State of War in Petrograd; Firm Grip By Kerensky As Trouble From New Source Breaks Out

Korniloff, Seeking Supreme Power, Promptly Dismissed

The Revolt of Commander-in-Chief Declared to Have Created Most Grave Crisis Since Revolution—Government Now Grappling With Situation

Petrograd, Sept. 10.—Premier Kerensky has declared that a state of war exists in the town and district of Petrograd. Premier Kerensky has ordered General Korniloff, Commander-in-Chief of the Russian armies, to resign in consequence of General Korniloff's demand for supreme power. General Klembovsky has been appointed commander-in-chief. Eleven cabinet ministers have been in continuous session in the winter palace today considering measures to face General Korniloff's revolt, which, in conversation with correspondents, the ministers admit is the gravest event since the revolution. So far, except for the deposition of General Korniloff, which the general is apparently determined to defy, no measures have been decided upon, but the discussion is proceeding on a plan to constitute a directory of five members vested with full power. The names so far submitted for membership in this body are Premier Kerensky, Vice-Premier Nekrasoff, M. Skobelev, the minister of labor, M. Tereschenko, the minister of foreign affairs, and M. Savinkoff, the assistant minister of war.

PERSEVERENCE HOPEFUL

In a talk with a correspondent, Foreign Minister Tereschenko said: "The plan for the directory is under discussion, and it may be decided tonight. So far the government is unable to make any statement. At twelve o'clock we expect the arrival of General Alexieff, with whom we will confer. My personal opinion is that General Korniloff's revolt is not dangerous and is partly due to a misunderstanding, which will be cleared up."

Regarding the rumors of widespread arrests in Petrograd today, authorized to declare that no arrests have been made by order of the government, although there may have been some made by the judicial authorities under the ordinary process of law.

Says It Is Exaggerated.

Petrograd, Sept. 10.—Soldiers' committees at the front, wiring the central council of soldiers' and workmen's delegates, charge the Petrograd press with exaggerating the cowardice of the twelfth army and allege that the Riga catastrophe has been overdrawn for a furtherance of the revolutionary propaganda. Committee Kochin, attached to the twelfth army, telegraphed: "Officers confirm the courage of our soldiers and falsehoods about the demoralization of the army are refuted by the fact that our troops were several times separated from their regiments."

BETTER PRICES AS THE STOCK MARKET OPENS

New York, Sept. 10.—Wall street, 10.30 a.m.—The stock market today gave a nod account of itself at the opening, but with indifferent success. Full account of General Electric, which were generally weak on Saturday, yielded two and three points further respectively, but elsewhere the trend was strongly upward. Important shares gained one-half to two points in the early trading, while purchased stocks in the belief that liquidation had pretty well run its course and that technical conditions had been strengthened by the elimination of weakly margined accounts.

NOON REPORT FROM WALL STREET

New York, Sept. 10.—Wall street, noon.—Weakness cropped out in stocks for a moment forcing some of the favorites like Steel, Crucible, Reading and Tobacco Products, a point or so, but later speculative sentiment became more hopeful. The market broadened and advanced rapidly in all directions. Bears operated on an extensive scale, and the entire market reflected opinion regarding the ultimate adjustment of the government's rice fixing schedules. The steel and copper were the strongest features. Bonds were firm.

FUNERALS

The funeral of Mary Madeline Henneberry took place this afternoon from the residence of her parents, Mr. and Mrs. Joseph Henneberry, 30 Simonds street. Rev. Fr. Coghlan conducted the funeral service in St. P-2's church, and interment was made at the new Catholic cemetery. The funeral of John Doyle took place on Saturday afternoon from his late residence, Orange street, to the Cathedral, where service was conducted by Rev. H. L. Coughlan, of the new Catholic cemetery. Relatives acted as pall-bearers. The funeral was attended by many friends.

CRISIS BRINGS PROCLAMATION FROM KERENSKY

Petrograd, Sept. 10.—Premier Kerensky has issued the following proclamation: "On September 8, a member of the Duma, M. Loeffl, arrived in Petrograd and called upon me in the name of General Korniloff to hand over all civil and military powers to the generalissimo, who would form a new government at his pleasure. The authenticity of this summons was ascertained by General Korniloff, who had a conversation with me over the direct telegraphic wire between Petrograd and the main headquarters. "Considering this summons addressed through me to the provisional government as an attempt by certain quarters to profit by the difficult situation of the country and establish a state of emergency, the provisional government has recognized the necessity of charging me, for the safety of the republican regime, to take urgent, indispensable measures necessary to cut at the roots all attempts against the supreme power and rights of the citizens, won by the revolution. "Therefore, I declare a state of war in the country of liberty and public order, and taking all measures, which I shall announce at the proper moment to the people. At the same time I order General Korniloff to hand over his functions to General Klembovsky, commander-in-chief of the armies on the northern front, which has the way to Petrograd, and I order General Klembovsky to assume provisionally the functions of generalissimo, while remaining at Pskov. "Secondly, I declare a state of war in the town and district of Petrograd. "I appeal to all citizens to remain calm, maintain the order necessary for the welfare of the fatherland and to give Belgium complete autonomy, and faithfully fulfill their duty in the defense of the fatherland against the foreign enemy."

Major Ralph Hayes, M.C., son of Mayor Hayes, was one of the party. He went overseas with the first contingent and has been practically continuous service until stricken with trench fever. He is now home on sick leave. Major Hayes won an honorable reputation in the field and his conduct was recognized with the award of the military cross. Another St. John man to return today is Captain Ernest Mayhew, who went overseas with the 118th Battalion and was relieved to Canada on duty. The party included General MacLachlan, who served as director of transport and supplies at Shorncliffe and afterwards was promoted to the rank of general when he was made Quartermaster General of the Canadian overseas forces. Major Storms, M.C., of Hamilton, Ont., went overseas with the first contingent and was transferred to the third division, where he was wounded in an artillery battery until he was wounded at the Somme. Major Cotton, also of the Royal Flying Corps, is returning to his home in Montreal on short leave. Captain Glenn, of Vancouver, a member of the Royal Naval Air Corps, was the Croix de Guerre while assisting the French army at Verdun. Wounds received there necessitated his return to England, and he is home on sick leave. Flight Lieut. Cameron of Montreal, who enlisted while taking the science course at McGill, and secured his commission at the front, also is invalided home on account of wounds. Flight Lieut. Stratton of Peterboro, Ont., was an arts student at Toronto University when he enlisted for overseas service and served with the third division until he secured his transfer to the flying corps. Flight Lieut. McGill, another McGill student, was wounded while serving with the artillery of the first division. Major Alexander, M.C., of Toronto, went over as a private in the 2nd Battalion and won his commission and addition of rank in the field. He returns to recover from the effects of wounds. Staff Captain Scruton, who is returning on leave, went over with the 1st division and was transferred to the staff of the 9th division when it was organized. Flight Lieut. Gwynn, accompanied by his wife, arrived in the city this morning and will leave again on the C. P. R. this evening.

