Methodists Favor Church Union as Proposed by Presbyterians, and May Adopt Recommendations at Next Conference

WOMAN SENATOR TELLS ABOUT GOOD LAWS

Mrs. Helen Ring Robinson Says the Air of the Home Has Been Brought Into the Legislature and Laws Protecting the Homes Have Been Passed.

Typical of the affiliation of the old woman and the new, were the decorations at Columbus Hall last night, when Senator Helen Ring Robinson of Colorado, addressed a large and appreciative audience. The platform from which Mrs. L. A. Hamilton introduced the distinguished speaker was bright with yellow bannerettes and bunting, displaying the mottoes "Votes for Mother" and other suffrage slogans, while handsome palms and foliage gave the artistic atmosphere which always betokens the presence of women of refinement.

In presenting Mrs. Robinson to her audience, Mrs. Hamilton spoke of her as the product of the feminist movement, and doubtless she felt proud at the offering which opportunity had put in her way.

"The push of circumstances," said the speaker, "is cracking and breaking the old line of things. The status of women in the economic, educational, and social world has undergone a change; it only remains to attain a like change in their political situation."

No one could carry about with him opposition to the vote for women, unless he carried about in his mental baggage a double standard of justice and fair play.

Apologizing for speaking about herself, the senator raised a laugh when she said that it seemed egotistical, "it doing so, as it was the only subject upon which she was the best living authority."

When lecturing on a certain occasion in the States, she was asked by a little man who looked as if he had been left over since yesterday, and whose feet were not mated, "why she was not at home attending to its duties rather than talking and traveling about. In reply she had told the employer of forty-three women employed in the state capitol, who were keeping up home, whose husbands in several instances had deserted them."

SIR JAMES WHITNEY SINKING DEATH IN FEW HOURS FEARED BUT FRIENDS CLING TO HOPE

Improvement Noted on Tuesday Not Maintained, and Close Watch is Kept at Bed-side by Hon. Dr. Pyne and Secretary Wallis—Premier Scott's Sympathy.

NEW YORK, Jan. 7.—(Special.)—"Sir James Whitney is not expected to live thru the night," was the item of official bulletin issued at 10 p.m.

NEW YORK, Jan. 7.—(Can. Press)—While the official bulletins issued from the apartments of Sir James Whitney, premier of Ontario, continue to indicate little change in his condition, there is less of the hopeful feeling among those who are in attendance about his apartments at the Hotel Manhattan.

Dr. Pyne issued his latest bulletin tonight about 9 o'clock and about an hour later stated that the conditions were still the same. The night bulletin read: "Practically no change in Sir James Whitney's condition during the last twelve hours."

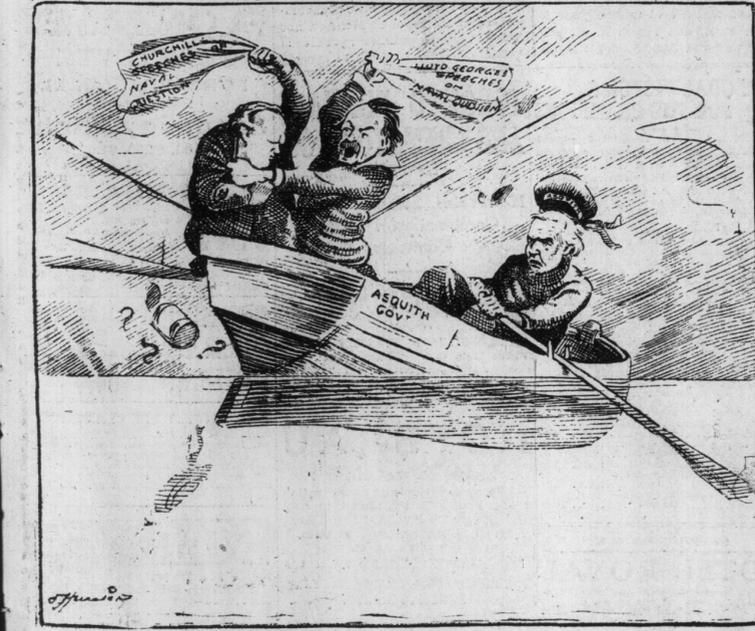

Premier Scott called. A flood of visitors from Canada continue to enquire about the condition of the distinguished patient. Among today's callers was Hon. Walter Scott, premier of Saskatchewan, who was at one time the victim of an illness that in its course closely resembled that under which the Ontario premier is now suffering.

Keeping Close Watch. While both Horace Wallace, the premier's secretary, and Dr. Pyne went out today, they did not leave the apartments at the same time and tonight Dr. Pyne remained within the hotel instead of taking a stroll outside, as he has usually done, even during the trying period following the premier's collapse on Friday last.

REGINA POLICE ARE ON BOLD TERRORIST'S TRAIL Man Who Threatened Fire and Dynamite Disclosed Identity.

REGINA, Jan. 7.—(Can. Press.)—The "unemployed gang" who the other day sent a letter threatening to demolish Regina with fire and dynamite if the "white unemployed" were not found work immediately, has been identified as Jerry Miner. He revealed his identity in a rooming house frequented by unemployed, but left before the police could get there.

ROCKING THE BOAT

CANADA TO BAR U. S. POTATOES IN REPRISAL

Request of New Brunswick Producers That Embargo Be Placed, Will, It is Believed, Be Acted Upon at Ottawa—Would Benefit Ontario Consumer.

(Special to The Toronto World). OTTAWA, Jan. 7.—It is the belief here that the government will place an embargo on potatoes from the United States. Today a resolution was received from the New Brunswick potato raisers who were in session a few days ago at Woodstock, N. B., asking that the government retaliate on the United States, which recently placed an embargo on Canadian potatoes because of "powdery scab." The New Brunswick growers state that United States potatoes are not only affected by powdery scab, but by other more serious diseases.

The effect of this embargo will be that the New Brunswick growers will find their market in Ontario and the western provinces instead of in the United States. At present, it is understood, there is in New Brunswick forty per cent. of last season's crop still unsold. This would immediately be shipped west.

The market price of potatoes in Ontario is high at any rate, and this is largely due to the fact that the Canadian crop is five million bushels less than last year. The introduction of potatoes from New Brunswick, which is the potato province of Canada, would help the situation in Ontario from the consumers' point of view at any rate.

LAKE ERIE AND NORTHERN RY. MAY BE ABSORBED BY C.P.R.

Agreement Soon Will Be Executed, If It Has Not Already Been Made.

(Special to The Toronto World). BRANTFORD, Jan. 7.—From a reliable source it was learned this morning that it has been agreed between the companies that the Canadian Pacific should absorb the Lake Erie and Northern. If the agreement has not already been executed it very soon will be. Chief Engineer Kellett, of the L. E. and N., has been in Montreal for several days at the headquarters of the Canadian Pacific.

NAVAL RACE DUE TO LARGE SHIPS

Britain Can Check Feverish Movement by Reducing Size of Warships, Says Hobhouse.

LONDON, Thursday, Jan. 8.—(C.A.P.)—Right Hon. C. H. Hobhouse, M.P., whose speech last night on the naval question was looked forward to with considerable interest, said that while he himself wasn't a naval expert, he had ample opportunity of consultation with those who were. There was no doubt in his mind that much of the increases in our armament was due to the creation by England of greater ships than she had ever possessed before.

If it were possible to reduce the size, power and cost of those ships, he was informed by naval officials that past history and present experience would lead to other nations reducing the proportionate size of their ships, and if that, which was not a Utopian hope, came true we should have at once in our power the way to reduce these costly armaments without affecting our margin of safety. In that way we could make a beginning before the new financial year came into operation.

METHODISTS ARE ACCUSED DIRECTLY OF EVASION MOYES PROMISED TO PRODUCE STATEMENT OF HIS POSITION

Special Conference Committee Decides to Proceed Without Delay Towards the Consummation of the Union of Methodist, Presbyterian and Congregational Bodies.

That the changes in the basis of church union proposed by the Presbyterian Church did not present any insuperable obstacles in the way of consummation was the decision reached last night by the Methodist General Conference special committee. The committee put itself on record as being in favor of co-operating with the other churches in a survey of church conditions throughout the Dominion. The next meeting of the general conference will be held in the Dominion Church at Ottawa on Sept. 22.

The resolution passed by the committee with regard to church union was as follows: "That this general conference special committee, with great care, has considered the general proposals presented by the representatives of the Presbyterian Church relating to the proposed changes in the basis of union and a general survey of church conditions in our country."

"That this committee are of the opinion that the proposals present some vital changes in the principle of the basis of union, and that the proposed survey would be of advantage to the future work of our church or churches, in view of the fact that our general conference and all our lower courts have taken action on the present basis and that our general conference will meet next September, and that our committee on church union has not been appointed, as has been the case of the Presbyterian Church, we do not feel at liberty to take further action to pass forward the proposed changes in the basis to our general conference with an expression of our opinion that they are not in any insuperable difficulties in the way of consummation."

MONTREAL POLICEMEN ARE ACCUSED OF THEFT

Fire Department Foreman is Also Charged With Receiving Stolen Goods.

MONTREAL, Jan. 7.—(Can. Press.)—Following the arraignment today of Claude Vachet, who a few days ago, while a constable attached to the central police station, is alleged to have stolen a fur muff and cape, Constable Lécompte was taken into custody today on a charge of having received stolen goods. Later in the day Foreman Alphi Gaynor, of the Ontario street fire station, was taken into custody on a charge of theft.

EDMONTON DISMISSED TWO CIVIC OFFICIALS

Inspector Buck and Engineer Bowness Were Notified by City Commissioners.

EDMONTON, Jan. 7.—(Can. Press.)—Two dismissals and one appointment were made at a secret meeting of the city commissioners with Mayor McNamara as chairman today. C. L. Richardson, ex-city auditor has been appointed to the position of deputy commissioner of finance which makes him also inspector of departments and assistant to the mayor.

SUBSCRIPTION WAS \$500.

In the list of subscriptions to the building fund of the Toronto General Hospital, published some days ago the subscription of Thomas Kinnear & Company was given as \$50, when as a matter of fact the sum donated by the company was \$500.

Seats for "Broadway Jones." The advance sale of seats for the engagement of George M. Cohan in his latest and greatest success, "Broadway Jones," which will be at the Princess next week opens this morning at the theatre. Mr. Cohan will positively appear himself.

Military That Must Sell Now. Some of the most exquisite dress and suit hats of the season that were formerly priced from \$7 to \$10 will be cleared at the wonderful figure \$3.48 at Dineen's, 140 Yonge street. They are in silk, velvet and plush trimmed with ostrich mounts, wings, etc., and all Paris and New York styles. Clearing prices are also quoted on fur and fur-trimmed hats. These hats are being shown in the Dineen windows today.

Nurse Died at Patient's Bedside

While attending a patient in the emergency ward of the Victoria Hospital, 54 Isabella street, at 8 o'clock last evening, Miss Myrtle J. Jones, a nurse, dropped dead from heart failure. Miss Jones was a graduate of Victoria Hospital, and was about 25 years of age.

CATTLE RAISING PHASE OF LIVING COST PROBED

Departmental Official Was Called Before Investigators at Ottawa Yesterday.

OTTAWA, Jan. 7.—Roy S. Hamer, chief of the cattle division of the live stock branch, testified today before the commission on the cost of living, on the condition of the cattle raising industry, which, of course, is one of the most important sources of the food supply of the country.

MOYES MUST PRODUCE

There was no mining of words on the part of Chairman McIntyre in the arraignment yesterday. Moyes' air of "injured innocence" and pleadings of ill-health would not be swallowed by the board. His opportunity now lies in the one word, "Produce."

The outburst of the chairman followed the realization of the fact that the investigation was being balked at every turn. A most dramatic air was given to the evidence when it was found that certain deposit cheques in the Dominion Bank, revealing some valuable data, had been collected by Mr. Moyes on Tuesday, the first day of the inquiry. These, when called upon, he could not produce. This stirred the board to indignation.

NO USE IN EVADING

"You need not put on an air of innocence," declared the chairman. This board is entitled to an account of affairs and will get it. There is no use in being shifty and evasive.

"You had the books explaining these things, and said you turned them over to Mr. Smoke, a man now dead, and whose mouth is closed. It is absurd to talk of those sums in that way. We are entitled to know, and the people are, and we will know."

THE ONLY PLECE OF ACTIVITY YOU HAVE DISPLAYED IS TO GET HOLD OF THESE DOCUMENTS

The high tension of the sitting developed when Mr. Munro of the Dominion Bank stated that Mr. Moyes had been in the bank offices the day before, receiving some cheques held as security. Moyes had received them thru the accountant, who had handed them over, understanding him to be connected with the Ontario West Shore.

Mr. Munro said that he himself would not have done it, as business was done in the name of J. A. Paterson. "What did you do with those cheques?" demanded Commissioner Kitson of Mr. Moyes. "Would Bring Them." The reply was that he wanted to place the time of some former employees and to see about a cheque in that connection. He would bring them from his office. "Did you get other cheques from this account?" asked the chairman. He had. Where they were he did not know. Some of them he had signed for. This had happened on Tuesday, Jan. 6, 1914. "When did you get them?" was asked. Witness could not remember, although only a day had passed. After some (Continued on Page 7, Column 1.)

ST. JOHN AMBULANCE. Annual Dinner Given by Association Was a Success.

The officers and members of the Toronto Corps No. 1 of the St. John Ambulance Brigade held their first annual banquet at the Woodbine Hotel last night.

All of the above gentlemen spoke after the dinner. An illuminated address, thanking him for his efforts on behalf of the address, was presented to Sir Henry Pellatt by Corp. Secretary Keen and Superintendent Cook.

WANT JOHNSON TO FIGHT G. SMITH IN MEXICO.

SAN FRANCISCO, Jan. 7.—A telegram has been sent to Jack Johnson by local promoters, offering him a fight with Gunboat Smith for the heavyweight championship of the world, the bout to be held across the Mexican border, at Tia Juana, Lower California, on July 4th next.

He was also presented with a bouquet for Lady Pellatt, who was unable to be present. About one hundred attended the dinner.

Suits and Overcoats and Tooke Furnishings

The "Lonely" Sale

WHEN I offer a Semi-ready Suit or Overcoat worth \$25 for \$18, you can depend on the "worth" of it. The makers put the label in the pocket as a price protection to Customers—for we expect every buyer to be a regular Customer.

SEMI-READY started fifteen years ago to give people at wholesale a finely-tailored garment at a fair price. Their opposition came from the trade—from merchants who preferred price-juggling, making-up to mark-down, and the haggling and bartering policy, in which the customer who did not know wool values and workmanship always got worsted; he pitted himself against the skill of a professional value-juggler.

WHEREVER you go—when you see the Semi-ready sign in a town—it means that the merchant believes in a fair price, a square deal, and the real service that a man wants in a man's store—both before and after he buys.

THE "Lonely" Sale is a Stock Clearance; it occurs always at the close of the busy season, when Suits and Overcoats that are not to be repeated in pattern must be sold while they are still in the mode of fashion.

THIS season I make a clean sweep quickly by unheard-of reductions—about 200 "Lone-lies" being marked down at exactly half-price.

AVOID any disappointment to a customer by including every garment in the shop for the full period of the sale—at substantial reductions. No man likes to pick out a suit he likes and then be told: "Oh, but that suit is not in the sale—it's full price." I am determined to satisfy everybody.

