McGill University General Announcement.

SESSION OF 1895-96.

The sixty-third Session of the University, being the fortieth under the amended Charter, will commence in the autumn of 1895.

By virtue of the Royal Charter, granted in 1821, and amended in 1852, the Governors, Principal and Fellows of McGill College constitute the Corporation of the University; and, under the Statutes framed by the Board of Governors, with the approval of the Visitor, have the power of granting Degrees in all the Arts and Faculties in McGill College and Colleges affiliated thereto.

The Statutes and Regulations of the University have been framed on the most liberal principles, with the view of affording to all classes of persons the greatest possible facilities for the attainment of mental culture and professional training. In its religious character the University is Protestant, but not denominational; and while all possible attention will be given to the character and conduct of students, no interference with their peculiar religious views will be sanctioned.

The educational work of the University is carried on in McGill College Montreal, and in the affiliated Colleges and Schools.

I.—MCGILL COLLEGE.

THE FACULTY OF ARTS.—The complete course of study extends over four Sessions, of eight months each; and includes Classics and Mathematics, Experimental Physics, English Literature, Logic, Mental and Moral Science, Natural Science, and one Modern Language, or Hebrew. The course of study is, with few exceptions, the same for all students in the first two years; but in the third and fourth years extensive options are allowed, more especially in favour of the Honour Courses in Classics, Mathematics, Mental and Moral Science, Natural Science, English Literature and Modern Languages. Certain exemptions are allowed to professional students. The course of study leads to the Degrees of B.A., M.A., and LL.B.

THE DONALDA SPECIAL COURSE IN ARTS provides for the education of women, in separate classes, with course of study, exemptions and honours similar to those for men.

THE FACULTY OF APPLIED SCIENCE provides a thorough professional training, extending over three or four years, in Civil Engineering,

Mechanical Engineering, Mining Engineering and Assaying, and Practical Chemistry, leading to the Degrees of Bachelor of Applied Science, Master of Engineering, and Master of Applied Science.

THE FACULTY OF MEDICINE.—The complete course of study in Medicine extends over four Sessions of nine months each, and leads to the Degrees of M.D., C.M.

THE FACULTY OF LAW.—The complete course in Law extends over three Sessions of six months each, and leads to the Degrees of B.C.L. and D.C.L.

THE FACULTY OF COMPARATIVE MEDICINE AND VETERINARY SCIENCE.—The complete course of study extends over three Sessions of six months each, and leads to the Degree of D.V.S.*

II.—AFFILIATED COLLEGES.

Students of Affiliated Colleges are matriculated in the University, and may pursue their course of study wholly in the Affiliated College, or in part in McGill College, and may come up to the University Examinations on the same terms with the students of McGill College.

MORRIS COLLEGE, Quebec.—Is affiliated in so far as regards Degrees in Arts and Law. (Detailed information may be obtained from Rev. A. T. LOVE, B.A., B.D., Principal.

ST. FRANCIS COLLEGE, Richmond.—Is affiliated in so far as regards the Intermediate Examinations in Arts. (Detailed information may be obtained from Rev. CHAS. A. TANNER, Richmond, P.Q.

III.—AFFILIATED THEOLOGICAL COLLEGES.

Affiliated Theological Colleges have the right of obtaining for their students the advantage, in whole or in part, of the course of study in Arts with such facilities in regard to exemptions as may be agreed on, and a number of Free Tuitions are granted by the Board of Governors to the students of these Colleges when matriculated in Arts.

THE CONGREGATIONAL COLLEGE OF BRITISH NORTH AMERICA, Montreal.—Rev. WILLIAM M. BARNOUR, D.D., 58 McTavish Street.

THE PRESBYTERIAN COLLEGE, Montreal, in connection with the Presbyterian Church in Canada.—Principal, Rev. H. MACVICAR, D.D., L.L.D., 60 McTavish Street.

THE DIOCESAN COLLEGE OF MONTREAL.—Principal, Rev. Cannon HENDERSON, M.A., M.D., 806 Dorchester Street.

THE WESLEYAN COLLEGE OF MONTREAL.—Principal, Rev. T. W. SHAW, M.A., L.L.D., 228 University Street.

[Calendars of the above Colleges and all necessary information may be obtained on application to their Principals.]

*The complete Calendar, with information respecting all the Faculties, &c., may be obtained of J. W. Drakebridge, Esq., McGill College.

IV.—MCGILL NORMAL SCHOOL.

THE MCGILL NORMAL SCHOOL provides the training requisite for Teachers of Elementary and Model Schools and Academies. Teachers trained in this School are entitled to Provincial Diplomas, and may, on conditions stated in the announcement of the School, enter the classes in the Faculty of Arts for Academy Diplomas and for the Degree of B.A. Principal, S. P. ROBINS, LL.D., 39 Belmont Street, Montreal.

V.—AFFILIATED HIGH SCHOOLS, ETC.

The Trafalgar Institute for the Higher Education of Women, Simpson Street, Montreal; Principal, Miss Grace Fairley. The High School of Montreal, Metcalfe Street; Principal, Rev. E. I. Rexford, B.A. The Girls' High School of Montreal, Metcalfe Street; Lady Principal, Miss M. F. Findlay, B.A. Prince of Wales' College, Charlottetown, P.E.I.; Bishop's College School, Lennoxville; St. Francis College School; Miss Symmers and Miss Smith's School, Montreal; Elioek School, Montreal; Girls' High School, St. John, N.B.; Clarenceville Academy; Coaticook Academy; Cowansville Academy; Dunham Academy; Gould Model School; Huntingdon Academy; Inverness Academy; Knowlton Academy; Lachute Academy; Quebec High School; Quebec Girls, High School; Shawville Academy; Sherbrooke Boys' Academy; Sherbrooke Girls' Academy; Stanstead Wesleyan College; St. John's High School; Sutton Academy; Three Rivers Academy; Waterloo Academy; Waterville Academy.

Faculty of Medicine.

WILLIAM PETERSON, M. A., LL.D., Principal.

ALEXANDER JOHNSON, M.A., LL.D., Vice-Principal.

ROBERT CRAIK, M.D., Dean of the Faculty and Professor of Hygiene and Public Health, 887 Sherbrooke St.

EMERITUS PROFESSORS.

WILLIAM WRIGHT, M.D., Materia Medica, 84 St. Famile Street.

DUNCAN B. MACCALLUM, M.D., Midwifery, 45 Union Avenue.

PROFESSORS.

SIR WILLIAM DAWSON, C. M. G., LL.D., F. R. S., Professor of Natural History.

ROBERT CRAIK, M.D., Prof. Hygiene and Public Health, 887 Sherbrooke St

G. P. GIRDWOOD, M.D., Professor of Chemistry, 82 University Street.

THOMAS G. ROBDICK, M.D., Professor of Surgery, 80 Union Avenue.

WILLIAM GARDNER, M.D., Professor of Gynaecology, 109 Union Avenue.

FRANCIS J. SHEPHERD, M.D., Professor of Anatomy, 152 Mansfield Street.

FRANK BULLER, M.D., Professor of Ophthalmology and Otology, 123 Stanley Street.

JAMES STEWART, M.D., Professor of Medicine and Clinical Medicine, 285 Mountain Street.

GEORGE WILKINS, M.D., Professor of Medical Jurisprudence, and Lecturer on Histology, 808 Dorchester Street.

D. P. PENSHALLOW, B.Sc., Professor of Botany, McGill College.

WESLEY MILLS, M.A., M.D., Professor of Physiology, McGill College.

JAMES CHALMERS CAMERON, M.D., Professor of Midwifery and Diseases of Infancy, 941 Dorchester Street.

ALEX. D. BLACKADER, B.A., M.D., Professor of Pharmacology and Therapeutics, and Lecturer on Diseases of Children, 236 Mountain Street.

R. F. RUTTAN, B.A. M.D., Professor of Practical Chemistry and Registrar of the Faculty, McGill College.

JAMES BELL, M.D., Professor of Clinical Surgery, 873 Dorchester Street.

J. G. ADAMI, M.A., M.D., Cantab, Professor of Pathology and Director of the Museum, 34 Durocher Street.

H. S. BIRKETT, M.D., Professor of Laryngology, 123 Stanley Street.

T. JOHNSON-ALLOWAY, M.D., Assistant Professor of Gynaecology, 23 Mackay Street.

F. G. FINLEY, M.B. (Lon.), M.D. (McGill), Assistant Professor of Medicine and Clinical Medicine, 803 Dorchester Street.

HENRY A. LAFLUR, B.A., M.D., Assistant Professor of Medicine and Clinical Medicine, 58 University Street.

GEORGE E. ARMSTRONG, M.D., Assistant Professor of Clinical Surgery, 1127 Dorchester Street.

LECTURERS.

T. J. W. BURGESS, M.D., Lecturer in Mental Diseases, Protestant Hospital for the Insane, Verdun.

WYATT JOHNSTON, M.D., Lecturer in Bacteriology and Medico-legal Pathology, 1018 Sherbrooke St.

W. S. MORROW, M.D., Lecturer in Physiology, 109 Prince Arthur St.

DEMONSTRATORS AND ASSISTANT DEMONSTRATORS.

JOHN M. ELDER, B.A., M.D., Senior Demonstrator of Anatomy, 3016 St. Catherine St.

J. G. MCCARTHY, M.D., Demonstrator of Anatomy, 47 Union Ave.

D. J. EVANS, M.D., Demonstrator of Obstetrics, 939 Dorchester St.

N. D. GUNN, M.D., Demonstrator of Histology, 727 Sherbrooke St.

R. C. KIRKPATRICK, B.A., M.D., Demonstrator of Surgery, 163 Mansfield St.

C. F. MARTIN, B.A., M.D., Demonstrator of Pathology, 33 Durocher St.

J. J. GARDNER, M.D., Demonstrator of Ophthalmology, 12 Phillips Place.

E. P. WILLIAMS, M.D., Demonstrator of Pathology and Assistant Curator, 151 Metcalfe St.

T. P. SHAW, M.D., Assistant Demonstrator of Clinical Chemistry, 51 Coursol St.

G. GORDON CAMPBELL, B. Sc., M.D., Assistant Demonstrator of Medicine, 2475 Noire Dame St.

W. F. HAMILTON, M.D., Assistant Demonstrator of Medicine, Metcalfe St.

R. TAIT MACKENZIE, M.A., M.D., Assistant Demonstrator of Anatomy, 2436 St. Catherine Street.

W. E. DEBKS, B.A., M.D., Assistant Demonstrator of Anatomy, 34 Park Ave.

JAMES A. HENDERSON, M.D., Assistant Demonstrator of Anatomy, 187 Bleury.

J. W. SCANN, M.D., Assistant Demonstrator of Physiology.

J. D. CAMERON, M.D., Assistant Demonstrator of Physiology.

KENNETH CAMERON, B.A., M.D., Assistant Demonstrator in Clinical Surgery, 903 Dorchester St.

C. G. L. WOLF, B.A., M.D., Assistant Demonstrator of Practical Chemistry.

Announcement of the Faculty of Medicine

SESSION 1895-96.

The Sixty-Third Session of this Faculty will be opened on Tuesday, October 1st, 1895, by an introductory lecture at 3 p.m. Lectures for students of the first and second years will begin September 24th. The lectures in third year and final subjects will begin on October 2nd. at the hours specified in the time-table, and will be continued for six months.

The Medical School of McGill University was founded in 1822 as the "Montreal Medical Institution" by Drs. W. Robertson, W. Caldwell, A. F. Holmes, J. Stephenson and H. P. Loedel—all of them at the time members of the staff of the Montreal General Hospital.

Although founded in 1822, yet no session of the "Medical Institution" was held until 1824, when it opened with 25 students; in 1844 the number of students in the Faculty was 50; in 1851, 64, with 15 graduates; in 1872-3, 154, with 35 graduates; in 1892-3, 315, with 46 graduates; in 1894-95, 403, with 54 graduates.

There were no sessions held during the political troubles from 1836 to 1839, and it is owing to this fact that the present is the 63rd session of the Faculty. This is in reality the 66th session of the school, which is the direct continuation of the "Montreal Medical Institution."

In 1828, the "Medical Institution" was recognized by the Governors of the Royal Institution as the Medical Faculty of McGill University. At this time the lectures were given in a building on the site of the present Bank of Montreal. Later the school was removed to a brick building still standing near the corner of Craig and St. George streets.

In 1846, the lectures of the Faculty were given in the present central building of the University now occupied by the Faculty of Arts. On account of the inconvenience arising from the distance of the University buildings from the centre of the city, it was decided in 1850, to erect a Medical school building in Coté Street, provided with ample accommodation for Library and Museum, and furnished with a large dissecting-room and two lecture rooms; this building was occupied for the first time during the session, 1851-2, and sufficed for the wants of the Faculty until 1872-73, when the present main building was provided by the Governors of the University.

In 1885, the building in the University grounds, erected by the Governors for the use of this Faculty, was found inadequate. A new building was then added, which, at the time, afforded ample facilities for carrying out the great aim of the Faculty,—that of making the teaching of the primary branches thoroughly practical.

Owing to the larger classes and the necessity of thorough laboratory teaching, the Lecture Rooms and Laboratories added in 1885, soon became insufficient in size and equipment to meet the requirements of the Faculty.

Mr. John H. R. Molson, with timely generosity came to the aid of the Faculty and in 1893, purchased property adjoining the college grounds and enabled the Faculty to erect new buildings and extensively alter and improve those already in use.

These buildings were completed and officially opened by His Excellency, the Earl of Aberdeen, visitor of the University, January 8th, 1895.

As will be seen on reference to the architect's plans on pages 34-35 the new buildings have been erected as an extension of the old ones, towards the northwest, partially facing Ca ltor road, and convenient to the Royal Victoria Hospital. They connect the Pathological building acquired in 1893, with the older buildings and comprise a large modern lecture room, capable of accommodating 450 students, with adjoining preparation-rooms and new suites of laboratories for Pathology, Physiology, Histology, Pharmacology and Sanitary Science. The laboratories, etc., in the older buildings, have been greatly enlarged and improved; the whole of the second floor has been devoted to the department of anatomy, and consists of dissecting-

room, anatomical museum and bone-room, preparation-rooms, Professors' and Demonstrators' rooms. and a special Lecture Room.

On the ground floor the Library and Museum have been greatly enlarged: a room forming part of the Library has been furnished as a reading room for the use of students, where the extensive reference library of the Faculty may be consulted.

On this floor are situated also the Faculty room, the Registrar's office, the special museum for Obstetrics and Gynæcology, together with Professor's rooms, etc. The chemical laboratories have been increased by including the laboratories formerly used by the department of Physiology.

In the basement are placed the janitor's apartments, cloak rooms with numerous large lockers, the Lavatory, etc., recently furnished with the most modern sanitary fittings.

Through the great liberality of the Honorable Sir Donald A. Smith in founding the "Leancoil Endowment," and of the citizens of Montreal and Medical Graduates in subscribing to the "Campbell Memorial Fund," the Faculty has been enabled to conduct and maintain the teaching of the different branches in a high state of efficiency.

The Faculty is glad to be able to announce that, by the liberality of the Honorable Sir Donald A. Smith in endowing the chairs of Pathology and Sanitary Science with one hundred thousand dollars, it is able to establish these departments on a footing fully commensurate with their importance and with the advances and requirements of modern medical science.

The attention of Practitioners is called to the Post Graduate and advanced courses to be established in 1896 in the hospitals and laboratories connected with the Faculty of Medicine. (See page 58.)

Lecture Rooms.

In the buildings to be occupied this session, as will be seen by reference to the diagrams, in addition to the laboratories, dissecting room, etc., there are three large lecture rooms, two capable of comfortably seating about 300 students, and one for general lectures, examinations etc., capable of seating 450 students. These theatres are well ventilated and lighted by electricity, as indeed is the entire building. The seats are numbered and a lecture room ticket is given each student on enregistering and paying the sessional fee.

Rooms for Students Use.

Three cloak rooms are provided in convenient portions of the building and in addition commodious lockers can be procured provided with special locks at a nominal rental. A large well lighted reading-room containing newspapers, magazines and the current medical journals, is provided in the new block, and is managed by the students themselves. The original library has been refitted as a comfortable well lighted reading-room for students desiring to avail themselves of the reference works in the library of the Faculty.

Dissecting Room.

The Dissecting Room, which is situated on the second floor, is L shaped, one arm of which is 76 feet in length and 31 feet in breadth, and the other arm 45 by 32 feet. It is supplied with thirty dissecting tables and over 200 specially constructed lockers, and is well lighted for work during the day and night. In procuring appliances for the comfort and convenience of the students, no reasonable expense has been spared.

In connection with the dissecting room, there is a Bone room, and Anatomical Museum where students have an excellent opportunity of studying osteology, frozen sections, anatomical models and dry preparations. In connection with the bone room is a small but well arranged museum of comparative osteology. There are also rooms for the demonstrators of anatomy.

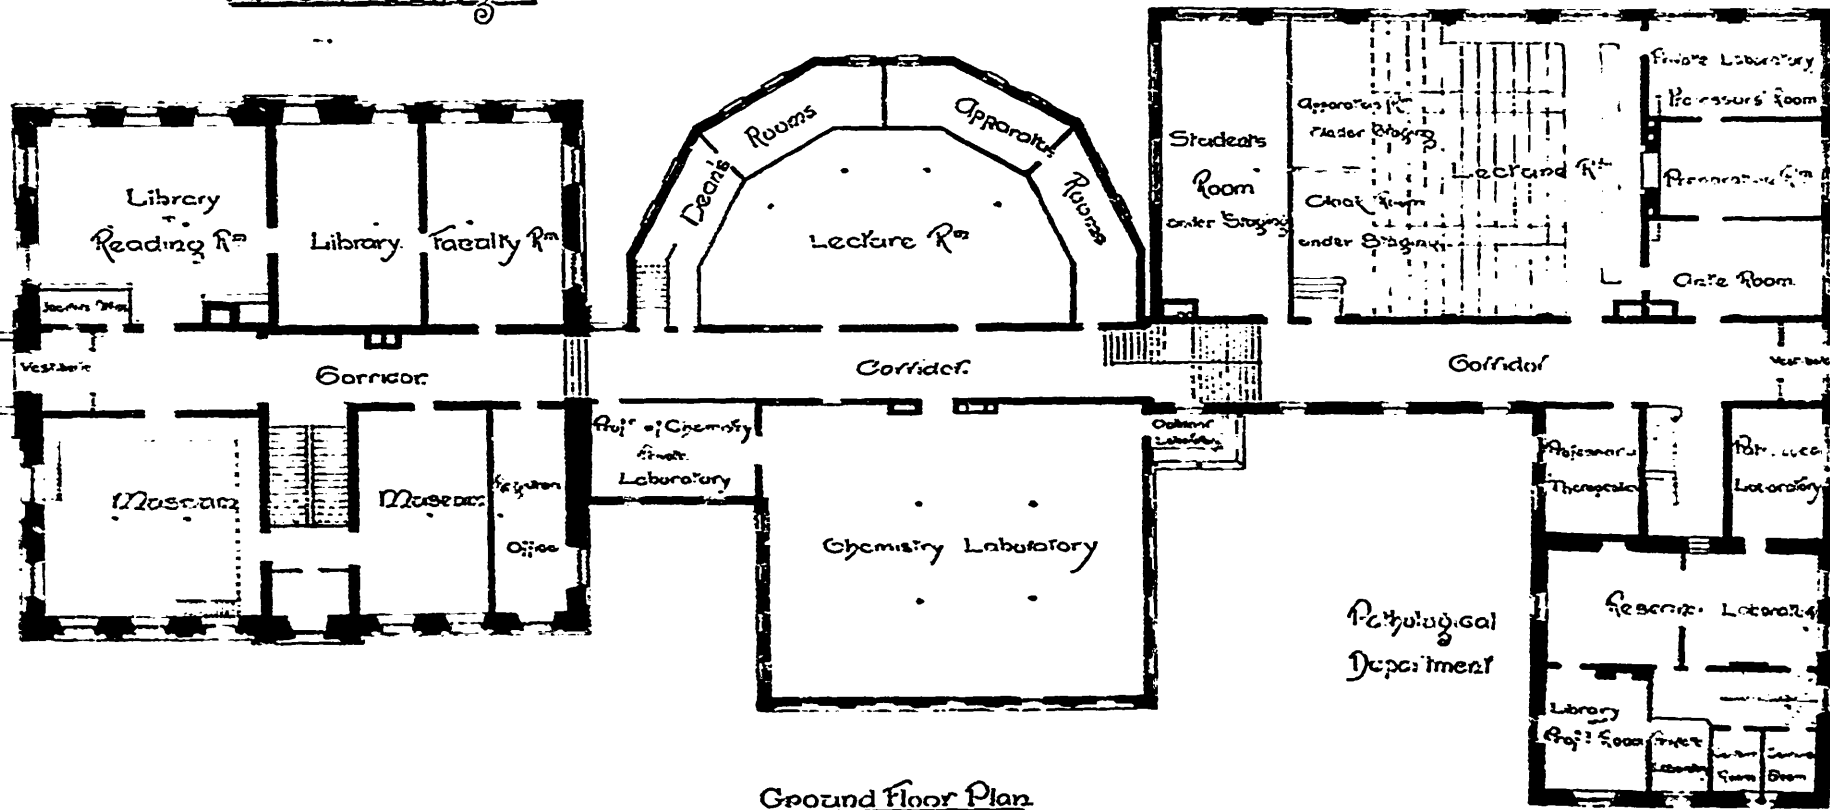

Physiological Laboratories.