HOME FROM SCENES OF WAR

Two St. John Officers Among Number in City Today

A large party of officers who landed in Halifax on their return from England arrived in the city on the early train this morning. Those for upper Canada and the west spent the day at the Royal Hotel and will leave this evening to continue their journey. Major Hayes, M.C., son of Mayor Hayes, was one of the party. He went overseas with the first contingent and has been practically continuous service until stricken with trench fever. He is now home on sick leave. Major Hayes won an honorable reputation in the field and his conduct was recognized with the award of the military cross. HERE ON FURLOUGH AFTER THIRTY MONTHS OF WAR

Clad in the French blue uniform with peaked cap and top boots, Sergeant De Pine, member of the 42nd Colonial of St. Pierre, arrived in the city this morning on his way from the front on leave to his home in St. Pierre. He spent more than thirty months in the war and during that time he fought on the western front and in Saloniki. He was one of the fortunate ones, as he has come through without a scratch. He is home on a twenty-five day leave. He was very cheerful and expressed himself as being ready to return to the front after seeing his relatives and family.

FATHER LAURENDEAU AT HIS NEW PARISH

Open Air Meeting by Protesting People—Statement by Vicar-General

Ford, Ont., Sept. 10.—Seen in the presidency of Our Lady of the Lake church last night, Father Laurendeau expressed regret at what had already occurred, but declared himself confident the trouble would soon be cleared away. He did not believe any ill will toward him. He was inclined to think the whole matter the result of interference by certain individuals whose identity has not yet been disclosed, but who have long been opposed to Bishop Fallon and his conduct of the diocese, particularly as it applied to bilingual issues and His Lordship's stand upon that question. In spite of a cold, drizzling rain and piercing wind, there was a large crowd out for an advertised open air meeting last night which was held on grounds a short distance from the church. A conservative estimate of the number who gathered outside the church placed the crowd at 2,000 people, most of them French-Canadians from all sections of the country. The general tone of the speeches was of semi-belligerent, the people being urged to "continue the fight you have just begun." It was said that "this meeting is held in solemn protest against Bishop Fallon's decision to give ex-communication to the Church of Our Lady of the Lake or contribute in any way to its support until justice is accomplished."

SAVS POPE'S PROPOSALS WILL HELP CLEAR SITUATION

Rome, Sunday, Sept. 9.—Cardinal Gasparri, papal secretary of state, has returned to Rome after a fortnight's vacation, and has set to work together with Pope Benedict on the accumulation of documents received during his absence regarding the papal peace initiative. Cardinal Gasparri said: "Whatever happens, the proposition put forward by Pope Benedict in favor of peace will have the effect of greatly clearing the situation."

SUBMARINE, BADLY DAMAGED, BADLY IN A SPANISH PORT

Cadix, Spain, Sept. 10.—A German submarine seriously damaged, has arrived here, conveyed by a Spanish torpedo boat. The submarine will be interned in Lacarraz harbor.

Battle For Heights Is Steadily Waged

ITALIANS HAVE OVERCOME GREAT DIFFICULTIES

General Grandina, Minister Of War, Reviews Them

Rome, Sept. 9.—Difficulties, some of them almost insuperable, which have been successfully overcome by Italy in her prosecution of the war, were outlined by General Grandina, minister of war, in a statement to the Associated Press. "In order to appreciate fully the importance of Italy's military efforts," he says, "it must be borne in mind that she has greater efforts were required to bring the position of the Central powers was so strong that intervention against them could no longer be deferred. That moment was most inopportune for Italy, however, as she lacked officers, artillery and supplementary services, so that greater efforts were required to bring the efficiency of the army up to the standard necessary to triumph over a formidable enemy's resistance. "Austria is an important element in the resistance of the Central Powers. Her troops have splendid qualities of courage, tenacity and physical resistance. These forces now on our front are twice as numerous as at the beginning of the war, not counting the forces of Germany which has concentrated on our front two-thirds of her best artillery with abundant munitions. Naturally the number of troops on our front have been advantageous to our allies. "Our front, measuring 400 miles, extends from the Swiss border to the English and Belgian combined. Although it is mountainous, it requires a large number of troops, owing to the necessity of protecting the important regions behind. This mountainous character has necessitated greater efforts for the construction of roads, lodgings and fortifications, intensifying all services and requiring much more arduous work than if level ground. "These efforts can better be understood when it is explained that since the beginning of the war Italy has more than doubled its forces of infantry. Bersaglieri and Alpine troops, organized for mountain warfare, created absolutely new types of artillery consisting of hundreds of batteries of heavy guns, carried batteries, trench mortars, and numerous anti-aircraft batteries, both stable and movable, besides having doubled the field artillery. The number of engineers and sappers has been quadrupled and other sections greatly augmented. There have been organized thousands of sections of ordinary machine guns, and quick firing rifles as well as new specialties like flame throwers and gas ejectors. The military aviation forces have been tripled since the commencement of the war in the mountains. "Heights nearly 10,000 feet high have been reached not only by mountain artillery but by field artillery and even by siege batteries dragged up more than 8,000 feet. "In addition to the forces on the Austrian front, and in the colonies, Italy has provided troops for Albania, the Aegean and Macedonia, which need constant reinforcement owing to the grave losses sustained in the stern struggle against the common enemy. Italy has given her operation a constant effective character which has engaged the largest part of the enemy's best forces on our front to the detriment of a capital strategic importance, despite the enemy's favorable positions, striking a blow, the importance of which is proved by its effect upon the coalition of the Central Powers."

THE CENTRAL POWERS AND POLAND

Berlin, via London, Sept. 10.—The official discussions between Dr. Michaelis, the imperial German chancellor, and Count Czernin, the Austro-Hungarian foreign minister, during the latter's recent visit to Berlin, included a further proposal for a Polish government on the lines laid down in the proclamation issued on November 5, 1914. Full agreement has been reached on all points. It is expected that within a few days an important statement on the question of the Polish constitution will be made by the German and Austrian emperors.

MAY REVEAL MORE ABOUT GERMAN INTRIGUE

London, Sept. 10.—A despatch to the Daily Mail, from Jibuti, Africa, says a German named Holtz, and an Austrian named Karmelich, who with forty Arabs have been wandering in the interior of French Somaliland for about two months, have been captured after a strong resistance in which several were killed. The capture is expected to result in important revelations of German intrigue in Abyssinia.

SUED FOR MILLION. Judgment in Matter of Sinking O Steamship Heathcote. Montreal, Sept. 10.—The steamship Kelbergen is being held responsible by the admiralty court here for the sinking of the Dominion Shipping Company's steamer Heathcote off the coast of Newfoundland during a heavy fog on the afternoon of July 25 last. When the Heathcote, a vessel of 2,845 tons, loaded with cement, was struck by Sydney from Port Au Port. The plaintiff's claim was for \$1,000,000 damages, but reference was made by the court to the registrar, W. Simpson Walker, K. C., to assess the damages.

