The school kept by Miss Rose Delima Ritcher is a very good one, of her 69 pupils, 16 are protestants, four English pupils learn French, and eight French Canadians, English. The last examination was very satisfactory. Mr. Germain Brousseau keeps a good school

with 180 pupils. The last examination at which the Rev. Vicar of Sorel was present, was very satisfactory.

The school at Grande Rivière kept by Miss Olivine Carrière makes satisfactory progress, although the pupils 60 in number are not as attentive as they ought to be.

The north school Chambly River is kept by Miss Adèle Cartier. Her 56 pupils have made great progress this year.

The south school Chambly River is kept by Mrs. Esther Veilleau, the wife of Mr. Racicot, 66 pupils. I observe sensible progress.

The school of Ile Madame kept by Mrs. Marie Langevin is inferior although attended regularly by 35 pupils. Twenty six children attend the Ile de Grace school kept by Miss Catherine Gardin. They answered well at the last examinations.

The schools on the Islands are kept in hired rooms and need maps. The other districts have school houses belonging to the Commissioners, but only one lot, that of the Chenal du Moine is fenced in.

*Parish of St. Ours.*—In this municipality, there is a primary-superior school for boys, one for girls and six elementary schools. The former was kept for a great part of the year by Mr. Thomas Dagebais, the holder of a diploma for model schools. This teacher appeared to possess the necessary qualifications, but having obtained the appointment through intrigue, he was the first victim to the discord which he had contributed to excite. He quarrelled with the commissioners, and found it necessary to give up his appointment before the expiration of the year. At the time of my first visit, he had 52 pupils all very advanced. At the same time Mr. Dagebais superintended the elementary school at which there were 54 pupils. All are very attentive.

The superior school for girls has been kept by Miss Philomène Cormier for several years past. She has 8½ pupils, to whom she devotes attention almost maternal. Every one respects her and her school has never been threatened by the prevailing discord.

No. 1.—The elementary school is in charge of Miss Eléonore Berthiaume, a competent teacher. She has 45 pupils.

No. 2.—Mrs. Céline Rovard teaches this school. She has 47 pupils, she might be reproached with devoting too much time to her family, to the prejudice of the school.

No. 3.—Miss Azilda Berthiaume and her assistant have 40 pupils. Success satisfactory.

No. 4.—Miss Louisa Délina Arpin teaches with success English and French to 38 pupils. The schoolhouse is in very bad order, although they tried to repair it this year.

No. 5 is in charge of the Misses Godard who teach 36 pupils with success. Books (excepting English) are furnished in all the schools by the municipality.

*Parish of St. Roch de Kékéliou* has only two schools managed with success by Miss Eliza Jeffrad and Miss Philomène Michon. The latter teaches 54 children. Miss Jeffrad has met with obstructions on the part of the contributors, but I hope that a better understanding will exist for the future; 153 pupils attend her school.

*St. Victoire.*—Mr. Daniel Dufaut has 151 pupils and he discharges his duties with a zeal, which augurs well for the future of this school. There are no maps.

No. 2.—Miss Marie Philomène Fontaine; is not so successful as was anticipated, on account of the frequent absences of her pupils, 65 in number.

No. 3.—This school is in charge of Miss Marie Cayer, a young teacher, who notwithstanding her want of experience succeeds in managing and instructing her 32 scholars.

*St. Robert.*—This parish has seven schools.

No. 1.—Miss Philomène Héroux takes successful charge of 44 children.

No. 2.—Miss Olive Montfils has not been so successful as could be wished, on account of the frequent absences of her pupils; 33 children attend the school.

No. 3.—Miss Malvina Deguise makes marked progress; 3½ pupils.

No. 4.—School kept by Miss Sophie Duteau de Landry. Miss Duteau has had misunderstandings with the contributors, but the wrong appears to be on their side rather than on hers; 28 pupils. Miss Duteau seemed to me to be educated and to possess the requisite capability. The place in which the school is kept is rather a miserable shed than a house. It is a badly constructed building, without window sashes and with the door and the chimney broken.

No. 5.—School kept by Miss Aliza Duteau de Landry. The attendance of the children is very irregular, but I hope for improvement in this respect, on account of the zeal and aptitude of the teacher.

No. 6.—School kept by Mrs. Marie Brouillard. The scholars, 33 in number, are assiduous.

