MILL OWNERS and STEAM USERS ATTENTION! Hollands' Combined Henter and Condenser. Patented August 1882.

FAR EXCELLS ANYTHING OF THE KIND NOW IN USE.

USE.

1st. Because of its simplicity of construction. 2nd. It requires no morewater than necessary to supply boiler 3rd.—It works purely automatic, and cannot possibly get out of order. 4th.—It is small and takes but littlefroom. 5th.—It makes the water bolling hot with the exhaust steam, creates a partial vacuum, relieves back pressure, and gives more power. 6th.—We claim, with the "Holland's Combined Heater and Condonser," to save 25 per cent. of the fuel. Price list: 2-inch, \$50; 3-inch, \$75; 5-inch, \$120. Highly recommended by parties having them in use. Manufactured by WILLIAM CLEGG, Machinist and Machinery Broker, MITCHELL, Ont.

Mercantile Summary.

MESSES. ISAAC BURPEE, E. R. Moore and Charles E. Burpee, of St. John, E. G. Scovil, of Simonds, and E. R. Burpee, of Bangor, have filed in the office of the New Brunswick Provincial Secretary a memorandum of association for the incorporation of a company, to be styled The Coldbrook Iron and Steel Manufacturing Company," for the manufacture and sale of iron and steel, castings and foundry, &c. The principal place of business to be at Coldbrook.

It is proposed, and is perhaps arranged, in England, that the Canadian Copper & Sulphur Co., of Capelton, and the Huntington Copper & Sulphur Co., of Bolton, be amalgamated and become one company under the name of "The United Mining and Smelting Company of Canada, Limited." The resumption of operations, which, we believe, will include the erection of additional works for the manufacture of sulphuric acid, will be hailed with delight in Sherbrooke, by workmen and traders alike.

John Clewes, a dealer in house furnishings in the city, has again become involved and obtained an extension of time from creditors. Some years ago he opened two stores and shortly afterwards surprised his creditors by making a failure and getting off by paying one-half his liabilities .- The tavern of Eli Selyards, at Walkerton, was burnt a few mnoths ago and he has since assigned.——A dry goods dealer in Amherstburg, S. S. Kolfage, bought last year the stock and book debts of J. J. Auger, amounting to some \$13,000, and began business virtually without capital. For a time he did a fair business and paid off a considerable portion of the purchase money. Lately he has been pressed and gave a chattel mortgage. An effort has been made to upset this and he will probably

"It is a bad plan," said an outspoken sales. man in a wholesale house last week, "it is a bad plan for a retailer to order goods in advance or in excess of his requirements just because he gets a little extra time on them. It may be flattering to a dealer to be coaxed to buy 'round lots ' when he only wants a small parcer, but ten to one he will repent it, for he will almost surely get caught by the overstock." And the wholesale man, warming up, proceeded to give some illustrations of the way people are 'loaded up' now by means of dating ahead, "Why, sir," he said, "I know of some instances where retail men have been off-red and have got nine months time on cases or bales of cotton goods. Four months from 1st of April on such goods is the dating given in a letter which I have seen. A BUTTONS, GOOD VALUE AND S.

LACE CHOODS, Case, is today induced to order a range of case, is to case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today induced to order a range of case, is today out that he gets till next August to pay for them. How does he know what may happen to the market before next August?" The wholesale man was right. It is a bad plan.

The first freight came down the New Brunswick and Prince Edward Island Railway on Friday the 17th—some car loads of deals. The upper Sackville station has been located. Rails are laid to Midgic.

THE Council of Arts and Manufactures of the Province of Quebec has begun free evening classes for the winter, in Montreal, where free-hand and model drawing, wood-carving, woodengraving, mechanical and architectural drawing, lithography, and practical chemistry will be taught.

Although the rate of taxation in Berlin is two cents on the dollar, the council has decided to submit a by-law on the 3rd of November granting a bonus of \$3,000 to Messrs. Williams, Greene & Rome, shirt manufacturers, of Toronto, on condition that they remove their works to the German capital.

THE St. John Telegraph says: "The season's work on Miramichi Valley R. R. will consist of fifty miles of track laid and ready for traffic. The eastern end will extend up to Blackville, between which village and Chatham there will be regular railway communication this winter. This is the greatest showing ever made in railway construction in the province in one year."

We hear that Messrs. J. Hope & Co., prominent stationers, at Ottawa, are embarrassed, along with many others, by the failure of James Campbell & Son, Toronto. The amount of liabilities is not yet ascertained, but an Ottawa paper states the amount of their accommodation paper with Campbell at between \$4,000 and \$6,000. We are informed that the number of creditors of the Toronto firm named is close upon three hundred, and that many of them are creditors for accommodation paper. A pretty commentary upon the condition of a firm's business, and enough almost to deaden one's sympathy for either them or those who suffer with them.

It has hitherto been a reproach to the French citizens residing in the east end of Montreal that they have made no contribution to the cost of the Winter Carnivals, which have proved so successful a feature of that city these two years past. We now learn from the Times, however, that an East End Committee meeting was held on Tuesday last, when \$1,410 was subscribed by 22 persons, all of them apparently French Canadians, while 14 sub-committees were chosen to wait upon members of different trades for further subscrip ions. Encouraged by their St. Jean Baptiete demonstration of June last, the French citizens desire to import more of a French Canadian character into the Carnival, with what success remains to be seen.

THE Province of Quebec does not furnish any very serious list of failures for the past week. Here following are about all that have been reported: At Lachute Mids, R. Stevenson, music dealer, is in trouble and offering 25c. on the dollar.—Avila Paille, hotel keeper at Louiseville, wants a settlement at twenty cents in the dollar.—Pierre Bergeron, a small trader at Metabechouan, on the Lower St. Lawrence, has assigned .--- Gaudias Limard, long in business at Quebec as a tinsmith, &c., has assigned, and otters his creditors twenty cents in the dollar .-- Joseph Therien, a small general dealer at Malmaison, has assigned. - Z. Achim, in the retail shoe business a good many years at Montreal, has assigned, but liabilities are not large.

In Prince Edward Island, the farmers by agreement furnish the starch factories with the potato product of a stated quantity of ground at fourteen cents per bushel large and small, while twenty-four cents per bushel is paid in Maine.

previous year. Mr. Wm. Richards, of Fredericton, then had about 600 men lumbering for him, last year he had but 150 hands in the woods. It is understood that the leading lumber operators in the province are to petition the local

St. Stephen parties have entered into a contract with F. H. Todd & Sons, the big lumbermen of the St. Croix, says the Moncton Times, to haul and drive during the coming season 15,000,000 feet of logs, and from 5,000,000 to 6,000,000 feet each year the next succeeding five years.

"I UNDERSTAND that burglars entered your store last night, Mr. Isaac?" "Ya, aber dey dond dake anythings." "Were they frightened away?" "Ya, dere low prices marked on der goots frightened dem away. Bime-by dey come rount und buy der goots. Dot's cheaper den stealing. Dot's a t-veluff dollar coat; take him for dhree dollars."

A new form of street paving has been in use in Berlin since last year, which, it is said, effers some advantages over wood. Layers of bricks are put down, from 4 in. to 6 in. in length, and impregnated with asphalte. After a short period they lose any air or water they may contain, and absorb from 15 to 20 per cent. of the bituminous matter, becoming remarkably elastic, and capable of resisting pressure and damp.

STEADY work is being afforded about forty men at Moose River gold mines. Messre Walker and Taylor are working a four-inch lead, which with two smaller leads gives six inches of gold-bearing rock worth two ounces per ton. Mr. Bruce has excavated eighty tons good crushing material measuring from five to six inches, that will yield from one ounce to one and a half ounce per ton. Mr. Tonquay has fifty tons of good stuff on hand from a lead about five inches wide, that it is expected will yield one and a half ounces per ton. So says the Chronicle of Halifax.

D. A. Coffin keeps a hotel in Oxford county, Maine. He says people never believe what a man says about himself or his business and therefore he advertises in this fashion: "The original and only Third class Hotel in Maine—where everything fails to suit. Tough beefsteak, dirty rooms, useless servants, debilitated coffee. This house is presided over by D. A. Coffin, the laziest man in the state. Satisfaction not guaranteed and no money refunded. Dilapidated stable in connection. Everything warranted strictly shoddy." It is said, declares the New England Grocer, to be an excellent inn, of a character keenly opposed to the prospectus.

THE wretched condition of many of the insane patients confined in the Beauport and Longue Pointe Asylums of the Province of Que., as lately set forth by Dr. Tuke, an English expert, has called forth a strong expression of feeling in that province. It is to be hoped that a result of it will be the abolition of the repulsive system, for years in vogue, of farming out the care of these unfortunates to whoever will undertake it the most cheaply. A committee has been formed in Montreal to provide a proper asylum. It is said one lady in the Townships has offered to subscribe \$1,000 towards this object. The community begins to feel, says the Gazette that the care of the insane belongs properly to the government of the province, as in Ontario.

According to the St. John Globe there is likely to be a great curtailment of the log crop this year. The low prices paid for deals, and the small demand for them, gives a rather discouraging aspect to business the coming winter. The business will not be carried on even as largely as it was last year, when some operatives did not cut more than half what they did the

previous year. Mr. Wm. Richards, of Fredericton, then had about 600 men tumbering for him, last year he had but 150 hands in the woods. It is understood that the leading lumber operators in the province are to petition the local government at its next session to reduce the stumpage 25 cents. Labor, however, is cheap and supplies are now reasonably low so that the cost of production will be far below the previous years.

A young man, R. W. Carew, by name, inherited some property from his mother. Upon this he realized what he could and opened a boot and shoe business in Peterboro, about six months ago. The venture did not prosper and a few days since he assigned in trust.——The effects of Southworth & Co., dealers in old wares, in this city, were seized lately by a bailiff for rent.---At Owen Sound, Rutherford Bros. began the book and stationery business about six months ago but did not succeed and have just made an assignment.—W. C. Lee & Co., of Chatham, retail hat and cap dealers, have become involved through the failure of Wm. Lind & Co., of London, and that firm's assignee has taken possession of their premises.

With the exception of the passing of the Federal Bank dividend, there has not been any alteration, as compared with this time last year, in the bank dividends declared this month. The expectation that the announcement of the dividends would impart some activity to the market has not, thus far at least, been verified, and the extreme duliness continues. Prices, however, have been generally lower. Montreal and Toronto banks have each declined two in bids. Ontario Bank is one per cent. lower, and Merchants Bank a down, the rest of the list of banks being almost unchanged. Loan societies have been slightly stronger, especially London and Canadian Loan, which sold up to 135. In the miscellaneous list, Gas was one lower, and North West Land declined sixpence. At the close quotations were firm.