FROM the front door to the tailor shop—not a garment is reserved. All the R. J. Tooke Men's Furnishings at 20 per cent. off.

Upstairs in the Dress Goods Section you will find reductions of 20 per cent. on Dress Suits, Tuxedos and fine Serges and Cheviots; heretofore these have always been reserved from the "Lonely" Sale.

The Semi-ready Store William G. Hay 143 YONGE STREET

NEWS OF THE DAY FROM EARLS COURT

Many Lodge Meetings—Good Work of E. Boggis Recognized by S.O.E.

MANY NEW STORES

Bathurst Hill Owners Will Appeal to County Judge on Assessment.

Canadian Order of Foresters, Fairbank Lodge, will hold their next meeting in Wilcox Hall, on Tuesday, Jan. 21.

In another year's time, if not before, four additional rooms, allowed for in the plans of the new Fairbank public school, will be built.

The site of the temporary hotel, opposite the new building, will be used by the proprietor in the near future for three solid brick dwellings.

Earls Court on re-opening Monday was crowded to the doors. Principal McLean, in an interview, stated that another storey would have to be added to the school. This would give six more rooms.

In some parts of the Earls Court district the hydro lights are not more than six feet above the sidewalk.

Wychwood Lodge, No. 427, I.O.O.F., has installed the following officers: Bro. J. Forsey, noble grand; Bro. J. English, chief clerk; Bro. J. B. B. B., warden; J. McLeod, inside guard.

The people in the Bathurst Hill section who are affected in assessment by the proposed Bathurst Hill grading, and other improvements pertaining to it, intend to appeal before a county judge to see if it is not possible to get a fairer apportionment of assessment.

Concrete work is being rushed forward on the St. Clair avenue bridge at Bathurst street by the contractors, who are anxious to get this part of the work completed before the winter sets in.

The choir of the Church of the Messiah took a trip out to Scarborough Junction on Tuesday evening, where the new Christmas cantata "Morn of Glory," by Fred W. Peace, was sung in the new Church of the Epiphany.

The executive of the Ratepayers' Association will meet on Tuesday evening, at the real estate office, corner of Yonge street and Eglinton avenue.

The ladies' aid of the Eglinton avenue Methodist Church held a social last evening.

STRONG CAMPAIGN ON AT BRAMPTON

Temperance Party Strengthening Organization for Future Work.

PEASE ANNUAL DANCE

More Election Results From Peel Townships—Other Local News.

The temperance people are so elated over the result of Monday's voting on the local option question that they have called a mass meeting of county workers on Tuesday afternoon to take steps towards beginning the fight on the Canada Temperance Act.

The Pease Foundry employees hold their annual dance in the Pease Terrace, a train is being run from Toronto.

The Grace Terrace section of the main sewer is progressing rapidly, quite a large band of workmen being employed on the work.

To prevent any trouble in the future provision has been made in connection with all the vacant land.

All the drains are being graded eastward to the main sewer at the corner of the street, which will be carried south on this street.

A hockey tournament under the auspices of the Richmond Hill Hockey Club will start on the evening of Jan. 19.

The annual meeting of the East York Ploymen's Association will take place in Agincourt on Saturday afternoon.

Officers for the year will be elected and general business transacted.

The annual meeting of the East York Ploymen's Association will take place in Agincourt on Saturday afternoon.

The committee will endeavor to get some well-known Toronto players to play in the next series of final games.

A missionary institute will be held at Aurora Trinity Church on Monday and Tuesday, Jan. 12 and 13.

This institute is to serve the parishes of the rural deanery of West York.

A large crowd turned out to the meeting held in connection with the week of prayer.

The executive of the Ratepayers' Association will meet on Tuesday evening.

The ladies' aid of the Eglinton avenue Methodist Church held a social last evening.

GIVING QUICKLY THEY GAVE TWICE

Judging by the reports that come to hand frequently, there are a lot of fine, warm-hearted men connected with the Union Stock Market.

S. S. ASSOCIATIONS MET AT NEWMARKET

Big Meeting in Methodist Church—Many Interesting Addresses.

OFFICERS WERE ELECTED

Fred Sutton of Pickering College President—Other Local News.

One of the most enjoyable and successful meetings yet held under the auspices of the Aurora and Newmarket Sunday School Association took place yesterday afternoon and evening at the Newmarket Methodist Church.

Local doctors are mystified by an epidemic of jaundice in town. Quite a number of citizens have been affected and the cause of it has not yet been located.

Two deaths occurred in Newmarket yesterday, Mrs. J. Dunlop and Mrs. L. W. Leaman being called.

BIG NOVA SCOTIAN EXTENSIONS PLANNED BY CANADIAN NORTHERN

Right of Way From St. Peter's to Sydney to Be Secured and Vanderbilt-Webb Line to Be Acquired and Extended—Will Hasten Construction.

SYDNEY, N. S., Jan. 7.—(Can. Press).—Another big railway deal is to go thru in Cape Breton, according to word received here today.

The information was to the effect that Mackenzie and Mann will negotiate for a right of way from St. Peter's to Sydney, with a view to enlarging their already extensive business in the province.

Included plans for the extension of the Halifax and Southwestern Railway to the Strait and thence to Sydney, making a complete loop of the C. P. R. line around the province with a transit line to the Mackenzie and Mann line at Inverness, and the operation of this and the Mackenzie and Mann iron deposits at Nictaux and Annapolis by the amalgamated corporation.

According to the information received it is the intention of the company to establish a junction at a point convenient to Sydney and Louisburg with the terminals at both places.

For some time past it has been rumored that a deal to amalgamate the C. P. R. and the C. N. R. was under way and that the negotiations

## Theatres and Concerts

"Broadway Jones," Geo. M. Cohan's latest play, with Geo. M. Cohan himself in the title role and assisted by his father and mother and the others of the original cast, will come to the Princess Theatre next week, with the usual Wednesday and Saturday matinees.

"Broadway Jones" accounted Mr. Cohan's best comedy down to date. The story of the play has to do with Jackson Jones (played by Mr. Cohan). Jones is an idler who has about reached the end of his resources. So desperate has he become, in fact, that he has engaged himself to a widow of uncertain age and a positive bank account. At this interesting stage he inherits more than a million dollars, represented by a patented chewing gum business. With the chewing gum enterprise goes a pretty goodly sum.

At this point a trust tries to take his business away from him, and out of that situation and his efforts to rid himself of the widow of uncertain age, the play develops into a series of exciting situations that are exceedingly funny. Of course the ending is happy, but it takes four of the best played farcical acts that the stage has seen in recent years to clear the tangle into which young Jones' folly plants him.

"Broadway Jones" is a very funny play. It excites the best laughs, but it is honest laughter, the sort that one may enjoy without the necessity of looking apologetically at one's seat mate. But, of course, all Cohan's plays are of that sort. Seats go on sale this morning at the Princess.

**Blanche Ring**  
There is no interest manifested in the appearance of Blanche Ring, one of America's foremost singing comedienne, at the Alexandra Theatre. Her first seat sale has opened briskly, and it is very evident that after two weeks of Shakespeare the theatre audience is eager to welcome a musical production.

Blanche Ring will be seen in her new musical comedy, "When Claudius Bled," written for her by Anne Caldwell, who wrote the Leaminger and "The Girl in the Red Coat." Ring's new offering is not only a big popular bit, but one of the liveliest, most laughable and most useful musical shows in the city. Ring is the country over, and her wholesome fun making, her charming personality, and her rare gift of singing the songs of the day are much appreciated.

With a brilliant comedy, headed by Harry Conroy, and including sixteen of Broadway's most stunning show girls, Ring's new offering is a gem. The songs that set all feet to moving in unison, the rhythm, and the entire audience singing and humming in delightful accord with the singer. Altogether "When Claudius Bled" is an excellent production of the day. Seats went on sale this morning at the Alexandra.

**"Bunty Pulls the Strings"**  
It seems that at the present day it is the duty of newspaper readers to know whether they live in New York, London or Kalamazoo. They are alive to anything exceptionally interesting, and the newspapers and magazines quickly carry the news to their corners of the earth. In no instance has this more clearly been exemplified than in the success of "Bunty Pulls the Strings," a quaint and beautiful comedy coming to the Alexandra Theatre next week. It was written by an unknown Scotch actor, whose work was, until recently, among the small hamlets of his native Scotland. Then some American tourists, happening county hall to witness an concert, were told to "kill time" and behold, they were treated to a performance of "Bunty Pulls the Strings," in which they returned to London they talked about it. The result was that an alert London manager sent one of his agents to Scotland to investigate. The report was so favorable that a final performance was given, and the following day, the author, Graham Mackay, actor and author, was a famous man. His play was produced in New York the story was the same.

**The Trained Nurses Coming to Sheila's**  
Quite the most charming of London, Sheila's productions is said to be the newest musical play, "The Trained Nurses," which headlines the bill at the Alexandra Theatre next week, featuring Clark & Bergman, two well-known vaudeville players of more than usual ability.

The book is by William Le Baron, the author of "The Antique Girl," etc., and the music by Leo Edwards, the well-known song writer, and the lyrics by Blanche Morrill. There are seven pleasing musical numbers. During the progress of the plot, the beautiful costumes are shown, the wedding finale being one of the prettiest dressed numbers ever mounted on the vaudeville stage. Among the musical numbers are "Humpty Dumpty," "I've Had a Lovely Time," "I Can't Be True," "Wedding Bells," etc. The scene of the musical comedy is the sun parlor on the roof of a private sanitarium in New York city, and most elaborately and novelly designed.

The special extra attractions for next week are Frank Keenan and Company, in "Richard Harding Davis' one-act play, "Blanchard," Ed. F. Reynolds, the ventriloquist with a production by Gus Van and Joe Schenck, the pennant battler of England.

Included in next week's bill are the Murray Sisters, Swan, Dale & Hal, Hamilton, Doan and Hanson, and the Kinetograph.

**The Famous Flonzaley Quartet.**  
On Saturday evening in Foresters' Hall, College and Yonge streets, will appear for the only time in Toronto this season the famous Flonzaley Quartet, the most perfect string organization now appearing to the public. With a high, clear, critic of The Boston Herald says: "In addition to a perfect ensemble in attack, phrasing, exquisite sense of proportion and common relationship, the performance of the quartet are distinguished by unusual tonal beauty, inflection, variety of nuances, immitable rhythm, fire and passion." Similar praise is being accorded the quartet everywhere on their seventh tour of America, now in progress, and a highly cultured audience is assured for their local appearance. Seats may now be reserved at the Lyceum, bureau at Bell's, 146 Yonge street.

**Cruise Girls.**  
One of the largest and withal best equipped burlesque organizations on the circuit, is booked as the coming attraction at the Star Theatre next week with the customary matinee. It is known as Charles Robinson's "Cruise Girls," and should play the banner week of the season in Toronto. The chorus is composed of twenty-five of the prettiest maidens ever gathered in a single troupe and they are a magnet in themselves. Mr. Robinson heads a cast of experienced and talented comedians, vocalists, dancers, and entertainers in the two burlesques, "The Beauty Trimmers" and "Solomon the Soldier," each a well-made waffle containing from four to six eggs in each quart. Besides this waffles are spread with butter and eaten with maple or other syrup, and this makes an almost complete food.

The waffle iron should fit snugly over the hole in the range top and be very hot, but not smoking, when you start to bake. Have a mixture of butter and lard melted together with which to grease the iron. Butter cannot be used alone for this as it burns so easily; salad oil or compound or clear pork dripping is excellent. To apply the grease quickly and thoroughly to every corner there is nothing so good as a pastry brush; these are about two inches wide and are set in rubber so none of the hairs can pull out.

Brush both insides of the waffle iron and pour about four tablespoons of batter in. That is, put one tablespoon of batter into each of the four compartments. Close the iron, count ten slowly, then turn the cakes, count fifteen, when they should be brown and crisp. The fire must be very hot, and there is, necessarily, some smoke as the grease from the iron will creep out the edges as the waffles rise and bake. A good draught of air will carry this out, and as the baking progresses there will be less of it.

Marie Brown has officiated at some delightful waffle breakfasts, in capacity of first cook, and I am pleased to have her recipe to pass to you. Separate four eggs and whip up the whites and set these aside. Beat the yolks to a foam and add a pint of milk, two tablespoons of melted butter, one tablespoon sugar, one teaspoon of salt and three cups of flour sifted. When this is a smooth batter fold in the stiff whites of the eggs and put the whole mixture into a pitcher, as it can be poured onto the waffle griddle more conveniently from this than from a spoon. Planet cakes are made exactly as waffles are, except that sour milk and a teaspoon of soda is used in place of sweet milk. These cakes are baked on a flat stone griddle or in an omelet pan.

**Gayety Girls.**  
One of the big features with the "Gayety Girls" Company, which comes to the Gayety Theatre for the week commencing next Monday, is the gingersy work of the big Broadway Chorus, which offers a series of attractive stage ensemble and dancing numbers, which embody all of the most popular and most popular of the fangled dance crazes. It might be of interest to note that each individual member of the "Gayety Girls" chorus is a finished solo musician, and one of the final march numbers presents the girls in military costumes, in which the chorus combines itself into one big brass band, and furnishes music of harmonious and tuneful attractiveness.

**Mendelssohn Choir.**  
The question of the proposed English and continental tour of the Mendelssohn Choir in 1915 is receiving the attention of a number of representative citizens, who are carefully considering the financial side of this rather huge and most important proposition. An illustration of the cordial reception which would be given the chorus by the most critical and important of some of the most famous organizations of Britain and Germany. Among these is a proposition of the Royal Philharmonic Society of London, England, whose concert are, doubtless, as brilliant as any given in the world, and whose audiences consist mostly of the leading professional folk of London. Co-operation with the Royal Philharmonic Society would ensure the most brilliant setting to be obtained in England. The society two years ago celebrated its centenary, and the event is being commemorated in the most significant in the annals of English music. The hon. secretary, Mr. Stanley Hawley, in a letter to the conductor of the Mendelssohn Choir, expressed the desire of the officials of the Royal Philharmonic Society to co-operate with the Toronto choir in Beethoven's Choral Symphony, a monumental work, which affords a supreme test for both chorus and orchestra, and which Beethoven was specially commissioned to compose for the Royal Philharmonic Society.

Toronto committee in charge of the details of the proposed tour, soon to be able to report to the prospect of the tour being carried out. Should the tour be included in the tour, it is possible that plans would be completed for co-operation with the famous Berlin Philharmonic Orchestra, in all the proposed German concerts (Leipzig, Dresden, Hamburg, Berlin and Frankfurt).

**Symphony Orchestra.**  
According to the box office reports last night from Massey Hall, the concert of the Toronto Symphony Orchestra tonight will be a record performance. Frank S. Weisman and his instrumentalists have been working for some time on the very difficult program that is giving, and every indication points to it that he will record another important step in the history of symphonic music.

**THE FLONZALEY QUARTET.**  
Sheila's Theatre next week, featuring Clark & Bergman, two well-known vaudeville players of more than usual ability.

