Gala Dances, Sports Events at Winter Carnival

Winter Carnival time fast approaches and the dates assigned for this year are January 31st. Feb. 1st and 2nd. Again appearing on the agenda are gala dances, sports events, and varied spectator activities. The spec-tator activities, this year, will include a completely new spectacle in the form of an aerial firework display which will open the Carnival and be seen from all over the city. While mentioning spectator activities we must not omit the colorful Carnivai Parade which was so successful last year.

The merchants are again cooperating in the wonderful fashion of last year with their prize donations. Unfortunately, there is the odd exception who has been misled due to an utterly false rumour that prizes are being given to any and everyone. It is true that the merchants have given us the wonderful support and we, the Winter Carnival Committee, certainly have more respect for their generosity and realize the moral obligations we incur in accepting their donations will be used to help meet expenses of books, board, and penses of books, board, and b

VOL. 89 FREDERICTON, N.B.

JANUARY 15, 1957

Hello '57 — Goodbye '56

It appears to be customary at the beginning of each new year, to review, enthusiastically, events of the preceding year and make prognostications about the coming one. I must confess a certain wariness about making prophecies, whether for tomorrow, next week or next month. However, there is a considerable margin of safety in talking about past activities.

Last year saw the successful inauguration of the UNB Winter Carnival. Students, working on virtually no local precedent, produced what became one of the most enjoyable activities of the year. I firmly believe that the Winter Carnival of 1957 will surpass its predecessor in color, popularity and entertainment and, (This latter information has been given me on reputedly reliable authority.)

UNB carried away laurels in sports in 1956, especially during the carnival. Of particular interest, to me, at any rate, was the fine showing the Ski Team made, both at home and abroad.

Controversy reared its ugly (but fascinating) head in the perenniel Pro-con NFCUS battle in the spring. This particular argument was climaxed with a referendum, which showed (to at least a few) that the National Federation enjoyed considerable support on the campus.

The new chemistry building became a reality and construction started in late spring. This edifice will bring to 10, the total of buildings on the campus of the provincial university.

During the summer, one of the largest enrolments in the history of UNB attended summer school. From all reports, that session was an unqualified success. Again, in the fall, the largest influx of freshmen, brought the regular enrolment to 1250, the highest figure, disregarding the abnormal years following the war, in our history. The difficulties of a rapidly growing university were manifest at every glance around the campus. Lectures in huts; overcrowded classes and irate professors. . .

As the year drew rapidly to a close, the Fall Formal grew prominent on the social scene at UNB. By all reports, one of the largest, and by personal reflection, one of the most enjoyable, its conclusion drew a fitting and a memorable "finis" to 1956.

Graduates of '57 in Engineering

Fredericton

Letter to the Editor

Fredericton, N.B. December 15, 1956.

The Editor,
The Brunswickan,
University of New Brunswick.

Roses to Bill Baker for the fine job he has done as Campus Police Chief.

Policing any group is a chore, but if the group happens to include students the chore seems to be multiplied "n" times.

Anyone who has worked under Bill or been worked over

by him will agree that he is fair and square at all times.

Bill's work on behalf of the force has raised its status from an all time low to a position of respectability not seen for some time on this Campus.

Now that the force has reached this creditable position, it is up to the students to keep it there.

How about it gang?

Yours sincerely, Dave Irvine Forestry '59

THOUGHT FOR FOOD

It all began in 1854. In that year a young English immigrant named William Davies founded the business that has grown into Canada Packers — an all Canadian Company employing more than 12,000 people and operating 11 packing plants and 130 other establishments in Canada. Still showing the initiative and enterprise that enabled Davies to build up his early business into (Continued on page 3)

W ABOUT THAT?

The following news item was read over radio C.F.N.B. on Tuesday January the 8th.:

Two Nashwaaksis residents are on suspended sentences for the next two months. 22 year old Fred Cogswell and 23 year old Jean Richard pled guilty when they appeared before York County magistrate Lloyd B. Smith to answer to charges of being in possession of stolen goods in Fredericton today. Police say the pair stole two top coats from the premises of the Royal Navy Veterans club last Firday evening.

HARVEY STUDIOS

The World University Service of Canada is pleased to announce the 8th International Seminar which will be held during June-July 1957 at the University College of the Gold Coast, Africa. The three-week Seminar will discuss the theme "AFRICA AND TOMORROW"— a study of the aims and problems of developing countries and will be preceded by an orientation programme and study tours in West Africa. The project will be sponsored jointly by the Gold Coast and Canadian WUS National

This will be the first university gathering of this kind ever held in West Africa, and will take place shortly after the Gold Coast attains full independence and becomes the first African Dominion in the Commonwealth. It will be attended by over 100 students and professors from some 20 countries in Africa, Asia, Europe, the Middle East and North America.

