The First Really Important Introduction of our Millinery Opening

For Saturday, April 8th, Miss Rowan has specially prepared fifty hats and so very sweet and stylish are they, and such is the value of them, that we simply cannot help giving them the place of importance in our plans for the season.

Essentially Easter Suits and novelties.

All Are Invited to Attend the Opening

D. BASSEN'S

Carleton St.

St. George

Planting Trees Saved Jutland

Four hundred years ago the people of Jutland had destroyed their forests as the people of Canada and the United States are doing now. By the year 1500 the central and western portions of the peninsula, where the soil is extremely poor, had been transformed into a barren waste of black heath and sand dunes. The people, not knowing that the presence of the forests was the main condition for the existence of human life in those parts of the country, had to leave the land which they, in ignorance, had ruined.

In the middle of the eighteenth century only a scant population was left settled on the long and narrow meadows along the watercourses which cut through the heath. Even these meadows were gradually being transformed into heath because the watercourses cut themselves deeper into the bottoms of the valleys, whereby the water level was lowered. The climate, which had formerly been damp and mild, now became dry and harsh. Even on the east coast of the peninsula and on the Danish Islands where the soil is richer, the forests had deteriorated to such an extent that in the eighteenth century there was a serious danger of their total disappearance.

An Awakening.
In the last half of that century, however, an awakening took place, and in 1805 a forest act was passed whereby most of the forests then left were saved. Off and on for a hundred years attempts were made to replant the forests which had been so recklessly destroyed. The Government lent its aid, but the results were anything but encouraging. While the east coast of Jutland was covered with woods and with fields of rye, wheat, oats and barley, the western and central portions were covered with the dark heather as far as the eye could reach. One-fifth of the entire area of the kingdom was in a desert condition, and a still larger area was but very imperfectly utilized.

The many failures in planting and cultivating the heath had given to most people the conviction that it was hopeless to spend more energy and money on this problem. It was at this point that the cause was taken up by Colonel E. Dalgas, an engineer officer of the Danish army. Dalgas was a man of rare energy and ability and of great patriotic enthusiasm. He saw that the work could not be started on the ground of immediate

or direct financial return, and that it was necessary to appeal to the patriotism of his countrymen. It was in one sense an auspicious moment for such a movement. In the unfortunate war of 1864 Denmark had lost the Schleswig-Holstein Provinces and a general feeling of depression and discouragement prevailed. An idea like the afforestation of the country, by which large areas of land could be reclaimed, compensating in some measure for the lost Provinces would naturally appeal to the energetic and active elements of the population. Dalgas soon succeeded in arousing interest in the cause. In 1866 he formed the Danish Heath Society and the Government was induced to give a subsidy, this was small at first, but was increased in the following years, and was supplemented by increasing private subscriptions.

The Mountain Pine
But, having aroused the people, he still had to find a tree which would grow under the adverse conditions existing on the sand dunes and on the heath. The mountain pine from Central Europe (*Pinus montana*) was chosen. It would thrive in spite of winds and drought, wet or cold, and would kill the heather by spreading close over the ground.

The next great step in the development was the discovery of the remarkable fact that the mountain pine acted as a nurse to spruce trees planted in its vicinity.

In the same localities where spruce, if planted alone, would remain stagnant at an early age, it would, if planted close to a mountain pine, grow up vigorously; and on the basis of this discovery a new system of planting was introduced, by which the mountain pine and the spruce were mixed; one mountain pine for each one, two, or more spruce trees, according to the quality of the soil.

Later it was found that the mountain pine, which had been an excellent nurse during the early years of the life of the spruce, hampered its growth. But if the pine was cut down at an early age the vitality which it had given to the adjacent spruce trees would remain in effect, and these would continue to grow thereafter as well as if they had been planted in good soil.

The remarkable discovery was made by Colonel Dalgas' son, Christian Dalgas, who as a forester in the service of the Heath Society and one of its leading men, and who has devoted his life to the continuation of the great work commenced by his father. So, year after year, with patience and money, the trees

were slowly put back on the soil.

Industrious Cutting
Hence by the latest method of planting, mountain pine and spruce alternate so that one mountain pine is planted for each one or two spruce trees and at an early age the pine is cut down when it has done its work of starting the spruce. The material obtained by cutting down the young pine is used as fence posts, or utilized for burning charcoal and for making tar.

The spruce mostly used are white spruce (*Picea alba*) and red spruce (*Picea excelsa*). The white, which comes from North America, is particularly well suited for use in those parts of the plantations most exposed to the wind; in fact, it seems to stand the wind better than any other tree. White spruce is, therefore, used in conjunction with mountain pine to form the first sheltering wind-break, and behind such belts the red spruce is planted together with the mountain pine. The mountain pine mostly used is *Pinus montana uncinata*.

Forest Protection
Surrounded by the spruce and fir deciduous trees are planted, and potatoes and other crops are raised. Behind live fences of fir and spruce as a shelter against the wind, the ground is plowed and crops are raised even in the poorest soil. Not only has the presence of the forests made the climatic conditions more favorable for agriculture, but the entire character of the country has changed. In large forests deer are found in abundance, and wood pigeons, ducks, and many other wild birds are settled in them.

Already more than one hundred Danish square miles (2,500 English square miles) or about one-seventh of the entire area of the Kingdom, have one way or the other been reclaimed since the Heath Society commenced its work, and in one more generation the heath will probably have entirely disappeared. A movement is already on foot to preserve a certain part of the heath as a sample of what has been for centuries a characteristic feature of the country.

Tree-planting General.
The growing interest in this cause is evidenced by the increasing means placed at the disposal of the society. The subscription of the Government has now reached an amount of \$130,000 a year, and about an equal amount is derived from private donations. The peasants and farmers are increasingly interested in this cause, and most farms, even in the poorest part of the country, are now surrounded by trees; and often larger groups of trees or small forests have been planted by the peasants or farmers and are regarded by them as their dearest treasure.

Large purchases of land have been made by private people in this way, chiefly for patriotic reasons; but in the course of time this land and the forests which are planted on it are likely to acquire considerable value, for with the growth of the forests and the increased cultivation of the soil, the density of the population increases rapidly, and the means of transportation are steadily improved. For example, Hernig, lying in the middle of the heath district, which in 1866 had but forty inhabitants, now has 5,000.

Lesson for Canada.
Canada can see into the future by looking at the past in Denmark—a country which has already gone through all the phases; abundance of primeval forests, deforestation, preservation and planting of forests.—*Tor. Globe.*

The Waste of War
"If Canada is to play the great part allotted her in the future history of the world, she must avoid the waste of war. Let us take a lesson from Japan and our European friends who by their insane craze for armaments have sold themselves into the hands of a few alien capitalists and money lenders, who must give their consent before any of these countries can embark on a war. We in Canada can afford, if necessary to waste a little of our great natural resources,

but we cannot waste men's flesh and blood. Yet such had been the criminal profligality of the land of his ancestors in their service to England, well might they cry in Kipling's words: "We have strowed our best to the weed's unrest, To the snark and the sheering gull; it would be the price of admiralty— Lord God! we have paid in full!"

"Let us take warning; for this has been not only an economic and social waste, but a biological one. You have not realized the physical decadence in what was but a short time ago a race of Scottish giants—of wuack an entire regiment one of my ancestors fought in at Culloden was composed of men over six feet high—to see that in the old country the breeders of the race have become the same who have neither the strength nor the courage of war."