The book is by William Le Baron, the author of "The Antique Girl," etc., and the music by Leo Edwards, the well-known song writer, and the lyrics by Blanche Morrill. There are seven pleasing musical numbers. During the progress of the plot, the beautiful costumes are shown, the wedding finale being one of the prettiest dressed numbers ever mounted on the vaudeville stage. Among the musical numbers are "Humpty Dumpty," "I've Had a Lovely Time," "I Can't Be True," "Wedding Bells," etc. The scene of the musical comedy is the sun parlor on the roof of a private sanitarium in New York city, and most elaborately and novelly designed.

Included in next week's bill are the Murray Sisters, Swan, Dale & Hal, Hamilton, Doan and Hanson, and the Kinetograph.

**The Famous Flonzaley Quartet.**

## EFFICIENT HOUSEKEEPING BY HENRIETTA D. GRAJEL DOMESTIC SCIENCE LECTURER

### January Breakfasts

**H**EARTIER foods are needed this month than in any of the other twelve, for the body must keep its forces well supplied with warm blood, secured through proper nourishment.

Waffles are good at any time, but for a winter morning breakfast they seem better than ever. This is because they are rich in protoid, a well-made waffle batter containing from four to six eggs in each quart. Besides this waffles are spread with butter and eaten with maple or other syrup, and this makes an almost complete food.

The waffle iron should fit snugly over the hole in the range top and be very hot, but not smoking, when you start to bake. Have a mixture of butter and lard melted together with which to grease the iron. Butter cannot be used alone for this as it burns so easily; salad oil or compound or clear pork dripping is excellent. To apply the grease quickly and thoroughly to every corner there is nothing so good as a pastry brush; these are about two inches wide and are set in rubber so none of the hairs can pull out.

Brush both insides of the waffle iron and pour about four tablespoons of batter in. That is, put one tablespoon of batter into each of the four compartments. Close the iron, count ten slowly, then turn the cakes, count fifteen, when they should be brown and crisp. The fire must be very hot, and there is, necessarily, some smoke as the grease from the iron will creep out the edges as the waffles rise and bake. A good draught of air will carry this out, and as the baking progresses there will be less of it.

Marie Brown has officiated at some delightful waffle breakfasts, in capacity of first cook, and I am pleased to have her recipe to pass to you. Separate four eggs and whip up the whites and set these aside. Beat the yolks to a foam and add a pint of milk, two tablespoons of melted butter, one tablespoon sugar, one teaspoon of salt and three cups of flour sifted. When this is a smooth batter fold in the stiff whites of the eggs and put the whole mixture into a pitcher, as it can be poured onto the waffle griddle more conveniently from this than from a spoon. Planet cakes are made exactly as waffles are, except that sour milk and a teaspoon of soda is used in place of sweet milk. These cakes are baked on a flat stone griddle or in an omelet pan.

### PALACES FOR THE PANAMA EXHIBITION

**Fifty Millions Being Spent on Buildings, Decorations and Settings.**

It is estimated that the preparations for the Panama-Pacific Exposition, to be held in San Francisco in 1915, and the decoration of the grounds, the buildings and the settings of the exposition, will cost \$50,000,000, and the exhibits to come are valued at \$50,000,000 more.

The exposition will include 235 acres in what is known as the Harbor View district of San Francisco. These grounds, according to John Barrett's Pan-American Bulletin of recent issue, include the grounds of the United States Military Reservation, the Presidio, the Sun and Fort Mason on the other, and extend two miles along the water. They are a half-mile wide.

There will be three groups of "palaces" at Harbor View, as one looks toward the exposition grounds, the central group will include fourteen palaces, the left-hand group will include six palaces, and the right-hand group will include the buildings of the Sun and Fort Mason on the other, and extend two miles along the water. They are a half-mile wide.

The main group of exhibit palaces, facing upon the harbor for 4000 feet, will present the effect of a single palace; eight of the buildings will be joined in a rectangle, to form almost a huge oriental bazaar. Four of the eight palaces will face on San Francisco Bay, and the other four will face the hills.

Around the rectangle, eight exhibition palaces will run an outside wall five feet in height, broken only by a number of art galleries, which will give access to the three main palaces and their approaches. The groups will be divided into north to south, in the center of the Court of Four Seasons, on the left by Festival Court, and on the right by the Court of Four Seasons. Two south courts will be the great riches in the walled city. A huge court in Italian Renaissance will lie between the rectangle and the Palace of Fine Arts.

Most imposing and largest of all the feet in width, from east to west, and 900 feet long. At the south end of the court will be the administrative building, rising 400 feet in height, and dominating the architecture of the exposition. From the Court of Honor there will be a commemorative arch, greater in size than the Arc de Triomphe in Paris, to the Court of Four Seasons. The arch will be surrounded by a group of four palaces, mounted by a group of four palaces, which will be the effect of a single palace.

**QUEBEC COMMISSION ON WATERWAYS HAS REPORTED**  
Stated That Harnessing of St. Maurice River is Recommended—Half Million H.P.

QUEBEC, Jan. 7.—(Can. Press).—The provincial waterways commission, of which the Hon. S. N. Parent is president, has completed its report, which is now before the government.

While no particulars have been given out as to the recommendations the report embodies, it is understood that the commission, supported by expert engineers, favors the harnessing of the St. Maurice River in the vicinity of La Tuque by the building of a dam, which will make possible the development of 500,000 horse-power for industrial purposes.

**AN EVENING FOR MEN.**  
A humorous lecture, entitled "Humorous Growlers," will be given by Mr. William Douglas of the Central Y.M.C.A., 40 College street, tonight at 8 o'clock. No charge for admission. All men welcome.

**C.P.R.'S PIONEER ENGINEER QUILTS**  
WINNIPEG, Jan. 7.—(Can. Press).—James Dobson of this city, aged 68, the oldest engineer in the employ of the C.P.R., has resigned, having served continuously with the company since 1881.

## THE NURSERY CONDUCTED BY Elvira Murray

### The Erect Position

There is no beauty or grace of the body that an erect posture cannot heighten, nor is there single bodily attraction that will not be marred or obscured by an ugly stoop. Yet thousands of boys and girls, especially those of rapid growth, are every year acquiring the disgusting and pernicious habit of round shoulders. In the crumpling of the lungs and stomach that this position induces they carry a perpetual menace to health.

Nobody, it is true, wants to be round shouldered, unless he is some gawky youth who needs only to be told that his self-consciousness will disappear if he will but look at the other people in the crowd. But, while it is as easy as it ought to be unnecessary to preach against the habit, the difficulty is to show how the evil may be overcome. Usually, when anything is wrong, the first step toward righting it is to discover and remove the cause. But, in the case of stooping shoulders, while the cause is probably to be found in our clothing, which hampers the body when it does not actually cramp it, and continually burdens it with an unnatural and badly-distributed weight, we can neither escape from the cause in general, nor from the particular form of it in the garb which our imperfect civilization prescribes.

Many, indeed, have been the methods suggested to overcome this habit. In the minds of some the secret is to keep the chin drawn in. This attitude, as anyone will see by trying it, produces a slight raising and rounding of the chest. Others would hold the shoulders squared back and the chest protruded. Either of these rules, if carried out, is likely to result in an ugly or strained posture. In some cases the effort to stand erect merely develops an awkward bend at the waist, actually pulling the body backward. A mechanical device for securing an erect posture is to carry a weight on the head. This is an excellent method, but not applicable everywhere, and really unnecessary when one has learned the art without it.

**The Right Way to Stand.**  
The truth is, standing erect is not a matter of the shoulders alone, nor even of the trunk, but of the whole body, from the feet upward. An erect posture does not mean that a person standing back to a wall shall touch it all the way up and down. The lines of the body are curves. Some backs protrude a straight line more closely than others, but a really straight back would be a deformity. The set of the neck also varies. To acquire an erect carriage it is not necessary to assume a military stiffness, as if one had swallowed a ramrod.

### A DAILY STORY FOR CHILDREN

#### The Happy Gnome

(By Virginia Vale.)  
Once upon a time there was a gnome. Now you know gnomes are always happy, but this one was so very happy that his friends called him "The Happy Gnome." He was always laughing and singing and never complained of anything he was asked to do, and because he was so cheerful he was often called upon to do more than his share of work.

The next time he was asked to do something, he said to himself, "Why am I always working? The others have time to play and I never seem to have time to myself. I guess the next time I am asked to do something I won't laugh and say 'Yes, I will do it,' but will get cross like some of the others and say 'No, I won't!'"

Now one day he was asked to do something, he said to himself, "Why am I always working? The others have time to play and I never seem to have time to myself. I guess the next time I am asked to do something I won't laugh and say 'Yes, I will do it,' but will get cross like some of the others and say 'No, I won't!'"

### THE WOES OF MRS. NEWLYWED

After he had said it he was sorry and wished he hadn't, but it was too late. They looked at him a minute and they began to wonder if they were not to blame for his being cross, and more they thought the sorer they got.

At last one of them said, "I guess we have been naughty to ask you to help us so often and we are all sorry." The Happy Gnome looked quite happy and said, "I will do anything you ask."

They were all careful to help themselves after that.

### ATTEMPT TO EDUCATE FACTORY EMPLOYEES

**Campaign Being Organized to Aid in Prevention of Industrial Disease.**  
A corps of medical inspectors is now being organized by Dr. Hastings, to carry out a campaign among the people of the city, to educate the factories in the city. The inspectors are making so great headway on the continent that preventive measures may no longer be delayed.

Some factories are irritable to diseases that are communicable. Employees in those factories will be persuaded to make a change if they have a communicable disease, and they will also be instructed in methods of preventing their disease being communicated to others.

All employees having industrial diseases will be told how to lessen or get rid of their illness. Since 1911 the public department of health has gained such control of communicable diseases that there is no longer necessity for getting a site for a larger isolation hospital. With an extra building for cases of measles the present isolation hospital will meet the requirements of the city.

## Use Cheaper Power

Some Hydro users are getting as much out of \$1.00 worth of Hydro power as they used to get out of \$1.50 spent otherwise. Rarely does it happen that we cannot show some cash saving. Always, Hydro adds convenience, safety, reliability to manufacturing operations. We analyze your power situation and report, free of charge. Ask us.

## "HEART SONGS" COUPON PRESENTED BY THE TORONTO WORLD

**HOW TO GET IT ALMOST FREE**  
Clip out and present six coupons like the above, bearing consecutive dates, together with our special price of either 68c or 98c for whichever style of binding you prefer. Both books are on display at

40 Richmond Street West, Toronto, and 15 Main Street East, Hamilton.

**6 COUPONS AND 98c Secure the \$2.50 Volume**  
Beautifully bound in rich Morocco—cover stamped in gold, artistic ink design, with 16 full-page portraits of the world's most famous singers, and complete dictionary of musical terms.

**6 COUPONS AND 68c Secure the \$1.50 Volume**  
Well bound in plain green English Cloth, but without the portrait gallery of famous singers.

**OUT-OF-TOWN READERS Will Add 24c EXTRA FOR POSTAGE**  
"HEART SONGS" The song book with 1,001 of the best songs—arrangements of the world in one volume of 500 pages. Chosen by 25,000 music lovers. Four years to complete the book. Every song a gem of melody.

## The Wise Goose Says

**THE WISE GOOSE SAYS**  
CONDUCTED BY RACHEL R. TODD, M.D.

### The Brown-Tailed Moth

Yesterday morning's World was full of news, sent out by the department of agriculture at Ottawa, help, and immediate action against the deadly brown-tailed moth, a pest of the maritime provinces have already been invaded, the invading host having advanced from the Eastern States.

The war of destruction and extermination is now being fought with all the energy and vigilance that can be thrown into the fight. The danger is a tremendous one. The result of failure to keep back the host will be little short of fatal.

The plants and trees threatened are all those known as deciduous plants, that is, those that lose their leaves in winter. As one can readily see, there is a vast territory, including the depositions of this threatening enemy.

The nature of the injury to the trees is: Beginning in the very early spring, almost before the first buds appear from the protective leaf-shields, even while these are yet in the "swelling stage," the green caterpillars are at work. The young caterpillars are literally devoured.

These caterpillars are light brown, often tawny, and when full grown, are an inch and a quarter long. Running down the length of either side is a decoration of white dashes. At the lower end of the back are two angularly bright red spots. These starting angry spots are appallingly distinctive.

The life history of the caterpillar: In the middle of June the caterpillars are full grown. Transformation takes place, and the adult moths come out in the second week of July. These moths are the very best of the female, but the male moth has a tuft of brown hairs at the end of his body, from which comes the name brown-tailed moth.

Eggs are laid on the under side of the leaves, each egg-mass being covered with brown hairs from the tuft on the body of the moth. In August, the first week, comes the hatching of the eggs, and the young caterpillars have a few days feasting. They then spin up a thick, compact, tough nest, at the extreme tips of tiny twigs, and here if you please they live cozy and warm, but increasingly hungry, thru the winter. The earliest sign of spring and they are out to see the world. Hunt these nests.

The morning papers get the news and The World gets it first.

## THE WOE OF MRS. NEWLYWED

After he had said it he was sorry and wished he hadn't, but it was too late. They looked at him a minute and they began to wonder if they were not to blame for his being cross, and more they thought the sorer they got.

At last one of them said, "I guess we have been naughty to ask you to help us so often and we are all sorry." The Happy Gnome looked quite happy and said, "I will do anything you ask."

They were all careful to help themselves after that.

## GOOPS

By GELETT BURGESS

"Do you know of any way to clean decanters?" asked Mrs. Newlywed. "Neighbor thought a minute, then: 'Why yes, I do. Take small pieces of blotting paper, roll them up and put them in the decanter. Nearly fill it up with water and shake well. Empty and refill with cold water and you will find that when dried it will be nice and clean.'"

**AN ITALIAN SINGER**  
And Her Last Song.  
There are popular songs from operas endeared to the hearts of the people associated with famous singers. The name of "Norma" will always be associated with Giulia Griet, the Italian prima donna, born in 1810. When only sixteen she appeared in opera at Bologna, and won the hearts of the audience by her sweetness and wonderful compass of voice. It was her heartfelt rendition of "Norma" that has left its impress on musical history. She sang in the States during the years preceding the Civil War, and even divided honors with Jenny Lind as the most popular singer of her time. She died in 1865, and it is said the last song she sang was the famous selection from "Norma" upon which her reputation was made.

Several of Griet's favorites are included in "Heart Songs"—the musical library of songs, now being placed with its readers by this paper. The coupon, elsewhere in today's paper, explains the terms.

**WARD SIX LIBERALS.**  
The Ward Six Liberals will meet tonight at the club rooms, 234 Gladstone avenue, when business of importance will be discussed.

Latest Bead Handbags Show Oriental Touch

By Madge Marvel

THE bead bag of our grand-mother's days appears in a different form this season. It is more than a bit of clever handwork. It is an actual work of art. The size is quite generous, eight inches in width by ten in length about the average. This is the glitter of gold beads in most of them and the Oriental influence is apparent in the patterns, which are most intricate and wonderful in coloring. One particularly lovely example has narrow bands of Persian design in dull pinks and blues on a dark green background used in the center of a bag made entirely of golden beads. The work is all solid. The former fancy for flower designs seems lost sight of and the tapestry effect is most favored. The mounting is usually in gold or silver gilt. One exquisite bag was in jet and crystal beads and mounted in gun metal.