The new Physiological Laboratories, which are situated on the upper floor of the new building, are supplied with the most modern apparatus for the practical teaching of this most important branch of the medical curriculum. They consist of one large room forty-five by thirty-five feet for undergraduate work and two smaller ones for more advanced work and private research. In addition there is a room set apart for a consulting library and for the special use of the Professor of this department. The Students' laboratory is arranged in such a way as to permit of students assisting at, and taking part in demonstrations.

Histological Laboratories.

The Histological Laboratory proper, is a large, well lighted room on the second floor of the new building. It is so arranged that over eighty

Buildings of the
Medical Faculty:
McGill College.

Andrew T Taylor F.R.I.B.A

Taylor + Gordon Arch^{ts}

Montreal

students can be present at the microscopical demonstrations. It is supplied with 50 microscopes. From the large number of microscopes employed, students will have special facilities in studying and making themselves thoroughly acquainted with the specimens that are the subjects of demonstration. In addition to the students laboratory there is a smaller laboratory adjoining for the use of the professor and demonstrators and for special work.

Pharmacological Laboratory.

The Pharmacological Laboratory is a large room 45 by 35 feet, situated on the second floor of the new building and is now furnished with the necessary appliances for the practical teaching of pharmacology. In this room is placed a teaching museum of drugs and pharmaceutical preparations arranged according to their physiological action.

Chemical Laboratory.

The Chemical Laboratory is large, lofty, and well lighted, from three sides. It can accommodate comfortably 124 men, but only a much smaller number are allowed to work at one time. Each student, when entering on this course, has a numbered table in the laboratory assigned to him for his use during the session. Each table has its own gas and water fixtures, and is provided with shelves for its corresponding set of reagent-bottles, as well as a drawer and locker containing a modern set of chemical apparatus especially adapted for the work. This apparatus is provided by the Faculty, and supplied to each student without extra charge. The student is only required to pay for apparatus broken or destroyed.

The laboratory is ventilated by an electric fan and fully equipped for the various courses of study, thus giving to the student unsurpassed advantages for acquiring a sound and practical knowledge of medical chemistry.

Pathological Laboratory.

A large building of three stories, 47 by 40 feet, adjoining the College, recently acquired by the Faculty, thanks to the generosity of Mr. J. H. R. Molson, constitutes the Pathological Laboratory; it has undergone extensive alterations to fit it for the purpose. The uppermost floor has been converted into a work-room for the osteologist and curator; the second floor is one large laboratory for

classwork in Practical Pathology and Bacteriology ; upon the floor beneath, are two laboratories for research, a preparation room, professor's private room and library, and culture rooms; while upon the ground floor are rooms for the attendant, for storage and for keeping animals.

I.

MATRICULATION.

I. REGULATIONS OF THE FACULTY OF MEDICINE OF MCGILL UNIVERSITY.

Every Student before he can be enregistered as an undergraduate in Medicine, must present a certificate of having passed the Matriculation Examination of the Faculty of Medicine of this University, or of having passed some State or University examination accepted by this University.

Graduates in Arts of any recognized university and those who have passed the Entrance Examination of a Provincial Medical Council and thus become enregistered students in medicine of a province in Canada. are exempt from further preliminary examination.

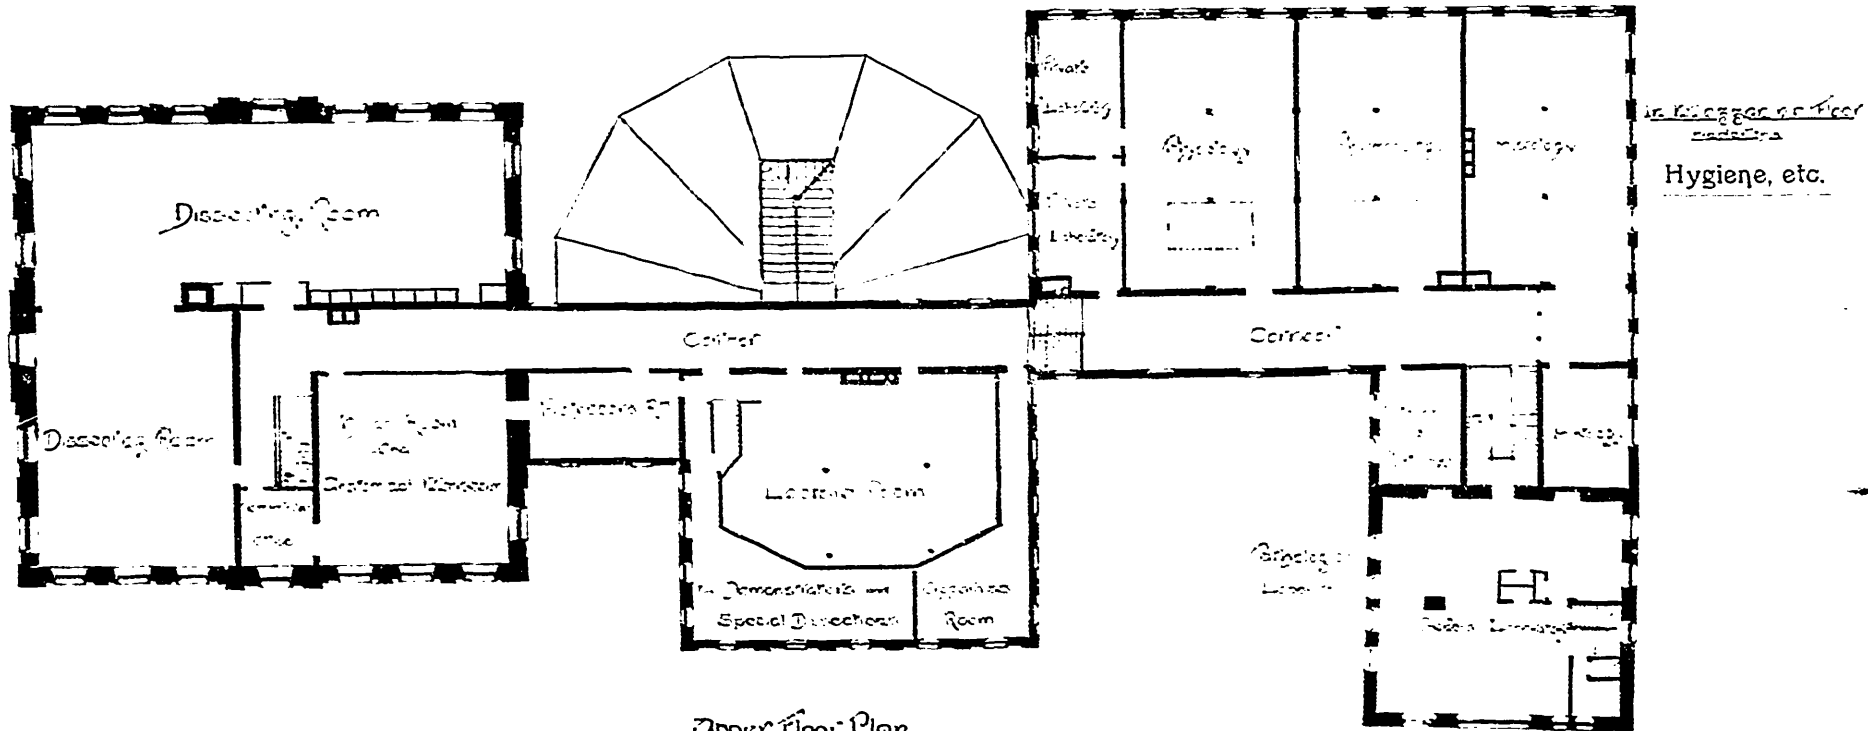

Students from the United States who have passed a State or University examination fully equivalent to that required by this University, may at the discretion of the Faculty be admitted to study without further examination.

The Matriculation Examination of this University for Medicine is held twice each year, in June and September, at the same time as that for Arts and Science. The fee for this examination is five dollars payable on application to the Acting Secretary of the University, J. W. Brackenridge.

Papers for the June examinations will be sent to local centres on application to the Acting Secretary. An additional fee of four dollars, to meet local expenses, will be charged for such examination.

The September examinations are held just before the lectures in Medicine begin. These are held in McGill College, Montreal, only, and at these examinations alternative books in Classics will be accepted.

Plans of the
Medical Faculty:
McGill College.

Upper Floor Plan

Andrew T. Taylor, F.R.S.E.

Taylor-Gowers, Architects

Montreal

The subjects for examination are Classics, Mathematics and English, and one of the optional subjects as below.

COMPULSORY SUBJECTS.

Latin.—Cæsar, Bell. Gall. Books I. and II.; Virgil, Æneid, Book I., and Latin Grammar.

Mathematics.—Arithmetic (including metric system); Algebra, to quadratic equations inclusive; Euclid's Elements, Books I., II., III.

English.—Writing from Dictation. A paper on English Grammar, including Analysis. A paper on the leading events of English history. Essay on a subject to be given at the time of the examination.

OPTIONAL SUBJECTS.

(*One only of these subjects is required.*)

1. *Greek.*—Xenophon, Anabasis, Book I.; Greek Grammar.
2. *French.*—Le Bourgeois gentilhomme and French grammar.
3. *German.*—The first eighty pages of Joyne's German reader or equivalent and German grammar.
4. *Chemistry*—(As in Remsen's Elements of Chemistry, pages 1.160) and *Physics* (Gage and Fessenden' High School Physics).

II. REGULATIONS GOVERNING THE PRELIMINARY EXAMINATIONS OF CANADIAN AND ENGLISH LICENSING BODIES.

Students should bear in mind the fact that no degree in Medicine from a Canadian university carries with it a legal right to practice Medicine and Surgery in Canada, or in any other British possession. Each province in Canada has its own regulations regarding Entrance Examination, etc., and license to practice is conferred only on those who have complied with the regulations of the special province as to preliminary education, duration and course of study, etc. As the curriculum of professional studies of McGill University fully meets the requirements of all the Provincial Boards, attention will be called only to the regulations regarding Preliminary Education.

Each licensing body in England and Canada dates the period of beginning the study of Medicine from the time of passing the Entrance Examination accepted by it.

It is therefore of the highest importance that intending students should select that examination in preliminary education which will be accepted by the Licensing Board of the province or country in which they intend to practice their profession.

A. *To obtain a license to practice in England, India, or any other British Possession (Canada excepted).*

The Matriculation Examination in Medicine of this University, as described above, is accepted by the General Medical Council of Great Britain and Ireland. Graduates of this University desiring to re-register in England are thus exempted from any examination in preliminary education on production of the McGill Matriculation certificate together with a certificate that all the subjects of this Examination were passed at one time. Certificates of this University for attendance on lectures are also accepted by the General Medical Council.

B. *To obtain a license to practice in the Province of Quebec.*

No University Matriculation Examination is accepted by the College of Physicians and Surgeons of this Province. Graduates in Arts of any British or Canadian University are however exempted from examination, on presentation of their Diplomas.

Those who pass the Preliminary Examination described below, or Graduates in Arts who enregister as students in the C. P. & S., Quebec, on beginning their studies in Medicine, obtain on graduating from McGill University, a license to Practice in Quebec without further examination in any professional subject.

The requirements for this examination :

LATIN.—Caesar's Commentaries, Bks. I., II., III., IV. and V.—Virgil's *Aeneid*, Bks. I. and II.—The Odes of Horace, Bk. III., with a sound knowledge of the Grammar of the Language.

ENGLISH.—For *English-speaking* candidates.—A critical knowledge of one of Shakespeare's plays, viz., Anthony and Cleopatra for 1895, with English Grammar, as in Dr. Smith or Mason.

For *French-speaking* candidates.—Translation into French of passages from the first eight Books of Washington Irving's *Life of Columbus*, with questions of Grammar. Translation into English of extracts from Fénelon's *Télémaque*.

FRENCH.—For *French-speaking* candidates.—A critical knowledge of Molière's *Le Bourgeois Gentilhomme*, Fénelon's *Aventures de Télémaque* and La Fontaine's *Fables*, Books I., II., III., with questions of Grammar and Analysis.

For *English-speaking* candidates.—Translation into English of passages from Fénelon's *Télémaque*, with questions of

Grammar. Translations into French of easy English extracts.

BELLES LETTRES AND RHETORIC.—Principles of the subject as in Haven's Rhetoric, or Boyd's Rhetoric and Literary Criticism. History of the Literature of the age of Pericles in Greece, of Augustus in Rome, and of the 17th and 18th centuries of England and France.

HISTORY.—Outlines of the History of Greece and Rome, with particular knowledge of the History of Britain, France and Canada.

GEOGRAPHY.—A general view, with particular knowledge of Britain, France and North America.

ARITHMETIC.—Must include Vulgar and Decimal Fractions, Simple and Compound Proportion, Interest and Percentages, and Square Root.

ALGEBRA.—Must include Fractions and Simultaneous Equations of the First Degree.

GEOMETRY.—Euclid, Books I., II., III. and VI., or the portion of plane Geometry covered by those Books. Also the measurement of the lines, surfaces and volumes, of regular geometrical figures.

CHEMISTRY.—Outlines of the subject as in Wartz or Roscoe's Elementary Chemistry.

BOTANY.—Outlines as in Laflamme or Spottlore's text-book.

PHYSICS.—Outlines as in Peck-Gancot's Physics.

PHILOSOPHY.—Elements of Logic as in Jevon's Logic ; Elements of Philosophy, as in Calderwood's Hand-book.

The Examinations will be held in September, 1895, at Quebec, and in July, 1896, at Montreal. (See Almanac at front of this Calendar for exact date of examinations.) Applications to be made to Dr. Brosseau, Montreal, or Dr. Belleau, Quebec, either of whom will furnish schedule giving text books and percentage of marks required to pass in each subject.

Examination Fee, 20 dollars. Should the candidate be unsuccessful, one half of the fee will be returned.

Of the four years' study *after* having passed the matriculation Examination, three six months' sessions, at least, must be attended at a University, College, or Incorporated School of Medicine, recognized by the "Provincial Medical Board." The first session must

be attended during the year immediately succeeding the Matriculation Examination, and the final session must be in the fourth year.

C. *To obtain a license to Practice in Ontario.*

To become an enregistered student of Medicine of the C. P. & S., Ontario, it is necessary to hold a degree in Arts of a recognized Canadian or British University, or to pass before beginning the study of Medicine, the prescribed examination in Preliminary Education. This Examination is the University Departmental Matriculation Examination of the Ontario Education Department with science added and compulsory.

The subjects of this Examination for 1895 and 1896 are :

LATIN.—A paper on Latin Grammar.

Translation from English into Latin Prose, involving a knowledge of Bradley's Arnold's Exercises, 1-24 inclusive, and 49-65 inclusive.

Translation, with the aid of a vocabulary, of easy passages from unspecified Latin Authors.

1895.	{	VIRGIL, Æneid, II.
	{	CÆSAR, Bellum Gallicum, V, VI.
1896.	{	VIRGIL, Æneid, III.
	{	CÆSAR, Bellum Gallicum, V, VI.

MATHEMATICS.—Arithmetic.

Algebra. (Elementary rules; easy factoring; highest common measure; lowest common multiple; square root; fractions; ratio; simple equations of one, two and three unknown quantities; indices; surds; easy quadratic equations of one and two unknown quantities.)

Euclid, Books I, II, III.

HISTORY AND GEOGRAPHY.—Great Britain and her colonies, from the revolution of 1688 to the peace of 1815, and the Geography relating thereto.

Outlines of Roman History to the death of Augustus, and the Geography relating thereto.

Outlines of Greek History to the battle of Cnæronæa, and the Geography relating thereto.

ENGLISH.—I. Composition :—Nothing but an essay will be required; this shall be dealt with, rather as a test of the candidate's knowledge of English composition than as a proof of his knowledge of the subject written upon. Legible writing,

and correct spelling and punctuation will be regarded as indispensable, and special attention will be paid to the structure of sentences and paragraphs. The examiner will allow a choice of subjects, some of which must be based on the following selections, with which the candidate is expected to familiarize himself by careful reading:—

1895. { SCOTT, Kenilworth.
GOLDWIN SMITH, Cowper, (English Men of Letters Series).

2. Grammar and Rhetoric:—The examination will be chiefly on passages not prescribed. A liberal choice of questions will be allowed to the candidate.

3. Poetical Literature:—Intelligent comprehension of and familiarity with the prescribed texts will be required:

1895. *Tennyson*.—Recollections of the Arabian Nights, The Poet, The Lady of Shallott, The Lotus Eaters, Morte D'Arthur, The Day Dream, The Brush, The Voyage, The Holy Grail.

1896. *Coleridge*.—The Ancient Mariner.

Longfellow.—Evangeline, A Gleam of Sunshine, The Day is done, The Old Clock on the Stairs, The Fire of Driftwood, Resignation, The Ladder of St. Augustine, A Psalm of Life, The Builders, The Warden of the Cinque Ports.

The following selections from Palgrave's Golden Treasury:

Wordsworth.—The Education of Nature, A Lesson, To the Skylark, To the Daisy, and the following Sonnets: To a Distant Friend, "O Friend! I know not which way I must look," "Milton! Thou shouldst be living at this hour," To Sleep, Within King's College Chapel.

Campbell.—"Ye Mariners of England." Battle of the Baltic, Hohenlinden. The River of Life.

Coleridge.—Youth and Age.

PHYSICS.—An Experimental course in (a) Dynamics, (b) Heat, (c) Electricity, including an acquaintance with the Metric System of units. The courses are defined as follows:—

Dynamics: Definitions of velocity, acceleration, mass, momentum, force, moment, couple, energy, work, centre of inertia; statement of Newton's laws of motion: con-

position and resolution of forces ; conditions for equilibrium of forces in one plane.

Definitions of a fluid, fluid pressure at a point, transmission of fluid pressure, resultant fluid pressure, specific gravity, Boyle's law, the barometer, air pump, water pump, siphon.

Heat: Effects of heat, temperature, diffusion of heat, specific heat, latent heat, law of Charles.

Electricity: Voltaic cell, Chemical action in the cell, magnetic effect of the current, chemical effect of the current, galvanometer, voltmeter. Ohm's law, heating effect of the current, electric light, current induction, dynamo and motor, electric bell, telegraph, telephone.

CHEMISTRY.—Definition of the object of the science, relations of the physical sciences to Biology, and of Chemistry to Physics, Chemical change, elementary composition of matter. Laws of combination of the elements, atomic theory, molecules. Avogadro's Law. The determination of atomic weight, specific heat, nomenclature, classification. The preparation, characteristic properties, and principal compounds of the following elements: Hydrogen, Chlorine, Bromine, Iodine, Oxygen, Sulphur, Nitrogen, Phosphorus, Carbon, Silicon.

FRENCH.—Grammar.

Composition:—(a) Translation into French of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, and the formation in French of sentences of similar character; and (b) translation of easy passages from English into French.

Translation of easy passages from unspecified French authors.

An examination on the following texts:

- | | | |
|-------|---|--|
| 1895. | } | SARDOU, <i>Le Perle Noir</i> (Pomance). |
| | | DE MAISTRE, <i>Voyage autour de ma chambre</i> . |
| 1896. | } | ENAUT, <i>Le Chien du capitaine</i> . |
| | | FEUILLET, <i>Ca Fee</i> . |

The fee for this Examination is \$20.00. Full details may be obtained by application to Dr. R. A. Pyne, Registrar, Cor. Bay and Richmond St., Toronto.

(D.) *To practice in the Maritime Provinces.*

The examination required by the Faculty of medicine is accepted in the provinces of Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland.

Special matriculation examinations are held annually in New Brunswick and Nova Scotia, at dates stated in the Almanac, at the beginning of this Calendar.

II.

ENREGISTRATION.

The following are the University Regulations:—

All Students desirous of attending the Medical Lectures shall, at the commencement of each Session, enrol their names and residences in the Register of the Medical Faculty.

The said Register shall be closed on the last day of October for 3rd and 4th year students, and on the 19th of October for first and second year students. Fees are payable to the Registrar, and must be paid in advance at the time of enregistration.

The class tickets for the various courses are accepted as qualifying candidates for examination before the various Colleges and Licensing bodies of Great Britain and Ireland, and the College of Physicians and Surgeons of Ontario. The degree in Medicine of this University carries with it at the Licensing Boards of Great Britain the same exemptions in certain subjects as are granted to all colonial degrees.

