#### Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

	Coloured covers / Couverture de couleur		Coloured pages / Pages de couleur
	Covers damaged / Couverture endommagée		Pages damaged / Pages endommagées
	Covers restored and/or laminated / Couverture restaurée et/ou pelliculée		Pages restored and/or laminated / Pages restaurées et/ou pelliculées
	Cover title missing / Le titre de couverture manque		Pages discoloured, stained or foxed/ Pages décolorées, tachetées ou piquées
	Coloured maps /		Pages detached / Pages détachées
	Cartes géographiques en couleur		Showthrough / Transparence
	Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)		Quality of print varies / Qualité inégale de l'impression
	Coloured plates and/or illustrations / Planches et/ou illustrations en couleur  Bound with other material /		Includes supplementary materials / Comprend du matériel supplémentaire
	Relié avec d'autres documents  Only edition available / Seule édition disponible		Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / II se peut que
	Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.		certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été numérisées.

## EPPS'S COCOA

BREAKFAST-SUPPER.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weakpoint. We may seesape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus:

## Commercial Summary.

\*\*Merchants, Manufacturers and other business men should bear in mind that the "Journal of Commerce" will not accept advertisements through any agents not specially in its employ. Its circulation—extending to all parts of the Dominion—renders it the best advertising medium in Canada—equa to all others combined, while its rates do not include heavy commissions.

-THE Cincinnati Chamber of Commerce has established a new grade for wheat to be known as No. 4 Red Winter Wheat. It shall be sound, but not good enough to grade No. 3, and shall test not less than fifty-three pounds to the bushel.

-Two English railway companies, the Great Northern and the London and North-Western, have just succeeded in breaking the records for express service by running from London to Aberdeen, a distance of 500 miles, at the average rate of a mile a

-The total wheat crop of New Zealand for this year is 3,618,000 bushels, or 1,000,-000 less than for the previous year. It is estimated that the Colony will have to import 50,000 bushels to supply its own requirements.

Johannesburg advices state that the total gold output from the Witwatesrand mines for the month of July amounted to 199,453 ounces, compared with 200,941 in the preceding month, and 167,953 ounces in July of 1894.

THE Russian thistle has appeared in Indiana. It is supposed to have sprung from seeds dropped from through grain cars from South Dakota.

THE Fort William Journal observes that the dairy industry in the West must be thriving to judge from the number of butter tubs which arrive at Fort William on almost every boat, en route to Manitoba and the Territories.

needs a good fence and the neatest and best fence is the PAGE. Used by all the leading railroads and by farmers everywhere. Send for circulars and our illustrated monthly paper.

The Page Wire Fence Co. of Ontario Ltd. WALKERVILLE, Ont.

THE Belgian Chamber of Deputies has voted the necessary amounts for the construction of a ship canal from Heyst to Bruges, and for the conversion of the latter place into a scaport.

-THE first shipment of new wheat was made last Friday from Grotna to Keewatin, and was graded No. 1 hard. It yielded thirty-five bushels to the acre.

-THE first meeting of the sixteenth session of the North American St. George's Union, a central organization of St. George's Societies, was held this week at Kingston.

-President Beckley, of the Toronto, Hamilton, and Buffalo Railway Company, has addressed a letter to the ratepayers in Hamilton, asking that the city vote them another \$250,000 before they undertake to build the road from Toronto to Hamilton.

-The old established dry goods firm of James Scott & Son of Toronto announce that they are retiring from business, and that

their store is now closed preparatory to the final disposal of their stock, which they will shortly offer for sale en bloc to the trade.

-ONE of the companies doing a farm business has declined to accept farm property for a term longer than three years, and besides is demanding a rate somewhat increased over the established tariff. Other companies are said to be contemplating simliar action.

-A PETITION has been fyled by the receivers of the Philadelphia and Reading Coal and Iron Co. to wind up the Canada Coal Company, of Toronto, on a claim of \$24,186. The Canada Coal Company will oppose the motion. Mr. J. T. Matthews is the president of the company, which was incorporated in May,

-ALEXANDRIA advices say that the latest reports on the condition of the cotton crop in the provinces of Egypt are very satis-

A truly wonderful and efficient machine for setting tires "cold" BY HAND without taking out the bolts.

Every blacksmith can now have one, and the saving in time, labor and fuel will more than pay for it every season.

Sets all light tires up to IM X %, wheels from 3 ft. to 4 ft, 4 in. diameter. Simple, strong and durable, easily operated by any intelligent person from the instructions accompanying each machine. If castings break, duplicates will be furnished free. If bolts or wrenches break any blacksmith can mend them. A Good, Strong, Simple, Darable, Profitable Machine. The result of twenty flyeyears' experience in the business of Setting them Cold.

If you have heavier tires to set, get one of my Power Hydraulic Machines. If you buy one later, I will take the hand machine, at price paid towards it if you wish.

one-eight to one-half of a cent per yard. This is merely one ofthe frequent incidents that give visible evidence of the general business activity.

-Plate glass insurance rates still continue to be cut heavily in Chicago, some of those registered having been in excess of 50 per cent. One \$450 premium was within the week shaved to \$190, and the brokers paid 30 per cent. commission besides. With the increase in the cost of plate glass and the woeful rate cutting, to say nothing of excess commission payments, it would appear that the companies are burning the candle at both ends.

-DETAILS of the output of the Indian coal mines in the last financial year show that the total production was 2,750,000 tons, and the receipts for the year were 6,500,000r., which, considering that the total capital outlay on all the fields has been only a

little over 8,500,000r., represents a handsome return. Bengal still leads as a coal producer, and Hyderabad comes second, a long

-An Ottawa subscriber asks about the Canadian Trading & Shipping Co. The concern was begun about a year ago with a subscribed capital of \$125,000, ten per cent. paid up. As already intimated, the late manager, C. E. Carbonneau, has been succeeded by J. S. Bousquet, late manager of La Banque du Peuple, who was president of the concern. The suits at law resulting from the charge have been practically settled after furnishing food for gossip for several days.

-AMERICAN railroad earnings show that the gain in gross for June is 4.28 per cent., and in net 11.73 per cent. This is not as good as the showing for May, when it was 6.05 gain in gross and 21.79 in net. But it should be remembered that the month had an extra Sunday in 1895, and therefore one business day less, and furthermore that comparison is with somewhat better results last year than was the case in May, the loss in net for June, 1894, having been \$4,516,941, against \$6,253,373 in May, 1994.

-Nor only are the grain crops in the Turkish provinces of Anatolia reported to be exceptionally fine, but the opium crop in the Karahissar district, where the plant is much cultivated, is said to be almost unprecedentedly rich. Already at the end of July 1,210 baskets had been brought into the Smyrna market, as against only 482 at the corresponding date last year. The price of the drug has, however, been so depressed by this abundance that only 110 plastres per oke is quoted, as compared with 250 to 300 plastres in recent years.

-The season for land furs in British Columbia is practically closed, and will not reopen until the end of October. Fur traders have only small stocks on hand, as a brisk demand during the past season has almost entirely cleaned them out. Since the June sales the fur market has not been strong, and there is a desire on the part of the fur traders not to quote prices. They all expect a good market, however, later in the season. The furs at the June sale were not of an extra good quality, which caused prices to drop a little. It is predicted that bears will rule lower from this until fashion pronounces bear must again be worn. Traders have been advised by eastern houses to buy bear cautiously. On the other hand it is expected that sable and mink will hold up well.

Established in 1782. Canadian Branch Established in 1801.

No. 35 St. Francois Xavier St. MONTREAL, P.Q.

#### PATERSON & SON

Agents for the Dominion.

RAYMOND & MONDOU Agents French Department.

#### FOR SALE in FLORIDA.

A FERTILE TRACT OF LAND of 20 to 25 acres between and partly covering the margins of Lakes Florida and Kildeer, lying within 1½ miles of Interlachen on the Florida Southern Railroad, and about 17 miles due west of Palatka. Oranges, peaches, sweet potatoes, cotton and all sub-tropical fruits and plants are grown in the vicinity. An orange garden, neglected latterly owing to distance from owner, is on the place. Returns from a grove of 3 acres at Green Cove Springs, some 22 miles north east, show an aggregate of \$3,000 to \$5,000 a year. The lakes abound with fish. Climate remarkably healthy. Interlachen is a winter resort for many Northerners troubled with lung affections. Several Montreal people permanently reside there.

MONTREAL, FRIDAY, AUGUST 30TH, 1895.

#### CURRENT EVENTS.

The insurrection in Cuba has come to be a seriously, disturbing factor in both commercial and financial circles. It has already cost Spain \$21,600,000 in gold and since February last a further sum of \$1,500,000 has been spent in the transportation of troops and war material alone. This is a very serious drain upon the

resources of a nation so weak financially as Spain and has naturally produced a feeling of distrust in France where the bulk of Spanish securities is principally held. It seems certain that Spain must shortly make an attempt to raise another foreign loan, and as all her resources are practically mortgaged already, its reception will not be a cordial one and hence the government's hesitation in issuing it. In the meantime the commerce of all the nations doing business with the Queen of the Antilles is suffering from the harsh and unnecessary restrictions placed upon the local merchants by the Spanish authorities, and as Canada last year exported goods to the extent of \$1,173,000 to Cuba, our own merchants are interested in their abrogation. The decree that no sales are to be made to women or children, on the ground that the insurgents use their aid in obtaining supplies, is especially absurd, as are also the regulations prescribing the amount of each article to be sold to any one customer. The export sugar trade bids fair to be ruined by the rebellion. The insurgent leaders have forcibly recruited the native laborers on the plantations, while the Spanish and foreign operatives employed in the mills have fled to the cities for safety. The loss occasioned by such desertions is not measured by the abandonment of the present cropalone, but extends to that of future seasons also. Uncut cane fields rapidly deteriorate and become overgrown with rank weeds which produce mould and decay, and finally kill the crop of cane altogether. The damage thus done is almost irreparable, and as the island of Cuba sent us last year 79,766,933 pounds of sugar valued at \$2,068,465, and supplies more than half the raw sugar for United States refineries, it can be easily seen that the pacification of the island is a matter of commercial importance to this continent as well as to Spain.

The fall millinery-openings which usually take place on the last Tuesday in August will this year be held upon the first Tuesday in September both in this city and Toronto, extending, of course, over the two following days. The reason in the case of Toronto is that these are the three opening days of the local exhibition, and that thus visiting retailers can kill two birds with the one stone. They will be able to take advantage of the reduced railway rates then current, will arrive before the rush and thus can get ample hotel accommodation, and will be able to make their selections and visit the Fair at one and the same time. This, it is expected, will draw an unusually large attendance to the millinery openings. In this city the Industrial Fair does not open till the 12th, and thus no similar inducements can be offered. But the dating of the millinery opening later is an advantage none the less. It gives the wholesalers more time to receive and display their goods, and it enables retailers to buy their supplies closer to the time when they really need them. In every way late millinery openings are an advantage.

There is a healthy steady rise in the value of cotton goods both in this market and in the United States. Three weeks ago an advance equal to five per cent in shirtings, tickings and cottonades, was chronicled in this market, and last week a five per cent. increase in denims was announced, followed by a rise of 50 cents

ASSESSMENT SYSTEM.