The handbags of moire silk, black, white or a soft gray, in the new oblong shape and mounted in gilt or silver, are the most fashionable. The fancy of having the watch inserted near the top is varied by the golden monogram or initials. The latest news comes from the east authorities that the all-black gown is returning to favor for evening wear, which will be a boon to the woman who has to wear the same gown to many affairs. Jet is also in high favor, and on some of the most exclusive white gowns I have noticed dainty touches of jet that have been most effective. Regarding the black gown, there is a special liking for chiffon velvet, or the wonderful broadcated chiffons which have

SLENDER FIGURE IS TO BE ENVIED

Helen Freeman in 'The Man Inside'

Approved Exercises for Reducing

BY MAGGIE TEYTE

Prima Donna of the Chicago-Philadelphia Opera Company.

HOW can I reduce? If the fat woman wants to reduce she can do so. But she will have to work. The road to a slender figure is not strewn with roses. First breathe, for the more oxygen you take into your lungs the faster the surplusage of unnecessary adipose tissue will be burned up.

MAGGIE TEYTE

Personal. I'd as soon be too stout as too thin. However, there is the happy medium of flesh and we will want to attain it as the ideal.

It makes me want to shake a woman to hear her say, "Well, my mother was fat and so I'll have to be fat" or this, or whatever her complaint is. If all the world took that view of life, where would progress be?

You can be whatever you desire, if the

desire is backed with intelligent endeavor. If the fat woman wants to reduce she can do so. But she will have to work. The road to a slender figure is not strewn with roses. First breathe, for the more oxygen you take into your lungs the faster the surplusage of unnecessary adipose tissue will be burned up. Then exercise. The bending exercise I have previously described will reduce the abdomen and waist and hips. Do it persistently. If you are earnest in your wish to reduce you will have to work regularly and persistently. Perhaps you won't be able to touch the floor at first. Keep at it. Then continue till you can put the palms on the floor back of the heels, if you are strong enough. This is too severe for most persons, and is only recommended to young and naturally supple women. An excellent exercise is to be taken as soon as one arises in the morning. Lie flat on the back, hold the feet under the footfall of the bed, and level with it, and rise to a sitting posture by the

waist muscles. Begin by doing this twice and gradually increase the number of times. Sit on the floor, take hold of the feet firmly and rock back and forth. Lie flat on the floor, with arms at the side and raise first one leg and then the other, and finally both together. Lie on the floor with both legs held straight up, all muscles tense, and sway first one leg and then the other to the side, in a rocking motion. Then try the same with both legs. Lie on the floor, face down and slowly raise the body on the hands and toes, and while in this position rock from side to side. Stand on one foot and swinging the other leg and arm to the side is valuable as a reducing agent. These exercises the limbs should be kept tense, and the exercises taken as rapidly as possible. Walking is an absolute necessity. Rapid walking and hill climbing if the heart is strong. And walking before breakfast. Swimming is splendid. Tennis is admirable, and dancing delightful help. Rolling is also efficacious. But be sure to do all exercise with a

Peter's Adventures in Matrimony

BY LEONA DALRYMPLE

Author of the new novel, "Diane of the Green Van," awarded a \$10,000 prize by the Tardell and S. McClure as judges. Copyright, 1914, by Newspaper Feature Service

The truth, plain and unvarnished, about "the girl in the case" distinguishes this new series by Miss Dalrymple. Her character studies will not appear unfamiliar to the majority of readers, who will follow the fortunes of "Peter" with growing interest. Following the engagement "Peter" begins to be disillusioned; the flurry of a fashionable wedding is distasteful to him, and he rebels mildly against the exactions of his bride.

A Word with Father-in-law. I glanced at my watch. In a very little while now, thank heaven, Mary and I would be away from the fuss and frivol of our fashionable wedding and safely started on our honeymoon. Downstairs bridesmaids and ushers were planning various forms of devilment. Mary was dressing. It had taken me but a very few minutes to get into other clothes, and I was fully dressed when Mary's father rapped lightly on the door. "Hello, Peter!" he said, pleasantly. "Dressed already? Come, smoke for a minute. Your best man's juggling suit cases."

One Busy Season. "I wonder why she has never married. She has been engaged several times." She ought to take a lesson from the basket, field and bunch her engagements. Never Heard It. She-if you loved a girl and proposed to her, would you take "No" for an answer? He-I really don't know. It was never offered to me. Was a Real Man. "And why," demanded the judge sternly, "do you whip your wife?" "Judge!" replied the prisoner, "you don't think I am such a mollycoddlie as to let her whip me, do you?" Imaginary Profits. "Dauber a realistic or imaginary artist?" "Imaginary, I believe. At least his earnings are largely so."

How to Solve the Heating Problem

By Hollis W. Field.

WINTER is on; also your winter "unders," to say nothing at all about the drafts to the heater. Which last are the very things of which we mean to write. Do you know how to warm a house in cold weather? It doesn't matter whether you have a wood heater, pot-bellied soft coal stove, hard coal base burner, hard coal furnace, or depend upon the radiator in an apartment house, this question applies to you: Do you know how to warm the house when everything needed is right at hand, ready and waiting?

To begin with, you depend upon the atmosphere of the room to hold the heat. Dry air as a holder of heat is more wasteful than a milk pail with a nail hole in the bottom. And on a sharp, wintry day it is impossible to bring the room to a temperature of 70, depending upon natural conditions, without waste of fuel and the drying out of the air beyond toleration of the lungs and air passages of the human body.

Place an open vessel of water somewhere in position to start evaporation. Let the water boil if it will; it won't harm the furniture half as much as a lack of it will. But you have steam heat, you say. Then, unless there be a valve leaking steam into the room you have next to the driest heat known to modern house conditions. That always driest heat is not water heat, that is it is impossible for any moisture to escape from radiators or pipes. Put a vessel of water on the radiator.

But you say, the radiator is cold. Well, if there be any steam at all on make the steam radiator colder. Flare open the window nearest it if it can be, turn an electric fan upon it if you can. Condense the steam already in the radiator and more and warmer steam will crowd up and you and the janitor may be spared a row.

You have a hard coal base burner? But have you a damper in the stove?

Still Playing His Game

By Tom Jackson

DESPITE the awful conditions, still Cupid plays his game, and though chuck steak's worth fifty cents, young folks wed just the same. When man and maiden fall in love, if that love be true, the knot is tied with no thought of the cost of kidney stew. There isn't any noble man who waits about on legs, who would postpone his wedding day because of rise in eggs; or sadden some sweet girl's hopes by saying to her, "Dear, unless the price of beans comes down we cannot wed this year."

Ah! Love is made of stronger stuff. It is like iron-wrought. It doesn't read the papers for the daily food report. Love boldly says, "Here is the ring;

two can live as cheap as one." But later on, the chances are, they'll find it can't be done. For she will need hats, gloves and things, and he'll still smoke cigars. About this time he cuts out cats, and rides in trolley cars. However, when two fond hearts love the way that fond hearts should, some beef, if they're no porthouse, will still taste pretty good. When man and maiden fall in love, all life to them looks sweet. This is the time they dream of bliss, and not of things to eat. So cupid still is going round, and making fond hearts glad, because they're brave enough to take a chance like moon and dad.

Secrets of Health and Happiness

Prespiration Glands Are Nature's Safety Valves

By Dr. Leonard Keene Hirschberg

A. B., M. A., M. D. (Johns Hopkins)

(Copyright, 1913, by L. K. Hirschberg.)

YOU are like a modern, municipal high-power pressure system. Many cities are now equipped with a pipe-line which carries water under pressure. When a fire occurs, the fire-ladders merely attach the hose and turn on a faucet. The pressure shoots the water over the blaze. Your skin is the body's system of faucets or spigots. A myriad of them are there present ready to be turned on or off at the alarm.

The water supply to these dermal nozzles is called perspiration, or in Shakespearean and Biblical words, "sweat." "By the sweat of the brow shall ye toil" shows that nature turns in the alarm whenever you work hard.

The perspiration is made up of more than mere water. In it are particles of oil—which give it odor—fats, salts, sugars and proteins. Indeed under certain conditions it may contain many other things, even colors.

Sweat differs during different emotional different ailments, and even under different temporary states of digestion and physiological balance. Russians, Chinese, Tartars, Indians and others each have sweat fluids which are unlike the others.

"In the sweat of thy face shalt thou eat bread till thou return unto the ground" is a divinely inspired truth that no physiologist dare gainsay. It is as sure as death that when perspiration ceases, when your dermal texture can no longer ooze with sweat, that you can no longer work and be vigorous.

The capacity to perspire is one of nature's boon endowments. Warning health, soon followed by annihilation, is the price of a completely sweatless skin.

One of the most serious complications of a number of maladies, one, for example, which precedes death in Bright's disease of the kidneys, is a sudden blocking up of the spigots and nozzles of the perspiration system. The doctors command, the nurse rubs, the orderlies grow busy boiling, heating, steaming, and otherwise working upon the skin of the sufferer in order to make his skin sweat. If they succeed in inducing perspiration, a fatality is averted for the nonce. If not, the victim must prepare for the worst. Similarly when a physical blow such as pneumonia, bronchitis, sinusitis or

Chips With the Bark on

Never wrong, seldom right. The smaller the bullet the further it travels. Conceit looks on a boast as an admission. The man who yells is the only one who is convinced thereby. The result is the same whether the head is cut from the body or the body is severed from the head. A success seems higher when it has a failure for a foundation. The train that is making the best speed does the most damage when it strikes an obstruction. The fence that keeps intruders out will also keep residents in. Luck and Fluck are boon companions. When a man loses his temper it is easy for his neighbors and relatives to find it out. The man who is always right is seldom left. It is often harder to be generous in thought than in deed. Some words are worn so threadbare that they do the most damage when they strike an obstruction.

Daddy's Good Night Story

By GEORGE HENRY SMITH

ONE night when Billy Bunny and Jack Rabbit were comfortably tucked in bed, Billy said to Jack: "I wonder why it is we have such big ears?" "I don't know," said Jack, "but suppose I make up a story about why we have long ears and tell it to you?" "Will it be a true story?" asked Billy. "No," replied Jack. "If it were a true story you would not like it. Stories that are made up are always better than stories that are true."

Then Jack began: A long time ago before the Man in the Moon was born and when the Sun used to shine all day long and all night long, there lived in the Blue Forest in the Never-Never Land two animals by the name of Mr. and Mrs. Bit.

They were the most curious animals that ever lived in the world. They went around everywhere listening to holes in the ground, holes in trees and they even tried to find out the meaning of the song of the brook. One day they came to the palace of King Very Cold who ruled over the Blue Forest in the Never-Never Land.

They heard a great noise and first Mr. Bit and then Mrs. Bit put an ear to the keyhole trying to hear what was going on inside. After a while the door opened and out came King Very Cold with his Queen. They opened the door so quickly that it knocked Mr. and Mrs. Bit over. "Ha! ha!" exclaimed King Very Cold, "you have been listening at the door of my palace. Do you not know that listeners never hear anything good about themselves?"

"Henceforth and forever more your ears shall be almost as long as your body." "Oh, spare us, spare us!" said Mr. Bit. "What is your name?" asked the King. "I am Mr. Bit and this is my good wife, Mrs. Bit," answered Mr. Bit. "Then," exclaimed the King, "I will change your name to Rabbit." Jack looked at Billy and he was fast asleep.

The Toronto World

FOUNDED 1850. A morning newspaper published every day in the year by The World Newspaper Company of Toronto, Limited...

WORLD BUILDING, TORONTO. NO. 40 WEST RICHMOND STREET. Telephone Calls: 1-1000. Private Exchange connecting all departments.

THURSDAY MORNING, JAN. 8, 1914.

TORONTO AND ITS FUTURE.

Several factors are contributing at the present juncture to a thorough reorganization in civic methods and civic government. The people, at the recent election, were stirred as they rarely have been.

Now, however, it is plain that the government has intimated what the decision is to be, and that it has not leaked out through any indiscretion on the part of Chairman Drayton and his associates.

The country will now be ready for parliamentary action because in no other way will equalization of freight rates between eastern and western Canada be brought about.

Anti-Wilson papers, like The New York Sun, and rock-ribbed Republican newspapers, like The New York Tribune, join their voices to the general chorus of praise, and agree with The New York World that the law will establish:

1. A true and elastic national currency, based, not upon government fiat or government debt, but upon the commercial resources of 100,000,000 people.

2. The complete separation of the organized banking system of the country from the New York Stock Exchange and Wall Street gambling.

3. The destruction of the centralized control of money and credit—the so-called Money Trust.

character of The Telegram's policy. If the lesson is carried home to every citizen we shall not regret the experience, wretched as it is.

The business men of the city have a duty before them in making sure that only facts and sound sense be permitted to weigh with them in dealing with the problems that must come before them in the next few months.

When we thought our good neighbor, The Mail, was unique in publishing the judgment of the court while the case is in deliberation, we suggested that some member of the commission must have been talking in his sleep.

Now, however, it is plain that the government has intimated what the decision is to be, and that it has not leaked out through any indiscretion on the part of Chairman Drayton and his associates.

The country will now be ready for parliamentary action because in no other way will equalization of freight rates between eastern and western Canada be brought about.

Anti-Wilson papers, like The New York Sun, and rock-ribbed Republican newspapers, like The New York Tribune, join their voices to the general chorus of praise, and agree with The New York World that the law will establish:

1. A true and elastic national currency, based, not upon government fiat or government debt, but upon the commercial resources of 100,000,000 people.

2. The complete separation of the organized banking system of the country from the New York Stock Exchange and Wall Street gambling.

3. The destruction of the centralized control of money and credit—the so-called Money Trust.

White, Sir Edmund Osler and Sir Wilfrid Laurier, who rashly assumed that anything new must be impracticable, it is amusing now to recall that vision was derided in Canada as visionary, and within six months was presented as the last word on the subject to the congress of the United States.

And Mr. J. B. Forgan of Nova Scotia and Chicago, brought by the government to Ottawa, was unable to see how, through any legislation, the currency of Canada could be made more elastic, or how more money could be made available for the needs of legitimate business by lending the national credit thru the banks to the people.

Joseph E. Thatcher, an architect, declared that Inspector Snook and ex-inspector Salisbury had both done work outside the department for about a third the price asked by himself.

Several other witnesses called during the day claimed to have no knowledge of instances where gratuities were offered members of the department, although they had heard of the practice.

Editor Word: There seems to be a tendency in some quarters to cover up or cloud the real question in the matter of police interference at the polls on New Year's Day, by making it appear that the women complained because they were ordered out of buildings or grounds. It is true that there were two such instances.

Emil Brooker, proprietor of Wolff's Park at Sunnyside, scored a victory yesterday when he won a court case against him by Magistrate Cohen for selling ice cream on Sunday.

Joseph Chamberlain, the venerable British statesman, has announced that he will retire from parliament at the next general election, after serving as a member of the house of commons since 1876, during all of which time he has represented Birmingham.

Canada Permanent Mortgage Corporation. Toronto Street - Toronto. ESTABLISHED 1855. President—W. G. Gooderham. First Vice-President—W. D. Matlock.

PAINTERS AND DECORATORS ELECT NEW OFFICERS

Stanley Hughes Was Voted Secretary for the Fourteenth Successive Year.

The annual meeting and election of officers of the Master House-Painters and Decorators' Association was held yesterday afternoon in the Temple Building.