To meet the circumstances of the General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master of Surgery," in accordance with the general nature and character of the curriculum, as fully specified hereafter. The degree is received by the College of Physicians and Surgeons of the Province of Quebec, provided the graduate from this university matriculated before the College of Physicians and Surgeons of Quebec, when entering on the study of medicine.

Any graduate therefore in medicine of the University, may obtain a license to practise in the Province of Quebec without further examination, if he has complied with the above regulations.

TIME TABLE FOR SESSION 1894-95.

Time Tables for the Session of 1895-96 will be issued with the Lecture Room ticket on enregistration.

TIME TABLE OF FIRST YEAR LECTURES.

* In groups of ten.

† In groups of four.

COURSES OF LECTURES.

The Corporation of the University, on the recommendation of the Faculty of Medicine, last year consented to the extension of the courses of lectures in medicine over a period of about nine months instead of six.

By this means, (1) The students of the primary years have a more ample opportunity of becoming acquainted, by laboratory work, with those branches of study which form the scientific basis of their profession, and (2) the final students will be able to derive the greatest benefit from the abundance of clinical material provided in the two Hospitals.

By this arrangement while the actual number of didactic lectures per session will be decreased, there will be a corresponding increase in the amount of tutorial work and individual teaching in the laboratories for Chemistry, Physiology, Anatomy, Pathology and Hygiene as well as giving more time, during the last two years of the course, for the thorough study of disease in the wards of the Royal Victoria and Montreal General Hospitals.

The Faculty expects, by thus increasing the time that the different professors, lecturers and demonstrators devote to each student, to accomplish two very important ends: First, to do away with the injurious effects which result from attempting to condense the teaching of medicine and surgery into four or even five sessions of six months; Second, to give each student a sounder and more thoroughly practical knowledge of his profession than could be obtained by attending during even five sessions of six months each.

ANATOMY.

(DESCRIPTIVE AND PRACTICAL).

PROFESSOR, FRANCIS J. SHEPHERD.

J. M. ELDER, Senior, Demonstrator. J. G. McCARTHY,
Demonstrator. R. TAIT MACKENZIE, W. E. DEEKS,
and J. A. HENDERSON, Assistant Demonstrators.

Anatomy is taught in the most practical manner possible, and its relation to Medicine and Surgery fully considered. The lectures are illustrated by the fresh subject, moist and dry preparations, sections, models and plates, and drawings on the blackboard.

The department of *Practical Anatomy* is under the direct control and personal supervision of the Professor of Anatomy, assisted by his staff of Demonstrators.

The methods of teaching are similar to those of the best European schools, and Students are thoroughly grounded in this branch.

Every Student must be examined *at least* three times in each part dissected, and no certificate is given unless the examinations are satisfactory.

Special Demonstrations on the Brain, Thorax, Abdomen, Bones, etc., are frequently given. Prizes are awarded at the end of the Session for the best examination on the fresh subject.

The Dissecting Room is open from 8 a.m. to 10 p.m. Abundance of material provided.

CHEMISTRY.

PROFESSOR, GILBERT P. GIRDWOOD.

The course in this subject is carefully graded. Students of the first year receive lectures on Chemical and Physiological Physics and the general principles and theories of the science. In the second year the course on chemistry is extended to embrace its application to physiology and medicine, and includes a course in Organic Chemistry. The lectures are fully illustrated by experiments, for which the department is equipped with all modern Lecture-room apparatus.

PRACTICAL CHEMISTRY.

PROFESSOR, R. F. RUTIAN.

ASSISTANT DEMONSTRATORS, $\left. \begin{array}{l} T. P. SHAW. \\ C. G. L. WOLF. \end{array} \right\}$

Laboratory instruction in practical chemistry is given during each of the first three years of study throughout one term.

The first year's course illustrates the general principles of chemical action and the properties of typical elements. During the second year the course will include methods of qualitative analysis and the detection of poisons. In the third year a course of clinical and sanitary chemistry will be given, in which the student will be made familiar with the application of chemistry to the diagnosis and pre-

vention of disease. Special attention is directed to instructing the student in making accurate notes of his experiments and his conclusions. These notes are examined daily and criticised.

PHYSIOLOGY.

PROFESSOR, WESLEY MILLS.

LECTURER, W. S. MORROW.

ASSISTANT DEMONSTRATORS, J. W. SCANE, and J. D. CAMERON.

The purpose of this Course is to make Students thoroughly acquainted, as far as time permits, with modern Physiology: its methods, its deductions, and the basis on which the latter rest. Accordingly a full course of lectures is given, in which the physical, the chemical and other aspects of the subject receive attention.

In addition to the use of diagrams, plates, models, etc., every department of the subject is experimentally illustrated. The experiments are mostly free from elaborate *technique*, and many of them are of a kind susceptible of ready imitation by the Student.

Laboratory work for Senior Students:—

(1.) During a part of the Session there will be a course on Physiological Chemistry, in which the Student will, under direction, investigate food stuffs, digestive action, blood, and the more important secretions and excretions, including urine. All the apparatus and material for this course will be provided.

(2.) The remainder of the Session will be devoted to the performance of experiments which are unsuitable for demonstration to a large class in the lecture room, or that require the use of elaborate methods, apparatus, etc., together with such as each individual of the class can conduct himself.

Laboratory work for Junior Students:—

This will be somewhat similar to the course for senior students, but simpler and anatomico-physiological rather than chemical; like the work for second year students its main object will be the illustration of important physiological principles.

HISTOLOGY.

PROFESSOR, GEO. WILKINS.

DEMONSTRATOR, N. D. GUNN.

This will consist of a course of lectures and demonstrations with the Microscope, besides a short course in the preparation and

mounting of specimens. As the demonstrations will be chiefly relied upon for teaching the Microscopic Anatomy of the various structures, the specimens under observation will then be minutely described. Plates and diagrams specially prepared for these lectures will be freely made use of.

PHARMACOLOGY AND THERAPEUTICS.

PROFESSOR, A. D. BLACKADER.

The lectures on this subject are graded in the following manner :

During the primary course, attention will be directed chiefly to Pharmacology, including the important chemical and physical properties of the various drugs, and a brief consideration of their physiological action. Therapeutics will be considered only in outline. A complete museum of *Materia Medica* will afford the student opportunity for making himself acquainted with the drugs themselves. During the spring session, a course of demonstrations on Practical *Materia Medica* and Pharmacy will be given.

During the final course, the Physiological Action of Drugs will be dwelt upon at length, and attention will be given to the Therapeutic Application of all Drugs and Remedial Measures. Prescription writing, and the various modes of administering drugs will be explained and illustrated. During the course a series of lectures will be delivered in the theatres of the hospitals on special cases or groups of cases, illustrating important points in both General and Special Therapeutics.

MEDICINE.

PROFESSOR, JAMES STEWART.

*ASSISTANT PROFESSORS, { F. G. FINLEY.
H. A. LAFLEUR.*

*ASSISTANT DEMONSTRATORS, { G. GORDON CAMPBELL.
W. F. HAMILTON.*

While the lectures on this subject are mainly devoted to Special Pathology and Therapeutics, no opportunity is lost of illustrating and explaining the general laws of disease. With the exception of certain affections seldom or never observed in this country, all the important internal diseases of the body, except those peculiar to women and children, are discussed, and their Pathological Anatomy illustrated by the large collection of morbid preparations in the University Museum, and by fresh specimens contributed by the Professor of Pathology.

The College possesses an extensive series of Anatomical plates and models illustrative of the Histological and Anatomical appearances of disease, and the wards of the General and Royal Victoria Hospitals afford the lecturer ample opportunities to refer to living examples of very many of the maladies he describes, and to demonstrate the results of treatment.

CLINICAL MEDICINE.

PROFESSOR, JAMES STEWART.

ASSISTANT PROFESSORS, F. G. FINLEY and H. A. LAFLEUR.

The instruction in Clinical Medicine is conducted in the theatres, wards, out-patient rooms and laboratories of the Royal Victoria and Montreal General Hospitals.

The courses include :—

I. The reporting of cases by every member of the Graduating Class. A certain number of beds being assigned to each student.

II. Bedside instruction for members of the Graduating Class.

III. Two Clinics weekly in each hospital.

IV. Tutorial instruction for the Junior Classes, in the wards and outpatient rooms of both hospitals.

V. Instruction in Clinical Chemistry and Bacteriology.

SURGERY.

PROFESSOR, THOMAS G. RODDICK.

DEMONSTRATOR, R. C. KIRKPATRICK.

This course consists of the Principles and Practice of Surgery and Surgical Pathology, illustrated by a large collection of preparations from the Museum, as well as by specimens obtained from cases under observation at the Hospitals. The greater part of the course however is devoted to the Practice of Surgery, in which attention is constantly drawn to cases which have been observed by the class during the session. The various surgical appliances are exhibited, and their uses and application explained. Surgical Anatomy and Operative Surgery form special departments of this course.

CLINICAL SURGERY.*PROFESSOR, JAMES BELL.**ASSISTANT " GEORGE E. ARMSTRONG.**ASSISTANT DEMONSTRATOR, KENNETH CAMERON.*

This course is entirely practical. Two Clinics are given weekly to full classes in the amphitheatres of each of the large general Hospitals (the Montreal General and the Royal Victoria), at which all operations are performed, the most important surgical dressings are done and the diagnosis and treatment of fractures and dislocations are illustrated by cases from the wards. Ward classes, limited to ten or twelve students, are also held weekly in each of the hospitals for bedside instruction, and every student is required to act as clinical clerk for at least six months in the surgical wards of one or the other hospital, during which period he is personally taught case taking, physical examination, &c., and is required to take part in dressing and the administration of anæsthetics.

MIDWIFERY.*PROFESSOR, J. CHALMERS CAMERON.**DEMONSTRATOR, D. J. EVANS.*

This course will embrace: 1. Lectures on the principles and practice of the obstetric art, illustrated by diagrams, fresh and preserved specimens, the artificial pelvis, complete sets of models illustrating deformities of the pelvis, wax preparations, bronze mechanical pelvis, &c. 2. Bedside instruction in the Montreal Maternity, including external palpation, pelvimetry, the management and after-treatment of cases. 3. A complete course on obstetric operations with the phantom and preserved fœtuses. 4. The diseases of Infancy.

5. A course of individual clinical instruction at the Montreal Maternity.

Arrangements have now been made for a graded course in Obstetrics, instruction being given separately to third year and final students.

Particular attention is given to Clinical instruction, and a Clinical examination in Midwifery similar to that held in Medicine and Surgery now forms part of the final examination.

GYNÆCOLOGY.*PROFESSOR, WM. GARDNER.**ASSISTANT PROFESSOR, T. JOHNSON-ALLOWAY.*

The didactic course is graded and consists of from forty to forty-five lectures given at intervals alternating with the lectures on Obstetrics and extending throughout the session. The anatomy and physiology of the organs and parts concerned is first discussed. Then the various methods of examination are fully described, the necessary instruments exhibited, and their uses explained.

The diseases peculiar to women are considered as fully as time permits, somewhat in the following order:—Disorders of Menstruation; Leucorrhœa; Diseases of the External Genital Organs; Inflammations, Lacerations and Displacements of the Uterus; Pelvic Cellulitis and Peritonitis and Inflammations of the Ovaries and Fallopian Tubes; Benign and Malignant growths of the Uterus; Tumours of the Ovary; Diseases of the Bladder and Urethra. The lectures are illustrated as fully as possible by drawings and morbid specimens.

Clinical teaching, including out-patient and bed-side instruction, is given at both Royal Victoria and Montreal General hospitals by Professors Gardner and Alloway. A large amount of Clinical material is thus available for practical instruction in this department of medicine. Numerous operations are done before the class, and made the subject of remarks. In addition to the ward-patients each hospital conducts a large out-patient Gynæeological Clinic to which advanced students are admitted in rotation and instructed in digital and bimanual examination and in the use of diagnostic instruments.

Particular attention is thus given to Clinical instruction, and a Clinical examination in Gynæeology similar to that held in Medicine and Surgery now forms part of the final examination.

MEDICAL JURISPRUDENCE.*PROFESSOR, GEO. WILKINS.**LECTURER ON MENTAL DISEASES, J. W. BURGESS.**LECTURER ON MEDICO-LEGAL PATHOLOGY, WYATT JOHNSTON.*

This course includes Insanity, the subject being treated of in its Medical as well as Medico-Legal aspects. Special attention is devoted

to the subject of blood stains, the Clinical, Microscopic and Spectroscopic tests for which are fully described and shown to the class. The various spectra of blood in its different conditions are shown by the Microspectroscope, so well adapted for showing the reactions with exceedingly minute quantities of suspected material. Recent researches in the diagnosis of human from animal blood are alluded to. In addition to the other subjects usually included in a course of this kind, Toxicology is taken up. The modes of action of poisons, general evidence of poisoning and classification of poisons are first treated of, after which the more common poisons are described, with reference to symptoms, post-mortem appearances, and chemical tests. The post-mortem appearances are illustrated by plates, and the tests are shown to the class. A short course of demonstrations on Medico-legal Pathology also forms part of the instruction in this department. This course includes post-mortem methods in medico-legal cases, the pathological conditions characteristic of the more important forms of violent death and the natural causes of sudden death which are liable to excite suspicions of homicide. The lectures are illustrated by specimens from the Coroner's Court.

OPHTHALMOLOGY AND OTOTOLOGY.

PROFESSOR, FRANK BULLER,

DEMONSTRATOR, J. J. GARDNER.

This will include a course of twenty-five lectures on diseases of the Eye and Ear, both didactic and clinical. In the former, the general principles of diagnosis and treatment will be dealt with; including three lectures on the errors of refraction and faults of accommodation. At the clinical lectures given in the Hospitals cases illustrative of the typical forms of ordinary diseases of the Eye and Ear will be exhibited and explained to the class. In the out-patients' department of each Hospital students have excellent opportunities of gaining clinical experience.

HYGIENE AND PUBLIC HEALTH.

PROFESSOR, ROBERT CRAIK.

This course comprises lectures on Drinking Water and Public Water Supplies; conditions of Soil and Water as affecting health.

including Drainage and the various methods for the removal of Excreta; the Atmosphere, including Heating and Ventilation; Individual Hygiene, comprising the subjects of Food and Drink; Physical Exercise and Bathing; discussion of the respective merits of the various forms of each, precautions, contra-indications, &c. Village Sanitary Associations; Mutual Protective Sanitary Associations for cities.*

BOTANY.

PROFESSOR D. P. PENHALLOW.

The purpose of this course is to give students a good grounding in the principles of General Morphology, to advance their knowledge of the Comparative Physiology of animals and plants, and enable them to determine readily, such species of plants as may come under their observation. It comprises,—

1. Practical morphology—the determination and classification of type specimens of Bryophytes, Pteridophytes and Spermophytes. Special facilities for this course are offered by the morphological laboratory and the resources of the Botanic Garden.

2. A course of lectures on General Morphology and Classification, Histology and Physiology. The lectures are illustrated by the models and large collections in the Peter Redpath Museum.

3. Studies in Canadian Botany. This work is prosecuted by means of field-excursions which are held as often as opportunity is afforded during the autumn months.

4. A special collection of medicinal plants, now being formed at the Gardens, offers a valuable preparation in the course of Pharmacology.

ZOOLOGY.

W. E. DEEKS, LECTURER (Actg).

This course includes a systematic study of the Morphology and classification of animals, illustrated by Canadian examples and by the collections in the Peter Redpath Museum. It forms a suitable introduction to Comparative Physiology.

Students may take either Zoology or Botany, but their choice should be regulated by the requirements of the law in the provinces in which they intend to practice.

Students electing either subject, must continue therein for the session, except by permission from the Faculty.

Students desiring to take both Zoology and Botany during one session must apply for permission from the Faculty.

Students in Botany or Zoology will receive tickets to the Peter Redpath Museum, and to the Museum of the Natural History Society of Montreal.

PATHOLOGY.

PROFESSOR. J. C. ADAMI.

LECTURER IN BACTERIOLOGY, WYATT JOHNSTON.

DEMONSTRATORS. { C. F. MARTIN.
E. P. WILLIAMS.

The following courses constitute the teaching on this subject :—

1. A course of General Pathology for Students of the Third Year (optional for those of the Fourth). This course extends from October to March, lectures being delivered thrice weekly.

2. A course in Bacteriology. This, which is a continuation of the course in General Pathology, extends from April to June.

3. A course of demonstrations in the performance of Autopsies, for Students of the Third Year. The demonstrations are held once a week from October until Christmas.

4. Demonstrations upon the Autopsies of the week for Students of the two Final Years. These are given during the session by Dr. Adami at the Royal Victoria Hospital, and by Dr. Wyatt Johnston at the General Hospital.

Practical Courses.

5. The performance of autopsies. Each student is required to take an active part in at least six autopsies. The autopsies are conducted at the General and Royal Victoria Hospitals by the Pathologists of these Hospitals and their assistants. In addition to the actual performance of the *sectio cadaveris*, students are expected to attend the practical instruction given in connection with each autopsy, in the method of preparation and microscopic examination of the removed tissues, so as to become proficient in methods of preparation, staining and mounting.

6. A practical course in Morbid Histology for Students of the Third Year. This class is held once a week during the winter months. Six sections are as a rule distributed at each meeting of the class so that each student obtains a large and representative series of morbid tissues, and upon an average twenty minutes are

devoted to the description and examination of each specimen. Laboratory fee to cover cost of slides, reagents, microscope, etc., \$5.

7. A practical course in Bacteriology with demonstrations; held once a week during the summer term. Laboratory fee, \$3.00.

8. A course of demonstrations upon Morbid Anatomy (Museum specimens) once weekly during the winter months, for students of the Fourth Year.

In addition to the above the staff of the department give instruction to the more advanced students who desire to undertake any special work in the laboratories. Classes in clinical pathology and microscopy are given from time to time, at the General and Royal Victoria Hospitals under the direction of the Professors of Clinical Medicine. In order to encourage special study a prize is awarded annually to the student presenting the best research in any branch of pathology.

LARYNGOLOGY AND RHINOLOGY.

PROFESSOR, H. S. BIRKETT.

This course will consist of practical lessons in the use of the Laryngoscope and Rhinoscope. The instruction will be carried on with small classes so that individual attention may be insured. A limited number of clinical lectures bearing upon interesting cases attending the clinic will be delivered during the session. These lectures will be, however, of an eminently practical nature.

MENTAL DISEASES.

LECTURER, T. J. W. BURGESS.

This course will comprise a series of lectures at the University on Insanity in its various forms, from a medical as well as from a medico-legal standpoint. The various types of mental diseases will be illustrated by cases in the Verdun Asylum, where clinical instruction will be given to groups of senior students at intervals throughout the session.

PRACTICAL MICROSCOPY.

This is an entirely optional course, in charge of Prof Wilkins. It is intended especially for teaching the technique of Microscopy. Students will be shown how to examine blood, &c., also to cut, stain, and mount specimens. For this purpose they will have furnished them normal structures, with which they will be able to secure a cabinet of at least 100 specimens, which will be of great benefit when in practice. Reagents and everything, except cover-glasses and cabinet cases, provided. Fee \$8.

IV.

DOUBLE COURSES.

By special arrangement with the Faculty of Arts, it is now possible for students to obtain the double degree of B.A. and M.D., C.M., after only six years of study.

It has been decided to allow the Primary subjects (Anatomy, Physiology and Chemistry) in medicine to count as Honor subjects of the third and fourth years in Arts. It follows then that at the end of four years study a student may obtain his B.A. degree and have two years of his medical course completed.

The remaining two years of study are devoted to the third and fourth year subjects in Medicine.

The special provisions for Medical Students in the Arts course are as follows :

In the First Year, instead of the Chemistry appointed, a Medical Student may substitute one half of the Course in Chemistry required of students in the First Year of the Medical Faculty.

[NOTE.—Should, in the future, the Chemistry in the Faculty of Arts be made equivalent to that of the Faculty of Medicine, it may be taken by any Student proceeding to the Medical Degree in lieu of the course in the Medical Faculty.]

In the Second Year. The remaining half of the Course in Chemistry of the Medical Faculty may be substituted for the Psychology of the First Term and the Mathematical Physics of the Second Year. The Botany Course of the Medical Faculty may be substituted for the Botany in the Arts Course.

[NOTE.—The Faculty of Medicine advises Medical Students who are following the Courses in Arts prescribed for the double degree, to take the subject of Psychology if possible.]

Third Year.—Physiology and Histology with practical work therein, or Anatomy with Practical Anatomy, together with the regular examinations therein in the Faculty of Medicine, may be substituted for two courses under the heading of "Science" in the curriculum of the Third Year in Arts.

[NOTE.—If a special course of Physics for Medical Students should be established, Natural Philosophy may not be compulsory.]

Fourth Year.—Students who have completed the Third Year in Arts and First Year in Medicine shall have the same privileges in the

Fourth Year as Honour Students in this year, viz., they shall be required to attend two only of the courses of lectures given in the ordinary departments (or one course with the additional course therein), and to pass the corresponding examinations only at the Ordinary B.A. Examination. These courses should for Medical Students be in either Languages or Literature.