All of us who believe—and who among us does not—that Canada is destined to become a far greater power even than it is today, with its new democracy coming into its own, have a duty to do service to some one else on the morrow. It is not the man who attracts all the rewards to life to himself who is great, but he who serves others that they may share with him life's rewards. There is no other title-deed to greatness than mutual help and the ideal of national service. Dear old Britain for more than a thousand years has been the greatest force making for righteousness in the world. Let our mission then be rather to serve, than to be served, that Canada may ever exercise the virile and pure regenerative force of a nation that is intelligent, independent and free.—*Dr. J. A. Macdonald, Editor of the Toronto Globe before the Canadian Club of Victoria, B. C.*

Wonderful Lamps

When the tomb of Pallas, son of Esvanter, who is mentioned by Virgil, was discovered about the twelfth century by a countryman digging near Rome it is said that a lamp was still burning in it, which must have been lighted more than two thousand years before. Apollonia, in his treatise of natural magic, relates that about 1550 a marble sepulchre of the Roman period was discovered in an island near Naples. On opening the room a vial was found, containing a burning lamp. It was supposed that it had been concealed before the Christian era, and those who saw it reported that the lamp emitted a splendid flame.

In 1550 a remarkable lamp was found in Padua by a rustic, who unca tied a terra-cotta urn containing another urn in which was a lamp placed between two cylindrical vessels, one of gold and the other of silver. Each was full of a very pure liquid by which the lamp has been kept burning upwards of fifteen hundred years. This curious lamp was not meant to scare away evil spirits from a tomb, but was an attempt to perpetuate the profound knowledge of Moximus Olympus, who effected this wonder by his knowledge of chemistry.

Archlight Is Dead

(Acadian Record.)

The death is announced at Truro of Archlight, 2:19 3-4, at the age of 26 years. Archlight, who was sired by Rampart, dam by R. R. Morris, was one of the greatest trotters ever in the provinces. He was not an importation, but provincial bred; he was game to the core, and his fastest miles were made in days when there were no lake sulkies and improvements of the present day. He was owned in his early racing days by Dr. Taylor, of Hampton, N. B., who placed him in the hands of Chas. W. Bell, the veteran St. John Driver. In his latter days he was sold to A. H. Learmont for John Fraser, Truro, who used him for a driving horse, and well cared for him in his old days. He retained his speed almost to the last, and his death, to use a common expression, was due to heart failure.

FARM TOPICS

Pumpkins are Valuable

Since corn harvesters have been introduced the growing of pumpkins in the corn fields has ceased and it seems that few farmers have thought it worth while to grow the pumpkins separately, although they know if they consider the subject, that it will pay to do so. Pumpkins grow by themselves under favorable conditions will yield large returns per acre. The hills should be about eight feet apart and the soil light, loamy, well manured and thoroughly cultivated. If the season is right one may expect eighteen to twenty tons per acre. A little manure under the hills or a mulch about the hills will usually help to increase the yield.

With crops running from fifteen to twenty tons per acre it is quite possible to produce the pumpkins for from \$1.50 to \$2 a ton. It is, therefore, a cheap way of an excellent food for dairy cows and for swine. It is in the fall that pumpkins are so valuable for feeding purposes, more valuable, perhaps, than any other similar feed available at that season of the year.

It is advisable who have available soils to try a plot of pumpkins this season. The ground should be thoroughly manured, plowed, harrowed, etc., before it is marked and planted. Some manure should be placed in the hills. The cost for land rent, fertilizers, labor, etc., ought not to be more than \$30 an acre, while the yield should run very close to twenty tons. This makes a cheap food when mixed with grain, meal, etc., either for milk cows or swine that are being fitted for market.

Combating Poultry Lice

No more trying to combat the young poultry-keeper than the freeing of his poultry houses and stock from lice, mites and other parasites. There are always two points of attack: (1) the birds themselves, and (2) the houses, nest boxes, perches, etc.

A powder for dusting the birds may be made as follows: Three parts gasoline, one part crude carbolic acid, 90 to 95 per cent. strength; or three parts of gasoline, one part cresol. Mix these together and add gradually by stirring enough plaster of Paris to take up all the moisture. It usually takes about four quarts of plaster of Paris to one quart of the liquid.

For a spray or paint for the nest boxes, walls, perches, etc., of the poultry houses, use three parts kerosene, one part crude carbolic acid, 90 to 95 per cent. strength. Stir this and apply with a spray pump or a brush. If the crude carbolic acid of the required strength cannot be obtained substitute cresol. Always wash out the houses thoroughly, if possible, with hot water and carbolic soap before applying the spray.

Argentina's Hard Times

(From the Springfield Republican.)
There appears to have come a break in the great prosperity of Argentina, because the cattle men and farmers in that Republic have suffered from a severe drought. The crops are said to be far below the average, and the farmers have no longer use for the large forces of laborers they hitherto employed. The prolonged dry weather has made the prices of fruits and vegetables extremely high in the City of Buenos Ayres, and milk has advanced to about 16 cents per quart. Bankers and business men there are anxious over the outlook between now and the crop next season. The prosperous times of the last five years have drawn many thousands of Italian and Spanish laborers in Argentina, and with the lessened demand for their work great numbers of them are returning to their native countries.

The Cost of Horse Labor

The investigations carried on for six years in three districts in Minnesota show that the horses on these farms

worked an average of 312 hours on every week day of the year. No Sunday work was counted. The average total number of horses on these farms during the six years was 428. The cost of maintaining them varied somewhat in the different localities. At one point the work horses cost on an average of \$64.96 per year, at another \$54.42, and at another \$42.75. This represents the cost of grain and hay only. No labor, straw or pasture was charged in this. Prices for grain were those ruling in local markets, less the cost of hauling it to market.

VALUE OF STOCK FEEDS

A Suggested Tonic for Horses

There are a great many stock feeds advertised, and if the horse is out of health I will not say that some of them are not good. But one fault in the exorbitant prices. An analysis of these feeds goes to show that they are made up for the most part of very cheap materials, bran and shorts and a little bit of oil meal for the most part, and yet they want ten to fifteen cents a pound. There is, of course, some somewhat more expensive material used. One feed among those examined was composed of 10 per cent. of charcoal, 10 per cent. of common salt, a small amount of oil meal, bran and shorts, and, of course, some aromatic drugs. I suppose about 99 per cent. of the weight of these feeds is made up of very cheap materials that cost about a cent a pound on the average, or less, and you know the figures that are charged. Where one has horses which are a little off they feel an excellent mixture to give them is prepared as follows: 5 pounds of cornmeal, 5 pounds of oats and 5 pounds of bran mixed together, with 1 pound of oil meal; and to this add 4 or 5 ounces of salt, a dessertspoonful of powdered gentian, and a small amount of dried powdered sulphate of iron. These all mixed together and fed for a few days at the rate of 3 pounds a day serve the purpose of a tonic, and do just as much good as the most expensive stock feeds that I have tried, and are very very much cheaper. I do not recommend feeding the preparation I have described for any great length of time. I do not believe in drugs at all for a length of time, but if your horse is a little out of order it is as good a tonic as I know.—*J. H. Griswold, in his evidence on feeding horses, before the Agricultural Committee, Canadian House of Commons.*

Keeping a Cow Clean

Editor Weekly Globe and Canada Farmer: Some weeks ago you published a good article on "Clean Milk." Permit me to describe the best plan I ever saw or heard of for keeping a cow clean. I saw it in an agricultural paper several years ago, and now pass it on. Have your stable floor almost level, inclining toward the outer end of the stall, of course. Let the stall be just wide enough for the cow to lie down in with comfort. Build a rack for her slanting upward an inch toward the cow; with a low box for food, and, across the stall under the rack, leaving plenty of room for the cow's head between the rack and the box. Then fasten a two by four inch scumming on its edge across the stall on the floor, from 5 feet to 5 feet 6 inches from the box, according to the size of the cow. When eating lay her hind feet well outside; when eating roots inside the scumming. Keep plenty of scumming inside the stall, and the cow will always have a clean bed.