Exports to Canada from the United Kingdom for the nine months ended with September will be found compared in the following table, with the exports for a like period last year:

		Nine mes.	Nine mos.
	337 1 11	1884.	1883.
	Wool, Ibs.	232,200	365,800
-	Cotton manufactures, yde.2:	3,461,100	41.464,700
	Diviou	わ わちニ ちんん	5,183,100
I	Carpets, yds	1.727 000	1.694,000
i	Woollen manufactures, yds.		7,867,000
ĺ	Pig irontone	31,491	57,319
١		44,600	69.618
l		18,750	28,654
l	· · · · · · · · · · · · · · · · · ·	10.946	10,649
l	TIME DOWN BOLL	11,795	10,432
١	Hardware £	103,806	150 275
l	Wrought iron, etc. £	120,776	151,517
	Haberdaehery ₤	619,045	813,578
	It will be observed that the	decline i	n our nue

chases this year is general. In only one or two items have we made larger purchases in 1884 than in the corresponding time of 1883. In cotton goods the shrinkage in our imports is almost one-half, for we have within the year begun to make printed colleges and a variety of goods previously imported.

STYLES IN BOOTS AND SHOES.

It is remarkable how quickly abuses of established rules of custom often correct themselves. Within three years, says the Shoe and Leather Reporter, it was the ambition of manufacturers of boots and shoes to produce some marked innovations in the way of novelties. The comfortably-wide toe, common-sense, flat heel, the neatfitting shoe, gave place to a toothpick toe, full French heel and Spanish arch instep, neither feature of which ever possessed either beauty or comfort-but they were novel. Slippers were inlaid with fancy-colored satin or leather, in every conceivable design, calculated to bewilder the buyer. It was a rush to produce something different from what competitors were making; and manufacturers jealously guarded their samples from prying eyes to prevent their designs being copied.

Salesmen, in order to show their samples complete, were obliged to carry three or four large trunks. The jobber scarcely felt competent to select a line of goods, because he was fully aware that another salesman was on the way with more novelties. To such an extreme were these efforts carried, that it became a burden to both buyer and manufacturer. It required a constant change in lasts, dies and patterns. No manufacturer could sell enough goods of one line or style to pay the expenses of making the necessary charges. Jobbers could not buy enough of any one kind to make it an object to the manufacturers. If they did so they were pretty sure of buying an overstock.

By common consent the whole matter was abandoned, and at present there are but a few distinct styles. For ladies' wear a button allleather boot meets the demand of 90 per cent. of the consumers. Men's boots and shoes possess but little variation. A button shoe or balmoral, with a box or plain toe, with a neat toe cap, is all that is required. A good, sensible, medium toe, common-sense or slightly-curved heel, a plain Newport or opera slipper, fully mest the wants of the majority of people. Manufacturers can take large contracts for goods, and run their factories for weeks without special change of lasts, dies or patterns. Jobbers can purchase understandingly. The goods are better fitting, more stylish and comfortable, and cheaper to the consumer. In fact, it makes the entire business satisfactory to all concerned.

Practical efforts are being made in Montreal to organize a company with a capital of \$75,000 to work the Philipsburg Marble Quarries.

—The steamship Plymothian has arrived at Bathurst, N. B., with 1,500 tons of steel rails and the necessary fastenings for the Caraquet and Shippegan Railway. It is expected that 10 miles of rails will be laid this fall.

The importance of adding the county and State to the address of letters or other mai matter, even in the case of the most important matter, even in the case of the most important American cities, is apparent from the fact that there are in the United States 11 St. Pauls, 20 Bridgeports, 18 Buffalos and Newarks, 17 Brooklyns, Clevelands and Rochesters, 16 Hartfords, 15 Louisvilles, 13 Bostons and Pittsburgs, 8 Cincinnatis and Philadelphias, 6 Chicagos, 7 Detroits, 5 Milwaukees and St. Louises, 32 Washingtons and 4 New Yorks and Baltimores. New Orleans and San Francisco, are not double. New Orleans and San Francisco are not dupli-

They tell this story at the expense of a Montreal cigar vendor: A St. Louis gentleman of Kentucky birth and education went recently to that city. Wanting a cigar, he called at the stand in the hotel and made known his desire. The dealer, a portly, side-whiskered person after the London pattern, eaked him if he would The dealer, a portly, side-whiskered person after the London pattern, asked him if he would "like to 'ave a 'Enry Clay," at the same time taking down a box of that well-known brand. While making his selections the Kentuckian said, "Henry Clay—Clay—seems to me I've heard that name. Pray, sir, who was Henry Clay?" "'Enry Clay, sir," replied the dealer, "'e was a celebrated tobacco manufacturer hover him the States." "Is he dead?" "Hi think'e his sir, but 'is establishment his kor', han bit his, sir; but 'is establishment his kep' hup by 'is sons." The Kentucky St. Louisian smiled to himself, lit his cigar, and went out musing upon the vanity of human greatness.

SURPLUS AND PRICES OF WHEAT.

The probable surplus of the world's wheat for the year is engaging the attention of experts; but the estimates are often colored by the special interest by which the figures are grouped. The British millers make the surplus as large as possible, while the com. mercial world of London tries to minimize The London Miller figures out a surplus of 15,523,951 quarters, while Beerbohm's Corn Trade List makes the surplus less than 2,000,000 of quarters. South of the equator, the crop will not be harvested till from January to April next, which greatly increases the difficulty of making an estimate. Beerbohm's estimate of the combined surplus of the United States and Canada is 20,000,-000 quarters; while that of the Miller is 25,817,351 quarters. A difference of 40,-000,000 of bushels from a single country, in which the harvest has been reaped, shows that one of these estimates is wild and both may be. The universal impression that th. crop is very large, perhaps unprecedentedly large, taken in connection with the low price, affords the best general, indication of the true state of the facts. The following prices per quarter of wheat, 496 lbs., at the same date in the two consecutive years, shows the exact state of the universal decline that has taken place within twelve months:

Wheat-	Oct. 188		0	et. 1881	6, 3.
Dantzic	33 to	369			48s
Rostock, Wismar, Straulsund	.33 to	368			478

Odessa, Galatz	24 to	25s	26	to	28з

The places here mentioned are all situated in wheat exporting countries. Some of the low-priced wheats are inferior and are cheaper than Indian corn for feeding purposes. It is clear therefore that a point has been reached at which the inferior wheats of some countries can be used for feeding

stock, a new employment which will tell on consumption; but as it will tell at the expense of Indian corn, the whole quantity of breadstuffs will not be diminished in this way.

COMPETITION AND COMBINATION.

To a greater extent than at any previous time Rings and Combinations are formed to check the natural course of competition. Even when legislation does not interfere with the operations of trade, they are often far from being subjected to automatic government. Royal monopoly, except in tobacco and some few other things, in some European countries, is dead. It no longer takes the form of great corporations, such as were previously formed in England and France for colonization, and in Holland for carrying on the fisheries. The last of these great corporations, the Hudson's Bay Company, has parted with its monopoly and is now obliged to prove its right to existence by its ability to hold its own against opposition in the fur trade. But while monopolies which originated in royal grants have ceased to exist, and monopolies carried on for the benefit of the public revenue are few in number, new forms of monopoly have come into being amid the struggles, sometimes mutually distructive, of competition.

There are two kinds of competition, normal competition, and destructive competition: the first is careful not to get on the wrong side of the line of no profit, the second, turning business into war, sacrifices present profit in the hope of enjoying the future sweets of monopoly. The war period is to those engaged in it a destructive period: profits are sacrificed and capital is impaired that the enemy may be made to succumb in in the industrial or commercial war. In this game, one powerful player can always either force others into abnormal courses or oblige them to submit to heavy losses by a curtailment of business. No defensive attitude, in presence of such an attack, is capable of saving the assailed from loss. Weak corporations fall in the struggle against strong ones, or are bought up and absorbed. Whatever the process may be the end is the same. In this way, the petroleum trade, in the United States, has become a huge conglomerate monopoly. But sometimes, the energy of competition, when subdued in one form, reappears in another. The new apparition may be subjected to the same process, and conquest, purchase, absorption may occur, several times in succession. This experience has been gone through by all the Atlantic cables except the most recent; and it remains to be seen whether the new companies will retain their separate existence. Even when what seems a final conquest is attained, the victors may realize that their victory has cost them cear, if they find themselves, as they generallp do, burthened with an en rmous weight of capital, representing in part the losses of the past war, in part surplus apparatus, and perhaps a liberal allowance of water which, at some stage in the process, has got into the wine. When monopoly is really established, the public will be made to pay all that can be wrung out of it.

been reached at which the inferior wheats of the railway systems of to-day are always hand which knows most curning. But even some countries can be used for feeding shivering between the extremes of ruinous this competition not unfrequently gives way

competition and threatened or actual monopoly. By the processes described, capital is so swollen that earnings cannot keep pace with it, and innocent investors are sacrificed. A single monopoly of the trunk lines is no longer possible, it never was possible; and the efforts at combined monoply meet very poor success. Though rates may be fixed and the aggregate traffic distributed on paper, a short time generally suffices to show that the giant competition has been able to snap in secret the cords by which he was bound in public. Each company is interested in getting all the treffic it can; rates are cut under the pretence of pre-contrac's or no pretence at all. That is the tendency. Business is oftener done at non-paying rates than at monopoly profits which combination would establish if it could. But in the railway system more, perhaps, than any where else the struggle between undue competition and combined monopoly is best seen.

We are now told that the whole grain of the North-Western States is tolled by monopolists. The St. Paul correspondent of Bradstreet's journal, in an elaborate review of the conditions under which wheat is marketed in the North-Western States, says:

"The whole system of marketing grain in the North-west is wretchedly wrong. There has seldom been more provocation for an antimonopoly movement than there is among the farmers of Minnesota. Practically the only markets for grain are the elevators established by the several lines of railroad. Several powerful private corporations control these elevators. and many of them are operated in the interest of the Millers' Association. As a result there is arbitrariness in fixing grades and prices, and the absence of competition prevents redress. Out. side buyers are seldom able to compete with these great organizations, and the local elevator man is dictator of grades, as the association which employs him is of prices, at all points where there is no railroad competition. The complaints of the farmers are loud and long. They declare that their wheat is frequently undergraded and undervalued; that dockage for dirt is excessive; that freight rates are out of all proportion to service rendered, and that in the difference between the St. Paul and Minneapolis price of wheat and the price paid at the local elevator several cents are unjustly taken by force from the price of every bushel of wheat raised in the North-west. Undoubtedly there is some truth in these charges. The purchase of wheat is in the hands of a monopoly, and there . is no way of establishing uniformity or of punishing injustice in the matter of grading. Each elevator man is a law unto himself, subject only to his superiors, who are interested in obtaining the most of the best wheat for the smallest amount of money."

One result of this state of things will be that an out-and-out Granger legislature will be elected in Minus sota; and it is quite possible that some irrational remedy may be tried.