Students are recommended in the Third and Fourth Years to continue the study of subjects which they have already taken in the First and Second Years.

In order to obtain the above privileges, the student must give notice at the commencement of the Session to the Dean of the Faculty of Arts, of his intention to claim them, and present a certificate from the Registrar of the Medical Faculty that his name is entered on the books of that Faculty. He must produce at the end of the sessions in the first two years a certificate of attendance on the required lectures and of standing at the corresponding examinations. In the Third and Fourth Years, he must produce certificates that he has completed each year of the Medical curriculum.

A certificate of Licentiate in Arts will be given along with the professional degree in Medicine to those who, previous to entrance upon their professional studies proper, have completed two years in the Faculty of Arts, and have duly passed the prescribed examinations therein.

V.

POST-GRADUATE AND ADVANCED COURSES.

The Faculty of Medicine intends in 1896 to establish post-graduate and special courses in connection with the Montreal General and Royal Victoria Hospitals and the various laboratories in the University buildings.

There will be two distinct sets of courses, one a short practical and clinical course for medical men in general practice who desire to keep in touch with recent advances in Medicine, Surgery and Pathology, and who wish special clinical experience in Gynæcology, Ophthalmology, Laryngology, etc. This course will last about six weeks, beginning about the middle of April.

A special detailed programme will be prepared and will be sent on application in January next.

The other courses will be for those who have just completed their regular course in Medicine, and desire special Laboratory or Clinical teaching before beginning practice.

Arrangements have also been made to accommodate a limited number of such graduates who desire advanced and research work.

Commodious laboratories for advanced work have been equipped in connection with the Pathological and Clinical departments of both the Royal Victoria and Montreal General Hospitals, and in connection with the general laboratories for Pathology, Physiology and Chemistry, recently altered and extended in the new buildings of the Faculty.

Young graduates of recognized universities desiring to qualify for examinations by advanced laboratory courses, or who wish to engage in special research, may enter at any time by giving a month's notice, stating the courses desired and the time at their disposal.

All the regular clinics and demonstrations of both hospitals will be open to such students on the same conditions as undergraduates in medicine of this University.

• These laboratories will be open for graduates about May 1st, 1896.

Further details regarding courses, fees, etc., may be obtained on application to the Registrar after January, 1896.

VI.

QUALIFICATIONS FOR THE DEGREE.*

1st. No one entering after September, 1894, will be admitted to the Degree of Doctor of Medicine and Master of Surgery, who shall not have attended Lectures for a period of four nine months' sessions in this University, or some other University, College or School of Medicine, approved of by this University.

2nd. Students of other Universities so approved and admitted, on production of certificate to a like standing in this University, shall be required to pass all Examinations in Primary and Final Subjects in the same manner as Students of the Faculty of this University.

3rd. Graduates in Arts who have taken two full courses in General Chemistry, including Laboratory work, two courses in Biology including the subjects of Botany, Embryology, Elementary Physiology and dissection of one or more types of Vertebrata, may at the discretion of the Faculty be admitted as second-year Students, such courses being accepted as equivalent to the first-year in Medicine. Students so entering will, however, not be allowed to present themselves for examination in Anatomy, until they produce certificates of dissection for two sessions.

4th Candidates for Final Examination shall furnish Testimonials of attendance on the following branches of Medical Education, † viz:—

ANATOMY.	} Of which Two full Courses will be required.
PRACTICAL ANATOMY.	
PHYSIOLOGY.	
CHEMISTRY	
PHARMACOLOGY AND THERAPEUTICS.	
PRINCIPLES AND PRACTICE OF SURGERY.	
OBSTETRICS AND DISEASES OF INFANTS.	
GYNÆCOLOGY.	
THEORY AND PRACTICE OF MEDICINE.	
CLINICAL MEDICINE.	
CLINICAL SURGERY.	
MEDICAL JURISPRUDENCE.	} Of which One Full Course will be required. ‡
GENERAL PATHOLOGY.	
HYGIENE AND PUBLIC HEALTH.	
PRACTICAL CHEMISTRY.	
BOTANY OR ZOOLOGY.	} Of which One Course will be required.
HISTOLOGY	
PATHOLOGICAL ANATOMY.	
BACTERIOLOGY.	
MENTAL DISEASES.	

* It shall be understood that the programme and regulations regarding courses of study and examinations contained in this calendar hold good for this calendar year only, and that the Faculty of Medicine, while fully sensible of its obligations towards the students, does not hold itself bound to adhere absolutely to the conditions now laid down for the whole four years of student's course.

† A course in medical, surgical and topographical anatomy will be given for students qualifying for the Ontario Medical Council.

‡ Provided, however, that Testimonials equivalent to, though not precisely the same as those above stated, may be presented and accepted.

He must also produce Certificates of having assisted at six Autopsies and of having Dispensed Medicine for a period of three months.

5th. Courses of less length than the above will only be received for the time over which they have extended.

6th. No one will be permitted to become a Candidate for the degree who shall not have attended at least one full Session at this University.

7th. The Candidates must give proof by ticket of having attended during eighteen months the practice of the Montreal General Hospital or of the Royal Victoria Hospital, or of some other Hospital of not less than 100 beds approved of by this University.

8th. He must give proof of having acted as Clinical Clerk for six months in Medicine and six months in Surgery in the wards of a general hospital recognized by the Faculty, of having reported at least 10 medical and 10 surgical cases.

9th. He must also give proof by ticket of having attended for at least nine months the practice of the Montreal Maternity or other lying-in-hospital approved of by the University, and of having attended at least six cases.

10th. Every candidate for the degree must, on or before the 15th day of May, present to the Registrar of the Medical Faculty testimonials of his qualifications, entitling him to an examination, and must at the same time deliver to the Registrar of the Faculty an affirmation or affidavit that he has attained the age of twenty-one years.

11th. The trials to be undergone by the Candidate shall be in the subjects mentioned in Section 4.

12th. The following oath of affirmation will be exacted from the Candidate before receiving his degree:

SPONSIO ACADEMICA.

In Facultate Medicinæ Universitatis.

Ego, A——B——, Doctoratus in Arte Medica, titulo jam donandus, sancto coram Deo cordium scrutatore, spondeo:—me in omnibus grati animi officiis erga hanc Universitatem, ad extremum vitæ halitum, perseveraturum; tum porro artem medicam caute, caste, et probe exercitaturum; et quoad in me est, omnia ad regrotorum corporum salutem conducentia, cum fide procuraturum; quæ denique, inter medendum, visa vel audita silere conveniat, non sine gravi causa vulgaturum. Ita præsens mihi spondenti adsit Numen.

13th. The fee for the Degree of Doctor of Medicine and Master of Surgery shall be thirty dollars, to be paid by the successful candidate immediately after examination.

VII.

EXAMINATIONS.*

Frequent oral examinations are held to test the progress of the Student and occasional written examinations are given throughout the Session.

The Pass examinations at the close of each Session are arranged as follows :—

First Year.

Examinations in BOTANY or ZOOLOGY, HISTOLOGY, PHYSIOLOGY, ANATOMY, CHEMISTRY Theoretical and Practical.

Students who have taken one or more university courses in Botany or Chemistry before entering, may be exempted from attendance and examination. Students exempted in their first year subjects are allowed only a pass standing, but may present themselves for examination if they desire to attain an honor standing.

Marks obtained in examinations in first year subjects will count for both Pass and Honors in the Primary examinations.

Second Year.

Examinations in ANATOMY, CHEMISTRY, PRACTICAL CHEMISTRY, PHYSIOLOGY, HISTOLOGY, PHARMACOLOGY and THERAPEUTICS.

Third Year.

Examinations in PHARMACOLOGY and THERAPEUTICS, MEDICAL JURISPRUDENCE, HYGIENE, GENERAL PATHOLOGY, MENTAL DISEASES, CLINICAL CHEMISTRY, MEDICINE and SURGERY.

Marks obtained in third year subjects count for pass and honors in the final examinations.

Fourth Year.

Examinations in MEDICINE, SURGERY, OBSTETRICS, GYNAECOLOGY, CLINICAL MEDICINE, CLINICAL SURGERY, CLINICAL OBSTETRICS, CLINICAL GYNAECOLOGY, CLINICAL OPHTHALMOLOGY, PRACTICAL PATHOLOGY and BACTERIOLOGY.

By means of the above arrangement a certain definite amount of work must be accomplished by the student in each year, and an equitable division is made between the Primary and Final branches.

* See foot note *, page 60.

A minimum of 50 per cent. in each subject is required to Pass and 75 per cent. for Honors.

Candidates who fail to pass in not more than two subjects of either the first or second years may be granted a supplemental examination at the beginning of the following session.

Supplemental examinations will not be granted, except by special permission of the Medical Faculty, and on written application stating reasons, and accompanied with a fee of \$5.00 for each subject.

No candidate will be permitted, without special permission of the Faculty, to proceed with the work of the final year until he has passed the subjects comprised in the Primary examination.

No student will be allowed to present himself for his final examinations who has not certificates of having passed all his Primary examinations in this University.

Candidates who fail to pass in a subject of which two courses are required, may, at the discretion of the Faculty, be required to attend a third course, and furnish a certificate of attendance thereon. A course in Practical Anatomy will be accepted as equivalent to a third course of lectures in General and Descriptive Anatomy.

VIII.

MEDALS AND PRIZES.

The "HOLMES GOLD MEDAL," founded by the Medical Faculty in the year 1865, as a memorial of the late Andrew Holmes, Esq., M.D., LL.D., late Dean of the Faculty of Medicine. It is awarded to the student of the graduating class who receives the highest aggregate number of marks in the different branches comprised in the Medical Curriculum.

The Student who gains the Holmes' Medal has the option of exchanging it for a Bronze Medal, and the money equivalent of the Gold Medal.

2nd. THE FINAL PRIZE.—A Prize in Books (or a Microscope of equivalent value) awarded for the best examination, written and oral, in the Final branches. The Holmes medallist is not permitted to compete for this prize.

3rd. THE PRIMARY PRIZE.—A Prize in Books awarded for the best examination, written and oral, in the Primary branches.

The "SUTHERLAND GOLD MEDAL," founded in 1878 by the late Mrs. Sutherland in memory of her late husband, Professor William Sutherland, M.D. It is awarded for the best examination in Theoretical and Practical Chemistry, together with creditable examination in the primary branches.

5th. A Prize in Books for the best examination in Practical Anatomy.

6th. A Prize in Books for the best examination in Botany.

7th. The "Clemesha Prize in Clinical Therapeutics," founded in 1889 by John W. Clemesha, M. D., of Port Hope, Ont. It is awarded to the student making the highest marks in a special clinical examination.

IX.

FEES.

The total Faculty fees for the whole medical course of four full sessions including clinics, laboratory work, dissecting material and reagents, will be four hundred dollars, payable in four annual instalments of \$100 each.

Partial students will be admitted to one or more courses on payment of special fees. An annual University fee of two dollars is charged students of all the faculties for the maintenance of college athletics.

It is suggested to parents or guardians of students that the fees be transmitted direct by cheque or P. O. Order, to the Registrar, who will furnish official receipts.

All fees are payable in advance, to the Registrar, and except by permission of the Faculty will not be received later than 1st November.

For Graduation Fees, see page 61.

For Hospital Fees, see pages 74, 75 and 77.

TEXT BOOK

ANATOMY.—Gray, Morris, Quain (Eng. Ed.).

PRACTICAL ANATOMY.—Cunningham's Practical Anatomy, Ellis' Demonstrations, Holden's Dissector and Landmark's.

PHYSICS.—Balfour Stewart.

INORGANIC CHEMISTRY.—Remsen, Wurtz's Elementary Chemistry.

ORGANIC CHEMISTRY.—Remsen.

PRACTICAL CHEMISTRY.—Odling.

PHARMACOLOGY and THERAPEUTICS.—White, Bruce, Wood, Hare and National Dispensary.

PHYSIOLOGY.—Foster and Shore's Physiology for Beginners, Mills' Textbook of Animal Physiology, Foster's Physiology, Mills' Class Laboratory Exercises.

PATHOLOGY.—Coat's Pathology.

PRACTICAL PATHOLOGY.—Delafield & Prudden, Payne, Boyce.

BACTERIOLOGY.—Abbott's Bacteriology.

HISTOLOGY.—Klein's Elements, Schäfer's Essentials of Histology.

SURGERY.—Holmes, Moulin, Walsham, Erichsen, Treves. American Text-book of Surgery, Da Costa.

PRACTICE OF MEDICINE.—Osler, Strümpell, Fagge and Flint.

CLINICAL MEDICINE.—Musser's Medical Diagnosis; von Jaksch Clinical Diagnosis.

MEDICAL JURISPRUDENCE.—Husband, Guy and Ferrier, Reese.

MIDWIFERY.—Parvin, Lusk, Playfair and Barnes.

DISEASES OF CHILDREN.—Smith, Goodhart and Starr.

GYNÆCOLOGY.—Thomas and Mundé, Skene, Garrigues.

HYGIENE.—Parks, Wilson.

BOTANY.—Gray's Text Book of Histology and Physiology

ZOOLOGY.—Shipley Investebrata, Weiderheim, Verlibrata.

OPHTHALMOLOGY.—Nettleship, Higgins, De Schwinitz.

OTOLOGY.—Pritchard, Dalby.

LARYNGOLOGY.—Watson Williams and Karl Seiler.

MEDICAL DICTIONARY.—Gould, Dungleison, Hoblyn.

IX.

MUSEUM.

PROF. J. G. ADAMI, DIRECTOR.

E. P. WILLIAMS, M.D., ASSISTANT CURATOR.

M. BAILLY, OSTEOLOGIST AND ARTICULATOR.

For the past fifty years, the rich Pathological Material furnished by the Montreal General Hospital has been collected here. The Faculty is also greatly indebted to many medical men throughout Canada and different parts of the world for important contributions to the Museum.

During the past few years, numerous and extremely important additions have been made to the Medical Museum.

It is particularly rich in specimens of Aneurisms. In addition to containing a large number of the more common varieties of these formations, there are specimens of such rare conditions as Aneurism of the Hepatic and Superior Mesenteric Arteries, Traumatic Aneurism of the Vertebral, together with several of the cerebral and pulmonary arteries. The most important collection probably in existence of hearts affected with "Malignant Endocarditis" is also found. The Faculty are indebted to Prof. Osler, late of this University, for this collection.

The Museum contains also a very large collection of different forms of calculi. The Faculty are mainly indebted to Prof. Fenwick for this collection.

During the past five years, M. Bailly, osteologist and articulator (lately with Trամond of Paris), has been engaged in arranging and mounting the very large number of specimens of disease and injuries of bones which have been accumulating for years. In this collection are to be found examples of fractures and dislocations of the spine, osteoporosis, congenital dislocation of the hip, fracture of the astragalus, multiple exostoses, &c., &c.

Obstetrical Department of the Museum.

Besides the ordinary pathological preparations, dry and moist, usually found in Museums, this department contains a complete set of models of deformed pelves, a series of preparations in wax, illustrating the normal relations of the pelvic organs, the development of the Uterus and its contents during pregnancy, various abnormalities, twin pregnancy, foetal circulation &c., a series of colored casts of frozen sections, Tarnier's artificial pelvis, Budin's bronze mechanical pelvis, models of obstetrical instruments, &c.

Additions are being constantly made, and ere long the department will possess a complete collection of models, casts, preparations and apparatus for the practical teaching and illustration of Obstetrics.

Anatomical Museum.

In addition to the already large collection of normal and abnormal osteology, comparative and human, skeletons of various classes of animals, moist preparations and frozen sections, the following preparations have been recently added to the Museum:—

(1) A series of articulated skeletons of fore and hind limbs of the various domestic animals prepared by the articulator Mr. Bailly.

(2) Numerous moist preparations presented by the Professor of Anatomy.

(3) A complete set of Steger's beautiful colored casts taken from the celebrated frozen sections of Professors His and Braune of Leipzig. These preparations have been placed in the Museum so that they can be constantly consulted by the Students.

(4) (a) A complete set of Steger's brain sections.

(b) Set of hardened brains with the various lobes, convolutions, ganglia, &c., in different colors.

(c) Models of the cerebro-spinal and sympathetic nervous systems.

(d) A set of Prof. D. J. Cunningham's beautiful casts of the Brain in situ, showing the relations of convolutions to the skull.

(5) (a) A set of preparations showing the anomaly of vessels entering the kidneys.

(b) A number of rare anomalies of the aorta and its branches.

(c) A series of preparations showing the shoulder girdle in various animals.

List of objects added to Museum during the twelve months ending May 31st, 1895:

1. Skull, showing fracture from blows of hammer—Dr. Wyatt Johnston.
2. Portion of vertebral column: showing tuberculosis of vertebra—R. V. H.
3. Portion of vertebral column, showing erosion from aneurism—R. V. H.
4. Bifid ribs, three examples—R. V. H.
5. Ribs showing old fracture—Dr. Adami.
6. Exostoses, articulating, of ribs—R. V. H.
7. Osteoma of inferior maxilla of colt—Montreal Veterinary College.
8. Multiple fracture of humerus—Verdun, Dr. E. P. Williams.
9. Bones of foot from case of mycetoma pedis (Madura foot)—Dr. Kirkpatrick.
10. Heart, Extreme mitral stenosis—R. V. H.
11. Heart, Incompetence of mitral valves and enlarged mitral orifice, associated with presystolic murmur and thrill—R. V. H.
12. Heart, Calcareous apices of papillary muscles—R. V. H.
13. Hearts from medico-legal autopsies—Dr. W. G. Johnston.
14. Heart, showing double coronary arteries—M. G. H.
15. Aneurism of transverse arch of aorta—R. V. H.
16. Aneurism of lower end of thoracic aorta—R. V. H.
17. Aneurism of renal artery—M. G. H.
18. Aneurism of vertebral artery—R. V. H.
19. Atheroma of pulmonary artery—R. V. H.
20. Larynx, tubercular ulceration—M. G. H.
21. Larynx, perichondritis and necrosis—R. V. H.
22. Thyroid, primary cancer—R. V. H.
23. Lung, grape tuberculosis from pig—Dr. Yeats.
24. Lung, pneumonia induced by thorn in bronchus of cow—Dr. D. McEachran.
25. Lung, chalicosis—R. V. H.
26. Lung, injected to show miliary tuberculosis—Dr. Adami.
27. Lung, from one of Koch's earliest tuberculin patients—R. V. H.
28. Stomach, perforating ulcer—Dr. G. F. Shaw, St. Andrews, Quebec.
29. Stomach, tubercular ulcer—R. V. H.
30. Stomach, reticulum of cow, showing perforation by wire and pin—Dr. Adami.
31. Stomach, hour-glass constriction following upon ulceration (two examples)—R. V. H.
32. Jejunum, lymph thrombi—R. V. H.
33. Ileum, constriction of ileum apparently from old intussusception—R. V. H.
34. Ileum, showing multiple fistulous communications between the coils from a case of tuberculosis—R. V. H.
35. Ileum, carcinoma of—R. V. H.
36. Ileum, resected and united by Murphy's button—R. V. H.
37. Colon, adenocarcinoma, causing stricture—M. G. H.

38. Rectum, chronic ulcerative proctitis—R. V. H.
39. Liver, combined cirrhosis and multiple primary carcinomatous nodules—Dr. Finley.
40. Liver, Liebermeister's grooves, affecting also the left lobe—R. V. H.
41. Gall-stones, several examples—R. V. H.
42. Gall-stones, several examples—Dr. Shepherd.
44. Diaphragmatic hernia—R. V. H.
45. Spleen, *sacro*—R. V. H.
46. Spleen, showing multiple secondary growths—R. V. H.
47. Kidney, cystic—Dr. McLeod, Charlottetown, P.E.I.
48. Kidney, primary carcinoma—Drs. McCarthy and Martin.
49. Kidney, double ureters—R. V. H.
50. Kidney, large red, of alcoholism—R. V. H.
51. Unilocular ovarian cyst—Dr. W. Gardner.
52. Ovaries and tubes, various conditions—Dr. Johnson-Alloway.
53. Tumour of chest—Dr. McIntosh, Apple Hill, Ontario.
54. Dermoid cyst—Dr. Wm. Gardner.
55. Uterus and mammary tumour of bitch—Dr. C. H. Fink.
56. Ninth week fetus in membranes—Dr. McCarthy.
57. Angio-fibroma from above patella—R. V. H.
58. Angio-fibroma from thigh—Dr. K. Cameron.
59. Tuberculosis of prostate—R. V. H.
60. Tubercular synovitis right knee—R. V. H.
61. Sarcoma of head of humerus—Dr. Armstrong.
62. Bronchoceles—Dr. Shepherd.
63. Traumatic laceration of intercostal muscles—Dr. W. G. Johnston.
64. Traumatic rupture of vena cava superior— " "
65. Traumatic rupture of spleen and liver— " "
66. Insects characteristic of various stages of decomposition of dead bodies—Dr. Wyatt G. Johnston.
67. Embolism of popliteal artery—Dr. Wyatt G. Johnston.
68. Fracture of dorsal vertebra—M. G. H.
69. Obstruction of hepatic duct by gall-stones—Dr. Williams.
70. Aneurism of aorta perforating pericardium—M. G. H.
71. Aneurism of innominate perforating pericardium—M. G. H.
72. Stomach from case of carbolic acid poisoning—Dr. Wyatt G. Johnston.
73. Photographs of various abnormalities—Dr. Shepherd.
74. Incisor tooth with very extensive deposit of Tartar.—Dr. Shepherd.
75. Renal calculi, various specimens—Dr. Shepherd.
76. Two skulls of cliff dwellers from Arizona—Dr. E. Reavey.
77. Skull of a British Columbian Indian—Dr. J. A. Williams.
78. Beaver, otter and martin—Dr. H. W. Thomson.
79. Fore and hind limbs of otter placed a distance.
80. Wings of eagle, hawk, and heron, showing position of feathers.
81. Skeleton of a monkey.
82. Skeleton of an armadillo.
83. Specimen of subclavian arising from descending aorta.
84. Skeleton of opossum.
85. Skeleton of woodpecker.