JEWISH ANTI-CONSCRIPTION MEETING IN MONTREAL. Montreal, Sept. 10.—M. Buhay, Socialist candidate in St. Louis and St. Jean Baptiste division, declared before 600 people in Prince Arthur Hall here yesterday afternoon that the defeat of the Borden government would be the defeat of conscription, and therefore every effort should be made to defeat it. He also advised the gathering to take advantage of every clause in the military service act which would help them to secure exemption. It was a Jewish anti-conscription meeting. Most of the speakers used Yiddish in their addresses.

SUICIDE FOLLOWS ATTEMPT AT MURDER. Kimberly, Sask., Sept. 10.—After shooting George W. French, while he was sitting in his office in a livery barn, firing through the window, W. Albert Reed committed suicide on Friday night by shooting himself with a rifle. The bullet struck at French struck him in the head just above the back of the neck, escaping a vital spot.

Honors Won By Canadians

Canadian Headquarters in France, via London, Sept. 9.—(By Stewart Lyon, Special Correspondent of the Canadian Press)—The award of the military medal to twenty-four non-commissioned officers and men of a French-Canadian battalion, which did gallant work at the capture of Hill Seventy, and had already earned high praise for its achievements at Courcellette, shows that the men of Quebec province had a full share in our recent victory. Here are some records of French-Canadian valor from the official statement as to the reasons for the award of the military medal.

gung he posted them with marked ability and kept moving from section to section, cheering his men up under heavy shelling. During an enemy counter-attack he remained with his section at a most critical spot in the line and was, to a great extent, responsible for the repulsion of the counter-attack. One can almost see through the smoke of battle the powerful frame and fearless face of Sergeant Joseph Arthur Naud, of whom the records say that in the battle of Aug. 21, on the southern slope of Hill 70, he led a party of men to the front line under intense and continuous barrage. He himself carried as much ammunition through this barrage as two ordinary men could have carried.

Will Italy's Big Drive Open the Road to Berlin? Canadians forcing their way through the shell-shattered streets of Lens, French soldiers retaking Dead Man's Hill at Verdun, Italians swarming over Holy Mountain, and pushing along the well-defended slopes of the Painsizza and Carso plateaus on their way to Trieste, are speaking a message plainly heard above the thunder of their guns. It is a reply to the Pope's peace plea antedating the polite notes of the Allied diplomats, so some editors believe. That Italy now has the best position of any of the Allies, is the opinion of a United States army expert, whom the New York World quotes as saying that "during the present year the Allies are looking to Italy alone to carry out an offensive which may have a tremendous effect upon the outcome of the war. . . . If the present Italian offensive compels the Austrians to retire from the mountain regions completely and give the Allies an opportunity of holding them securely until next Spring, it can readily be seen that these forces will be able to play havoc with the present Teuton lines on all quarters."

Conflicting testimony of the most weighty kind will be unearthed at every turn. Perhaps the sole really reliable guide to the actual facts of doubtful cases will be the files of THE LITERARY DIGEST, which cover all these great events with absolute impartiality from week to week. Here the historian will get the views and reports of all parties as to any particular happening cited, in their own words, and will be able to compare and judge of the facts for himself. NEW BILL AT THE OPERA HOUSE CATCHY

Picture Serial and Vaudeville Acts Please Large Gatherings. The performances at the Opera House on Saturday afternoon and evening were attended by hundreds of patrons and the fine new vaudeville acts received almost unanimous praise. After the opening overture, well rendered by the orchestra, the audience settled back to enjoy the popular motion picture serial, "Gloria's Romance." That this and the whole performance made a decided hit was evinced by the frequent and prolonged applause. The first number on the programme, at the conclusion of the motion picture episode, was a rendition of musical numbers on bag pipes by Mackenzie Bailey, a returned veteran. After playing a pleasing Scotch tune he changed instruments and gave a lively Irish air and ended with a violin solo. He was given a grand ovation at the conclusion of his act. Jules and Frances appeared in a new and decidedly novel sketch. When the curtain rose the scene presented was a soda fountain and confectionery store. The clerk comes on whistling a catchy air and is soon busy making preparations for the day. A new cashier arrives and from that until the conclusion of the act the audience is regaled with witty sayings, clever repartee and songs and dances. Chas. B. Lawlor and daughters offered a programme of musical numbers of sparkling quality. In addition to well rendered songs, they showed much ability in portraying different characters. One song entitled "On the streets of New York," which was composed by Mr. Lawlor, won instant favor and the singers were forced to respond to an encore. Wm. Cahill is an entertaining conversationalist. His recitation at the conclusion of his act evoked prolonged applause. The Aitken Trio gave the closing act. The male members are exceptionally good contortionists and some of their

DEMOCRACY BETRAYED

While the sons of Canada are fighting in France and Flanders to make the world safe for democracy, the government at Ottawa, led by Sir Robert Borden, is pursuing a course that saps the very foundations of democracy.

It is attempting to deny to a free people the right to choose those who shall govern them. It seeks to fasten an iniquitous autocracy—the autocracy of fraud and graft and sectionalism—upon this free country, whose people have been taught to boast of their liberties, and to whose shores the oppressed of every land have been invited and urged and aided to come to breathe the atmosphere of freedom.

A parliament that is no longer representative of the people—a parliament whose term was mistakenly extended for a time—proposes now to disfranchise people who have as good a right to vote as has Sir Robert Borden himself, and it proposes by an exercise of autocratic force, worthy of the Kaiser himself, to entrench itself in power for another term.

Not all of parliament, however, is guilty of this crime against the people. Sir Wilfrid Laurier and the Liberal members will fight until closure renders their efforts of no avail. The crime will be perpetrated in spite of them, and go on the record to the everlasting shame of the Borden government.

Will the people stand for it—the people who will still have the franchise? The Borden government would deprive them of their votes just as quickly if it were possible, and if there were any suspicion that they would vote against the government.

Democracy is being betrayed in Canada while it is being saved in Europe. There should be no union government. No Liberal who believes what he professes can unite himself with the champions of autocracy. The Borden government must be defeated, or Liberty is betrayed in her own house.

THE RUSSIAN CRISIS. Another very serious situation has developed in Russia. Gen. Korniloff, a very brilliant leader, has made demands which the government cannot concede, and he has been deposed. There were rumors before the Moscow conference was held that there was friction between Gen. Korniloff and Premier Kerensky, and though it was then denied it now appears to have been well-founded. It is said that the general's demands amount to a dictatorship, and that though deposed he may not accept the situation without a struggle.

WHOSE IS THE FAULT?

At intervals we are told that the notorious road houses in St. John county are closed. Complaint is now made that they are not only open but that one road in particular is dangerous for carriages at night because of the reckless conduct of men under the influence of liquor.

