Andrew Armstrong took a number to Kerwood last Wednesday to attend the Institute meeting.
Glad to hear that little Joe McLean is doing nicely after his operation.
Mrs. Sarah McMillan has returned to her home in Detroit after spending a couple of weeks with her sister, Mrs. Dan McLean.
Mr. and Mrs. Joseph Armstrong spent Sunday last at the home of Mrs. Fred Waterworth, Woodgreen.

CASHMERE
Harley Reed, George Thompson and George Hewitt, of Detroit, are visiting their parents here.
Miss Mildred Taylor, of London, is spending her vacation with her parents, Mr. and Mrs. A. J. Taylor.
Miss Ethel Moore spent the week-end at her home here.
S. E. Barwell, an old and respected resident of Fingal, died at the home of his son in Lansing, Mich., on Tuesday, June 19th, in his 92nd year.

There are few things more embarrassing than having your grocer drive up while you are paying cash for your goods.
What seems to be a satisfactory marital arrangement is for husband and wife to run the home together, the man to run the lawn mower and furnace and the wife to run the rest of the house.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They act painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that besides being an effective vermifuge, they are tonical and health-giving in their effects.

Quit Carrying Water

The Provincial Department of Agriculture has provided a Truck equipped with Air Pressure Water System, Hot Water Boiler, Sink Pump, Bathroom Equipment, etc., to be used in demonstrating the installation of a moderate priced equipment for supplying running water, and the conveniences made possible thereby, to rural homes. The Truck will be at the following places in Middlesex County:

PARKHILL	(Town Hall)	Saturday, June 30 - 12 noon to 8 p. m.
STRATHROY	(Fair Grounds)	Monday, July 2 - "
GLENCOE	(Skating Rink)	Tuesday, July 3 - "
DELAWARE	(Town Hall)	Wednesday, July 4 - "
HARRIETSVILLE	(Hall)	Thursday, July 5 - "
BIRK	(Market Square)	Friday, July 6 - "
LONDON	(Market Square)	Saturday, July 7 - "

A demonstrator will be in charge during the hours indicated, and the public, both men and women, are invited to visit the truck, examine the equipment, and have methods of installation, costs, demonstration of how most of the plumbing can be done with ordinary labor, etc., fully gone into.
GEO. A. PUTNAM, Superintendent of Institutes, Toronto.
HON. MANNING W. DOHERTY, Minister of Agriculture, Toronto.
R. A. FINN, Agricultural Representative, London.

The Studebaker Light-Six Sedan \$2225

—But You Can't Ride on the Paint!

Imitation diamonds can be made to look so real and sparkle so brightly that it is difficult to tell them from the genuine.
But try to sell one and you will find out its real worth in a flash.
Same with automobiles. Weakness of construction in a closed car can be hidden, for a time, with paint and varnish and fancy fittings. But all is not quality that glitters.
You can't ride on the paint. And when you place such a car in the second hand market, you suffer a heavy depreciation, because it lacked real intrinsic value at the outset. Use will never improve a mediocre product.
Motor car owners tell us that the trade-in value of any Studebaker car at the end of three or four or five years of useful life is greater than on any other car built today—the percentage of depreciation is the lowest.
No wonder the Studebaker Light-Six Sedan is the fastest selling quality Sedan in the world!
The name Studebaker stands for quality, durability, comfort and integrity.

LEES' Church - Sunday School

Lawn Social

WILL BE HELD

WEDNESDAY JULY 4

ON THE LAWN OF MR. J. W. REYCRIFT, O-M-L ROAD, 3 MILES EAST OF HIGGATE

The Committee has been very fortunate in securing the services of the following artists, and has spared no expense to sustain the good reputation that Lees' Church Sunday School Lawn Social has attained.

Mr. Frederick Whitlow

ACTOR AND ENTERTAINER

This celebrated artist is late of the Hippodrome, Toronto, and has just finished a two and a half years' tour in Australia and New Zealand, and who has travelled for years with the late Sir Henry Irving, England's popular dramatist.

Toronto Mixed Quartette

Composed of Miss MacNair, soloist, Bond St. Congregational Church; Miss Victoria Butt, soloist, St. Clair Ave. Methodist Church; A. C. Chapman, tenor, leader of St. Clair Ave. Methodist Church; Alfred Atkinson, Metropolitan Methodist Church.

Each member of this quartette is an artist of the very highest quality, and the ensemble is perfectly balanced.

RIDGETOWN'S POPULAR ORCHESTRA

will furnish music during the evening

Grounds will be Electrically Lighted

Let This Engine Pump Your Water

By simply attaching a Toronto Pumping Engine to your pump you can have running water for every purpose you desire. Think of the time and labor saved—the freedom from tiresome pumping.

Toronto Engines with direct connected jack are easily, but securely attached to the pump. Specially designed for pumping service. Smooth-running and almost noiseless. Easily adjusted to any height of pump. Operate economically on gasoline. An independent pulley on the crank-shaft makes power available for operating the churn, separator, washing machine, etc.

D. M. McKELLAR
 GLENCOE ONTARIO

A Toronto Water System, with this direct connected Engine and Pump Jack will give you the advantages of city water service. See me about it or ask me for book-lets.

BIBLE THOUGHT FOR TODAY

BEGIN THE DAY RIGHT:—Cause me to hear thy lovingkindness in the morning; for in thee do I trust; cause me to know the way wherein I should walk; for I lift up my soul unto thee.—Psalm 143: 8.

TOWN AND VICINITY

Owing to the holiday on Monday business places will be open next Wednesday.

Thursday was the hottest day of the year, the thermometer registering 97 degrees in the shade.

Rev. Mr. Galbraith, of Thamesford, will conduct a Gaelic service in Burns' church, Mosa, Sunday, July 8th, at 11 a. m.

The death occurred recently of Uriah Getty, a pioneer of Caradoc, aged 94 years. Mrs. J. W. Edwards, formerly of Glencoe, is a daughter.

A number of the Masonic brethren motored to Dutton Sunday afternoon and attended service in the Baptist church, when the festival of St. John was observed by the members of Cameron lodge.

The officers and a number of the members of Lorne Lodge motored to Ailsa Craig on Wednesday of last week and conferred the three degrees of Masonry in the lodge there. The Glencoe brethren were entertained at supper after the first degree had been conferred.

A C.N.R. freight train was derailed at Glencoe Thursday, blocking both main lines. The derrick from St. Thomas was sent to the scene and the damage was quickly repaired. Only one car left the track but it fell over on the other main line. No delay was caused to traffic.

In its report of a recent entertainment held at Ingersoll the Tribune of that town says:—"L. McNiven and Mrs. E. Turner, of West Oxford assisted very ably in the musical numbers, taking 'The Old Oaken Bucket' as a duet in splendid voice." Mrs. Turner was formerly Miss Annie Siddall, of Glencoe.

After the returns were received on Monday evening Mr. Lethbridge was heartily congratulated on his being returned as representative for West Middlesex. Mr. Lethbridge briefly addressed the large crowd which had gathered in the village, and a number of the ladies from both town and country presented him with a beautiful bouquet of flowers.

The death occurred in London on Saturday of John Sands, a former well-known resident of Glencoe, and brother of Mrs. John Mawhinney, Victoria street south. Deceased was 82 years of age and remains were brought to Glencoe on Monday, after a funeral service in the city, for interment in Oakland cemetery. Rev. A. S. Whitehall, minister of the Methodist church, conducted the obsequies at the grave.

Last Sunday was observed as Flower Day in the Methodist church here. The church was beautifully decorated with flowers and plants, an arch of daisies being particularly effective. Special numbers by the choir included two anthems, a duet by Mrs. (Dr.) Mumford and Mrs. J. N. Currie and a selection by the male quartette. Sermons by the pastor, Rev. A. S. Whitehall, were in keeping with the spirit of the day.