The election of officers for the ensuing year was as follows:

President, W. M. Weeks; first vice-president, S. Taylor; second vice-president, J. R. Robinson; secretary-treasurer, E. M. Hughes; auditor, F. H. McCausland; executive committee, J. E. Phillips, W. Cheesbrough, R. Wood, J. Fox, J. Stewart, J. Young, T. Aldrich, E. W. Brennan and C. Mandon.

CHAS. McDONALD RESCUED LADS AND HAD NARROW ESCAPE HIMSELF WHILE SKATING.

Charles McDonald, a member of the Eltonville crew, seemed the congratulations and cheers of a huge crowd of skaters on the Don River, near the Queen street bridge, yesterday morning, when, at the risk of his own life, he pulled three youngsters out of the river.

ALLEGED BURGLARS HELD.

Thought to have been implicated in the robbery of the residence of the Hamilton 208 Bathurst street, on Dec. 30, Charles E. Elliott and Joseph Morison were arrested last evening at their rooms in the Belmont lodging house, on York street.

WOMAN SENATOR TELLS OF LAWS

Mrs. Helen Ring Robinson of Colorado Gave Address in Toronto.

HOMES ARE PROTECTED

Women and Children Benefited by Legislation Passed by Women.

(Continued From Page 1.)

Also that 50,000 women in New York who were supporting dissolute or incapacitated husbands. "The only difference between those women and myself," said the speaker, "is that while they have to leave their homes for the greater number of days in the year, I have only to leave my home for three or four months every year. Her duties cannot keep women out of shops and factories, why then should they keep them from the halls of legislation, in which they will make laws that will sweep the brothel out of existence forever? The women of Colorado have brought the business of the air of the home. There of the 25 men who serve their country by making the laws, four are farmers, three represent labor, one is a grocer, and one is a grocer, and considering the high cost of living, the housewives were glad they had one woman on hand to watch him."

A ripple went thru the audience when the speaker said that judging the senate of the period every year. Her turbulent closing, she had been forced to the conclusion that the American man is much too hysterical, because she with politics. The grocer above mentioned was wrathy because a certain measure he advocated had not passed, and she might have informed him that she was one of the reasons for its failure.

Nearer Home.

Coming nearer home, the speaker assured her audience that if a woman of Ontario is ever elected to parliament, to one will be disturbed, because she will not get there unless the men and women of the province place her in that position.

Touching on the particular province of women, Mrs. Robinson said: "The home is our distinctive contribution to the world, according to a school girl's composition, is 'the being whom a woman marries. Man sprung from monkeys, so did woman, but she has a father.' So man still will have been a dweller in the crutches of trees if woman had not taught him to leave that dwelling."

Women are strong on the vote because they feel the hands of countless generations of women and children falling at their feet, calling upon them to protect their homes from disease and death brought about by society's condemnation of the double standard of morality. Eighty per cent. of those in asylums for the insane are there because they had fed their appetites through the teachings of the double standard.

Referring to the duties of women in the legislature, the speaker said they had a passion to be called fathers of the race, because they knew, as none other could know, how much it cost to rear a child.

The first law passed after the women had the vote was that making mothers co-guardians with the fathers of their children. They passed the law in Colorado the child must remain at school until he is sixteen years of age. Colorado has the longest law of protection of women to be found anywhere. But in bringing these things about because they have the vote, the women do not work alone. "We have the men with us, God bless them," was the tribute paid the sterner part of humanity.

Senator Robinson closed her address by a glowing eulogy of the women of her country, who had worked hand-in-hand with their husbands in the pioneer days, and who in the new avenues opening up all around today desired to have a hand in the shaping of fresh and greater laws for the future.

Many questions were asked at the close of the lecture, all of which the senator had ready and satisfactory replies.

WORKLESS MAN TRIED TO SHOOT CIVIC CLERK

Vancouver's City Hall Scene of Sensation—Quickness Saved Life.

VANCOUVER, Jan. 7.—(Can. Press.)—Pulling a gun and firing a shot at S. J. Montgomery, clerk of the civic board of works, one of the army of Vancouver's unemployed created a sensation at the city hall today.

The man, Martin S-lit, was one of the scores who applied for work on Tuesday afternoon and had to be recommended for not keeping in line with the others. Suddenly he appeared this morning and pulled a gun on Montgomery. The latter grappled with him and handed him over to the police.

FAILED IN EFFORT TO UNSEAT CORK'S MAYOR

Opponents Asserted O'Shea is Alien and Naturalized American Citizen.

CORK, Ireland, Jan. 7.—(Can. Press.)—An attempt was made by some pro-Unionists to dislodge the mayor of Cork, Henry O'Shea, from sitting as councillor for the city of Cork, by an alien and a naturalized American citizen. The prosecuting counsel promised to produce evidence that the lord mayor had claimed to be an American citizen. For the defence a voucher was produced from the British consul at New York that no such name as Henry O'Shea appeared to be registered as an alien citizen. The magistrates, after half an hour's deliberation, announced that the case was dismissed. Leave was given to appeal to a higher court.

ALLEGED BURGLARS HELD.

Thought to have been implicated in the robbery of the residence of the Hamilton 208 Bathurst street, on Dec. 30, Charles E. Elliott and Joseph Morison were arrested last evening at their rooms in the Belmont lodging house, on York street.

Curling On Soft Ice At St. Thomas

Rotting Second Day At Dufferin

TORONTO SHOW DAZZLING SPEED HAND ON TORONTO GOOD BEATING

Big Crowd Shown Fast Hockey by Local Pro Rivals

The hockey fans were treated to some real hockey last night at the arena when the Ontario and Toronto hooked up for the first time.

There was something doing every minute and the grand passing and fast skating by the Toronto was a new sight to the Ontario forwards.

Despite the strenuous going only one injury was the Ontario's George McNamara lost some teeth when he met Marshall in full flight.

Wilson had relieved McGiffen and netted Toronto's second counter when he followed Walker in and took the puck when Lake stopped the Ontario net.

It was just as fast after the first intermission as the Ontario net was broken down by the Toronto forwards.

Steve Vair got a ten-minute rest when he hit Cameron over the head with his stick. Toronto scored the net.

McGiffen was started again in the last session, but only stayed on the ice a short while. He hooked a man and was banished.

The Foyston-Walker combination scored another, the former scoring from the corner of the net.

McGiffen was started again in the last session, but only stayed on the ice a short while. He hooked a man and was banished.

The Foyston-Walker combination scored another, the former scoring from the corner of the net.

GERMAN INVENTOR HAS SCHEME TO COOL MINES

A German inventor has devised a process which is said successfully to cope with the matter of temperature in mines. The cost of operating some mines is very high by reason of the fact that the miners are enabled to work only on very short shifts.

The new method is to compress air at the surface of the ground and then put it thru a drying process. The compressed air then goes into an expansion apparatus or air turbine, where it expands and furnishes work for this machine.

The air also becomes cold by the effect of the expansion on the well-known principle, and it is the n taken by means of a protected piping into the mine and delivered at the proper point so as to secure a good ventilation and a cooling of the air within the mine.

This way the inventor claims that the mine can be cooled, whereas previous efforts have failed.

SPLIT HEATS AT DUFFERIN PARK

Little Alfred Wins the Pace and Dan G. the Trot—Summary and Card.

The second day of the Dufferin Driving Club's races brought out a good crowd, good track and lots of exciting finishes. The first race of the day was the unfinished 2 1/4 pace, in which Monotell and Little Alfred each had one heat, but today Little Alfred was best, and he had to be, as Susele M. made him stop in the 2 1/4 to be his heat in the last heat he had an easier time, also Monotell finished him hard home. The unknown battle all the way until the stretch where Pat Logan caught them and beat them home by half a length.

In the 2 1/4 trot Kings Bryson, the favorite, had things all his own way the first heat, but in the second heat, although he had a three-length lead all down the back stretch, Spencer made a good finish with Vaster, and only failed to get up at the wire. Today the unfinished 2 1/4 trot will be finished, also the 2 1/4 pace, in which the fastest sidewheelers in Canada will score against the American cracks for the world. No doubt this will be a grand race. The 2 1/4 pace with a good field should prove a good race. The summary follows:

2 1/4 Pace—\$400: Little Alfred, b.g., by Red taw (Hayes), 3 to 1, 1 to 1 and 1 to 1.

2 1/4 Trot—\$400: Kings Bryson, b.g., by Kings Bryson, 3 to 1, 1 to 1 and 1 to 1.

2 1/4 Trot—\$400: Kings Bryson, b.g., by Kings Bryson, 3 to 1, 1 to 1 and 1 to 1.

2 1/4 Trot—\$400: Kings Bryson, b.g., by Kings Bryson, 3 to 1, 1 to 1 and 1 to 1.

2 1/4 Trot—\$400: Kings Bryson, b.g., by Kings Bryson, 3 to 1, 1 to 1 and 1 to 1.

MAN'S YEARS OF GROWTH LIMIT IS FOUR DECADES. Heart Increases in Strength, the Lungs in Capacity and Brain in Development. It is claimed by scientists who have made a study of the subject, that a man's organs and the bones that are not subjected to pressure, grow continuously until he is forty years old; that is to say that the heart should grow stronger, the capacity of the lungs increase and the brain should develop steadily until the end of the fourth decade of life. A man ceases to grow tall, however, at the beginning of the third decade, explains The Chicago Tribune, because after that time pressure exerted by the weight of the body while in the erect position compresses the vertebrae of small bones in the spine, the disks of cartilage between them, the pelvis and the thigh bones, and thus the growth of the body is arrested. This pressure overcomes the natural elasticity of the disks and the growth of the bones. A British scientist contends that were a man quadrupled, and therefore freed from the downward pressure produced by his weight upon the spinal column, he would continue to grow in height for ten years longer than he does at present, since it has been found that bones not subjected to compression increase up to the fourth decade.

### MUTTON BIRDS' FLIGHT IN THE SOUTHERN SEAS

Myriads of These Creatures Annually Invade Coastal Islands of New Zealand.

Every year at the approach of spring, the thousand coastal islands of New Zealand, more especially those lying toward the south, become the temporary homes of myriads of mutton birds. Out of the silence of the great Southern ocean they appear in vast armies, says a writer in The Wide World Magazine.

Low-flying over the water, for the most part close in shore, the huge flocks draw dark parallels of shadow across the seascape. The birds fly in separate bands, disciplined and massed into a serried whole—a continuous stream that passes between sea and sky. Each army shows a front of perhaps a quarter of a mile, the huge length stretching away league after league into interminable distance.

Stations on the brow of some coastal headland and watch the passage of one of these bird armies. It is a wonderful sight. Far below one looks down on a heaving floor of close-packed, undulating black backs, lit by myriad scintillations of white-tipped wings. So close is the floor, so scudded the ranks of the fliers, that the water beneath is hidden as with a carpet.

Hour after hour the passage of the army continues from dawn till dark and far into the night. In the night the noise of countless beating wings that surges up over the cliffs tells that the army is still on the move, till the whirl of wings and cries of the rearward beating up the stragglers grow faint in the distance, and one realizes that at last the mighty host has passed on its way.

**Cunard Steamship Company.**  
Messrs. A. F. Webster and Son, general agents for the Cunard Line, report the following Toronto party booked to sail on the steamship Franconia this week for the Mediterranean: Miss Kilgour, Miss Newman, Mr. R. Wallace, Mrs. Wallace, Mrs. Button, Mr. M. McLaughlin, Mrs. John E. Dixon, Mrs. Dixon, Mr. Charles E. Goad, Mrs. Goad, Mr. R. G. Lipd, Mrs. Lind, Mrs. Gooderham, Mrs. Livingstone, Mr. G. Nicholson, Mrs. Irwin, Mr. E. H. Bickford, Mrs. Bickford, Mr. M. Van Allan, Mrs. Van Allan, Miss Van Allan, Mr. John Sullivan, Miss Flanagan.

### AUSTRALIAN CRICKETERS APPRECIATED MR. BENJAMIN

London Sportsman: The extraordinary statements with reference to the recent Australian cricket tour in America have been incontestably refuted, but the factually correct news item before us goes much farther. It is dated from Victoria, E.C., on Sept. 29, addressed to the manager, B. Benjamin, and is signed by the whole of the team, who, on the eve of their return home, express sincere gratitude and appreciation of his efforts on their behalf. It regards him

### KRUPP'S WORKS A HUGE WAR FACTORY

Industry Had Humble Beginning, But Now Employs Seventy Thousand.

Germany's war factory, which is just now involved in a grave scandal, is one of the greatest enterprises of the world. It had a humble beginning, the first "factory" being really a cottage, and but six men were employed. Frederick Krupp began operations with the dogged purpose of achieving fame. Sacrificing both resources and health to the object in view, he bequeathed, at his death in 1826, nothing but a small forge and his secret of making crucible steel to his son Alfred, then fourteen years of age. How this lad, by a similar spirit, converted, as it were, a magic wand, the little forge into the huge works of the present day, employing something like 70,000 workmen, is a remarkable story of enterprise and energy. It was the secret of crucible steel, acquired by Frederick Krupp to his son that made the Krupp works, and enabled succeeding generations to make it the greatest of its kind in the world.

The present Krupp works dominate the whole of Essen, a town of about 300,000 inhabitants. Situated in the centre, close to the railway, they, together with their attendant institutions, cover an area of 500 acres.

The tentacle arms of the vast establishment stretch out octopus-like on all sides. Two thousand trucks and over fifty locomotives rush along its tracks daily, conveying Germany's guns, armor-plates, ammunition and shells to German garrisons, forts, ports and harbors. Six thousand tons of coal, coke and briquettes are poured daily into the huge crucibles of the blast furnaces. One and a quarter million tons of fuel are required annually to appease its insatiable appetite. More than 100,000 gallons of water, or more than the 450,000 inhabitants of Cologne consume yearly, are used in the works.

Krupp's is admirably organized from a business point of view for the purposes of the war. It is a single unit, if not nominally, in the hands of a single individual. When it was turned into a company, the sole "vendor" was Fraulein Krupp, the founder of the firm. The value of the entire undertaking was estimated at \$75,000,000, from which \$100,000 had to be deducted, leaving a dividend of \$74,900,000. It was necessary to allot among the shareholders.

**MESOTHORIUM AS CURE FOR CANCER**  
Rich Urged to Provide Money to Secure Material for Charitable Uses.

Great popular interest has been demonstrated in Germany in the use of mesothorium as a cancer cure. Rich persons are solicited to give money with which to secure this material for charitable institutions, and in other places various means are resorted to for the securing of funds. This material is secured from the thorium waste of the gas mantle industry, and while it seems to have been very beneficially used in therapeutics, the physicians say that it is too early to put entire faith in the remedy. For the therapeutic use a tiny quantity is enclosed in a silver covering pierced with minute holes, in order to prevent the part affected with cancerous growth, and is said to slowly, but surely, eradicate the disease.

A new process has been devised by two foreign investigators for the production of cadmium electrode plates for alkaline accumulators, according to a recent issue of The Scientific American. Cadmium obtained in finely divided form as a spongy precipitate from a solution of cadmium salt is used in order to obtain it they add zinc powder to a solution of cadmium chloride. Then the precipitated spongy cadmium, mixed with zinc powder and a small amount of oxide of mercury, is pressed upon suitable supports for making the battery plates. Such porous cadmium electrodes are used in a caustic soda and the mercury then envelopes the particles of cadmium and zinc. On discharging the battery the zinc dissolves out, the cadmium becomes oxidized and the mercury remains in the separate state and is not affected. The zinc thus remains only temporarily in the mass, and aids in rendering it porous.

