PRICE—TWO CENTS.

PARIS, France, April 21—Germany Has Notified the Allies That She Accepts All the Allied Conditions Respecting the Versailles Conference. This Official Announcement was Made Tonight

HONOR ROLL OF JOURNAL MEN

Policy of Reparation and Re-establishment Being Carried out in Practical Manner—Seven Returned Men Now on Staff.

The Journal believes it is entitled to state in every possible way it is carrying out the reparation and re-establishment policy which it has adopted... The public generally to adopt such a policy is so necessary if all those who went overseas and fought for the country are to be properly settled back into civilian pursuits.

Thirteen Went From Journal From the beginning of the war thirteen men, who were employed by The Journal, entered military service.

Men Who Are Back J. E. Booker, who is foreman of the mechanical department of the newspaper... Charles Schwartz, advertising solicitor, enlisted on Aug. 4th, 1914, the day that war broke out and went overseas from Valcartier Camp, as a member of the 13th Royal Highlanders.

Those Who Are Back Roy Martin, compositor, went over with the 49th battery and was transferred to the 60th. He was in the big push on the Somme last year.

Malcolm McSparran, linotype foreman, was in the Royal Flying Corps but the armistice was declared before he got overseas.

Others Who Enlisted George Kadwill, who received a decoration and Ed. Billings, are still overseas... Fred Kett enlisted with the 7th battery and has just returned.

Former Chief Clerk Dies at Ottawa Ottawa, April 20. —William C. Davis, I.S.O., former chief clerk of votes and proceedings in the House of Commons, died here Saturday after a lengthy illness.

MR. MYERS PLANS TRIP TO OLD HOME

The whirligig of time often brings curious results. Somewhat over 40 years ago one of the city's respected old residents, Mr. Anthony Myers, shortly after the conquest of Alsace and Lorraine by the German army, left his native province, Lorraine, in deep sorrow at the result of the war of 1870.

Among his projected ideas are a visit to his native land, which now to his infinite joy is no longer trod by the ruthless hoof of the Hun, whose presence in his native land 70 years ago he well remembers.

Vienna, April 22—Forces Commanded by Petlura, the Ukrainian peasant leader, have retaken Zhitomir and Proskurov and secured the adhesion of 10,000 Bolshevik troops.

Ten Thousand Reds Join Ukrainian Forces

Vienna, April 22—Forces Commanded by Petlura, the Ukrainian peasant leader, have retaken Zhitomir and Proskurov and secured the adhesion of 10,000 Bolshevik troops.

Petlura has asked the Associated Press to state that he would have to have help of the American Red Cross, in view of sanitary conditions, as his government is helpless to combat the spread of infectious diseases, which are now prevalent in Ukraine.

Vienna, April 22—It was announced at Villacoublay yesterday afternoon that Aviator Vedrines had fallen about 10:30 o'clock at a place called Le Fouillouse, near the town of Strambert-D'Albon, in the department of Drome, on the Rhone River, south of Lyons.

Toronto, Ont., April 22, 1919.—The weather is fine throughout Canada except in eastern Nova Scotia where heavy rain is falling in connection with an Atlantic storm moving northward towards Newfoundland.

THE WEATHER Toronto, Ont., April 22, 1919.—The weather is fine throughout Canada except in eastern Nova Scotia where heavy rain is falling in connection with an Atlantic storm moving northward towards Newfoundland.

IMPOSSIBLE TO KEEP OUT ALL POLITICS

Lord Shaughnessy Says as Long as Ottawa has Control of Railways Politicians Will Meddle

Montreal, April 22.—It would be impossible to keep politics out of railway administration so long as the control was at Ottawa, said Lord Shaughnessy, chairman of the board of directors of the Canadian Pacific Railway, speaking at a Canadian Club luncheon here yesterday afternoon.

Speaking ironically, Lord Shaughnessy said that Cabinet Ministers very soon become efficient railway men. He knew of green men from the western law offices and the stores of the east who, in three months could easily instruct professional transportation experts.

Australia to Have Corps of 1,400 Aviators at a Cost of \$2,500,000.

London, April 22.—A telegram from Melbourne states that the Australian Government has completed an aviation defence scheme and proposes to establish various aviation schools with squadrons of airplanes and seaplanes and with an airship section.

Hamilton Steamer Sunk Rosedale Goes Down in Collision and Crew is Landed at Barry, Eng.

Barry, England, April 22.—The American Steamer Luella, in the United States transport service, bound from St. Nazaire for New York, put in here yesterday with a crew of the British Steamer Rosedale on board.

NEWSPAPERS TO REACH CITY BEFORE 9 A.M.

New Train to be Put on by Grand Trunk on May 5th. Board of Trade Gets Results.

When interviewed by a Journal reporter this morning Mr. P. B. Yates, secretary of the Board of Trade, had the following to say regarding the agitation for an early morning mail service for St. Catharines.

POLICE NEWS A foreigner, with a name that sounded like Merichino to the thirsty mortals at the Police Court this morning appeared before the Cadi on a charge of being drunk and disorderly.

"ON THE JOB"—THAT'S ALL

Niagara Falls, Ont., April 22.—In a Niagara Falls, N.Y., theatre the other evening there was a clever bit of repartee. Pictures of the American troops in France were being shown on the screen.

Alfred Polite Could not Explain the Presence of the Photo in a Chicken Coop at the Falls

Niagara Falls, April 22.—Alfred Polite, nineteen years old, of Fairfield avenue is alleged to have dropped a picture of himself in Joseph Miller's chicken coop in Cayuga avenue on Saturday night.

Berlin Press and Foreign Office Indicate That Move Will be Wreck Versailles Congress.

Berlin, April 22.—The German peace delegation is going to Paris confidently expecting to wreck the allied peace machine.

FAVORABLE REPORTS ARE PRESENTED

Annual Vestry Meeting Held in Three Anglican Churches Last Night Large Attendance Reported at St. Thomas.

Berlin, April 22.—The German peace delegation is going to Paris confidently expecting to wreck the allied peace machine.

The new Republic has entrusted its destinies to a group of diplomats who have not changed in any way from those who directed Germany's policy during the revolution.

PEACE TREATY TO BE CABLED OVER

Paris, April 22.—Press advisers to the various peace delegations are proposing to the Council of Four that first a 250 word official summary of the Peace Treaty be cabled for simultaneous publication in America to be followed by, secondly, a 5,000-word official summary, and thirdly, the text of treaty.

RACIAL CLAUSE DEFEAT REGARDED AS SNUB BY REPRESENTATIVE JAPS

Tokio, April 22.—In an editorial commenting on the failure of the racial equality clause to secure a place in the covenant of the league of nations, the Japan Times declares that the national disappointment of Japan verges upon disaffection and affords opportunity for sensationalists to stir up anti-white prejudice.

MAN'S PICTURE GETS HIM TERM IN THE "CLINK"

Alfred Polite Could not Explain the Presence of the Photo in a Chicken Coop at the Falls

Niagara Falls, April 22.—Alfred Polite, nineteen years old, of Fairfield avenue is alleged to have dropped a picture of himself in Joseph Miller's chicken coop in Cayuga avenue on Saturday night.

A PROBLEM IN FINANCE

It, as pointed out in these columns yesterday, the Public School Board secures this year all the money it is asking for, the borrowing power of the corporation will be so limited, even with an expected increase in the assessment, that the Collegiate Institute will have to wait for two or three years to get what it needs for a new building. The futility of buying a site this year if there can be no building erected thereon for two or three years to come, is evident.

Those who understand fully the financial situation of the city will recognize, when the facts are made public as they will be later on, that the Public School Board is justified in having a progressive policy, but it is not entitled morally to demand practically all the money that the municipality can raise this year for one sole purpose, that of carrying out the who programme of the Public School trustees. No doubt these trustees will grant that the Council is in a position to know just what amounts have to be charged against the city's borrowing power and what is left after these charges are made. Granting this, the Journal fails to appreciate the definite position which the School Board has taken, for undoubtedly it will be made clear to the public when the proper time comes that there are other things that have to be provided for as well as public schools. If they are provided for it is difficult to understand how the Board hopes to finance all its programme for 1919.

The Council, in good faith committed itself to the Collegiate Board for the advancement of enough money to buy a site for a new Collegiate. This was done before the Public School Board came before the City Council for \$158,000. If the amount asked by the Public School Board is advanced there will be little use of the Collegiate Board getting a site, for the increased borrowing power that may be anticipated for next year as a result of a possible increase in assessment, will not furnish enough money to give the Collegiate Board what it would need for a new building. One or the other must be passed up, this is certain, unless the municipal powers can prevail upon the Ontario Legislature at its next session in 1920 to grant special legislation to St. Catharines under which it can issue debentures for school purposes in excess of that now possible under our limited borrowing capacity.

However the Public School Board is to be complimented on its confidence and certainty.

CLEAN UP, BRUSH UP.

St. Catharines could be, this summer, one of the prettiest cities on the continent if its occupants would make a resolution to clean it up from one end to the other. Nature has blessed it with many beauties but they are certainly not augmented by rubbish, old papers flying about, dirty front and back yards and unsightly broken down fences.