A number of the Glencoe Presbyterian ladies attended an interesting meeting of the W.M.S. District Conference held at Wardsville Presbyterian church yesterday afternoon and evening. Addresses were given by Mrs. McEvoy and the Ontario of London, and Miss Bessie Fennell, of Newbury. Musical numbers were rendered by Mrs. H. Galbraith, of Appin, and Mrs. George Faudels, of Wardsville. Representatives were present from neighboring villages.

A surprise party numbering about seventy young people motored to the home of Mr. and Mrs. W. G. Christner on Tuesday evening to bid farewell to their daughter, Peta, who is leaving with her parents this week for their new home in London. During the evening Miss Mayne Grant spoke a few words regretting the loss of a sincere friend, and Miss Thelma Waterworth made the presentation of a beautiful ivory clock on behalf of Miss Christner's many friends who were present. Ice cream and cake were served and an enjoyable social time spent.

SPECIAL NOTICES

Wedding cake boxes at The Transcript office.

Sum of money found. Owner apply at Transcript office.

Celery plants for sale. Apply to David Squire; phone 14 r 11.

Just when we get through buying coal we have to start buying ice.

PERSONAL AND SOCIAL

—Miss Helen Sutherland was home from Toronto for the week-end.

—George Grant, of Woodstock, spent the week-end at his home here.

—Mrs. L. D. Tall, of Rochester, N. Y., is visiting her sister, Mrs. Diggon.

—R. F. Howard, of Sarnia, spent a few days last week with Glencoe friends.

—Miss Bessie McCallum spent a couple of days last week with friends in Detroit.

—Miss Phemia Harris left on Tuesday to spend the summer with her sister in Keewatin.

—Mr. and Mrs. W. G. Christner and daughter Reta left today for their new home in London.

—The Misses Strachan, of Guelph, have returned home after visiting relatives and friends in Glencoe.

—Jack Daws, of Brown City, Mich., and John Epsy, of Peck, Mich., visited at Mrs. D. P. Mitchell's last week.

—Mr. and Mrs. Geo. Lethbridge and children, of London, visited his parents here for a few days this week.

—Dr. and Mrs. R. S. Freele, of Parkhill, were in Glencoe for the week-end, the guests of Dr. and Mrs. L. W. M. Freele.

—Miss Eleanor McIntyre, who was taken ill a few weeks ago, is visiting at her home in Melbourne. Her condition is somewhat improved.

—Mrs. W. A. Currie has returned from the hospital at London. Her many friends will be pleased to know that she has been restored to her normal health.

—Miss Kate Gillies returned home on Monday after spending a couple of months in Detroit and Orchard Lake, Michigan.

—Mrs. A. W. Bellerman, of Chicago, and Miss Edna McKellar, of Detroit, spent a few days last week the guests of Mr. and Mrs. Dugald McIntyre, Appin.

—Mr. and Mrs. E. T. Huston attended the Stevens-Huston wedding in Wardsville, June 20, at the home of the bride's parents, Mr. and Mrs. F. Huston, London.

—Sidney Overton, of Toronto, visited his sister, Mrs. David Reeves, in Glencoe on Tuesday. Mr. Overton has spent some years in the jewelry trade, and is on his way to take a position in Calgary.

—Many callers found their way on Friday to the home of Mrs. (Dr.) Lloyd Freele, when she received for the first time since her marriage, Mrs. E. Mayhew, Jr., who received with Mrs. Freele, was prettily frocked in henna tulle, while Mrs. Freele wore a charming gown of flame georgette with cut steel trimmings. The rooms were made most attractive with masses of peonies, and in the tea room a silver basket of roses made an effective centre for the dainty tea table with its pretty cloth.

Mrs. Willans ushered to the tea room where Mrs. (Dr.) R. S. Freele, of Parkhill, poured tea. Assisting in looking after the guests were Mrs. W. P. Hayter, Mrs. H. Jamieson, Mrs. W. A. Currie, Jr., and Miss Mary Munroe.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain, and various other irritants may set up a trouble impossible to irradiate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

A puncture is a little hole found in auto tires at long distances from phones or garages.

It is just half-past eight

The dinner dishes are washed, the children are in bed, and Mrs. — has settled down to a night's darning.

A hundred miles away, in the Hotel, Jim— has finished dinner, written the day's report and looked over the local paper. Time hangs heavy till, happy thought, he remembers Long Distance.

"Hello Mary! How are the children? How are you?"

Just three minutes at home and yet it makes all the difference. The hotel seems brighter. And Mary— well, the holes in the socks don't seem quite so large. Just the effect of a voice you love to hear. Keep the home ties strong, the Long Distance way.

Every Bell Telephone is a Long Distance Station

LAWN SOCIAL

A Lawn Social will be held on the Manse Grounds of

BURNS' CHURCH, MOSA

under the auspices of the Y. P. S., on

Monday, July 9, 1923

Gaelic Service

— ON —

SUNDAY, JULY 8th

at 11 a. m., conducted by Rev. Mr. Galbraith, of Thamesford

Musical program on Monday Evening will be given by Duncan R. Cowan, of Toronto, Canada's Premier Scottish Entertainer and Humourist; the Harmonic Male Quartette, of London, consisting of Chris. Pink, Percy King, Bert Howcroft and Fred Dowling; Laughton Orchestra, of Appin.

BOOTH ON GROUNDS

Admission—35c and 20c

Mac. Leitch, President. Christina Little, Secretary.

"COULD ONLY DRINK HOT WATER," SHE SAYS

Mrs. A. White finds relief in her first dose of Dreco—This splendid body builder went to the root of her troubles immediately—"It is a wonderful medicine," says this grateful lady.

Many women are suffering the ailments that made life a misery for Mrs. A. White, of 1063 Mabou street, London, Ont., for over two years. Indigestion, gas-trouble, dizzy spells and pains in the body—how many do not know them? Suffice it to say that the remedy is simple as Mrs. White found when she took her first bottle of Dreco, the natural herb tonic and regulator. Here is Mrs. White's story that every sufferer should read and profit by.

"I have never taken a medicine that did me as much good in so short a time as Dreco," declares Mrs. White. "I suffered for two years from gas bloating me up after meals. It was so bad sometimes it pressed against my heart, causing palpitation and shortness of breath. I could only drink hot water. My liver was sluggish, causing dizzy spells, and I had severe pains between my shoulder blades. Constipation was also a source of great annoyance. I surely feel fine since I started to take Dreco and I gladly praise it for restoring my health. I have felt better in the past week than I have for many months. My appetite is improving and the pains through my shoulders have been greatly relieved. My bowels are becoming regulated, and I haven't had an attack of indigestion since I began taking this remedy. Dreco is a wonderful medicine."

All the symptoms described by Mrs. White are due only to one thing—a run-down digestive system, to correct which Dreco is specially compounded from nature's own herbs, roots, bark and leaves. Give Dreco a trial today. You will find in it the same curative properties that Mrs. White discovered. Dreco contains no mercury, potash or habit-forming drugs.

Dreco is being specially introduced in Glencoe by P. E. Lumley, and is sold by a good druggist everywhere.

We Carry A Full Line

Tin, Enamel and Galvanized Ware, Sinks, Bathtubs, etc. Plumbing, Furnace-work, Roofing, Eavetroughing, Repairing, etc. done by a Practical Mechanic.

Soils and Woods

Address communications to Agronomist, 75 Adelaide St. West, Toronto

R. S.—Will you please tell me whether Sudan grass is of any value or not?

Answer—Sudan grass is not regarded as suitable for pasture crop. Its chief value would be as a catch crop in such a place as millet would be grown. Even for this purpose it is suitable only in warm soil that is fairly rich. At the Central Experimental Farm, a small area, left vacant through the failure of a Swede turnip seed crop, was sown to Sudan grass. The seed was broadcasted on June 16 at a rate of 20 pounds per acre and harrowed in. On August 21 the crop was cut and yielded at the rate of 14 tons per acre of green weight. A thick aftermath followed that reached a height of 18 inches when the first killing frost appeared. The soil on which the crop was grown was very rich.

