vate right of way on the general ground that the more railways that came in, the better it would be for the city Building Booms.

The building boom continues with-out cessation, and it is estimated that for the present month, the \$2,000,000 mark will be passed, breaking all previous records. Whereas for April, 1906, the value of the permits was \$1,472,000, the value of these so far issued is \$1,300.000 with 12 days yet

to run. Chief Engineer Mountain of the board of railway commissioners call-ed on City Engineer Rust yesterday regarding the slding on Mowat-avenue desired by the Grand Trunk and C. P. R. jointly. When the matter was before the commission some time ago the city gave its assent to the siding, but differences later arose between the railways, and the construction of the siding has been delayed. Mr. Mountain reported that these differences had been adjusted, and the work

of building will be shortly begun. In the light of the report of Bion Arnold, the Chicago expert, the mayor says he can no longer see strong ob-jection to the street railway being being allowed to extend their lines along Richmond, Victoria and Wellingtonstreets. The city engineer, while agreeing as to the two extensions first named, is against the extension on Wellington-street to Church-street, as he doesn't think there is sufficient congestion on Front-street to warrant it. Mr. Arnold's suggestion that the west corner of the city hall front lawn should be rounded off, so as to allow cars to turn up the propose Teraulay-street line, is not favored by the board of control, which prefers instead cutting off a portion of the scuthwest corner of Queen and Bay-streets. A report will be had from

Not a Socialist, But-"I am not a socialist." the chancellor

In regard to old age pensions, the chancellor said he would not commit

sions as being the most serious and most urgent of all the demands for social reform. It was their hope and intention before the close of the next session of parliament, if they were allowed to have their way, to lay a firm foundation for this reform. Continuing, the chancellor said that if these objects of the government, namely, the strengthening of the national oredit and the creation of a fund for social reform, were to be carried out he could not do anything involving a

permanent diminution of the revenue. He was satisfied that a further reduction in the duty on tea by two cents would not benefit the consumer,

chancellor intended, however, to deal with the income tax incidence, which in its present shape worked unjustly. The scheme must be one which without destroying the productive character of the tax would differentiate between earned and unearned in-

comes. Earned incomes under \$10,000 a year would hereafter only pay 18 cents, while the existing tax of 24 cents in the pound sterling (\$5) on

A BOLD STEP.

To overcome the well-grounded and reasonable objections of the more intelligent to the use of secret, medicinal compounds, Dr. R. V. Pierce, of Buffalo, N. Y., some time ago, decided to make a bold departure from the usual course pursued by the makers of put-up medicines for domestic use, and so has published broadcast and openly to the whole world, a full and complete list of all the ingredients, entering into the composition of his widely celebrated medicines. Thus he has taken his numerous patrons and patients into his full confidence. Thus too he has absolutely and completely removed his medicines from among secret nostrums of doubtful merits, and made them Remedies of Known Composition.

They are now in a class all by themselves-being absolutely and in every sense Non-secret.

By this bold step Dr. Pierce has shown that his formulas are of such excellence that he is not afraid to subject them to the fullest scrutiny.

So many false formulas and malicious statements concerning his medicines had been published through the con-nivance of jealous competitors and dis-gruntled doctors, that Dr. Pierce deter-mined to completely disarm his assail-ants by a full and frank statement of heir exact composition, verifying the me under det as a complete and dis-the exact proportion of the several in-gredients used in these medicines, sa well as the working formula and pecul-iar processes, apparatus and appliances employed in their manufacture, are withheld from publicity that Dr. Pierce's and trespassed upon by unprincipled in trespassed upon by unprincipled So many false formulas and malicious statements concerning his medicines had been published through the con-nivance of jealous competitors and dia-grantled doctors, that Dr. Pierce deter-mined to completely disarm his assail-ants by a full and frank statement of and trespassed upon by unprincipled imitators and those who may be piratitheir exact composition, verifying the same under oath as complete and cor-rect. We extend an invitation to investors to join us in taking over the first issue of shares which we have agreed to purchase of the Larder Lake Blue Bell Gold Mines, Limited, at the first ground floor price of 10 cents per share. The Company has just been organized and will be managed by experienced mining men of highest standing. The Company owns 27 well located, gold claims, 1,080 acres in all, which have yielded extraordinary gold values, located in the new gold district of Larder Lake, 60 miles north of Cobalt, New Ontario, which will be systematically developed. All investors who join us will share in profits from this ground floor basis, participating in an immediate profit or increase in market value of shares of 500 per cent: On or about May 15th Law & Co. will in their customary vigorous manner place these shares upon the market by judi-cious advertising throughout Canada and the United States at fifty cents per share. All who join us will share with us in the profits therefrom.

The Trusts and Guarantee Company, 14 King street west, Toronto, will act as Trustees for the Underwriters' Syndicate in receiving and holding the shares and issuing receipts therefor and also as Registrars and Transfer Agents for the Company. For application tlanks and full particulars.

15 YEARS' EXPERIENCE IN NEW ONTARIO

I know of no safer investment in Real Estate than in Haileybury, the Queen City of the Temiskaming.

Frank, Burr Mosure. WHEN U.S. SUPPLY ENDS **CANADA WILL BE CUTTING**

Cobalt is only the beginning of mining in New Ontario, the richest mineral field in the world, and there are, and will be, other opportunities as great and greater.

The Larder Lake goldfields are the next hi line. Inform yourself at once. Don't wait to see what the other fellow will do, but do it yourself, and do it now. That's the way the man on the ground floor gets there.

Investigate. Get posted. Put yourself in a position to intelligently take ground floor advantage of the tremendous opportunities for profit contained in the northern mining fields.

By means of personal investigation on the ground, the employment. of reliable engineers, and the service of employees in the field, I keep my following posted, and they make money.

has been tunneled a distance of over 400 feet into the bluff with great ore values in every foot. This is known as the Macdonald tunnel. Altogether there is about 2000 feet of underground development upon this vein, and the ore extraction from day to day shows as steady persistency in volume and value as was the case in the surface

workings.

But the most extraordinary exhibit upon this great property is the bonanza cross vein running nearly at right angles from vein No. 1. This has been partly developed by means of an open cut, which reveals an outcrop 6 to 10 inches in width of clean white silver. This vein has been traced at least 600 feet on the plateau and a tunnel was driven into the bluff to the east,

a distance of about 200 feet to a point near the east boundary of the location where an upraise shaft was car-ried to the surface. Values and width at every stage have been sustained. Another shaft will be sunk to lower levels at once. It was from the sur-face of this outcrop that the record car of \$127,000 yield was shipped about a year ago, while some of the finest

slabs of native silver in the mining exhibit now in progress in New York were taken from the tunnel. vein strikes nearly due east into

the O'Brien territory, in which the treasury of Ontario has a heavy interest. Practically three mines are now in

operation within a compass of about six acres and there are at least seven other known separate veins undeveloped with the greater part of the loca-tion yet unprospected. These veins appear to honeycomb the whole hill-side, and the management believe that in stoping out ore their problem will be not so much what part of the vein matter to extract as what to leave. In every direction there are stringers of rich native silver, and