MUTUAL PRINCIPLE

## **Mutual Reserve Fund Life Association**

AGENTS WANTED.

per bale for seamless cotton bags. Across the line a number of small advances in staple cottons have been made; more especially in unbleached goods upon which the advance in raw cotton exercises a far greater influence than any increase in the demand. It is evident that stocks in both bleached and unbleached cottons are not large, and that in colored cottons stocks are small in the aggregate. Prints have sold well, and low grade fancies are \$\frac{1}{4}c\$ higher. Staple ginghams are also advanced \$\frac{1}{4}c\$ and cambrics \$\frac{1}{2}c\$ per yard. Brown and bleached sheatings have risen \$\frac{3}{4}c\$ to \$\frac{3}{6}c\$ per yard. Ducks are up \$\frac{1}{4}c\$, and shirtings an \$\frac{1}{6}c\$ her yard. In fact the situation is gaining strength, and manufacturers generally are urging advances upon their agents.

The outlook for hops this year is most discouraging and both in the Pacific Coast and in New York State many growers will allow their hops to rot on the poles rather than go to the expense of picking them. The banks who usually furnish the funds to the hop growers for this purpose are chary of making advances this year, owing to the discouraging outlook, and the unprecedentedly low range of prices. Large brewers throughout the country have unusually heavy stocks of hops of last year's growth. In a few instances the supply is sufficient for twelve to fifteen months' consumption. Many have enough to meet their probable wants for six to nine months. As for the merchants, nearly all have more stock on hand than usual at the close of a season, and not a few feel the weight of what would ordinarily be a not very uncomfortable surplus. Early hops, or seedlings, which usually sell at 20 to 25c per pound during this month, sold this year at 10c for the choicest. In fact many growers accepted 71 to 8c for their seedlings in order to raise funds to pick at least a portion of the crop of the later varieties, and are now willing to accept 7 to 8c for late varieties for future delivery at interior points. In some instances growers have offered to allow dealers to take their crop at 1c net per pound to the grower after the hops are baled, the buyer to pay for picking, curing, etc. For old hops there is practically no market. Fine quality 1894 crop hops have sold as low as 3½ to 4c per pound in New York, and as the conditions in the European hop consuming centres are similar to our own the outlook for the hop market this season is at present a gloomy one.

This year Newfoundland has an opportunity that it may not have again, in the comparative scarcity of Norwegian cod-liver oil and its strong position in the American market. The crop of new Norwegian oil has fallen heavily under the average. In fact it is estimated at only 16,684 hectolitres as against 23,226 hectolitres in 1894. And, as each 100 hectolitres of 201 gallons each, will yield from 70 to 75 gallons of non-freezing refined oil, ready for export, we are confronted with a decline of 29 per cent. in the available supply from Norway. The catch of fish fell 10,600 millions under the figures of last year, and what were taken had a half-starved appearance and miserably lean livers. Here, then, is Newfoundland's opportunity. It is claimed that Newfoundland oil, refined by the Norwegian process and strained through ice, is every bit as good as Scandinavian oil. If it is, it will sell readily at the same figures. But it is useless to send crude, raw, ill-prepared or unsavory oils. None but the best must be sent. Any other would tend to deepen the prejudice already existing amongst American druggists against the use of Newfoundland oil.

#### THE BANK STATEMENTS.

The bank statements for July, briefly commented upon last week, evidence a conservative course of trade during the month. Circulation shows the usual decline from June which this year was accentuated by the reluctance of cheese factory-men to market their produce at the low rates ruling, and the consequent accumulation of June and July cheese in cold storage. This of necessity considerably reduced the volume of circulation, but it was offset to some extent by the activity and high prices ruling for hay, and thus the total of circulation fell only \$368,000 under the figures of the previous month, of which \$101,000 was due to the suspension of the Banque du Peuple. If this be deducted, the total is \$38,000 larger than that of July of last year, when the movement of cheese was in full swing at good prices, and therefore it may be considered as proving that the movement of agricultural products during the month was strictly normal and that the farmer consequently was prospering fairly. During the present month we may expect to see a considerable advance in the volume of circulation. Factory men are beginning to realize that, with the cable at its present figure, anything like last year's prices are improbable, and there is a disposition to make concessions on both sides. But it will not be until next month, when the harvest begins to move to the senboard, that any marked advance in circulation can be looked for.

The returns of current loans during the month are somewhat more difficult of explanation, except upon the theory of a partial contraction of the volume of trade. Possibly a proportion of it may be due to a reduction in the volume of renewals, but the unsatisfactory nature of remittances during the month preclude so

favorable an interpretation being placed upon the whole of the month's deficit. The total reduction of \$4,799,836 is divided among the various Provinces as follows:—

Quebec	\$1,595,532
Ontario	2,014,762
Nova Scotia	706,939
New Brunswick	504,181
P. E. Island	33,486
	\$4,854,900
Less incréase in British Columbia	55,064
	\$4,799,836

At first sight this would look as if this deficit were tolerably evenly divided among the provinces in proportion to their standing in the commercial scale. But from that proportion of it credited to this province falls to be deducted the sum of \$1,358,564 due to the suspension of the Banque du Peuple. This leaves Quebec's deficit at \$237,168 only, distributed among the banks as under:—

	July.	June.
Bank of Montreal	32,690,888	32,427,736
Bank of British North America	8,002,058	8,122,861
Banque Jacques-Cartier	3,309,888	3,609,801
Banque Ville-Marie	1,073,497	1,071,222
Banque d'Hochelaga	3,664,555	3,632,081
Molsons Bank	10,520,867	10,697,970
Merchants Bank of Canada	17,212,064	16,777,862
Banque Nationale	3,577,493	3,376,367
Quebec Bank	7,034,418	7,241,664
Union Bank of Canada	5,857,003	6,161,993
Banque de St. Jean	275,258	270,044
Banque de St. Hyacinthe	1,213,914	1,235,890
Eastern Townships Bank	5,019,015	5,123,095

Deposits continue to show a steady increase both in those repayable on demand and those bearing interest. The first is an encouraging feature, since it shows that the active wealth of the country has increased \$1,593,-000 on the month and \$3,225,000 on the year. The second is less gratifying, since although it, points likewise to a further accumulation of resources, it also indicates that its owners still prefer to place their funds for investment in bankers' hands, even at existing low interest rates, rather than invest them in active business enterprises. This unwieldy amount of \$114,512,523 in Deposits After Notice is more a source of weakness than of strength to the banks, and most bankers would gladly see a reduction under this item, provided it was a gradual one and did not arise from any popular mistrust. With money in New York at 1 per cent. on call, and  $1\frac{1}{2}$  to  $2\frac{1}{2}$  for time loans on collateral, there is not much profit in interest-bearing deposits for our bankers. Yet it is only in the United States that they can hope to find a profitable demand, as is proved by the fact that their American balances increased \$1,577,000 during the month and are now \$5,717,000 more than they were a year ago.

Call loans show a falling off of \$874,000 during the month, due possibly to the usual suspension of the afternoon sessions of the Stock Exchange during the summer holidays. But this is an item which is often misleading, because some of the banks include short loans on stocks under this heading while others prefer to classify them with their current loans, and hence its fluctuations do not carry much weight. The dearness of sterling exchange has led to a reduction of \$404,000 in the balances due by Canadian banks to their English agencies; but the balances due from Eng-

land have risen by \$2,121,582 of which \$2,100,000 is due to the Bank of Montreal, and arises partly from the fact that the debit balance of their English branch had fallen to an unusually low point during the preceding month and partly to large purchases of outside sterling bills diminishing the usual drafts made upon them.

As to the outlook for the fall trade most bank managers consider it fairly hopeful. In Ontario the crop is certainly only a bare average one; but in Manitoba and the Territories the crop estimates of the Canadian Bankers' Association are even ahead of the official figures. They estimate the yield of wheat at 30,890,076 bushels, or 27.09 per acre; that of oats at 24,988,102 bushels, or 49.70 per acre; and that of barley at 5,758,-224 bushels, or 37.43 per acre. The total grain yield is put at 60,636,402 bushels of which fully two-thirds has now been harvested in splendid condition. The amount of money thus represented means a considerable increase to the wealth of the country and a corresponding growth in its purchasing power. The wheat alone at fifty cents per bushel represents nearly fifteen and a half millions of dollars and every one of the other crops is equally bountiful. In fact this is a banner year for the Far West, and as its interests are practically identical with our own, the prosperity of Manitoba means a valuable stimulus also to the trade conditions of the older provinces.

The U.S. internal revenue returns for the month of July show that the total receipts were \$13,579,666, a decrease as compared with July, 1894, of \$11,977,231. This large difference is accounted for by the fact that in July, 1894, great quantities of whiskey were taken out of bond to escape payment of the increased tax on whisky, imposed by the new tariff bill.

#### LA BANQUE DU PEUPLE.

Customers of La Banque du Peuple are gradually settling into place; some have had little trouble from the start : a good many are taking advantage of the ready excuse afforded by the bank's suspension to postpone payment of their open accounts, among them a few whose connection with well-known wealthy estates should not warrant it; others are "shinning" around town every few days looking for an endorser, one who has a little account at a bank-meantime. There seldom or never has been a bank suspension which caused so little stir, so little disturbance in the financial arena. It may be that nationality has something to do in the matter. People who remember the excitement surrounding the suspension of the Consolidated and Exchange Banks, contrast the crowded corridors of those days with the almost deserted condition of La Banque du Peuple ever since it closed its doors' to business.

The total amount due the bank by its largest customer at the time of suspension was about \$704,000, but of this over \$200,000 represents interest. Besides this a varying amount of \$10,000 to \$16,000 was due another bank (branch) on approved commercial paper. Over, and above both these amounts the public will be surprised to hear that the liabilities of the company scarcely reach \$25,000. Among the next largest customers one concern found a place of rest with an eastern bank. Some \$140,000 of this customer's discounts was "one-name paper." There is probably more of this class of paper exchanged for bank assets than people imagine; but it may reasonably be asked, What are manufacturers to do whose output goes largely into the hands of such dealers as do not give promissory notes? It is needless to say that there are houses in Montreal, Toronto and elsewhere who do not make payments in that way. Such firms it is needless to say are not profitable to banks by way of commercial discounts; the profit comes by way of foreign exchange, or from the house employing one-name promises. The liquidation goes on apace, but the stock has been sagging under the influence of sales by a leading political lawyer.

#### THE WORLD'S GOLD OUTPUT.

The general increase in gold-mining throughout the world is making itself felt in the larger output of the precious metal. It is now estimated, judging from the statistics for the first half of the present year, that the world's production of gold will reach 9,800,000 fine ounces this year, as against 8,781,014 in 1894, and 7,662,077 in 1893. This means a gain of 12 per cent. over the figures of last year and of  $21\frac{1}{2}$  per cent. over those of the preceding one, and taking the value of gold at \$20.67 per fine ounce it means \$202,583,640 added to the wealth of the world.

The principal advance, of course, is in the production of South Africa, which has risen in eight years from a comparatively unimportant position to that of the chief producer of the globe. The major portion of this yield comes from the Witwatersrand district where the output for the first six months of the year has increased from \$788,603 fine ounces for 1894 to 900,695 fine ounces for 1895. The DeKaap field and Lydenburg district, which are next in importance to the Witwatersand, have also increased their yield by 6,728 ounces or

22 per cent., and returns from the other African mines, still incomplete, furnish evidence of the same character and point out that the African gold yield will this year reach 2,300,000 fine ounces or an advance of 348,080 fine ounces over the output of 1894.