Combinations to secure monopoly prices are not unfrequently tried under the shelter of protective duties. Any competition there may be among domestic manufacturers, under the operation of high duties, must be in an artificial sphere, in which the force of foreign competition is broken. This is competition with one hand tied and that the hand which knows most cunning. But even this competition not unfrequently gives way

before combinations formed for the purpose of exacting monopoly prices. The bakers, in Toronto, have by combination been able to keep the price of bread at an utterly abnormal figure. From France a similar complaint comes. The Paris correspondent of the *Economist* writes:

"There is a growing agitation in France against the price of bread, which has remained stationary during the last few years, although the price of flour has fallen 50 per cent. The municipalities in the great towns have now under consideration the expediency of reviving the old bread assize. In Paris, before 1863, the trade was a monopoly, but bakers, in exchange for the security against competition, were subject to regulations fixing the price, and imposing on them the obligation of keeping stocks of flour in the public granary as a security against famine. When the trade was thrown open in that year the Law of 1791, empowering the municipalities to fix the price of bread, was not abolished, although it was allowed to fall into abeyance. In some localities an official price is published periodically, based on the price of corn and flour, but the adoption of it is optional, and bakers, of course, disregard it. But in consequence of complaints that the public have derived no benefit from the low price of corn, the municipalities are disposed to exercise the powers they still hold. On the other hand, the bakers, fearing a revival of the former restrictive measures, recently held a congress to obtain the abrogation of the law of 1791, and the Minister of Commerce issued a circular to the local authorities asking for information as to the regime applied in each place. This was, however, before the present complaints had arisen, and it is not probable that the demand of the bakers will be acceded to. The Government is thus solicited on the one hand by farmers to impose a duty on foreign corn and flour, and by the public to limit the profits of the bakers. At Lyons a compromise has been come to, the municipality agreeing not to revive the bread assize on condition that the bakers reduce the price of ordinary bread to 64 centimes, a fraction under 61d, the four pound loaf. The French pound being nearly one-tenth heavier than the English nine French pounds-ten English-the price would come out at about 54d the English four pound loaf. Some members of the Paris Municipal Council have given notice of a proposal to create municipal bakeries, to sell bread at cost price, as the bakers do not appear at all disposed to give way, except under compulsion, and have written letters to the papers defending their right to sell their goods at the highest prices they can get for them. They further maintain that the former conditions on which the relative prices of flour and bread were fixed have become changed by the increased taxation and higher wages they have to pay. But from all the calculations made the present price of 75 and 80 centimes per four pound loaf is exorbitant. When the trade was thrown open, and the assize discountenanced, it was supposed that competition would be sufficient to keep down prices, but instead of competition there is a very close combination in the trade to maintain prices. The same may, however, be said of many other trades in Paris."

Some rise in wages and some increase in taxes there has probably been; but the present price of bread is excessive. In Paris, the consumer has generally no remedy; he does not possess the means of baking bread himself; and the bakers take the risk of the municipalities exercising their legal right to fix the price of bread rather than voluntarily after all they is supposed.

onto, consumers could take the remedy into their own hands by baking their own bread.

Combination is the counterpoise of competition, and if it were only exercised to prevent destructive competition, it would produce only beneficent results. But when it is resorted to for the purpose of maintaining excessive profits in a prime necessary of life it becomes as injurious as it is odious, and it is the interest of the whole community that it should be put down. Another prime necessary of life, coal, has for years past been in the clutches of monopoly. But it seems there is one legitimate way in which the monopoly can be broken. The proprietors of the Philadelphia Record are able to sell coal, in that city, one dollar a ton below the prices charged by the regular dealers, and the quantity they sell every day is enormous. But the chief evil lies too deep for the control of of retail dealers. Enormous sums have been squandered in attempts to monopolize the coal lands of Pennsylvannia, for the purpose of reaping heavy profits on the carriage of coal. The abuse has become so great that some remedy for it will have to be found.

THE FINANCIAL SITUATION.

During September of this year the growth in circulation of banks in Ontario and Quebec, other than the Bank of Montreal, had increased over the previous month by \$1,600,000. In 1883, singular to say, the expansion only amounted to \$800,000. This looks as if the apprehension as to the with-holding of crops by the farmers, and their slight movement was not quite well founded. It is true that last year's harvest was deficient. There could not well be a large expansion in 1883; but we are commencing well in 1884, seeing that, in the first month, when expansion generally takes place, the augmentation is double that of last year. The truth seems to be that the expectations of the community were strung up to a high pitch. We expected unusually great things, and more than was reasonable The deficient harvest of last year had produced its usual fruit in depressed business, and we were impatient for a turn in the tide.

Apparently it is still the harvest, taking the word in its widest sense, which is the true and potent factor in our business position. Legislation can do little to modify this either in one direction Whether the trade system or another. be moderate protection, as it is here, stringent protection as in the United States, or comparative free trade as it is in England, the harvest after all determines whether the year shall be a good one or a bad one. We include in the term "harvest" everything that a country produces, either in the way of crops, timber, animals, minerals, or fish; the latter being taken as a production of the country whose seas within a certain distance from shore swarm with the finny inhabitants of the deep. We do not say that this is the only factor, or that there are not subsidiary influences at work which bear upon the position. Undoubtedly there are such secondary influences. And these influences are changeable. They are more potent at one time than at another. after all they do not produce the effect which

A succession of bad harvests, such as England has had, paralyzes manufacture in a Free Trade country. A succession of good harvests will stimulate manufactures in a protectionist country. A revival of manuturing industry may consequently be looked for, not to any large extent, but in a moderate degree, before many months pass over us. In fact it may be expected as soon as our present good harvest is brought to market and sold. We are not of those who cry out that the N. P. is ruining the country. We do not believe it. A wide induction of facts does not support this theory. That it has not benefitted the country to the extent its enthusiastic advocates predicted it would, is undoubtedly true. But it was suited to our circumstances at the time it was inaugurated, though it has since been carried, in some particulars, to an objectionable extent.

Some of our contemporaries are predicting that we shall have four or five years of continued and deepening depression before business takes a favorable turn. They base this opinion on the theory that waves of expansion and depression follow one another at exact and regular intervals of ten years. Inasmuch then as a depression which commenced in 1874, continued unabated until 1879, they argue that a period of from 1884 to 1889 will be one of depression too. But it is dangerous to draw a wide deduction from a narrow basis of facts. Periods of revulsion and expansion are not subject to absolute cycles of ten years. In Canada, no such rule has been observed. Going back by three periods of ten years each, we come to the year 1854. For three years after 1854 there was in Canada a constant expansion and inflation. The height of the wave was reached in the spring of 1857. If the ten years cycle theory is absolute and unalterable, our next three years in Canada should be years of boom and expansion, instead of deepening depression as is prognosticated. The heavy revulsion of 1857 was not succeeded by another in 1867. On the contrary that year and succeeding ones were years of steady growth and quiet expansion, reaching its culminating point in 1873. Then came a change, not in the way of violent and disastrous revulsion, but a steady and continuously deepening reaction. All of which shows that it is not by periods of ten years that business movements are to be measured in Canada. There is a tendency undoubtedly to alternate waves of expansion and depression. But whether these shall be in periods of five or ten or fifteen years depends on a variety of circumstances, and unless we can forsee the circumstances, it is not safe to prophesy. Revulsions followed one another in England at periods of ten years, from 1825 to 1866, but there has been no revulsion since, though there has been depression.

Some attention has been given lately by the press to the competition between the Government and the chartered banks for deposits. On the whole the latter have a reasonable ground for complaint. It is a matter however which primarily concerns the mercantile community, who depend upon the banks for accommodation. It seems to be proved that the rate of interest allowed by the Government to depositors withdraws a large fund from the use of the mercantile

community. They consequently pay more in the shape of discount than they otherwise would. There is, however, another and a more important aspect of this question, and it conceins not bankers and merchants only, but the general public. The funds received by the Government from depositors are neither held nor invested. They are spent. To represent the thirteen millions or more which the government has received from depositors, it has absolutely nothing whatever to show. The money has been spent. It has gone; and the only source from which the Government could repay its depositors would be by borrowing elsewhere. This is the weak spot, and it is a very weak one, in our Government Savings Bank system. It is a radically unsound practice for the government to receive money to the extent of millions from depositors and then use it, i.e. spend it in carrying on the ordinary business of the country. A radical reform is needed here, and the Finance Minister should see to it before Parliament meets

We append our usual summary of the figures of groups of banks, in a classified form, showing the banking condition and call the attention of our readers to it.

THE CANADIAN PACIFIC RAILWAY AND COMMERCIAL DEVELOP-MENT.

The semi-official announcement has been recently made by Mr. Collingwood Schreiber, that the Canadian Pacific Railway will, by November, 1885, be available for a through train from Montreal to the Pacific terminus.

Leaving it to others to consider what influence the opening of the new route may exercise on the political and national future of Canada, we may endeavor to show the commercial development and possible changes in the channels of trade which may be expected to come about as a consequence. Along with the opening of the railway, however, must be considered the effect of the expansion of shipping, mining, and lumbering operations in British Columbia which must follow the establishment of an entirely new opportunity for reaching the markets of the North West Territories and the Eastern Provinces.

As regards the prospect of an extensive through traffic between Asia and Europe, which may be regarded as an essential factor towards rendering the enterprise a paying one for the company, pending the development of a greater volume of local business than can soon be looked for, it may be pointed out that the Canadian Pacific will enjoy exceptional advantages in competition with other transcontinental highways. These are: A shorter distance to operate, easier grades, and the existence of an inexhaustible supply of the finest steam coal at the Pacific terminus. In respect of the first point, the comparative distances in favor of the Canadian line may be stated, with a fair degree of accuracy, as follows .-

2,862 miles Coal Harbour to Montreal ... " Boston, 3,197 Liverpool 6,075 3,390 " 3,448 " San Francisco to New York Boston .. Liverpool, via N.Y. 6,830 Yokohama to Liv'rp'i via Cen. Pacific 12,038 Can. Pacific 10,963

Having less mileage to cover, on the whole distance, the Canadian Pacific will have an immense advantage in competition for Asiatic through freight, as well as for business to be carried on between the Atlantic and Pacific oceans contributed from points in the United States. In addition, it may be expected that the Imperial Government will avail itself of the facilities which so direct a route, exclusively through British territory, will afford for despatching troops and the immense quantities of supplies for them that are required to be sent out to distant stations.