G. H.—What can one do with sheep pasture to keep it from eggs or larvae of stomach worms?

Answer—When a pasture becomes infested with stomach worms the only satisfactory treatment is to break it up and to keep it in cultivated crops for two or three years. If this is not practicable, the sheep should be moved to fresh pasture once a month or oftener.

K. M.—I would like some information on the use of Bordeaux mixture for spraying potatoes. I have a five-acre field of early potatoes planted the last week in April. They seem to be growing pretty well, but I would like to know if Bordeaux would help any. How much would it cost per acre each time I sprayed them? How often should they be sprayed? Will the use of the mixture increase the yield any or enough to pay for the extra expense? This piece of ground was a heavy June grass sod that had been pastured for about fifteen years.

Answer—Where the potato crop is at all likely to be attacked by late blight or rot, it pays well to spray throughout the growing season. Experiments reported by the Experimental Farms have shown that from five to seven very thorough sprayings carried on over a period of ten years, increased the yield at the rate of 97.5 bushels per acre. In some of these years there was no blight yet the increase was always large enough to make the undertaking profitable. The cost of spraying on a field scale should

not cost \$1.60 per acre per spraying. On a smaller scale it might cost \$2 per acre. At this rate the spraying should be profitable in average seasons. Complete instructions for the preparation of Bordeaux mixture and applying it to the potato crop are contained in Circular No. 10 of the Experimental Farms at Ottawa.

F. B.—Please let me know what kind of alfalfa is the best to sow on mostly high land and medium soil. Should it be sown with oats or barley and as early as possible? How many pounds to the acre? I have never grown alfalfa so thought best to ask you for advice.

Answer—The two varieties of Ontario Variegated and Grimm's are both good and about equally valuable. If sown in the early spring at the regular seeding time for grain, it is well to sow with a nurse crop, preferably oats, at the rate of about a bushel and a half to the acre. If sown after the middle of June, it is better sown alone at the rate of about 20 pounds of seed per acre. If alfalfa has not been grown on the farm, the seed should be treated with a bacterial culture. This culture can be obtained in quantities to do 60 pounds of seed, from the Botanical Division of the Experimental Farm at Ottawa.

L. R.—I have a couple of acres of weedy muck land. I had thought of sowing Sudan grass and mowing it once (for hay) and then let it get a good growth and plow it under. Have also thought of dragging once a week or so and then in August sow it to rye and plow that under in the spring. Now, what do you think would clean it the best and still improve my land?

Answer—Sudan grass has been tried at the Experimental Farm on muck land and proved a complete failure. For such a location it is not to be compared with millet, either Japanese or Hungarian. Probably the best crop to sow for the purpose desired is a mixture of millet and sweet clover at the rate of 25 to 30 pounds millet and 15 pounds of sweet clover to the acre. When ready for hay the millet should be taken off. The sweet clover crop should then make a satisfactory growth for fall pasture. The heavy stand that should be expected from such a mixture should help the land by cleaning it and improving the texture.

Five Ideas About Roadside Signs

BY W. C. SMITH.

The roadside sign sells goods, but can you afford to pay more for a publicly located farm in order to make these sales? I have talked with several men who made specialties of fruit, honey, dairy products, and poultry, and had tried signboards.

"Don't believe it is worth while," said one man, "unless you have a steady product, keep a display out in front of the home, and have someone to look after it. You can figure on a spasmodic business."

"So far as that big sign along the inter-urban is concerned," another man told me, "I might as well have saved the lumber and paint it took to make it. Folks used to see signs signboards, but they are tobacco, fresh eggs, or clothing advertisements."

"I sell considerable stuff from my sign," said a lady who had an attractive bulletin board along a much-traveled road. "Sometimes we dispose of perishable stuff, or small quantities not worth advertising in the paper. It is quite a bother though. A good many want to visit, and while they

have spare time, I haven't. That is one reason I wonder sometimes if it pays me."

I asked a professor of poultry husbandry for his opinion about selling from salesboards. He said: "Personally I would prefer the farm less prominently located—provided it was on an improved road near school and church. I figure that my time would be worth more right out at work than it would be in looking after sporadic sales that come from my signboards."

"We sold all of our fallen apples last season, simply by writing a notice on the bulletin," said a prominent farmer. "We don't specialize like a lot of folks, but when we have anything to sell it doesn't take long to get rid of it."

A road sign will sell things, and there is reason to recommend it for certain purposes, but opinions indicate that the specialty farm needs a more regular outlet than this affords. I believe it is doubtful whether one can afford to pay much extra for the location of a specialty for its advertising value.

POULTRY

For years many poultry enthusiasts have said that leg weakness in young chicks is caused by feeding too fattening a ration, which causes the body to grow faster than the muscles, and makes too much weight on the frail legs. Others have declared that lack of exercise causes early hatched chicks which have been making a rapid growth suddenly to lose the use of their legs without losing their appetites or showing any other signs of disease. Still another theory has been that too high a temperature, together with dirty quarters, were the primary causes of leg weakness.

Although the cause of the trouble was not definitely known, the remedy has been the common knowledge of poultrymen for a long while, and simply consists in allowing the chicks the liberty of an outdoor run.

We know now that leg weakness in chicks comes from digestive disturbances brought on by the poor elimination of waste from the bodies of the chicks. The rations lack a sufficient amount of inert material, which causes the quick cleansing of the digestive tract. Giving oil does not help, but feeding a ration that is high in inert material prevents the development of the trouble, and aids in relieving it after it has developed. This can be supplied by cutting paper up very finely and adding it to the ration. The most satisfactory method of

preventing—or curing—the trouble is to allow the chicks to have access to fresh earth. One spring we were bothered with leg weakness and it was impossible to turn the chicks out, as we were having a very cold, wet spring. So, as it was impractical to let the chicks to the soil, we brought the soil to the chicks. Every morning, noon and evening a big blue-grass sod was brought to the chicks. These sods were put in the brooder house, upside down, for a couple of hours, until the chicks had picked out all the roots, and eaten all the earth their systems required. Then the sods were turned over so that the biddies could help themselves to the tender green grass. We also cut down a little on the amount of dry mash and scratch feed and in only a few days the chicks were improving. Of course, had the weather been different, we would have let the chicks out during the warm part of the day, but our way proved a very good substitute.

Eat a little less food in hot weather. Food makes heat, and in hot weather you need less heat.

Feed the cows two quarts of ground oats for ten days before she is due to calve and give her a pail of warm water. Put one tablespoonful of ginger in the feed. There won't be any trouble with afterbirth. I have tried this for twenty years and it doesn't fail.—R. H. P.

Extracted Honey Production.

The business of beekeeping is essentially one of forethought and preparation.

Before the crop of one year is harvested, preparations must be commenced for that of the next; that is, the foundation of this year's crop should have been laid last summer just before the close of the main flow, by seeing that each colony was headed by a good prolific queen; later, by giving adequate wintering in order that colonies might be strong in spring; and when the spring examination was made, by clipping queens to facilitate handling of swarms.

From the time that the bees are removed from winter quarters until the main flow, a large amount of brood rearing should be encouraged. If, however, there be a dearth of nectar between fruit bloom and the main flow, feeding to stimulate brood rearing will be necessary. See that the queen has ample room in which to lay; if extra room is needed, a second brood chamber is given above.

As the flow may come with a rush, enough supers should be on hand to take care of the crop. It is usual to allow 3 deep supers, or their equivalent, to each colony but this will vary with location.

Indications of the commencement of the flow may be recognized at the hive entrance in the greater activity of the bees and in their heavy appearance when alighting. Inside the hive are further indications in the presence of white wax and new honey shining in the cells.

Another good indication, and an accurate one, is a colony on scales.