The returns from Australia show a smaller increase over the last half of 1894 than was promised at the opening of the year. It is predicted, however, that the remaining six months will show a much larger output, and that the final figures of the year will closely approximate to those credited to South Africa. In 1894 the aggregate for the Australian mines was 2,020,180 line ounces, or a gain of 18 per cent. over the totals for 1893. It would be unsafe to predict a similar increase however, for the present year. But, if we add ten per cent to the figures of 1894, which is a tolerably safe estimate the yield of gold from Australia during the present year should not fall below 2,200,000 ounces.

In the United States a considerable increase in the putput of gold is also looked for. Over 9,000 miners are at work in the Cripple Creek district, and all through Colorado there is going on an active development of existing properties coupled with an extensive opening of new leads. Within the past month rich inds have been reported in Utah and Idaho. Returns from California state that gold mining is being pushed actively there, and it seems probable that the total production of the United States will not be less, and may probably be more than 2,100,000 fine ounces against 1,910,813 fine ounces in 1894.

India has of late become more prominent as a gold producer and her output for the first half of the present year shows an advance from 96,462 fine ounces to 119,124 fine ounces. From Russia the returns are too neagre to give any reliable data upon which to base in estimate. But it is perhaps safe to estimate a general increase of 10 per cent. in the output of Europe. On this basis the Chronicle issues the following comparative statement of the world's production, the total for 1895 being, of course estimated;—

	1895.	1894.	1893.	1892.
Lfrica	2,300,000	1,951,911	1,881,128	1,150,519
Lustralia	2,200,000	2,020,180	1,711,892	1,638,238
Jnited States	2,100,000	1,910,813	1,739,323	1,597,098
Other countries.	3,200,000	2,898,110	2,829,784	2,655,967
*	·			

Total ounces. 0,800,000 8,781,014 7,662,077 7,041,822 The amount and steadiness of the increase in the output since 1892 is most noticeable. It effectually lissipates the argument that there is any danger of a gold famine, and it proves how the demand increased the supply in exactly proportionate ratio the moment the world was ready to absorb it.

#### CIVIC TAXATION—A HINT.

Our city parliament is again almost in despair over the condition of its purse. So sad is its case that there is said to be an increasing number of members who are sorry they ever sought office. How to further tax the city to advantage is the idea agitating the minds of the majority. Various schemes are proposed. Not the east practical among them is that suggested some years ago by then Ald. Clendinneng by which he ventured to deal with exemptions. It was proposed that the line be drawn between land and buildings, that while the buildings belonging to religious bodies be exempt as usual, the land be made to contribute to the

revenue of the city. This seemed to many at the time an equitable way out of the difficulty, a time when there was less stress than at present.

Another plan is to impose a tax upon bicycles, an idea also emanating from the same source. It is urged that most, if not all those who own these new conveyances can well afford to pay a light tax upon them. An impost of, say \$4 each would yield a sum equal to the interest on from half to three-quarters of a million dollars; and as the number of bicycles is steadily increasing it must shortly reach that of a million. The cab system has been seriously affected by the general introduction of and improvement in bicycles and electric street railways, and so also to some extent has the use of family carriages and other vehicles, all resulting in a considerable reduction in the civic revenue.

#### MANITOBA WHEAT GRADES.

The earnest remonstrances of the grain shippers of this port against the system whereby No. 1 hard Manitoba wheat entering the elevators at Fort William could be lowered to the exact standard by the admixture of No. 2 and No. 3 hare together with a proportion of scoured smutty wheat, and thd whole reshipped with an inspectors certificate as No. 1 hard Manitoba, have borne good fruit, thanks to the efforts of this and another commercial journals on behalf of honest wheat. The Grain Inspectio nAct has been amended by the government so that while the grades are unchanged the wording has been altered to read that Manitoba No. 1 hard wheat shall be composed entirely of wheat grown in Manitoba and the territories of Canada, shall be sound, clean, and weighing not less than 60 pounds to the bushel, and shall consist of at least two-thirds hard red fyfe wheat. The former reading was open to the construction that if containing two-thirds hard red fyfe grown in Manitoba the other one-third might be grown elsewhere. A clause will be added to the act to provide that no wheat which has been scoured or brushed for the removal of smut, burnt, or any fungoid growth, shall in any case be mixed with No. 1 hard. This means that shippers of No. 1 hard will in future get what they purchase and that a car of scoured smutty wheat will not-as in the past—be able to go into the elevator on one side as rejected and emerge on the other as No. 1 hard.

#### THE RICHEST MEN.

According to a New York paper the six richest men in the world are:

Li Hung Chang	\$500,000,000
John D. Rockefeller	180,000,000
The Duke of Westminster	100,000,000
Colonel North	100,000,000
Cornelius Vanderbilt	100,000,000
Woh Qua	100,000,000

The figures have a staring, impudent look about them, but a few noughts more or less do not matter much for the paper's purpose. There is in Japan a family of business men, the Mitsuis, somewhat like the Rothschilds. But the Mitsui brothers, cousins and nephews, do not confine themselves to financiering. All their interests are consolidated. They have a bank in Tokio, with branches throughout the Empire, but they are in steamships, coal mines, street railways, manufactures of various kinds, and there is little new in the world of affairs that they will not handle for gain. Nearly all their departments are headed by Mitsui chiefs. They have a capital of something like 50,000,000 yen.

—The London (Ont) Street Railway Co. is about to issue \$250,000 in bonds in order to convert their present horse cars into a trolley system.

#### ALUMINIUM.

During the year 1894 the production of aluminium in the neighboring republic was 550,000 pounds. The imports were valued at \$4,110. Bauxite, which is an oxide of aluminium, has been found in sufficient quantities to be commercially valuable in only three localities in the United States. These are in New Mexico, Arkansas and the Coosa Valley of Georgia and Alabama. As aluminium is of only one-third the weight of iron, and of almost equal power of resistance, it conduces so greatly to the speed of both yachts and torpedo boats and so materially to the safety of sail yachts that its extensive adoption is inevitable. It lowers the centre of gravity so much that a greater sail area may be carried. They are using aluminium in marine architecture very extensively in Europe. Germany may be said to have been the pioneer in this line of development. That country employs it on its large vessels and torpedo boats and torpedo chasers. The German Government is now building a steamer thus equipped, for use on Lake Victoria Nyanza. The French Government has had two aluminium-plated sloops built for African service. The same Government has also had a similarly plated torpedo boat built by Messrs. Yarrow & Co. in England, and so satisfactory has been the result that orders for five additional aluminium-plated torpedo boats have been placed with the same firm, to be delivered in 1896. Their gunboats and sloops on the narrow rivers of Madagascar are also to be thus plated, so that they can be the more easily transported. "L'Echo des Mines," a leading technical journal, announced that the administration of the French State Railways have decided to build experimental passenger cars, in which all the parts ordinarily of iron or copper will be of aluminium, excepting only the wheels, springs and couplings, inasmuch as for all other parts a resistence of 20 per cent. only is essential, the aluminium may be used with safety. The saving of weight per car will be at least 3,500 pounds: it may be possible, therefore, to save as much as 30 tons of the weight of an ordinary train if the aluminium cars are successful and generally adopted. Nat Herreshoff's offer to build a torpedo boat capable of attaining 271 knots an hour now proved to have been based on the use of aluminium fittings. The latest aluminium novelty is the employment of the metal for coffins and caskets, which are thus made more easy to carry by being reduced in weight from 300 to about 100 pounds each. The new process of extracting the metal from the ore by electrolysis has proved its great superiority over the old sodium method. The aluminium skiff lately exhibited in the window of Messrs. Prowse & Co's warehouse in this city, made by him for a member of his family, attracted much attention. Its lightness was such that lads could lift it.

#### SOMETHING NEW FOR FURRIERS.

By means of a new invention, demonstrated to be practical, it is possible to remove the hair from a skin or hide in such a manner as to obtain an artificial hair-covered surface identical to all practical purposes to that presented by the skin or hide before the operation, and that without in any way injuring the grain of the hide, which is subsequently converted into leather. The future possibilities, of this artificial robe or fur skin are undoubtedly great; it is lighter, more supple, in some cases of better wearing qualities, and, besides this, absolutely waterproof. The arrangement of each hair on the artificial scalp is the same as that of nature, and the hair is fixed to the same with corresponding firmness. A large number of skins such as that of the muskrat, are but ill-suited for furrier work; by means of this method however, a large number of muskrats may be sown together, thus producing, after removal of the skin itself, one large piece of fur, on a material most suitable for the purpose for which it is wanted. The application of this invention to furs used in dressmaking and tailoring opens up a wide field of industry.

#### THE CARBONNEAU CASE.

(Crowded out Last Week.)

The troubles between the Canadian Trading and Shipping Co., dealers in foreign wines and liquors of this city, and their late manager, C. E. Carbonneau, have been attracting much attention in the wine and other trades lately. The company was formed in July, 1894, with a subscribed capital of \$125,000 of which \$12,500 was paid up. Its object was to handle liquors on consignment only, and to manage the business the directors engaged Mr. C. E. Carbonneau at a salary of \$5,000 per annum, and expenses, while travelling, of \$75 per week. Soon afterwards trouble arose between the company and its manager. They claim that instead of soliciting consignments of liquors he purchased them outright, thus contravening his instructions, that sales were made to persons of doubtful credit, thus leading to losses, and that he took goods out of the store without accounting to the company for them. The friction increased until Carbonneau was discharged. Next followed his arrest on the charge of stealing a quantity of champagne, a delivery waggon, and other technical charges, together with a capias for \$5,836 on a civil case. Carbonneau responded by filing a motion to put the company into liquidation and by causing an arrest of the president, and present manager, Mr. J. A. Bousquet, late cashier of La Banque du Peuple the charge of writing a letter (the one given to and used by Carbonneau) stating that the company had a paid-up capital of \$250,000 with intent to induce foreign merchants to advance goods to the company. Both parties procured bail, one at least going security for it, and it being apparent that serious delay must result if all the charges (of which the number seems to be increasing) were pressed. negotiations for a settlement were set on foot. The civil actions appear to be withdrawn and the criminal actions indefinitely postponed. The outcome furnishes a lesson for business men who sign letters of recommendation, occasionally without the trouble of reading them.

#### THE MACLEAN-STEWART CASE.

Mr. Alexander Stewart has obtained permission to appeal to the Privy Council against the decision of the Supreme Court of Canada reversing a judgment of the Court of Appeal condemning his former partner Mr. John Maclean to pay him the sum of \$10,261. It will be remembered that, at the time of the failure of the wholesale millinery house of John McLean & Co., in which both gentlemen were partners, the capital account showed a credit balance of \$17,185 for Mr. Stewart, one of \$27,739 for Mr. Smith, while that of Mr. John Maclean was overdrawn \$29,079. The estate was handed over to Mr. Maclean by the creditions at 50 cents in the dollar, Messrs. Stewart and Smith receiving discharges. The two junior partners then sued in respect of the overdraft of \$29,079; to which Mr. Maclean replied that the overdraft was a debt to the partnership and as such was included the assets he had purchased. It therefore became extinguished by confusion. Mr. Smith took no further part in the litigation, and the action resolved itself into a claim for \$10,261 by Mr. Stewart. The Superior Court and the Court of Appeals decided in his favor; but the Supreme Court reversed their judgment by a majority of three to two, the Chief Justice and Mr. Justice Taschereau dissenting. It is from this judgment Mr. Alex. Stewart has received permission to appeal.