When emergency brakes are set on a train which is running at the rate of eighty miles an hour the train will be still running at sixty miles an hour when it has advanced 1100 feet, from the point of application of the brakes; whereas a train would be stopped altogether in 1100 feet if its speed were only sixty miles an hour.

### U.S. LEADING IN BIRD PROTECTION

Audubon Societies Waging Active Fight in Cause of Preservation.

Uncle Sam has become the leader of the world in the protection of bird life, in the suppression of bird slaughter for the feather traffic and in the preservation of game birds by federal laws, according to T. Gilbert Pearson, the secretary of the National Association of Audubon Societies.

From a statement made following the recent meeting of this association it appears that \$80,000 was raised this year, through the Audubon Societies, to fight for the birds. There was also an increase of 44 per cent. in sustaining membership, 26 per cent. in life membership and 36 per cent. in gross income, with the doubling of its working force since 1910.

Men, women and children in every section of the country are giving their support to this movement, and it is estimated that three-quarters of a million dollars will be spent annually, at the end of the coming decade, for the benefit of the nation's bird life, and the Audubon national army will have ten times its present fighting strength.

At least 90 cents in every dollar contributed by sympathizers with the wild birds was directly spent in pleading their cause before congress, 40 legislatures and public officials, or in guarding and maintaining scores of breeding refuges. In opposing the military interests to procure protection for their feathered prey by the legislators at Washington and a score of state capitals, many thousands of dollars were expended in writing, and spoken appeals to the people, whose representatives have, as a result of this demand, enacted laws that are regarded as safeguarding every form of American bird life more extensively than ever before in history.

Two million birds are reported to have found a safe refuge this year on the Audubon reservations and guarded colonies on both coasts and in inland sections, as well as some 10,000 egrets, over which 16 armed agents have watched in protected breeding grounds through the Southern States. Fifty-two thousand boys and girls have been enrolled as Junior members of the National Association of Audubon Societies since last year and thousands of dollars have been spent in supporting the coming generation of the whole country, thru the schools, with education in matters that make bird protectors of every scholar in future years. The demand of the public for expert information on the economic value of bird life to agriculture, prosperity as well as for general ornithological data, has caused the educational activities of the association to be doubled during the year.

World editorials are convincing and to the point.

The World is an advocate of public ownership.

### YOU can't afford to overlook a saving of \$5 to \$15 on your winter overcoat.

This means the best ready for service overcoats in Toronto. Newer styles and exclusive fabrics.

These overcoats are all 1914 models. Shawl collars, notch collars, convertible collars. Single and double-breasted ulsters and great motor coats.

Here's what you may expect and what you get:

- Overcoats that were \$22.50 are now \$15.00
- Overcoats that were \$25.00 are now \$17.85
- Overcoats that were \$35.00 are now \$25.00
- Overcoats that were \$40.00 are now \$25.00

Leather Lined Coats were \$50.00 now \$35.00

### CONSTRUCTION PLAN OF UNSINKABLE SHIP

George W. Dickie's Ideas Along Line of Safety Appliances Merit Careful Thought.

The serious problems presented to naval architects for solution, as a result of the new and rapidly multiplying laws concerning safety appliances, have caused a renewal of the quest for the unsinkable ship.

In this connection, the construction plan of George W. Dickie seems worthy of the most careful consideration. His idea embraces the fitting of a double upper deck and the arranging of watertight subdivisions below the passenger liner may continue to float under the worst known conditions at sea.

## EASTERN ONTARIO DAIRYMEN GATHER

Thirty-Seventh Annual Convention Being Held in Factory Town.

## WINTER DAIRY EXHIBIT

Splendid Showing of Cheese and Butter Wins Praise From Judges.

(Special to The Toronto World.) CORNWALL, Jan. 7.—Cornwall was today invaded by a very large number of leading dairymen from all over eastern Ontario, as well as by farmers from this and surrounding districts who are interested in the dairy industry. The gathering is the thirty-seventh annual convention of the Dairymen's Association of Eastern Ontario. Sessions are being held in the Hotel Hamilton and will continue until Friday afternoon.

The convention opened this morning with the delivery of the president's address by G. A. Gillespie of Peterboro, who gave an interesting resume of his tenure of office and the work undertaken and accomplished since the association last met in annual convention. An address on "Management and Care of the Dairy Cattle" by H. Glendinning of Manilla, Ont., brought out many important points in which the dairy herd could be improved with advantage to the owners.

Mr. Duff referred to the fact that in the office of the late John Sandfield MacDonald. He felt more deeply impressed from the fact that he had taken dinner with a friend who lived in the house in which Sir James had his room when a student here. From every part of Ontario and the entire Dominion they were watching, he said, with deep anxiety for news of the outcome of the gallant battle he was fighting in the sick chamber in New York. While all hoped for the best, they must feel prepared for the worst.

Mr. Duff referred to some length to the dairy industry and the important part in its development played by the Dairy Association now in convention.

The evening session took the form of citizens' meetings and the dairymen were joined by a large number of citizens of Cornwall, who came to listen to the addresses and musical program provided for the entertainment of the visitors. Hon. Senator Derbyshire of Brockville, honorary president of the association, occupied the chair.

An address of welcome was delivered by Wm. Pollock, mayor of Cornwall, who extended the freedom of the old factory town to the dairymen. Dr. B. O. Aigue, M.P., also spoke, dwelling on the large place the dairy industry now holds in the country.

Prof. Harcourt of the Ontario Agricultural College, Guelph; J. A. Rudolph, dairy commissioner, Ottawa, and Hon. James S. Duff, minister of agriculture, Toronto, each delivered an address, and told the dairymen many ways in which they could improve their condition as that of the dairymen.

First Winter Exhibit. A splendid winter dairy exhibit is being held in connection with the convention. This ranges from winter exhibit in the history of the association. Cheese and butter from all over eastern Ontario, from Toronto east to the exhibition in a large store in the Gleggery Block, and the judges express the opinion that it is the best yet, as regards both quantity and quality, they have ever judged.

## TROPICAL SEAS SHOW GREAT HEAT

Sun's Rays Have Powerful Effect on Temperature of the Water.

Those who live in a temperate zone and cold climates cannot possibly realize the effect of the sun's direct rays on the sea. E. J. Benfield, writing of his travels in tropical lands, is quoted in Youth's Companion as saying that on Nov. 21, 1909, he bathed at Moo-Jee, North Queensland, in shallow water on the edge of an area of denuded coral reef fully two miles long by a mile wide. For three hours a considerable portion of the reef had been exposed to the glare of the sun, and the incoming tide flung the stored-up heat from coral and stones and sand.

The first plunge provoked an exclamation of amazement, for the water was several degrees hotter than the air. It was not until the thermometer was at hand to register the actual temperature of the water, but subsequent tests at the same spot under similar conditions, proved that the surface stratum of water was at 108 degrees Fahrenheit, from four degrees to six degrees hotter than the air. Below that the temperature of the water seemed ordinary, and corresponded with that of the water a hundred yards out from the shore.

## GRAFTING IN SURGERY OF HIGHEST ANTIQUITY

The art of transplanting or replacing human tissue has been known since the remotest antiquity, states a writer in L'Illustration. In India a caste existed which was renowned for its skill in replacing cut-off noses, and had a great practice, because the removal of the nose was a very common punishment inflicted on certain criminals.

From India this sort of surgery found its way to Italy, where, in the fifteenth century, two illustrious surgeons, the Branca, father and son, enjoyed quite general fame as readers of the human anatomy.

Similarly, in the sixteenth century, a Bologna surgeon, Caparotta, became famous for his attempts at grafting and transplanting animal organs on members from other species.

## KENT COUNTY TO GUARD AGAINST SPRING FLOODS

Tug Will Be Used to Break Ice in Thames and Thus Prevent Dangerous Jams.

(Special to The Toronto World.) CHATHAM, Jan. 7.—Capt. McQueen's tug from Amherstburg will arrive at the mouth of the river tomorrow afternoon to lay up for the winter. The tug will be used in the spring to break the ice in the river and prevent the dangerous jams which yearly cause so much trouble and loss to the people of Kent in causing the Thames to overflow its banks.

The deal with Capt. McQueen is that for \$500 he will lay up his tug at the mouth of the river and charge \$4 ap hour extra in the spring for the time devoted in breaking the ice. The services of the tug will not cost the county anything, the whole expense is being borne by the government.

Albert E. Merritt, a most highly respected resident of the Maple City, Ontario, and in his 83rd year at his residence on Queen street, Mr. Merritt was ill only a week, and not until two days ago was his condition considered dangerous. Death resulted from congestion of the lungs.

## MINISTER MAKES FEELING REFERENCE TO SIR JAMES

CORNWALL, Jan. 7.—At the dairymen's convention tonight, Hon. Mr. Duff spoke feelingly of the fact that he was in the town in which Sir James Whitney spent his student days in the office of the late John Sandfield MacDonald. He felt more deeply impressed from the fact that he had taken dinner with a friend who lived in the house in which Sir James had his room when a student here.

From every part of Ontario and the entire Dominion they were watching, he said, with deep anxiety for news of the outcome of the gallant battle he was fighting in the sick chamber in New York. While all hoped for the best, they must feel prepared for the worst.

Mr. Duff referred to some length to the dairy industry and the important part in its development played by the Dairy Association now in convention.

## OPERATIONS OF A LIGHT METER

Mechanism of Instrument is of Most Intricate and Delicate Structure.

Reading an electric light meter is one thing and understanding just how it operates is another. The electric meter is really a tiny electric motor, of the most delicate structure and the best workmanship, in a little iron and glass box, explains The Electric News Service.

The revolving part of the motor is an aluminum disk mounted between two magnets, the current which flows through the disk induces a current in the magnets, and this current causes the disk to revolve with a speed directly proportional to the amount of current that is passing through the magnet.

With each complete revolution of the disk a black band is seen to pass the glass-covered aperture in the face of the meter box, and a definite number of revolutions of the disk indicates that one kilowatt-hour of electricity has passed through the meter.

There are four dials on the face of the meter, and the dial is geared to them in such a way that when one kilowatt-hour passes through the meter the dial revolves a sufficient number of times to show the number of kilowatt-hours that have passed through the meter.

As an example suppose the pointer of the right-hand dial has moved from zero to one in measuring one kilowatt-hour of electricity. In reading a dial of a meter it is necessary to read the number last passed by the pointer. This is important for accurate reading. On a given day the dial farthest to the right is read and the number set down. The next dial to the left is read and the number is written just to the left of the first number, and so on until the four readings have been taken and recorded. The numbers are not added together but are read as one whole number just as they stand.

As an example suppose the pointer of the right-hand dial has just passed four, the hand of the second dial is between the one and two, the third is between three and four, and the pointer of the left-hand dial is between two and three. Then the meter reads four, one, three, two, and four thousand one hundred and thirty-two kilowatt-hours have passed through it since it started from zero.

The right-hand dial registers kilowatt-hours singly, the next dial registers them by tens, the third by hundreds, and the fourth or left-hand dial thousands. In every case the number pointed above the dial is the number of units registered by one complete revolution of the dial hand. The reading of the previous month is subtracted from the new reading and the resulting number is the amount of power consumed during the month in terms of kilowatt-hours. If the resident's rate is twelve cents per kilowatt-hour a simple multiplication gives the amount of the month's bill.

## DEATH OF LONDON PHYSICIAN.

LONDON, Jan. 7.—Dr. James Drysdale Balfour, former superintendent of Victoria Hospital, and one of London's oldest physicians, died early this morning of pneumonia. Dr. Balfour was a member of the staff of Western University for many years, and was a popular lecturer.

## APPREHENDED AT PERTH.

OTTAWA, Jan. 7.—(Can. Press.)—Charles St. George, the young Jeweled clerk who disappeared on Monday with \$1100 of the Henry Birks firm money, has been apprehended at Perth. Five hundred dollars was found on him when arrested.

## WAGES OF CHAUFFEURS.

The wages of the chauffeurs of the United States totals more than that for school teachers.

## COCHRANE KNOWS THE SITUATION

Is in Direct Touch With Politicians in Province of Ontario.

## HE MIGHT COME BACK

But is a Fighter and Would Not Surrender Easily.

(Special to The Toronto World.) OTTAWA, Jan. 7.—Is Hon. Frank Cochrane going back to Ontario politics? The question is asked, and the answer given is that he is not in good health, that he has overworked himself in the office of minister of railways. But what brings up the question is the illness of Sir James Whitney, and still more an article in The Winnipeg Telegram (supposed to be the personal organ of Hon. Robert Rogers) of Saturday last. That article denounces Major Leonard as a "failure," and says that his appointment was a "mistake." To quote:

It is not necessary to go into details to indicate Major Leonard's unfitness for the position he occupies. The impression is growing that more progress would be made on the work if, as a former engineer in the employ of the commission were in charge.

Hon. Frank Cochrane, the minister of railways, is a busy man. He is an overworked minister, and he will continue to be overworked as long as he is burdened with the responsibility of Major Leonard in control of great undertakings like the Transcontinental.

The suggestion is freely made that the present situation should be taken over by a commissioner appointed with the ability and skill to expedite the work.

The Manitoba Free Press of Monday, received here late tonight says this article of The Telegram indicates the standing between Mr. Rogers and Mr. Cochrane.

It is believed here that Mr. Cochrane never lost touch with Sir James Whitney, and that he now, notwithstanding his recent illness, is in direct touch with the whole situation at Toronto. And his name is still mentioned in connection with the governorship of Ontario. An Ontario M.P. stated tonight that Frank Cochrane would refuse to surrender to any arrangement that might be directed against him.

## BIG ENGINEERING JOB ACCOMPLISHED

Transportation of Two Spans of Bridge Across Mississippi River.

An achievement which has been accomplished but twice before in the history of engineering was recently carried out by the Missouri Valley Bridge and Iron Company of Leavenworth, Kan. The achievement, according to The Kansas City Star, was the transportation of two spans in the bridge across the Mississippi at Hannibal, Mo.

The draw span, near the centre of the river, was taken out intact, floated on barges, and installed in the place formerly occupied by the draw span. The weight of the draw span is 500 tons, while the weight of the fixed span is 325 tons. The work of making the transfer occupied only a few hours, but the preliminary arrangements required two years. The cost of making the transfer to the railroad was \$135,000.

The transportation of the two spans was made necessary by order of the United States Government, which declared three years ago that the presence of the draw span in its former location was dangerous to navigation.

One of the principal tasks of making ready for the transportation of the two spans was the building of a new pivot pier for the draw to rest on after being changed to its new location. The pier was completed last year and work was practically suspended during the winter and until last spring.

The two spans were changed thru a novel procedure. Three barges on which was constructed a huge framework to sustain the piers was first floated under the fixed span. The barges were filled with water, which caused them to lie low in the water. When the barges were under the fixed span the water was pumped out, which caused them to rise and lift the span from the piers. Then the barges with the span high in the air were towed down the river about 250 feet. At about the same time the Missouri Valley Bridge and Iron Company barges were floated under the 500-ton draw span, where the same procedure was followed the water being pumped out of the fixed span, causing them to rise in the water and lift the gigantic span from the pivot pier, from whence it was slowly towed to the new pivot pier near the Missouri river, where it was slowly lowered into the water and dropped in the niche left vacant by the draw span.