The object of all manipulations is: To promote contentment among the bees, which is the keynote in preventing swarming, and to keep the workers together in a working mood.

To promote contentment, ventilation is given when necessary by raising the hive on 1-inch blocks, which are placed between it and the bottom board. Upward ventilation may be given by turning back 2 inches of the

quilt in front and raising the cover there with a one-inch block of wood.

Make examinations every 9 or 10 days to provide room for storing and to head off swarm preparations. In supering, before giving the first super, the queen is put in the lower brood chamber with an excluder above; if the weather is warm so that there will be no chilling of brood, the honey super is placed next with the upper brood chamber on top; otherwise place the upper brood chamber next with super on top. When a super is about one-third full, which can be judged by its weight, it is raised up and another one is placed between it and the brood chamber. Supers should be left on till all honey is capped over or at least two-thirds of it; this is very important, as uncapped honey is unripe.

In examining, if eggs are found in queen cells, destroy them and make a note of it on the record card of the colony. On the next examination, should eggs in queen cells again be found or larvae in queen cells, the colony should be immediately treated for swarming. One of the methods of treating, and a very good one, is that in which the cells are destroyed and the queen removed. (The queen and one frame of brood being used to form a nucleus.) Nine days later all queen cells are again destroyed and a laying queen given. It is advisable always to have in the apiary for emergencies spare young queens whether they be home reared or imported.

Whatever method of control is used the object is not to divide the colony. If a natural swarm emerges, give it on the old stand, leaving the parent colony alongside for 7 days that its field bees may strengthen the swarm when it is removed.

When a cow goes dry before freshening, milk her the last time on Sunday morning, before sun-up, and she will calve during the day and not at night. We have done this for five years, getting about thirty calves during that time, and not one was born in the night.—H. W.

How They Save Minutes

DRIVES AROUND FIELD IN DRILLING.

One way of saving minutes is to drill a field by driving around the field instead of going back and forth across it. I find this work can be done much quicker that way. The drill discs will not have to be raised, and by keeping one of the horses following the wheel track the work can be done very satisfactorily. When finishing, make a round from the centre of the field to each corner to fill in the spaces at the turn.—R. M. C.

FINDS MINUTES IN REPAIR SHOP.

A good method of saving minutes is to have a well-equipped repair shop on the farm. When something breaks it can be repaired during the noon hour or in the evening. This frequently saves many a trip to town.

The shop should contain a vise, post-drill, anvil and forge, soldering outfit, shoe repair kit, a good supply of bolts of all descriptions, an assortment of rivets, some wrenches and pliers.—J. B.

MAKE YOUR HEAD HELP.

We all can save minutes in our farm work if we will only use our head. When we go to the city or village to get a job done the things we shall likely need during the next week or two, and then purchase the entire list. Likewise, when going to the field in the morning we always have a wrench, a few nails and some wire, so that in case something does happen we have the chances are we can fix it without a trip to the house. Then, too, I think the farmer should go about his work in a way to overcome that tired and

nervous feeling. Work straight ahead and keep constantly thinking of the most efficient method of accomplishing the task you are at.—W. D.

MENDS VESSELS QUICKLY.

There are numerous savings, both in convenience and money, that may be effected by a little ingenuity on the part of the handy man—or woman—about the house. Kitchen utensils, both of tin and enamelware, frequently have holes come in them. How many of us can remember the days of our grandmothers, before germs were discovered, and the importance of sanitation so emphasized, when a piece of rag was drawn into the hole in the tin milk pan. There is a better way and more sanitary, and without the trouble of taking these articles to the tinner. If one will procure an assortment of tinners' rivets one of these may be put in the hole and riveted down, stopping it completely. Or a plug of lead can easily be whittled out with a jack-knife and hammered in. An irregular shaped hole may be fitted with a lead plug in this way and stopped.

Sometimes in using tinners' rivets a washer on one or both sides is needed. If washers are not at hand they may be cut out of sheet iron or a hole punched in to fit the rivet. A large crack that a tinner had failed to stop with solder in a copper boiler bottom was closed by two large washers cut out of sheet iron, and under one of these was placed a third made from lead, thus forming a seal more than the thickness of the sheet iron. A rivet brought these down firmly and completely stopped the hole.—E. H.

CANADA'S APPLE SHIPMENTS

APPLE SHIPMENTS OF THE SEASON OPENED AUGUST 30TH AND ENDED APRIL 30TH TOTALLED

1,145,109 BARRELS

18,275 BOXES

DURING THAT PERIOD 130 STEAMERS LOADED APPLES ALL WENT TO GREAT BRITAIN PORTS, EXCEPT

18,076 BOXES

(TO ST. JOHNS Nfld)

15,000 BARRELS

TO WEST INDIES

CANADIAN APPLES FOR THE OLD LAND

Apple shipments from Canada to Great Britain reached important proportions for the season just passed. The chart shows that 1,145,109 barrels and 18,275 boxes left Halifax in eight months.

Home Education

"The Child's First School is the Family"—Froebel.

Half a Mind—By Helen Gregg Green.

A little school marm was telling about speaking to the mother of a pupil about her son's poor work in school.

"Well," sighed the mother, "I really don't know what to do. I've told him he'll have to stay away from the movies this week and study, and I've half a mind to stick to it."

Half a mind! Therein lies the trouble with many mothers. When you're a half-a-mind mother, your children soon find it out and when they discover the fact, how your discipline will suffer!

I recently overheard several boys talking. "Come on, let's go in swimming," James coaxed. "Eddie grumpy but shook his head, 'Can't. Sorry! But Mom said, 'Not to-day.'"

"Aw shucks, Eddie, come on! Your mother'll forget what she said. Mine usually does." Half the time she doesn't mean it. "No, my mother won't," Eddie answered firmly. "She doesn't lay

down the law very often, but believe me, Bo, when she does, she means it!" "Oh, well, I'm going. My mother told me not to. Said she would spank me if I did, but she won't. At least," hesitatingly, "I don't think she will. Sometimes she means what she says, and sometimes she doesn't." And off James shuffled.

What a contrast between the mothers of these two boys, and how much better the effect of firmness!

I don't believe in nagging children; and I don't believe in giving perfunctory orders and rebukes every few minutes. But I most firmly do believe in meaning what you say, and having a good mind of your own. Occasionally you will change your mind about something. In that case it is wise to explain to your boy or girl just why you did so.

Your children will respect you more, and you will be a more successful parent if you are not the vacillating, half-a-mind type. And the matter of discipline will be much easier and pleasanter, and everybody will be happier.

DAIRY

Feeding a well-balanced grain ration to cows on pasture markedly increases the milk flow, helps to balance the grass ration and keeps the cows in good condition.

Pasture during the spring and early summer months may supply the needs of the dairy herd, but having grown very rapidly, it possesses a large amount of succulent matter in proportion to its dry content, consequently is low in nutritive food value.

Cows always flush in milk flow during the early pasturing season, but later the flow rapidly declines. This is due to the fact that grass is a natural milk-producing feed. However, for the dairyman to make the most of the grass season he must not allow his cows to become overworked. When a ration is inadequately balanced, like spring grass, there is danger that the large milk flow is being accomplished at the cost of other factors which must be taken into consideration, if milk production is to be kept up throughout the milking period.

I know that my cows keep in better flesh, come through the early pasturing season in better condition to meet trying conditions later, when I keep up the grain ration during the spring and early summer months. I feed mostly farm-grown grains, such as ground oats, corn meal, wheat bran with an allowance of one and one-half pounds of cottonseed per animal per day.—L. R.

The Bull for Beef Breeding.