<sup>—</sup>The world's wheat crop for 1805 is given as follows:—The total production in countries which import wheat is estimated at \$749,022,000 bushels. In countries which export, the total production is 1,651,701,000 bushels. Experts also amend the estimate of the crop of 1804 so as to make the total in that year 2,632,736,000 bushels, showing that the crop of 1805 is 232,000,000 less than that of 1804.

#### A NEW, METAL COMPOUND.

A new process of treating copper has been discovered whereby castings are produced of a very superior quality and free from blow-holes. The secret is not stated, but the meta flows freely in casting, leaves little trace in the crucible, and shows a fine granular fracture when broken. The new compound can be produced of different degrees of hardness, and may be rolled into thin sheets or drawn into fine wire when cold without annealing. Tests are being made at the shops of the Illinois Central in Chicago. During the past year the Worth Manufacturing Company, now of Benton Harbor, Mich., have been making the connecting rods of their gasoline engines of treated cast copper. They are used upon engines running at as high a speed as 600 revolutions a minute, and are not only cheaper than the old form of steel rod, but very satisfactory. No trouble has arisen from the treated copper bearings. Tests made at the Washington Navy Yard show the treated copper to be pure, and, on a test bar 14 inches long and 1 inch on the faces, showed an elongation of 33 inches and an ultimate breaking strength of 37,800 pounds. Other tests made in Chicago show the ultimate breaking strength to be between 36,000 and 38,000 pounds. The ultimate strength of ordinary cast copper is 24,781 pounds. It is claimed that no alloy is used in the process of treating, that the process is not expensive and can be applied to a quantity of copper necessary to make the largest castings. The treated metal can be worked successfully with the planer, lathe, dies and rolls, or can be drawn into wire. The metal is considered by the makers well adapted for bearings for heavy engines, locomotives and cars.

#### THE PROSPECT FOR LACES.

The trend of popular demand for laces this fall is involved in considerable doubt. The unexpected popularity of the shirt waist has so effectually killed the demand for lace up to the present time that neither manufacturers nor jobbers have anything to go upon as to what styles the public will run upon when the cooler weather revives the demand for lace. This made early orders exceptionally light and many manufacturers have preferred to hold off and wait until they could see the drift of popular fancy before they ventured to put out any new ideas. At present it looks as if only the more costly styles would be safe purchases. All forms of jetted goods are promised well of, the number of styles introduced this season being larger than ever and calculated to suit the requirements of all classes of trade in every direction. Bands and insertions will, to all appearance, occupy a prominent position in purchases made. Wide insertions up to 10 inches are made a specialty, particularly in Oriental effects. The heavy Venise effects in insertions are also considered good. A new style of Venise lace is classed among the most recent of the new season's productions, this being an open figure in an embroidered effect, which is afterward filled in with either a fine muslin or net, laid on a net ground of a coarse fish net weave. These are shown in both insertions and edgings, as well as in sets of three and four widths to match, the shades running to the butter colors, which are evidently the most popular. Black silk Valenciennes laces are becoming more popular with the call for the butter shades giving evidence of being in well sustained demand for another season. Narrow chantillys in both insertions and edgings are considered good, particularly in the small point of d'esprit effects, black and white leading over the butter and cream shades. Plain nets, 27 inches wide, are shown to be employed with the point d'esprit laces for drapery purposes for evening wear. Point laces in the better qualities in both planer and Calais goods will again be employed in fair quantities for trimming purposes. Lace collars are again shown, but are mostly of the finer grades of real Venise goods; they can be bought, however, in the cheaper grades of goods as usual, and probably will again

take well. In finer lines Escurian lace effects are among the newest styles, and are well promised of. These are produced in all-silk and come in black and the two-toned effects in combinations of butter and white. These cut to fit over the puff sleeves, with a standing collar with a bodice shape front. In price these range anywhere from \$1.50 to \$5 each. Collars to be worn over wraps and ontside garments have led to the introduction of all-lace capes, the latter being among the latest of this season's novelties. These are shown in allsilk in Escurian lace effects, in price ranging as high as \$15 each. Goods in beaded effects are also included in the above. Lace jobbers have again turned their attention to veilings, lace veils again coming into prominence and give indication of a good fall demand. These are shown in white, cream and black, similar to the old style Jane Hading veilings, in that they are edged with narrow flower and sprig designs in point applique effects.

Dotted and small figured designs laid over at certain intervals the whole veiling, are considered the latest craze. In chiffon colors these are shown in white, cream and black, also white figures on black grounds and vice versa. They are produced in single heavy borders varying to narrow and graduated lines. Heretofore the demand for veils has run to the 14-inch or single width, also the double width, but the trade are now taking the 18-inch goods readily. Tuxedos and moline meshes in white cream and black veilings, while not particularly new, are taking well with the trade, also the tan, navy and brown shades.

#### THE CATTLE EMBARGO.

There seems a probability that the privilege granted to this government of verifying the diagnoses in regard to supposed contagious diseases discovered by inspectors in Great Britain in Canadian cattle will shortly be withdrawn. Our inspectors hold that there have been no cases of genuine pleuro discovered in our cattle for many years past, while English inspectors have been claiming during all this period that they occasionally found cases of that disease among the cattle exported from this country to England. The specimens of the lungs sent to this country alleged to be infected with pleuro certainly bear out the reports of our own inspectors and possibly the withdrawal of this privilege of inspection, which was freely granted, may indicate that the position of the British inspectors is found untenable.

#### THE BARRELING OF APPLES.

Now is the time when the apple broker is kept a little awake at nights studying how best to sort his fruit for barreling in order to provide sufficient of good-looking apples to form two or three attractive layers at top and bottom of each barrel to cover up the bulk of rubbish above and below. We have heard of one barrel of honest apples in several years. The purchaser has never been able to get another. It is high time that the twenty or twenty-five cent new empty barrel be abandoned altogether for apple-packing and replaced by neat boxes holding-say, from a bushel to half-a-barrel each, a package that could readily be inspected. Such a box of fruit would find ready sale from consumers, whereas many householders will hesitate to purchase a whole barrel of apples, especially in the knowledge gained by experience of many years. Apple dealers should take a lesson from packers of oranges. Boxes of oranges, especially those of Florida, rarely disappoint purchasers; at least one can always be sure of getting what he believes he is paying for. "Right about face," applemen!

#### THE ALLEGED CASE OF DEFALCATION.

The amount mentioned in the paragraph in our issue of the 23rd inst., relating to a supposed defalcation in the City Hall on the part of a long-time employe, appears, as usual in such cases to have been considerably exaggerated. So far as ascertained meantime the deficiency will not probably exceed 25 cents in the dollar of the sum named; and we further learn that the matter is being honorably adjusted.

S. D. MARQUIE, agent of this city has assigned. He was for some 12 or 15 years with H. Lamontagne & Co. He had at one time a junior interest in that firm, but withdrew in 1893, starting up a real estate business on. his own account, which has not proved a success. A man of good ability as an office hand, but not much outside experience. He has now been obliged to assign on demand of August Leblanc, with liabilities of over \$21,-000, mainly owing to different banks; the Banque du Peuple being a creditor for \$2,500.—Piers, Locke & Son, leather merchants of this city, are an old established firm, successors to Black & Locke, who took over that business some years ago and compromised their liabilities at 30 cents on the dollar. Direct liabilities were \$50,000 and they managed to get a small margin to the good. The firm is composed of father and son; very reliable people, but have been interested in several failures for arge amounts, so that their surplus has been entirely wiped out. They have been obliged to assign. Liabilities are not very large, principally to the Bank of Toronto, and J. W. Laurie, Nova Scotia. Nothing has as yet been done towards a settlement and affairs are still in the hands of the assignee-J. W. Guerin, grocer, of this city, was at one time of firm of Guerin & Repentigny, but has been on his own account since spring of 1894. Only a very small affair, commencing without capital. Trade has been with rather a poor class, and he has not made a success of it. He made a private assignment, after compromising at 40 cents on the dollar, 25 cents cash, and 15 cents in 3 and 6 months, not secured-A. Gravel, barber and fancy goods of this city, has been in business since 1885; at which time he fitted up quite an attractive place on Notre Dame street. He has had a fair run of business. Of late he has been going behind, and has been very slow pay, showing signs of weakness. Assigned on demand of J. D. Vinet, a few days ago, with liabilities of over \$8,000. He owes to him \$3,600, Banque du Peuple \$1,796-H. Gariepy, grocer of this city, has not been long in business, having commenced last fall. He started up without means, and has not been successful, business not yielding him a living. Has always been more or less hard up, and has just made a private assignment. Liabilities will be small.-H. A. Desparois, grocer of this city, has only been in business a few months. He started in the stand formerly occupied by C. McLeod and represented no capital when he commenced, being assisted by friends. He did not succeed in making the business go, and has assigned. Liabilities amount to about \$1,300.—D. McG. Kier, tins, Martintown has been in business some years. He was of McKay & Kier, bu has been alone since Jan. 1893. Trade is only a trifling one and he has become widespread, and unable to meet his engagements. He has assigned to Dr. McIntyre. Assets and liabilities are both small-Jos. Wilson, tins, of Bright, is a widower, who has been in business for years, but has never been successful. Failed years ago, then did business in his wife's name until she died. He has now failed again and is not likely to obtain a settlement. Liabilities are small, but there is not much to pay them with-F. Moisan, boot and shoe manufacturer of Quebec has for some time past been hard pressed and has struggled along, endeavoring to work through, but without success. Last\_September he had a meeting of creditors, and asked for an extension, but subsequently withdrew the offer, and for a time was talking of a composition at 25 cents. This was not accepted, and he is to hold another meeting of creditors, and will submit the following statement ou the proposed compromise. Assets, machinery \$983, stock \$1,500, odd; total \$2,400. Liabilities \$5,460.—A. J. Evans, planing mill, Kincardine, has been located there for a number of years, and at one time was supposed to be in pretty fair shape, having practically a monopoly of the business; but for some time past he has not been giving his affairs the attention they required, opposition has sprung up, and he has lost business, and been going behind. His assets are shrunk, and he has been obliged to assign.

—Our correspondent at Oshawa writes:—The Dominion Bank has moved into its new quarters in the Atkinson Block corner King and Simcoe streets, Oshawa. The fittings of the new office and its vaults are quite up to date—The bonus of \$5,000 given by the town of Oshawa, to the Oshawa Railway Company has been paid to the company. This enterprise was originally intended to be a road operated by steam power, and the town in 1892 voted a bonus of \$15,000. Delays however took place but the result was in favor of the town and the road is now a standard 4 feet 8½ inches line operated by electricity passing through the streets of the town, with a loop to the east, affording a con-

throous street railway passenger service, and receiving delivery freight at the different factories through the medium of switches into their respective premises. On the right of way on the streets being granted the bonus was reduced to the \$5,000. The line extends to the harbor and is largely taken advantage of by passengers to the summer resorts at that point. Connection is had with all G. T. R. trains and passengers and their baggage are transferred at a very low rate direct to the hotels. A powerful electric motor—the first of the kind in Canada—is used to move freight.—The Harbor Co. will receive grain in cars up town the effect of which is to bring the harbor three miles nearer its northern customers.