The wages of the chauffeurs of the United States totals more than that for school teachers.

## BARRED ROCKS BETTER LAYERS THAN WYANDOTTE

Says Lecturer From Guelph O.A.C. at Stratford Poultry Association's Show.

(Special to The Toronto World.) STRATFORD, Jan. 7.—Over one thousand birds, in addition to the entries ducks, geese, pigeons and pheasants, were entered in the Winter Poultry Show of the Stratford Poultry Association, which so far as the judging of the birds is concerned, is a close thing. The classes were keenly contested, the entries being of an excellence that made many of the decisions very close.

Mr. McCullough of the Guelph Experimental Farm lectured, dealing with feeding according to the seasons of the year and how to select poultry for egg production in winter. In his experience, Barred Rocks had proved themselves better Wyandottes for the winter months.

The Golden-laced Wyandotte special was won by Frank McDermott of Tavistock. The question is asked, and the answer given is that he is not in good health, that he has overworked himself in the office of minister of railways. But what brings up the question is the illness of Sir James Whitney, and still more an article in The Winnipeg Telegram (supposed to be the personal organ of Hon. Robert Rogers) of Saturday last.

## GUELPH SECURES TWO ADDITIONAL INDUSTRIES

Pay Rolls to Include Eighty-Five Men at Start—Local Capitalists Interested.

(Special to The Toronto World.) GUELPH, Jan. 7.—Arrangements were completed whereby a local company composed mostly of local men, was formed for the manufacture of tungsten electric lamps in this city. The contract has already been contracted for its entire output of 1000 lamps per day and will begin to manufacture as soon as the machinery comes from Germany. It is expected to employ about 35 at the start.

Another company, known as the Peerless Rubber Co., Ltd., has been organized and will erect a factory here for the manufacture of all kinds of rubber goods, its specialty is the reclaiming of rubber. This company will employ fifty hands at the outset.

## WIRELESS PHONE SYSTEM IN MINES

Results From a Colliery of South Yorkshire Attract Much Attention.

The wireless telephone system of J. H. Reincke of Bochum, Westphalia, not only supplies mines with an economical means of signaling, which may prove of great value in the future, but by portable instruments it may serve the cages and inaccessible parts of the mine.

The instruments are like those used in ordinary telephony. The novelty of the system is in the method of connecting the instruments by two wires to a buried metal plate or to some metal of the mine, such as the rails or the pipes, and thus making the mine itself replace the usual transmitting and receiving wires.

This system at the Dimington Colliery, South Yorkshire, has attracted much attention. In this mine two instruments have been placed at points about 1000 yards apart, and the distance between them is about twenty pounds each, make it possible to communicate with the fixed station from the mine by the means of attaching the two wires to any metal at hand.

## SENSITIVENESS OF NEW THERMOMETER

It is no matter for great surprise to be told that the different portions of the spectrum into which a beam of light is spread out show different degrees of temperature when tested by an apparatus of sufficient delicacy. It appears, in point of fact, that the dark lines in the spectrum are also areas of relative coolness, and that the spectrum may be charted by moving a sufficiently delicate heat-measuring instrument along the spectrum.

The instrument with which this feat of measuring infinitesimal gradations of temperature is accomplished is known as a bolometer and was invented by the late Professor Langley of the Smithsonian Institution.

The principle on which the bolometer is constructed demonstrates that any change of temperature in a metal changes the capacity of that metal as a conductor of electricity. By using an excessively tenuous, flattened thread of platinum for his conductor, and an exquisitely sensitive galvanometer to register the effects, Langley produced an instrument which will respond to changes of temperature so slight in degree that no one could reasonably have supposed them measurable. Indeed, the feats accomplished by the little instrument are as incredible, not to say fantastic, as the feats of the spectroscopic itself.

A generation ago instruments for physical research had attained a high stage of development, but to measure a change of temperature of one-thousandth of a degree was considered a remarkable feat. The layman will be surprised to learn that the bolometer measures a change of one-hundred-millionth of a degree. It is competent to deal with the infinitesimal quantities of heat that come to us from such bodies as the moon and the brighter stars.

## ONE YEAR FOR FORGERY.

SARNIA, Jan. 7.—(Special.)—Kunama Miller, a Russian, was convicted on evidence given in court here today on a charge of forgery. He forged the name of "John Cook" by which another Russian is known at the Imperial Oil Company, to pay a cheque for \$1,000, made payable to Cook's order. The cheque, together with cash to the amount of \$83, had been stolen from Cook while he was drunk on Monday night last. Miller was given one year in the Central prison.

## OLD KINGSTONIAN DEAD.

KINGSTON, Jan. 7.—(Special.)—Mrs. Agnes Richardson, widow of the late George Richardson, died here this afternoon after a lingering illness. She was an old resident of the city.

## BRANTFORD GUNMAN GIVEN FIVE YEARS

Sentenced on Each of Six Charges, Terms to Run Concurrently.

(Special to The Toronto World.) BRANTFORD, Jan. 7.—William Murray, the colored man, who smuck with a gun, was sentenced to five years on each of the six charges preferred against him, sentences to run concurrently. Each of the six charges against him was sufficient for a sentence of five years. The prisoner, counsel pleaded in extenuation that Murray was crazed with drink, otherwise nothing would have occurred. Magistrate Livingston pointed out that the plea of drunkenness at the time of the offence was no excuse. It might take the edge off the intent to commit crime, but it was no excuse in the eyes of the law.

## SKINS WERE RELEASED

Raw Furs, Shipped by Indians, Seized by an Inspector Under Mistake.

(Special to The Toronto World.) BRANTFORD, Jan. 7.—William Murray, the colored man, who smuck with a gun, was sentenced to five years on each of the six charges preferred against him, sentences to run concurrently. Each of the six charges against him was sufficient for a sentence of five years. The prisoner, counsel pleaded in extenuation that Murray was crazed with drink, otherwise nothing would have occurred. Magistrate Livingston pointed out that the plea of drunkenness at the time of the offence was no excuse. It might take the edge off the intent to commit crime, but it was no excuse in the eyes of the law.

## CHEAPER FENCE POSTS.

Preservatives Prolong Life of Poorest Woods.

As a result of the many enquiries in regard to the preservative treatment of fence posts, the forestry branch, Ottawa, has now issued a circular on this subject, which should be had by applying to the director of forestry. The various methods described by treating the posts with preservatives are all illustrated by diagrams, and the apparatus required is simple and costs little.

The great advantage of these treatments is that they keep even cheap woods free from decay for from 10 to 15 years. Many kinds of wood found in farmers' wood lots will last, when used as posts, only four years or thereabouts; after treatment, such as described, they last twice or three times as long, or even four times, as long.

Creosote, which costs in Canada from 10 to 25 cents a gallon, is the best preservative. When boiling hot, creosote is applied liberally with a brush—a paint brush or whitewash brush, for instance—to the butts of well-seasoned posts, which the brush has removed, it sinks into the wood for a distance of about a quarter of an inch. This should be done at least ten years to the life of a post made from a non-durable wood, such as poplar, balsam, or spruce. This is not the best method, but it is the simplest and, on a small scale, probably the cheapest. Other methods require that the posts be kept covered in tanks of hot creosote for a longer or shorter period.

Besides lengthening the life of the post, the preservative treatment also tends to reduce the cost of the posts in another way, for, as cheap local woods can be used, the first cost and the cost of transportation are usually much lower than for cedar, oak or tamarack. Moreover, as posts will need to be set less often, the proportionate cost of setting the post will be less. Taking into account all the items that go to make up the cost of the post, and comparing this with the number of years it will last, it will be found in many cases, to be much less for treated posts.

## NEW MEXICO CONTAINS A MOUNTAIN OF ALUM

This Wonderful Deposit is Nine Hundred Feet High, Covering Two Square Miles.

Visions of great wealth are aroused by the prospect of developing the wonderful alum mountain near the Gila River, in Southwestern New Mexico. This deposit is 900 feet high, covering two square miles, and the United States Geological Survey finds it to be of such purity that any grade of manufactured alum can be produced at small cost, while for many uses it can be marketed in the natural state.

A probable future source of metal aluminum this material has still greater value. Alum is a source of electricity, and it is declared that no other such combination of unlimited light and pure material and the cheapest power exists in nature.

Sulphuric acid and other valuable by-products will be supplied by the aluminum industry. The United States is now produced from Australia, which is shipped from Arkansas to the reduction plants, mostly at Newburg Falls.

## LONDON APPLE TRUST TO BE BROKEN DOWN

Canadian Shippers Prepare to Organize an Independent Sales Centre.

LONDON, Jan. 7.—(C. A. P.)—The Canadian Press learns that a movement is on foot among the apple growers and the sale of Canadian apples to the London market to break down the "combine" which exists among the London dealers under which Canadian apples are sold at practically any price the combine chooses to fix.

Arrangements are being made on behalf of the apple shippers of New Brunswick, Ontario and British Columbia to institute an independent sales centre in London solely for Canadian apples.

Investigations are also being held into the allegations that recent shipments of apples have been tampered with wholesale at the port of entry, interior articles of English growth being mixed in large quantities with Canadian apples.

It doesn't take all morning to read The World. The news is condensed.

## FORMER TORONTO MAN IS HONORED AT PORT ARTHUR

Mayor Oliver, Re-Elected to Chief Magistracy, Handed Gift of Fifteen Hundred Dollars.

(Special to The Toronto World.) PORT ARTHUR, Jan. 7.—Mayor Oliver, an old Toronto boy, who was re-elected to the position of chief magistracy for the second term, was presented with a gift of \$1500 by the council for his services rendered during the year. While thanking the members of the council for their gift, Mayor Oliver stated that it was about time that the City of Port Arthur was giving something towards the expenses of its mayor, as it was getting to be a large place, and the expenses were rather high.

Mayor Oliver twenty years ago was a prominent young lawyer and school trustee in East Toronto, representing St. Matthew's ward on the public school board. He was a prominent church worker also, having been connected with the Woodgreen Methodist Tabernacle.

About twenty years ago he went to New Toronto, where he made good as a contractor. Later he moved to Port Arthur and was elected mayor last year and again this year by acclamation.

## COUNTY COUNCIL CENSURED

WELLAND, Jan. 7.—(Special.)—Censure was hurled at the county council by the Farmers' Institute at a business meeting held here this afternoon. The indignation was aroused by the refusal of the council to give a grant toward the fruit exhibit held at the Toronto Exhibition last fall, which R. Austin, local agricultural representative, reported to be a complete success, even though the funds were limited.

## "BLIND PIGGERS" FINED.

WELLAND, Jan. 7.—(Special.)—When James Pazofo, whose store in Crowland Township was found to bear every resemblance to a saloon, was called for sentence, it was found that he had sold his property and left for parts unknown. A fine of \$150 was imposed, and a warrant issued for his arrest.

Mix Barger, on a similar charge, was fined \$100 and costs. A number of cases of beer sent to the court, and it was shown that he had been selling regularly.

## BEFORE CONGRESS FOR TWENTY YEARS

Such Has Been the Career of Senator La Follette's Seaman's Bill.

Twenty years of travel between the two houses of congress is in brief the history of a seaman's bill, now known as the La Follette bill, senate bill 136. The bill required an increased number of seamen on steam vessels entering American ports, in order to provide for trained men in handling small boats and for other service in times of emergency. In some respects the bill is similar to full train crew bills applying to railroads. At the time of the Titanic disaster, it was thought that this seaman's bill would be passed at once. But now, nineteen months after that disaster, the bill having again passed the senate, is delayed in the house.

The recent burning of the Voltoro calls attention anew to this bill. After the Titanic's loss a seaman's bill secured requiring life boats in number proportioned to the carrying capacity of steamships. In compliance with this law steamships hastened to increase their life-saving equipment. The La Follette seaman's bill calls for a sufficient number of seamen to man the boats. It is pointed out that in case of disaster, as in the instance of the loss of the Voltoro, the boats are manned in part by waiters and stewards, firemen and coal passers, as well as seamen, because the latter are not sufficient in number. The use of others than seamen, it is said, is well enough for river traffic as the water is smoother and the risks of life not so great. But on the ocean, the seaman's bill calls for two seamen with three years' deck experience for each boat, assuming that occasions arise for the use of all the boats, and on the theory that two seamen can manage a boat with the help of others of the crew. If ocean calls for only a few boats, they can be manned entirely by seamen. One of the steamships which rescued some of the passengers of the Voltoro carried enough boats and life rafts to accommodate more than her carrying capacity, but it is registered as having twenty-eight seamen. According to the requirements of the La Follette seaman's bill, this vessel would be required to carry sixty-eight seamen, over twice as many as are carried now.

To carry so many seamen with three years' experience, kept constantly in practice in handling lifeboats, means an increased cost of operation for the steamship companies, especially as many seamen would be practically unemployed except in the case of emergency. Like the men of a fire department of a city, who have little to do until a fire makes its severe demands upon them, the seamen held in readiness for such a disaster would be far less frequently than a fire in a city. Besides, others of the seamen crew, such as engineers and firemen and stewards, are supposed to be familiar with small boats and the duties of seamen. The arguments of increased cost and rarity of disasters may have delayed for years the seaman's bill, which provides for the saving of human life, cost what it may.

## SENSATION SPRUNG AT PRISON PROBE

Guard Admits Getting Money for Convict and Keeping Part as "Rake-Off."

(Special to The Toronto World.) KINGSTON, Jan. 7.—The taking of local evidence in the Kingston Penitentiary probe has been concluded, the last of the testimony being given this afternoon when the commission adjourned to meet in Toronto, Jan. 16, in a parliament building. A session is being arranged so that the members of the commission can meet prominent labor leaders and discuss labor questions at the prison, James Simpson, Ottawa, has been mentioned as among those who will be called as witnesses.

In addition to securing the evidence of prominent labor men while in Toronto, the commission will meet the members of the parole board and penitentiary in order to get their views in regard to the working of the system and get views of the laborers on the prison reform.

## SESSION FOR TORONTO

Commission Desirous of Getting Views of Representative Labor Men.

The fact that one guard confessed to this morning's session to have secured money for a convict, and registered letter sent by a convict, that he had made a "rake-off" on himself on it caused a sensation, and it was expected that several of the guards would be put on the stand at the afternoon session. However, the more guards were questioned on the subject, the matter has been kept out of the commission's hands, and it is a piece of prison management that should be handled by the warden. Whether or not guards are guilty of such offences would be discussed, but was not stated at the final session, but some time ago the chairman stated they would be subject to discussion and in addition would be subject to prosecution under the Penitentiary Act.

## KEPT FIVE DOLLARS.

Guard Frank Randall admitted he had secured a money order for a convict, amounting to \$20 and had kept \$5 as his "rake-off." He said he had been on the staff only a short time and did not know it was wrong to do this. He had been on the staff 13 months, coming to the prison on Feb. 1, 1912. "You got into the business quick," remarked the chairman, "and witness admitted he had secured other sums for convicts and had made a "rake-off."

## BIG MINERAL YEAR IN UNITED STATES

Greatest Production in Its History—Iron and Coal the Leaders.

All records have been broken in the great mineral production of the United States for the year 1912. In 1912 the production of iron and coal was the greatest in the history of the United States. The value of the minerals produced in 1912 was \$2,072,666,635, but even this total was exceeded in 1912 by over \$1,000,000,000.

