to the possibilities of electricity. I've known the time when the metal was more precious than gold. Then it fell to \$9 per pound; now it is \$2 per

pound. This fall in cost has been reach-ed by the discovery of new affinities which cheapen its production. When it reaches a cost of 25 cts per pound it will be generally used. It is about as light as oak wood, four times as light as iron, and has more resistance than the very

metal that will but just sink in water. The ocean steamer of today built of iron and wood will be as a canal boat compared to a vessel constructed of aluminum. Such a one will fly as a bird over the waves," said the professor.

My wife suffered for five years with that distressing disease, catarrh. Her case was one of the worst known in these parts. She tried all of the catarrh reme-dies I ever saw advertised, but they were of no use. I finally procured a bottle of Nasal Balm. She has used only one half of it, and now feels like a new person. I feel it my duty to say that Nasal Balm cannot be TOO HIGHLY recommended for catarrh troubles, and am pleased to have all such sufferers know through its use they will receive instant relief and CURE CHAS.