MRS. Joseph Gauthier has entered an action for \$10,000 damages against the Banque Nationale, as a consequence of a judgment which maintained her contestation of a demand of assignment made upon her by the bank. The same plaintiff has also taken another action against the bank, claiming \$4,175.90 as a balance of account. This is an outcome of the absconding of Louis Larivee in February 1894. He was at that time a partner in the firm of Gauthier & Larivee, customs brokers of this city. Larivee defrauded the bank out of three or four thousand dollars by means of worthless cheques and fled. He was brought back and sentenced to two years imprisonment, but was released on the ground of ill-health about a month ago. The bankclaimed that the firm was responsible for his defalcation and made a demand of assignment upon Mrs. Gauthier, the other partner. They lost the case, principally on Larivee's evidence, and hence the present action.

—A DISPATCH from Liverpool says it is proposed to reconstruct the National Steamship Company so as to avoid compulsory iquidation. A provisional agreement to this end has been entered into. The new company will be called Leyland, Wilsons & Furness (Limited). It will be registered as possessing a capital of £250,000. The new company will take over the old company, paying for the business thus: £30,000 in cash, which will suffice to pay all the National Lines debts; 12,500 preference shares of £2 each and 50,000 ordinary shares of £1 each, the old company's preference shareholders getting all the new preference shares and half of the new ordinary shares. The other half of the new ordinary shares will go to the ordinary shareholders of the old company.

The abundant harvest in the Northwest coupled with the tolerable yield in Ontario has led to an unusual demand upon the Consumers Cordage Co. for binder-twine. At the rate with which the goods have been going into consumption the considerable quantity held over from last year soon found a ready market, and was followed by a steady pressure upon the company's manufacturing facilities. The quantity of binder twine called for in the Northwest is about double the requirements of former years, owing to the luxuriant growth of straw in all sections of the country.

—Our correspondent at Arthur, Ont., writes:—Adam Ballentine who has been in business here for the past thirty years or more is disposing of his stock and intends moving to Toronto shortly. The business will in future be carried on by his son.—The Commercial Hotel has again changed hands. Mr. Martin who some two months ago bought out L. Sargent has disposed of his interest to F. E. Morrison who formerly kept the "Queen's.—Harvesting is now pretty general but the weather for some days past has been broken and far from favorable.

—A NUMBER of heavy capitalized mining companies appear in the B. C. Gazette. Among them are the Iron Horse Mining and Milling Co., and the Kootenay Mining and Milling Co., both of Spokane, and each capitalized at \$1,000,000; the Crown Point Milling Co., also of Spokane, with capital of \$500,000; the Western Prospecting and Promoting Co., of Vancouver, \$100,000; and the Kootenay Consolidated Mining Company, of the same city, \$500,000.

—A MANITOBA cattle shipping firm are making trial export shipments of Chilcotan cattle from Ashcroft, B.C. The shipment will comprise 800 head of cattle. The result of the venture will be watched with interest by ranchers. Three hundred head of cattle per month are now being sent from the upper country to the Kootenay district. The boom in mining all through Kootenay will increase the population and cattle men in Kamloops and the surrounding country are hopeful that there will be good times for them shortly.

—A. J. Houghton, decorative painter, has assigned at the instance of Joseph Roy, with liabilities of about \$1,500, and assets of \$1,000.—Seraphim D. Marquis, real estate agent, has assigned on the demand of Auguste Leblanc. The assets are placed at \$19,300, made up of shares of the Dominion Ice Company and of real estate at St. Laurent. The liabilities exceed \$20,000. Among the chief creditors are: Banque du Peuple, \$2,500; Jacques Cartier Bank, \$1,700; Molson's Bank, \$1,500; Quebec Bank \$1,700; Banque Nationale, \$1,000; Banque Ville Marie, \$200; H. Lamontagne, \$1,300, and the following mortgages: Major Evans \$2,150; N. G. Korouack, Quebec, \$2,500; Adeline Maille, St. Laurent, \$3,000 and H. Meunier, Cartierville, \$3,000.

—F. J. Wesley & Co., manufacturers of wooden ware, of Toronto Junction, have assigned. The business was originally situated in Toronto, but was burnt out there in Sept. 1894, and moved to the Junction, the firm purchasing the premises and some machinery. F. J. Wesley, is, and has been, the sole partner for a number of years. He claimed last Jan. to have a surplus of over \$15,000, but made up of rather shrinkable assets. For some months past his position has been critical and he has been cramped, close run, and crowded for payment. Some of his creditors become dissatisfied, and consequently he has been been forced to assign.

—The Canadian Pacific Railway Company has just had completed two special military trains, which comprise fourteen cars for the men, two cooking cars, two Pullman cars for the officers, two cars for wines and stores, and two dining cars. The officers' cars are litted up in luxurious style, and contain state-rooms, lavatory, smoking-rooms, etc. Each train consists of eleven cars and engine, and has ample accommodation for nearly four hundred. With these fast war trains, the C.P.R. expects to be able to cover the distance from the Atlantic to the Pacific in five and a half days.

—The following are the chief creditors of Raphael & Hodges, commission merchants, of this city, who have assigned with liabilities of about \$10,000. Merchants Bank of Halifax, secured, \$3,880; Jaffe Bros., Dundee, Scotland, \$550; Shatham and Joachim, Germany, \$252; Thomas Adams & Co., Nottingham, Eng., \$905; J. Paton, Son & Co., Alloa, Scotland, \$415; Mrs. W. Raphael, Ballymena, Ireland, \$500; Wirth, Dyne & Co., Buhler, Switzerland, \$280; Montreal Cotton Company, Valleyfield, \$447; Williams & Co., \$191; J. H. Hodges & Co., \$194; W. E. Ross & Co., \$354; T. W. Raphael & Co., \$498; Blaiklock Bros., \$425.

—A VALUED correspondent in Ottawa sends us the following as bearing upon the paragraph concerning foreign exchange, page 359 last week: Extract from Section 71, sub-section (d) of the Bills of Exchange Act. (d) Where a bill is drawn out of but payable in Canada, and the sum payable is not expressed in the currency of Canada, the amount shall, in the absence of some express stipulation, be calculated according to the rates of exchange for sight drafts at the place of payment on the day the bill is payable.

#### LEGAL RECORD, &c.

Week ended Aug. 28th, 1895.

The following is a record of transactions and cases in our Canadian courts of law, comprising Writs Issued and Judgments rendered for sums of \$250 and upwards, and chattel Mortgages and Bills of Sale for sums of \$500 and upwards:

WRITS ISSUED, PROVINCE OF QUEBEC.

August 21st.

August 218t.
Cap Rougo—D. Laine et al vs. J. E. Bedard\$ 450 Delorimier—Dme. R. D. Chevalier vs. Dme. D. Rolland. 500 Lapresentation—Rev. P. A. Lefebvre vs. d. Chenette 398
Montreal-Can. Trading & Shipping Co. vs. C. E. Carbonneau,
\$5,830; A. Bertin vs. C. E. Carbonneau, \$800;

The Largest Cigar Manufacturers in the Dominion.

#### Financial.

· Thursday Ev'g., Aug. 27th, 1895.

The demand for money to move the crops has set in in the United States and the New York banks have lost \$5,141,700 in legal tenders during the week as a consequence. It is going principally to the West, as the South, as yet, have made few demands for currency. The usual stiffening of interest rates, however, which has heretofore marked the drain of currency from financial centres, is this year conspicuous by its absence. It is now eviden that gold exports on any large scale have ceased. The syndicate have succeeded in covering their short contracts for sterling The banking house which has been reimporting U.S. bonds from England and shipping gold against them, has sent its last consignment of \$600,000 in gold to England this week and the deposit of a further half million in gold by the syndicate maintains the Treasury reserve at the supposed safety limit. As a consequence the moderate drain of gold exerts no influence on the speculative market, In fact there are hints of a further offering of security bills drawn against London's recent purchases of stock which will effectually bring the sterling exchange market down to below the level of profitable goldshipments although conservative bankers state that much of the recent buying

on London account was really to cover short sales and hence that very little exchange will be drawn against it.

Money continues dull and easy. London call money and short loans are made at a 1/4 to 1/2 per cent., and the rate of discount in the open market for three months bills is only 1/2 per cent. In New York money on call is still 1 per cent. Time money is quoted at 11/2 per cent. for sixty days, 2 per cent. for ninety days, 21/2 per cent. for four months, and 3 per cent. for six months on good mixed Stock Exchange collateral. Commercial paper is quoted as follows: Prime endorsed bills receivable at 3 to 3} per cent. choice single-name paper at 4 to 41/2 per cent., and good at 5 to 6 per cent. In this market money is unchanged at 4 to 41/2 per cent., on call, and 6 to 7 per cent. for discount.

Sterling exchange continues firm and high, owing to the very limited supply of bills offering. Posted rates for sterling in New York are about 1/2c under those ruling at last writing. They are \$4.89 to \$4.8916 for long bills and \$4.90 to \$4.9016 for demand. Actual rates are: Long sight drafts bills, \$4.881/2 to \$4.881/4; \$4.89% to \$4.89%, and cable transfers, \$4.90. Francs are quoted at quoted at: 5.171/2 to 5.161/8 for long and 5.161/2 to 5.15% for short; reichsmarks, 95 7-16 to 95½ for long and 95¾ to 95 13-16 for short guilders, 401/4 to 40 5.16 for long and 403/8 to 40 7-16 for short. Locally rates are also an 16th to 3-16 lower. Between banks sixties are 9 11-16 to 34, and demand 9. 15-16 to 10. Cables are 10.1-16, and New York funds 3-16 to 5-32 discount. Over the counter sixties are 9% to 10; demand, 10% to 1/4; cables, 101/2, and New York funds 1-16 premium. Bar silver in London continues firm at 801/2d under a fair enquiry for China. In New York commercial bars sell at 67 to 671/c, and fine government assay silver at 671/4c to 671/4c.

