GLACE BAY COMMUNISTS PARADE

SYDNEY, May 1. Twenty-five hundred persons, headed by standard bearers, carrying a thirty foot red flag bearing the insignia and motto of Communism walked to-day in Cape Breton's first organized May Day parade of workers at Glace Bay. Although enough miners remained on duty to produce bout thirty per cent. of the normal utput of coal and the majority of teel workers remained at their osts, a large body of workers rallied to the call for a May Day lemontration, and defied the drizzling rain hat stepped just as the parade comnenced at one o'clock this afternoon. Elaborate preparations were made by local and provincial police to guard against any disorder, but no ntoward actions had been reported at a late hour this afternoon. The parade was notable in that a large umber of women prticipated. Many anners were carried bearing the slo gans of societies active in Russia and with their legends printed in Rus-

# To-Morrow's the Day

### Each Man Has a Vital Part to Perform.

To-morrow the Squires-Coaker Government will stand before the people of Newfoundland to be judged for their actions in the discharge of the trust committed to them 31/2 years ago by a trusting people, and the verdict must be given at the polls on that day for the weal or woe of our country. The people must decide whether the Government into whose hands they placed the destinies of the country in 1919 has proved itself worthy. If its actions during their term of office were such as would warrant giving them another term. Judged by their record, can we trust them to do better in the future? Would it be madness to take the risk? Has not their conduct of public affairs been so atrociously bad that it would be madness to take the risk of placing them in power again?

Compare the condition of the country to-day with what it was 3½ years ago, when the present Government took over the duties we entrusted to them. The country then was prosperous, its people happy and contented, and the future looked good. Now what do we find. The Government, in atter defiance of the rights of others and common decency, has, by its borrowing, squandering, pleasure trips, pauper relief, fishery regulations, and all the other scandals brought the people from prosperity to poverty. There is no man who will look at the case in an honest way but must come to the conclusion that their actions are in-

After going into the evidence placed before the people, we have no hesitancy in saying that the verdict will be that they cannot be trusted. ### "King's Counsel."

The title of King's (or Queen's) has a history of a thousand years. Counsel originally meant exactly what it said. Counsel or adviser to the Sovereign, and Sir Francis Bacon, the first holder of the rank, in 1604 was appointed by the Crown in person, receiving forty pounds a year as

a fee to retain his services. Nowadays, however, the rank is phorary, and the Letters Patent by which the barrister is summoned to take his place within the bar as "learned in the law" are really grant-Chancellor, and though in theory the Sovereign can oppose the appointment, the right has not been exercised for many years.

The appointment is for life, though it can be revealed in case of any scandal. The King's Counsel takes precedence in any case over the "junior," and invariably "leads" in a case. He may not appear at all with-

In times he is Counsel for the Crown, and to defend against the Crown he needs a license, which is, lowever, always given as a matter

When a barrister thinks he has obtained sufficient seniority and credit in his profession, he usually applies, if he thinks his practice will benefit, to "take silk," in other words to become a K.C., whose gown is made of silk instead of the "stuff" of the junior.

His application is submitted to the Lord Chancellor, and almost invariably granted.

#### Atlantic Sea Lanes Are Choked With Ice.

Floating fields of ice, some of them two hundred and fifty square miles size, with scores of icebergs, are enacing trans-Atlantis navigation lew York by Captain Peter Van Den Heusel, of the Nieu Amsterdam, which arrived from Rotterdam and

locked at Hoboken. The captain warned all navigation to use the utmost caution. He called particular attention to the condition of the sea between longitude 42 and 50. In that section he passed many huge bergs and the fields of ice spread seemingly beyond the horizon. It was just such conditions that confronted the Titanic on its fatal voyage. He said he had wireless reports that in longitude 50 to 60 the same

Three days ago the captain re-eived an S.O.S. call from the teamer West Helig, in trouble about ,500 miles from New York. The liner was put about to race 300 miles to her assistance when a wireless was received from the Inmoko, which was near the disabled ship.

The Tablets Cured Her! Does Your Case Resemble Hers?

For twenty years I suffered from heart trouble and nervous prostration. I had constant pain in my left side, shoulder, left arm, and could not get my hand up to my head. Often times I was confined to my bed, and not able to do the least work. I had palpitation, faint spells, cold hands and feet, shortness of breath, (often at night had to be propped up in bed to get my breath) and could not sleep on my left side. I could hardly eat anything without its causing great pain and gas in my stomach. There was a great feeling of oppression about my heart which made it impossible to do even the lightest work, and I did not know what it was to get a good night's sleep. I can hardly describe my perious condition when beginning to take your Tablets. I had consulted several of our best physicians and taken many kinds of patent medicines without success. I sent for your Tabelts and took four boxes. I can truthfully say I now have no symptoms of my former troubles, can eat anything I want, sleep well, do any kind of work and have gained fifteen pounds in weight in three months. It is needless to say that your remedy is the best in the world.