As compared with 1911, the increase in 1912 is \$216,098,139, or 10.6 per cent. These figures are shown in a table on the basis of valuation in 1912 as follows: \$2,072,666,635 in 1912 as compared with \$1,856,568,496 in 1911. The value of iron and coal was \$606,071.

The value of the fuels—coal, natural gas and petroleum—increased from \$855,231,497 in 1911 to \$944,174,364 in 1912, a gain of \$108,740,866. Copper and other minerals valued at \$1,466,760,248 in 1911 to \$1,376,000,000 in 1912. The unappreciated production of cadmium, selenium, rutile, niobium, vanadium, and other minerals valued at \$600,000, increased to \$250,000, making the total value of the minerals produced for 1912 up to \$2,243,620,234.

Over 400 Complete Songs with Words and Music. Over 500 Pages. HEART SONGS. Greatly Reduced Size. Full Size, 7 x 9 1-2 inches. The Old Folks at Home. S. C. FORTNA.

A Letter to the Publishers

Heart Songs came Saturday. The girls were away, so they didn't get into it until Sunday afternoon. That H.S. is some book!

I was upstairs writing some dull stuff for a magazine when the old melodies came floating up into my den. I couldn't write any more, so my wife and I stole down to the parlor and sat by the grate.

We have not had such a treat in years. The very air blossomed with melody. These songs took us in memory back to the old farm, back to the double log house in the Southland, sweet with the honeysuckle and the jessamine.

They told us the pathetic tale of the black man, and the black mammy torn from all they loved, and we felt more humane and more sympathetic.

They bore messages of love from mothers and sweethearts to wandering boys, and brought back the vows of "ever true to you, ever true."

They kindled anew the fires on the family hearthstone, and their light shone back to the very cradle. Heart Songs seem to sweep every string on the harpsichord of human emotion.

One page would lead us gaily through fields of flowers, and the next one would moisten our eyes with the dew of tears. I can see why this book was called "Heart Songs."

We all thank you for Heart Songs. Respectfully yours, (Signed) EUGENE CHRISTIAN.

[The above letter explains itself. Dr. Eugene Christian is one of the best known authorities on scientific eating in the world today. His numerous articles, contributed to the press, and his many public lectures on this subject, have given him a standing second to no other in the chosen field of his life work.]

POTASH SYNDICATE TO SUE CHANCELLOR

Return of Two Million Dollar Propaganda Fund is Demanded.

BERLIN, Jan. 7.—(Can. Press.)—A suit against Imperial Chancellor von Bethmann-Hollweg is to be brought by the German potash syndicate, which demands from him the return of \$2,000,000 forming the so-called propaganda for advertising the merits of the German fertilizer at home and abroad.

The law of 1910 was designed to conserve the natural supplies of potash in Germany, to insure the prosperity of the German industry and to prevent Americans from getting a cheap supply, but has been a pure failure.

New potash mines are constantly being opened up, thereby decreasing the quotas allotted to the various existing mines, and those interested declare that the time is coming when the bars to free and cheaper production of potash must be lowered and more effective methods of discouraging mining in Germany are devised.

NEW YORK MERCHANTS ROBBED OF HUGE SUM

Commercial Frauds Amount to Twenty-Five Million Dollars Annually.

NEW YORK, Jan. 8.—(Can. Press.)—The annual losses suffered by merchants thru commercial frauds committed in this city aggregate \$25,000,000, according to a committee representing the Merchants' Association and other leading business organizations which called upon District Attorney Whitman today with regard to a vigorous prosecution of these crimes.

SMALLPOX HITS SAILORS EXPOSED ON BATTLESHIP

Third Death in Quarantine at Charleston, W. Va.—Thirty-Two Other Cases.

CHARLESTON, W. Va., Jan. 7.—(Can. Press.)—The third death from smallpox among men exposed on the battleship Ohio, which took the infection on the recent Mediterranean cruise, was recorded here today. It was that of a coal-passer named Ackerman, who died in quarantine.

WASHINGTON, Jan. 7.—Thirty-two more cases of smallpox were reported from Guantanamo naval station among sailors exposed on the battleship Ohio. The station has been quarantined.

CONCORD, N.H., Jan. 7.—(Can. Press.)—That release on behalf of Harry K. Thaw would not menace public safety, is the opinion expressed by two health custodians today at a public hearing before the commission appointed by the federal court to take upon the matter of Thaw's mental condition in relation to his liberation under bonds.

BRAZILS DECLINE ON FOREIGN NEWS

Bank Failure in South America Influences Local Sentiment. OTHER ISSUES STEADY

A bad bank failure in Sao Paulo gave a shock to local traders yesterday morning. The shares principally under criticism were of course Brazilians. These dropped 1 5/8 points from Tuesday's close, but recovered slightly after the first selling was exhausted.

MONTREAL OPTIMIST

C. J. McCuaig Has No Misgivings as to the Future. C. J. McCuaig of the firm of C. J. McCuaig and Co., members of the Montreal Stock Exchange, was in Toronto yesterday.

FORTY-SIX BANKS IN BRAZIL FAILED

The Incorporadora Company of Sao Paulo Under Pressure of Foreign Banks. SAO PAULO, Brazil, Jan. 7.—The failure was announced here today of the Incorporadora Company of Sao Paulo, involving, it is said, no fewer than forty-six banks in the principal towns of the State of Sao Paulo.

NEW YORK, Jan. 7.—Exchange and Bond market exchange rates to Glasgow and London as follows at 11 a.m.: Sterling 90 3/4, 4 3/8, 1/2, do, demand, 4 8/8, 1/2.

THE DULUTH-SUPERIOR The Duluth-Superior Traction Co. comparative weekly statement of gross passenger earnings for the month of December:

THE ROYAL BANK OF CANADA INCORPORATED 1869 Capital Authorized \$25,000,000 Capital Paid Up 11,560,000 Reserve Funds 13,000,000 325 Branches Throughout Canada.

INTEREST CENTRES IN PLANS OF U.P.

New York Traders Take Divergent Views of the Announcement. DEFINITE STRENGTH CAME WITH FINAL HOUR—LONDON A BUYER.

NEW YORK, Jan. 7.—Variable price change and moderate dealings constitute the chief characteristics of today's stock market in contrast to the feverish anxiety and strength of the previous day. The plan of the Union Pacific road for disposal of its Baltimore and Ohio holdings continued to be the main topic of discussion, and opinions regarding the outcome were widely divergent.

MONTREAL STOCKS MOVED NARROWLY

C. P. R. Recovered After Early Setback—Good Rally by Brazilian. MONTREAL, Jan. 7.—Business in the shares exclusive of mining stocks on the local exchange amounted to little more than 1700 shares. Price changes at the close were small and irregular with a leaning to losses rather than gains.

STANDARD OIL MAY INCREASE CAPITAL

The directors of the Standard Oil Company of California have authorized subject to the approval of the state railroad commission of California, the sale at par of 45,134 shares of treasury stock representing ten per cent. of outstanding stock of this date.

THE WORLD HAS UNIQUE FEATURES THAT APPEAL TO MEN, WOMEN AND CHILDREN.

WHEAT ROSE ON EXPORT DEMAND

Lowest Prices for Month Were Touched in Early Trading.

CHICAGO, Jan. 7.—After reaching export basis, wheat today touched a record upward slant. The market moved steady today at a net advance of 1-4 to 1-2c. Corn finished 1-4 to 1-8c off and oats unchanged to 1-4c of a shade to 1 1/2c.

Export dealers bought a considerable quantity of hard winter wheat in Chicago today, and further bids were made close to a working basis. The situation was said to be similar at St. Louis and there were advices that some export flour had been sold by Minneapolis mills.

Distances of wheat and flour at the Atlantic seaboard were on a generous scale, and there was a disposition on the part of many speculators to agree with a suggestion from a high authority that prices of a discouraging sort were about at a minimum below which growers could not sell except after a long wait.

Export buying of wheat. Lowest prices for the month were touched by wheat early in the day owing to bearish cables and as a result of depression in corn. Rumors of serious financial trouble in Brazil had a transient effect also, but every influence of a discouraging sort was more than offset when export buying began to stimulate the market.

Receipts of farm produce were 300 bushels of grain and nine tons of hay. Barley—Two hundred bushels sold at 64c to 64c. Hay—Nine loads sold at \$17 to \$19 per ton.

GRAIN AND PRODUCE. Local grain dealers' quotations are as follows: Ontario oats—New, No. 1 white, 33 1/2c to 34 1/2c; outside, 33 1/2c to 34 1/2c; track, Toronto.

Manitoba flour—Quotations at Toronto are: First patents, \$5.50, in cotton 10c more; second patents, \$5, in cotton 10c more; strong balers, \$4.80, in bulk.

Manitoba oats—No. 2 C.W., 41c; No. 3 C.W., 39 1/2c; lake ports. Ontario wheat—New, No. 1 white, 85c to 86c; outside, 85c; track, Toronto.

Beans—Imported hard—picked, 22 1/2c per bushel; Canadian, hand-picked, 22 1/2c; prime, 22c. Manitoba wheat—New crop, for October shipments from Fort William, No. 1 northern, 84c; No. 2 northern, 82 1/2c to 85c.

Peas—No. 2, \$1 to \$1.05, nominal, per bushel, outside. Buckwheat—No. 2, 66c to 68c, outside, nominal. Corn—American, No. 3 yellow, 72c, all rail, track, Toronto.

CATTLE RECEIPTS AGAIN WERE LIGHT

And Prices in Classes Ruled Very Strong on Wednesday.

Receipts of live stock at the Union Yards were 49 carloads, comprising 720 cattle, 1440 hogs, 710 sheep and lambs, 435 calves and 12 horses.

There was little change in the quality of the live stock offered or the prices paid compared with Tuesday's trade. Each and every class of live stock found ready sale as the demand was greater than the supply.

Butchers. Best butchers sold at \$8.25 to \$8.50, and one load at \$8.75; good steers and heifers \$7.75 to \$8.10; medium, \$7 to \$7.50; choice cows, \$6.50 to \$7; fair to good cows, \$5.50 to \$6; common cows, \$4 to \$5; canners, \$2.50 to \$4.25; calves, \$7 to \$7.50; medium bulls, \$6.50 to \$7.

Stocks and Feeders. There was a limited number of stockers and feeders, which sold at firm prices. Choice heifer steers were reported selling at \$8.25 to \$8.50; stockers at \$5 to \$5.75. A moderate supply of milkers found ready sale at prices ranging from \$55 to \$60 each, the bulk being from \$55 to \$75.

Veal Calfs. Receipts were light, 135 all sold, and prices were firm. Choice veal calves, \$10 to \$11; common, \$8 to \$9; eastern rough quality, \$7 to \$7.75.

Sheep and Lambs. Receipts were light, 135 all sold, and prices were firm. Choice wethers, \$10 to \$11; common, \$8 to \$9; eastern rough quality, \$7 to \$7.75.

Hogs. Receipts were light, 135 all sold, and prices were firm. Choice hogs, \$10 to \$11; common, \$8 to \$9; eastern rough quality, \$7 to \$7.75.

Representative Sales. Butchers—5, 1140 lbs. at \$8; 6, 990 lbs. at \$7.75; 7, 890 lbs. at \$7.50; 8, 1090 lbs. at \$7.25; 9, 1290 lbs. at \$7; 10, 1490 lbs. at \$6.75; 11, 1690 lbs. at \$6.50; 12, 1890 lbs. at \$6.25; 13, 2090 lbs. at \$6; 14, 2290 lbs. at \$5.75; 15, 2490 lbs. at \$5.50; 16, 2690 lbs. at \$5.25; 17, 2890 lbs. at \$5; 18, 3090 lbs. at \$4.75; 19, 3290 lbs. at \$4.50; 20, 3490 lbs. at \$4.25; 21, 3690 lbs. at \$4; 22, 3890 lbs. at \$3.75; 23, 4090 lbs. at \$3.50; 24, 4290 lbs. at \$3.25; 25, 4490 lbs. at \$3; 26, 4690 lbs. at \$2.75; 27, 4890 lbs. at \$2.50; 28, 5090 lbs. at \$2.25; 29, 5290 lbs. at \$2; 30, 5490 lbs. at \$1.75; 31, 5690 lbs. at \$1.50; 32, 5890 lbs. at \$1.25; 33, 6090 lbs. at \$1; 34, 6290 lbs. at \$0.75; 35, 6490 lbs. at \$0.50; 36, 6690 lbs. at \$0.25; 37, 6890 lbs. at \$0; 38, 7090 lbs. at \$0.25; 39, 7290 lbs. at \$0.50; 40, 7490 lbs. at \$0.75; 41, 7690 lbs. at \$1; 42, 7890 lbs. at \$1.25; 43, 8090 lbs. at \$1.50; 44, 8290 lbs. at \$1.75; 45, 8490 lbs. at \$2; 46, 8690 lbs. at \$2.25; 47, 8890 lbs. at \$2.50; 48, 9090 lbs. at \$2.75; 49, 9290 lbs. at \$3; 50, 9490 lbs. at \$3.25; 51, 9690 lbs. at \$3.50; 52, 9890 lbs. at \$3.75; 53, 10090 lbs. at \$4; 54, 10290 lbs. at \$4.25; 55, 10490 lbs. at \$4.50; 56, 10690 lbs. at \$4.75; 57, 10890 lbs. at \$5; 58, 11090 lbs. at \$5.25; She Has a Dream—  
Oh, Such a Dream!

BY GRACE G. DRAYTON

And the Princess found the POT of gold at the foot of the Rainbow.

Bless her heart—she's a little angel when she is asleep.

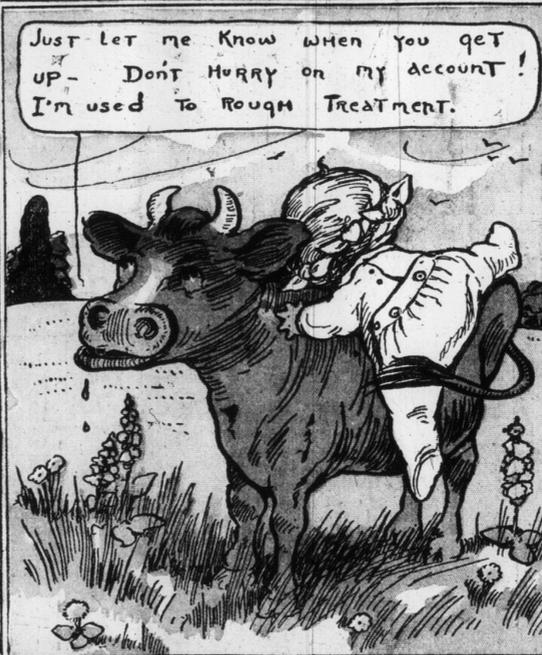

Oh goody—I'll go find the POT of gold like the Princess did.

Oh! Mrs Mooley, can you show me the way to the POT of gold?

Sure! come climb aboard and I'll take you there.

Just let me know when you get up—Don't hurry on my account! I'm used to rough treatment.

Oh! Mrs Mooley, isn't you 'fraid you'll get 'rested for speedin'?

Ise goin' to take Heaps and Heaps.

WHAT-CHU-KNOW ABOUT DAT? It was nuffin' BUT a dream.

I woked up JUST when I Finded the POT of gold—! Can't I Have some of the Party Ice-Cream and candy?

© G. Drayton 1913