The Journal makes a request to all citizens to manifest a pride in their home city by showing what can be done to make it cleaner and healthier. The more refuse put in the box and cans and taken away to the garbage dumps, the better the health and mind of the public will be.

A few hours night and morning for a week would make St. Catharines

much more attractive than it is today. We urge every one to do something toward helping to improve the general appearance of the streets which are used in summer by hundreds of motorists from all parts of Ontario and New York State.

WHAT EXCHANGES SAY WILL VOTE RIGHT

Board Cities Star—Canada's Women have always shown a desire to support any movement that makes for a better home life. Every interest expects they will rally to the cause of temperance. Certainly they will recognize the danger that will come if Detroit and Michigan are "dry" and the border cities "wet". This community would be the oasis for the thirsty from across the river. All know what that would mean. No one relishes the thought no matter how much he may be opposed to a "dry" Ontario. Certainly Michigan tourists who desire liquor would be just as unwelcome in the border cities as they are in Toledo and other Ohio cities. Women, as guardians of home life will oppose such an affliction on our fair border community. They will have an opportunity to show it during the coming campaign.

BRITISH COLUMBIA'S PART

Victoria Daily Times—One of the vital contributing factors towards allied victory was superiority in aircraft, in type of machine, in skill and in daring. British Columbians have heard a great deal about airplanes spruce in terms of fact, which conveyed little, Mr. Pattullo told the Board of Trade, however, that British Columbia supplied enough spruce to manufacture 30,000 airplanes. Now we know how British Columbia's forests added another glorious page of history to the deeds of her gallant men and women.

THE SPIRIT OF THE ARMY

Montreal Gazette—The men of the army did their duty, and for the vast majority of them the path of duty was not the way to glory. For all too many it led but to the grave. But the spirit of all was the same, and the record of achievement belongs to them all. It is a good thing for Canada, and it will leave its mark for good upon the life of Canada, despite the effort of some to capitalize the sacrifice of these soldiers for selfish purposes.

AN IDEAL SUMMER OUTING

Algonquin Park, 200 miles north of Toronto, and 170 miles west of Ottawa, is known to thousands who have enjoyed the attractions that are offered in this wonderful Government Reserve. At an altitude of 2000 feet above sea level the air is pure and bracing. Spotted trout, salmon trout and black bass abound in the lakes and streams of this Park. The Grand Trunk operate hotels and log cabin camps in the Park. The Highland Inn on Gache Lake, Algonquin Park Station, with accommodations, for 150 people, opens for the reception of guests this year on June 14th, and Nonning Camp on Smoke Lake, with accommodation for 75 people opens on June 12th.

Indications are that there will be a large influx of summer visitors to this Park this year, and patrons are advised to communicate early and reserve their accommodation for their summer outing. Handsome illustrated descriptive literature sent free on application to C. E. Horning, D. P. A., Toronto, Ont.

WARRREN-WHITELEY

A very pretty wedding was celebrated in Bethel Church, Mull, on Monday, April 21. The contracting parties being Mr. George Warren, son of Mr. F. R. Warren of the firm of Warren Bros., manufacturers of the City of St. Catharines, Ont., and Jillian Whiteley, daughter of Captain P. B. Whiteley, 10th Concession, Harwich.

At ten o'clock, the bride entered the church on the arm of her father and took her place beside the groom at the altar. The ceremony was performed by Rev. R. W. Beveridge, the bride and groom being assisted by Miss Phyllis Whitely and Mr. George Wanless of Chatham.

The wedding march was played by Miss Lillian Johnston and a solo was rendered by Mrs. John McCallum.

The altar was artistically dressed with flowers. The popular bride was becomingly attired in white georgette with hat to match, and carried a sheaf of pink rosebuds. After a sumptuous repast at the home of the bride, Warnsworth Grange, the young couple left for Chatham to take the Grand Trunk Railway for points east.

They are followed by the good wishes of the whole community. Mr and Mrs. Warren will make their home at St. Catharines.

Unsightly pimples and blemishes on the face are sure signs that the skin and blood need the purifying and strengthening action of BEECHAM'S PILLS.

 ONLY ORCHID THAT IS OF INDUSTRIAL VALUE

The vanilla plant is the only orchid of industrial value. It is a terrestrial parasite and climbs from the ground, but once established has feeding stations on the bark all along the line. The blossoms are inconspicuous. The pods are the vanilla of the industrial world. They are from six to eight inches long, and when dried for the market are of a rich deep reddish brown. They are called vanilla beans without warrant. They contain no bean; the seeds in them are as fine as dust. The seeds are the black specks that are usually found in the finest grade of vanilla ice-cream, the best chefs preferring to grind the bean rather than to use the extract. Vanilla is found growing wild in the Bahamas, West Indies, and Central America. In Madagascar and some of the neighboring islands it has been introduced and now forms an important article of export.

Many of the woes of womanhood are due to kidney weakness. At first the back aches. Then pains gather around the hips and lodge right in the small of the back. To stoop or bend seems impossible. Headaches are constant. Unhappy existence. No pleasure in life when the body is overloaded with poisons that the sick kidneys can't filter out. Bright's disease is the next stage, but it can be prevented by using Dr. Hamilton's Pills of Mandrake and Butterbur. They cure sick kidneys and cure them permanently. When the kidneys work properly pure blood is formed. This means nourishment and strength for the whole body. Back-aches and dragging pains are forgotten. Irregularities disappear, vital energy is restored, and happy, robust health is once more established.

SICKLY WOMEN GIVEN STRENGTH, VIGOUR, SPIRITS

Dr. Hamilton's Pills for women's ills is the slogan of thousands today. Enormous benefit in many ways follow their use, and no woman or girl can get medicine that will do their general health more good. For the sake of your kidneys, for the sake of your liver, for the advancement of your general well-being, you can't improve on Dr. Hamilton's Pills, 25c. per box.

11-ACRE OIL TANK

London, April 22.—Sixty million gallons! That's the capacity of the reservoir being built at Rosyth for storage of fuel for British warships. It will cover 11 acres and a roof area of seven acres.

THE double tracking of the North Toronto Sub-division of the Canadian Pacific Railway between Leaside and North Toronto is now nearing completion, and involved the replacement of bridges (known as 0.9 and 1.3) which heretofore had been built of steel. The bridges were therefore constructed of reinforced concrete. The length of the individual spans and the details of their construction are unprecedented in the engineering world. Previous to this no reinforced concrete beam with a length of more than about 25 feet had been attempted; the spans of these two C. P. R. structures are each from 35 to 37 feet long. These spans have been made possible by the employment of unit construction by which each span was designed as two T-beams, which after being manufactured near the work, were laid side by side on the previously built reinforced concrete piers. The towers themselves are really reinforced concrete buildings constructed in the usual manner by means of wooden forms built around a steel reinforcement which was previously assembled and securely wired together. When all was in readiness the concrete was poured by means of long spouts which led in several directions from the main mixing tower. The pouring of the concrete was maintained continuously as possible until a whole tower was completed. This work was done during the winter at a time when the temperature was below freezing point; it was performed inside of what was virtually a building erected to maintain a suitable temperature around the newly deposited concrete until it was out of danger of being damaged by frost.

These two structures are provided with narrow sidewalks and hand-rails, which enable trainmen to move conveniently along side-standing traffic. The hand rails add considerably to the aesthetic appearance of the structures, which are extremely artistic in appearance and at the same time satisfactory from a general and utilitarian point of view, besides being absolutely permanent. Both are designed to carry the heaviest engines in existence with a considerable margin of safety, and are epoch-making in the art of bridge engineering inasmuch as they have demonstrated that reinforced concrete can take the place of steel for a very large number of permanent bridges.

These two structures are so solid that when passing over them on a train one gets the impression that he is on a solid fill instead of a bridge. The method employed in the erection of the reinforced concrete spans is a specially interesting feature of the structures. Each slab, as a unit,

Here are a few ways in which English is used in Japan: My well is pretty good; how is yours well. Garments made to order from your skin or mine. A notice on a board: It is forbidden to throw the stones; a man is being wounded. He was being wounded for many years.

After a sumptuous repast at the home of the bride, Warnsworth Grange, the young couple left for Chatham to take the Grand Trunk Railway for points east.

They are followed by the good wishes of the whole community. Mr and Mrs. Warren will make their home at St. Catharines.

A PROTEST

Thorold, April 18th. To the Editor of the Journal.

I was instructed by the International Brotherhood of Stationary Fire men and Oilers Local, to protest through your paper, against the rejection of Mr. Peter Grant, for the position in the St. Catharines Unemployment Bureau.

As he was the nominee of Organized labor and also endorsed unanimously by the Board of Trade we consider Mr. Grant's rejection an insult to the Trade Union movement.

Hoping to have your favor, I am, Yours truly, J. Nicol. Secy.

MAIL AIRSHIP FELL AND CREW ARE KILLED

Paris, April 20.—An airship carrying mail from Strassburg to Paris fell today near St. Didier. Two of the crew were burned to death and a third was seriously injured. The mail matter carried by the airships was destroyed.

CASH WANTED

Nova Scotia Veterans Want \$2,000 for Every Man Serving in France.