As regards the mineral deposits of British Columbia, it is necessary to state that the extent of the wealth of that province in "black diamonds" has by no means yet been ascertained or even fully investigated. The rocks of the extensive coal areas which Vancouver Island possesses are certainly known to extend from the vicinity of Cape Mudge to within fifteen miles of Victoria, a distance of about 130 miles, and these are of the cretaceous, not tertiary, age. The product of the oldest mines, situate at Nanaimo, is well known to be a valuable bituminous coal, superior for all practical purposes to any coals yet met with on the Pacific coast. Vancouver Island coal has for thirty years past been in large demand at San Francisco for steamship and domestic purposes, notwithstanding the hostile protective tariff of the United States, and it ranks with the West Hartley coal. On au average nearly two thirds of the sea-borne P cific coal received annually by California come from Vancouver Island. the output from the pits at Nanaimo rose from 81,000 tons in 1874 to 282,000 in 1882. which is a remarkable showing. The Americans have, of course, done their best to discover a substitute source of supply south of 49th parallel, but hitherto without success. Coal formations of the tertiary age cover great tracts of the mainland opposite, and have been worked in Washington Territory, for San Francisco consumption, in places when they occur in thick accessible beds; but coal has not yet been worked, or even bored for, on the adjacent mainland of British Columbia, owing to the fact that the before-mentioned tariff has operated as a present day the forests of British Columbia

hindrance to the profitable development of the resources known to exist. There is further an immense area in the south-eastern portion of the province, which will be traversed by the railway, that has not so far been explored for coal at all.

In comparing the position that Coal Harbour (the western terminus of the Pacific Railway) will have in competition with San Francisco as the sea-port whence various lines of steamships engaged in the Asiatic and Australian trade will radiate, it is most important to remember that the latter must import from British Columbia or Washington Territory, or yet more distant sources of supply, every ton of fuel that such steamers require for the outward voyage, while whatever quantity is brought from Nanaimo or other foreign points for the purpose is chargeable with duty in addition. Steamers arriving at Coal Harbour, however, will have an unlimited supply of the best kind of fuel available, almost from the mouth of the pit and entirely free from duty. This difference constitutes in itself so great an economical advantage in favor of commerce centering at the Canadian Pacific port that San Francisco may find her maintenance of a line of steamships to Hong Kong, Yokohama, or Sydney troublesome after the Canadian Pacific Railway, with its connecting lines of ocean steamers on the Pacific, is once fairly in operation, unless indeed the outward voyages of such be made via Vancouver Island. In any case, the logic of coming events points to the development of a great commercial port at Coal Harbour, which will in due time become a point whence the products of Asia may be distributed over the Pacific coast, and perhaps over all North America.

Another important point is the attractions which the coasts of British Columbia and Washington Territory offer to sailing vessels arriving on the Pacific coast with Asiatic or European freight. One of the essential conditions to the building up of a strong shipping business is that facility should exist for obtaining return cargoes. From this point of view, Coal Harbour will enjoy an advantage over San Francisco, owing to the immense extent of the valuable and largely virgin forests which cover a region once designated somewhat contemptuously by a prominent Canadian statesman as a "sea of mountains." A sailing ship arriving at the Canadian port will not have occasion to go far for return freight or suffer delay in obtaining it. She may either sail right under the hoppers at Nanaimo to receive coals into her hold, proceed to a British Columbia mill to load lumber or spars, or drop down in a single tide to Puget Sound, where even a larger supply of the latter freight awaits her. At the present time, numerous sailing vessels which arrive at San Francisco are compelled to proceed, in ballast, to British Columbia or Washington Territory, a distance of 800 miles, (generally increased to 1,600, owing to the necessity of giving the rock bound coast, without a single good harbour, a sufficiently wide berth) in order to obtain a fresh cargo; she cannot, therefore, hope to draw away the increase of shipping arriving at the Pacific coast which the opening of the Canadian line should induce. Even in the

furnish many a shipload annually of the finest lumber and spars for transportation to all parts of the globe, to places indeed as widely apart as Hong Kong and Marseilles or as Singapore and Rio de Janeiro.

The local development that must arise from the opening of the railway by the building up of interprovincial trade is a feature that must not be lost sight of. Mr. Van Horne, in his recent report, declares that "every part of the line, from Montreal to the Pacific coast, will pay." Why? Because he has come to appreciate the fact that the different parts of the Dominion possess varied and distinct natural resources, which will enable them to interchange products and manufactures to mutual advantage. He has personally satisfied himself, he says, that the forests which the line penetrates after crossing the Rocky Mountains "alone will furnish large and remunerative traffic for the railway." He tells of trees which are eight and nine feet in diameter, measured seven feet above the ground, and pronounces the supply of this raw material to be "practically inexhaustible." He says "there are many other sources of traffic and wealth, the chief among them being the coals and the fisheries. The richness of the fisheries is almost beyond belief."

The resources thus very briefly enumerated, being just the very kind of which so large a portion of the North-West Territories is conspicuously deficient, will find a home market by means of the railway. gina, Brandon, and even Winnipeg may before long draw their chief supplies of lumber and coal from the Pacific Slope, while fresh salmon and other fish from the Fraser River and the Gulf of Georgia, together with such fruits as cannot be grown to ad antage in the prairie region, will in a few years be articles of common consumption in the Territories and Manitoba. return, the prairie farmer will be able to furnish the hardy miner, the industrious lumberman, and the skilful fruit grower of British Columbia with the "staff of life" in highest perfection, together with pork, beef, hides, and wool. Interprovincial intercourse will thus become highly advantageous and should to much, not only to stimulate the development of the latent resources that Canada possesses in such great variety, but to increase the home and foreign trade of her merchants.

LIFE INSURANCE CHART.

In to-day's issue we present one of the most valuable compilations respecting the business of life insurance in Canada, which has ever appeared-always excepting the Blue Bock itself. As respects fourteen of the best known companies, the grow h of the premium income, of the new business, of the total amount in force, of the death claims, &c., for six years past, can be seen at a single glance. Other life companies transact considerable business in the Dominion, but were not doing anything to speak of six years ago, or have commenced business here recently, such as the North American, Federal, British Empire, United States and New York. Five other companies, which do both fire and life insurance business, issued only

all told in 1883, the North British getting the lion's share, and the other twenty being divided between the L. L. and Globe, the Commercial Union, the Queen and the Royal.

During the past year the Toronto Life, of which Arthur Harvey, late of the Provincial Fire, was secretary and manager, has thrown up the sponge, and the Life Association of Hamilton, formerly the Mutual Life, has ceased to do business, Both companies were organized in this city in the year 1873, the one the one on the stock basis and the other on the mutual system, and for s me years both gave good promise of success. The Mutual removed to Hamilton early in its career, its principal back rs residing there, and made a brave struggle, but was weighted down by heavy expenses and death losses, and its mutual policy holders were therefore never able to realize a single dividend. Latterly it changed its name and obtained additional capital, but without any material improvement, and for the present has decided to cut off the expense of seeking new business. For particulars as to its recent history we refer those interested to the chart opposite "Life Association of Canada." The operaations of the Toronto Life not having been deemed of sufficient importance to appear in chart form, hitherto, we now summarize them from the blue book :-

		New	Total	Claims
Year.	Prem's.	Ins.	Ins.	Paid
1874	\$ 8,978	\$132,500	\$283,800	
1875	9,871	120,531	318,531	\$3,000
1876	10,882	135,729	343,881	3,500
1877	6 120	52,000	$275\ 551$	2,000
1878	6,435	49,138	209,490	
1879	4,674	$17.6 \cdot 6$	163,609	
1880	4,730	69,716	193,747	1,930
1831	6,262	76,800	220,909	2,200
1882	5,252	35,500	171,309	1,100
1883	2,434	• • • • •	• • • • • •	4,150

The record of the Toronto winds up in the blue book with " Policies transferred to the Federal Life Assurance Co., 169, insuring \$171,308." The Federal is a new company, started in Hamilton two years ago, with an aumorized capital of \$1,000,000, of which \$63,327 had been paid up in cash at last accounts, and a small amount more in promissory n tes. It issued in 1883 some 333 new policies, insuring \$410,383, and its total insurance in force is \$722,699. The total new insurance issued by all the companies in Canada, during the past year, foots up to \$21,572,960 showing a fair increase of one and a half millions over 1882, and the amount remaining in force at the close of the year was \$124,196,875, *gainst \$113,613,-475 at the close of the previous year. The death claims paid were \$1,593,029. This is an increase over the previous year of \$333,-508. The deaths cost the Canadian companies, most of whose business is under ten years old, only \$10.10 per \$1,000; the British companies \$19.40 and the American companies \$14.50. The general average was \$13.40. The previous year it was only \$11.70.

-The Canadian Gazette, of London, England, is unable to say how much truth there is in the rumor that "the British post-office will be asked to use the Canadian Pacific Railway as an alternative route to the Peninsular and Oriental steamship service for the mails to China and Japan." Greater example, that even her Scientific Congresses

the Canadian route, and if this be beyond doubt, the change ought to be probable. Some of those who are bound to find some employment for Sir John Macdonald, in England, attribute to him an intention to bring the subject before the British govern-

-In England the coincidence of diminishing stocks of goods, with few exceptions, with lessened price is a phenomenon not to be overlooked. It would ordinarily indicate that a turn in the tide is about to come. Why declining price in connection with decreased supplies should indicate a state of things immediately precedent to recovery. the N. Y. Bulletin shows: "There are manifest reasons why this should be so; for (1) the reverses attending such a course of trade are apt to weed out the weak elements: and (2) low prices are calculated to encourage consumption; and (3) low stocks make room for new supplies; and (4) the demand for banking accommodation being greatly reduced, the money market becomes extremely easy (the Bank of England rate being now only 2 per cent.) and merchants are encouraged to operate for a future upward turn in values. For these reasons, the present condition of prices and of stocks in Great Britain may be viewed as warranting the hope that the world-wide reaction which has now been in operation for at least two years is about reaching its culmination. This inference could be more depended upon were it not for the present unse tled condition of European politics, which, far more than anything in the intrinsic condition of trade, tends to check confidence and restrict business. What the above facts show as to the condition of affairs at the chief centre of the world's markets may be inforred, in the main, as to the posi ion of business in the United States also. Both here and in Europe the politician is now the great obstacle to the recovery of confidence and the return of good times."

-A corresp ndent desires to be enlightened as to the Metric system of weights and measures. It is a system of French origin, we believe, at any rate it received legal sanction in France in 1801. The unit of length in the system is the measure called the metre, which is equal to 39.37 inches English. The decimetre is onetenth part of the metre, and the centimetre is one hundredth. The kilometre, again, which one constantly hears of in connection with French voyages, or it may be wars, consists of a thousand metres, or say, 3,280 English feet. The units of weight, liquid and land measure adopted in France, such as the gramme, the litre, the are, are derived from the metre or proceed from the same basis. hence kilogramme, 21 English pounds, nearly, centigramme, &c. It will be observed that the system is a decimal one, so that in their measures, as in their coinage, the French nation has long enjoyed the facility of the decimal system. It appears strange that the English stick so long and so stubbornly to £. S. D. It has been wondered at by some of her own scientists, Sir William Thomson and Mr. William Preece, for the small number of thirty-three life policies shortness, in point of time, is claimed for refuse to give in, and form an international

system of philosophic measurements on the decimal plan. But light is beginning to The Paris Figaro of recent date says that M. Bertrand, the secretary of the French Academy of Science, makes the important announcement that England has joined the International commission, which meets once a year at Paris to consider the metric system. "Thus England sets itself in accord with the ideas of all Europe, and in the near future will make the French system obligatory. This decision, taken by England at the last moment, that is to say at the opening of the International Congress at Washington, which is to determine a common prime meridian, is not perhaps an absolutely disinterested one. England desires the ratification of the decision of the Scientific Congress held last year at Rome, which adopted the meridian of Greenwich.'