Varnish	Copper Paint
Stains	Waggon Paint
Bath Tub Enamel	Carriage Paint

Investigate Before You Buy
In these days of sharp competition, it is well to know that you get what you pay for. There are so many brands of house paints on the market, now-a-days, advertised as "pure" (but little better than "dope"), that a man ought to investigate what he intends to buy.

We suggest to those about to paint to make a practical test, and convince themselves. Buy a small can of the Martin-Senour 100 per cent. Pure Paint and one of any other brand with which you may have been favorably impressed, selecting about the same colors, and paint a few feet. Carefully measure the paint, so that you use no more of one than the other. Thus with the conditions the same, you can determine for yourself which paint has the better body or covering capacity; which is the easier brushing out and has the better finish. If you do not decide in favor of the Martin-Senour 100 per cent. Pure Paint, our agent will return the money you paid for the can of Martin-Senour 100 per cent. Pure Paint used in the experiment, and we will credit the same to him.

GUARANTEE

We Guarantee the MARTIN-SENOUR 100 per cent. PURE PAINT (except a few dark shades that cannot be prepared from lead and zinc), to be made from pure carbonate of lead, pure oxide of zinc, with coloring matter in proportionate quantities necessary to make their respective shades and tints, with pure linseed oil and turpentine dryer, and to be entirely free from water, benzine, whiting and adulterations, and sold subject to chemical analysis.

H. McGRATTAN & SONS SOLE AGENTS

LAMBERT'S COVE

Mr. Crabtree of Baillie preached in the Baptist church on Monday evening. Mrs. Howard Lambert visited her mother Mrs. George English on Sunday.
The Sewing Circle spent a very pleasant evening at the home of Mrs. Herbert Stuart Tuesday evening.
George English sr. is on the sick list. Mr. and Mrs. Lyman Chambers spent Sunday here.
Mrs. Edgar Butler and sons Russel and Ira have been visiting her mother the past week.

BEAVER HARBOR

Edward Justason has gone to Eastport to spend the summer.
Herace Cross has been employed at St. Andrews and is moving his family there for the summer.
The annual convention of the Sunday schools of the Parish of Pennfield was held here on Sunday last. Rev. Mr. Ross, field Secretary, and Mr. Farnham, County President were present.
At the morning session, the business matters of the parish were transacted with, Elias Bates acting as chairman. Then followed an interesting address by Rev. Mr. Ross from the text "Train up a child, etc."
At the afternoon session Mr. Farnham conducted the Sunday school. This was followed by a paper "Obligations" by Mr. A. C. Poole, afterward a Round Table Conference led by Mr. Ross.
At the evening session, a half hour song service was followed by addresses by Mr. Ross and Mr. Farnham. The

choir rendered some beautiful selections at each session. The weather was not favorable but the convention was helpful and interesting and well attended.
Mr. and Mrs. Harry Barry are rejoicing over twin girls.
Miss Pettie Parber returned home from St. John on Wednesday.
Basil Paul and Victor Sparks made a business trip to Eastport Monday.
Mrs. John Snider is spending a few weeks with her daughter Mrs. Harry Barry.
Melburne Bates is the guest of his brother George at Eastport.
Hantford Dakin of Gaspé, Que. has returned to his home after spending a few days with his brother S. L. Dakin. His many friends were pleased to welcome him after absence of 22 years.
John Best is seriously ill with heart trouble. The others who were sick are improving.

LORD'S COVE

The death occurred here on Thursday of John Stuart, after a long illness. Deceased was a native of this place.
Wm. Mitchell an aged resident of this place is very ill with pneumonia.
The death of Jas. Lord occurred at his home in Eastport on Tuesday last. He was a native of this place and his remains were brought here and placed in the tomb.
Evelyn Lord called on Mrs. C. Stuart recently.
Mr. and Mrs. M. Stuart called on Mr. and Mrs. Kenneth Stuart of Butler's Point Monday.
Rev. Mr. Mason called on friends in Stuart Town recently.

We are sorry to report a large number of our people on the sick list but hope all will be improving by our next time of writing.
Miss Roberta Hill of Calais called on friends here recently.
Herring have been reported among the weirs here.
Mrs. A. Stuart called on Mrs. J. J. Stuart recently.
Chester Lord is visiting friends here.
Matthew Mitchell has purchased a new dingy from Alonzo Stuart.
Mrs. Wesley Lambert was the guest of her brother Melvin Eaton of Northern Harbor recently.
Miss Tressa Stuart called on Nellie Pendleton recently.
Mrs. George English is visiting her mother Mrs. G. Lambert.
Quite a number of people went to Richardsonville on Thursday to be present at the launching of the new boat built by G. E. Richardson. About 25 people were launched on her deck.

A Moth Preventive.

The season will soon be with us when winter clothing, woollens and furs must be stored, and this is recommended, says The Commoner, for their protection. A cedar chest is the best, but if you have no cedar chest, and have access to cedar trees, try this: Sun, brush, heat and shake well everything that cannot be washed. See that all grease and all spots are removed, as moths love grease spots. Wash cleanly and carefully all washable articles, to remove all dirt, and have these perfectly dry. Strip from the cedar trees the young twigs and green pickles called leaves, put them in

A CHANCE TO SAVE MONEY

You can save money by buying at
CONNORS BROS., Ltd.

We have a full stock of men's and boy's Suits, Overcoats and Reefers which we are selling at a great reduction in order to make room for Spring goods.

We also have a stock of high grade furs which we are offering below cost.

Also have a supply of Ladies wear, Waists, Dress Goods, etc. and will take your measure for suits and have them made to your order.

J. McGowan is on the sick list.
Brown Bros & Co are making a good success of the clam business.
Mrs. John Snider was called to Beaver Harbor by the illness of her daughter Mrs. Harry Barry.
We are sorry to report that Mrs. Wm. Lomax is still on the sick list.
Misses Florence and Bessie Thompson of Dipper Harbor called on friends here Sunday.
Mrs. Charlie Brown of this place was the guest of Mrs. B. Brown of Little Lepreau Saturday afternoon.
Miss Myrtle Cawley spent Sunday afternoon and evening at the home of Miss Alice Snider.

THE WORLD LOOKS DARK To the Dyspeptic. How to Make it Bright.

Father Morrissey, the learned priest, once realized that many of the difficulties and troubles of this world are due to indigestion. He believed that to get proper mental and spiritual attitude, a good digestive apparatus is very helpful. The good Father therefore gave us a study to the important question of indigestion.
His famous prescription, "No. 11," dyspepsia and indigestion, consists of little tablets cleverly compounded from materials in Nature's laboratory. Each tablet will perfectly digest a full meal of 1 1/2 pounds of food.
"Father Morrissey's No. 11" has been a great ease and continued health to thousands of sufferers who had previously tried other remedies in vain. It instantly relieves and in due time restores the stomach to full vigor.
If you suffer at times or regularly from a sick, sour, dyspeptic stomach, try No. 11, and see how quickly you can again enjoy hearty meals, and how bright the world looks once more.
In convenient flat boxes at 50c. each. Get a box from your dealer, or from Father Morrissey Medicine Co., Ltd., Montreal, Que.