Sydney, N. S., April 22.—A demand for a gratuity of \$2000 for each man who has served in France is embodied in a resolution passed by the Sydney branch of the Great War Veterans' Association, and forwarded to other branches and to the Provincial command for endorsement before being presented to the Federal authorities at Ottawa. The resolution disparages the Dominion Government's land settlement scheme, pointing out that only a very small percentage of the returned men have any desire to become farmers, hence the demand for ready cash.

The young leaves—the tender leaves—those full of flavor and richness—are selected for Red Rose Tea. The strength, flavor and freshness of these choice, delicate leaves is fully preserved for your enjoyment by the sealed Red Rose package which keeps out odors, dust and moisture.

The Red Rose name guarantees satisfaction.

HE'S OUT ON \$10,000 BAIL

Buffalo, N. Y., (April 22)—Arthur Erement of Montreal, a former member of the Canadian Parliament, was brought here from New York yesterday to answer a charge of grand larceny for the alleged theft of \$75,000 from Michael Connelly, also of Montreal, through an alleged fake wire tapping game. Court granted an adjournment until April 29 and Erement was released on \$10,000 bail.

COMPANY SHARES PROFITS

Toledo, O., April 22.—More than 15,000 Willy's-Overland Company employees yesterday received \$40,000 in checks in the company's first distribution of the profits under the 50-50 profit sharing plan announced last January. The profit sharing is limited to employees who have been six months in continuous service.

Record In Concrete Bridge-Building

These two structures are so solid that when passing over them on a train one gets the impression that he is on a solid fill instead of a bridge. The method employed in the erection of the reinforced concrete spans is a specially interesting feature of the structures. Each slab, as a unit, weighed 55 tons, which was the limit load that could be handled by the C. P. R. 100 ton standard wrecking cranes. The crane engaged handled 20 less than 110 slabs, each 55 tons in weight, or in all something like 6,000 tons, and all this was done without a single mishap to either men or material. Another remarkable feature is that both structures were built without interruption from June, 1917, to July, 1918, which was a shorter period than would have been required to manufacture and erect similar structures in steel. Passenger and freight traffic on the C. P. R. main lines was continued without interruption during the progress of these interesting works.

Demobilization of Troops

Lieutenant-Colonel Walter Maughan.
The demobilization of the Canadian Expeditionary Force is perhaps the most important problem now confronting the Dominion Government, and the transportation of the troops from the port of landing to their home destination is a work which will require skillful handling. On reaching Canadian soil, after their hard fought battles in foreign countries, the veterans will deserve all the consideration that can be given to them.
It was therefore a wise decision on the part of the Dominion Government when they decided that the Canadian Railway War Board should appoint a committee that will make all the arrangements necessary for the transportation of the soldiers through Canada.
The War Board so constituted the committee that it is representative of the three principal Canadian railways. Ever since the beginning of the war officials of the Canadian Pacific Railway have been conspicuous as leaders in the country's patriotic efforts, and now Lieutenant-Colonel Walter Maughan, Assistant General Passenger Agent of the C. P. R., has been chosen as chairman of the committee that is to undertake the responsibility for the train transportation of the soldiers to their places of abode in Canada. Lieutenant-Colonel Maughan's long experience and his thorough knowledge of railroad affairs make him thoroughly qualified to fill the position for which he has been selected.
In March, 1932, at the age of sixteen years, Walter Maughan joined the staff of the Canadian Pacific Railway as a clerk in the Toronto office. In September of the same year he was transferred to Hamilton to act in a similar capacity. In 1935 he was again brought back to the Toronto office, and in March, 1937, he became city passenger agent in the Queen City. On November 1st, 1932, he became assistant district passenger agent in Toronto. One month later he was promoted to become assistant general passenger agent in Montreal.
Lieutenant-Colonel Maughan is representing the C. P. R. on the newly formed committee. Mr. H. H. Melanson will represent the Canadian Government Railways, and Mr. C. W. Johnston the Grand Trunk Railway.
By a co-ordination of effort it is believed that the representatives of the three big Canadian railways can so regulate railway transportation arrangements as to insure the safe and comfortable return of the Canadian soldier men to their homes. The headquarters of the committee will be in Ottawa, where the committee will be in direct touch with the Canadian Government.
A preliminary meeting of the committee was recently held in Montreal, when the Minister of Militia was represented by Colonel E. E. Clarke, Director General of Supplies and Transportation. The problem of transportation was discussed in all its phases, and the committee will have no hesitations to ensure safe transit, and feeding facilities of the highest character for the Canadian soldier men who so bravely answered to the call of duty when the country was in danger.

SUCCEEDS HIS FATHER
Quebec, April 22.—Mr. Ivan Vallee has been appointed to succeed his father, the late L. A. Vallee, as Chief Engineer and Chief Director of Railways of the Department of Public Works. Mr. Vallee has been assistant to his father.

LADIES! DARKEN YOUR GRAY HAIR
Use Grandma's Sage Tea and Sulphur Recipe and Nobody Will Know.
The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grand mother's time. She used it to keep her hair beautifully dark, glossy and attractive. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.
But brewing at home is messy and out of date. Nowadays by asking at any drug store for a bottle of Wyeth's Sage and Sulphur Compound you will get this famous old preparation improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.
A well known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two, it becomes beautifully dark and glossy.
Wyeth's Sage and Sulphur Compound is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

War to Peace

Article No. 1
Cut out for Reference.

THIS Announcement is made by the Dominion Government—made now because it feels that every Canadian wants to know, and is entitled to know, just what plans it has made to meet the problems that face the country. Only now has it been possible to finish the many plans and policies necessitated.

From day to day the Government will use this space to explain what it is doing to bring back our soldiers, to ensure the comfort of their dependents, to keep the whole nation busy and prosperous.

The problem is to take back our soldiers and war-workers into our social and business life under proper working and living conditions. It has four phases:—

1. To bring the soldiers home.
2. To fit those who have suffered overseas for useful employment.
3. To have ready for every soldier and war worker an opportunity for employment.
4. To assure for them proper living and working conditions.

The plans of the Government are such as will help solve these problems. What those plans are will be reported to you in this series of announcements.

The Canadian Ensign is waving proudly over the City Hall to-day in honor of it being the fourth anniversary of the first Battle of Ypres.

Major Chas. Vandesluy of Niagara Falls, Ont., is home after four years distinguished service for which he has received special honors. The Major, who was formerly a captain in the 44th West York Regiment, has many friends in this city and will be pleased to hear of his return and honors.

A number of the members of the public School Board were present on Saturday when the plans for the new schools were opened. It is said that the plans of the local architect, A. E. Nicholson, were favorably considered, by the members present.

Mr. R. S. Burreigh of Pittsburgh who was visiting in the city over Easter spoke to the members of the Public School Board on Saturday night on Playgrounds. Mr. Burreigh has charge of all the public play grounds of Pittsburgh as well as having under his supervision all the public school athletics. As the local board intend spending a considerable sum of money on equipment this spring Mr. Burreigh gave them an outline on what the best methods would be to install what is purchased. It is likely the board will consider the information given.

FUNERAL OF MRS. JOHN S. COLE

All that was mortal of the late Sarah Darling, beloved wife of John S. Cole, of Monmouth Road, Walker's, who passed away very peacefully on Friday last, was tenderly laid to rest in Victoria Lawn Cemetery, St. Catharines, on Monday afternoon. The funeral which was very largely attended by friends was held from the home of her parents, Mr. and Mrs. James Darling, where she was remaining a few weeks surviving a severe operation which she had had performed at the General and Marine hospital a few weeks ago. After a private service was held at the house conducted by Rev. H. L. A. Almon, the casket was removed to St. James Church, where previous to her marriage she was a valuable member. Rev. H. L. A. Almon, rector of the church officiated and gave a very comforting sermon to the sorrowing relatives who are left to mourn the loss of one who was so loved, not only by neighbors but by the entire community. He took his text from the 46th psalm, st. and 7th verses, "God in time of trouble." The choir of the church was present, and rendered two specially favourite hymns of the deceased. "Safe in the arms of Jesus" and "Nearer my God to Thee," after which the funeral procession made its way to the cemetery where the remains were placed in their last resting place. The service at the grave was under the auspices of the Prince Louise Lodge, L. T. B. No. 2, and was conducted by Mrs. William Holland, Worshipful Mistress and Mrs. A. K. Brennan, Chaplin. Those who conveyed the casket were three brothers, Robert, Richard and John Darling, one cousin, William Darling, one brother-in-law, W. A. Logan and Richard Tether. The floral tributes placed upon and around the casket were many and beautiful, bearing silent testimony of the high respect and love held for the late Mrs. Cole during her walk of life.

Mr. Bridle who is an able writer and an entertaining speaker will give an address on "The National Logging Bee."

War to Peace

Article No. 7
Cut out for Reference.

Bringing Our Soldiers' Dependents to Canada

IN England, there is a colony of Canadian women who went overseas in order to be near their husbands. There are also in England and France many women who married Canadian soldiers and have never seen Canada.

It is one of the duties that Canada has incurred through the war to bring back these dependents of our soldiers with all speed, and to help establish their home life.