CHEAP BUT SHOWY LIFE ASSURANCE

Within the past three weeks quite a number of communications have reached us, referring to the operations of new co-operative insurance companies in Canada, which are being formed in unusual number of late, as if to take advantage of the good harvest. To use a slang phrase, there is quite a boom in cheap life assurance, while cheap fire insurance is at a discount, its patrons and dupes having found out that it does not pay.

We have had enquiries about the "Provincial Provident Institution" of St. Thomas, of which a bank manager in that place is president, giving it tone at once; the "Legion of Honor" is a rather "swell" name, which at once suggests banners, swords and shields, to say nothing of ribbons and crosses. We cannot inform our enquirer fully upon the inner working of this attractively-named concern, but its head-quarters appear to be in Hamilton, where the mayor and one of the members of the House are among its managers. The real Legion of Honor was founded by Napoleon, ostensibly to protect republican principles, and to abolish differences of rank in society; so perhaps the imitation Legion proposes the same thing in life insurance—i.e., that every body shall be equally eligible. It was a slight anachronism to start this concern in this province; the preper place for it would be in the province of Quebec, where people are more fond of tradition and tinsel, whether they have more time

But we must not be unjust to the Legionaries, or Knights Grand Cross, whatever they call themselves, for we are told that they do exact an entrance fee, graded according to age. Then there is the Canadian Mutual Aid Association, intended, we should say from its directorate, to captivate Grangers, the Covenant Mutual Benefit Association, an Illinois concern, intended to unite Odd-fellows " by the double tie of fraternal feeling and common interest," to use the words of the 39 Majors, Hons., and Professors who form its list of officers. Next there comes the Mutual Reserve Fund Association, which professes to be upon a higher plane than the rest of the co-operative Life Insurance concerns. This Association parades very respectable names as being among its patrons, and there can be no doubt that many are carried away by the apparent cheapness with which insurance is alleged to be secured. But what about the security of getting indemnity from such a concern? Let the following furnish an answer to sensible men:

and money to squander on it or not.

An action was brought by the proprietor of the

one Angell, for illegally actir g as agent for the Mutual Reserve Fund Association, which is not licensed to do business in that State. The pleas of the defendant deserve to be carefully noted: He claimed that "the Mutual Reserve Fund · Life Association was not a life insurance " company, but a mere society for the collection "of assessments and their distribution to beneficiaries of deceased members. The association, it was urged, did not issue special con-"tracts, and its certificates were legally worth-"less. Their payment was optional with the 'association and with its members. All contributions by the members were entirely voluntary. The association had no recourse against "its members, nor could any claimant recover the amount of a judgment against it.

He e, then, is an admission that the boasted concern is a house of cards, a temporary organization, whose beneficiaries are dependent upon the voluntary contributions of members, who come and go, pay or decline, as whim or necessity dictates. It may be "cheap" insurance, as they boast, which these companies offer, but it never was and is not likely to be safe or lasting.

A LEGAL PROBLEM IN INSURANCE.

Among the sufferers by the recent disastrous fire at Lachine, was one J. B. Picard, a keeper of a grocery store, who had insured his stock for \$1,200, getting from the insurance company's sgent an interim receipt for the amount of premium charged, viz., \$12.00. In due course the policy was issued. It seems that for some reason the premium was not paid before the property was destroyed by fire. An interim receipt given to the assured, which acknowledges the payment of the premium is prima facie evidence that the premium was paid. Mr. Picard made out his claim against the company without even tendering the amount of premium. The question involved in this case in one of law. We are of opinion that the company will have to pay the loss to the extent of its policy, less the \$12.00 premium named in the interim receipt. If there was an agreement between the assured and the agent of the company, that the premium was to be paid by a certain time, and if the assured on being asked for it, either declined or neglected to pay the amount, the company may have a defence. Insurance is effected every day on interim receipts issued without the premium being paid at the time.

YARMOUTH SHIPPING.

The Record of the shipping of Yarmouth has been issued by J. Murray Lawson, of the Yarmouth Herald. It is a book of over 450 pages, and contains a complete history of the shipping of Yarmouth county from its first settlement in 1761 and is doubtless a very interesting volume. "It is not," says Mr. Murray, "within the province of our present undertaking to trace the causes or probable result of the changes now going on in the commercial world by which iron and steam vessels are gradually supplanting their rival wooden sailing ships in the competition for the carrying trade. But such is undoubtedly the fact, and wooden ships, for so many years the favorite investment of Yarmouth capitalists, are finding the task of obtaining profitable business growing yearly more and more difficult. A ready the Pacific trade has become the principal theatre of Yarmouth shipping operations; and what was at the time of our first publication a rare event, has now become the rule. Her ships are gradually leaving the old Atlantic routes for voyages to the far west, Java, China, India, and California." The reenormous total of 728 vessels and 189,088 tons. The total insurances paid by Yarmouth offices on the total losses reached the vast sum of \$3,-310,596, divided as follows:

Yarmouth Marine	Co			 		 	\$1.051.285
Acadian	"						512,500
Commercial	44						
Atlantic	"						
Pacific	66						
Oriental	66						

ST. JOHN IMPORTS AND EXPORTS.

The inwards and outwards trade of St. John, N. B., for last month, as shown in the Customs returns, was smaller than in the corresponding month of 1883 in the proportion of 936,741 as compared with \$1,125,964. Dutiable goods entered were valued at \$479.705 against \$633,725; for warehouse, \$120,071 against \$107,561; free goods, \$88,623 against \$74,543. The quantities of goods remaining in warehouse on 1st October, estimated by value, shows less brandy, gin, rum, whiskey and wine, more ale and porter, less molasses but more sugar, less cottons, woollens, oils, dried fruits and miscellaneous goods, the total on the 1st inst, being valued at \$338,948 where a year before it was \$306,251. Sugar probably will account for the excess, for the value of that article in warehouse last year was only \$6,522 where this year it is \$55,775. The following table shows the value of exports from St. John, N. B., for the month of September, 1884, compared with corresponding month of year 1883:

5	1883.	1884.
Produce of the mine	\$ 2,380	9 979
" " fisheries	52,556	90,356
Products of the forest	284,399	208,423
Animals and their produce	29,597	25,279
Agricultural products	2,128	1,335
Manufactures	3,574	19.789
Miscellaneous articles	4,471	4,494
Total produce of Dominion	\$379,105	\$350,655
Goods not produce	113,134	1(6,381
Total exports	\$492,238	\$557.036

HE CHANGES TO CASH.

When times are hard, then it is, says the St. Louis' Grocer, that the business man dwells longingly on the beauties of the cash system, and often he is induced to change from credit to cash. Then it proceeds to tell of one of its readers, who, on October 1st gave up his old ship of Credit and started a new voyage in the iron clad vessel, Cash. Here are the reasons he gives for the change:

"Our experience in selling goods on time has been, all things considered, unsatisfactory. We find it impossible to decide wisely in all cases where credit is asked for. Customers expecting to pay promptly often meet with disappointment and are unable to meet their promises. causes long standing accounts, absorbs capital, renders it profitless, and often ends in a direct loss. Because the evils of our credit system are so many, and the future outlook gives so little promise of any material improvement to lessen hem, we are led to the conclusion that substantial business success can not now be attained under this system. We, therefore, by this circular, give notice that we intend to adopt the cash system in selling our goods. Our intention is to price goods so that cash purchasing will pay. Selling goods on time and buying goods without money to pay for them, is proving itself to be the ruin of both merchant and customer. We propose to do our part to bring about a reform." reform.

-We congratulate the citizens of Moncton, upon the progress of that busy town, as shown in the "Industrial and Commercial Index," issued as a supplement to the Daily Times. And we congratulate the Times on its enterprise Coast Review in the California courts against capitulation of Yarmouth vessels lost shows the in compiling so valuable a summary. The

growth of the trade of that port may be seen in against 42,553, shipped last year. This is a falthe following comparison:

	Fiscal Year 1874.	Fiscal Year 1884
Value of Imports	\$82,039	\$531,696
" "Exports	1 884	73.934
Entered for consumption	83,620	635,021
Customs Revenue	11,442	152,266
Population	1,500	7,060

The increase in the imports, says the Index, is in a large measure accounted for by the importations of machinery for the new industries and raw sugar and raw cotton, but the increase in the exportations is entirely owing to the development of the shipping business of the port. "Of late years the tendency has been in Moncton as elsewhere, in the direction of placing the manufacturing business in the hands of jointstock companies. These companies are as fol-

Name of Company.	Capital.
Moneton Cotton Mf'g Co'y	\$4 00,6 0 0
Moneton Sugar Refinery Co'y	20 0,000
The Peters Comb'n Lock Co'y	200,000
Monoton G. Light and W. Co'v	100,000
Moneton Agricult'l Imp. M'g Co'v	50.000
Rocord F'dry and Machine Co'y	35,000
Universal Knittting Co'y	25,000
Moneton Metallic Monu. Mf'g Co'y	10,000

With the exception of The Peters Combination Lock Company these institutions appear to have been fairly successful."

-During the last few days, dividends have been announced by quite a number of banks and financial institutions. Half-yearly dividends are declared by the Quebec Bank and the Ontario Bank at the annual rate of six per cent. each; by the Dominion Bank at the rate of ten per cent., and by the Bank of Hamilton as well as the Bank of Toronto, the rate of eight per cent. The Freehold Loan Company declares its usual five per cent, half yearly. La Banque Ville Marie three and a half. The Central Bank announces its first dividend which is at the rate of six per cent yearly.

--- Victoria, British Columbia, wants additional water works, it appears, also police barracks and some minor luxuries, and there is now before the ratepayers a by-law to enable the mayor and council of the city to borrow one hundred thousand dollars. It is proposed to expend the amount as follows: \$25,000 for a police barracks, \$12 500 for purchasing the electric light plant. \$5,000 for a plan of city drainage, and \$7,500 for streets and bridges, the remainder for extending the water system to the higher levels of the city.

-The railways in the United States have begun the 'cutting' of passenger rates. At the N Y. office of the Baltimore and Ohio and West Shore roads first-class tickets for Chicago were lately bought at \$15; for Buffelo, \$4.65. The West Shore road on the 16th inst. reduced its passenger rates from two cents per mile to one cent, and on the same day the Erie road began selling tickets at cut rates. The Pennsylvania last week stood firm refusing to cut. The officers of the pool, we learn, profess to be powerless to prevent this reckless competition.