85. Skeleton of gar-pike.
 87. Skeleton of crucifixion fish. —Dr. W. Johnston.
 88. Head of wolf fish. —Dr. Shepherd.
 89. Sections of skull of wild goose and wild duck
 90. Skeleton of hawk placed à distance.
 91. Casts showing supernumerary fingers and toes. —Dr. Shepherd.
 92. Gall stones. —Dr. Bell, R. V. H.
 93. Large concretion from appendix. —Dr. Bell, R. V. H.
 94. Renal calculus. —Dr. Bell, R. V. H.
 95. Internal abdominal ring—Hernia reduced en bloc. —Dr. Bell, R. V. H.
 96. Exostosis fem. oris bursatis. —Dr. Bell, R. V. H.
 97. Exostosis humeri bursatis. —Dr. Bell, R. V. H.
 98. Urinary calculi. —Dr. Bell, R. V. H.
 99. Appendix with pin. —Dr. Bell, R. V. H.
 100. Sequestra. —Dr. Bell, R. V. H.
 101. Calcareous thyroid. —Dr. Bell, R. V. H.
 102. Bit of lead pencil from bronchus. —Dr. Bell, R. V. H.
 103. Vesical Calculi, various specimens, Dr. Shepherd.
 104. Skeleton of Ant-Eater.
 105. Model of skull showing 5th nerve, Dr. Macarthy.

XII.

LIBRARY.

LIBRARIAN, PROF. F. J. SHEPHERD.

ASSISTANT LIBRARIANS, Miss M. R. CHARLTON, Miss C. G. FORESTER.

The Library of the Medical Faculty now comprises upwards of fourteen thousand volumes, the largest special library connected with any medical school on this continent.

The valuable libraries of the late Professor Robert Palmer Howard, George Ross and Richard L. MacDonnell have been donated to the Medical Faculty. They consists of several thousand volumes, including a very complete collection of works on Diseases of the Chest.

The standard text-books and works of reference, together with complete files of the leading periodicals, are on the shelves. Students may consult any work of reference in the library between 9 a.m. and 5 p.m. A library reading room for the use of students is provided.

EXTRACTS FROM THE LIBRARY REGULATIONS.

I. During the College Session the Library is open daily (except Sundays and general public holidays) from 9 a.m. till 5.30 p.m. On Saturdays the Library closes at 1 p.m. During vacation from 10 a.m. to 4 p.m.

II. The stack room is not open to students or to the public.

III. The books in the Library are classed in two divisions: 1st, those which may be taken from the Library; 2nd, those which may not, under any circumstances, be removed from the Library. The latter class includes all catalogues, dictionaries and encyclopædias.

IV. Students will be allowed to use regular text-books only in the Library. Any other book may be taken out at 5 p.m., to be returned between 9 and 10 a.m. the next day. If books so removed from the Library are not returned punctually a fine will be imposed, and if the delay be serious the student may be suspended from use of the Library at the discretion of the Librarian.

V. Students may take out books, subject to the above regulations, to the number of three volumes at one time.

VI. Books may be taken from the Library only after they have been especially asked for and charged at the delivery desk; borrowers who cannot attend personally must sign and date an order, giving the titles of the books desired and the name of the person deputed to procure the same.

VII. Damage to, or loss of books shall be made good to the satisfaction of the Librarian and of the Library Committee. Writing or making any mark upon any book belonging to the Library is unconditionally forbidden. Any persons found guilty of wilfully damaging any book in any way shall be excluded from the Library, and shall be debarred from the use thereof for such time as the Library Committee may determine.

VIII. Silence must be strictly observed in the Library.

IX. Infringement of any of the rules of the Libaary will subject the offender to a fine or suspension of his privileges, or to such other penalty as the nature of the case may require.

The Librarian acknowledges the receipt of the following donations since January 1st, 1895 :

DR. BLACKADER—

Compendium Praxeos Medicæ Sydenhami.
In Usum Quorundam Commodiorem (1719).
International Medical Magazine.

DR. SHEPHERD—

The Canadian Practitioner.
Medical Record.
Cutaneous and Genito-Urinary Diseases.
Medical Week.
Maritime Medical News.
Journal of the American Public Health.
The Central Nervous System of Desmognathus Tuxa.

DR. GIRDWOOD—

The British Pharmacopœia for 1885-90.

DR. RUTTAN—

Handbook of Medical Education.

XIII.

MCGILL MEDICAL SOCIETY.

This Society, composed of enregistered Students of the Faculty, meets once a week during the Spring Term, and fortnightly during the Winter, for the reading of papers and the discussion of medical subjects.

The Students' reading room has been placed under the control of this Society, in which the leading English and American Medical Journals are on file as well as the leading daily and weekly newspapers of the Dominion.

An extensive library of books of reference has also been established in connection with this society.

XIV.

COST OF LIVING, &c.

This will, of course, vary with the tastes and habits of the Student but the necessary expenses need not exceed those in smaller towns. Good board may be obtained from \$15 to \$20 per month. A list of boarding-houses, which are inspected annually by a sanitary committee, is prepared by the Secretary of the University, and may be procured from the Janitor at the Medical College.

XIII.

LICENSED BOARDING-HOUSES.

1. All Students under 21 years of age, not residing with parents or guardians, shall reside in licensed boarding-houses, unless they produce written authority from parents or guardians to reside elsewhere.

2. Persons applying for a license to keep boarding-houses shall produce evidence satisfactory to the Principal as to their character and fitness, and the suitability of the house for the health and comfort of the Students. They shall also supply him with a statement of charges.

3. The keeper of every lodging-house shall deposit with the Secretary of the University, on or before September 10th, in every year, a

certificate as to the sanitary condition of the house from some competent officer or sanitary engineer recognized by the Principal.

4. A list of boarding-houses licensed under the above regulations shall be kept in the office of the Secretary, and shall be accessible to all members of the University and intending students.

XIV.

HOSPITALS.

The City of Montreal is celebrated for the number and importance of its public charities. Among these its public hospitals are the most prominent and widely known. Those in which medical students of McGill University will receive clinical instruction are : (1.) The Montreal General Hospital. (2.) The Royal Victoria Hospital. (3.) Montreal Maternity Hospital.

The Montreal General Hospital has for many years been the most extensive clinical field in Canada. The old buildings, having proved inadequate to meet the increased demand for hospital accommodation, have recently been increased by the addition of two surgical pavillions ; the Campbell Memorial, and the Greenshields Memorial, and of a new surgical theatre. The interior of the older buildings is now being entirely reconstructed on the most approved modern plans.

The Royal Victoria Hospital at the head of University Street, was opened for the reception of patients the first of January, 1894, and affords exceptional opportunities for clinical instruction and practical training.

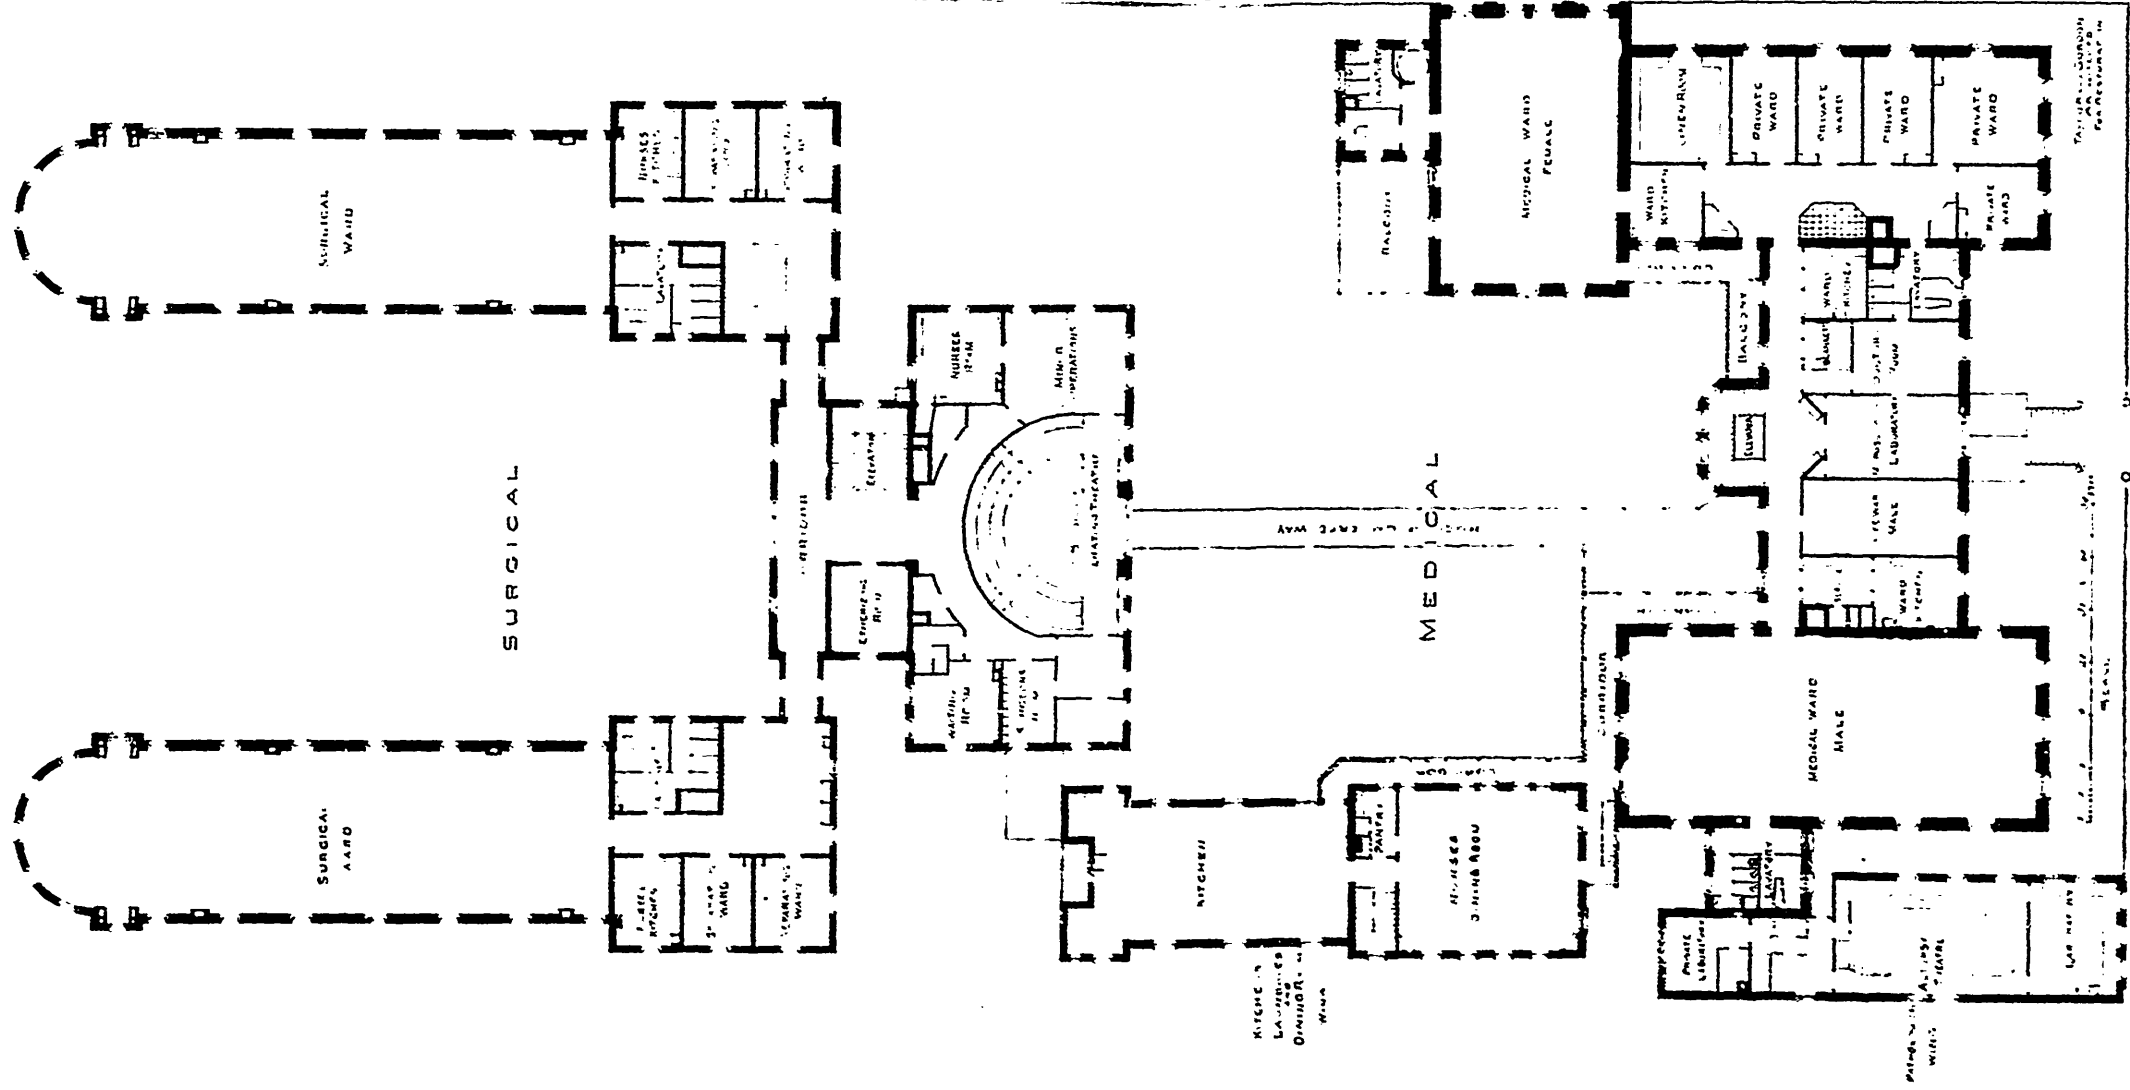

Montreal General Hospital.

This hospital has been for many years the most extensive Clinical field in Canada.

It consists of a Surgical and Medical Department.

The Surgical Department has two large pavillions, containing four wards 135 feet long by 35 broad, with an intervening and connecting building in which is a large operating theatre of the most modern type, capable of seating over three hundred and fifty students. In connection with this are preparation, etherizing, instruments, sterilizing and surgeons' rooms, also smaller operating rooms. The Surgical pavillions, which were built three years ago, accommodate over one hundred patients.

MONTREAL GENERAL HOSPITAL
 PLAN OF FIFTH FLOOR

ST. JOSEPH STREET

The Central General
Hospital.

Completed in 1898.

Bird's Eye View.
S. Gordon, 1898.

The old part of the hospital, consisting of the Reed, Richardson and Burland wings, has during the past year been completely rebuilt and remodelled and forms the Medical Department. This part contains four wards, 100 feet by 40 and is arranged for 150 beds. In this building there are wards for Gynaecological and Ophthalmological patients, a number of private wards and laboratories for Clinical Chemistry. There is also a medical amphitheatre capable of seating 150 students and a gynaecological operating room fitted up in the most modern manner. The central part of the old building is for administration purposes.

A completely new and commodious out-door patient department has been provided on the ground floor of the Richardson wing, and there is ample accommodation for the various special departments as well as large rooms for general medical and surgical patients,

The Pathological Department is a completely new building and is provided with a post-mortem theatre and rooms for microscopical and bacteriological work, and also a mortuary and chapel. In this building students are offered every opportunity of perfecting their knowledge of morbid and pathological anatomy.

A large Fever Hospital under the management of the General Hospital has lately been built by the city and is situated at some distance off. It is under the medical charge of the physicians of the Montreal General Hospital, and at stated times small classes of students will visit the new hospital with the physicians in charge.

The old Fever Hospital on the grounds of the Hospital, has been completely remodelled, and is now used as a laundry and kitchen.

A much larger number of patients receive treatment in the Montreal General Hospital than in any other Canadian Hospital. Last year's report shows that between two and three thousand Medical and Surgical cases were treated in the wards, and the great proportion of these were acute cases, as may be gathered from the fact that the average duration of residence was only 24.02 days. Upwards of thirty-two thousand patients are annually treated in the out-door department of this Hospital.

Annual tickets entitling students to admission to the Hospital must be taken out at the commencement of the session, price \$5.00. These are obtained at the Hospital. Perpetual tickets will be given on payment of the third annual fee.

The Royal Victoria Hospital.*

This Hospital is situated a short distance above the University Grounds on the side of the Mountain, and overlooks the city. It was founded in July, 1887, by the munificence of Lo. ¹ Mount Stephen and Sir Donald Smith, who gave half a million dollars each for this purpose.

The buildings, which were opened for the reception of patients on the first of January, 1894, were designed by Mr. Saxon Snell of London, England, to accommodate between 250 and 300 patients.

The Hospital is composed of three main buildings connected together by stone bridges: an Administration Block in the centre, and a wing on the east side for medical patients, in immediate connection with which is the new Pathological wing and mortuary, and a wing on the west side for surgical patients.

The Administration block contains ample accommodation for the resident medical staff, the nursing staff and domestics. The patients' entrance, the dispensary and admission rooms are also situated in this building.

The Medical wing contains three large wards, each 123 feet long by 26 feet 6 inches wide, one ward 40 feet by 26 feet 6 inches, and fifteen private and isolation wards averaging 16 feet by 12 feet, also a medical theatre with a seating capacity for 250, and three rooms adjacent to it for clinical chemistry and other purposes. North of this wing and in direct connection with it are the Pathological laboratories and mortuary.

In this wing are situated the mortuary proper, the chapel, a post mortem room capable of accommodating 200 students, and laboratories for the microscopic and bacteriological study of morbid tissues, some designed for the use of students and others for post graduation courses and special research. Special laboratories for Pathological chemistry, Experimental Pathology, Bacteriology and Photography are also provided.

The Surgical wing contains three large wards, each 123 feet long by 26 feet 6 inches wide, four wards each 40 feet by 32 feet, and seven private and isolation wards, averaging 16 feet by 12 feet; also a surgical theatre with a seating capacity for 250, with six rooms adjacent for preparation and after recovery purposes.

In this wing are also the wards for Gynecology and Ophthalmology.

* Fees for this hospital are the same as those for the Montreal General Hospital (pp. 67.)

ROYAL VICTORIA HOSPITAL.

CLINICAL INSTRUCTION.

During the Session of 1895-96, two Medical, two Surgical, one Gynæcological and one Ophthalmological clinic will be held weekly in both the Montreal General and Royal Victoria Hospitals.

In addition, tutorial instruction will be given in these different departments in the wards, out-patient rooms and laboratories. Special weekly clinics will be given in the Montreal General Hospital on Dermatology and Laryngology and in the Royal Victoria Hospital on diseases of the Genito-Urinary system.

CLINICAL CLERKS in the medical and surgical wards of both Hospital are appointed every three months, and each one during his term of service conducts, under the immediate directions of the Clinical Professors, the reporting of all cases in the ward allotted him. Students entering on and after October 1893 will be required to show a certificate of having acted for six months as clinical clerk in medicine and six months in surgery, and are required to have reported at least ten cases in medicine and ten in surgery. The instruction obtained as clinical clerk is found to be of the greatest possible advantage to Students, as affording a true *practical* training for his future professional life.

DRESSERS are also appointed to the Out-door Departments. For these appointments, application is to be made to the Assistant Surgeons, or to the resident surgeon in charge of the out-patient department.

The large number of patients affected with diseases of the eye and ear, now attending the special clinics at both hospitals, will afford Students ample opportunity to become familiar with all the ordinary affections of those organs, and to make themselves proficient in the use of the ophthalmoscope, and it is hoped that every student will thus seek to gain a practical knowledge of this important branch of Medicine and Surgery. Operations are performed on the eye by the Ophthalmic Surgeon after the outdoor patients have been seen, and Students are invited to attend the same, and as far as practicable, to keep such cases under observation so long as they remain in the Hospital.