The breeding of beef cattle has recently received an impetus through the removal of the British embargo. One of the most important steps in breeding of animals suitable either for the home or export market, is the selection of a proper sire. The sire should be of approved beef type, possess the best characteristics of the breed he represents, rugged of constitution, and of pronounced masculinity. The choice of breeds is of course optional, depending largely on the surrounding conditions and the inclination of the breeder. Herefords and Galloways are splendid rustlers, suitable for open lot and winter feeding. The Hereford has the advantage in size and early maturity; the Galloway in the possession of an extra heavy coat and the lack of horns. Aberdeen-Angus are noted for early feeding and finishing qualities, and Shorthorns for their size, substance, and general utility. As has been said, a thing of the greatest importance in breeding beef cattle is the selection of a bull combining as largely as possible first-class breeding with strong conformation.

Pasture May Kill Pigs.

It is quite common for pigs to bloat and die quickly when suddenly turned into green clover when they are very hungry or not accustomed to such feed. That often occurs when pigs have been grazing grass and the pasture becomes so short that the feeder decides a change is necessary, and so turns the pigs into a lush growth of clover without due preparation.

Wet clover, as with cattle, is most likely to cause bloat. Any green feed may have the same effect, under similar circumstances. The best method of raising hogs is to let them graze a succession of green crops from early spring until late fall. Rye, oats and peas, rape, clover, alfalfa and corn are the crops most used for this purpose, and losses from bloat or acute indigestion do not occur under this system of feeding; the pigs become accustomed to the green feed early in the season, and take it daily without becoming inordinately hungry.

Keep the Feet Trimmed.

I find that the feet of my sheep need more attention than is ordinarily believed to be needed. This is particularly true where the animals are running upon soft ground.

The rams seem to need this attention more than the ewes. Often the horn of the hog in growing out will throw the leg out of shape and make it possible for foot infections to start.

I simply catch the sheep, turn upon the rump and with a sharp jackknife pare back the over-grown horn until it is about level with the bottom of the foot.—R. C. D.

LESS BUGS AND MORE COWS

A certain farmer who does not wish his name mentioned, pastured on his farm last year, if estimates are correct, nearly one and a half million potato bugs, over sixty-three million plant lice and leaf hoppers, and one dairy cow.

The potato tops in his forty-acre patch grew luxuriantly and provided the finest sort of feed for the bugs and other insects, but in spite of the good growth the outcome was most disappointing. No exact figures had been kept to enable him to analyze the situation to its last detail, yet he knew that the income did not make sufficient to pay for the labor required and the seed used.

Before the last load of potatoes had been hauled and while the potato bugs and the plant lice were still resting peacefully in their winter quarters, this man was thinking very hard. He walked the floor and occasionally stopped before the fire to meditate as to the end of it all. However, he finally thought the matter through and resolved to make a change.

So here is what he is now doing: The old stables are being remodeled—cement floors, more and larger windows, good stanchions and mangers will soon be completed. A ten by thirty silo is lifting its head above the eaves of the old barn. Four good high grade Guernseys have been brought to the farm and others will come as soon as they can be found. Two neighbors have joined with this inspired farmer to purchase a pure-bred sire.

Potatoes, we are told, will not be abandoned, but will be planted in regular rotation with other crops needed to keep the cows. Sweet clover, alfalfa and corn will be prominent in this crop list.

Our prediction is that, in the course of five years, this farmer will look to his potato crop of 1922 as most valuable because it set him to thinking and was the means of lining him up on the right side of the dairy cow and of starting him in diversified farming.

Buttermilk for Hog Feeding.

A country that produces butter on a large scale ought to turn out a good class of hog products at a reasonable cost. Buttermilk is a very valuable hog feed, not so much for the nutrition it contains, but for its healthful influence on the hogs fed upon it. The excellence of both Irish and Danish bacon is to a great extent due to the use of this dairy by-product. In like manner, the hog raiser in this country who can get buttermilk for his pigs, ought also to succeed in his hog raising. He should be one of those receiving the ten per cent. premium for most of the pigs he markets. At any rate, the buttermilk ought to help him to secure the thrift and growth favorable to the production of "Selects" if his stock is of right type and judiciously fed.

As a substitute for dairy by-products, digester tankage is often recommended for growing pigs. At the Brandon Experiment Station, buttermilk and tankage were compared in a hog feeding test last year. Twenty-seven pigs divided into three lots were fed for 44 days. Care was taken to divide the lots equally with respect to thriftiness and weight.

The grain ration consisted of a mixture of three parts barley chop, three parts shorts, one part feed flour, freshly mixed and fed twice daily. The pigs were kept in open yards about one-sixth acre in area, and had access to rape growing in their yards, to supplement the grain ration.

Lot 1 received the grain ration mixed to the consistency of a thin slop in buttermilk, and fed as much as they would readily consume. Lot 2 received the grain ration, plus nine per cent. digester tankage, mixed to the consistency of a thin slop in water, and fed as much as they would readily consume.

The pigs in lots 1 and 2 were all in good healthy condition during the experiment, and continued to do well after the experiment was completed. Four pigs from lot three became unthrifty, and one died. The remaining five pigs in this lot continued to do well after the experiment was finished.

At the end of the test it was discovered that the lot fed on buttermilk gave over twice as great a profit over cost of feed as those fed the grain ration and tankage. The lot fed buttermilk gave over seven times as great profit as those fed on the grain ration and water. The lot fed on the grain ration and tankage, though not showing to advantage against the buttermilk fed pigs, gave almost three times as great a profit over cost of feed as those fed of the grain ration alone.

The experiment demonstrated further that, when buttermilk is available, it is a very valuable feed for growing pigs. The experiment shows also that, when buttermilk is not available, the addition of tankage, even at its present high price, is a valuable supplement.

Young men talk of what they are going to do; old men talk of what they have done; and feeble men talk of what they should like to do.

THE CHILDREN'S HOUR

OUR FEATHERED FRIENDS—THE BALTIMORE ORIOLE.

BY LEBEINE BALLANTYNE.

This week we shall talk about one of our most charming birds. There is so much good to be said about it and so little bad that one could fill pages just singing his praise. He wears a brilliant orange and black suit, which brought him his name from the early settlers of Maryland, who called him that because it resembled the colors of the livery worn by Lord Baltimore's attendants, under whose patronage the state was first settled. Swinging out on the slender branches of the elm or smaller trees is the pretty basket-shaped nest, woven by the oriole. This is the most admired of all bird nests. The twigs are woven skillfully with the help of the sharp awl-like bill and when completed are a marvel of skill, forming an ideal cradle for the baby orioles to swing back and forth with each motion of a kindly summer breeze.

Not only is the coat of the oriole to be admired and his nest a work of art, but his song earns for him the title of the Golden Robin. It is a rich, contralto voice that gladdens any district in which he chooses to locate and reminds one of a waterfall of tinkling silver notes.

His food consists mostly of insects such as caterpillars, beetles, the larvae of which are the pestilent wireworms, may beetles and grasshoppers. He is an ardent hunter of the insects and feeds mostly upon them. He may take a small percentage of fruit, but it is insignificant compared with the tremendous amount of good he can do where the above mentioned pests are found.

His body is a vivid orange with black wings, orange and black tail and jet black head and throat. His mate wears a more modest costume, and when these gala little visitors appear with their glad song, every care should be taken to attract them to the district.

To keep lemons from drying up and so losing much of their goodness, put them into empty, wide-mouthed glass jars. Use a rubber ring on the jar mouth and keep it tightly closed. You will be surprised to see how "plump" the lemons will keep under such conditions and how much longer you can keep them on hand.

When one has to "ding" a man in order to get a thing done in the garden, it destroys half the pleasure of having it. The men ought to understand that.

A TREATISE

on the HORSE—FREE!

This book is one of the best ever written for the student and the horseman. It is plain, every day, and contains all the information you need to know about the horse, his care, his training, his breeding and his feeding. It is a complete treatise on the horse, and is a valuable book to every horseman. It is a complete treatise on the horse, and is a valuable book to every horseman. It is a complete treatise on the horse, and is a valuable book to every horseman.

Dr. B. J. KENDALL CO., Ennsburg Falls, Va., U.S.A.

ISSUE No. 26—23.