-A statement of the United States cotton crop for the current year up to 1st September makes out that the total crop was 5,713,200 bales as compared with 6,949,756 bales last year, shows that the total exports for 1883-4 were 8,916,581 bales, against 4,724,044 bales exported for the year ending 1st of September 1882-3. The total consumption of the United States was 1,876,683 bales against 2,073,096 bales in the previous year. The quantity shipped to Cansling off of nearly one-half, and the inference from this is that the stock here must be very low. The export to Britain fell off 400,000 bales.

-A commission consisting of Messrs. George H. Sharpe, of New York; Thos. C. Reynolds, of Missouri, and Solomon O. Thacher, of Kansas, with Mr. Wm. E. Curtis as secretary, was appointed at the last session of Congress to report upon the best methods for extending the trade between the United States and the nations of Central and South America The commissioners remained in Philadelphia all last week, to receive the manufacturers and those who had any information regarding the trade with these countries. The value of the manufactured products of Philadelphia during the year 1883, was no less than \$476,817,402 and of the exports \$198,414 went to the Argentine Confederation, \$331,000 to Brazil, \$43,000 to the United States of Colombia and \$17,000 to Venezuela.

-Imports of merchandise from Canada into the United Kingdom for the nine month ended 30th September last, are thus compared in the British Board of Trade Returns, with the corresponding period of last year:

	Nine mos. 1883.	Nine mos. 1884.
Animals, live, No	38,692	41,469
Sheep & Lambs "	61,986	41,160
Wheat, cwts	1,578,158	1 210,033
Flour "	281,462	477,703
Comper ore, tons	9,906	2,066
Wood, hewn, loads	211.767	172,126
do. sawn, "	765,693	729,733

With the exception of animals and flour the imports this year, it will be seen, are all smaller than last. Of lumber and timber, the imports are less by 75,000 loads or about eight per cent.

-The trade in grey cottons of Canadian manufacture has reached an undesirable point. There is, and has been for months, an overstock. which it is impossible to reduce while the productive capacity of the looms still running is equal, as we are informed it is, to the consumption of the country. Concurrent with this overstock comes an effort to get rid of it by means of extra terms of credit, and dating purchases shead, which is, to use the words of wholesale dealers, demoralizing the whole market." We hear of a house in Montreal-we were told a similar story of a Toronto house last week-which sells domestic cotton to the retail trade in October, giving three months from 1st April following, that is, eight months' time. This is an absurd and dangerous forcing of credit, and we are surprised that Canadian banks discount such paper. It seems, indeed, as if the curing of such an evil as dating ahead lies with the banks, in the last resort. The conclusion is not unreasonable, besides, that if our banks desire to cure the state of things in the domestic cotton manufacture which necessitates this dating ahead, they have the power to do so, by refusing accommodation to mills or their agents who continue to make goods in excess of the market.

FIRE RECORD.

ONTABIO .- Picton, Oct. 8th .- The barn of David A. Spencer burned, together with season's crop and agricultural implements. loss about \$4,400; insured in L. & L. & G. for \$1,800, and Comm'l. Union for \$500.—Brantford, 9th.— Watts & Son's planing mill totally destroyed.

—Arnprior, 20th.—Jas. Hartney's store took fire, the high wind spread flames to the Campbell house, and stores of W. P. Adams and Stilling & Moore, all consumed.

damaged. Losses estimated at \$56,000. Hartney loses on building and stock, about \$38,000; Mrs. J. Campbeil, \$12,000; W. H. Adams, \$3,000; Taylor & Lee, on building and stock, \$1,500. Sterling & Moore had an insurance of \$5,000 which covers them. Ro Shaw, druggist, and others, lost by removal. Welland. 20th -Windsor House destroyed. owned by Brown Bros., who lose \$3,000, insured \$1,000 in Lancashire and \$700 in Royal. Tucket loses \$2,500 on contents, insured \$1,300 in Children 1,300 in in Citizens.—Frankford, 21st.—This village, having no fire appliances, mourns a heavy loss. A fire began in Foster's bake-shop &c., loss \$5,000, \$2 400 in Lancashire, Stevenson's drug \$5,000. \$2 400 in Lancashire, Stevenson's drug store, \$1,200 in Lan.; ten stores and several dwellings, post and telegraph office, and brick hotel, loss probably \$25,000. — Markham, 22nd.—Markham pottery burned, loss \$1,500; Dave Burns, the tenant, loses \$1,000 and has a small insurance.

OTHER PROVINCES - Chatham, N. B., Oct. 10th.—J. R. Goggin's hardware store burned, in. sured for \$2,000 in the Glasgow and London, \$1,400 in Ætns, \$800 in Imperial and \$600 51,400 in Atta, \$800 in Imperial and \$600 in Central.—Montreal, 10th.—James Wilson's store burned, loss about \$8,000, partly insured in Commercial Union, British America and Royal.—Nappan, N. S. 7th.—Three barns and Royal.—Nappan, N. S. 7th.—Three barns belonging to John Smith totally destroyed, together with grain and farm implements, loss \$3,000, insurance \$480.——St. John's, Que. 7th.—Jos. Chagnons house burned, insurance \$1,500.——Acadiaville Siding, N.S., P. Currant's \$1,500.—Acadiaville Siding, N.S., P. Currant's store and dwelling house totally consumed, loss \$2,000, insurance \$700.—Sydney, C. B., Jno. E. Burchill's dwelling burned.—Shubenacadie, N. S., J. W. King's steam saw mill burned along with machinery, etc.—Bulstrode, Que., 20th.—The Candeau's saw the back of the saw hear decided by the saw hear mills, which cost over \$20,000, have been destroyed. Reported insured for \$4,000.—Barn of L. Villeneuve burned at Charlesbourg. Quebec.—Residence of M. Belanger in St. Rochs, damaged \$800 by the explosion of a lamp.—Quebec, Oct. 20.—A fire last night at Spencer Cove destroyed three houses belonging to Mr. Corrigan, Mrs. Hammond and Mr. Bremmer. Mrs. Hammond is insured.—Bridgetown, N.S. -Craig's foundry and the smith's shop of F. C. —Craig's foundry and the smith's shop of f. U. Nutt's canning factory, also the district court house, totally destroyed by fire. Craig's loss, \$8,000; \$1,700 insurance. Nutt's loss, \$3,000; insured for \$1,000.—Earltown, N.S., 18th.—John Sutherland's store burned down. Incendiarism suspected.—North Sydney, 16th.—C. & W. Hackett's store. J. W. Papnit's meat shop. diarism suspected. — North Sydney, 16th.—C. & W. Hackett's store, J. W. Peppit's meatchop, and A. McDougal's tailor shop burned; Hackett and Peppit's loss covered by insurance.—Summerside, P.E I., 15th.—Franklin House stables took fire, spread to Muttart's dwelling, R. Hunt's warehouse, Journal office, in fact the whole block between let and 2nd, General and St. Stephen streets consumed. Loss placed at \$30,000. Franklin House and D. Hamilton, no Hant. partially insured. The insurance; R. Hunt. partially insured. The Fire Insurance Association had \$2,000 on Hunt's The Journal office had \$2,500 in the Northern Insurance Company.

-From a business point of view: "Papa," said a little boy, looking up from his Sanday school lesson, "are all of our deeds in this world recorded?" "Not always," replied the old man, who is a real estate lawyer. \$350 once by failing to record a deed." " I lost

-Here is a fair sample of the highly condensed newspaper item, which we find in the Hamilton correspondence of the Mail It is expressive: "W. Carey and A. Crawford both wanted the same cornet. They fought, and the court assessed Carey \$10. Crawford's neighbors will probably pay Carey's fine."

Commercial.

MONTREAL MARKETS.

MONTBEAL, Oct. 29th, 1884.

The stock market has ruled very dull and a shade weaker during the week past. There was no outside demand whatever, and the feeling of the general public as regards stocks has been one of apathy. Last transactions in Montreal were at 189; Merchants, 110; Commerce, 116; Richelieu is the only stock showing any strength da, we are told, was 22,052 bales this year ling & Moore, all consumed, Union Block badly and has sold up to 571, being a substantial ad-

vance. Money is plenty and the demand slack; good paper discounted at 7 per cent., and call loans are made at 4 to 5 per cent. General business shows little gain or increased activity. In pig iron and metals a trifle more business has been done, but orders are still cautious. Dry goods men still complain of light orders, and are devoutly praying for the long-looked-for frost. In other lines, with the exception of groceries, the movement is still restricted, and remittances give little evidence of improve-

Ashes.-Receipts, which were pretty free for the first half of the month, have fallen off somewhat. No. 1 pots sell at \$4.25 to \$4.30, seconds are not much in demand and won't bring beyond One lot of pearls sold the other day on p. t., but price is nominally \$5.00

CEMENTS .- In this class of goods prices are firm generally. Portland Cement, \$3.25 per brl.; round lots, \$2.90 to \$3; Roman, \$2.75; Cana. dian, \$1.75; Fireclay \$2 per bag; Firebricks, \$22 to \$30, per thousand as to brand.

Fish.—Some small cargoes of Labrador herrings are reported since last writing, and we be-lieve \$6.50 is asked. Cape Breton, \$5.25 to \$5.75 dry cod, \$4.25 to \$4.75; green do., \$5.25 to \$5.50 for No. 1; \$4.25 to \$4.75 ; green do., \$5.25 to \$5.50 for No. 1; \$4.25 to \$4.50 for No. 2; North Shore salmon, \$15, \$14, and \$13 for Nos. 1, 2, and 3 respectively; British Columbia do., \$13.00. Mackerel from \$4.00 to \$6.00; lake trout, \$4.25. No whitefish vet No whitefish yet.

DRY GOODS.—The atmospheric conditions are still unfavorable to any very great improvement in business, the weather continuing very wet and unpleasant, in fact there has hardly been a day for the past month but it has rained some time. Sunday and Monday were colder, leading to a little more activity in warm textiles among city men, but a solid frost is badly needed. Country and outside orders, while fairly numerous in some cases, are light in amount, woolen underwear being the article most in demand. Country remittances show few signs of improvement as yet, but with hard roads there will probably be more favorable reports in this respect. Some buyers for wholesale houses have already started for Europe, and the evident disposition among importers generally is towards light buying of spring goods.