No. 7.—School kept by Miss Louise Chénevert, a skilful and much respected teacher; 56 pupils, 28 boys and 28 girls, attend the school.

*St. Marcel.*—This parish has three schools.

No. 1.—School kept by Miss Philomène Chatelle and her sister. Their success is remarkable; 98 scholars attend.

No. 2.—Mrs. Amable Guilmette keeps this school on a good footing. She has 108 pupils.

No. 3.—Miss Céline Giard is teacher, her school is inferior; 36 pupils attend it.

*St. Aimé.*—In this parish there are an industrial college, a convent, and eight elementary schools. The college is under the direction of a priest and four Brothers of St. Joseph, who afford entire satisfaction to the contributors.

The 180 pupils who attend it are divided into five classes.

The college derives its support from the special grant..... \$ 78

The commissioners' grant..... 200

Their pupils... .. 860

Total..... \$638

The college also possesses a fine farm well cultivated and with all the accessories as complete as could be desired.

The convent is in charge of five Sisters of the Presentation aided by a lay teacher. The instruction given to 150 pupils leaves nothing to be desired. It is on a scale as complete as that of the best institutions of the kind.

No. 2.—School kept by Miss Caroline Roy, a skilful teacher; 77 pupils.

No. 3.—School kept by Miss Marie Baupréant; 69 pupils attend, but make scanty progress in spite of the zeal of their teacher.

No. 4.—Miss Philomène Robert, teaches 25 children. Her method of instruction impedes their progress.

No. 5.—Miss Elise Anger teaches 54 pupils with success.

No. 6.—Miss Caroline Chevalier keeps an inferior school with 32 pupils.

No. 7.—Miss Lucie St. Germain also keeps an inferior school, 49 pupils.

Mrs. Chapdelaine teaches 65 pupils with great success.

I observed sufficient regularity in all these schools, and the objects requisite for instruction were furnished *ad libitum* by the parents.

Resuming all the details in this report and in the annexed table, the following statistics are obtained:—

|                                        |      |
|----------------------------------------|------|
| Number of municipalities.....          | 28   |
| Do school districts.....               | 101  |

## SALARIES.

|                                         |              |
|-----------------------------------------|--------------|
| 21 male teachers receive less than..... | \$100        |
| 12 do do.....                           | 200          |
| 11 do receive from.....                 | \$200 to 400 |
| 20 do do less than.....                 | 100          |
| 47 do receive from.....                 | \$100 to 200 |

In conclusion, it affords me pleasure to state that the schools in this district work well, and that the law is generally respected and carried out. The difficulties which have arisen in certain localities are not to be attributed to the spirit of opposition, but rather to miserable local intrigue. I should be glad to see the corporations obliged to furnish school books to the children. Those parishes in which this system has been adopted have derived great benefit from it.

The secretary-treasurers all appeared to be honest, punctual and intelligent; their accounts are generally well kept, and they contribute largely to the success of the schools. Financial matters are prosperous, the rates are regularly collected, and the teachers are well paid. Of course some still complain. I have remonstrated with the parties complained of on every possible occasion and they have promised to do better for the future.

## No 21.—EXTRACT FROM THE REPORT OF INSPECTOR GRONDIN.

## COUNTIES OF CHATEAUGUAY, LAPRAIRIE AND BEAUIHARNOIS.

I have the honor to submit to you my report on the progress of education in my district for the school year ending 1st July last (1864).

You will observe by the statistics, a satisfactory progress since last year, both as regards the number attending the school, and their advancement in the various branches of instruction.

I would draw your attention to the irregularity and want of diligence on the part of

the pupils in certain localities, and the unfortunate tendency, on the part of the commissioners to engage teachers at the very lowest salaries, as being the two most serious obstacles to the obtaining of more satisfactory results.

Furthermore, in certain localities, the accounts are not regularly kept, and it is desirable that the department should sanction certain forms or blank accounts, which in addition to the advantage of clearness would establish an uniform system in this important branch of the administration of the finances of our school corporation.

I propose to submit for your approval some forms for each branch of the accounts, and I am firmly convinced that if my suggestions are adopted, the abuses of which I have so often to complain under this head, will entirely disappear.

I must observe that I have everywhere found the minds of the people favorably disposed, and the system of assessment is deemed the surest means of securing good schools.

The great majority of the male and female teachers discharge their duties with zeal and regularity.