There are now special departments in both Hospitals for Gynæcology, presided over by Specialists in the branches. Students are thus enabled to acquire special technical knowledge under skilled direction. The plan of teaching practical gynæcology for the past five years with marked success has been the limitation of the number

of Students to two or three, who, in rotation, assist at the examinations, and receive instruction in the diagnosis and treatment of uterine diseases and the use of gynaecological instruments.

The Clinics at the Montreal General Hospital in Dermatology and Laryngology are very large and afford a practical training in affections of the skin and throat rarely obtained by medical students.

A special clinic for diseases of the Genito Urinary Organs has been established at the Royal Victoria Hospital,

Infectious diseases and Insanity will also be taught clinically, the former in the special wards for infectious diseases and the latter at the Verdun Hospital for the Insane.

The Montreal Maternity.

The Faculty have great pleasure in announcing that the Corporation of the Montreal Maternity have recently made very important additions to their building, and have still further improvements in contemplation. Students will therefore have greatly increased facilities for obtaining a practical knowledge of obstetrics. An improved Tarnier-Budin phantom is provided for the use of the students, and every facility afforded for acquiring a practical knowledge of the various obstetric manipulations. The institution is under the direct supervision of the Professor of Midwifery, who devotes much time and attention to individual instruction. Students who have attended the course on obstetrics during the autumn and winter terms of the third year will be furnished with cases in rotation, which they will be required to report and attend till convalescence. Clinical midwifery has been placed upon the same basis as Clinical Medicine and Surgery, and a final Clinical examination instituted. Regular courses of clinical lectures are given throughout the session. During the autumn and winter terms the Demonstrator of Obstetrics gives Clinical Demonstrations in the wards and instruction in operative work on the phantom. Students will find it very much to their advantage to pay special attention to their Clinical work during the spring term of the third year and the following summer. Two resident accoucheurs are appointed yearly from the graduating class to hold office for a period of six months each.

Fee for twelve months, \$12.00, payable at the Maternity Hospital.

XVI.

STUDENTS' APPOINTMENTS

Montreal General Hospital—Seven Resident Medical Officers.

Royal Victoria Hospital—Six Resident Medical Officers.

University Maternity—Two Resident Medical Officers.

Clinical Clerk, Gynæcology.

“ “ Laryngology.

“ “ Diseases of Children.

“ “ Dermatology.

“ “ Diseases of Nervous System.

Out-door Dressers.

Dressers in Eye and Ear Department.

Medical Clinical Clerks.

Post-mortem Clerks.

Student Demonstrators of Anatomy — 4 third-year Students.

Prosectors to Chair of Anatomy, 4.

Assistants in Practical Histology Course, 2.

Assistants in Practical Physiology Course, 4.

Assistants in Practical Chemistry, 6.

 XVI.

RULES FOR STUDENTS.

1. In the case of disorderly conduct, any Student may, at the discretion of the Professor, be required to leave the class-room. Persistence in any offence against discipline, after admonition by the Professor, shall be reported to the Dean of the Faculty. The Dean may, at his discretion, reprimand the Student, or refer the matter to the Faculty at its next meeting, and may in the interval suspend from classes.

2. Absence from any number of lectures can only be excused by necessity or duty, of which proof must be given, when called for, to the Faculty. The number of times of absence, from necessity or duty, that shall disqualify for the keeping of a Session, shall in each case be determined by the Faculty.

3. While in the College, Students are expected to conduct themselves in the same orderly manner as in the Class-room.

4. When Students are brought before the Faculty under the above rules, the Faculty may reprimand, impose fines, disqualify from competing for prizes and honors, suspend from Classes, or report to the Corporation for expulsion.

Class and Honor Lists.

SESSION 1894-95.

The total number of students enregistered in the Medical Faculty during the past Session was 403, of whom there were from:—

Quebec	157	Prince Edward Island.....	16
Ontario	115	North-West Territories.....	2
New Brunswick.....	36	Manitoba.....	3
Nova Scotia.....	37	West Indies.....	4
United States	24	British Columbia.....	4
Newfoundland.....	4	Ireland.....	1

PASS LISTS.

The following gentlemen, 53 in number, have fulfilled all the requirements to entitle them to the degree of M.D., C.M., from the University. In addition to the primary subjects, they have passed a satisfactory examination, both written and oral, on the following subjects: Principles and Practice of Surgery, Theory and Practice of Medicine, Obstetrics and Diseases of Women and Children, Pharmacology and Therapeutics, Medical Jurisprudence, Practical and General Pathology and Hygiene,—and also Clinical Examinations in Medicine, Surgery, Obstetrics, Gynæcology and Ophthalmology, conducted at the bedside of the hospitals:—

Alexander, C. C.	Fredericton, N.B.
Allen, J. H., B.A.....	West Osgoode, Ont.
Anderson, D. P., B.A.....	New Liverpool, Que.
Anthony, X. L.....	Berwick, N.S.

Bailey, J. W., B.A.	Northfield, Minn.
Basken, J. T.	Dunrobin, Ont.
Beatty, E. D.	Nepean, Que.
Bishop, C. W.	Montreal.
Blow, T. H.	South Mountain, Ont.
Boucher, R. B.	Peterboro, Ont.
Bouck, C. W.	Inkerman, Ont.
Chapman, H. J.	Port Elgin, N.B.
Commins, M. E., B.A.	St. Stephen, N.B.
Cowie, W., B.A.	Montreal.
Cruikshank, A.	Inverness, Que.
Day, J. L., B.	Montreal.
Ellis, W. L.	St. John, N.B.
Feader, W. A.	Iroquois, Ont.
Flinn, J. W.	Montreal.
Fox, C. H.	Oxley, Ont.
Gallant, St., C. J.	Charlottetown, P.E.I.
Gleason, J. H.	Cowansville, Que.
Grant, J. P.	New Glasgow, N.S.
Gun, A.	Durham, Ont.
Hamilton, R.	Bright, Ont.

Ferguson, J. A.	Mason, R.	Warren, J. F.
Ferguson, W. R.	Milburn, A.	Wheeler, T. H., B.A.
Findlay, C.	Mitchell, R. W.	White, R. R.
	Moffatt, W. S.	Wood, W. S.

MEDALS AND PRIZES.

THE HOLMES MEDAL is awarded to WILLIAM ARNOLD FEADER, Iroquois, Ont.

THE FINAL PRIZE is awarded to WILLIAM GEORGE REILLY, Ottawa, Ont.

THE PRIMARY PRIZE is awarded to CAMPBELL BROWN KEENAN, Ottawa, Ont.

THE SUTHERLAND MEDAL is awarded to CAMPBELL BROWN KEENAN, Ottawa, Ont.

THE CLEMESHA PRIZE is awarded to WILLIAM WALTER WICKHAM, Summerside, P. E. I.

THE CLINICAL CHEMISTRY PRIZE is awarded to W. OLIVER, B. A.

THE SENIOR ANATOMY PRIZE is awarded to E. M. VON EBERTS, of Winnipeg, Man.

HONORS.

FINAL YEAR SUBJECTS.

The following gentlemen have obtained First Class Honors in the FINAL SUBJECTS:

- | | |
|-------------------|---------------------|
| 1. Feader, W. A. | 5. Bouck, C. W. |
| 2. Rielly, W. G. | 6. Wright, H. K. |
| 3. Anthony, X. L. | 7. Oliver, W., B.A. |
| 4. Wickham, W. W. | 8. Cruikshank, A. |

The following gentleman have obtained First Class Honors in MEDICINE AND CLINICAL MEDICINE:

- | | |
|------------------|-------------------|
| 1. Feader, W. A. | 3. Wickham, W. W. |
| 2. Rielly, W. G. | 4. Anthony, X. L. |

The following gentlemen have obtained First Class Honors in SURGERY AND CLINICAL SURGERY:

- | | |
|--------------------|------------------------|
| 1. Feader, W. A. | 6. Wright, H. K. |
| 2. Rielly, W. G. | 7. Bailey, J. W., B.A. |
| 3. Bouck, C. W. | 8. Wickham, W. W. |
| 4. Anthony, X. L. | 9. Prier, B. S. |
| 5. Saunders, E. H. | 10. Shaw, H. M. |

The following gentlemen have obtained First Class Honors
in OBSTETRICS and DISEASES OF INFANTS :

- | | |
|---------------------|----------------------|
| 1. Reilly, W. G. | 6. Bouck, C. W. |
| 2. Anthony, H. L. | 7. Cruikshank, A. |
| 3. Wood, D. M. | 8. Lauterman, M. |
| 4. Feader, W. A. | 9. Commins, E., B.A. |
| 5. Oliver, W., B.A. | 10. Gleason, J. H. |
| | 11. Beatty, E. D. |

The following gentlemen have obtained First Class Honors
in GYNÆCOLOGY :

- | | |
|-------------------------|--------------------------|
| 1. Bouck, C. W. | 14. Reilly, W. G. |
| 2. Cruikshank, A. | 15. Grant, J. P. |
| 3. Commins, E., B.A. | 16. Boucher, R. B. |
| 4. Cowie, W., B.A. | 17. Day, J. L. |
| 5. Lauterman, M. | 18. King, J. H. |
| 6. Anthony, X. L. | 19. MacLeay, A. A., B.A. |
| 7. Feader, W. C. | 20. Gunn, A. |
| 8. Bishop, C. W. | 21. Alexander, C. C. |
| 9. Chapman, H. | 22. Gleason, J. H. |
| 10. Wickham, W. W. | 23. Wright, H. K. |
| 11. Gallant, St., C. J. | 24. Blow, L. H. |
| 12. Vipond, C. W. | 25. Oliver, W., B.A. |
| 13. Bailey, J. W., B.A. | 26. Williams, J. A. |

The following gentlemen have obtained First Class Honors
in OPHTHALMOLOGY and OTOTOLOGY :

- | | |
|---------------------|---------------------|
| 1. Feader, W. A. | 8. Flinn, J. W. |
| 2. Cruikshank, A. | 9. Lauterman, M. |
| 3. Oliver, W., B.A. | 10. Boucher, R. B. |
| 4. Reilly, W. G. | 11. Bouck, C. W. |
| 5. Wickham, W. W. | 12. Walker, D. F. |
| 6. Wright, H. K. | 13. Anderson, D. V. |
| 7. Vipond, C. W. | 14. Price, B. S. |

The following gentlemen have obtained First Class Honors
in PRACTICAL PATHOLOGY :

- | | |
|-------------------|------------------------|
| 1. Feader, W. A. | 8. Bailey, J. W., B.A. |
| 2. Boucher, R. B. | 9. Wickham, W. W. |
| 3. Cruikshank, A. | 10. Anderson, D. P. |
| 4. Reilly, W. G. | 11. Cowie, W., B.A. |
| 5. Bouck, C. W. | 12. Wright, H. K. |
| 6. Bishop, C. W. | |
| 7. Kerry, R. A. | |

The following gentlemen have obtained First Class Honors in **HYGIENE**.

- | | |
|---------------------|--------------------|
| 1. Wickham, W. W. | 10. { Bouck, C. W. |
| 2. { Carron, F. B. | { Chapman, H. J. |
| { Cruikshank, A. | { Kerry, R. A. |
| 4. Robins, G. D. | { Anderson, D. P. |
| 5. Day, J. L. | { Anthony, X. L. |
| 6. Alexander, C. C. | { Argue, J. F. |
| 7. Reilly, W. G. | 13. { Commins, E. |
| 8. Feader, W. A. | { Robertson, J. E. |
| 9. Williams, J. A. | { Scott, W. T. |

THIRD YEAR SUBJECTS.

The following gentlemen have obtained First Class Honors in **GENERAL PATHOLOGY** :

- | | |
|--------------------------|--------------------------|
| 1. { Carron, F. B. | 12. { Irvine, A. D. |
| { Deacon, G. R. | { Staples, C. A., B.A. |
| { Drum, L. B.A. | 14. Bailey, J. W., B.A. |
| { Slack, T. J. | 15. Braithwaite, J. McG. |
| 2. { Fish, W. M. | 16. { Moffatt, W. A. |
| { Robins, G. D., B.A. | { Smith, R. E. G., B.A. |
| 7. Lynch, D. P. | 18. Kelly, J. K. |
| 8. Secord, J. H. | 19. { Morse, L. R., B.A. |
| 9. Kendrick, W. N. | { Wheeler, F. H., B.A. |
| 10. Shaw, R. B. | 21. McDonald, H. K. |
| 11. Corbett, F. A., B.A. | 22. Argue, J. F. |

The following gentlemen have obtained First Class Honors in **MEDICAL JURISPRUDENCE**:

- | | |
|------------------------|------------------|
| 1. Robins, G. D., F.A. | 3. Deacon, G. R. |
| 2. Carron, F. B. | |

PRIMARY SUBJECTS

The following gentlemen have obtained First Class Honors in the **PRIMARY SUBJECTS**:

- | | |
|---------------------|-----------------------|
| 1. Keenan, C. B. | 4. Smith, H. |
| 2. McDougall, J. G. | 5. Stanfield, H. M. |
| 3. Penneyer, A. R. | 6. McCallum, E. C. D. |

The following gentlemen have obtained First Class Honors in **PHYSIOLOGY** :

- | | |
|---------------------|--------------------|
| 1. Keenan, C. B. | 6. Gladman, E. A. |
| 2. Penneyer, A. R. | 7. Lennon, H. |
| 3. Skeels, A. H. | 8. { Eberts, E. M. |
| 4. McDougall, J. G. | { Stanfield, H. M. |
| 5. Gurd, C. C. | |

The following gentlemen have obtained First Class Honors
in CHEMISTRY :

- | | |
|---|---------------------|
| 1. Keenan, C. B. | 6. Jost, A. C. |
| 2. McDougall, J. G. | 7. Gurd, C. C. |
| 3. { McCallum, E. C. D.
Stanfield, H. M.
West, J. | 8. Robertson, D. M. |

The following gentlemen have obtained First Class Honors
in PRACTICAL CHEMISTRY :

- | | |
|--|---|
| 1. { Argue, J. F.
Keenan, C. B.
McDougall, J. G. | 15. { Gourley, T. A.
Jost, A. C.
Harvey, F. C. |
| 4. Skeels, A. H. | 17. { Morse, L. H.
Scanlan, M. H.
Smith, Harvey |
| 5. Laidley, T. H. | 21. Harding, E. S. |
| 6. McRae, J. D. | 22. Le Touzel, J. R. |
| 7. Tierney, J. A. | 23. Gurd, C. C. |
| 8. Lennora, H. | 24. { McCallum, E. C. D.
Pennoyer, A. R. |
| 9. Foster, G. M. | 26. Patrick, D. |
| 10. { Laing, A. L.
Thomas, J. E.
Williams, E. J. | 27. Spring-Rice, T. A. |
| 13. Peppers, H. W. | 28. { Gladman, E. V.
Midgley, R. J. |
| 14. Jackson, F. S. | |

The following gentlemen have obtained First Class Honors
in ANATOMY :

- | | |
|--------------------|---|
| 1. Pennoyer, A. R. | 7. Harding, E. S. |
| 2. Smith, H. | 8. { McCallum, E. C. D.
Stanfield, H. M. |
| 3. Keenan, C. B. | 10. McDougall, J. G. |
| 4. McLeod, E. E. | 11. Jost, H. C., B., |
| 5. Eberts, E. M. | 12. { Gourley, T. A.
Rogers, F. E. |
| 6. Gordon, G. S. | |

The following gentlemen have obtained First Class Honors
in HISTOLOGY :

- | | |
|---------------------------------------|--|
| 1. Pennoyer, A. R. | 10. Skeels, A. |
| 2. McDougall, J. G. | 11. Morse, L. H. |
| 3. { Jost, A. C.
Midgely, R. J. M. | 12. { Stanfield, H. M.
Wainwright, S. F. A. |
| 5. McCallum, E. E. | { Gordon, G. S. |
| { Eberts, E. M.
Roy, J. J. | 14. { Gurd, C. C.
Hayden, E. W. |
| 6. { Smith, Harvey
Williams. | 17. { Harvey, F. C.
Hurdman, H. H. |

SUMMER SESSION.

During the 20th Summer Session held in 1895, the following courses of instruction were given:—

I.—CLINICAL INSTRUCTION,

Which comprised:—

A.—Daily Bedside Instruction—

In the Wards of the Montreal General Hospital—

SURGERY.....	}	Drs. Shepherd and Dutchison.
MEDICINE.....		

<i>In the Wards of the Royal Victoria Hospital—</i>		
SURGERY.....	}	Drs. Roddick and Bell. Drs. Stewart and Martin
MEDICINE.....		

B.—Weekly Clinics—

In the Theatres of the Montreal General and Royal Victoria Hospitals.

1. GYNECOLOGY Drs. Gardner & Alloway
2. DISEASES OF THE EYE AND EAR..... { Drs. Buller and
J. J. Gardner.
3. DISEASES OF THE NOSE AND THROAT—Dr. Birkett.
4. CHILDREN'S CLINIC Dr. Blackader.
5. DISEASES OF THE NERVOUS SYSTEM... Dr. Stewart.
6. DISEASES OF THE SKIN..... Dr. Shepherd.
7. INFECTIOUS DISEASES (Fever Wards)—Dr. Lafleur.
8. DISEASES OF THE HEART AND LUNGS.. Dr. Wilkins.
9. DISEASES OF THE GENITO-URINARY }
ORGANS..... } Dr. Bell.
10. CLINICAL THERAPEUTICS..... Dr. Blackader.

C.—Out-Patient Clinics—

1. At the Montreal General Hospital—

- a. GENERAL MEDICINE AND SURGERY... } Medical and Surgical
Staff.
- b. GYNECOLOGY..... Dr. Alloway.
- c. DISEASES OF EYE AND EAR..... Dr. J. J. Gardner.
- d. DISEASES OF THROAT AND NOSE..... Dr. Birkett.
- e. DISEASES OF CHILDREN Dr. G. G. Campbell.

2. At the Royal Victoria Hospital—

- a. GENERAL MEDICINE Dr. Martin.
- b. DISEASES OF EYE AND EAR..... Dr. Buller.
- c. GYNAXOLOGY Dr. Wm. Gardner.

D.—Clinical Instruction in Obstetrics—

At the Montreal Maternity—

- | | |
|--|--------------------------|
| 1. THE MANAGEMENT OF CASES OF LABOR..... | } Drs. Cameron and Evans |
| 2. THE AFTER CARE OF CASES..... | |
| 3. WEEKLY CLINIC..... | |

II.—LECTURES.

- | | |
|---|-------------------------|
| 1. A Course on Bacteriology..... | Drs. Adami & Johnston. |
| 2. Medical, Surgical and Topographical Anatomy..... | } Drs. Elder & McCarthy |
| 3. Mental Diseases..... | Dr. Burgess. |

III.—PRACTICAL CLASSES.

- | | |
|--|--|
| 1. Operative Surgery.—A complete course of operations on the cadaver, including Amputations, Excisions, Ligations, &c. Students perform the operations in rotation. Fee, \$5.00..... | } Drs. Shepherd, Armstrong and Kirkpatrick |
| 2. Operative Ophthalmology.—This consisted in a series of demonstrations on the methods of performing the usual eye operations. Fee, \$2.00..... | } Dr. Buller. |
| 3. Practical Ophthalmoscopy.—Consisting of a series of demonstrations and practical exercises in the use of the Ophthalmoscope..... | } Drs. Buller and J. J. Gardner. |
| 4. Laryngoscopy and Rhinoscopy.—A course of demonstrations and exercises in the use of the Laryngoscope and Rhinoscope..... | } Dr. Birkett. |
| 5. Minor Surgery.—Including Surgical Dressings, Bandaging, Application of Splints, Hæmorrhages, Catheterism, Artificial Respiration, &c..... | } Dr. Bell. |
| 6. Morbid Anatomy.—Consisting of systematic demonstrations upon post-mortem methods and pathological anatomy in the section-room of the General Hospital. Students will make the post-mortems in rotation, and receive instruction in the method of performing them, and keeping record of their observations..... | } Drs. Adami and Johnston. |
| 7. Clinical Microscopy..... | Dr. Martin. |
| 8. Practical Bacteriology..... | Drs. Adami & Johnston. |
| 9. Surgical Pathology..... | Drs. Adami & Williams. |

SESSION 1894-95.

STUDENTS IN MEDICINE,

FIRST YEAR.