MACES BAY

Kings Own Lodge, No. 140 met in R. T. Mawhinney's hall on Saturday evening.
John Corcalden called on friends here Sunday.
Mrs. David Mawhinney and Wm. H. Magowan were guests of Mr. and Mrs. John Corcalden Sunday.
Miss Edna Craft was the guest of Miss Clara Hope of Little Lepreau Saturday last.
Misses Hattie Craft and Georgie Wenn were guests of Miss Florence Lomax of Little Lepreau last week.
Miss Myrtle Cawley was the guest of Mrs. Wilson Snider of Little Lepreau on Saturday afternoon.

UPPER LETANG.

Misses Goodell of Eastport have been visiting their aunt Mrs. Robert Steen.
Henry and Price Hart are busy this week mending their logs.
D. McLaughlin was in St. George Saturday.
Raymond Matthews was in St. George Tuesday morning.
Robert Steen visited friends in Letete and Mascarene Saturday.
Melvin Holland spent a few days of last week at his home in St. George.
Mrs. R. Burgess called on Mrs. John Patterson Friday.
Raymond Matthews called on Kenneth Patterson Friday.
Gilbert Tucker was a visitor here for a few days last week.
Mrs. Robert Steen called on Mrs. J. Patterson one day last week.
Arthur Blackmore called on Robert Steen Sunday.
Robt. Steen spent Sunday morning with Roscoe Burgess.

GREETINGS PURCHASES, SALES AND EXCHANGE AGENCY

Personals

Miss Margaret McLaughlin is home for the Easter holidays.

Ira McConnell, L'Etang, was in town Wednesday, en route to St. John.

Mrs. Daniel Cameron, who has been visiting her daughter at St. Stephen, returned home this week.

Miss Alma Coffey, of the N. B. Telegraph Central, is visiting friends at St. John for Easter.

Miss Ethel Spinney who has been at Bridgeport, Conn., for the winter, returned home on Wednesday.

Mrs. Harvard of Mascarene, was in town on Thursday.

Mrs. Duncan Campbell, of Second Falls, was in town Thursday.

Miss Edith Gillmor, of Bonny River, is the guest of Mrs. F. Hibbard this week.

Miss Annie Carran who underwent an operation at the St. Stephen Hospital, is reported as rapidly improving.

H. H. Grass was doing some telegraph work at Lepreau Tuesday and Wednesday of this week.

Mr. Lambert of Lords Cove, who came here on Wednesday morning by motor boat, for his son's marriage left again about 4.30 p. m. accompanied by his wife and their friend Mrs. Richardson.

Miss Jessie Catherine, who has been visiting friends at St. John was the guest of Miss Edna O'Brien Wednesday and Thursday this week.

Miss Francis Murphy now of St. John and the Misses Hazel Stuart and Helen Greason, Normal School students, are expected home today for Easter.

Mrs. John Mooney is on the sick list at time of writing.

H. H. Goodnow, Boston, accompanied by his friend Fred T. O'gon of the same city, was in town for a few days this week, leaving again on Thursday afternoon's train via St. John.

E. G. Murphy, managing director of the St. George Pulp & Paper Co. has been here during the week, on Tuesday he went to St. John on business and is expected back to-day and will likely leave to-morrow (Saturday) for his home Norwalk, Conn.

Miss Knight teacher, left on Wednesday for her home at Moncton for the Easter holidays being called away a day earlier to attend the funeral of her nephew. The other teachers Miss Sweeney, of St. John and Miss Moore of St. John left on Thursday for their homes for the vacation.

Arrivals at Victoria Hotel during the week were: J. T. MacLaren, St. John; T. Gordon Bove, St. John; T. Arsenell, St. John; L. V. Price, St. John; S. J. McConn, Montreal; E. A. Mullen, New Castle; J. D. Munroe, Marion; E. G. Murphy, Norwalk; F. E. Lambert, Lords Cove; W. M. Humphrey, Moncton; F. W. Davis, Truro; A. W. Jonah, Sussex; N. Hutchinson, Sussex; W. S. McLean, Letete; Fred T. O'gon, Boston; Harry H. Goodnow, Boston; W. G. Rine, Boston; W. Dorey, Woolstock; C. C. Rann, Clinton; George Boyd, Pennfield.

MASCARENE

Miss Clara Boyd spent Sunday with Annie Stewart.

Miss Annie and Flora Stewart spent Tuesday in Letete with their sister Mrs. Beryl Matthews.

Frank Lehan and Kin Stewart are building weeds with George McVicar.

Nelson Dick and John Catherine are busy rafting logs.

We are glad to see Menzie Chambers out after being confined to the house the past week with a sprained ankle.

Robert Holmes of Letete called on friends recently.

Mr. and Mrs. Wilson Wentworth of Letete passed through Mascarene Tuesday on their way home after attending the Sunday school convention at Second Falls.

Mr. and Mrs. Arthur Hemler on and little grandson spent Tuesday with friends in St. George.

Miss Delia McVicar very pleasantly entertained a number of young folks Friday evening, the time was spent in music and games. At a late hour refreshments were served.

On Tuesday afternoon a chopping was held at the home of John McKenzie. In the evening the young ladies were invited and all enjoyed games and dancing. At midnight refreshments were served, after which the happy party broke up, all voting it a dandy time.

SEELYE'S COVE

Mrs. Jas Butler of Eastport is spending the week with Mrs. J. Bright.

Miss A. G. Ellsworth arrived home from St. John Monday morning, called by the death of her grandmother Mrs. A. Ellsworth.

Messrs S. McKay and G. Boyd and Misses Lizzie Murray and Jean Holt of Pennfield Ridge were guests of Mr. and Mrs. John Carter last Friday evening, music and games were enjoyed.

Mrs. Benj. Carter spent Friday afternoon with Mrs. H. D. French.

Jack Lovitt who has been away to sea for the past few months has returned to his home here.

Sgt. W. L. Per. Capt. Harkins was in the cove over Sunday.

Mr. and Mrs. J. Carter and niece Miss Marion Carter were guests Mr. and Mrs. D. Boyd of Pennfield on Sunday.

A. Ward was in St. George on Saturday last.

The death of Mrs. Annie Ellsworth which occurred on April 4th at the home of her son Thomas Ellsworth at Seelye's Cove was one who was sincerely loved by a wide circle of friends. Deceased was about eighty years old and for over 60 years had lived at this place. Mrs. Ellsworth was feeling in good spirits until Saturday last and her death on Sunday came as a decided shock to her family and friends. She is survived by her son, Thomas, and two brothers-in-law, Thos. Rafter both of Eastport, two grand children and a step son James Ellsworth of Portland. The funeral service was conducted by Rev. J. Curran and the remains were laid to rest in the Catholic cemetery at St. George on April 7th.

"If you were to live abroad, where would you settle?"

"In Sicily on account of the nice people there."

"What makes you think there are any nice people in Sicily?"

"The other sort have all emigrated to America."—Toledo Blade.

(Providence Journal.)

The four hundred women in Cornell University have won fifteen of the twenty-seven Phi Beta Kappa keys given for proficiency in studies. The remarkable fact about this announcement is that there are five thousand students, all told, at Cornell. How does it happen that more than one half of the scholarship "orphans" have been captured by the women? One reason undoubtedly is that the men have more outside interests; in other words they do not put so much time on their lessons. Present-day custom, in spite of the "new woman," still inclines a girl to spend more of her time indoors than a boy is willing to spend; and on the average she probably takes her college tasks more seriously. Whether she is as good as her brother student at applying the principles she learns in her books is a question. She may excel him at mastering a lesson by rote, while he, with less preparations, may grasp more of its essential significance.

Peat Supply of Canada

Official Report Defines Great Possibilities.

Ottawa, Apr. 4.—Government statistics on the peat supply say: The Provinces of Ontario and Quebec send \$20,000,000 a year to the United States for coal. The development of some of our extensive peat bogs will help to keep some of this money at home and to furnish additional employment to Canadians in Canada.