Up till the time the Armistice was signed, some 22,000 women and children were returned. There still remain about 50,000 to be brought back. These 50,000 soldiers' dependents will be returned to Canada at the public expense. Those who have already arrived in Canada since November 11th, 1918, will have their ocean and railway fare refunded by the Government. The facilities for transporting soldiers and their dependents are limited to about 30,000 monthly. Therefore, women and children will be returned to Canada at the rate of about 5,000 to 7,000 each month. Many of the women will be accompanied by their husbands. On every boat carrying 200 or more unaccompanied women there is a Y.W.C.A. secretary.

At the Ports:
To these 50,000 returning women and children every care is being given. Until they reach the shores of Canada they are in charge of the Overseas Militia Department.

At HALIFAX they are welcomed by the Women's Reception Committee, composed of women who have been engaged in war activities. This committee has been organized for nearly two years and has been doing splendid work.

At ST. JOHN there is also a committee representing all the organizations interested. This committee, although more recently formed, is giving excellent service. The National Y.W.C.A. has assigned two secretaries for work at this port.

On each of these Committees there is a trained nurse to give necessary attendance.

At the ports the organizations meet every boat. Locate the women's luggage. Take charge of the babies. Bring the women to a cosy rest room. Here cots and baths are provided for the children. Hot lunch can be secured. Overnight accommodation is arranged. Women who are too sick to proceed on their journey are taken to the local hospitals. Women who are without

money receive assistance from the Patriotic Fund; are provided with lunch baskets and money to buy meals on the train. These organizations also secure the railroad tickets for the women, get their money changed, give them such information as they need. The workers accompany the women to the train. The Repatriation Committee have a nurse, trained in social work, lent by the Victorian Order of Nurses to act as the committee's representative at each port.

On the Train:
On each train carrying unaccompanied women and children there is a Red Cross nurse, experienced in social service who has been enrolled by the Canadian Association of Graduate Nurses. This nurse carries with her first aid supplies and an emergency fund of money, furnished by the Red Cross Society.

Telegrams are sent ahead to the local branch of the Patriotic Fund and to the local Reception Committees giving the number who will arrive.

On Arrival:
The Rotary Clubs of Canada have undertaken to provide motor cars to take the women and children from the station to their homes.

The Patriotic Fund have undertaken to provide temporary accommodation and other necessary assistance at cities and towns en route and at points of destination.

The main function of this nation-wide organization is to care for soldiers' dependents. It is therefore fitting that they should be responsible for arrangements for all the returning women and children.

Many other well-known organizations have been doing admirable work—meeting trains, providing rest-rooms, canteens and hostels and generally caring for the women and children. It is important that these organizations continue this work and co-operate as closely as possible with the Patriotic Fund.

GRAIN MIXTURE VALUES

Oats 34 Lbs., Barley 48 Lbs. the Best Combination.

By Opening Surface to Rain. Many Dollars May Be Made by Increased Crops—Full Directions Given Regarding Starting Early Celery.

A LARGE amount of experimental work has been conducted at the Ontario Agricultural College in testing grain mixtures both singly and in combination for the production of grain. The results of experiments indicate that there is practically no advantage in growing in combination two or more varieties of grain of the same class. Quite decided advantages, however, have been obtained from certain combinations of grain of different classes.

In an experiment which extended over a period of five years in which oats, barley, spring wheat and peas were grown separately and all the different combinations which could be obtained by having two, three and four grains in each mixture, it was found that in about ninety per cent. of the experiments the mixed grains gave a greater yield per acre than the same grains when grown separately. Of the different combinations, oats and barley came at the head of the list, giving slightly over two hundred pounds of grain per acre more than when either one was grown alone.

It is important to use in combination varieties which will grow satisfactorily together and which will mature at the same time. Such varieties as the O.A.C. No. 21 barley and the Daubeneys, Alaska or O.A.C. No. 3 oats give very good results.

Of twenty-five different mixtures with different proportions of oats and barley used for five years in experimental work it was found that the greatest returns were obtained by using one bushel, by weight, of each or a mixture of 84 pounds (34 pounds of oats and 48 pounds of barley).

—G. A. Zavitz, O. A. College, Guelph.

Open Your Surface Drains.

Drainage—either surface or underground—is essential if farming is to be profitable. With the development of ditching machinery, the depleted labour market and the increased cost of underdrainage, progress is retarded somewhat. Everything, however, has been done which prevailing conditions permit. Yet forty per cent. (40%) of Ontario is in urgent need of drainage. The underdrainage of 60 per cent. cannot be accomplished in a short period of time, hence that which renders timely service, even though only of temporary duration, must be taken care of.

Surface draining must be resorted to. Several lines will be necessary. Indeed, if the majority of farmers would leave all "finishing" furrows open in the ploughed ground and connect them by opening up cross channels through the lower-lying parts of the field—cleaning out all the furrows thus created—a system would be formed whereby the water could be carried to outlets quickly, efficiently and satisfactorily in the early spring.

Not alone to level fields or farms does this apply. Large areas of Ontario are quite rolling, hence naturally drained. Yet, a small open or deep furrow will pay for the trouble necessary to make a channel by the greater ease with which water can escape, thus permitting quicker disposal of the same, hence hastening the drying of the land.

These surface drains should be opened at least once per year. The best time to do so is in the late autumn after the fall work is done. Labour can be obtained then with less difficulty and at less cost. The work may be done by hand or by the use of a team if water does not prevent.

Surface draining, however, is not recommended to take the place of the Thos. Cooper, B.S.A., O. A. College, Guelph.

Starting Early Celery.

The starting of early celery should be done immediately as the seed is slow in germination; requiring about four weeks before ready for the first transplanting. The seed should be sown in flats in a soil very sandy in nature. This soil pressed down about ¼ an inch in the box and then the celery is sown broadcast over it. The box is then watered through burlap and is left covered with burlap or brown paper until the seed germinates. When the plants are showing two or three leaves they are transplanted into flats, 2 inches each way in soil that is sandy in nature but well-filled with good manure and commercial fertilizer, such as a nitrogenous nature. Good fertilizer is necessary at this stage so that the plants will not receive any check. The plants should be thoroughly sprayed with Bordeaux Mixture when they first break into third or true leaf, so that they will be kept free from blight, and every week after being set in the field.

Another method of use among growers is that of sowing in hot beds. The seed is planted in rows about 4 inches apart; in making these rows they take a piece of wood about an inch wide and press it down on the soil making a furrow about ¼ of an inch deep in which the seed is sown. It is then covered with burlap or paper as stated before.

Celery to germinate properly should be kept at a temperature of 70 degrees until the young plants are growing in good shape, when it is well to lower it to 55 or 60 degrees. —A. H. MacLennan, Ontario Vegetable Specialist.

Another Victory Loan for Four and a half billion of dollars was placed on the United States money market by the Government on Monday.

CO-OPERATIVE EXPERIMENTS

How to Obtain the Most Practical Kind of Information.

Kindness and Cleanliness Two Chief Points to Observe in Caring for Dairy Stock—Cow and Young Calf Should Be Separated in Not Over Three Days.

(Contributed by Ontario Department of Agriculture, Toronto.)

CO-OPERATIVE experiments have been conducted in agriculture throughout Ontario annually since 1886. Previous to the war the number of farmers conducting these experiments reached over 5,000, and in 1918 (the last year of the war) the number was slightly over 3,600. Some of the leading varieties of crops now grown in general cultivation throughout Ontario were introduced through the medium of the co-operative work, such as, for instance, the O.A.C. No. 21 barley, Marquis spring wheat, O.A.C. No. 72 oats, O.A.C. No. 3 oats, Dawson's Golden Chaff winter wheat, O.A.C. No. 61 spring rye, Canadian Beauty peas, O.A.C. No. 81 Soy beans, Rye buckwheat, Golden Mantam sweet corn, Early Amber sugar cane, Dwarf Essex rape, Irish Cobbler potatoes, Yellow Leviathan mangels, Grimm and Ontario Variegated alfalfa, etc.

The co-operative experiments enable practical farmers to obtain information regarding varieties of field crops, mixtures of grain for grain and for fodder production, ways in increasing soil fertility, etc., for their own particular farms which they cannot possibly get in any other way. They furnish hundreds and even thousands of object lessons annually, which form centres of interesting study along the lines of progressive agriculture. They enable farmers to get a supply of pure seed of the leading varieties of field crops which rapidly increase in quantity and which furnish seed for sowing and planting in large areas and for selling at good prices. The whole work leads to a substantial increase in farm profits and to a steady advance in agricultural education throughout Ontario.

The plan of the co-operative work for 1919 is printed in circular form and has already been sent to all the successful co-operative experimenters of the past few years. Other interested farmers could secure a copy of the circular by applying to the Department of Field Husbandry, Agricultural College, Guelph, Ontario.—Dr. C. A. Zavitz, Ontario Agricultural College, Guelph.

Care of Cow and Young Calf.

Kindness and cleanliness are the two chief points to observe in caring for dairy stock.

About a week before the young calf is expected, the cow should be placed in a clean, well-bedded, comfortable box-stall. The practice of compelling cows to give birth to their calves, tied in the row, is cruelty to the cows, dangerous for the calf, and bad for the whole herd. Privacy and quietness should be the rule at this time.