#### COUNTY OF LAPRAIRIE.

*Laprairie.*—The commissioners in this municipality display much diligence and energy in the management of its affairs. They are generously seconded by the rate-payers whose liberality deserves the highest praise.

The boys' academy, attended by 140 scholars, has made remarkable progress under the management of Mr. St. Hilaire, a pupil of the Jacques Cartier Normal School. But as the necessity of a larger staff of professors is very apparent, the commissioners have resolved to intrust the charge of this institution to the Clercs of St. Viàteur.

The convent of the Ladies of the Congregation affords a thorough education to the 120 pupils who attend.

It is to be regretted that Miss Blanchard has resigned the charge of a primary superior school, which has been under her care for several years. Of the eight elementary schools in this municipality, seven are kept by female teachers, and the eighth by a male teacher; English is taught with success in six of these schools.

The commissioners provide books, papers, etc., and great benefit to education results from this system. The schoolhouses are all in good order. The young men of this parish possess a very powerful help to self-instruction in the "*Société Littéraire de Laprairie*," the library of which contains 1,200 well selected volumes. This society also receives nearly all the French newspapers published in the country in addition to some foreign and some English papers.

The financial affairs of the municipality are well managed by the secretary-treasurer, Mr. Julien Brousseau.

*St. Philippe*—The model school has not progressed this year as I expected. This is due principally to want of assiduity on the part of the scholars, and to the apathy of a certain number of the rate-payers. In district No. 1, the school has not produced satisfactory results; this can be accounted for by the prevalence of a contagious disease among the scholars. The examination at the close of the year shewed some progress, particularly in the study of English and arithmetic, among those scholars who were enabled to attend regularly. The teacher has been dismissed. Schools Nos. 2, 3 and 5, are improving, but No. 6 has retrograded under the management of a female teacher who was only tolerated till the end of the year, and she was replaced by another who is doing better. The financial condition of the municipality is very unsatisfactory on account of the negligence of the ex-secretary-treasurer, who left the books full of errors and confusion. Mr. Heroux, the present secretary-treasurer, fulfils his duties to the satisfaction of all interested.

*St. Jacques le Mineur.*—The model school, attended by 127 scholars, is managed successfully and with ability by Mr. Martineau, who receives an annual salary of \$360. With the exception of No. 6, all the elementary schools have progressed satisfactorily. One of these, No. 2, is kept by a zealous young teacher who is not paid in proportion to his services. The accounts are well kept.

*St. Constant.*—Mr. Joseph Paradis and Mrs. Paradis manage the model school, which is attended by 92 scholars. This school is very well kept. School in district No. 2, with 118 scholars is also kept by an able teacher. I can speak in terms of the highest

praise of No. 3, attended by 90 scholars. No. 4, although still inferior, has improved since last year; it is attended by 70 scholars. School No. 5, managed by the same teacher for several years, is progressing; there are 33 scholars. The finances are in a healthy condition. The commissioners refused to accompany me in my visit. I must attribute this refusal to the report on the subject of Miss Boire which I made to your department in opposition to their views.

The dissentients have an English school, attended by 34 scholars, which is managed by a teacher who is provided with a diploma from McGill Normal School.

*Caughnawaga.*—The village of Caughnawaga is an Indian mission which has only one school, which is supported with great difficulty by Canadians who are generally speaking poor. This school is attended by 50 scholars and is managed by a teacher who is provided with a Jacques Cartier Model School diploma. This gentleman deserves a more lucrative situation.

*St. Isidore.*—School in district No. 1, attended by 86 scholars, is satisfactory. District No. 2, or the village district, comprises the model school managed successfully by Mr. Victor Maucotel and attended by 85 scholars, with a separate school for girls managed by an able female teacher who keeps it on a good footing; it is attended by 88 scholars. The commissioners have decided upon building a schoolhouse on a very complete scale. This proves their zeal and the interest they take in the cause of education. In district No. 3, the school is attended by 91 scholars, and is progressing satisfactorily. The books and accounts of the municipality are well kept by Mr. Langevin, notary public.

COUNTY OF CHATEAUGUAY.

*St. Joachim de Chateauguay.*—The convent of this parish with 115 scholars managed by the Nuns of the Congregation gives entire satisfaction. The model school, attended by 80 scholars, under the management of Mr. Desrosiers, bearer of an academy diploma from Jacques Cartier Normal School, has progressed remarkably during the year.