Canada has 37,000 square miles (23,000,000 acres) of known peat bogs, but these form probably but a small fraction of the total constituting a potential national asset of enormous value.

Some idea of the possibilities may be gained from the estimate that 28 acres of peat nine feet deep, should yield 50,000 tons, enough to supply 100 families for twenty-five years, allowing twenty tons per annum to each family, or enough to furnish a power plant of 100 horse-power using steam engines, with fuel for more than 25 years of 500 ten-hour days, allowing 12 pounds of fuel per horse-power hour developed. The fuel, if used in a suitable gas producer, would last the same plant about 100 years.

Curious Sights of a Chinese City

A writer in the Shanghai Mirror tells of a day spent in exploring the curious old city of Canton.

First, says the writer, we went to a dark, dingy passage known in China as a street, which almost every shop worked and sold only ivory. Here we saw the most beautiful things, ranging from carved tusks at \$50 a piece to napkin rings for a dollar, which would have cost five times as much in America.

Our guide next took us to the Kingfisher's feather shops. This work which is very beautiful, consists of inlaying pieces of silver with the feather cut in most minute pieces. It requires a most steady hand as the pieces of feather can not be seen with the naked eye, they are cut so small. For this work a kind of microscope used by watch makers is necessary.

It is quite common to find children of from 9 years working at this feather and silver industry. We were told by the guide that these people so engaged become blind after ten years or so at this work.

We next paid a visit to the jade stone shops. These are all in one street as far as we could see and all do cutting and grinding. The stone seems very hard to cut. We saw one workman holding a piece of jade for quite ten minutes on the cutting stone (a small grindstone with a sharp edge) and after all this had made only a very slight impression. This stone is very costly.

When we left the jade shops we took a look at the sandalwood ones, which also seemed to be confined to one street. The work here is very much like the ivory work, the articles being very similar, fans, boxes, etc. the pattern in carving being exactly alike.

Next we visited the silk piece goods. The work here seems out of

place in conjunction with silk piece goods, but one cannot tell them anything better, with their muddy floors and plank beds placed in the same room with the machine for weaving, which takes up the majority of the one roomed hut.

"We arrived when the work was in full swing. One man passing the shuttle backward and forward and all talking and singing to each other, one little boy up at the top of the machine manipulating a kind of stringed instrument that forms the design in the cloth, there being about a hundred strings to this arrangement, yet the small fellow can talk to you, and very seldom looks at the strings he pulls, yet seldom makes a mistake. Four persons seem to work at one machine.

We left these hard working natives to go a little further and come to the glass bangle huts. These are even poorer than the silk piece goods huts. The bangles are made by melting colored glass over a charcoal fire of great heat, the glass being held just inside the furnace when on the point of running it is turned around on the rod as an opium smoker cooks opium.

This is done without any glass falling into the furnace, and requires much practice, as the worker has to work behind a screen in which a small hole is pierced. This is to protect him from the heat.

When the glass is in a fit state it is quickly withdrawn and held up above a revolving fireclay barrel turned on a stick held in the workman's left hand, the glass dropping from the rod in a long thread on to the barrel, which makes one circuit, joining the two ends as cut off short and the bangle is formed on a fireclay barrel and after cooling is taken off and filed down and made fast to carrels in pairs and exported to all parts of China.—New York Sun.

Growing Up.

I'm growing very big and tall.

Almost to mother's shoulder;

And though there's lot of things I like

In getting to be older.

My legs and arms have grown so long

That father laughs, and Bobby

Just grins and says, "Oh, Gee, you line,

Your knees are awful knobby!"

And uncle calls me spindly-shanks

And Polly-Doodle-Dee,

And says, "My child, be thankful that

Your lovely legs aren't branched.

It's nice to reach high looks an't things,

If anybody pleases.

But I do wish my family

Weren't all such horrid cases

I don't know where to put myself

When mother tries to hold me;

Of course she's always letting down

My skirts and sleeves to hide me

But, then, I wish my bones would wait

Till I grow up inside me.—Edna Kingsley Wallace, in The Century.

Why Is the Sea Salt?

Sea water contains about three and a half per cent. of sodium chloride and other salts. The evaporation of all the oceans would leave a mass of salt sufficient to cover the entire globe to the depth of two hundred feet, and equal to the bulk, above sea level of one-fourth that of the whole earth.

The theory that this enormous quantity of salt has been dissolved from continental rocks, and carried down to the sea by streams, is not tenable, because the salt found in solution in river water contains eighty per cent. of carbonate of lime and only seven per cent. of chlorides, while common salt or sodium chloride constitutes eighty-nine per cent. of the salts of sea water. Then the evaporation of inland seas, which has taken place in Central Asia, has left saline deposits very different in composition from the salts of the ocean.

It appears therefore, that salinity must be regarded as an original property of the ocean. Success has advanced the theory that the salts now found in the sea have been ejected by volcanoes in early stages of the earth's formation. Even now every eruption increases the quantity of water vapor, carbonic acid, and compounds of chlorine and sulphur in the atmosphere, and these substances ultimately find their way to the ocean. After every eruption of Vesuvius, the crater is covered with a gleaming white

Afraid of Ghosts

Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terror it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink.

The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a sallow cheek, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. It increases the vital power, cleanses the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. "Golden Medical Discovery" contains no alcohol, and is a health-forming drug. All its ingredients printed on its wrapper. It is not a secret nostrum but a medicine of known composition and with a record of 42 years of error. A perfect substitute—there is nothing "just as good." Ask your doctor.

layer of common salt, and the volcanoes of South America eject enormous quantities of hydrochloric acid.

DIPPER HARBOR WEST.

Jas Kerrigan of South Musquash spent Sunday with his sister Mrs. Daniel Murray.

Mrs. Harry Can an 14 daughter Hlene of St. John are spending a few days with friends and relatives here.

The many friends of Peter Bove are glad to hear he is rapidly improving after having an operation performed for abscess of the ear by Dr. J. M. Barry and McIntosh of St. John.

Miss Emma Cambell of Eastport is visiting Miss Myrtle Jones.

Mr. Reid of Lorneville is doing some carpenter work on Edward Thompson's new house.

Win Harkins made a flying trip to St. John last week.

Mrs. Carr, Mrs. Frank Frauley, Mrs. Donahoe, Henry Divine, Roy James and James O'donnell were passengers from St. John Saturday on Stmr. Connors Bros.

Mrs. Daniel Murray and brother Jas. Kerrigan spent Saturday evening with Mr. and Mrs. Daniel Cassidy of Maces Bay.

Isaac Abbot of Chance Harbor who is seriously ill is slowly improving.

Miss Greta Milburn spent Thursday evening with Miss Annie Harkins.

Frank Cassidy sr. of Maces Bay has recently purchased a new horse.

The Stmr. Connors Bros. landed a large cargo of freight Saturday including furniture for Mrs. Donahoe and Mike Cassidy of Maces Bay.

The West Orange, N. J. Board of Health recently strongly recommended to residents that they fumigate their cellars and so kill mosquitoes lurking there before they awake from their winter's sleep to send in their Easter bill. Mrs. Thomas A. Edlin adopted the suggestion and is quite certain that her house is rid of mosquitoes. Mrs. T. H. Powers Farr followed Mrs. Edlin's example Thursday morning. There are no mosquitoes in the Farr residence, on the brow of the Orange Mountain, whose owner is President of the First National Bank of West Orange and of the West Orange Board of Education. Unluckily the fumigating lamps were placed under a wing of the house where there was no cellar, and set fire to the flooring above them. The residence, worth \$30,000, was destroyed. Recently Mr. Farr made an addition to the building which cost \$30,000.

