TARIFF PROFILES

Technical Explanatory Note

The attached bar graphs present tariff profiles for Canada, the USA, EEC and Japan, overall and by sectors. The tariff profiles were prepared on the basis of the following:

- . tariff lines distributed to different sectors as per Annex I;
- . 1983 trade allocated to 1987 post-Tokyo Round rates;
- . AVE's where tariffs are in terms of specific or compound rates;
- . GATT bound rates or applied if no binding exists;
- . Auto Pact trade has been excluded;
- . illustrative tariff items and rates of particular interest to Canada have been set out for each sector;
- . average (median) rate of duty for all tariff items;
- . average (median) rate of duty for dutiable items only;
- . trade weighted average duty by sector based on actual imports from Canada in 1983 (except, of course, for Canada's own tariff profiles).