The ease of call money has given the "bull" speulators a good chance to force the market up, and with a few brief reactions for profit taking, prices have risen steadily during the week and close higher than the opening in every case except that of Toronto Street Railway where the desire to realize has hammered the stock down to 81½ on sales of 4,005 shares. Pacific has advanced 25% points during the week on the glorious crop prospects in the Northwest, and bids fair to go higher yet. About 1,700 shares changed hands at steadily increasing figures. Both the Street Railway stocks were active and closed

fully 2¾ points higher than they opened. Cable also gained ¾ of a point on the week, and at the close the market was strong with a distinct upward tendency. The following are the transactions of the week as per Chas. Meredith & Co. stock-brokers:

#### MONTREAL WHOLESALE MARKETS

Thursday Evg., Aug. 29th, 1895 Trade continues quiet in all lines although the current of business is fully up to the normal and prices in most; lines are firm with every prospect of an advance in many of them before long. The weak points are dairy produce and flour. Cheese is in a most anomalous position. The English market is below the spot market and this, in turn, is below the prices paid in the country. In fact it looks like a triangular trial of strength. The factorymen seem convinced that the English need our August cheese, and hang firmly on to prices far above the cable limit, while exporters only offer 8c for finest Ontario makes on spot, and the cable clings obstinately to 38s. Butter is in much the same position. Holders views are above exporters limit and only a local trade is doing in finest fresh goods, with ordinary and medium grades entirely neglected. Warm

weather and heavy receipts have weakened the egg market and only new fresh stock brings our outside quotations. Hay is weaker, as the English market is glutted with cheap Dutch hay of unusually excellent quality. Hides are very firm, and desirable lots are eagerly taken up at our quotations. Leather is also firmer, and some large sales of No. 2 slaughter sole for future delivery are reported. Boot and shoe men have used up nearly all their stock of cheap leather, and it is predicted that they will be in the market for fresh supplies inside of two weeks. Iron and the metals are strong and advancing. Barbed wire has risen 1/2 cent, and may go higher yet. Copper is up 1/2 cent, and an advance in bar iron is among the immediate possibilities. In the United States Bessemer pig has advanced \$2 per ton during the week and is now \$7 above the lowest point touched this year. This renders holders of Canadian and Scotch pig very firm in their views. Cement is quiet and un-changed. Petroleum is very firm and the oil firms are getting busy again. In groceries the principal activity is in tea and canned goods. The first decline in refined sugar in the United States since May took place this week and tended to still further weaken the sugar situation here, so that although small lots of granulated still com mand 41/8 cents, for a round lot 4 cents would be readily accepted. Chemicals are dull; but the market has a firm undertone. In drygoods the steady current of small advances both in this market and the United States has added firmness to the situation. The increasing strength of the primary markets has given confidence to wholesale houses here, and prices are very firm in every line. Locally trade continues dull, as is usual at this season of the year. But the return of the summer exodus will take place in a week or so and the reopening of the schools will stimulate city trade. Remittances continue a subject of complaint, and the slowness of collections is still one of the unpleasant features of the week's trade. Outside of this the prospect is decidedly hopeful.

CHEMICALS—Locally trade is very quiet, as is usually the case at this season of the year. Advices from London say that Cassia is advancing in consequence of scarcity, with business on the spot up 6s 3d for fair quality. For arrival nothing offering. Aniseed dearer, spot sold up to 6s 9d, and to arrive at 6s 2d, c.i.f. Camphor very firm, with sales in Japan at 182s 6d, c.i.f., and buyers, China at 107s, c.i.f. Citric acid is 14d a 1s 13d; considering in the control of the control of

CEMENT & FIREBRICKS. - There is no change to chronicle in cement. The arrivals of the week are 2,000 barrels English cement and 45,000 fire bricks. Prices are unchanged. In small lots we quote: \$1.90 to \$2.05 for British cement and \$1.80 to \$1.90 for Belgian. Firebrick move out slowly at \$15 to \$21 per M as to brand.

CHEESE, BUTTER AND EGGS—The cheese market is in a curious position. The cable remains unchanged at 38s. Thus the English market is below the spot market and this again is below the figures being paid at country points. It looks as if it was a trial of strength between the factory men and the English consumer, and it is doubtful which will come out on top in the long run. This renders the market the long run. This renders the market here quiet and irregular, although there is nere quiet and irregular, although there is more or less doing in fine August makes that are within buyers views. The business done is principally in French Canadian cheese at 7½ to 7%c. Finest Western is equoted at 8 to 8½; but as this is more than exporters can afford to pay, even for August make, no business is doing. For the earlier makes the demand is very dull and prices range from 7 to 74. even for August make, no business is doing. For the earlier makes the demand is very dull and prices range from 7 to 7½ cents. There is no improvement in either the demand or prices of butter. A fair local business is doing for city requirements. But it is only for the best goods, and medium grades are entirely out of sale. Finest fresh creamery sells at 17 to 17½c, and on earlier makes buyers ideas are 16½ to 16½c, which is from ½ to ½c under holders' views. Township dairy is in small supply and sells readily at 15 to 15½c when the quality pleases the buyer. Nothing is doing in Western dairy. Offerings are large and the market is dull at 14 to 14½c. Receipts of eggs are still large and the change to warmer weather has still further weakened the market. New fresh stock jobs at 11 to 12c; but the bulk of the offerings' are more or less mixed with held and old stöck and these receivers find difficulty in marketing without meeting buyers views in every possible way. Sales have been made at 0½ to 10½c and this is probably a fair quotation. Potatoes are unchanged. We quote \$1 per barrel and \$5 to 45c per bag. Maple sugar is dull New sells at 6½ to 7½c and old at 4 to 5c per 1b, and in tins 50 to 60c each. The following were the sales at the cheese-boards:—Belleville, 650 boxes at 8c; Madoc, 645 boxes at 81-16; Napanee, 526 boxes at 8c; Woodstock, 680 at 7¾, at 8c; Madoc, 645 boxes at 81-16; Napanee, 526 boxes at 8c; Woodstock, 680 at 734, 200 at 7 11-16c and 725 at 756c.

DRY Goods .-- Advices from England and the United States are both in the direction of greater firmness. The representative of one of the largest commission houses in Bradford in this country has been recalled, as the mills he represents are choked with orders. Prices have advanced 15 to 20 per cent on medium grade woollens and worsteds for the spring trade, and it is expected that prices will rule still higher for the fall of 1896. In the United States a number of advances ranging from States a number of advances ranging from 1/4 to 1/4 c per yard are reported in cotton goods. The advances in this market have already been chronicled, and it is evident that, with the increased cost of raw material to face, manufacturers are bound to get better prices for their goods. The city trade of the week has been dull. People have not yet drifted back from the seasons or the lakeside, and the med of People have not yet drifted back from the seashore or the lakeside, and the mob of American tourists who are now so much in evidence in the city buy nothing except a few souvenir spoons, and benefit no one outside the hotels and the hackmen. The suburban trade is better, and but few complaints are heard from them. Trayellers are sending in fair orders, but report country merchants still disposed to be cautious and no indication of any launching. country merchants still disposed to be cautious and no indication of any launching out in sight. Money is still a source of complaint. In spite of good prices for hay and an improving market for dairy produce, remittances do not come in as they should, and the thread-bare excuse

# CAW'S "SAFETY" FOUNTAIN PEN

Can't leak any way you carry it. Can't blot or dry up.

VIEW OF PEN CLOSED.

## A New Fountain Pen on a New Principle.

All the faults of other fountain pens overcome. When through writing, the pen-point is drawn into the ink reservoir, which is corked up tight by the safety cap A, so that it can be carried in any position without leaking, while the pen, being immersed in ink, is kept clean and moist; and when opened will write the instant it touches paper. One twist of the wrist opens it for filling; another twist and it's ready to write. No joints to ink-the fingers. No threads to get gummed up. Simple in construction, and perfect in operation.

Caw's Safety Fountain Pen is safe to buy and safe to use. Money refunded if not satisfactory.

CAW'S PEN AND INK CO., 168 BROADWAY, New York City.

PATENT FOR SALE IN CANADA.

#### P. J. CAHILL'S PATENT ADJUSTABLE UNIVERSAL CLOSET SEATS .

This patent for Canada is for Sale Reasonable.

No. 522,253. Patented July 3, 1894.

Fastening directly to bowl with lock nut, in one minute's time. Adjustable to fit Washout Bowls Nos. 1, 2 or 3. Special prices for one dozen or more seats sent by freight.

## PATRICK J. CAHILL,

Inventor and Sole Owner.

52 & 52 I-2 John and 18 & 20 Jay Sts.,

Under side of Seat, showing patent adjustable attachment, which applies to No. 3 Washout Closet, with bent Flush Pipe connection.

Utica.

that the farmers are all in the fields, and too busy to pay their bills, brings very little comfort to the wholesale houses who stand in need of the funds.

FLOUR AND GRAIN-Flour is weak and lower in sympathy with wheat and we mark down all grades this week with every prospect of a further decline in the near future. Outside brands of Manitoba strong bakers have sold at \$3.60 in car lots and fresh ground straight rollers from new fresh ground straight rollers from new wheat are offered for export at \$3.25 to \$3.80 on track here. We quote in a jobbing way winter wheat patents \$4.15 to \$4.25, spring wheats \$4.15, straight roller \$3.75 to \$3.90 and Manitoba strong bakers \$3.90 to \$4. Oatmeal is dull and also lower. We quote \$3.70 to \$3.80 for standard in barrels. Feed is scarce and firm. Bran sells at \$17, shorts at \$19, and moullie

at \$22 to \$23 per ton. The local grain market is more active and several round lots of Canadian new crop peas have been placed on export account for future delivery. Oats are neglected, at 34½ to 35c for No. 2. Sales of 85,000 bushels American wheat for through shipment have been can wheat for through shipment have been made on p.t., and the market generally is livelier under a better demand from exporters. Cable advices to the Board of Trade were as follows:—Cargoes off coast, wheat rather easier, maize quiet. Cargoes on passage and for shipment, wheat, rather worse; maize easy. Country markets, English partially 6d to 1s cheaper. French, partially 50 centimes to 1 franc cheaper. Minneapolis first bakers' flour, 18s 3d. Liverpool wheat easy; spot maize quiet. quiet.

FRUIT-The supply is abundant and

#### Nine-Tenths of all the Staves Manufactured in this Country are Cut with our Knives.

M. Gregg & Son., Stave Jointer, Planer, Veneer and other Knives.

ROCHESTER, N.Y. Circulars "How to cut Timber for Stave and Heading Bolts," furnished on application.