The frigate U. S. S. Independence, nearly a century old, is about to be formally stricken from the list of naval vessels of the United States. The Navy department Friday ordered the old ship subjected to a great survey which will determine her final disposition. She was built and launched in 1814 at Charlestown, Mass. and cost \$421,810.

To Clean Matting

Matting is usually cleaned by washing lightly with salted water, using a flannel cloth. It should be wet as little as possible, and wiped dry with a soft, dry cloth. Any badly soiled spots should be first rubbed with dampened corn meal, after a gentle, but thorough, sweeping to remove all dust. A quart of salt to a pailful of water is about the proportions. The water should be cold, and the matting wet as little as may be.

If matting is sewed with strong, soft thread, making long stitching instead of tacking over-laps, there will be no ridges

Girl Bootblacks Proving Success.

St. Louis, April 7.—Mrs. E. Clawson has established a bootblack shop here, in which white girls do the shoe shining. They are Miss Katie Burke, better known as 'Billie,' and Miss Mabel Wilson. The bashfulness of men is the main obstacle to success, Mrs. Clawson said today. She got the idea of the shop from a reading newspaper account of the Korb divorce suit. Mrs. Kora L. Korb got a decree from the Rev. Arno B. Korb after she had testified that she blacked his boots. That the business is profitable is attested by the fact that Mrs. Clawson has advertised for more girl employees.

Cotton Mills in Hard Sledding

Boston, April 6.—As a result of the "hard sledding" which cotton mills in general have encountered during the past year or two, some seventeen New England mills have reduced or passed their dividends, or omitted the "extra" which has occurred with sufficient frequency to be considered a regular adjunct to the ordinary dividend.

Of the seventeen mills thirteen are located in Fall River, two are in New Bedford and the remainder outside these two major mill cities. Fall River's dividend curtailment is primarily due to the fact that when the depression in the cotton industry was first precipitated two

years ago by the extremely high price of cotton, it was the coarse goods mills which were the earliest and most severe sufferers.

On the whole it is considered doubtful if the list of seventeen mills which have already reduced dividends will be extended until this spring, though there will be additions. Many mill treasurers have pulled their mills through the past year without reducing dividend disbursements and will likely maintain present rates throughout the summer in anticipation of better conditions in the fall when lower cotton prices, a probable cessation of cotton tariff agitation and improved general business are expected to stimulate the industry.

Tax on Land

To the Editor of the Globe:

Sir—Mrs. Phillips' statement quoted in your issue of April 6, regarding the scarcity of work in St. John should cause every citizen of your beautiful situated city to make an effort at least to this. What first impressed me when I visited St. John a few days ago was the apparent ambition of every citizen to appear as poverty stricken as possible. The residences especially were plain, cheap and unpainted.

When I find a city with a splendid location for commerce and industry looking so unattractive and unprosperous, I usually look into the systems of taxation and administration for a reason, so I visited your mayor and assessor, and I found the reason all right.

I found that a large part of the site of St. John is owned by the descendants of a few early settlers, who will not sell on any terms. Much of the land is held on lease, and the tenants will not improve the buildings for that reason, and the landlords refuse to improve.

About four-fifths of our municipal revenue is raised by taxes on buildings and personal property, leaving the tax on the land—which is greatly under assessed—so light that it is easy for holders to let it lie idle, while the person who improves is at once penalized by increased taxation.

In Toronto we have what is called the "Local Improvement System," by which property owners on any street are assessed for one-half the cost of local improvements (roads, sidewalks, etc.) on a frontage basis. This makes it unprofitable for a man to hold a lot vacant long after streets and sidewalks have been laid. As a result whole sections have been built up with beautiful houses in a few years, leaving hardly a vacant lot.

Ald. Potts has figured out that a \$2.00 a foot frontage tax would provide all the revenue St. John needs.

Some such plan, by which a man would not be penalized for improving, but would be taxed for maintaining vacant lots or obsolete buildings, would soon change the whole appearance of your city.

At the beginning of the present year, Victoria, B. C., abolished all building taxes, placing all taxes on the value of the land, apart from improvements, and already, it is reported that building permits have been taken out for this year amounting to \$11,000,000, an increase of \$8,000,000 over last year.

Ald. Potts' suggestion, or any other suggestion that will encourage building and discourage holding land idle, is worthy of thought in St. John.

You can, if you will learn from the cities of Western Canada, solve the problem of unemployment in St. John and with it a large part of the problem of charity.

Yours very truly,
A. B. FARMER,
Secretary of the Tax Reform League of Ontario.

For Dad's Sake

(Ideas.)
The young man was leaning on the garden gate chatting with the object of his affections when the latter said hesitatingly: "I am going to ask a great favor of you."

"It's already granted," he said devotedly.

"A very great favor," she repeated, as if doubtful of the propriety of stating it. "You're sure that you won't think it forward of me?"

"Never," he answered; "nothing you asked could be too great a trial. Only tell me what I can do for you."

"Well," she replied, with evident reluctance, "would you mind not leaning on that gate? Father painted it this afternoon, and he will be awfully provoked if we has to do it all over again."

A politician who was making a house-to-house canvass came to a farmhouse, when he observed an elderly woman standing at the gate, and the candidate gracefully lifted his hat and politely asked: "No doubt, my dear madame, your husband is at home?"

"Yes," responded the woman.

"Might I have the pleasure of seeing him?" inquired the politician.

"He's down in the pasture burying the dog," was the reply from the individual at the gate.

"I am very sorry indeed to learn of the death of your dog," came in sympathizing tones from the candidate. "What killed him?"

"He wore himself out sarking at the candidates," said the woman.—Tit-Bits.

Those who attended the Sunday school Convention at Second Falls on Monday were Charles Watson, Mrs. W. Gliardini, Misses McLean, Helen and Wilena Maxwell.

Percy Maxwell spent Sunday with friends in Diglequash.

Misses Gertrude Armstrong and Vida Maxwell called on friends recently.

H. Sullivan of Bonny River made a riving trip here recently.

George Maxwell called on friends in Utopia Sunday.

An Admiral's View On Arbitration

London, April 10.—Admiral Sir E. P. Fremantle, writing to a correspondent here, agrees that Anglo-American arbitration will probably tend towards solidarity of political influence between the two nations, but fears that the pacifists will build on it the supposition that all war is a thing of the past.

"Supposing," he said, "that we even had an alliance, offensive and defensive, with America. The latter power has no army and could not materially help us in Europe. Even with the United States the question of an arbitration treaty is not a simple one. Would the President of the Republic submit the question of the Panama Canal or the fortification of the Panama Canal for instance, to arbitration?"

RETURNING leave St. Andrews for St. John Tuesday morning calling at Letete or Back Bay, Blacks Harbor, Beaver Harbor, and Dipper Harbor.

"Tide and Weather permitting."

MARITIME STEAMSHIP CO., Ltd. (St. John Agent)

Thorne Wharf & Warehouse Co. Manager LEWIS CONNORS Blacks Harbor, N. B.

A Kansas Cyclone

(Kansas City Star.)

A Kansas man was telling about a cyclone that swept his farm clean, leaving him only his cyclone cellar. His hearer interrupted him, "Yes," he said, "I've been waiting for that." The rancher smiled. "Took that, too," he asserted. "Drove a fence rail into one corner of the corral and struck an oil well that put me on velvet for the rest of my life."

NOTICE

A large number of our subscribers are more or less in arrears, all of whom we would ask to kindly make a prompt remittance. This is a very small matter to the individual subscriber but when multiplied by the hundreds, it is a matter of quite large dimensions to the Editor.