The cow should be allowed to lick the calf dry, and should be kept tied until the after-birth is removed. The two may be left together for one to three days. Some remove the calf at once, but if it is to be reared it should be left with the dam for a short time, in order to give the young animal a good start. Leaving cow and calf together for a day or two also tends to remove inflammation from the udder of the cow.

If necessary the cow's udder should be bathed with warm water or some form of liniment such as camphorated oil, or equal parts of turpentine and vinegar and an egg in one quart of the mixture.

In case the cow and calf are all right, they may be separated in not over three days, and the cow be returned to her regular stall. The calf may be allowed to remain in the box-stall, if not needed for another cow, or be placed in the nursery along with other calves, as this will cause it to forget its "mama" more quickly. It should receive its mother's milk for a week, whole milk for two or three weeks, then skim milk and other suitable feeds for six months, and be kept dry and clean at all times.—Prof. H. H. Dean, Ontario Agricultural College, Guelph.

Trimming and Staking Tomatoes.

This method of handling tomatoes has come into very extensive use in the past few years among the commercial market gardeners, owing to the high price of land and backyard gardens. The plants as a rule are set two feet apart each way and after planting are given one cultivation. The sticks are then set; driving them down about a foot into the ground and leaving from five to five and a half above the ground. These sticks may be made from mill edgings, saplings or anything else of a similar nature about one and a half inches square and strong enough to hold the plants when the fruit is fully grown. After driving the sticks and tying the plants to them the ground should be covered from four to six inches thick with very strawy manure, as a mulch. This mulch will keep the moisture in the ground and, at the same time, remove any necessity for cultivation and other disturbance of the roots. In growing tomatoes on the single stem, such as is used in this method, all side branches which appear where leaf stems join the main stem of the plant are removed as quickly as possible. If they are allowed to grow it will take away very valuable plant food from the growing plant. The plant should be tied every eight or twelve inches to the stake and when they have reached the top are cut off.—A. H. MacLennan, Ontario Vegetable Specialist.

A correspondent to a Hamilton paper, asserts that the skunks in the Beverly Swamp near that city were the first inventors of poison gas.

Air Mixing Necessary at Gas Burner Tip

Forecast—Wednesday, fair and milder.

The combustible constituents of natural gas are made up of combinations of the elements carbon and hydrogen. When natural gas is burned so as to secure perfect combustion only carbon, dioxide and water vapor are formed; that is, the carbon of the gas unites with the oxygen of the air forming carbon dioxide, and the hydrogen of the gas unites with the oxygen of the air forming water vapor. The water vapor, of course, will condense when cooled. This water vapor does not come from the gas, but is created and formed by the chemical action of the hydrogen in the gas and the oxygen in the air.

Each cubic foot of natural gas burned requires approximately 9½ cubic feet of air, forming 10½ cubic feet of combustion products, which are made up of 2 cubic feet of steam, 1 cubic foot of carbon dioxide and 7½ cubic feet of nitrogen, all thoroughly diffused through each other.

ALTHOUGH NATURAL GAS IS CHEAP, DO NOT WASTE IT—THE SUPPLY IS NOT EVERLASTING.

THE UNITED GAS COMPANIES, Limited.

COMPLETE DISPERSION SALE OF PUREBRED

Holstein-Friesian Cattle

ON THE FARM OF A. J. EMMETT STAMFORD TOWNSHIP

County of Welland, one mile west Niagara Falls, Portage Road, on THURSDAY, APRIL 24th, 1919. Owing to the fact that I am unable to secure competent help to keep and continue to develop my much-valued herd of pure-bred cattle, I will sell without reserve the entire herd of THIRTY-ONE HEAD, on the above date.

In announcing this sale to the public I feel confident that all the animals are of such individual breeding merits as to commend them to anyone wishing to secure foundation stock for pure-bred Holstein Cattle, or to add new blood to their herd. My aim has been to breed heavy producers as I was building up a herd to pay its way in the pail.

HERD SIRE—SIR LYONS OF CLOVER HILL, No. 25578, stands at the head of the herd. His sire is Sir Lyons Fafarit, and his Dam Niagara Maid. At five years has a 7 day record of 502.7 lbs milk and 26 lbs. butter, and yearly record of 20816 lbs. milk and 943.75 lbs. butter. His Grand Sire, Sir Lyons Hengerveld Segis, is a son of the Great King Segis, with six daughters all with records of over 31 lbs. butter in 7 days. And the well-known Cow Blanche Lyons Dekol with a 7 day record of 608.80 lbs. milk and 33.31 lbs. butter; average fat 4.38; and a 30 day record of 2723.70 lbs. milk, 134.78 lbs. butter; average fat 3.96.

TERMS—Six months' credit will be given upon furnished approved joint notes with interest at six per cent. Sale at one o'clock sharp. Conveyance will meet N. S. & W. cars at Stamford between 12 and 1 o'clock, fast time.

A. J. EMMETT, Prop., phone 35 r 6, Niagara Falls, Ont.
L. V. GARNER, Auctioneer, phone 33, Ridgeway.

THE RACING QUESTION

Government Caucus to Discuss Revival of the Sport in Canada.

Ottawa, April 22.—It is altogether likely that one of the matters to be discussed at the next general Unionist caucus, which will probably be held on Wednesday or Thursday of this week, is the question of the revival of track racing in Canada, suspended during the war. Many representations have been made to the Government in regard to the matter, and before action is taken by the Cabinet in respect to the order-in-council prohibiting betting now in force, the ministers will ascertain the views of the Government supporters in the Commons.

It is suggested that when racing is revived an arrangement should be made whereby a portion of the receipts should be taken by the Government and devoted to the encouragement of horse breeding.

Reopen Racing In France.

Paris, April 22.—Racing, the most popular sport in France is to be resumed for the first time since 1914 with a meeting at Saint-Cloud on May 8. Other meetings will be held on the courses at Maisons-Lafitte, Longchamps, Auteuil and Le Tremblay. The Chantilly track was so badly damaged by its use as a military camp that no races can be run there this year. Work of restoring other tracks is in progress. The Grand Prix de Paris, France's King's Plate, will be run at Longchamps on June 29.

OLD COUNTRY SOCCER PLAYED ON SATURDAY

London, April 21.—The results of Saturday's Old Country football games were as follows:

- Victory Cup
Chelsea 4, Crystal Palace 0.
Fulham 2, Tottenham 0.

Dundee 2, Third Lanark 1.

The first German U-boat to reach the U. S. arrived in New York on Saturday. When the people of that and adjoining cities have had a good look at her, she will be sent to the Upper Lakes to help along the Victory Loan.

GOLF NEWS

The winter season in South early in the year showed that practically all the former leaders among the women golfers can be depended upon, while several new possibilities may figure prominently in the big events in the next few months.

Miss Alexa Stirling of Atlanta, national titleholder, and Mrs. C. H. Vanderbeck of Philadelphia, champion in 1915, seem to have a bit of an edge on the rest.

Mrs. W. A. Gavin, winner of the metropolitan title in 1917 and runner up in the national in 1915, has not played since she made the tour of the country in exhibition matches last year, so no one knows just what kind of a game she has now.

Mrs. Ronald H. Barlow of Merion, demonstrated the fact that she must still be counted upon by winning the North and South title at Pinehurst recently from a field which included Mrs. J. V. Hurd, former British, Canadian and United States champion; Miss Elaine V. Rosenthal, Western champion, and other splendid players. Miss Rosenthal is not playing the same brand of golf that she did a few years ago, as she recently changed her style and is rather uncertain. It may be, however, that by the time the national event is staged at Shawness, Miss Rosenthal will show up better.

Miss Mildred Caverly, who reached the semi-final of the national in 1916, is another who will have to be reckoned with this summer.

Newcomers of Promise
Among newcomers to show great promise is Miss Sara Fownes, of Pittsburgh, who reached the final of the North and South event, where she was defeated by Mrs. Barlow. Miss Fownes met Mrs. Hurd in the semi-final, winning on a six-foot putt which was about two-thirds stymied. Miss Bessie Fenn, the Florida champion, and Miss Grenville Collett, the fifteen-year-old Providence girl who is likened to Bobby Jones, have brilliant futures.

Private Harry Slade who has been spending the past few days at his home here, returned to Toronto this morning where he is undergoing treatment at the Christie street Military Hospital.

FOR RENT—Five roomed cottage close to Lake shore, at Port Dalhousie. Pleasant surroundings. Apply Mrs. J. M. Elson, 109 Queen Street; telephone 2084. L.F.

BASEBALL

President McCaffery has notified the Brooklyn club that the services of Catcher Snyder will not be required by the Leafs. Snyder was secured from Brooklyn earlier in the season, and over a week ago was ordered to report here. He has, however, failed to put in an appearance, and President McCaffery has decided to look elsewhere for a backup to assist Manager Gibson. Snyder formerly played for London in the Canadian League, and with Bobby Heck formed one of the best batteries on the circuit. He was highly recommended by Manager Gibson.

"Tommy" Acheson, the local infielder who tried out with the Leafs last season, but was unable to continue as a member of the team owing to the draft law preventing him from entering the United States, has been tendered a contract and was at today's practice.