THE KAISER'S FATE. It is a good plan to catch your hare before cooking it. Nevertheless a suggestion by the editor of the New York Sun regarding the punishment which should be meted out to the Kaiser is more interesting than most of the suggestions concerning him, because it will be both practical and just.

LIGHTER VEIN. Bankruptcy Brewing. An alien, wishing to be naturalized, applied to the clerk of the office, who handed him the form. The first three lines of the blank ran as follows:—Name—Born—Business—

When We Stop Taking Ice. We see that a household refrigerator plant has been invented that ultimately will do away entirely with the necessity of taking ice, and we sometimes wonder when the ultimate comes will take the place of our old-fashioned ice.

Heavy fighting on the western front continues, with slight gains for the Allies. In the east the German advance on the northern front has been slackened. The Russians are still retreating, but are said to be preparing for more vigorous defensive movements.

APPOINT A WOMAN. The suggestion that the new censor of moving pictures to be appointed by a woman is one the government would do well to accept. The women of this country do not get sufficient recognition on public boards, and a reform in that direction is overdue.

Germany and Austria have a fuel problem. Well, we have one ourselves.

**War Summary**

Field Marshal Haig the British troops have delivered successful attacks, especially northwest of St. Quentin where German positions on a front of several hundred yards were captured and prisoners taken. In Flanders the British guns are still roaring in the mighty bombardment that has been in progress for more than a fortnight, but as yet the infantry has not been loosed for the impending dash into the enemy territory. Here the vanguards of the German and Russian advance in northern Russia, due in large measure to the Russians making stands at several points, particularly on the front of the Pakoff railroad line leading eastward from Riga. Here the vanguards of the German and Russian cavalry are engaged in fighting, the result being that the invaders are held back while the Russians are preparing defenses in which to make a stand. On the upper reaches of the Aar river the Germans have thrown pontoon bridges across the waterway and are gathering their forces for another onslaught. Concentrations of Germans also have been discovered in the region of Jacobstadt and Dvinsk, probably indicating that Prince Leopold of Bavaria proposes an extensive operation against the Russians in this region.

On the lower end of the line in Roumania, the Russians and Roumanians continue to hold the Austrians and Germans for no gains, notwithstanding violent attacks which have been preceded by heavy artillery.

**VISITED HALIFAX**

Commissioner J. V. Russell and William Murdoch, city engineer, returned Saturday night from Halifax, where they went on special invitation to inspect the terminals there. The intention is to apply some knowledge gained by the inspection to work being done about local wharves. They were shown about the work by A. C. Brown, engineer in charge, and he informed them that while construction work was proceeding satisfactorily, it will be next week before it is completed.

The Acadia Recorder, of Halifax, has the following:  
"Harbor Commissioner J. V. Russell and City Engineer Wm. Murdoch, of St. John, are at the Halifax Hotel. They called at the City Hall today and made an inspection of the terminals. Mr. Russell has a host of friends in Halifax who are always pleased to see him, and he with City Engineer Murdoch are welcome visitors."

U. S. Immigration Chief Is To Leave Tonight

American Consul Reads Address and He and Immigration Staff Present Cane and Pin -- Mr. Miller Speaks of His 22 Years Here

Some weeks ago the Times announced the resignation of Peter E. Miller, inspector in charge of the United States immigration office work in this district. Mr. Miller's resignation went into effect on last Saturday and he and Mrs. Miller will leave this evening for Rochester, N. Y., there to reside. Rochester is Mr. Miller's native place.

In the immigration office after the arrival of some members of the service who had seen on the train, a pleasant event took place about half past twelve o'clock on Saturday afternoon.

**PETER E. MILLER**

when the staff, accompanied by the American Consul, H. E. Culver, assembled to say farewell to Mr. Miller and make a presentation to him as a token of their esteem. Mr. Culver, declaring the pleasure it gave him to be made the spokesman on such an occasion, read the following address:

St. John, N. B., Cahada, September 7, 1917.

To Mr. Peter E. Miller,  
United States immigration officer in charge of the Frontier Service:

We, your friends and compatriots in the government service, take this opportunity of expressing in a tangible way our appreciation of your official and personal integrity, your loyal friendship and steadfastness of purpose.

We, the members of the immigration staff of which you are the officer-in-charge, have ever found you just and fair and while ever insisting upon a rigid adherence to duty, and a faithful observance of the laws and regulations of the service, you have ever been willing to condone and overlook our human shortcomings.

Your long official service to the government of the United States here in Saint John, and elsewhere, has been marked by fidelity and honesty; no man could serve his country with greater zeal and in so small measure indebted to the vigilance and fidelity of Peter E. Miller.

Your country trusted you and you have ever been faithful to the trust. We can pay you no higher compliment than this, and the people of the United States are in no small measure indebted to the vigilance and fidelity of Peter E. Miller.

In your resignation we realize that the government loses the services of a reliable and faithful officer and the staff of which you are head, a true friend and brother.

In separating, our hearts and our best wishes go with you and your family; may you enjoy many, many years of well deserved rest.

As a token, therefore, of our regards we ask you to accept these small gifts in the same spirit that prompts the givers.

Dr. W. Leonard Ellis Arthur Wakin  
Lester S. Perkins Arthur E. Lewis  
George H. Clark John B. Johnston  
Earl Crandallmire Herbert C. Gillis  
Charles E. Miller Ray T. Lare  
Joseph E. Gray Fred W. Arndt  
Henry S. Culver

As Mr. Culver concluded, Arthur Wakin placed in Mr. Miller's hands two very fine gifts—a gold-headed cane with inscription, and a stick pin with topaz pearl setting.

Mr. Miller, deeply affected by the evidence of good will and esteem shown him, found it hard for a moment to make reply, but Mr. Culver tactfully intervened and then the recipient spoke heartfelt words of appreciation of the sentiments expressed in the address, the personal good wishes of his staff and of the consul and the very fine gifts they had presented to him. He had been, he said, twenty-two years in St. John. It was a long time and he was loath to leave a people among whom he had lived so pleasantly for so many years and with whom he had had such uniformly cordial relations. This he could say both of his official and private life. The former had brought him into close contact with the police, the city officials, the transportation companies, the Canadian immigration officials, the American consulate, the customs department and the newspapers and with all he had been happy to get along well. He thanked all for their cooperation. He also spoke of the loyalty of his staff. He had always tried to be fair and just to his men, always keeping in mind the duty he owed to the government. He wished for his successors the same earnest, loyal cooperation of the staff. In conclusion Mr. Miller again extended his thanks to all and said that he would be glad to receive any letters and entertain them should they visit him at his home in Rochester.

A round of hand shaking and personal congratulations then followed. The good wishes of many friends in St. John and throughout the province were followed by Mr. and Mrs. Miller on their departure from St. John.