DRUGS AND CHEMICALS.—There is a little that is fresh to note in these lines: business not very active and values generally are easy. Cream Tartar being about the only articleschowing any strength. Quinine is weaker, also Crrbolic acid. We quote: Sal Soda \$1.10 per 100 lbs.; Bi-Carb. Soda, 2.50 to \$2.60; Soda Ash \$1.65 to \$1.75. Bichromate of Potash, per 100 lbs., \$8.50 to \$10; Borax refined, 11 to 12½c.; Cream Tartar crystals, \$2 to 34c.; do ground 36c. to 38c.; Tartaric Acid crystals, 52½ to 55c.; do. powders Tartaric Acid crystals, 52½ to 55c.; do. powders 55 to 58c. per lb.; Caustic Soda, white, \$2.40 to 2.60; Sugar of Lead, 9 to 11c.; Bleaching Powder, \$2.25 to \$2.75 according to lot; Alum \$1.75 to \$1.90; Copperas, per 100 lbs., \$1.00; Ground Sulphur, \$2.75 to \$3.00; Flowers Sulphur, sublim per 100 lbs., \$3.00 to \$3.25; Roll Sulphur, \$2.40 to \$2.60; Sulphate of Copper, \$5.75 to \$3.50; Epsom Salts, \$1.25 to \$1.40; Saltetere, \$9.00 to \$9.50; German Quinine, about \$1.10 to \$1.20; American do., \$1.20 to \$1.25; Howard. \$1.25 to \$1.35; Opium, \$4.25 to \$4.50; Howard, \$1.25 to \$1.35; Opium, \$4.25 to \$4.50; Morphia, \$2.20 to \$2.30; Gum Arabic, sort, 28 to 33c; White, 40 to 55c; Carbolic acid, 45 to

but there is a considerable output all the time by refiners. Refinery price for granulated is Molasses dull and unchanged. Teas have gone still higher, and the demand is good here, though it is a hard job to reconcile the views of buyer and seller at times. Orders sent to Japan some time ago for low and medium grades, are still unfilled and likely to remain so. Greens and blacks show no special change. The steamer "Escalona" in port from the Mediterranean, and will be followed in a few days by the "Dracona" with the bulk of the fruit supply. Valentias, as stated last week, will be scarce and dear, as also will be Malaga fruits, but sultanas, prunes and figs will be

George Some degree of complaint exists among country merchants that farmers are not buying freely, but the amount of distribution going on among wholsalers and jobbers does not show any particular sign of falling off, and payments in this line are not greatly complained of.
Sugars have not advanced any further since last report, and are at a standstill as regards prices, in good supply at reasonable figures. Eight cents is being asked for wholesale lots of good valencia raisins and off brands have been sold at 73c., sultanas can be had at 7c. The price of ma'azas has not been yet established, but as stated will be high; currants 5\frac{3}{2}c., but the quality is not uniform; prunes 5c.; Eleme figs in bags 6\frac{1}{2}c. and extra good value. Shippers rep rt that a larger quantity than usual of in-ferior valencies and currents has been sent to America this season. Rice, spices, and tobacco unchanged, almonds scarce and dear, sardines 11 to 11 to; lobsters scarce and about \$6 asked; tomatoes easy.

LEATHER.—Trade rules on the quiet side, here being comparatively little buying done by city manufacturing houses; there is some thing being done in outside orders. The market con'inues pretty bare of splits, and in no time are stocks very full, but they are sufficient to the demand. Shipments of splits, buff and pebble continue to Britain. We quote Hemlock Spanish Sole B. A 25 to 28c., ditto, No. 2, B. A. 22c. to 25c; No. 2, Ordinary Spanish, 24c. to 25g: No. 1 ditto 22c. to 23c; No. 1 China 23c. No. 2 21c. ditto Buffalo Sole No. 1, 21 to 23c. ditto No. 2, 19½ to 21c. Hemlock Slaughter, No. 1, 26 to 27½c; Waxed Unper, light and medium, 33 to 38c; ditto ditto heavy. 33 to 36c.; Grained, 34 to 38c. Splits, large, 23 to 30c.; ditto small, 16 to 24c. Calf-splits 29 to 32c. Calf-skins (35 to 46 lbs.) 70 to 80c; ditto (25 to 34 lbs.) 60 to 70c.; Imitation French Calfskins. 80 to 85c; Russet Sheepskin Linings, 30 to 50c; Harness, 24 to 33c; Buffed Cow, per ft., 14 to 16c. Enamelled Cow. 15 to 16c. Patent Cow, 15 to 16c. Pebbled Cow, 11½ to 15½c. Rough, 23 to 28c. Russet & Bridle, 45 to 55c. to the demand. Shipments of splits, buff and

METALS AND HARDWARE .- For pig iron and metals, orders are rather more numerous, and though none of them is at all heavy, still the aggregate is larger than it has been for some prove lasting is hard to say, but it may be only a little temporary spurt prior to the closing of navigation. The iron market at home seems again stiffer, warrants being now cabled at 42/-, but prices here are relatively lower. Bars continue market as also do Conada and ting but prices here are relatively lower. Bars continue unchanged as also do Canada and tin plates. At home the tin plate market is reported easier, but as local stocks are laid in 330; White, 40 to 55c; Carbolic acid, 45 to 50c.

FLOUR.—The market since last writing has been rather more active, owing to demand from Quebec and lower ports and values have ruled pretty steady. The receipts for last week were 30,557 brls., and stocks were reduced 2,734 brls. We quote: Superior Extra, \$4.05 to 4.10; Extra Superfine, \$3.87\forall to 3.99; Fancy, \$3.75 to 3.80; Spring Extra \$3.75 to 3.80; Superfine, \$3.40 to 0.00; Strong Bakers (Canadian) \$4.50 to 4.85; American ditto., \$5.00 to \$5.50; Fine, \$3.10 to 3.15.

Fubl.—The supply of raw furs is limited, but the demand for bear, otter, and beaver still exists. Some cold frosty weather is needed to cause a rush among furriers, the present wet unseasonable weather not being favorable to them. We quote for prime skins: Beaver 2.75; Bear, \$8.00 to 10.00; Red Fox, \$1.00 to \$1.10; Cross do., \$2.00 to \$3.00; Marten, \$1.00 to \$1.25.; Muskrat, 8 to 10c; Otter, \$8.00 to \$1.25.; Muskrat, 8 to 10c; Otter, \$8.00 to \$1.00; Raccoon, 50c average; Skunk, 40 to 60c. and freights are higher, local prices are not

also Parmenter & Bullock and Goulette good, in
stock; "Gananoque," we are glad to proclaim,
still ranks high in its Iron & Steel manufacture,
SCYTHES, Grass and Grain, from the celebrated
makers Hubbard, Blake & Co.

Machinery Steel, 3\frac{3}{4} to 4c. per lb. Ingot Tin, 21 to 22c. Bar Tin, 24c.; Ingot Copper, 16c. Sheet Zinc, \frac{3}{4}.50 to \frac{3}{4}.75; Spetter, \frac{3}{4}.25 to \frac{3}{5}.60 Bright Iron Wire, Nos. 0 to 6, \frac{3}{2}.75 per 100 lbs.

OILS AND PAINTS.—Linseed oil still is very stiff in Britain, the amount of seed available being reported from 20 to 25 per cent. short of last year's figures. We quote 59 to 60c. for raw, and 62 to 63c. for boiled. Fish oils firmer, and we quote 60 to 62½c. for steam refined seal, pale vat 55 to 57½c. and straw 52½ to 55c.; Cod oil 55 to 57½c.; Cod liver \$1.30 to \$1.35c.; olive and caster unchanged. Leads at home are very firm, and dry white is reported soarce. Prices here are relatively lower and we quote. White Lead (genuine and first-class brands only) \$6.25 to 6.75; No. 1 \$5.50 to 6.00; No. 2, \$5 to 5.50; No. 3, \$4.50 to \$4.75. Dry White Lead 6 to 6½c.; Red do. 5 to 5½c. These prices for round lots. London Washed Whiting 50 to 60c.; Paris White \$1.25; Cookson's Venetian Red \$1.75 to 2.00; Yellow Ochre, \$1.50; Spruce Ochre, \$2 to \$3.00.

Provisions.——Fancy grades of Butter continue to command full prices, and the demand apparently cant be satisfied, but there is more than enough of inferior quality. Township butter of fall make is being bought up by city dealers at good prices. We quote Creamery 24 to 26c.; Townships tall make 20 to 22c.; earlier do. 18 to 20c.; Morrisburg 19 to 20c.; Western 17 to 18c. for selected. Cheere exports last week 41,341 boxes: We quote fancy makes 11 to 11\(\frac{3}{2}c.\); August 9\(\frac{1}{2}\) to 10\(\frac{1}{2}c.\) Pork is rather weaker; Western Mess \$18.75 to \$19 25; hams 14 to 14\(\frac{1}{2}c.\); bacon 13 to 14c.; Western lard 10\(\frac{3}{2}\) to 11c. Eggs in light supply, and prices firm at 20 to 21c.

Salt.—Importing is about over for the geason and business is quiet. Elevens 50 to 55c; factory filled \$1.20 to 1.40; Eureka, \$2.40.

Wool.—Shows no new feature, and business is rather quieter. Prices are still 26 to 28c for Canadian A supers; B do. 22 to 24c; Cape 161 to 18c; Australian 19 to 28c, as to quality.

TORONTO MARKETS.

Toronto, Oct. 31st, 1884.

For the end of October, business is undeniably dull. The mild weather and no premonitions of severe frost may in part account for this. The wholesale dry goods dealers find their customers calling out for cold weather which is to revive trade; others say the farmers must be made to sell their grain, and thus revive trade. Still others have different views as to what is the matter with trade. The people who do not complain are the retail clothiers and milliners, the confectioners and the bakers. The last named at least, seem to have a bonanza when they get 12 cents for a four pond loaf and only pay \$3.75 to \$4.00 for their flour.

DRY GOODS.—Most houses find this a dull week, reports from the country being that the movement of goods from retail stores is small. Reports from the old country refer to values of textiles as steady, business being quiet. Domestic cottons continue to be in overstock and, as we elsewhere show, are being offered by certain houses at terms which do great harm to the trade. The Magog prints are in the market and are considered good value.

are considered good value.

FLOUR.—Dealers say they never saw such little demand for flour notwithstanding the prevailing low prices, there is nothing but a hand to mouth movement. We mark down most grades, and the following will about represent current values: Superior Extra \$3.60 to 3.65; Extra, \$3.45 to \$3.50; Spring Wheat Extra, \$3.35 to \$3.40. There is no Superfine offering. Oatmeal, \$3.85 to \$4; Cornmeal, \$3.75 to \$3.80; and \$10.50 to \$11 has been asked for Bran.