**Queen of Roumania,
Picturesque and
Powerful**

One of the picturesque and at the same time one of the most powerful royal personages of Europe is Queen Marie of Roumania. One writer calls her the Woman Charlie-magne. She will deserve the title if by her plan of marrying off her daughters to rulers of neighboring kingdoms she succeeds in building up a Balkan empire.

Marie is now forty-seven. Twenty-nine of her years she spent in Roumania in a life of wearing activity, making love, writing plays, composing operas, doing motion picture pieces, marrying off daughters and running the country. And she still is a beautiful woman.

She has a husband, King Ferdinand. "But you can live in Bucharest for months at a time without being aware of his existence," says the writer. "In fact, until his recent delayed coronation, when people noticed there was some one standing up with the stately Marie, few people outside the Roumanian Court knew that the Mother of the Balkans did not rule alone. And even now they can't be sure of it!"

Diplomatic Triumphs.
As a woman she has achieved great triumphs. It must be remembered that she has won her victories alone, she has had little help from her husband and less from her ministry. Alone among the monarchs of Europe she personally directs the foreign policy of her Government and, perhaps at the moment she is the only monarch in Europe who officially affects in any marked degree the government policies of nations.

By a series of brilliant marriages she has laid the foundation for a vast Balkan empire—larger than France, and as large as England. There yet remains an unmarried king in the Balkans, Boris of Bulgaria. Stambulski, the peasant Premier, made a visit to Bucharest at Queen Marie's invitation. "Which of these is free?" he asked her, pointing to each of the three Roumanian princesses. Being told that the child, Ileana, was still available, he remarked in typical, blunt, Stambulski fashion, "She'll do for my king."

On Same Land for 900 Years.

The story of the Poubian family, French farmers who have the extraordinary record of living on the same farm since 1023 in the American Agriculturist by Barnard Ragner, now in France, who saw the present day representative of the family, M. Lacastes Poubian of Lucgarrier, decorated by the Minister of Agriculture of the French Republic. Mr. Ragner calls the achievement "the world's agricultural endurance record."

"This family belongs the distinction of having lived in the same house and tilled the same soil for a period of 899 years," writes Mr. Ragner. "That looks like a misprint, but it isn't, for the family has documents of undoubted authenticity to prove that back in 1023 a Poubian owned and cultivated the nucleus of the present homestead."

"Joan of Arc chased the British invader from the soil of France, but the Poubians plowed their fields. John Calvin wrote his institutes and stimulated the reformation started by Luther and Zwingli, but the Poubians sowed their wheat. Christopher Columbus discovered America, but the Poubians harvested their grain. Jean Jacques Rousseau preached his revolutionary doctrines; the French Revolution came, Napoleon Bonaparte, like a gigantic comet of unexampled brilliance, flashed across the European sky, but the Poubians, serenely, loyally, wholeheartedly, cultivated the acres which the thrift of ancestors had bequeathed them."

The farm which the Poubian who began the family register bequeathed to his heirs is in the department of the Basses Pyrennes near the Spanish border. It has increased until it now includes eighty hectares, approximately 200 acres.

"The present Poubian is the twenty-fourth in the ancestral line," says the American Agriculturist. "He is a fine example of the French farmer—strong, self-controlled, a capable artisan of the soil, and passionately devoted to his home and his country. He is the Mayor of his township; and his son, now rendering his eighteen months of military service to France, hopes some day to assume his father's ancestral and civic functions."

Perfect at Last!
As Margerie's school reports weren't entirely satisfactory, her father said to her, "The first time that you come home with a hundred in anything I'll give you a dollar."

Time went by, and still Margerie could not claim the reward. Then one day the child was taken ill. When the doctor had gone she asked, "Mamma, am I very sick?"

"No, dear; your temperature is a hundred, but the doctor thinks you'll be better tomorrow."

Margerie's face lighted up. "Then, mamma, I can have my dollar, can't I? Papa said he'd give it to me if I got a hundred in anything."

Surnames and Their Origin

FERDINAND
Variations—Feron, Fernando, Ver-non.
Racial Origin—Spanish.
Source—A given name.

This is a family name which comes to us for the most part through the Spanish, but which traces back to the ancient Gothic or Teutonic speech, to that race of which so comparatively little is known to-day, despite the fact that it overran the greater part of southern Europe and was responsible largely for the fall of the great Roman empire.

Little is known of this race, not because its blood is not predominating to-day in many countries commonly classed as "Latin," but simply because upon completion of its conquest it recognized the value of the superior civilization and language of the Roman predecessor, and adopted them for the most part at once. Names, however, were naturally not adopted to the same extent as speech.

The Goths had a given name, "Ferdinand," the meaning of which was "adventuring life," or, in other words, "courage." In the course of time the Spanish Goths, among whom it seems to have been most popular, simplified it into "Ferman," and then into "Ferdinand." Among the more northern races it became "Ferdinand."

And from these given names have developed the foregoing family names, in the natural process by which percentage was at first indicated, with the ultimate broadening of application to include a specific family.

Vernon for the most part does not belong in this group, but in some instances it is but a changed spelling of Feron or Ferman.

MEAD
Variations—Meadows, Dupre.
Racial Origin—English, also French.
Source—A locality.

It is the variation of Meadows in this group of family names which gives the clue to the origin.

These names were, of course, originally descriptive of the localities in which their first bearers lived, and were of local nature.

In the days when populations began to multiply so quickly that there were not enough given names to go around, the first result was the multiplication of given names into variations through the addition of diminutive endings and the use of nicknames. But even this was not enough, and in everyday speech men found it necessary to indicate which John or Thomas or Harry they were referring to. This they did by some reference to parentage or to the place the man lived, or to his trade or some personal peculiarity.

Thus such names as "Tom atte Mead" (Tom at the Meadow) or "Gerald de Mead" (Gerald of the Meadow) came into being. Possibly it would pass out of existence with the man bearing it, and his son be known as Geoffrey the Red, or by some other name. But if the family continued to reside by the meadow long enough, sooner or later the expression "atte Mead" would come to designate the family and not a mere individual member of it, and so would become hereditary and firmly settled in a few generations.

The name of Dupre is simply the French equivalent of the English "of the meadow."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little one she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers, or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

No One Knows.
"What is it you smell all the smells you?"
"Fer tank's leakin'! Oh, yes, yer want me t' answer that, donjer? Well, no one nose."

There is a poverty of the mind as well as of the pocket.—Alderman Beh Turner, M.P.

Milnard's Liniment for aches everywhere

School Closes.

Put by your books!—
Close with your wistful eye the door
That opens to your childish hand no more.

Before you is the world to gain or lose,
To conquer or to worship, as you
may choose.

Today is the great day—to-day you
turn
Life's lesson from a broader page to learn;

To work beneath a sterner teacher's eye;
And in the Halls of Time, a harsher
test to try.

Put by your books!—
Yet do not quite forget the truth
And beauty in them, the short days of
youth,

Nor its sweet dreams, its promise and
its joys.
The wise of pleasant memories never
cloys

As does the nectar of too dear success,
Whose price and joy alike are in excess.

Put by your books, yet keep them that
your soul
May drink of youth and keep its wis-
dom whole.

—Florence B. S. O'Connor, B.A., Iro-
quois, Ontario.

**Toothache Shown on French
Movie Films.**

An aching tooth in action is the latest subject for the movies in France in a crusade to improve the teeth of the people. During the war it was found that 75 per cent. of the manhood of the nation were dentally unfit.

The Ivory Cross, a national aid fund that has provided dental treatment of more than 800,000 cases, has now sponsored a firm in which a throbbing nerve is pictured in its most excruciating stages. Those who saw the picture attested its vivid accuracy.

THE SMALLEST AIRPLANE
The world's smallest airplane is that shown in the picture. It reaches a height of 2,500 feet and a speed of 65 miles an hour. Its engine is 5-6 horse power. At the left is the inventor, Major Gnosplus, and at the right, the pilot, Mr. Lancaster Parker.