Will Co-operate in Displaying Special Government Films -- N. W. Gastouguay of Halifax is New President

About seventy-five delegates including members, representatives of film companies and the women of their respective families, attended the second annual convention of the Motion Picture Exhibitors League which opened at Pythian Castle Hall on Saturday afternoon. President W. H. Golding was in the chair and welcomed the delegates from the United States and Canada. He said that one of the most serious difficulties confronting moving picture men at the present time in the maritime provinces was the film combine which was being formed by the United States and Canada. He said that the film combine was being formed by the United States and Canada. He said that the film combine was being formed by the United States and Canada.

The new president in taking the chair expressed his thanks to the committee for the successful holding of the convention. He said that the film combine was being formed by the United States and Canada. He said that the film combine was being formed by the United States and Canada.

The delegates to the convention spent yesterday in an enjoyable outing on the St. John river. The steamer Champlain, bearing about 200 delegates and their friends, left Indiantown wharf yesterday morning about 10.30 o'clock for Brown's Flat. The weather was of the best and the success of the outing was pronounced. Luncheon was served on board and the piles of sandwiches, stacks of watermelon and bounteous supplies of good things of all kinds disappeared in an amazingly short time. About one o'clock Brown's Flat was reached and the company disembarked for a walk on terra firma.

Five or six of the men went in swimming and several moving pictures were taken of them diving and also of the steamer as it came up to the wharf. On the return trip ice cream was served and then the whole company adjourned to the after deck where short addresses were made by the president, Mr. Gastouguay, the ex-president, Walter H. Golding, A. E. McKinley, Miss Fairweather, Mr. Wall, Mr. McAdam, Mr. Gibbon, Mr. Franklin, Mr. Hurley and Mr. Metcalf. The steamer reached Indiantown wharf about 4.30.

Submarine Caused Delay.

It is learned that the delay in getting the shipyard of the St. John Shipbuilding Company under way is due to the fact that the plans for the yard were lost on a torpedoed vessel on the way here from the old country. "A month's delay has been caused through the loss of the plans," a member of the company says. Thomas Nagle, general manager, left last night for Montreal, having received word during the afternoon that a duplicate of the plans had arrived.

It is expected that the work of getting the yard in order will be started immediately on his return. It is the understanding that the company is to erect ten ways and the site of the plant will be near that of Grant & Horn, Courtney Bay.

**ZEBRA CATERPILLAR ON THE RAMPAGE AGAIN**

Several warnings have been published in the press regarding an imminent outbreak of the zebra caterpillar in certain parts of the province. Apparently, however, the means used against this pest are slight since the second brood is now appearing in large numbers. The white masses of tiny eggs are laid on the leaves, mostly on the underside, and the black and yellow striped caterpillars that hatch from the eggs feed in groups or bunches on the leaves. If not too numerous, they should be picked off and destroyed. Otherwise dust the plants with arsenite of lime or Paris green, diluted with slaked lime. This treatment will be useless if put off too long, for when half grown or over, it is almost impossible to kill these insects. Watch the turnips and other garden crops. They are likely to be totally destroyed unless the foregoing precautions are taken.

At the railian store of one of our Irish regiments Mike, an old soldier, was handing the loaf of bread to the men in their turn. Suddenly he turned to the quartermaster, and with a twinkle in his eyes said:

"Aye ye phaze, sir, there's a loaf short 'Whol'd give it to?"

"Keep it yourself, Mike."

Dr. Cassell's Tablets Strengthen Feeble Little Folk and Fortify the Constitution

Every mother should know that Dr. Cassell's Tablets are just as suitable for children, even for babies, as they are for grown-up people. Dr. Cassell's Tablets strengthen the constitution of children and generate that vital energy which enables the little body to develop naturally, and therefore healthy. This is because they promote digestion and ensure perfect assimilation of the nutrients which digestible proteins. The result is that pure rich nourishment is carried to every part of the little body for sustenance and growth.

A few samples of Dr. Cassell's Tablets will be sent to you on receipt of 5 cents for mailing and packing. Address Harold F. Ritchie and Co., Ltd., 10 McCaul street, Toronto.

#### WAR SCENES AT THE CHARLOTTE CO. FAIR

Military Manoeuvres and Trench Work Such as on Western Front

St. Stephen, Sept. 10.—The big Charlotte county fair will be opened on Tuesday, continuing for four days. The fair promises to be the biggest and best ever held by the association, every department being filled with fine exhibits and all available space taken. There will be a big field of entries in the races, fine vaudeville attractions and in addition a military display which will include manoeuvres by artillery batteries and infantry units, with trench digging by veterans of the great war, who have entered into the spirit of the United and British are in actual warfare. This feature of the fair promises to be a big draw.

Governor Milliken of Maine and Governor Ganong of New Brunswick, will meet one day during the fair, with dignitaries on hand to act as escorts. A big collection of souvenirs from the war will be on exhibition, and some souvenirs will be on sale.

#### AIRPLANES FOR FAR NORTH EXPLORATION

Donald B. MacMillan, head of the expedition in search of Crocker Land returned to New York on last Tuesday after a stay of somewhat more than four years and two months in the Arctic.

Mr. MacMillan said that he thought that this was probably the last expedition of Arctic exploration in the future, at least for the present, because of the long Arctic night work and travel is impossible except by moonlight, and it is impossible to do much in half of each month. In the late spring and summer it is equally impossible, for if you don't get back to your base before the ice breaks up you never get back. This means that the short period between the beginning of light and the melting of the ice is the only one in which much can be done.

"When I went north the airplane was still a very imperfect instrument, but what I have heard since my return of the progress made in the last four years leads me to believe that at least the more extensive work of exploration in the future can best be done by its use.

A hydroplane would find great stretches of open water in the arctic seas in summer, where safe landing could be made, and observers in a good machine could do as much in a single season as can now be done in a year or more."

The British food controller says that the United Kingdom will be practically independent of imports so far as the chief foodstuffs are concerned.

#### Appointments On Grand Trunk

Alfred W. Smithers, chairman of the board Grand Trunk Railway System, has issued the following general order:—"The board of directors announce with much regret the resignation of E. J. Chamberlain as president of the company, upon the termination of his agreement. Mr. Chamberlain will remain a director of the company. Howard G. Kelley, vice-president in charge of operation, maintenance and construction, has been appointed to succeed Mr. Chamberlain as president of the company, with a seat on the board, effective September 1, 1917.

Mr. Kelley has occupied the position of vice president in charge of operating, maintenance and construction departments of the Grand Trunk. U. E. Gillen, superintendent of the company, with headquarters in Montreal.

Mr. Gillen announces the following appointments:—W. R. Davidson to be general superintendent, western lines, with headquarters in Chicago. T. King to be superintendent of Detroit division, with headquarters in Detroit.

Other Grand Trunk appointments announced are—

E. R. Bartley, general foreman motive power department at Deering, Me., is appointed master mechanic of eastern lines with headquarters in Montreal. G. H. Wilson, assistant master mechanic, is appointed master mechanic of Montreal shops in place of A. A. Mavor, resigned. A. McMillan is appointed road foreman, Montreal terminals, vice F. H. Holland assigned to other duties.