prices rule somewhat easy. Musk melons sell at \$3.50 to \$7 per basket of 15. Peaches are a little scarce and sell at \$1.30 Peaches are a little scarce and sell at \$1.30 to \$1.40 per box. California plums \$1.25 to \$1.40. Pears are \$2.50 to \$2.75 per case and \$2 to \$2.50 in kegs. Lemons are scarce and dear and \$5 per box is necessary to secure choice fruit. Summer oranges run at \$3 to \$3.50 per box, 200 size. Bananas are a drug in the market and move off slowly at 50 to 90 cents. Canadian plums are commencing to come in and sell at 80 to 90c per basket. Grapes are, in full supply. We quote Delawares at \$3.50 in carriers. Rogers red at 65c for 10 lb. baskets, blue 40 to 45c, and Niagaras 60c. GROCERIES .- A good lot of ten is offer-

ing, principally to arrive, and we hear of transactions in Japans at a range of 14 to 20 cents in round lots, with a fairly active market. Not much is going out into the country, nor is much expected to do so until the end of next month when all the talet the end of next holds when at the fairs are over. But most dealers are down to their last box and are buying now from hand to mouth. When they see their way clear before them they will be in the market again in earnest. Coffees are neglected. Advices from its say that at the close of the crop year if the figures furnished by the committee of factors are accepted, it appears that about 300,000 bags are carried over to supplement the 1,750,000 bags estimated for 1895-96. At the best, supply from Rio and Santos will show a sharp reduction on the 6,600,000 bags the last crops produced and although with the actual produced, and although with the actual condition of the trade in Rio, a serious adcondition of the trade in Rio, a serious advance in currency prices seems very doubtful, it certainly looks as if prices had been too low during the past year in consuming markets, and that the producing centres are now entitled to some compensation. Sugars are practically unchanged. For a small lot of granulated 4%c would be asked; but for round lots 4c would be readily accepted in view of the fact that the New York market has dropped from % to New York market has dropped from  $\frac{1}{16}$  to 3-16 on refined during the week. Yellows still rule at 8, 1-16 and upward, Sales of Porto Rico molasses are reported in 25 puncheon lots at 32c. and are quoted 38c. to 34c. Barbadoes firm at 35c to 36c in round 34c. Barbadoes firm at 35c to 36c in round lots, and 37c in small lots, with business on this basis. Canadian syrup has been placed in half barrels at 1½c to 2½. Canned goods are fairly active and we hear of round lots being placed at 75 cents for corn and tomatoes, and at 80c up to \$1.45 for peas. Quotations for California fruit are nominal at present as none will come forward before the 20th of next month. Coast advices say that orders for London layer raisins are heavier than usual, and hardly think lower prices will be named than those at which early shipments were sold. Few orders for loose rasins had been received up to date. It was expected that a few cars of new prunes would be ready for shipment within ten days or two ready for shipment within ten days or two ready for shipment within ten days or two weeks. Most of them are running to large sizes and some trouble is anticipated in satisfactery filling the four sizes a little later. Latest letters from Patras quote new crop currants from 8s 9d up to 22s, as to quality. The first quotations on Valencia raisins by direct steamer to Montreal were made this week. The offers were 12s 6d to 13s 6d on fine off stalk fruit. This is equivalent to 3%c to 4½c laid This is equivalent to 3% to 41% laid down here. On currents in the same connection offers of 9s are made, or about 3c nection offers of 9s are made, or about 8c in Montreal. Cable offers on prunes range from 18s to 19s. The news on this season's nuts for fall shipment, is very firm. Cable advices this week on Tarragona almond, are from 2 to 3 francs higher than they were a week ago. The price asked is about equivalent to a cost laid down here of 11c to 11½c. For Grenoble walnuts 70s cost and freight is asked, or about 10c to 11c laid down. 11c laid down.

Hors-Nothing is doing in new crop as yet, beyond the few transactions in (seedlings already noted. No prices on new hops can be quoted till the close of next week; but the outlook is not promising.

Return of Bank British North America includes Canadian business only. Bank of British Columbia bonus of 1 per cent equal in all to a dividend of 7 per cent per annum Imperial Bank bonus of 1 per cent equal in all to a dividend of 9 per cent per annum. La Fanque du Peuple suspended payment.

HAY.—The market is weak and the demand dull, owing to the flooding of the English market with Dutch hay of unusually good quality. Cables quote Canadian hay 64s, c.i.f., Liverpool, 67s London, 72s Glasgow, and 56s Bristol. Locally prices on spot are \$10 for No. 1, and \$9 for No. 2. Farmers got \$1 less at country points.

IRON & HARDWARE.—A number of advances in rates are again a feature of the week in sympathy with the stronger position in both England and the United States. Ingot copper is again marked up to 12½ to 13. All grades of sheet iron are advanced from 5 to 10 cents per 100 lbs. Zinc spelter has risen to 4½c, and a further advance in galvanised iron is expected

before a week is out. Barbed wire and staples have been put up to \$8.50 for both provinces, delivered for 500 fbs. and over, up to 25 cents freight. Wire nails are now 75 per cent off list delivered for Ontario for 500 fbs., and over up to 25 cents freight and 75 and 5 per cent, f.o.b. Montreal, for Quebec. In the United States the general iron and steel market is about as it was at last report, with the exception that there is quite an increased movement in the pig

iron market, and big sales are being made. This is owing to the belief that there is going to be quite a scarcity of iron before long, and some of the biggest buyers have entered the market and are purchasing everything they can get. In other branches of the market the outlook is fully as good as it was last week, and in some lines better. In structural material there is still a rush, and builders are still being retarded because orders cannot be

delivered. In the general lines of finished iron and steel prospects continue to improve.

Livis Stock—Stronger cables and active trade in London have improved the tone of the market here. Liverpool cabled prices show an advance of 14 to 34c over last week's figures, choice Canadian cattle at Liverpool being quoted at 11%c and at

London 12½c. The feeling in sheep was firm and values were unchanged at 13c and 13½c. In this market 4c is paid for prime export cattle and 3½c for fair steers. Good butchers cattle bring 3½ to 3¾c, fair 3 to 3½c, and common 2½ to 3c. The supply of sheep was light and only a few small lots were obtainable for export at 3½c per lb., while butchers paid \$2 to \$2.75 each. The demand for lambs was good and prices were firmer at \$2 to \$2.75

## LEHIGH VALLEY CREOSOTING COMPANY.

Office: No. 1 Broadway, New York. o Works: Perth Amboy, N. J.

Built in 1886 by the Lehigh Valley Railroad Company, Leased and operated by the Lehigh Valley Creosoting Co., incorporated 1887.

#### Lumber, Piling and Ties treated with Dead Oil of Coaltar (Creosote.) Creosoted Lumber, Piling and Ties Furnished.

Rail Connection at Perth Amboy with Lehigh Valley Railroad, Pennsylvania Railroad, and Central R.R. of N.J. Direct Water communication from New York Bay.

Creosoting is employed successfully in the protection and preservation of Timber used for:

Breakwaters, Dry Docks, Coal Docks, Bulkheads, Dredges, Vessels, Wharves, Dykes, Scows, Cribs. Boats,

Floating Elevators, Underground Conduits, Foundation Timbers, Telegraph Poles, Paving Blocks, Cross Ties, Fence Posts,

Buildings, Coal Bins, Box Drains, Bridges, Trestles, Culverts.

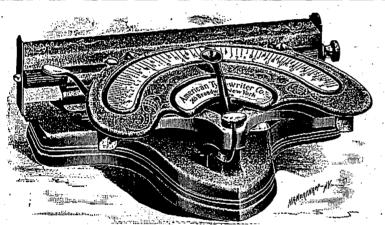

This process is the only one known to be absolute proof against the destruction of marine works by the teredo, and is a sure preventive against rot or decay of timber under any conditions. Recommended by the "Committee on the Preservation of Timber" of the American Society of Civil Engineers, as the most effective process for marine works and timber in very wet situations.

Crecosto Oil is not dissolvable in water like metallic salts and the heavy grades made from coal tar will not weak out in running water. Crecosting with COAL TAR CRECOSOTE under high pressure, after the proper desiccation and proparation of the timber, is not a new patented process. Its success when well done, is certain. Introduced in England over 60 years ago and since thoroughly tested in all parts of the world.

Address: H. COMER, sup't

Lehigh Valley Creosoting Company,

No. 1 BROADWAY, N. Y.

Model No. 2 Improved American Typewriter, \$8, IS NOW READY.

The latest model of the first success-low-priced typewriter.
Improved construction and better finish. Sold by the makers at price slightly above the manfacturing cost. Send for catalogue and letter written with it. Agents wanted everywhere.

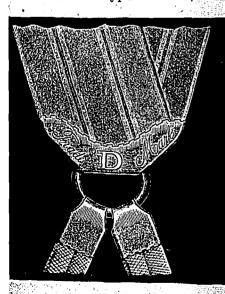

American Typewriter Co., Broadway & Chambers St., New York City.

each as to quality. Good to choice calves sold at from \$5 to \$10 each, and common at from \$2 to \$5 each. Hogs are strong and prices show an advance of 25 to 35c per 100 lbs. Ruling prices were \$5.10 to \$5.25. Freight space is in fair demand and it is believed that a good deal of that offering for the balance of the season has been secured. The SS "Cynthiana" is nearly all let at 40s for cattle, 42s 6d, for been secured. The SS "Cynthiana" is nearly all let at 40s for cattle, 42s 6d, for sheep and £4 for horses. Quoted rates are 42s 6d Liverpool, 40s London and Bristol, and 45s, Glasgow. Shipments to end of week, 24th August, 57,371 cattle, 65,134 sheep, 7,903 horses.

LEATHER AND HIDES-There are no changes in leather values to chronicle, but the market is perceptibly more active and more business is doing. One feature of the week was a sale of 10,000 sides No. 2 slaughter sole at a shade under our quotaslaughter sole at a shade under our quotations for future delivery. As the sellers were heavily stocked, and were making a profit of between 5 and 6 cents on the leather, having bought it some time ago, they were well able to shade the current figures. The enquiry from England remains good. English tanners demand more money for their leather in view of the high cost of hides, and as stocks are light, the market is firm. In this market stocks are not accumulating and shopmen stocks are not accumulating and shoemen are commencing to get out of stock. It is believed that the beginning of the month will show a marked improvement in the local demand. The hide market continues firm at unchanged rates. Anything like firm at unchanged rates. Anything like good quality is snapped up at once as fast as they arrive. Locally prices are still 8½ 7½ and 6½c for Nos. 1, 2 and 3 to butchers with tanners paying a cent more for sorting, curing and inspection, but it is said 10 cents has been paid for choice No. 1. No sheepskins are now in the market but lambs are plentiful. We mark clips and lambskins up to 35c. Tallow is firm at 6 to 6½c for prime refined and 5 to 5½c for No. 2 quality.

Petroleum-Dealers are busy and the market is very firm. We quote American oil in car lots, prime white at 161/2c, waterwhite at 18c, and astral at 19c. In small lots 1 cent more. Canadian oil 14%c in car lots and 16c in single barrels. Benzine sells at 14% to 16c for Canadian and 28c for American.

PAINTS OILS AND GLASS.—Business in paints is reviving and the demand is decidedly more active. Dry leads are all very firm at the recent advance and may possibly advance again owing to the strong posi-tion of the crude metal and the short supply in corroder's hands. There is no change in the position of linseed oil here, but prices in England have advanced and this strengthens holders views. Steam refined pale seal oil is in good demand from country points for use on agricultural

There's Style about this fastener for the back of a Brace It is Small Neat Durable Cant Break Away. And unlike the multitude of big tin Clasps that are objectionable to the wearer who don't want his back covered with metal. It's a seller every time.

THE ANGLE LAMP CO. 76 Park Place.

N.Y. CITY. J. E. Bouchelle, Mgr.

machinery and we increase the outside limit to 38 cents. Cottonseed oil is dull. The advance in tallow has directed soapmakers attention again to the off grades and it has also led to more inquiry from exporters for off yellow oil and some 6,000 harreds have been tallow at 2616 for her barrels have been taken at 26%c. f.o.b. New York. It is reported from Momphis that about all of the crude oil, some 1,500 bbls, held by mills there, has been bought during the week at 20%c loose.

Provisions-Only a limited demand be reported can be reported and prices are practically unchanged. Canadian short cut moves slowly at \$15.50 to \$16 for clear, and \$17 to \$17.50 for mess. City cured hams and bacon sell at 9 to 11c. Canadian lard in pails brings 94 to 1014 & common refined 74 to 74. The Chicago provision market was weak and pork broke 121/2 to market was weak and pork broke 12½ to 30c, closing at \$9.20 August and September; \$9.27½ October; \$9.77½ January. Lard declined 5 to 7½c, closing at \$5.87½ August and September; \$5.92½ October; \$5.95 January. Short ribs closed at \$5.65 August, and September, \$5.70 October; \$5.70½ January. The Liverpool provision market was unchanged, pork closing at 58s 9d; lard at 81s 6d, and bacon at 35s to 37s 6d. to 37s 6d.