FREIGHTS.—On Monday, the 20th inst., the G. T. R. issued its customary fall schedule of rates which are: on flour, grain, and feed per 100 lbs., from Toronto to Montreal, 12½c.; and to various points on the Intercolonial railroad and in the Maritime Provinces as follows:—St. Henri to L'Islet, inclusive, 35c.; St. Jean Port Joli to Riviere du Loup, inclusive, 27½c.; Cacouna to Moneton, inclusive, Salisbury, Jct. (for Albert railway traffic), 30c.; Chatham, 31½c.; Point du Chene (for Gulf ports and Prince Edward Island traffic only), 27½c.; Campbellton (for Bay of Chaleur traffic only), 27½c.; Hum-

phries to Amherst and Point du Chene, Boundary Creek to Coldbrook inclusive (except Salisbury Jet.) 30c.; Nappan to Richmond and Fisher's Grant to Valley, inclusive 30c; Pictou, Truro, Londonderry, Moir's Mills, Halifax, New Glasgow Junction, 27½c.; Windsor Junction, 27½c.; St. John, N. B., 27½c.; Danville Junction, and E. and N. A., and St. Johr and Maine railways, 27½c.; McAdam Jet., and Fredericton Jet., 27½c.; Carlton, N. B., 27½c. Est. Stephen, N. B., St. Andrew, N. B., 27½c. Lots of 100 to 119 barrels flour and oatmeal, and grain, flour, oatmeal, and mill stuffs in bulk or sacks in car loads of 20,000 lbs., and less than 24,000 lbs. will be charged 2½c. per 100 lbs. higher than above figures, but not to exceed the charge for 120 bbls. or 24,000 lbs., as the case may be. Grain and mill stuffs for shipment by water to any point beyond the railway must be in bags. Toronto rates to Montreal rule east to Bowmanville.

Grain.—Wheat: This market is decidedly dull and very little Wheat is coming in either by rail or farmer's waggons. A steadier feeling prevails in Barley and prices are firmer. No. 2 Fall Wheat quotes at 77 to 78c. and No. 3 75c. In Spring the best No. 1 that comes into the market commands not more than 76 to 77c. and No. 2 75 to 76c. No. 1 Barley is worth about 71 to 72c., No. 2 67 to 68c., No. 3 Extra 60c. and No. 3, 56c. Oats a shade dearer say 32c. The following are the

Graceries.—No material change has occurred in the condition of the market since last week. Sugars are firm at the advance, indeed the feeling is, if anything, better; we have heard of some round lots changing hands, which fact indicates a more confident tone. Quotatious are, however, unchanged. Teas are holding their own, all desirable grades are in demand. The sardine catch being almost a total failure importers experience great difficulty in procuring supplies; 11½ to 12½c. is asked for choice packages. Trade on the whole has been very fair, some houses report remmittances as greatly improved.

HIDES AND SKINS.—The supply of hides has somewhat increased; the demand continues active; prices are firm and the stocks light. Sheepskins are in about as plentiful as they usually are at this season; all offering are readily taken at present quotations. It is said, however, that there will be an advance of 5c on the 1st prox. Tallow still continues in good demand at firm prices.

Provisions.—A fair jobbing trade is reported for the week. Long clear bacon is moving freely at 11 to 11½c.; hams as before, i.e. 15 to 15½c.; rolls 11½ to 12c. The receipts of dressed hogs are still limited and the enquiry good. Choice butter is asked for, but no one will touch inferior. Cheese is steady, 12 to 12½c. being the range. There is an easier feeling in dried apples at 7 to 7½c. Eggs are in good demand at unchanged prices, 19 to 20c.

The Circinnati Price Current, in referring to the movement of hogs and progress of packing in the west says:

"Hogs have continued to move to market freely the past week, and the Western packing returns indicate a total of 150,000 for this period, compared with 135,000 the preceding week, and 140,000 for corresponding time last year; total from March 1 to date, 3,720,000, or 170,000 in excess of corresponding time last year. Prices at Chicago are well maintained, and are now a shade higher than a week ago, while a small reduction has occurred here at Cincinnati."

The same journal gives the number of hogs packed from March 1 to date and latest mail date, at the undermentioned places:

March 1 to Oct. 22—	1884.	1883.
Chicago	750 000	1,785,000
Kansas City	590 769	550,000
Cincinnati	120,000	115,000
St. Louis	260,000	215,000
Indianapolis	204,000	
Cedar Rapids, Iowa	173,092	178,000
Milwaukee		173,286
MAIN WALLOO	111,000	94,000

 Cleveland, Ohio
 99,585
 115,000

 Above and all other points
 3,700,000
 3,550,000

 Last week
 3,579,000
 3,410,000

 For the week
 150,000
 140,000

Wool.—The quantity changing hands is limited, and the demand from the mills is rather light. Prices are steady and unchanged.

NEW INSURANCE.—The total obtained by 23 Companies was \$21.593.833—an increase over 1881 of \$3.975.822. This shows an average increase of \$172.860 whilst the ÆTNA LIFE'S increase was \$437.573. Crosarly three times the average.

PREMIUMS PA:D.—The total to 36 Companies in Canada in 1833 was \$3,759.742—an increase in two years of \$665.913. The ÆTNA LIFE'S increase of \$172.367 was nearly one-third of the total increase, and ever \$49.900 greater than that of any other Company.

WORKING EXPENNES—Economy is a most important matter in a Life Insurance Company, and the difference between Companies in this respect is very great. The 4th column in the above table is from official surces, and may be relied upon as approximately expect. The Company that consumes the smallest amount in working expenses, out of each \$100 it receives, is the one that will other things being equal, give the best results to its policy holders. Choose an economical company if you desire a satisfactory return for your money.

In selecting a Company in which to maintain a Policy, the advice of the British Board of Trade should ever be remembered: "The public cannot be misled if they select an office which transacts its business at a small percentage of working cost."

The extraordinary increase in the ÆT'A'S business throughout the Dominion is an evidence that it meets a public want, viz.: Life Insurance of the most select character, furnished by means of annual cash divi 'ends at NET COST PRICE. Every Policy new being issued, after three years, is NON* OREFEE 1 ABLE by its terms, and INDESTUTABLE AFTER DEATH. And every policy issued in Canada since March, 1878, is thoroughly secured by the depost at Ottawa, which is not a mere license fee of \$50,000 (as in the case of some companies), but the full GetVERNATENT RESKEVE, increasing from year to year, as each additional premium is paid in. Nothing like being sure.

For rate tables and other information, apply to the undersigned.

Toronto COMPANY.

27 & 29 Wellington St. East. TORONTO.

President-Hon. EDWARD BLAKE, Q.C., M.P. Vice-President-E. A. MEREDITH, LL.D. Manager-J. W. LANGMUIR.

Directors—Hon. W. McMaster, Hon. Alexander Morris, B. Homer Dixon, Amelius Irving, William Eliiot, William Mulock, M.P., Geo. A. Cox, William Gooderham, J. G. Sott, Q.C., James J. Foy, A. B. Lee, Jamos Maclennan, Q.C., J. K. Kerr, Q.C., T. Sutherland Stayner, W. H. Beatty and Robt, Jaffray.

The Company acts as Executor, Administrator and Guardian, and receives and executes Trusts of every description. There various positions and duties are assumed by the Company, either under Deeds of Trust, Marri ge, or other settlement executed during the life-time of the parties, or under Wills, or by appointment of the Court.

The Company also undertakes the investment of money in real estate mortgage securities; collecting and remitting the interest for a moderate charge. It will either invest the money as agent in the usual way; or should the investor prefer, it will for an extra charge, guarantee the principal and the prompt payment of the interest on fixed days, vearly, or half-yearly. Mortgages thus guaranteed and taken in the name of the investor, are the safest class of investments, and specially commend themselves to Trustees, as well as to Municipal Corporations and Public Companies desirous of establishing Sinking Funds.

The Company also acts as agent for the collection

Sinking Funds.

The Company also acts as agent for the collection of interest or income, and transacts financial business generally, at the lowest rates.

JOINT MANAGERS:

EDWARD L. BOND. STEWART BROWNE,
J. T. VINGERT, Inspector.

DONALDSON & FREELAND, Agents, TORONTO. Active Agents Wanted,

—S. V. White, the Wall street broker, tells a little story illustrative of the attitude of the Democratic party on the tariff question. "A shrewd old woman kept an apple stand. A customer came along and asked what sort of apples she had. '1've some nice swate ones,' she replied, 'wi' a strong laning to tart.'"

—The pulley for the large grain elevator being now built in Fort William by the Canadian Pacific Railway Company, which was manufactured by Messrs. H. R. Ives & Co., of Montreal, is said to be the largest pulley ever made in that city. It measures thirteen feet in diameter, four feet face, and weighs about eleven tons.

—"There is an element in modern business which needs to be very carefully studied," says the Galveston News. "What is meant is that property insured is either remunerative or non-remunerative, and the non-remunerative property oftener goes up in flame than the other. A general sullenness and want of care, want of efficient guardianship, increases risks where there may be no deliberate criminal intent. Methods of business, fashions, etc., change rapidly, and that which is not practically servicable ceases to be practically worth what it is assessed at. The insurance companies are not properly managed, either in their own interest or that of customers whose property is paying and well guarded, unless they discriminate very closely on this point, not so much as to the rate but rather as to the amount of insurance granted. Non-remunerative property must be fearlessly classed as such, and rated of very small value, no matter what it cost. If no property could ever be insured for more than three-fourths of the amount it would fetch under the hammer, owners would bear such risks as would secure ordinary vigilance."

—Particulars are given by the Hamilton Times of a judgment by the Court of Appeal in the case of Alexander vs. Wavell. The action arose out of an assignment made by Ernest Kraft, of that city, to Thomas Wavell, as trustee for the benefit of creditors. The deed of assignment contained a provision authorizing the trustee, until he should deem it advisable, to dispose of the business, (harness and saddlery manufacturing,) to carry on the same, employing any person or persons as his agent or agents for such purpose, if he deems it best, and to supply the said agent or agents with such goods and merchandise as may be requisite for such purpose. Under this deed the trustee took possession of the saddlery business. After the execution of the deed, John Alexander, of Hamilton, obtained a judgment against Kraft and placed an execution in the hands of the Sheriff and caused him to seize the goods in the possession of the trustee, contending that the deed was void on account of the provision above referred to. An interpleader issue was directed to be tried before the judge of Wentworth county, in which issue Mr. Alexander was made plaintiff and Mr. Waveli defendant, and upon such trial His Honor held the deed void. From this decision Mr. Waveli appealed to the Court of Appeal. That Court has now given judgment, reversing the judgment of His Honor and holding the deed to be valid.

Railways.

THE DIRECT ROUTE FROM

FOR ALL POINTS IN

New Brunswick, Nova Scotia, Cape Breton & Newfoundland.

All the popular Sea Bathing, Fishing, and Pleasure Reserts of Canada are along this line.

Pullman Cars leaving Monsreal on Monday, Wednesday and Friday run through to Halifax, and on Tuesday, Thursday, and saturday to St. Joha, N.E., without change.

Close connections made at Pointe Levis or Chandiers Junction with the Grand Trunk Rallway, and at Pointe Levis with the Richelien and Ontario Navigation Company's steamers from Montreal.

Elegant First-class, Pullman and Smoking cars all through trains.

First-class Refreshment Rooms at convenient distances.

First-class Befreshment Booms at convenient distances.

IMPORTERS and EXPORTERS will find it advantageous to use this route, as it is the quickest in point of time and the rates are as low as by any other. Through freight is forwarded by finst special trailes, and experience has proved the intercelemial route to be the quickest for European freight to and from all points in Canada and the Western States.

Tickets may be obtained, and also information about the route and about freight and passenger rates from

用