### THE HARDWARE MARKET

Hardware and Metal, September 8, Saturday

Hardware markets are passing through an interesting stage as there is apparent a general hesitancy to advance prices in the face of an easier feeling in the market for iron and steel. Ingot metals have shown a generally weaker tendency while iron and steel have shown a disposition to mark time pending announcement by the United States government with respect to price-fixing. Retailers also give evidence of being abating with the situation and are not looking ahead for any length of time in the future. Business will in all probability be more of a hand-to-mouth nature for some time to come.

A reasonable movement of fall lines has started which may be expected to develop as cool weather approaches. There have been a number of advances during the week, including those on game traps, woodchopping wedges, posthole augers, pump burners, lantern burners, lubricating oil, hand saws, trowels, carpenter's chalk, drain cleaners, tree pruners, side-walk scrapers. Lined oil prices were shaded downward from the high levels of last week, but the range of prices on turpentine has been widened. Business in hardware lines is seasonably good.

### GROCERY PRICES

The following comment on the market situation in regard to food stuffs will appear in Canadian Grocer last week:—

Of primary interest to the grocery trader during the week was the announcement of prices for the 1917 salmon pack. It was generally expected prices would be high and in this there was no disappointment. Owing to the disappointing small pack there will be only a percentage delivery by the packers. In the case of one-pound sockeye tins there will be only 40 per cent delivery. On coho salmon there will be 10 per cent delivery on one-pound and 40 per cent on half-pound tins. On pink salmon there will be the best delivery of any of the brands, namely, 30 per cent on one-pound and 100 per cent on half-pound tins.

Rumors of an embargo on the export of bacon from Canada are not taken seriously by those connected with the provision trade. It is pointed out that Great Britain needs the bacon and that in all probability some central buying agency will be established similar to that in operation for the purchase of Canadian cheese. Egg production has been heavier during the last week, but has not been sufficient to make the price recede. Butter prices remained unchanged. Poultry is now in excellent shape and production of creamy butter and cheese should be greatly facilitated throughout Ontario.

Advances have been recorded on jams, baking powder, lobsters, tapioca and sago, herbs, substitute tomatoes, tomato soup. A decline was recorded on porridge wheat, which comes as a welcome change to the steadily upward trend of the market. Manitoba flour was another commodity in which a decline was registered, a clean drop of 1 cent. This was induced by reason of a 20c. decline in wheat. Apparently, through inspired sources, the idea has gained currency that the price to be established for Manitoba wheat is to be \$2.20 a bushel. And prices in the market forthwith dropped to that level before the official announcement has been made. Sugar is in weak market, due to the estimated current crop, the idea has gained currency that the price to be established for Manitoba wheat is to be \$2.20 a bushel. And prices in the market forthwith dropped to that level before the official announcement has been made.

### MORNING NEWS OVER THE WIRES

Fire destroyed the bank-head at Dominion No. 1 colliery in Cape Breton on Sunday morning. The mine will be idle several weeks until repairs are made. W. Frank Kennedy, of St. Andrews, is improving steadily, following a serious operation.

Thousands of drifting mines have been observed along the west coast of Norway and Denmark.

### Where Germans Got Their News?

Swedish Diplomat in Argentina Said to Have Been Intermediary

Sensation Caused

London Much Concerned Over Revelations Made by Department of State in Washington—Some Phases of the Matter

London, Sept. 10.—The Washington state department's revelation of a Swedish diplomat in Argentina acting as an intermediary for transferring German messages to Berlin has created one of the greatest international sensations of the war.

The Swedish government, with the monarchy, the aristocracy and the army officers, has been noted strongly pro-German throughout the war and Queen Victoria in several public utterances has proclaimed her German sentiments as strongly as any German could.

The Swedish people, on the other hand, are reported as leaning strongly against Germany in the more recent stages of the war, particularly since the unrestricted submarine campaign began. Sweden's leaning towards Germany was considered a natural complement to her old fear of the Russian autocracy, but the Russian nations held the hope that when the cause for that distrust was removed by the revolution Swedish feelings might undergo a

WHERE CONSCRIPTION BILL WAS SIGNED

This is a view of the residence of the Lieutenant-Governor of Ontario in Toronto, in which His Excellency the Duke of Devonshire signed the military service act, during his visit to the Canadian National Exposition.

Government Applies Closure In Effort To Pass Franchise Bill

Ottawa, Sept. 9.—Parliament sat till midnight Saturday. Sir Robert Borden was absent through sickness. Sir George Foster, as acting premier, was restless and irritable. Hon. Arthur Meighen, rule-book in hand, posed and looked learned. Hon. Robert Rogers, surrounded by a coterie of parliamentary admirers, sat in a back seat with his arms folded and a broad won't-conn-iff smile on his face.

Canada's house of commons was getting a real taste of old-time Manitoba methods. The new franchise bill—officially designated as the war-time elections act—had been before the house for consideration just one hour and fifty minutes by the clock. Three members, Hon. Frank Oliver, O. Turgeon (Gloucester) and George E. McCraney (Saskatoon) had spoken upon it.

Then Sir George Foster rose to give notice of closure. The government war-winning pose had been replaced by government election-winning brassiness. Canada's most drastic franchise act, deliberated, withheld from parliamentary consideration until the dying hours of an overdrawn session, was to be forced through after less than two hours consideration by the people's representatives, by closure.

It was not until 10 o'clock at night that Sir George Foster rose to move the second reading of the measure. The afternoon sitting and the earlier part of the night sitting had been devoted to a discussion of the motion submitted by E. M. MacDonald (Pictou), for the purpose of discussing a definite measure of urgent public importance, the necessity of supplying munitions to Great Britain during the continuance of the war in view of the fact that they are being decreased and stoppage of the same is threatened.

Sir George Foster objected to the consideration of the resolution, but Hon. N. Rhodes the Speaker decided to give the Pictou Scot "the benefit of the doubt," and the debate proceeded. Mr. MacDonald, Sir Thomas White, W. M. Gorman, Sir George Foster, G. W. Kyte, Hon. Dr. Pugsley and D. A. LaFortune spoke.

It was when Mr. LaFortune concluded—then nearly 10 o'clock—that the government launched its effort to "crowd through" the franchise bill. Hon. J. D. Hasen formally moved that the house proceed to the orders of the day.

Hon. Dr. Pugsley challenged the motion, but the Speaker ruled against him. An appeal was taken to the house and the Speaker was upheld on a vote of 84 to 19, Hugh Guthrie (South Wellington) voting with the government. Mr. Hasen's motion was then carried on a vote of 85 to 20, against a straight party division with the exception of Mr. Guthrie.

ments as possible on the other side of the Atlantic. "She is continuing to order the shells," Sir Thomas went on, "which she requires in this country and my honorable friend is entirely mistaken in the statement that the shell industry is to be affected. We have, during the last two or three months, greatly increased the money advances to the imperial government for shell production. We have been advancing \$25,000,000 a month to the imperial treasury. I may say that, in July and August, we paid out much more than \$25,000,000 in each month for that purpose."