RUBBER-The market is quiet and without material change in Para grades. Very little is doing for forward delivery. Latest cables quote up river 5,600 reis for fine and 8,700 reis for coarse. Exchange 10%d per milrei. Fine qualities of Central and 3,700 reis for coarse. Exchange 10%d per milrei. Fine qualities of Central American sell readily owing to the scarcity of coarse Para, but Africans are weaker. We quote cash prices, f.o.b., Boston: Fine Para, new, 72 to 78½c; old, 75 to 80c; coarse, new, island, 46c; up river 57; Caucho, strip; 50c; sheet, 44c.

Woon.—There is vory little new to chronicle in wool. The Albatross with 1,200 bales of Cape on board is now two weeks overdue. Most of her cargo was sold to arrive at a fair advance on last months prices. Canadian combing fleece has practically all been taken up. The closing price was 25½ to 26c, which is 4c higher than for years past. Very little clothing or ordinary fleece remains & 23 to 24c is readily paid for what there is. The market is firm all round and further add? market is firm all round and further ad vances are looked for.

## THE Purdy Electric Centrifuge.

THE WOOD ELECTRIC MANUFACTURING CO.

18 and 30 West Randolph Street;

Diamond File Works of the G. & H. Barnett Company, of Philadelphia, have for over thirty years been sold under the name of "Black Diamond Files," and as such have achieved a reputation which has caused a large and steady demand for them throughout the United States and abroad. Recently, it has come to the notice of the Company that other parties have, by the use of the word "Diamond" in their corporate title, or in connection with the goods, or by the use of a figure of a diamond, been enabled to take adv tage of the reputation of the Black Diamond Files by selling, at greatly reduced prices, inferior goods to the trade, as Diamond Files, the trade being misled into the belief that they were purchasing the Black Diamond Files manufactured by the G. & H. Barrett Company. The left the G. & H. Barnett Company. The latter company has, in a number of suits, maintained its rights to the word "Diamond" in connection with files, and for the protection of the trade, it hereby cautions its customers and others, in purcautions its customers and others, in purchasing files, not to be misled by any unauthorized use of the word or figure "Diamond"; but to be careful that the files which they, purchase are the Black Diamond Files, stamped not only with the figure of a diamond but the name of G. & H. Barnett Company, and that they pur-chase the same from authorized and ac-credited agents of the Company,

AN \$8 TYPEWRITER.

The American Typewriter Co. of 265 Broadway, New York, have had their No. 1 Typewriter on the market for a little over two years, and to-day thousands are in use throughout this country and Europe, doing work hitherto thought impossible for any but the high priced machines. Its principles of mechanism and plan of operation have had the severest tests, and in every particular have amply fulfilled all claims that were ever made for it. They have found, however, that the greatest demand is for a better machine than it is possible to make for this very low price. They have, therefore, at a slightly increased cost, developed these same principles, added new ideas, and improved the construction completions above No. 9 In construction, completing a new No. 2 Improved American \$8 Typewriter, which they are confident will meet the require ments of all but the professional operator; It is as near perfection as the best of tools, material and experienced workmanship can make it, and is beyond the reach of any possible competitor. In view of the large sale of the No. 1, and the still larger sale which is anticipated for the No. 2, they have increased their capacity to 100 ma-chines per day, thus enabling them to fill orders the instant they are received and

AMERICAN BATTERY CO., 25 So. Canal St., Chicago, III. PRODUCT OF THE Under Lice se of-

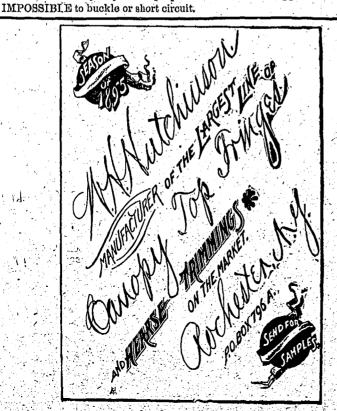

Svracuse Storage Battery Co.

The BEST in every way for all purposes where it can be applied.

The Consolidated Electric Storage Co. (The Brush Patent.)

Factory at PHŒNIX, N. Y.

Office: 38 & 39 Herald Building, SYRACUSE, N.Y

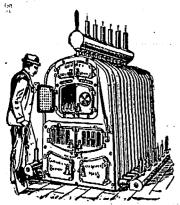

produce. The old way of copying letters has been so annoying, results so unsatisfactory and the new way with this machine is so easy, results always the same and perfect that it is strange it was not invented long ago; strange that the bungling, roundabout method should come before the simple, satisfactory one. The Automatic Copying Machine is a simple contrivance, neat, durable, easy of manipulation, saves time, gives perfect results, and the copies are afterwards accessible without indexes and books. It copies letters by rolling a continuous sheet of fine copying paper off of one roller across dampening strips on to another roller. This is all there is about it. All there has as all there is about it. All there has to be done is to feed the letters in as fast as you can. They are copied, and copied perfectly, without the labor and annoyance incident to copying books, dampening cloths, oil sheets and letter presses. One stroke cuts the continuous sheets into letter sheet lengths and your copy is ready to be attached to letter answered and filed In letter cabinet. It is a machine that must make the old presses groan as they have made their owners groan and long for an easier, simpler way of copying

For Extracting WATER, OIL and other matter from STEAM or other GASES

## Simplest, Cheapest, Most Efficient WHY?

BECAUSE it is the only separator constructed on scientific principles.

BECAUSE it is the only device which immediately removes and isolates moisture from the currents of steam and

effectually separates oil from ammonia gas.

BECAUSE the separating action is applied at each convolution of the worm, thereby combining several separators in one and constantly wringing the steam dryer.

Furnished on 30 days! trial. Send for Illustrated Catalogue.

Satisfaction Guaranteed.

#### A NEW PULLEY.

The Societe des Hauts-Forneaux de Maubege (Nord), France, are, it is said, placing on the market a pulley which obviates the necessity of cutting keyways on the boss of the pulley or on the shafting, it being arranged to autometically fix itself on the shaft. For this purpose the boss is hollowed out at one part, the bottom of the recess being semi-circular in form, eccentrically to the shaft. A steel pin is placed in this recess, and, by reason of the eccentricity of the latter, when the belt is given a slight movement the pin belt is given a slight movement the pin becomes tightly wedged, thus automatical-ly fixing the pulley.

SOME 750 miles of the great Siberian Railway are open for traffic viz: Chelabinsk to Omsk, in the west, 500 miles; and Vladivostock to Grafskaja, in the east, 250 miles. Thus Omsk is placed in direct communication with Moscow and St. Petersburg. Of the total length of 6,000 miles from St. Petersburg to Vladivostock on the Pacific, about 3,700 miles have still to be built. to be built.

-"DID I understand you to say that Thompson was a farmer?" "Good gracious, no! I said he made his money in wheat. You never heard of a farmer doing that, did you?"—Beatrice Democrat.

## The Kingsley Patent Water Tube Safety Steam Boiler

Is the most Rapid and Economical in the World.

t economizes:-

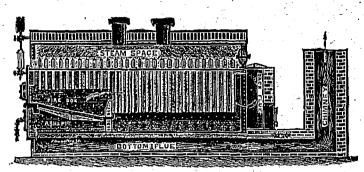

SPACE,

FUEL,

BRICKWORK,

LABOR.

It gives absolutely DRY STEAM.

It will pay for itself in in three years in the saving of fuel as compared with any other boiler now in the market.

Satisfactory references to Prominent Steam Users in Montreal, Quebec, St. John, etc., etc., furnished on application to

Y., 4 Bollers; Boston Plate and Window Glass Co., Boston, Mass., 2 Bollers; Hoffman Brothers & Drescher, Syracuse, N. Y., 1 Boller.

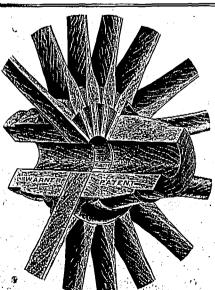

THE RANTON PATENT BOILER.—This Boller comprises the best features of both tubular and water tube boiler. It has been on the market three years, and has given the highest satisfaction wherever used. Its principal points of superiority are:

ECONOMY—Experience shows that the Ranton Patented Boller is an economical one to use; some of our customers claiming a saving of one-third the amount of fuel used under other bollers in doing the same work.

EASE OF CLEANING—It will be seen at once that every part of the boller being easy of access that it is easy to keep it clean. The vertical tubes will neither hold scale nor soot. These are valuable features, which persons in charge of steam plants will appreciate.

DURABILITY—Every boiler is made under the supervision of the inventor, of the best materials, in the most careful and workmanlike manner. Its construction admits of very strong bracing, and this, together with the case of cleaning, ensures the probable life of the Ranton Boller being longer than the ordinary. We will submit specifications and prices upon any size from 30 to 250 horse power.

# 

To capital, skill, observation and truth, we attribute our success. Capital to buy on the very best terms. Skill in knowing how, when and where to buy. Observation from the fact that from ocean to ocean, we know the requirements of the trade, in the different provinces, in our various departments. Truth in representing the superior value of our goods by facts and figures; which secures for us the confidence and support of such a large number of customers.

Our travellers visit every city and almost every town and village between Cape Breton on the Atlantic and Vancouver Island on the Pacific, showing a full range of samples in all our regular lines. While soliciting through them, your esteemed orders, we would like to impress upon you the importance of visiting our warehouses. Very often we secure special lines, in novelties, clearing lots. manufacturers' overmakes, etc., etc., that are not sampled to our travellers. This is one of the many advantages to customers visiting our warehouses; as they have an oppprtunity of inspecting all these special lines.

Our purchases for this season's trade, were large and made before advances took place.

In some lines, our repeats, we already know will be at advanced prices.

We would advise you to place your orders with us at once.

### PERFECT PRESS MOTOR.

J. W. OLIVER, Editor-Proprietor of
Yonkors, N.Y., "Statesman," says:
"I was associated with Robert Hoo over 40
years ago and have been in the printing business
all my life and used all kinds of motors. I can
truly say that the Tuerk Motor has given me
more pleasure than any piece of machinery I
ever used. For ten years I used and am now
using a No. 13 nut governor to run three large
presses, a folder and several jobbers."

Note.—At Yonkors the vater is metered, price
averages about 12 cents per 1000 gallone, pressure
90 lbs, Motor running about all the time at a cost
of from \$1.00 to \$1.25 per day. No other Water
Motor in the market can come anywhere near
this record for economy. Others have tried it.

David Dexter,

Managing Director.

## WORTH KNOWING

"It is the safest and fairest policy I have ever seen,"

was the remark made by a prominent representative of one of the largest and best American Life Insurance Companies when he had carefully examined the Ordinary Life Policy of the Temperance and General Life Assurance Co.

This is the only policy offered to the Canadian public that can neither lapse nor expire, as to its paid up value, till death ensues, after three annual premiums have been paid on it.