The date under your address will inform all of the date they are paid up to. Remember 25 p. c. discount allowed when subscriptions are paid in advance.

NOTICE OF ELECTION

Notice is hereby given that on Tuesday, April 18th, A. D. 1911,

I will hold a poll for the election of a Mayor and eight Councillors for the Town of St. George, N. B. the place of all polling shall be at the "Town Hall" and the polling will open at 10 o'clock of the forenoon and close at 4 o'clock of the afternoon.

Nominations for Mayor and Aldermen will be received by me up to Friday, the 14th of April at 6 o'clock p. m. No person who is not regularly nominated as the candidate shall be a candidate.

Posting will only take place in the event of more than one candidate being duly nominated for Mayor, and more than eight candidates for Aldermen.

DAN C. O'BRIEN

Poling Officer.

Dated at St. George, N. B. the 28th day of March, A. D. 1911

ROLLING DAM

Alfred Mitchell, J. S. Cornish and Mark McShane left for British Columbia on the 10th.

Thos. Orr of St. Andrews visited his sister Mrs. Wm. Mitchell last week.

Rev. Chas. Stirling who has been laboring in this field for a number of years will preach his farewell sermon on the 10th. The Rev. gentleman intends to make McAdam his future home.

McCann's and McGuire's mill start this week.

Mrs. Elleneth Perkins of Greenock made a visit with her brother Wm. Mitchell recently.

The ice has gone out of the Diglequash river.

Mrs. Jane Cassies who is in her 96th birthday is very low at present.

The Temperance Division held an ice cream entertainment in Bowls' hall last week which was greatly enjoyed.

John Colbert of Pomeroy Bridge has bought the McMan farm and will move into it this spring.

Our people are now very busy getting wood cut, gasoline engines and horse are a great improvement to the old fashioned methods.

The County Sunday school Convention will meet in the Presbyterian church on the 9th in the afternoon and evening.

Rev. Mr. McRy is expected here the first Sunday in May.

Spring gentle spring seems to be about on hand at last if it does not take a little backward trip to itself again, the last few days have been delightful and the town streets are driving up in fine shape, and from present appearances the folks will have an opportunity to sport their new Easter finery.

LOCALS

Bank notices on Friday and Monday so don't bring your checks to deposit on those days as it will be later in usual.

Don't forget the Bean Supper and Dinner "30-minute Dinner" on Court's ballroom of the Baseball club. Admission 25c and 50c.

The extensive plant of the Hulse-Rod Granite Co. of Red Beach, 4000 tons destroyed by fire. Loss \$25,000 with insurance of \$17,000.

The Local house finished the labor of the season and produced yesterday Thursday and the members will be showing their new home work in a very neat and interesting manner.

On account of the Easter holidays the steamer Connors Bros. will leave St. John this week on Thursday and will probably be here on Saturday. On Tuesday of this week she landed a large quantity of freight for the merchants of the town.

Collector Graham, H. M. Esq. of St. Stephen, died very suddenly last week, while waiting from his office to his dwelling accompanied by his wife. When quite near his home he suddenly fell and instantly expired, hence any assistance could be given him.

Alfred Thompson has for many of the Beach staff has received the appointment of Postmaster for St. Andrews. Mr. Thompson is a native of St. Stephen but has spent about one half of his life at St. Andrews and his wife belongs to the same town. The Greeting wishes him success in his new field of labor.

Bean Supper and Easter Dance: A number of the young ladies and young men of the town are arranging for a Bean Supper at Court's Hall on Easter Monday evening, 1911, at the Baseball club. The supper will be followed by a dance, music or which will be furnished by Moore's orchestra and a grand old time generally is expected.

The first schooner to haul pulp this season is expected here to-day but may be delayed to Saturday or Monday. This season will be somewhat different than usual as a lot of the winter output of the mill has been shipped by rail and where usually in the spring there is a little amount of trip or commence on there is now scarcely a cargo and the daily output of the mill will have to be drawn on to complete the first cargo.

Herring seem to have struck in on our shore this season in earnest, as it is some years since they were so plentiful at all the different weirs. At Blacks Harbor, Beaver Harbor and Deer Island the Canneries have started, and on the American side the season opens today the 14th and the canning will commence. Clark's at Letang will begin on Monday, so that the herring days are not counted here in the fish business.

Capt. Gaptill with his motor boat moved the Rev. Mr. Spencer's furniture and personal effects from Grand Manan, Mr. Spencer also coming with them, they arrived at Back Bay Monday evening where they remained for the night and on Tuesday morning when they got to the mouth of the river found that quite a coating of ice had formed during the night and Capt. Gaptill did not like to force his boat through it to scratch her up so he landed the furniture at Red Store from which place teams brought it here in the afternoon.

Mrs. Spencer and daughter went to St. John for a few days visit with friends, and arrived here today. Thursday, they took immediate possession of the parsonage. Services will be held in the church morning and evening today, Good Friday and in the afternoon at Pennfield, and the usual services on Easter Sunday at both churches. And on Monday the annual meeting for election of Wardens and Vestrymen and other yearly business will be held.

Late St. Stephen Bank

Courtesy—Those who were accepted first at 1911 since that time from the late St. Stephen Bank depositors in the late St. Stephen Bank have the following contribution amounting to about \$100,000 the balance of which, along with the usual business has kept Manager Tupper and staff of the Bank of New Brunswick pretty busy. The third and last contribution of shares for a and a third percent will be made May 1, and depositors, that is those having money in special interest being accounts in the old bank, will be pleased to learn that they will receive interest on 50% deposits at three and one half percent right up to that date. This will make the contribution on May 1st amount to about \$120,000.

Miss Mary Jones, from the late St. Stephen Bank, has been accepted by the late St. Stephen Bank, and is now residing at St. John.

Mrs. David Lewis of Letang, is now residing at St. John.

Miss Alice Lewis, from the late St. Stephen Bank, has been accepted by the late St. Stephen Bank, and is now residing at St. John.

Mr. and Mrs. S. W. Adams and family went recently with friends to Letang.

Lambert O'Brien, as noted in the issue the marriage of Miss Fannie Lambert of St. John and Mr. O'Brien of St. John, was celebrated at St. John on Wednesday, 7 p. m. The ceremony was performed by the Rev. E. Thorpe.

After the ceremony a dance, which was served and a couple of hours spent in conversation passing good wishes and in time when the happy couple, couple took the afternoon C. P. R. Express for St. John after a short and pleasant trip they will take up their residence at the home of the groom at Letang, where all wish them a happy and prosperous journey through life. For the ceremony the bride was beautifully attired in Cream silk Boussenoire and carried a snower bouquet of carnations, her traveling dress was grey cloth with white to match. They were accompanied by the outside guests were the groom's mother and father and their friend Mrs. P. Richardson of Richardsonville, D. I., and the other guests were the immediate relatives and friends of the family. During the waiting for the train the representative small boy came to the station, and the house was visited by three separate squads with tin pans etc. on the usual grand interest.

At the station a large number were present to see them off with copious showers of rice. The bride who was very popular with her acquaintance at this her native town and while of late she has been absent most of the time, teaching, will be much missed and all will be pleased to still have her in the county and such a short distance away.