"Wild Bill" Donovan, the manager has named the Jersey City team of the International League "Moran's Colts." He has 24 candidates in training at President Joseph F. Moran's \$100,000 ball park. The world champion Red Sox will play an exhibition game with Moran's Colts this afternoon.

Frank Shaughnessy, manager of the Hamilton Michigan-Ontario Baseball League team, announces that he has signed Babe Dye, the Toronto athlete. Dye is a good rugby and hockey player, as well as a baseball player. He should make good with the Hams.

Johnny Evers is promoting a semi-professional baseball league with teams representing Troy, Albany, Schenectady, Syracuse, Utica and Auburn. The project is original with Evers, and in a statement he was very optimistic of the outcome of a meeting on Thursday.

"Babe" Ruth, of the Boston Americans, in six successive times at bat, four in Thursday's exhibition with the Baltimore International, and two in Friday's game, scored six home runs, breaking the home-run record.

Ed. Roush, star outfielder of the Cincinnati Nationals, who has been holding out for a salary of \$10,000 a year, has signed a contract to play with the Reds this season. The terms have not been made public, but it is said Roush accepted the terms offered him by President Herrmann.

Eddie Murphy, the last of the Chicago American League Club's hold-outs, has signed his contract and will report for duty at once.
Benny Gilbert, a pitcher who was with the Philadelphia National League for part of the 1917 season, has accepted terms with London.

"Dots" Miller to "Muster Out." New York, April 22.—John B. (Dots) Miller, second baseman, who left the St. Louis-National League club to enlist in the Marines returned yesterday as casualty on the cruiser Charleston. He said he was being sent down to Quantico to be mustered out and would not be with his team for the opening game in Chicago on April 27.

Kennedy Back Home.
Montreal, April 22.—George Kennedy, owner and manager of the Canadian Hockey Club, returned from Seattle, Wash., after an attack of influenza. George Kennedy stated that he had completely recovered and will get down to business this week. In speaking of the trip, Kennedy said that the gloom cast over it by the death of Joe Hall took all the interest out of the sport, and that from a financial standpoint the trip was not a success.

"We played to better houses than in any previous world's series, but what was made by the Canadians was paid out for nurses and doctor's bills. On the night that the series was declared off we handed back over \$5,000, which was a great loss. George says that he has brought back some good information regarding the building of an arena, and will discuss the plans with the syndicate now looking for a site to build in the west end of the city. Bert Corbeau came back as far as

SICK--WEAK--MISERABLE THOUSANDS OF VICTIMS

Man feels bad all over—feels weak—feels nervous, irritable, gloomy—gets angry at little things that ordinarily would not be noticed. You feel tired mornings—Your sleep does not rest you. You feel nervous. You dream at night. Your memory is poor. You can't concentrate your mind. No appetite. You lose flesh—can't run down. You can't understand why.

Men! Are You In Doubt?

- At Washington— R. H. E.
- New York Nationals... 11 15 6
- Washington Americans... 9 13 2
- Batteries—Winters, Causey and McCarthy; Shaw, Matteson, Hovlik and Pitchin, Agnew.
- At Baltimore— R. H. E.
- Boston Americans... 16 16 0
- Baltimore International... 2 7 6
- Batteries—Ruth, Mays and Walters; Parrham, Lewis, Kneisch, Egan and Karn.
- At Cincinnati— R. H. E.
- Chicago Americans... 3 5 1
- Cincinnati Nationals... 1 8 2
- Batteries—Kerr and Schalk; Fisher and Allen.
- At St. Louis— R. H. E.
- St. Louis Americans... 8 6 0
- St. Louis Nationals... 1 5 4
- Batteries—Davenport and Billings; Tuero, May and Clemons.
- At Indianapolis— R. H. E.
- Pittsburg Nationals... 2 4 1
- Indianapolis American Assoc... 1 6 2
- Batteries—Cooper and Schmidt; Rogge, Dale and Schaeng.
- At Philadelphia— R. H. E.
- Philadelphia Nationals... 2 7 1
- Philadelphia Americans... 3 4 3
- Batteries—Prendergast, Faircloth and Adams; Anderson, Grevell and Perkins.

Sunday baseball results were as follows:

- At Washington— R. H. E.
- New York Nationals... 5 9 3
- Washington Americans... 3 10 3
- Batteries—Benton, Jones, Steel and E. Smith; Johnson, Craft and Pitchin, Gharrity.
- At Columbus, Ohio— R. H. E.
- Detroit Americans... 5 7 2
- Columbus American Assoc... 4 9 3
- (10 innings.)
- Batteries—Kallio, Cunningham and Ainsmith, Wilkinson, Sherman and Wagner.
- At Newark, N.J.— R. H. E.
- Newark International... 3 7 0
- New York Americans... 6 14 0
- Batteries—Sledge, Rommel and McNeil; Mogridge, Schneider, Shore and Ruel.
- At Cincinnati— R. H. E.
- Chicago Americans... 5 7 0
- Cincinnati Nationals... 3 6 1
- Batteries—Williams, Cicotte and Schalk; Eller and Rariden.
- At Baltimore— R. H. E.
- Baltimore International... 13 11 1
- Philadelphia Americans... 10 13 3
- Batteries—Newton, Haschberger and Egan, Carroll; Naylor, Watson and Perkins.
- At Indianapolis— R. H. E.
- Pittsburg Nationals... 6 7 3
- Indianapolis, Amer. Ass'n... 2 5 1
- Batteries—Mayer and Sweeney; Crum, Dawson and Gossett, Henline.
- At Evansville, Ind.— R. H. E.
- Cleveland American... 4 10 0
- Milwaukee, Amer. Ass'n... 3 6 0
- (Ten innings.)
- Batteries—Bagby, Coumbe and Nunamaker; Faeth and Huhn.

For reasons not yet fully explained many of the newspapers are predicting that the price of coal will be advanced about \$2.00 per ton, during the coming season.

NO-HIT GAME FIRST PITCHED 21 YEARS AGO

To-day is the Anniversary of the Afternoon When Highest and Breitenstein Turned the Trick.

One of the most memorable dates in baseball was 21 years ago today, when two no-hit games were pitched in the National League. Jay Highes of Baltimore, then in the National League circuit, blanked the Boston, while Theodore Breitenstein, the once great twirler, turned the same trick on the Pirates on that day. Breitenstein at that time wore a Cincinnati uniform. This was the second time in their history that the Buccaneers had been trounced without getting a hit.

There have been 61 no-hit games played in the major league, a little over half in the National League, while the others are divided between the American—not the present or-

ganization of that name, but the old major A.A.—the old Players' League. J. Lee Richmond was, so far as the records show, the first major league pitcher to turn the no-hit trick. That was in 1880, when Richmond was on the pitching staff of the Worcester club, then in the National League. Twenty seven Cleveland men faced Richmond in that game and were bowled over, Worcester winning the game 1 to 0. Richmond gained the no-hit priority, however, only by a matter of a few days, for less than a week later John M. Ward, fired with envy at the great feat of Richmond, did the same thing for Providence, with Buffalo in the role of the victim.

Old Cy Young was the first pitcher in the American League to win a no-hit game in nine innings. That was in 1904, when Denton, in a Boston uniform, shut out the Philadelphia Athletics. Addie Joss, the famous Cleveland twirler who died in 1913, was the hero of another great contest in October, 1908, when, within nine innings he prevented a single man of the Chicago White Sox from reaching the initial bag.

During a tussle with a Kingston tough, a policeman in that city dropped dead with heart failure.

TO MAKE CHICKENS LAY

To Make the Stock Pay Feed Concentrates.

Rangeage and Roots Give Bulk to the Ration, But Production Depends Upon the Grains, Mill-feeds and Oil-seeds.

Contributed by Ontario Department of Agriculture, Toronto.

Many people forget that a hen requires feeds other than grain in order to be in good health and to lay. All-grain rations are neither conducive to health or egg production. At times when hens have the run of the stables and the yards, together with house scraps, they do very well, owing to the fact that an opportunity is given them to pick up bits of clover leaves, roots, and such like material.

A certain amount of meat foods is essential in order to produce the white of the eggs. Too much of such feed is apt to cause trouble with the general digestion of the bird. Mills as a drink, without doubt, the best animal feed known. It gives the best results when sown. When birds are accustomed to it they will not take too much.

Beef scrap and high grade tankage are used very extensively on large poultry plants where milk is not available. These are mixed with ground grain, generally in the proportion of fifteen to twenty per cent. For the general purpose breeds the former amount is sufficient. Breeds such as Leghorns will make good use of twenty per cent. of meat scrap in the ration.

Cooked butchers' meat, green cut bone, cooked beef head, livers, liver, etc., are all very good feeds and may be fed in a manner similar to meat scrap.

Some people think that because a little of meat feeds are good, more would be better. Experience has shown that such is not the case. Too much often causes serious trouble.

Green feeds are essential for health and for economy. There should have all the green feed she will consume. A certain amount of bulky, succulent green feed she will consume. Such feed is usually fairly inexpensive. Where birds are not any green feed, in the course of time they become unthrifty, lay poorly and moreover, the eggs from such birds many times are very low in hatching power.