- Alley, G. T., Charlottetown, P.E.I.
 Banfill, S. A., Chancell, Que
 Barlow, W. L., Montreal, Q
 Bartlett, G. W., Brigus, Nfld
 Bayfield, G. E., Charlottetown, P.E.I.
 Beaudry, J. M. W., Montreal, Q
 Beaulieu, J. F., Cacouna, Que
 Belisle, R. J., Nashua, N.H.
 Bell, John, New Glasgow, N.S.
 Berwick, D. J., Farnham, Q
 Blackett, J. W., B. A., Orun-town, Q
 Bradley, F. H., Sherbrooke, Q
 Cameron, A. G., Montreal, Q
 Campbell, V. B., Finch, O
 Chorrion, F. X. A., Ottawa, Ont
 Chisholm, J., New Glasgow, N.S.
 Corbett, G. G., St. John, N.B.
 Cormier, L. O., Sherbrooke, Q
 Covert, A. M., Grand Manan, N.B.
 Cushing, H. B., Montreal, Q
 Dalpé, W. H., Roxton Pond, Que
 Dandurand, L. H., St. Johns, Que
 Davidson, Campbell, Montreal, Que
 Deane, R. B., Roxina, N.W.T.
 Dolaney, R. E., Holyoke, Mass
 Dickson, S. M., Montreal, Q
 Dixon, E. G., Montreal, Q
 Donnelly, C., St. Catharines, O
 Duncan, R. G., Bathurst, N.B.
 Dunn, C. B., B. A., Abercorn, Q
 Duval, J. L., Grande Ligne, Q
 Egan, W. J., Sydney Mines, Q
 Fagan, G. A., North Adams, Mass
 Fawcett, R. F. M., Jamaica, Nfld
 Finnie, J. H., Montreal, Q

2nd Prize—Thomas Simpson, Montreal.
1855. THESIS.—James McG. Stevenson, Bryanston, Ont.
Final Examination.—James McG. Stevenson, Lake Port, Mich.
Primary Examination.—Walter J. Henry.*
1856. THESIS.—Walter James Henry,* and W. J. Jones, Prescott, O.
Final Examination.—E. Laberge.*
Primary Examination.—*Hon. Levi R. Church, Montreal, Q.
1857. THESIS.—*Hon. Levi R. Church, Montreal, and D. T. Robertson
Lennoxville, Q.
Final Examination.—*Hon. Levi R. Church, Montreal, Q.
Primary Examination.—James Kerr.*
1858. THESIS.—Timothy F. Eglisch,* and W. F. Taylor, Peterboro', O.
Final Examination.—Wm. Harkin.*
Primary Examination.—Wm. Harkin.*
1859. THESIS.—Edward W. Smith.*
Final Examination.—James J. O'Dea, Stapleton, Staten Island,
New York.
Primary Examination.—Henry Warren.*
1860. THESIS.—J. W. Pickup.*
Final Examination.—Henry Warren.*
Primary Examination.—Joseph M. Drake,* and Fred. Sutherland.*
1861. THESIS.—Joseph M. Drake,* F. J. Austin, Sherbrooke, Q., and
D. L. Philip, Brantford, O.
Final Examination.—Joseph M. Drake.*
Primary Examination.—Thos. C. Walton, Inspector U.S. Navy,
Annapolis, Md.

1862. **THESIS.**—R. M. Bucke, London, O.
Final Examination.—John A. Stewart.*
Primary Examination.—John J. Marston, Cheyenne, Wyoming.
1863. **THESIS.**—Wm. C. Gustin.*
Final Examination.—J. J. Marston, Cheyenne, Wyoming.
Primary Examination.—R. A. Kennedy,* and Peter A. McDougall, Ottawa, and C. F. Bullen.*
1864. **THESIS.**—W. W. Squire.*
Final Examination.—D. Howard Harrison, Winnipeg.
Primary Examination.—Kenneth Reid, New York.
1865. **HOLMES' GOLD MEDAL.**—E. P. Hurd, Newburyport, Mass.
Final Examination.—H. L. Vercoe.*
Primary Examination.—George Ross,* and W. Gardner, Montreal.
1866. **HOLMES' MEDALIST.**—George Ross, M.A.*
Final Examination.—William Gardner, Montreal, Q.
Primary Examination.—Clinton W. Kelly, Louisville, Ky.
1867. **HOLMES' MEDALIST.**—Clinton W. Kelly, Louisville, Ky.
Final Examination.—C. W. Kelly, Louisville, Ky.
Primary Examination.—Wm. Henry Patterson.
1868. **HOLMES' MEDALIST.**—T. G. Roddick, Montreal, Q.
Final Examination.—T. G. Roddick, Montreal, Q.
Primary Examination.—Andrew Harkness, Lancaster, O.
1869. **HOLMES' MEDALIST.**—T. D. Lucas.*
Final Examination.—Andrew Harkness, Lancaster, O.
Primary Examination.—Alexander A. Henderson, Ottawa, O.
1870. **HOLMES' MEDALIST.**—A. A. Henderson, Ottawa, O.
Final Examination.—O. H. E. Clarke, Chicago.
Primary Examination.—J. H. Mathieson, St. Mary's, O.
1871. **HOLMES' MEDALIST.**—J. H. Mathieson, St. Mary's, O.
Final Examination.—H. F. Wright, Ottawa, O.
Primary Examination.—Thomas Kelly, Omaha, Neb.
1872. **HOLMES' MEDALIST.**—Hamilton Allan, Tacoma, W. T.
Final Examination.—G. A. Starke, Milwaukee, Wis.
Primary Examination.—F. J. Shepherd, Montreal.
SPECIAL PRIZE FOR THESIS.—W. Osler, Baltimore, Md.
1873. **HOLMES' MEDALIST.**—Thomas Kelly, Omaha.
Final Examination.—D. A. Alguire, Cornwall, Ont.
Primary Examination.—J. D. Cline, B.A.*
1874. **HOLMES' MEDALIST.**—J. D. Cline, B.A.*
Final Examination.—J. C. Cameron, Montreal.
Primary Examination.—S. J. Tunstall, B.A., Kamloops, B.C.
1875. **HOLMES' MEDALIST.**—S. J. Tunstall, B.A., Kamloops, B.C.
Final Examination.—J. B. Benson, Chatham, N.B.
Primary Examination.—C. H. Murray, B.A.*; R. H. W. Powell, Ottawa, Ont.

1876. HOLMES' MEDALIST.—Robert H. W. Powell, Ottawa, O.
Final Examination.—Chas. H. Murray, B.A.*
Primary Examination.—Alex. C. Fraser, Manitowoc, Wis.
 SPECIAL PRIZES FOR THESES.—R. L. MacDonnell, B.A., Montreal.*
1877. HOLMES' MEDALIST.—James Bell, Montreal, Q.
Final Examination.—W. D. Oakley, Streetsville, O.
Final Examination.—H. N. Vineberg, New York.
1878. HOLMES' MEDALIST.—H. N. Vineberg, New York.
Final Examination.—T. W. Mills, M.A., Montreal.
Primary Examination.—W. B. Sutherland, Montreal.
 SUTHERLAND GOLD MEDAL.—J. M. Lefebvre, Vancouver, B. C.
1879. HOLMES' MEDALIST.—J. B. Lawford, London, Eng.
Final Examination.—A. W. Harie, Detroit.
Primary Examination.—J. A. McDonald, Montreal.
 SUTHERLAND GOLD MEDAL.—W. L. Grey, Pembroke, O.
1880. HOLMES' MEDALIST.—J. A. McDonald, Montreal.
Final Examination.—H. B. Small, Ottawa.
Primary Examination.—James Ross, B.A., Dundas, O.
 SUTHERLAND GOLD MEDAL.—H. W. Thornton, B.A., New Richmond, Q.
1881. HOLMES' MEDALIST.—James Ross, B.A., Dundas, O.
Final Examination.—John W. Ross, Cohoes, N.Y.
Primary Examination.—R. J. B. Howard, B.A. London, Eng.
 SUTHERLAND GOLD MEDAL.—C. E. Cameron, Montreal.
1882. HOLMES' MEDALIST.—R. J. B. Howard, B.A., London, Eng.
Final Examination.—Henry V. Ogden, B.A. Milwaukee, Wis.
Primary Examination.—George A. Graham, Hamilton, O.
 SUTHERLAND GOLD MEDAL.—Wyatt G. Johnston, Montreal, Q.
 MORRICE SCHOLAR.—Wyatt G. Johnston, Montreal, Q.
1883. HOLMES' MEDALIST.—C. E. Cameron, Montreal.
Final Examination.—L. B. Loring, Chicago, Ill.
Primary Examination.—Ed. G. Wood, Mitchell, O.
 SUTHERLAND GOLD MEDAL.—R. F. Rutan, B.A., Montreal, Q.
 MORRICE SCHOLAR.—R. F. Rutan, B.A., Montreal, Q.
1884. HOLMES' MEDALIST.—Wm. A. Ferguson, Bathurst, N.B.
Final Examination.—James P. McInerney, Kingston, N.B.
Primary Examination.—Smith Gustin, Bay City, Mich.
 SUTHERLAND GOLD MEDAL.—John Elder, B.A., Montreal, Q.
1885. HOLMES' MEDALIST.—Edwin G. Wood, Mitchell, O.
Final Examination.—Smith Gustin, Bay City, Mich.
Primary Examination.—Ed. J. Evans, La Crosse, Wisc.
 SUTHERLAND GOLD MEDAL.—F. A. Lafleur, B.A., Montreal, Q.
1886. HOLMES' MEDALIST.—Herbert S. Birkett, Montreal, Q.
Final Examination.—Walter W. White, M. A., St. John, N.B.
Primary Examination.—William I. Bradley, Sault St. Marie.
 SUTHERLAND GOLD MEDAL.—William I. Bradley, Sault St. Marie.

1887. **HOLMES' MEDALIST.**—Ed. Evans, La Crosse, Wisc.
Final Examination.—Henri A. Lafleur, B.A., Montreal, Q.
Primary Examination.—A. E. Garrow, Ottawa.
SUTHERLAND GOLD MEDAL—John Creasor, Toronto, O.
1888. **HOLMES' MEDALIST.**—N. D. Gunne, St. Marys, O.
Final Examination.—W. G. Stewart, Montreal, Q.
Primary Examination.—R. E. McKechnie, Montreal, Q.
SUTHERLAND GOLD MEDAL—C. W. Bissett, St. Peters, N.S.
1889. **HOLMES' MEDALIST.**—Alex. E. Garrow, Ottawa, O.
Final Examination.—*Hugh McKercher.
Primary Examination.—Wm. Alfred Brown, Chesterville, O.
SUTHERLAND GOLD MEDAL—John C. Clemesha, Port Hope, O.
1890. **HOLMES' MEDALIST.**—R. E. McKechnie, Nanaimo, B.C.
Final Examination.—E. J. Howes, Soudan, Minn.; M. W. Murtay, New Decatur, Alabama.
Primary Examination.—James Henderson, Warkworth, Ont.;
 Thomas Jameson, Rochester, N.Y.
SUTHERLAND GOLD MEDAL—Thomas Jameson, Rochester, N.Y.
CLEMESHA PRIZE—A. H. Coleman, Tacoma, Wash.
1891. **HOLMES' MEDALIST.**—W. A. Brown, Chesterville, Ont.
Final Examination.—W. F. Hamilton, Sackville, N.B.
Primary Examination.—W. E. Deeks, Williamsburg, Ont.
SUTHERLAND GOLD MEDAL—J. A. Henderson, Orangeville, Ont.
CLEMESHA PRIZE—W. S. Mottow, Halifax, N.S.
1892. **HOLMES' MEDALIST.**—Thomas Jameson, Rochester, N.Y.
Final Examination.—James Henderson, Warkworth, Ont.
Primary Examination.—A. Davidson, Burns, Ont.
SUTHERLAND GOLD MEDAL—A. Davidson, Burns, Ont.
CLEMESHA PRIZE—W. B. H. Massiah, Barbadoes, W.I.
1893. **HOLMES' MEDALIST.**—W. E. Deeks, B.A.; N. Williamsburgh Ont.
Final Examination.—John Alexander Henderson, Orangeville, Ont.
Primary Examination.—W. J. LeRossignol, B.A., Montreal, Q.
SUTHERLAND GOLD MEDAL—Walter J. LeRossignol, B.A.
CLEMESHA PRIZE—R. B. McKay, B.A., Toronto, Ont.
1894. **HOLMES' MEDALIST.**—Andrew A. Robertson, B.A., Montreal, Q.
Final Examination.—Albert G. Nichols, M.A., Montreal, Q.
Primary Examination.—W. N. Kendrick.
SUTHERLAND MEDAL—G. D. Robins, B.A., Montreal, Q.
CLEMESHA PRIZE—Allan Davidson, Burns, Ont.
1895. **HOLMES' MEDALIST.**—William A. Feader, Iroquois, O.
Final Examination.—Wm. G. Reilly, Ottawa, Ont.
Primary Examination.—C. B. Keenan, Ottawa, Ont.
SUTHERLAND MEDAL—C. B. Keenan, Ottawa, Ont.
CLEMESHA PRIZE—W. W. Wickham, Summerside, P.E.I.

EXAMINATION PAPERS, SESSION 1894-1895.

MATRICULATION EXAMINATION.

LATIN.

Examiner.....A. JUDSON EATON, PH.D.

(A) LATIN GRAMMAR.

1. Decline *opus, genu, pater*. Decline in the plural and give the gender of, *lis, litus, sinex, ris*.
2. Give the Ablative (singular and plural) of *domus, filia, dies, mare, deus*. Decline in the singular *totus*, in the plural *idem*.
3. Compare *audax, facilis, malevolus, parrus, senex, dignè, ferociter*.
4. Write down the Latin for "nineteen," "forty thousand," "thirtieth," and "six times."
5. Write down the first person singular of the tenses of the indicative and subjunctive of *ferre, posse, ire, prodesse, velle, audire*. Inflect *consequor* in the future indicative, and *nolo* in the imperative.
6. Write down the principal parts of *credo, cado, iubeo, oblitiscor, audeo*.
7. What cases follow *utor, ego, parco, interest, persuadeo*?
7. Translate and explain the construction of italicized words or phrases:—

(a) *Non est is qui timeat.* (b) *Venerunt ut pacem peterent.* (c) *Os humerosque deo similis*

8. Translate into Latin:—(a) I am afraid my brother will not come. (b) Aquitania is very far off from Rome. (c) Peace and friendship were established with the neighboring states. (d) Caesar was not able to grant a passage through the province to anyone. (e) On the seventh day we arrived at Ocellum.

(B) CAESAR AND VIRGIL.

NOTE.—Candidates are required to take one passage from Caesar and one from Virgil.

1. *Cæsari renuntiatur Helvetiis esse in animo per agrum Sequanorum et Aeduarum iter in Santonum fines facere, qui non longe a Tolosatium finibus absunt, quæ civitas est in provincia. Id si ferret, intelligebat magnum cum periculo provinciae futurum et homines bellicosos, populi Romani inimicos, locis patentibus maximeque frumentariis finitimos habere. Ob eas causas et munitioni quam faceret T. Labienum legatum praefecit: ipse*

in Italiam magnis itineribus contendit duasque ibi legiones conscribit, et tres quae circum Aquileiam hiemabant ex hibernis educit, et qua proximum iter in ulteriorem Galliam per Alpes erat cum his quinque legionibus ire contendit. Ibi Centrones et Graioceli et Caturiges *locis superioribus occupatis itinere* exercitum prohibere conantur. Compluribus his proeliis pulsus, ab Ocelo, quod est citerioris provinciae extremum, in fines Vocontiorum ulterioris provinciae die septimo perrenit, inde in Allobrogum fines, ab Allobrogibus in Segusianos exercitum ducit. Hi sunt extra provinciam trans Rhodanum primi.—CÆSAR, B. G. I. 10.

(a) What is the subject of *futurum*? of *haberet*? (b) Explain the construction of italicized words in the above passage.

II. Ubi vero moveri et appropinquare moenibus viderunt, nova atque in sitata specie commoti legatos ad Cæsarem de pace miserunt, qui ad hunc modum locuti: Non existimare Romanos sine ope divina bellum gerere, qui tantae altitudinis machinationes tanta celeritate promovere et ex propinquitate pugnare possent, se suaque omnia eorum potestati permittere dixerent. Unum petere ac deprecari: si forte pro sua clementia ac mansuetudine, quam ipsi ab aliis audirent, statuisset Aduaticos esse conservandos, ne se armis despoliaret. Sibi omnes fere finitimos esse inimicos ac suae virtuti invidere, a quibus se defendere traditis armis non possent. Sibi præstare, si in eum casum deducerentur, quamvis fortunam a populo Romano pati quam ab his per cruciatum interfici inter quos dominari consuescent.—CÆSAR, Bk. II. 31.

(a) Account for the subjunctives *possent*, *despoliari*. (b) Write in direct narration the passage from *Unum petere* through *non possent*.

III. Dixit; et avertens rosea cervice refalsit,
ambrosiaequae comae divinum vertice odorem
spiravere: pedes vestis defluxit ad imos
et vera incessu patuit dea. Ille ubi matrem
agnovit, tali fugientem est voce secutus:
“Quid ratum toties crudelis tu quoque falsis
ludis imaginibus? cur dextrae iungere dextram
non datur, ac veras audire et reddere voces?”
Talibus incusat, gressumque ad moenia tendit.
At Venus obscuro gradientes aëre sepsit,
et multo nebulae circum dea fudit amictu.
cernere ne quis eos, neu quis contingere posset,
mouirive moram, aut veniendi poscere causas.
Ipsa Paphum sublimis abit, sedesque revisit
laeta suas, ubi templum illi, centumque Sabaeo

ture calent arae, sertisque recentibus halant.—VIRGIL, Bk. I.

(a) *avertens*.—what is the force of the pres. part. here? (b) *ambrosiae*: derive. (c) *talibus*: supply the ellipsis. (d) Remark on the construction of *amictu*. (e) Where was Paphos? (f) Scan the first three lines.

IV. Vestibulum ante ipsum primoque in limine Pyrrhus
exultat, telis et luce coruscus aëna:
qualis ubi in lucem coluber mala gramina pastus,
frigida sul terra tumidum quem bruma tegebat,
nunc positus novus exuviis nitidusque iuventa,
lubrica convolvit sublato peccore terga
arduus ad solem, et linguis micat ore trisulcis.

Una ingens Periphas et equorum agitator Achillis
 armiger Automedon, una omnis Scyria pubes
 succedunt tecto, et flammam ad culmina iactant.
 Ipse inter primos correpta dura bipenni
 limina perrumpit, postique a cardine vellit
 aeratos; iamque excisatrabes firma cavavit
 roboro, et ingentem lato dedit ore fenestram.
 Adparet domus intus, et atria longa patescunt;
 adparent Priami et veterum penetralia regum
 armatosque vident stantes in limine primo.—VIRGIL, BÆ. II.

(a) Give the principal parts of *pastus*, *micat*. (b) Derive *bruma*, *armiger*, *ecussat*. (c) *positis ecuriis*; *correpta bipenni*: explain the difference between the English and Latin idioms in these, and like expressions. (d) Scan the last three lines.

MATHEMATICS.

Examiner.....ALEXANDER JOHNSON, LL.D.

Assistant Examiner.....H. M. TORY, B.A.

1. The opposite angles of a quadrilateral inscribed in a circle are together equal to two right angles.

(a) Divide a circle into two segments, so that the angle in one of them may be three times that in the other.

2. Divide a straight line into two parts, so that the rectangle under the whole line and one of the parts shall be equal to the square on the other.

3. To describe a square that shall be equal to a given rectilinear figure.

4. Any two sides of a triangle are together greater than the third side.

(a) The difference between any two sides of a triangle is less than the third side.

5. Solve the following equations:—

$$(1) \quad \frac{x-1}{2} + \frac{2x-7}{3} = x-2$$

$$(2) \quad ax+by=c, \\ a^2x+by=c^2$$

$$(3) \quad \sqrt{x+10} + \sqrt{x+1} = 1,$$

$$(4) \quad (x+2)^2 = 4(x-1)^2.$$

6. Find the L.C.M. of $3x^2+27$ and $6x^2-5x-6$.

$$7. \text{ Simplify } \quad x + \frac{y-x}{1-xy} \\ 1 - \frac{x(y-x)}{1+xy}$$

8. Simplify $\sqrt{512} - \sqrt{361} - \sqrt{288}$, and

$$\frac{3+\sqrt{5}}{3-\sqrt{5}}$$

9. What principal will, at 5 per cent. simple interest, amount to \$1,280 in 5 years?

10. A mixture is made of 20 gallons of syrup worth 60 cents per gallon, 33 gallons worth 75 cents per gallon, and a certain quantity of water; a profit of 10 per cent. is made by selling the mixture at 65 cents per gallon; how much water was added?

11. Simplify

$$\frac{\frac{1}{2} + \frac{1}{3} + \frac{1}{4}}{\frac{1}{2\frac{1}{2}} + \frac{1}{3\frac{1}{2}} + \frac{1}{4\frac{1}{2}}}$$

12. Extract the square root of .1 and also of .i.

ENGLISH HISTORY AND ESSAY.

Examiners..... (CHAS. E. MOYSE, B.A.
P. T. LAFLEUR, M.A.)

I. The Roman occupation of Britain:

(a) Briefly notice traces which still exist.

(b) When did the Romans leave Britain? why? Why had the Britons to seek another ally? What ally did they find, and what was the consequence?