"Further," Sir Thomas said, "it was the intention of the Canadian government to advance \$25,000,000 a month for September, October, November and December, and to continue such payments as long as the war lasted. He submitted the following statement of credits to the imperial government, month by month, during the present year: January, \$20,000,000; February, \$25,000,000; March, \$31,000,000; April, \$25,000,000; May, \$20,000,000; June, \$30,000,000; July, \$35,000,000; August, \$37,000,000; September, estimated, \$44,000,000.

The dominion government was supplying money to the imperial treasury not only for the production of munitions in Canada, but also by reason of arrangements made by the Canadian treasury, Canadian dairymen were able to sell their cheese to the British cheese commission.

If the dominion had not undertaken to supply \$10,000,000, which represented the value of Canada's export of cheese, the dairy manufacturers of Canada would not have been able to sell their cheese in Great Britain and there was no market in the United States. Further, a sum of \$10,000,000 additional had been provided for purchases made for the war office account by the department of agriculture.

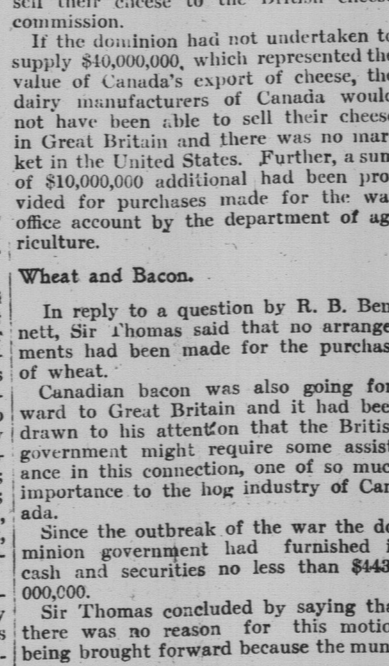

Wheat and Bacon. In reply to a question by R. B. Bennett, Sir Thomas said that no arrangements had been made for the purchase of wheat. Canadian bacon was also going forward to Great Britain and it had been drawn to his attention that the British government might require some assistance in this connection, one of so much importance to the hog industry of Canada.

Since the outbreak of the war the dominion government had furnished in cash and securities no less than \$44,000,000. Sir Thomas concluded by saying that there was no reason for this motion being brought forward because the munitions industries were in no danger. The farmer and producer of food must, however, also be considered.

NO RHODES SCHOLARS. Fredericton, Sept. 8.—Dr. C. C. Jones, chancellor of the University of New Brunswick, has been notified by Dr. G. G. Parkin, secretary of the Rhodes trust, that no Rhodes scholars are to be elected in 1912. The election in that year would fall to the University of New Brunswick. Dr. Parkin's letter states that the election will be postponed until after the war. It is believed that in the event of the war continuing in 1912 the election in that year also will be postponed.

MANCHURIA (East and West News.) Manchuria is terribly poor, despite the mineral and agricultural riches extracted from its soil and rocks, all of which products are shipped abroad. There are probably thousands of industries unable, by remitting toil, to earn more than a meagre living. When to their natural difficulties are added the ravages of bandits and the evils of misgovernment, China, subject to poverty and starvation must be the lot of the people who, in the best of time, are only half fed.

It's the "losing hazard" to pay a big price for an ordinary Suit or Overcoat, when you can buy genuine Semi-ready Tailoring with the labe in the pocket.

That "price in the pocket" means that the Semi-ready Company must uphold their standard values in days of stress. They have a reputation. Seek the sign in the pocket. When found you're saved.

Tire Virtues Sculptured in Brick and Steel A Monument and a Foundation

The new home of Goodyear Tires at New Toronto. New-finished, it yet faintly beats with the titan pulse that, ere long, will send forth daily more automobile tires than there are minutes.

Because lesser production has ceased to satisfy a demand grown great through merit. It is at once a monument and a foundation. A monument to those tire virtues of multiplied mileage and great service that daily have demanded of us increased output.

And just as truly is it a foundation—a foundation upon a foundation. Upon this new factory, will be built our future as it-self is built on our past. Both are the same. The latter is but a broadening of the former. The new foundation is our pledge that we will build in the days and years to come as we have in the past.

If we take pride in the completed substance of our ideal, it is but natural. Such achievement is not given to all. Yet, if we have achieved, it is because earnestly we followed business' basic law—that he who

builds greatly must build worthily. Because we believed in the triumph of manufactured goodness and the ultimate reward of an ideal that profited the buyer as well as the seller.

We have valued our good name with hundreds of thousands of men as the most precious thing we own. Our material success means less to us than the moral vindication of those simple and sincere principles in which we believe.

So we have reached the mark set—and yet we are farther away than ever. For an institution such as ours is hydra-headed. Every task accomplished, every goal gained, sets a twice-difficult task, a twice-further goal.

At New Toronto, then, stands the achievement of our past, the promise of our future. It is the mortgage motorists hold on us that we must pay in continued effort for them. Our industry is a living, vibrant thing, and must grow—or crumble to dust. And business growth is bound up in value and service to you—the customer. This our promise and our obligation.

Government Railway To Alaska Promises to Open New Distributing Centres

Herd Are Increasing—Animals Easy to Raise and the Flesh is Said to Be as Good as Beef or Mutton

the government railroad to Alaska provides the means of shipping to distributing centres in this country, according to the manner, writing in The Catholic World.

There were 70,248 reindeer in Alaska, according to the government report on the subject in 1916, nearly all descendants of herds totaling 1,200 which were imported from Russia to stock the country between 1902 and 1906, and the herds today are increasing at a remarkable rate. Until 1914, the raising of reindeer was confined to natives and Eskimos, but since then the government has permitted others to enter the business. Beginning in the fall of 1914, shipments of reindeer meat to Seattle and other Pacific coast cities are increasing at a remarkable rate. Mr. Manner says that reindeer steak is as palatable as beefsteak, and that it has been well received by many of the best hotels in California, Washington and Oregon from one quarter to one-half the price of beefsteak. He continues:

"There are many things to be said in favor of using reindeer meat on our tables, aside from a desire to cut the high cost of living. The reindeer is not only easy and cheap to raise, but its flesh is pleasing to the taste and is fully as nutritious as beef or mutton. Moreover, practically every part of the animal can be utilized for human consumption and it is one of the easiest meats to keep from spoiling.

"Last winter marked the entrance of the reindeer upon the scene as a possible economic factor in the great world war. The Swedish government sold to German agents 45,500 carcasses of reindeer which, it was estimated, provided 3,400 metric tons of venison for the German soldiers. The meat was purchased at a price which would make it the equivalent of twenty-eight cents a pound in our money.