In all, 35 Canadian students†students and leaders will depart will attend this Seminar and the for Montreal by air on May 24th local WUSC Committee has been and return to the same city on invited to select one student to August 1st. An introductory represent U.N.B. entation programme will be held. According to present plans, all The introductory programmes will be followed by study tours

throughout the Gold Coast and Nigeria to enable students to gain a background knowledge of existing conditions before returning to the University College of the Gold Coast in Achimota for the Seminar proper. Following the Seminar the students will return to London where they will have approximately three weeks time at their own disposal;

The scholarship is open to a

and, their own expense.

Canadian student currently enrolled in a full time course. Applicants should be students within one year of graduation, or recent graduates who will be returning to the university for at least another year's study. However, exceptions may be made under special circumstances, and the local committee encourages all who are interested to apply regardless of their academic year. Intellectual and emotional maturity, academic standing, and participation in extra-curricular activities will be considered priorities in the selection of the participant. Most important, ap plicants must be willing to take an active part in the promotion of international thinking on the campus on their return. They will be expected to communicate their experiences to their fellow students and members of the community through articles in the campus and local newspapers speeches, radio and T.V. interviews, etc. Also the represent-ative must submit a written report describing their experiences and evaluating them to the University President, Provincial Government Representative, Student Council, WUSC Local Committee, and WUSC National Office. The selection committee reserve the right not to make an award

to any applicant. Students interested in applying for this scholarship are reminded to contact Gino Blink before January 31st to obtain application forms. Announcement of the winner will be made

by February 28th.

THOUGHT FOR FOOD

(Continued from page 2) methods of technology and large, the forerunner of today's multimillion dollar organization, Canada Packers is expanding in new, vital and fascinating fields of meat-food production, edible oils, biological chemicals and agricultural products. The concern for better methods of serving Canada has led Canada Packers into many new enterprises never envisaged by William Davies when he started to market his superior hams and bacons over

a hundred years ago.

The design and erection of a continuous, cold, edible fat extraction process has recently occupied the engineering group. The analysis group developed the official fertiliser potash method. Commercial processes for isolating D vitamins, cortisone hormones and various enzymes have been developed by organic research chemists and engineers of Canada Packers. With modern well-equipped laboratories to work in, the chemists, engineers, biochemists and bacteriologists employed by Canada Packers have endless opportunities for research, for working out control or plant process problems, for helping to bring the wonderful world of tomorrow within the reach of every Canadian.

There are laboratories at all major plants, and a special centralized research group in Toronto co-operates with them. The new chemist begins at a plant laboratory with control analysis. From then on his progress in the company is governed only by his aptitude and ability. The whole field of Canada Packers' vast enterprises are open to him, providing him with opportunities in areas ranging from research and analysis to production and devel-

For technical personnel, Canada Packers offers an interesting stimulating career with the change to keep up-to-date in modern fields of research and technology. From the original vision of Willian Davies has grown up a large concern where graduates in chemical engineering and biological science can find an assured future, serving Canada.

J. R. Lotz, Executive Editor, McGill Daily.

hemical hemical engineers!

Here's why you can build a profitable career with

CANADIAN CHEMICAL COMPANY, LIMITED

Q. What is Canadian Chemical?

A. A young, progressive and fast-growing Canadian company. Its \$75,000,000 plant on a 430 acre site at Edmonton, Alberta, consists of 3 plants - a petrochemical unit, a celiulose acetate manufacturing unit, and a filament yarn plant. It has its own power plant and water treating facilities to supply steam, electricity, water and compressed air. The Company also has technical facilities necessary to provide for the development of new processes and products and control of the quality of its products.

Q. What do we make at Edmonton?

A. Canadian Chemical's three integrated plants at Edmonton use the products of Canada's forests and vast oil fields . . . producing for world markets highquality supplies of organic Chemicals, Cellulose ACETATE FLAKE, ACETATE YARN AND STAPLE FIBRE.

Q. What are my job opportunities?

A. Our engineering department is one of the largest and most diversified in Canada. We have technical and professional services . . . extensive laboratory facilities for operational quality control of our many products . . . for developing and piloting new products and processes. We operate our own power plant and water treating facilities.

Q. What would I be doing?

A. Chemical engineers are needed for a complete range of unit operations at our plant. As one of our chemical engineers you would be filling one or more of these important duties:-

- process design work
- studying process additions and changes
- production supervision and administration
- field inspection
- planning to improve efficiency, or increase production
- supervision of detailing or estimating
- new product development
- meeting and solving challenging problems as a member of our corrosion and inspection group seeking more suitable materials, modifying designs to increase equipment life in corrosive processes
- studying latest developments in protective coatings - testing and utilizing promising new products

Challenging job opportunities also exist for mechanical engineers, chemistry graduates, electrical engineers and engineering physics graduates as discussed in other ads of this series.