2. At various times in the course of our history, the Church has opposed the Crown: omitting reference to Becket, give instances, and say as precisely as you can on what question the disagreement arose.

3. The Norman, Tudor and Stuart lines.

(a) Name the first and last sovereigns of each line.

(b) Mention a conspicuous person in the reign of the sovereign you have named, and say precisely why he is so.

4. Show fully the genealogical connection between (a) the Tudor and Stuart (b) the Stuart and Hanoverian lines.

5. (a) Without giving any details of the struggle between them, specify broad distinctions between the Puritans and Cavaliers.

(b) Show from history that the two parties existed in Scotland.

6. Without reference to the Spanish Armada, show that Elizabeth in the latter half of her reign was regarded by Europe as the champion of Protestantism.

7. (a) The Exclusion Bill: To whom did this refer, and why?

(b) On what ground did John Hampden refuse to pay ship-money?

(c) How does it come to pass that Scotland has a national church of her own?

(b) State precisely why the British colonies in America revolted, and when the outbreak began.

8. Take the following leaders of invasions and risings, namely, Henry Bolingbroke (Hereford), Wat Tyler, William of Orange, Sir Thos. Wyatt, and say:

(a) To whose reigns they belong.

(b) The pretext advanced by each.

(c) The result of the struggle.

9. Connect historically the following pairs of names.

- Evesham and Simon de Montfort.
 Orleans and Joan of Arc.
 Barnett and the Earl of Warwick.
 Preston Pans and the Young Pretender.
 The South Sea Company and Robert Walpole.
 England and the Revocation of the Edict of Nantes.
 Cobden and the Corn Laws.
 France and Scotland.
 France and Ireland.

10. Assign events to the following dates : 1605, 1649, 1685, 1715, 1757, 1789, 1832, 1855.

ESSAY.

Write an essay of at least two full pages on any one of the following subjects :—

- (a) Ambition.
 (b) A Military Hero.
 (c) The Triumphs of Modern Science.

DICTATION.

I was one summer's day loitering through the great saloons of the British Museum, with that listlessness with which one is apt to saunter about a museum in warm weather ; sometimes loitering over the glass cases of minerals, sometimes studying the hieroglyphics on an Egyptian mummy, and sometimes trying, with nearly equal success, to comprehend the allegorical paintings on the lofty ceilings. Whilst I was gazing about in this idle way, my attention was attracted to a distant door, at the end of a suite of apartments. It was closed, but every now and then it would open, and some strange-favoured being, generally clothed in black, would steal forth, and glide through the rooms, without noticing any of the surrounding objects. There was an air of mystery about this that piqued my languid curiosity, and I determined to attempt the passage of that strait, and to explore the unknown regions beyond. The door yielded to my hand, with that facility with which the portals of enchanted castles yield to the adventurous knight-errant.

FRENCH.

Examiners. (P. J. DAREY, M.A., LL.D., OFFICIER D'ACADÉMIE,
 J. L. MORIN, M.A.)

1. Translate :

Il y avait autrefois un pauvre esclave qui avait un maître à la fois riche et méchant. Ce pauvre esclave aimait la vérité, et nulle menace de son maître ne pouvait lui faire dire une chose qu'il ne croyait pas être la vérité. Pour cette raison son maître le haïssait et le maltraitait, et se fâchait tellement qu'il le saisissait à la gorge et lui lançait tout ce qui lui venait sous la main.

Le pauvre esclave n'enviait pas la richesse de son maître, mais il ne pouvait s'empêcher de penser combien il serait satisfait s'il était seulement libre.

Devant son maître il n'osait pas ouvrir la bouche; mais lorsqu'il était seul il se disait: " Qui t'a fait pauvre esclave, et cet homme riche ton maître? Dieu nous a fait tous frères, et aucun homme ne devrait oser te faire esclave.

2. Conjugate the future, present indicative and subjunctive of the verbs in *Italics* in the above extract.

3. How is the article in French contrasted with the preposition *de* and *à*? Give examples for each case.

4. Write the singular of *beau* and of *beau*.

5. State five rules for the formation of the feminine of adjectives; give five examples.

6. Put the following sentences and words in the plural:

La maison de mon frère et celle de mon *sœur*. Le cheval du fermier et celui du général. La fille a perdu son *bijou* et celui de son amie, *Œil Travail*. *Nez*. *Chapeau*. *Livre*. *Souris*.

7. Translate:—

You have my book; give it to me. Have you any money? Lend it to us. Do you think it freezes? It will be necessary for me to sell all my cows. I cannot give you anything. Bring me your pens and take your sister's. My gloves are yellow, my brothers are white. He who dines with us is my cousin.

CHEMISTRY.

Examiner,..... B. J. HARRINGTON, B.A., Ph.D

1. Distinguish between chemical and physical changes, giving several examples of each.

2. Define the terms combustion, kindling temperature, metathesis, water of crystallization.

3. Give a sketch of the apparatus that you would employ in preparing distilled water.

4. How may we determine the relative proportions by weight of oxygen and hydrogen in water?

5. How is ammonia gas prepared? What are its properties?

6. Explain the relationship of acids, bases and salts, and distinguish between acid-forming and base-forming elements.

7. Write equations illustrating the changes that take place (a) when hydrochloric acid acts upon calcium carbonate, (b) when ammonium nitrate is heated, (c) when sulphuric acid acts upon a common salt.

8. What do you understand by allotropism? Distinguish between the allotropic forms (a) of carbon, (b) of phosphorus.

9. Contrast briefly the properties of hydro-chloric, nitric and sulphuric acid.

FIRST YEAR EXAMINATION.

ZOOLOGY.

Examiner, W. E. DEEKS, B.A., M.D.

1. Describe fully the structure of the *Hexactinia*, and give examples of some of the principal forms.
2. Write on the structure and life history of the *Cestoda* or *Trematoda*.
3. What is meant by the following Zoological terms? Give examples. Metamorphosis. Alternation of generations, Polymorphism, Parthenogenesis.
4. Describe the structure, and discuss the position in the animal scale, of the *Tunicata*, morphologically and embryologically.
5. Select some type of Canadian insect, and describe its structure and life history.
6. Classify the *Gymnomyza*, and give examples.
7. How would you classify the following:—Hydra, shark, crayfish, leech, cuttlefish, snail, barnacle, earthworm, mussel, seapen.
8. Describe the structure of the oyster, and show how it differs from any morphological type of the class to which it belongs.
9. Briefly characterize and give examples of the following:—*Nematoda*, *Ciliata*, *Arancida*, *Teleostei*, *Asteroida*, *Scyphomedusa*, *Colcoptera*, *Polyzoa*, *Octactinia*, *Polychaeta*.
10. Refer to their classes and order the specimens exhibited.

HISTOLOGY.

Examiners (Prof. GEO. WILKINS, M.D.
(N. D. GUNN, M.D.)

1. *White fibrous tissue* and *yellow elastic tissue*—describe each. Wherein do they differ from one another? Where is each tissue found most abundantly in the human body?
2. Describe the microscopical structure of the *tonsils*.
3. Describe a section through the kidney.
4. Describe minutely all the structures concerned in the motor portion of a reflex movement of the leg.

BOTANY.

Examiner, D. P. BENHALLOW, B. Sc.

1. Give a concise account of the structure of a plant cell as found in (a) the myxogastres; (b) protozoous, or yeast.
2. Describe the sexual reproduction of (a) *Spizopyra*; (b) *Fucus* (c) a fern.

3. State the law respecting the morphological nature of the floral organs, in a seed plant, and give proof.
4. Give a concise account of Protoplasm as to its (a), physical characteristics; (b), chemical nature; (c), behavior under external irritation.
5. Describe fully, the process of respiration in plants, and show in what respect it differs from the same function in animals.
6. Show the original source of carbon in the animal body, and explain how it is obtained and by what process it is prepared for animal nutrition.
7. Give an explanation of the way in which food is taken from the soil by plants and transferred to the digestive tract.

PHYSIOLOGY.

Examiners..... { WESLEY MILLS, M.D.
 { W. S. MORROW, M.D.

1. Illustrate the bearing of General Biology and Embryology on the study of Physiology.
2. Compare blood and lymph, and discuss the relations between the blood-vascular and the lymphatic system.
3. Consider the various factors that enter into the maintenance of the circulation.
4. Describe the action of the heart, and explain how this organ is made adaptive.
5. Compare the inspired air and the expired air, and explain the causes of the changes.
6. Write on *one* of the following subjects:—(a) The most important features of the Anatomy and Physiology of the spinal cord; (b) of the eye; (c) of the ear.
7. Describe in detail some experiment you have seen or performed, and state the conclusions to be drawn from it.

SECOND YEAR EXAMINATIONS.

PHYSIOLOGY.

Examiners..... { WESLEY MILLS, M.D.
 { F. G. FINLEY, M.D.

1. Describe the nutritive and respiratory relations (a) of the embryo chick and (b) of the embryo mammal.
2. Indicate the relations between food, blood, lymph and metabolism generally.
3. Describe experimental asphyxia and explain briefly the causation of each phase as regards both the circulatory and the respiratory system.
1. Give a general outline of digestive processes, comparing different animals. Discuss critically digestion in its relations to absorption, etc.

5. Discuss the anatomical and physiological relations of the entire visual nervous mechanism from the retina backwards, with references to experiments and their analogues.
6. Indicate by a diagram the paths of the spinal cord as marked out by degeneration; and discuss briefly the whole subject of conduction in the spinal cord and brain.
7. Discuss fully the subject of muscular tone.

—

N.B.—Special importance will be attached to the use of diagrams and references to experiments, specimens, etc., seen.

—

ANATOMY.

Examiners..... { PROF. F. J. SHEPHERD, M.D.
LECTURER H. S. BIRKETT, M.D.
JOHN ELDER, M.D.

- I. Dissection necessary to expose the omo-hyoid muscle.
- II. The thorax being opened, name in proper order the parts it is necessary to remove to expose the thoracic duct.
- III. Describe shortly the tributaries of the inferior vena cava.
- IV. Describe the sternum and mention its method of ossification and the muscles attached to it.
- V. Describe the rectum, giving its relations in both male and female, and its mode of development.
- VI. Course and relations of the nerves supplying the serratus magnus, obturator internus, crico-thyroid, and deltoid muscles.
- VII. Mention in proper order the parts intervening between the island of Reil and the lateral ventricle.

Candidates are required to answer four questions only, including the first and third.

CHEMISTRY.

Examiners..... { PROF. G. P. GIRDWOOD.
PROF. R. F. RUTTAN.

1. Describe two methods of obtaining the specific gravity of bodies: (a) in liquid form; (b) in gaseous form.
2. How are (a) the intensity, (b) the quantity, and (c) the mechanical equivalent of heat measured?
3. State and define the commonly employed units of electrical measurement.
4. Explain briefly and illustrate by example what is understood by the terms, conservation of energy, correlation of forces, physical isomerism and homologous series.
5. State the constitution of the atmosphere. How may its constitution be affected by (a) plant and animal life, (b) rise of temperature, and (c) solution in water.

6. Compare the chemical properties of (a) chlorine and iodine, (b) nitrogen and phosphorus.

7. What is the proportion of oxygen and nitrogen by weight and by volume in nitrous oxide? How may this be demonstrated?

8. Describe two methods of preparation and two chemical reactions of (a) sulphur dioxide, (b) ethyl alcohol, (c) hydrochloric acid, (d) urea, and (e) carbolic acid.

9. Give formula, chemical name and common source of each of the following:—Oil of bitter almonds, bleaching powder, cream of tartar, salicylic acid, saltpetre, gun cotton, picric acid, palm oil.

10. What are the chief products of the destructive distillation of (a) coal, (b) wood, and (c) bones?

11. 1.23 grm. of an organic compound gave on combustion 2.64 grm. of CO_2 , 0.45 grm. H_2O , and 112 CC. of nitrogen, vapour density 4.26 (air = 1). What is its formula and name?

12. Classify organic compounds containing the radicle CN, and give fully the chemistry of hydrocyanic acid.

NOTE.—Ten questions only to be attempted.

THIRD YEAR EXAMINATIONS.

GENERAL PATHOLOGY.

Examiners { J. G. ADAM, M.A., M.D.
 { WYATT JOHNSTON, M.D.
 { C. F. MARTIN, M.D.

[The first and five other Questions to be attempted.]

1. Describe the changes that you would expect to find in the organs of a man advanced in years who had for a long period presented the signs and symptoms of pulmonary emphysema.
2. Discuss the part played by the leucocytes and the bodily humours respectively in antagonising the effects of microbes and other irritants.
3. What do you know concerning eosinophilous cells?
4. What are the morbid states in which there occurs an increased accumulation of serous fluid in the cavities and tissue spaces of the body? What conclusions are to be arrived at concerning the part played by the blood vessels and lymphatics respectively in producing such increased accumulation?
5. Under what conditions does amyloid degeneration manifest itself? What organs and parts of organs are especially affected? How does it differ from hyaline degeneration?
6. What conditions favor the development of gall-stones, and what forms of these calculi are to be distinguished?
7. State the causes of pulmonary embolism, and discuss the subject of hæmorrhagic infarction of the lungs.

8. Mention briefly the characteristics of (1) Hepatogenic Icterus ; (2) Haemo-hepatogenic Icterus ; (3) Hepatisation of the lung ; (4) Splenisation of the lung ; (5) Interstitial emphysema of the lung ; also the characters of the blood in (6) pernicious anaemia ; (7) chlorosis ; (8) anaemia following upon haemorrhage.
9. Describe the changes that may occur in a region in which blood has become extravascular.

PHARMACOLOGY AND THERAPEUTICS.

Examiners { Prof. A. D. BLACKADER, M.D., etc.
Dr. N. D. GUNN.

1. (a) State briefly the advantages and disadvantages of opium as a somnifacient. What are the chief contra-indications to its employment? (b) Mention four official preparations of it, and state the dose of each necessary to induce sleep in an adult.
2. (a) Mention four official preparations of arsenic, with their several doses. (b) State the indications for the use of the drug, and give exact instructions as to its employment.
3. (a) Describe the following drugs:—rhubarb, senna, jalap, sulphate of magnesia; compare briefly their action. (b) Mention two official preparations of each with the dose.
4. (a) Compare briefly the action on the heart of alcohol, strychnine, and digitalis. (b) State the conditions under which you would employ one in preference to the others.
5. (a) State briefly the physiological action of pilocarpin. (b) Mention the principal methods by which free diaphoresis may be induced in a patient.

MENTAL DISEASES.

Examiner T. J. W. BURGESS, M.D.

1. What faculties are necessary to the proper upbuilding of the intellect?
2. Define insanity.
3. Define illusions, hallucinations and delusions, and give an illustration of each.
4. Given the following symptoms, what form of insanity is most probably indicated? Patient sits inactively in one position; vacant look upon face; unobservant of surroundings; speechless; refuses food or takes it unwillingly; slightly resistant; extremities blue, cold and swollen; uncleanly in habits; memory and consciousness not wholly obliterated.
5. Diagnose between acute mania and acute delirious mania.
6. What are the chief points to be observed in the examination of a person supposed to be insane?
7. What are the legal tests of insanity in criminal cases, in testamentary cases, and in cases of interdiction?
8. A medical man is called to examine into the testamentary capacity of a patient. What precautions should he take to assure himself whether he is in a fit mental state to execute a valid will?

BACTERIOLOGY.

Examiners..... { J. GEORGE ADAMI, M. D.
 { C. F. MARTIN, M. D.

[Four questions only to be answered.]

1. How would you proceed to demonstrate that a given disease is due to the presence in the organism of a specific microbe? Describe the special methods employed for bacteriological diagnosis of tuberculosis, cholera and diphtheria.
2. State what you know concerning the bacillus of enteric fever; its properties, distribution in the affected organism, and the mode whereby it produces its toxic effect.
3. Mention those pathogenic microbes which in general bring about chronic inflammatory processes in the human body. Compare the lesions produced by the different forms, and contrast these with the lesions produced by the microbes of acute suppurative processes.
4. Classify the various methods whereby animals can be rendered refractory to infectious disease. From such a classification what conclusions can be drawn as to the nature of immunity.
5. Give a list of the pathogenic micrococci with sketches illustrating any differences in their shapes and characters.

MEDICAL JURISPRUDENCE.

Examiner Prof. GEO. WILKINS, M.D.

1. *Rigor Mortis*. Explain it fully. How may some poisons affect its onset?
 Mention some of the forms of violent death from asphyxia, and how they differ in post mortem appearance from one another.
3. What is the *Hydrostatic test*? What are the objections to it?
4. What are the symptoms of poisoning by Carbolic Acid? How would you treat such a case?

FOURTH YEAR EXAMINATIONS.

OBSTETRICS AND DISEASES OF INFANTS.

Examiner Prof. J. CHALMERS CAMERON, M.D.

1. What are the causes of delay in the third stage of labor? What would be your treatment?
- A multipara *æt.* 35, at full term, is palpated shortly after labor has begun. The pelvis is roomy and child of moderate size, vertex presenting. The examining hand descends further on the right side of the pelvis than the left; the foetal heart is heard on the right side of the abdomen, midway between the anterior superior iliac spine and the umbilicus. Describe fully the mechanism of delivery.

Post-partum hemorrhage. Give causes, symptoms and treatment. How would you treat:

- (a) Ophthalmia Neonatorum.
- (b) Umbilical hemorrhage.
- (c) Thrush.

THEORY AND PRACTICE OF MEDICINE.

Examiners { Prof. STEWART, M.D.
 Prof. FINLEY, M.D.
 Prof. LAFLEUR, M.D.

1. Describe the various atypical forms of Typhoid Fever. [30.]
2. Discuss the physical signs of the conditions producing displacement of the heart to the left side. [30.]
3. Discuss the prognosis in the various common forms of cardiac valvular defects. Mention the usual modes of termination in such cases. [30.]
4. What are the diseases, other than surgical, in which blood may be present in the urine? Describe the microscopic characters of the urine in each case? [35.]
5. Discuss the nature and treatment of Tetanus and Tetany. [20.]
6. Describe the course, symptoms and treatment of Acute Poliomyelitis and the usual forms of Diphtheritic Paralysis. [30.]
7. What conditions lead to effusion into the peritoneal sac? [15.]
8. Give the symptomatology and treatment of nervous dyspepsia with Hydrochloric hyperacidity. [30.]
9. Describe the morbid anatomy of General Miliary Tuberculosis, and give the clinical features of the pulmonary form. [30.]
10. An anaemic, middle-aged man has been complaining for some months of headache (chiefly occipital), vertigo, vomiting, languor, debility, palpitation and occasional attacks of dyspnoea. Complete the case by pointing out its probable nature, and supply the links necessary to form a complete diagnosis. [50.]

N.B.—The figures in brackets represent the number of marks allotted to each question.

SURGERY.

Examiners Prof. JAMES BELL,
 Prof. G. E. ARMSTRONG.

1. Describe in detail the treatment and general management of a case of compound comminuted fracture of both bones of the leg in the lower third.—say in a healthy young man, first seen after receipt of injury!
2. Burns—classification, special dangers and treatment? Treatment of resulting deformities!
3. The causes and varieties of aneurism! The surgical treatment of aneurism of the common femoral artery!
4. Define the various forms of talipes, and describe the treatment suitable for different degrees of talipes valgus!
5. Trace the history of a case of prostatic hypertrophy! Give briefly the symptoms and the indications for treatment at different stages!
6. What are the symptoms of the first stage of morbus coxae? Discuss the prognosis and outline the treatment that you would adopt!

7. Mention the causes of intestinal obstruction? What is the most common situation of intussusception? Give the symptoms, natural history and treatment of acute intussusception?
8. What veins are involved respectively in internal and external haemorrhoids? Give the palliative and operative treatment of internal haemorrhoids?
9. Give in detail the surgical treatment of empyema!
10. Give the pathology and morbid anatomy of acute suppurative osteomyelitis!

GYNECOLOGY.

Examiners (Professor WILLIAM GARDNER, M.D.
Assistant-Professor T. JOHN ONEALOWAY, M.D.)

1. Give the indications for, and the principal methods of examination of the female pelvic organs.
2. Give the cause, and symptoms of chronic metritis.
3. Sketch the natural history, complications, and accidents of ovarian tumours.
4. Enumerate the causes, and sketch the treatment of cystitis.

OPHTHAMOLOGY AND OTOLOGY.

Examiners (F. BULLER, M.D.
J. J. GARDNER, M.D.)

1. Atropine and Eserine—describe their action on the eye. Under what circumstances may they be used with benefit, and how they act injuriously?
2. A person twenty years of age has $V = 1$ without any glass, and the same vision with or $-2D$. What is the error of refraction, and how should it be corrected?
3. Acute catarrhal conjunctivitis, acute simple plastic iritis, and acute glaucoma—give the differential diagnosis between these three morbid conditions.
4. Describe the normal membrana tympani.
5. A child seven years of age, more or less is subject to frequent attacks of ear-ache, with more or less constant dullness of hearing. What is the nature of his ear affection, and how would you deal with such of case?