Following is a list of the presents:

Bread and butter plates, Mrs. Fuller, Cassion top, Jessie Wilson, Towels, Mrs. E. D. Harvey, Five O'clock tea cover, Edna O'Brien, Embroidered Towels, Mrs. F. Hibbard, Jewel case, Miss Knight, Cream pitcher and sugar bowl, Mrs. A. Dobbis, Embroidered towels, Helen Clark, Embroidered towels and Gold brooch, Irene O'Brien, Fruit dish, A. M. P. Fruit Dish, Leticia Grant, Cut glass olive dish and fork, Mrs. J. O'Brien, Gold brooch with pearls, Mrs. A. C. De F. Fruit dish, Edith Wallace, Drawn work centre piece, Grace Johnson, 1 doz. silver spoons, Mr. A. J. Fraser, Silver butter knife, Edgar and Harold Fraser, Silver purse, Mrs. James Dobbis and boys, Cut glass salt set, Alma Coffey, Cut glass salt set, Miss Macosquin, Hand embroidered tea apron, Mrs. H. O'Brien, Cut glass syrup pitcher, G. C. McCallum, Silk waist pattern, Mrs. J. Kelman, Japanese Silk Handkerchief, Mrs. P. Hanson, Bon bon dish, Mrs. G. Gamble, Lace yolk, hand made, Mrs. C. Johnson, Towels, Amy Epps, Check, Mrs. T. O'Brien, Check, Mrs. G. Lambert, Groom's mother, Irish Lace label, Kate O'Brien, Gold bracelet, Mr. and Mrs. A. H. M. Hay, Buffalo, N. Y., Handkerchief Shower, at Miss Grace Johnson's, Miscellaneous shower at Mrs. Kent's.

MC2465 POOR DOCUMENT

THE GRANITE TOWN GREETINGS

You never take a chance when you buy Red Rose Tea. You know the tea will be just as you expect—that fine, rich flavor and refined even strength which never varies and always pleases.

WHITE POWER AND THE MONOPOLIES.

The Maritime Provinces have evidently a great deal to learn from Ontario respecting the conservation of water powers, and the regulation of companies operating quasi-public franchises. For years the government of Ontario has been paying an official big salary to develop among the people a proper appreciation of the importance of conserving the water powers of the province for public purposes, and to give municipalities the benefit of expert advice respecting the control of companies operating public utilities, and holding civic franchises. In this work it is estimated that the province has already expended about \$400,000.

In this Province we seem to have every inadequate appreciation of the water powers, though it should be evident to all of us that in the future the industrial progress of this Province must depend largely on the development of our water power resources. All over Canada the rivers are being harnessed to furnish the motor power of industry, and it is evident that in a short time "white coal" will supplant the mine for power purposes. The manufacturer looking about for a site for a new industry now goes to the place where electric power is cheap and abundant. He does not care about putting in a steam plant, which involves, besides the capital outlay, a heavy maintenance expense, and special conditions as to location, when he can get electric current generated by water power at a much lower price, and locate his factory without regard to the facilities for obtaining coal.

Incidentally it may be pointed out that Canada possesses in its water powers an industrial asset which is conserved and developed in accordance with the policy adopted by Ontario will soon place our manufacturers in a position not only to resist competition from out side but to invade on an extensive scale the markets of the United States. And whether or not we have free trade in natural products, the attraction of cheap power will in the near future serve to bring hundreds of industries across the border—that is if we do not hand over water powers over to private parties unreservedly, and allow them to be exploited solely for private advantage.—Transcript.

WILSONS BEACH

Miss Maud Dick of Richardson, D. I. visited friends here Saturday and Sunday.

James Johnston and son of Welchpool have been employed with Ernest Lank for the past two weeks to finish his new

vision of the amended bill that \$250,000 should be expended in three years. He wanted an expenditure of \$25,000 in two years. A compromise was finally arrived at, whereby the bill was further amended providing that the company should spend \$100,000 in two years.—Ex.

King George has lent the royal yacht Victoria and Albert to his daughter for a cruise in the Mediterranean. Queen Alexandra has a troublesome cough, which the keen north-east winds at Sandringham have aggravated, and she is going to a milder climate. Being a good sailor, she ordinarily would take the yacht at some English port, but in her weakened state her doctors advised her to avoid the chance of rough weather on the Bay of Biscay, so she will go overland to Marseilles, where she will board the yacht. King George has been so concerned about the Dowager Queen's condition he has telephoned three times a day to his sister, Princess Victoria, to learn how their mother was.

Messrs Edward Newman, Joseph Calder and John Porter, Jr. went to Prince Edward Island on Monday to engage in lobster fishing.

Scott Cupitt of Grand Manan was a recent guest of J. R. Brown.

Schr. Isma, C. L. Hicks of Nova Scotia is being loaded with fish belonging to Wm. Matthews. The fish will be sold in Yarmouth market.

W. Beale of the firm of Cornett & Beale of Eastport was here on business this week.

Capt. S. Snow and Stevens of Freeport, N. S. were here this week to take charge of their schooners, Claude B. Daley and Hazelwood which have been used for fishing purposes by parties here. Capt. Snow will also take with him a thirty foot mahogany launch built by Simon Newman.

Messrs J. Earle, traveller for I. L. Humphrey, W. H. Thompson for G. E. Barbour, and T. R. Blain for Can. Drug Co., St. John made business calls here this week.

The Sibir. Viking is again on her route again under the command of Capt. Frank Johnston, the first load of freight was discharged on Friday morning.

Capt. J. W. Matthews made a business trip to St. John Monday returning by rail Wednesday.

Synopsis of Canadian North-West Land Regulations.

Any person who is the sole head of a family or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section along side his homestead. Price \$3.00 per acre. Duties—must reside upon the homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$3.00 per acre. Duties—must reside six months in each of three years, cultivate fifty acres, erect a house worth \$300.00.

W. W. CORRY, Deputy of the Minister of the Interior.

Sealed Tenders addressed to the undersigned, and endorsed "Tender for Public Building, Fairville, N. B." will be received at this office until 4.00 P. M., on Monday, April 10, 1911, for the erection of a Public Building at Fairville, N. B.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department, on application to Mr. D. H. Waterbury, Supt. of Public Buildings, Public Works Department, St. John, N. B., and at the Post Office at Fairville, N. B.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p. c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for, if the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

R. C. DESROCHERS, Secretary.

Department of Public Works,

Ottawa, March 15, 1911.

among the famous jewels that comprise the regalia of the British Empire. The Archbishop of Canterbury placed on the crown that King George will wear, although bearing the name of Edward the Confessor, is also an upstart whose history goes no farther back than the reign of Charles II. The old crown and all the regalia that Cromwell could get hold of was broken up and defaced, and then sold for a song. Some of the jewels were recovered after the Restoration, notably the ruby given to the Black Prince by the King of Castile and worn by Henry V at the Battle of Agincourt. Another famous jewel in the crown is the sapphire of Edward the Confessor. It is said, will miraculously cure cramps and "king's evil."

The most cherished of all the crown jewels is undoubtedly the ring of Edward the Confessor. It is a table ruby, set in a gold band, and renowned for each successive sovereign. At the coronation of Queen Victoria this ring was responsible for a sensation. The jewellers had made the ring to fit the little

finger of the queen's hand; but the Archbishop of Canterbury insisted on placing it on the ring finger, and the jewelers having conflicting ideas as to what constituted the "fourth finger" rescribed in the ritual. The ring fitted so tightly that the finger began immediately to swell, and the young queen showed symptoms of fainting. The ring had to be removed with the assistance of some soap and water before the ceremony was concluded. Warned by this contretemps King Edward saw to it before the coronation that jewelers and archbishops agreed that the ring finger was to be the fourth finger as far as the wedding ring of England is concerned.—Ex.

Cigarette Smoking.

More than eight billion cigarettes were made and sold in United States last year. Including those that were imported, something like a hundred cigarettes for every man, woman and child in the country were consumed.