"When the United States government took over its newly purchased land from Russia and enacted laws for the protection of the seal, the Indians and the Eskimos were reduced to a state of starvation. With the coming of the white man and the wild game and whale upon which the natives had relied for their food supply had been driven into the inaccessible north lands, and now the seal, the one animal which remained for them to live upon, was taken from them. Scores of these people were wiped out of existence by disease and hunger before the government awoke to the fact that it was its duty to preserve the lives of these unfortunate wretches. It was Captain M. A. Healey of the United States revenue cutter Bear who was responsible for the suggestion which finally led to the introduction of the reindeer from Alaska.

Twelve hundred reindeer were brought over from Russia between 1902 and 1906, but in the latter year Russia forbade further exportations of the animal. The herds already imported were placed under the care of Laplanders and sent over for the express purpose of teaching how to breed and care for the animals. Eskimo and Indian boys are now taught how to raise reindeer at government experimental stations in Alaska. They are trained in this industry and taught reading, writing, arithmetic, and sanitation for five years at government expense, after which they receive from six to ten reindeer with which to start a herd of their own. Many of these boys have become wealthy.

"Nearly every portion of reindeer's flesh can be used, and one cut is practically as good as another," says Mr. Manner. "It would seem as if this industry ought to appeal strongly to those of our young agricultural students who are particularly interested in stock raising, for it undoubtedly has an element of adventure about it which they, more than any other class of farmers, would appreciate. Reindeer can be raised for the market much more cheaply than cattle, for they find their own feed both in winter and summer and they can live in barren wastes which would support no other kind of animal. It has been estimated that there is in Alaska close to 300,000 square miles of this land which would afford pasturage for millions of deer. These demitaxed descendants of the caribou which still roam wild in certain parts of Alaska and British Columbia, besides being easy to feed, are not difficult to raise, as they are exceptionally healthy and suffer from no disease."

**OVERCOMING THE SHIP SCARCITY**  
(Wall Street Journal.)  
Shortage of bottoms has been felt on the Pacific coast, as elsewhere, but lack of ships, in one instance at least, has been overcome by Yankee ingenuity in a novel manner.

The government's orders for lumber for news ships, army cantonnements, etc., overtaxed carrying capacity of Pacific coastwise lines, and to get the logs from Oregon and Washington forests to the mills, the logs are chained together in huge rafts, 800 feet in length and 40 to 60 in width. The completed raft is oval in shape and has appearance of an immense turtle. It is picked up by a sea-going tug and towed to its destination, safe against U-boat attacks and at a very reasonable rate for freight.

SOME DIFFICULTIES IN ROAD REPAIRING

We will not have good roads in New Brunswick until the attitude of the people changes somewhat from that which is shown in some sections.

In another county, where a particularly bad piece of road needed to be fixed at once, and for which a small appropriation was available, it was pointed out to the farmers that labor could not be secured, and they were asked if they would get together and do the work.

ALONG THE RIVER

Now Talking of Moose and Deer; Early and Late Potatoes; Fruits of Autumn

The decided chill in the air on Saturday evening did not interfere with the week-end dance in the pavilion at Public Landing. The usual merry party from Woodman's Point was there, besides others in motor cars. The yacht Louisa, Sunol and Scout were at anchor near the wharf. The night was cold, but the young people danced all the more, and thoroughly enjoyed themselves.

There are still no autumn tints in the woods along the river, although there was said to be frost at some places on Friday night. Yesterday was a warm and perfectly delightful day, and boats were out in large numbers. A number of parties spent the afternoon on the beautiful beaches at Belyea's Point.

The trip up river on the Ocean on Saturday afternoon was most enjoyable. The atmosphere was unusually clear, and one could see much longer distances than usual, the hills and fields and houses many miles away standing out in clearer outline, the whole presenting a picture of enchanting beauty. Almost as large a crowd as usual went up on the steamer for the week-end at Land's End, Belyea's, Crystal Beach, Carter's Point, Public Landing and points farther up.

They are already beginning to talk moose at the Landing, and dreaming of the big fellows whose footprints were visible during the summer by fishermen visiting the lakes in the woods of the backlands. The tracks of deer were seen the same time. City folk who go up river find it almost as hard to get butter and eggs as the hunters will probably find it to discover moose and deer. Charles Parker's experience this year is an argument for the early planting of potatoes, where the ground is dry. A late-planted field was stricken by the blight, and suffered damage; but in one that was planted earlier, and where the tops withered from age before the blight came, the potatoes are coming out as clean as a whistle. The farmers are hoping the frost will not come for a week or two longer, so that some of their field and garden crops may have a fair chance to mature.

Fire in Kelliber, Sask. Kelliber, Sask., Sept. 10.—At noon yesterday fire did damage estimated at \$30,000, to the business part of this place.

SOON ABLE TO BOAST OF FINE CADET CORPS

Action Now Being Taken in City; More Than 500 Boys Available

That St. John will have one of the finest school cadet corps in the maritime provinces seems probable from action being now taken by the principals and school authorities pursuant to an order of the school board. On last Friday night Dr. H. S. Bridges met with the principals of all the schools in the city and arrangements were made for the organization of the cadet corps which will be completed probably by the end of the month.

Proper instructors are needed, but it is thought that, considering the teachers who are already qualified as instructors, and the returned soldiers in the city who would be only too willing to assist, enough instructors will be available to handle the boys. Sgt. Doce, cadet instructor at Rothesay, and formerly instructor of the High School cadet corps, was mentioned in this connection. Captain Robinson Black, cadet inspector for New Brunswick, will be in the city soon and will confer with the school authorities on this matter. The consent of the boys' parents must first be obtained. On this point Captain Black has already made it plain that the regulations would be strict. Any boy from twelve to eighteen may join the corps being formed at the various schools, and it is expected that in view of the action of the school board and the martial atmosphere of the times, a large number of volunteers will come forward. The standards from which boys will be taken will probably not go below grade seven, and will include the High School. There are about 275 boys in the High School available, and about as many more in the other schools. This makes a total of about 550 boys available for cadets.

AUTOMOBILE AND CARRIAGE COLLIDE

Smash-up Near Fernalth Gates—Occupants All Said to Have Escaped Injury

There was a bad smash-up on the Marsh road on Saturday night when an automobile and a carriage collided. The automobile was badly wrecked and the carriage was overturned. The occupants of both vehicles are said to have escaped serious injury. Their escape, under the circumstances, was remarkably lucky. In the carriage, which was a hired livery rig, were four men. It was coming in the road when it struck the auto, also a livery vehicle, driven by the owner and carrying several passengers. The collision occurred a short distance beyond Fernalth gates. The car was towed to the city for repairs but the remains of the carriage were still lying beside the road this morning.

LATER OPENING OF THE SCHOOLS PROVES TO BE SATISFACTORY PLAN

The opening of the schools after Labor Day has proved a great success. The pupils have come into school immediately upon opening and have stayed there instead of remaining away for a week or two as was formerly the case.