**SEES BRAIN SURPLUS
WITH MOST HUMANS**

SIR ARTHUR KEITH RETURNS FROM AFRICA.
British Scientist Quits Gorillas and Turns to the Study of Mankind.

We do not use our brains to half their capacity, says Sir Arthur Keith, British scientist, who has just returned to London from the African jungle, where he made a minute study of the brains of gorillas and gibbons.

"Most of us," says Sir Arthur, "have more brains than we know what to do with."

GIRLS AND WOMEN HELD BY ANAEMIA

Rich, Red Blood Needed to Restore Their Health.

There are thousands of growing girls and women held in the deadly clutches of anaemia. Slowly but surely a deadly pallor settles on their cheeks; their eyes grow dull; their step languid; their appetite fickle. Daily they are losing their vitality and health. To obtain this rich blood, head-aches and backaches follow, and life seems to be scarcely worth living. What is needed in cases of this kind is new, rich red blood which will bring back to weak, ailing girls and women the charm and brightness of perfect health. To obtain this rich blood, try Dr. Williams' Pink Pills. Their action is directly upon the blood; they supply the elements necessary to make it rich and red, and in this way they bring back the glow of health to the cheeks; brightness to the eyes, and the lightness and energy to the step.

And health, as a very pale, and fed constantly tired. In our local paper I ran across the testimonial of a lady who told of the benefit she had from using Dr. Williams' Pink Pills, and I decided to give them a trial. Very soon I felt a change for the better, and by the time I had taken five boxes I felt like a new person. The tired, worn-out feeling had vanished and I could go about my work from morning until night without any difficulty. I certainly cannot speak too highly of Dr. Williams' Pink Pills and when I meet anyone weak and run-down I strongly advise them to give these pills a trial.

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

London's "Big Ben" Model of Accuracy.

The British claim "Big Ben," the clock on the tower of the Houses of Parliament, is the most reliable one in the world. This statement is based on the fact that Big Ben received the noon wireless time signals from Greenwich on 293 days last year, and its error was less than one second after 203 days.

These facts were disclosed by Sir Frank Dyson, Astronomer Royal, who says Big Ben is practically up to pre-war efficiency. Big Ben's record is considered all the more remarkable in that he is not corrected daily, as are other clocks electrically connected with the Greenwich Observatory.

Notwithstanding this extraordinary record, Big Ben was recently given a vacation while workers carefully overhauled Westminster's monster time-piece for the first time since the war.

Ups and Downs.

Pendants of amber grace
Laburnum's frock,
Threaded on sunbeam lace
In the wind's face.

The blossoms rear their heads
On lilac's breast;
Hung not on drooping threads,
Their upward quest
No radiance trends.

Sometimes my spirit wears
The lilac gown.
Sometimes the robe of cares
Weigheth it down—
Now praise, now prayers.

Milnard's Liniment used by Physicians

**GRENIER GAINS 18
LBS. ON TANLAC**

**Says Famous Medicine Ended
Long-Standing Dyspepsia
and Restored Perfect
Health.**

"The Tanlac treatment not only ended my stomach trouble, but it built me up eighteen pounds, and I never felt better in my life," is the positive statement of Armand Grenier, 250 Marquette Street, Montreal.

"Dyspepsia had me in such awful shape I scarcely dared to eat, knowing the misery I would have to suffer. My nerves were shattered. I would lie awake sometimes all night, and once I woke up from a dose feeling like I was about to smother, and thought my end was near. Then for months I was mighty careful about my eating, but I didn't seem to get any better until I took a friend's advice and started on Tanlac.

"Every day I got better, till now I enjoy tip-top health. I have a ravenous appetite, perfect digestion, and can sleep like a top every night. Tanlac gets my best word every time."

Tanlac is for sale by all good druggists. Accept no substitute. Over 87 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

A new kind of field glass picks out khaki-clad figures as easily as if they were dressed in bright red. The lenses disintegrate the blend of red, orange and green light and so make the soldier's figure stand out sharp and clear.

The Lauretite Co., Ltd., of Grand Mere, P.Q., have about 20,000,000 white spruce seedlings and transplants in their nursery.

Obedience is a Christian virtue. It is in no sense a humiliation.—Bishop Wellton.

I went to sea at fourteen with 250 and the story of the Prodigal Son.—Admiral Sir Guy Gaunt.

MRS. WINSLOW'S SYRUP
The Infants' and Children's Remedy
Children grow healthy and free from colic, diarrhoea, indigestion, constipation and other troubles if given it at teething time. Safe, pleasant—always brings remarkable and gratifying results. At All Druggists.

**RED PIMPLES ON
FACE 3 YEARS**

**Itched and Burned. Lost
Sleep. Cuticura Heals.**

"My face was affected with pimples for about three years. They were hard and red, and festered and scalded over. The pimples itched and burned causing me to scratch and irritate them, and I lost many a night's sleep on account of the irritation."

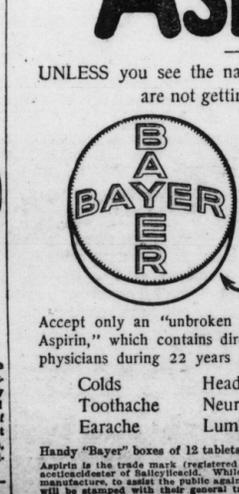

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample which helped me so I purchased more, and after using four cakes of Soap with the Ointment, I was healed." (Signed) Miss Martha Theusch, R. 2, Box 45, Vining, Minn.

Give Cuticura Soap, Ointment and Talcum the care of your skin.

Sample Book Free by Mail. Address: "Cuticura, Limited," 445 St. Paul St., Montreal, Quebec, Canada. Where Soap, Ointment and Talcum are sold. Cuticura Soapboxes without stamp.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the callus, without soreness or irritation.

Before His Time.
A very crusty, gouty old gentleman lost patience with his doctor because the latter did not make enough fuss over the pain he suffered.

"Doctor," he cried out, twisting and turning in agony, "you don't understand! You don't seem to grasp the case! You talk as though there were nothing the matter with me, whereas I assure you I am enduring the torments of the lost!"

"What, already?" replied the doctor.

The use of the brain expends more human energy than any form of manual labor.—Sir James Cantile.

**HELP FOR
YOUNG WOMEN**

**Mrs. Holmberg Tells How
Lydia E. Pinkham's Vegetable
Compound Helped Her**

Viking, Alta.—"From the time I was 15 years old I would get such sick feelings in the lower part of my abdomen, followed by cramps and vomiting. This kept me from my work (I help my parents on the farm) as I usually had to go to bed for the rest of the day. Or at times I would have to walk the floor. I suffered in this way until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. I have had very satisfactory results so far and am recommending the Vegetable Compound to my friends. I surely am glad I tried it for I feel like a different person now that I don't have these troubles."

ODELLA HOLMBERG, Box 98, Viking, Alta.

Letters like this establish the merits of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking it.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and today holds the record of being the most successful remedy for female ills in this country, and thousands of voluntary testimonials prove this fact.

If you doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Mrs. Pinkham's private text-book and learn more about it.

What Did You Do with That Match?

The suffering and loss caused by forest fires are common knowledge and, yet, carelessness with fire in the forest continues. These forest fires are practically all preventable.

Save Ontario's Forests They're Yours

Every individual who steps inside the woods should remember he is in the midst of highly inflammable property, for the upper layer of ground in the forest consists of partially rotted wood, which will burn. Lack of consideration for this gave rise to the strenuous situation in Ontario the last week of May and the anxiety for days in some settlements.

Thoughtlessness or bad judgment or carelessness cause practically all forest fires. Your co-operation, as a citizen, is needed to prevent these fires by taking the same care in the woods as in your own home.

Parliament Buildings
Toronto, Ont.

