## No. 284. "Fore Door" Auto Sleigh

After examining the above illustration of what we believe is the handsomest sleigh on the market and the most original in design, the public will conclude that we are justly entitled to the claim that we are the **pioneer designers** in the vehicle business in Canada.

This sleigh has been worked out with great care and at considerable expense. It is exceedingly attractive in appearance, and gives the solid comfort of the "fore door" automobile body, which has been so much in demand this season.

The doors are very strong and have lever locks. They also have mahogany finishing strips on top. The seat is unusually wide and exceedingly comfortable.

We have not spoiled the appearance or utility of the job by attempting to use a standard gear, but have made everything especially for it from shaft tip to runner.

**Painting**—A beautiful combination of three shades of Gray, or Royal Blue with Gray gear to order.

**Upholstering**—Blue Cloth. Exceptionally easy spring back and spring cushion, regular automobile style. Doors and front of sleigh padded. Velvet carpet. It has nickel mountings, plumes, and removable small seat.

**Gear**—Finest construction, special throughout—centre draft shafts, with loose bar for side draft.

**Body**—Beautifully made and finished off. Seat, a solid bending, exceptionally roomy.

Telegraph Code: *Bandolcer*.