Experience has shown that oats when properly sprouted are a most excellent feed. The hens are very fond of them and the value of the oats as a feed is good. That is, the sprouted oats reduce the grain feed consumption equal to the pounds of oats sprouted and one gains the increased palatability of the oats, as well as the value from the greens.

Thin-leaved greens contain one of the very important elements of growth and health, and these are nature's protective feeds; that is they assist to maintain the birds' health or normal resistance against disease. Health is an essential part of profit. In winter we find such feed in sprouted oats, cabbage, and clover leaves.—Prof. R. W. Graham, O. A. College, Guelph.

Value of Concentrates in Ration.
A cattle feed is valuable to the extent it contains those substances which will repair body tissue, build new tissue and furnish energy to do work. The particular materials in a food which have this power are protein, the flesh-forming substance, carbohydrates and fat, the fat and energy producers and the mineral matter which has a great many functions in the body.

Any feed that carries a high percentage of protein and fat and a large amount of a digestible form of the carbohydrates is called a concentrated feed or concentrate. Thus grains, mill feeds and oil cakes are concentrates. On the other hand, feed low in these valuable constituents and high in indigestible carbohydrates, or crude fibre, as, for instance, straw, hay, corn stalks, are called roughage or bulky feeds. Roots may also be put in this class because they contain a very high percentage of water and they are for this reason bulky.

These bulky feeds have their place in the ration, indeed in the case of full-grown animals on maintenance rations, they may form the whole of the food; but it is impossible for a young animal to make rapid growth, a cow to give a large amount of milk or a horse to work hard on such feed. The hard woody fibre of the straw and hay are difficult to digest and much of the energy that should go to production of work or increase is used up in digesting the food. Consequently when production is desired the amount of roughage feed must be reduced and the concentrates increased.

Another reason why concentrates must be used is that to get the largest production we must have the animal digest and absorb the maximum amount of the various constituents which together form a food. A cow cannot long continue to furnish a large amount of casein in milk unless it gets the material from which to form it from the food. Neither can a steer make rapid growth and fatten on a food that does not furnish a large amount of the food constituents essential for growth. These cannot be supplied in the largest and best quantities except by the use of the concentrates. The coarse feeds or roughage are necessary to give bulk to the ration, but there must be an abundance of easily-digestible materials if the best results are to be obtained and this is the place of concentrates in the ration. We want some coarse feeds, even if they are poorly digested, but we also want some concentrates to supply the materials for growth and production. Furthermore within certain limits the more of the concentrates fed the greater the production.—Prof. H. Harcourt, O. A. College, Guelph.

Mr. Anson Buck, the oldest practicing physician in Ontario, died lately at his residence, Palermo, Halton County, in his 87th year.

MERRITTON

The Second Degree of Livingstone Lodge I. O. O. F., 139, will be put on tonight.

Word was received in town this morning that Private Frank Ramsay, Son of Mr. and Mrs. D. Ramsay, who has been overseas for the past three years, has returned in Halifax, and is expected home in the very near future. During Private Ramsay's experience in the firing line he was seriously wounded and was also gassed.

Mr. Frank Niles of the Bass Hospital Toronto, spent the week end the guest of his parents, Mr. and Mrs. Manford Niles, Merritt Street.

Mr. and Mrs. Mitchell, Almond Street, spent the week end very pleasantly with relatives at Fenwick.

The Easter Monday Ball held in the Town Hall, last night, under the auspices of the Merrittion Hose Company, was in every way a huge success, and a neat sum was realized which will go towards the emmorial monument fund. McKey's orchestra, composed of George

Stanardville, N.Y., April 22.—Edgar Morris, mountain clansman, who for three weeks has been hiding in the hills defying the sheriff and his deputies seeking to arrest him for the murder of Magistrate Blanford Sullivan, failed to carry out his reported threat to appear in the Greene county court yesterday, and with his clansmen shot up the court if he were indicted for the murder.

Troops guarded the courthouse and saw that order prevailed. The grand jury at once began consideration of the case.

Marjory Household, and Margaret, helped to do up their profits in Hamilton, on Saturday

ANCIENT CUSTOMS IN ACADIA

The invention of the automobile supplanted the once favourite horse-drawn coach, and now the aeroplane may, to a large extent, take the place of the automobile. But, however science progresses, there still are places where the ancient order of things endures and the people are contented following the simple customs of their ancestors. Oren may yet be seen drawing drays in that part of Nova Scotia known as the Land of Evangeline. It is quaint to see such a sight on the street of a village or town. Unlike horses, oxen have their greatest strength in their necks. The drays are yoked to the brows and horns of the animals with leather straps. Bells tinkle on their breasts as they move along. The tips of the horns are nearly always decorated with brass knobs. A pair of oxen will walk leisurely drawing a load of four tons. If you interview the driver he will tell you that they are easily trained and do their work just as well as horses, and you can use them in places where horses would be difficult to manage. They plough and draw logs with the same docile temper as they show when yoked to the drays.

There are other old customs still surviving in the Land of Evangeline, and these add to the attractiveness of one of the most picturesque, romantic and historic regions in America. Silvery bays and rivers, shores of golden sand, hills and vales covered with fragrant meadows or towering pines or fruitful apple trees, sunny skies and freshening sea and land breezes give health and pleasure to thousands of tourists every year.

Across the Bay of Fundy from St. John, New Brunswick, to Digby, Nova Scotia, is a delightful trip occupying a few hours. Approaching Digby the Bay is dotted with the craft of hardy Nova Scotian fishermen. Passing through the Gap the homes of the people, amidst the woods on either side, look so pretty that one might fancy they were the dwellings of the fairies. Digby Gap leads into Annapolis Basin, whose deep and sheltered waters cover an area of sixty square miles. The Basin is unsuited for bathing, fishing, boating, and canoeing. Good roads and walks radiate from Digby amongst enchanting scenes. There are some good hotels in this prosperous little town, and tennis, croquet and golf are amongst the games provided.

Tourists to Evangeline's Land generally make a tour of all the beauty spots of the region. Yarmouth, beside the sea, offers many allurements to the visitor. A colony of French-Canadian, whose ancestors were expelled from Grand Pre, resides in the vicinity of Yarmouth, and still retains the traditions of the Acadians. Kentville is the headquarters of the Dominion Atlantic Railway which covers the entire district. Grand Pre was the site of the village from which the Acadians were banished in 1755. The well where Evangeline was wont to go for water and the willows under which she rested are still there; Blomidon mountain and the Basin of Minas near by are just as they were of old, the meadows are green on the dykelands and the dykes keep out the sea, and a little inland the gentle hills are patched with luxurious orchards. Wolfville, the headquarters for tourists to Grand Pre, is built in the midst of one of the greatest apple growing localities in the world. The late King Edward was amongst those who visited and loved this spot. It is only a short walk from Wolfville to Grand Pre, and the marshlands extend from one place to the other.

The Dominion Atlantic Railway has purchased the "big field" where the Acadians made their village, which was their capital, and this has become a public park. A memorial cross now stands there on the site of the ancient burial ground, and a statue of Evangeline sculptured by Philippe Hebert and his son Henri, descendants of an Acadian family, will soon add the grace of art to attractions of a haunt where nature has lavished her rarest charms.

DR. ARTHUR B. COBB

Dentistry.

When Dr. Cobb's Dentistry is spoken of you hear words of praise. Money cannot buy this public endorsement—only merit can win it.

We have now favor with people by serving them skilled Dentistry at honestly regulated prices.

We have their good will by living up to our promise of painless treatment and kind, courteous attention. So—when you hear us commended by people who have received Dental treatments from us—you will understand that it is the direct result of the great satisfaction of our services.

If good reliable Dentistry is your desire, you are assured that it at our offices—at costs that are, indeed, a comfort to your purse.

Consultations and thorough examinations are granted without charge. Why not avail yourself of this good will service?

MUSIC AND DRAMA

this movement is the success of The
Boston English Opera Company with
its distinguished array of talent and its
superb chorus.

The Boston English Opera Company
with its policy of fostering American
singers, has proven a blessing to young
artists. It has cast aside all prejudice
and has opened its arms to American
singers who meet its requirements and
its requirements are, first, good voices,
secondly, good looks and appearance,
and last, but not least, intelligence.

This policy has resulted in the fore-
most artists in the English language
flocking to The Boston English Opera
Company bann'r and its roster of tal-
ent would be hard to equal in any for-
eign company.

Its chorus is composed not only of
routinized choristers but of young fresh
voices, soloists who are seeking for
experience in the greatest organiza-
tion in American history—young artists
whose ambition is to become principals.
The Company will present the cele-
brated romantic Op'ra "Martha" at
the Grand, on Wednesday, April 30.

A FINE CHOIR

In reporting the concert by the Paul-
ist Choristers The New Haven Journal-
Courier, of March 17, 1919, had the
following to say regarding this splendid
choir:

"It needed but little imagination on
the part of the great audience that list-
ened to the singing of the Paulist Chor-
isters at Woolly's Hall, to visualize the
one feature that was lacking—the per-
spective of a great cathedral with
nobly vaulted nave terminating in a
rood screen, choir and high altar of
gleaming marble with the richly col-
ored vestments of reverend prelates in
full canonicals, celebrating high mass
with glowing gospel lights, prayerful
incense and sacred chalice."