QUESTIONS and Bible Answers

How can we choose between life and death?—Romans 8: 13.

NEWBURY

Miss Ann J. Connelly, of Detroit, spent the week-end at her parents' home here.

Misses Ida Gibb and Nellie Archer returned to Detroit on Saturday morning. After leaving Miss Gibb's home near Wardsville they spent a few days with Miss A. L. Tucker.

Mrs. R. H. Moore and daughter, Betty Lorraine, arrived home Wednesday evening from a visit with Flesherton and Toronto friends.

Mr. Bowland, of Tupperville, spent the week-end with his son, of the Bank of Montreal at Wardsville.

Allan McG. Bayne passed in his fourth year work at the Dental College, Toronto.

Mr. and Mrs. R. J. Haggith and Mr. and Mrs. Jack Cousins and Baby, of Harrow, attended the wedding of Mrs. Haggith's niece, Miss Pearl Wrencher, and Walter Beaul, at Bothwell on Sunday.

Rev. C. D. Farquharson's many friends are sorry to learn that he has accepted the call to Windsor, to take effect soon.

At a meeting of the Boy Scout Council called for that purpose here Monday evening it was decided unanimously to accept the tender of some of our leading and progressive citizens and citizens a subscription list to secure the balance of sufficient funds to buy uniforms, tents, equipment, etc. So far the boys have been self-reliant, and with the aid of their energetic scoutmasters have raised a creditable sum, meeting all expenses and having a nice surplus. At the present time, however, in view of the annual outing it is essential that the lads be properly equipped, and the general feeling is that our people will respond generously to help the boys along. A year ago by this same method uniforms were provided for the ball team in a few hours' canvass, so the Scout Council are thus justified in their confidence that the response will put the lads over the top.

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

WARDSVILLE

Mr. and Mrs. D. L. Purcell spent a few days in St. Thomas last week.

Mrs. Cunningham spent a few days with Miss Campbell.

Mrs. J. Faulds, of London, visited at the home of Mr. and Mrs. J. V. Faulds here.

Mr. and Mrs. D. Snary and children, of Detroit, and Mrs. Snary, of Croton, visited friends in the village over Sunday.

Mrs. Yates, who has been on the sicklist, is able to be around again.

Miss Archer, of London, is ill at the home of her son, Hugh Archer.

A. W. McVicar and Mary McVicar, of London, spent the week-end with relatives and friends in the village.

Mrs. D. Ellwood entertained at her home on Tuesday evening for the Misses Helen and Florence Atchison, who leave shortly for their home in New Liskeard.

Mrs. Potter was re-elected president of the county W.C.T.U. at the convention in London recently.

The Ladies' Aid of the Presbyterian church held a quilting at Mrs. D. Hubbard's last week.

Rev. C. D. Farquharson has resigned as minister of the Presbyterian church here and has a new charge at Windsor.

Alex. Mateson and daughters Muriel and Elinor, of Detroit, spent the week-end with Mr. and Mrs. Peter O'Malley.

Miss M. C. Farrington and Miss I. Clement have taken positions on the staff of the high school in Elora.

Mrs. Douglas left Wednesday to spend a few weeks in Toronto.

Notice.—Monuments in Scotch and Canadian granites furnished. Inscriptions cut at the cemetery.—Wardsville Granite & Marble Works; Chas. Minna, proprietor.

CRINAN

Miss Nellie Campbell attended the graduation of the nurses of the General Hospital, Chatham, on Tuesday last.

David Johnston spent a few days in Clinton recently.

Miss Jean Currie, of Montreal, is visiting at Dan Currie's.

Mr. McMillan, of Cleveland, is visiting his uncles, the McMillan brothers.

Miss Marion McEachren has returned from the Normal school.

Miss Edna Burrows has been engaged to teach at Crinan school for the coming term.

SHETLAND

Russell Gray and James Blake spent the week-end at their homes.

Mrs. Cherrington and Mrs. Conlon, of Rosetown, Sask., spent a few days at Fred Jeffery's.

Mr. and Mrs. Henry Showers, of Detroit, and Mr. Short and Miss Mildred Bolton, of Inwood, spent the week-end at Wm. Bolton's.

William Brown, of Oil Springs, spent Sunday with Shetland friends.

Miss Grace Bilton and Florence Bodkin spent Sunday with Beesie Jeffery.

Mr. and Mrs. A. G. Munroe spent Wednesday with Robert Gray.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use and certain and satisfactory in its action.

MELBOURNE

Melbourne, June 21—Although the summer heat still continues, the continuation school students are writing their examinations. Miss Davidson, principal of Mount Brydges school, is presiding here, and Miss Brunkard is at Mount Brydges.

The members of the Methodist church and a few friends gathered in the Sunday school room on Wednesday to have one more social evening with the pastor, Rev. Dr. Brown, and Mrs. Brown before they leave for their new home in Wrochester. A program was given, consisting of solos by Miss Margaret Stevenson and Wm. Lewis and readings by Miss Florence Dees. Then Dr. and Mrs. Brown were called to the platform, while Mr. Lewis read a well-written address. Mrs. Gilbert McLean, president of the Ladies' Aid, presented Mrs. Brown with a silver hot water kettle and alcohol lamp and Dr. Brown with a silver ever-sharp pencil. Edmond Richards occupied the chair. The ladies served a lunch and a social time was spent. Dr. Brown will preach his farewell sermon on Sunday evening. Rev. Mr. Shoop is expected to be here for the following Sunday.

Rev. Mr. Oliver is visiting friends in Hildesheim. He will return at the end of this week, accompanied by Mrs. Oliver and their three children. The ladies of the Presbyterian church have been very busy preparing the manse for the new minister and his family.

The Woodman Hall was well filled last evening for the political meeting. Hugh Brodie occupied the chair and addresses were given by Alex. Darragh, of St. Thomas; Dr. Rice, of Delaware, and C. M. Macfie, the Liberal candidate for Middlesex West.

The Mission Band of the Methodist church held their regular meeting on Saturday afternoon in the Sunday school room. The girls and boys gave a splendid program, consisting of piano solos, duets and readings. They were assisted by Miss Lizzie Cornell, who told a story to the children, and Miss Mary Robinson, superintendent of the Band, who presided at the meeting. After the program Mrs. (Dr.) Brown, who organized the Mission Band here, was called to the platform. An address was read by Miss Laura Collier, and Miss Blanche Hardy presented Mrs. Brown with a cut glass basket filled with pink roses and Ronald Hiscox presented a bouquet of American Beauty roses.

Mrs. Brown made a very suitable reply, expressing her appreciation of the kindness shown to her during the three years she has lived here. As vacation time is almost here and many of the children will be leaving for visits elsewhere, it was decided not to hold meetings of the Mission Band during the summer. Lunch was then served. The children invited Rev. Dr. Brown to join them and a merry time was spent.

PRATT'S SIDING

The regular monthly meeting of the Boy Club was held on Wednesday, June 28, in the school house, with an attendance of twelve members. Mrs. John Reycraft presided, and after the reading of the creed the secretary gave the minutes of the last meeting, roll call being answered by current events. A reading by Miss Brown was much enjoyed. Collection, \$1.25. Mrs. Charles Gould, Mrs. D. A. Mitchell and Miss Brown will prepare the program for the July meeting, to be held at Mrs. Thos. Stinson's. Roll call—seasonal recipes. All ladies cordially invited to attend.

The loss you would have to take on the re-sale of a \$2,000 to \$4,000 car would pay for a Ford.

ALEX. DUNCANSON - GLENCOE

A "Four" That Sets A New Standard

The "Master Four" Touring Model 23-35

Built in Canada by an organization with a 50-year record in the production of fine vehicles, this model furnishes transportation with a degree of comfort and economy unsurpassed.

In beauty of appearance, dependability, and economy of operation, the McLaughlin-Buick "Master Four" Touring Model has established an entirely new standard for four-cylinder cars.