The Choir was vested in Cassock and
cotta, which lent dignity to the occasion.

The singing of these boys made a
vivid impression on the audience. Well
might their voices have belonged to the
cherubic host of the Holy City, led by
the celestial Israfil, the charming inno-
cense of their youthful faces reminding
one of the Maeterlinck sentiment that
young children retain much of a heav-
enly atmosphere of pre-existence. The
pure unemotional voices of the boys, re-
flecting the refinement and delicacy of
intelligent tuition, gave their singing a
devotional spirit especially fitting to the
many sacred numbers on the program.
The boys were ably supported by the
tenors and basses. Voices of unexcel-
lent quality and equally well trained.
The choir responded to every wish of
Father Finn, who infused into his choir
the potency of his own temperament,
swaying it at will.

FAVORABLE REPORTS (Continued from page 1)

to over \$11,000. All the other re-
ports were very favorable.

The recer then announced that he
had appointed Mr. Frank Coy, Jr., as
his warden and Mr. George Ecclestone
was re-elected as the People's War-
den.

Mr. Forrester and Mr. Muir were
elected auditors for the year and Mr.
M. J. Lockart was chosen chairman
of the convolve committee.

Select Vestry

The members of the select vestry
were then appointed and are as follows:
Lieut.-Col. R. W. Leonard, Col.
Thairs, Dr. Mulock, Mr. Frester, H. G.
Williams, E. Butler, A. H. Wal-
lace, E. W. Smith, T. W. Jones, W. B.
Burgoyne, J. Hodgins, Sheriff
O'Loughlin, M. J. Lockart, George
Bardley and Capt. A. Bishop.

The lay delegates to the Synod are
Lieut.-Col. Leonard and Lieut.-Col.
Merritt.

The rector's stipend was increased
by \$300 and that of the organist by
\$100.

Before the meeting came to a close
Mr. H. G. Williams, on behalf of the
congregation presented the rector,
Rev. Mr. Howitt with an automobile.

The vestry meeting at St. Barnabas
Church was held held a week from
next Monday evening.

CHRIST CHURCH

The yearly Vestry Meeting of
Christ Church was held last evening
in the Parish Hall, with the Rector
presiding.

Very encouraging reports were re-
ceived from the different societies
and each of them showed a decided
progress for the year.

The Warden's financial statement
for the year showed all debts paid and
a very substantial balance on hand.

Lemons Beautify!

Strain lemon juice well before
mixing and massage face,
neck, arms, hands.

Here is told how to prepare an inex-
pensive lemon lotion which can be used
to bring back to any skin the sweet
freshness of which it has been robbed
by trying atmospheric conditions.
Windchafe, roughness, tan and redness
are warded off and those tell-tale lines
of care or of age are softened away.

The juice of two fresh lemons
strained into a bottle containing three
ounces of orchard white, makes a
whole quarter pint of the most remark-
able Itnon skin beautifier at about the
cost one must pay for a small jar of
the ordinary cold creams. Care should
be taken to strain the lemon pulp through
a fine cloth so no lemon pulp gets in,
then this lotion will keep fresh for
months. Every woman knows that lem-
on juice is used to bleach and remove
such blemishes as freckles, sallowness
and tan, and is the ideal skin softener
smoother and beautifier.

Just try it! Get three ounces of
orchard white at any pharmacy and two
lemons from the grocer and make up a
quarter pint of this sweetly fragrant
lemon lotion and massage it daily into
the face, neck and hands, and see
for yourself.

ENGINEERS MEET

City Engineer W. P. Near, attended
the meeting of the Executive Commit-
tee of the Niagara Peninsula Branch of
the Engineering Institute of Canada,
held at Niagara Falls, Ont., last night.

The Executive are planning to have
either Mr. Hogarth or Mr. McLean, of
the Provincial Highway Department
give a illustrated lecture on "Highway
Construction in the Collegiate Hall, St.
Catharines, to which the members of
the City Council, Suburban Road Com-
mission and the County Councils will
be invited.

It is also planned to have Mr. H.
Acres, of the Hydro Electric Power
Commission give a popular illustrated
lecture on the Chippawa-Queenston
Hydro development at an early date.

The Sundry School report was ex-
cellent both in the increase in at-
tendance and in money raised. The
school is entirely self-supporting and
raised over fifty dollars for missions
in addition.

The Ladies Aid Society also gave
a fine report having raised a large
sum of money for the general ex-
penses of the Church as well as mak-
ing a payment on the Hall mortgage.

The Auxiliary, Choir and Young
Men's Bible class all gave encourag-
ing reports. A spirit of thankfulness
and optimism marked the reports of
the various societies.

The Rector reported 32 baptisms, 10
weddings, 22 burials, 13 confirmations,
100 parochial visits, besides his other
duties.

At the close of the evening the rector,
Rev. M. A. West, received a very pleas-
ant surprise when it was unanimously
voted by the Vestry to increase his
tipend by two hundred (\$200.00) dol-
lars as a mark of appreciation for his
faithful and energetic labor.

The following officers were appointed
for the year:

Rector's Warden—William Backus,
Peoples Warden—Hary Harding,
Lay Delegates—Alfred Hacker and
Hary Harding.

Select Vestry—Messrs. Hacker, Mac-
Donald, W. Purser, C. Lamb, Mrs. H.
Harding and Miss F. Harrison.
Sidesmen—Messrs. G. Clark, W.
P. (kham, W. MacDonald, W. McCar-
thy, I. Haynes, W. Mulley, B. Mathews,
Jr., W. Wilcocks.

The total of communicants and also
church attendance for the was the high-
est on record.

THOROLD

All that was mortal of the late Chas.
Edward Piper, son of Rev. Canon and
Mrs. Piper, was tenderly laid to rest
in Lakeview Cemetery on Monday af-
ternoon. The body was taken to St.
John's Church at 10 o'clock in the
morning where it laid in state until
the funeral service was conducted in
the afternoon by Rev. Canon Bevan, of
Niagara Falls, South. Those who acted
as bearers were John Dinwoodie, A.
F. Robertson, Arthur Lewis, George
H. Shaw, Adam Martin, and C. J.
Brookbank. The floral tributes were
many and beautiful.

A particularly sad death occurred at
the family home, Ormond Street, on
Saturday when Mrs. Mary Dodge, be-
loved wife of Charles R. Dodge passed
peacefully away after an illness of one
week suffering from influenza. De-
ceased, who was in her 40th year, was
born in Cork, Ireland, and moved to
Thorold about four years ago where
she has resided ever since.

In religion she was a devoted Presby-
terian, taking an active part in every
organization of the church that led to a
good cause. Beside her sorrowing hus-
band, she is survived by four children,
two boys, Kevin, Charles, and two
girls, Florence and Sadie.

The funeral was held on Monday af-
ternoon and was largely attended. Rev.
James Amesley, of St. Andrews
Church, Merrittton, officiating at both
house and graveside. Those who acted
as bearers were, Isaac Cornelious, Robert
Turner, Percy Hartley, John Sim-
mons, Charles Stuart, and Charles
Lund. The floral tributes were many
and beautiful.

BOUQUETS

During the fighting around Cambrai
an officer leaped from his car before
a Y. M. C. A. canteen in a ruined barn
just out of sight of the enemy and
ravenously took advantage of the free
drinks, biscuits, and cigarettes distrib-
uted by the "Y" in the midst of oper-
ations.

There are two things in this war
have earned my undying gratitude," he
mumbled through a mouthful of Canad-
ian biscuits, "the Ford car and the
"Y".

A soldier, emerging from a "Y" cin-
ema hut, was overheard to express
himself thus to a mate: "Good old
Y. M. C. A. I. They're sure some husters
't'he days. We'd die in this here hole
if it weren't for them."

Two "Y" officers were working in
one end of a hut when six soldiers
entered the other a little overpowered
by their potations. Their fluency of ex-
pression finally brought a reproof from
the "Y" officers and thereafter there
was comparative quiet. Next day four
of the six spontaneously and separately
came to apologise.

A fifth did more. Ten months after-
wards, when the celebration of armis-

The Canadian West In "Movies"

(1) An Alberta Wheat Field.
(2) Movie Men Near Banff Springs
Hotel.
(3) An Irrigation Stream.
At the present time there are
being shown in various parts of the
United States some pictures of
actual scenes of various phases
of farm life in Alberta, one of
the prairie provinces of Can-
ada. They show this country in a
very different light from what many
had been led to believe it to be. The
films, which have been produced
under the direction of the Cana-
dian Pacific Railway Department
of Colonization and Development,
deal with irrigation farming, the
dairy industry, and the lighter side

of the farmer's life in Western Can-
ada.
The film dealing with irrigation
farming shows the land being pre-
pared for irrigation, the application
of water, growing crops of grain and
alfalfa, harvesting, and livestock on
the irrigated farm. It also shows the
irrigation works, including the great
Bassano Dam, the largest of its kind
in the world. The idea one gathers
of these structures from the picture
is that they were built to last, and
that those who provided the money
had great confidence in the country
and the undertaking.
The dairy film shows the rapid
progress this industry has made in
Alberta during the last few years.