The elementary schools kept by female teachers are four in number, and give satisfactory results. They are all on a similar footing of progress. School No. 2 has 90 scholars; No. 3, 78; No. 4, 62; and No. 5, 25.

The dissentient school has been closed several times in the course of the year. It appears, however, that the ratepayers although few in number make great efforts and submitted to great sacrifices in order to keep it up.

*St. Philomene.*—The five elementary schools of this municipality are kept by female teachers. These schools are all in a satisfactory condition. The model school has neither improved nor fallen off, and has been attended very irregularly. The commissioners have secured for next year the services of a pupil provided with a diploma from the Jacques Cartier Normal School, which will prove a favourable change. The number of pupils in the schools of the several districts may be rated as follows:—

|                            |    |
|----------------------------|----|
| No. 1.....                 | 50 |
| No. 2.....                 | 60 |
| No. 3. { model school..... | 62 |
| { girls school.....        | 55 |
| No. 4.....                 | 68 |
| No. 5.....                 | 57 |

The secretary-treasurer and several of the commissioners accompanied me in my visits.

*St. Martine.*—The model school for boys attended by 128 scholars has given satisfactory results. Nevertheless, the commissioners, for reasons which they did not think proper to communicate, have discharged the teacher, Mr. Guilbeault, and have engaged a graduate of the Jacques Cartier Normal School to take his place. The girls' school, attended by 108 scholars, is managed by Miss Marceline Poissant with that zeal and success which could fairly be expected from a teacher educated at the Laval Normal School, where she obtained a model school diploma. With the exception of the school in district No. 6, the scholars of which are not assiduous; the schools of this municipality, five in number, are

regularly attended and shew satisfactory progress. The secretary-treasurer had left the parish for one month and had not yet been replaced. Doctor Le Pailleur, who shewed great zeal in the cause of education as school commissioner for this municipality took his place. The dissentients have a school only attended by 20 scholars. It has been closed for some time owing to the illness of the teacher; it is now open for the current year in charge of a teacher who as yet has no diploma, but who expects to obtain one in a short time.

*St. Urbain.*—This municipality has not yet the advantage of possessing a model school. There are four elementary schools. School No. 1, attended by 98 scholars is well kept by a good teacher who only receives the paltry salary of \$150 including the value of the firewood furnished by the commissioners. The changes in school No. 2, which for the past two years have occurred twice a year, have impeded progress. No blame can be attached to the commissioners in the matter of these changes. Schools No. 3 and 4 have improved. The commissioners and secretary-treasurer accompanied me in my visits. The dissentient school kept by a female teacher is satisfactorily managed. Mr. Bisson, N.P., keeps the books of this municipality with order and method.

*St. Jean Chrysostôme (No. 1.)*—There are in this municipality, one protestant dissentient school and three catholic schools under control of commissioners. The three latter only are under my supervision. School No. 1, kept by a male teacher and attended by 72 scholars, is satisfactory. No. 2 kept by a male teacher, attended by 70 pupils, has made great progress. In No. 3, improvement is very slow; it is kept by a female teacher and is attended by 30 scholars who are very irregular. There are very few French Canadians in this locality, and English is the only language taught in the schools. District No. 3 is to be joined with No. 2; a French school is to be opened and the district will then be known as No. 3. The books of this municipality are well kept and the teachers are paid regularly.

*St. Jean Chrysostôme (No. 2.)*—Schools Nos. 1, 2, 4, 5 and 7, are under my supervision. Mr. Benjamin Singer keeps the model school with zeal and success. One hundred and thirty-eight scholars attend this school. Miss Faubert teaches French and English to 95 scholars who attend School No. 2; the majority of the scholars is composed of French Canadians. School No. 4, kept by a male teacher and attended by 65 French Canadian scholars, has not progressed, owing to want of assiduity on the part of the scholars. School No. 5, attended by 64 scholars, half of each origin, who learn English and French with satisfactory results. No. 6 is managed by an able female teacher who teaches English to 55 scholars of British origin. The accounts are well kept, but about \$120 of arrears are due and the teachers are compelled to wait for their salaries.

*St. Antoine Abbé.*—There is a French school in this village kept satisfactorily by a female teacher, and attended by 48 French Canadian scholars, also one English school, well kept, attended by 60 scholars of English origin, all Catholics. School No. 2 is kept by a male teacher who teaches French to 72 scholars who attend it. The 4th school is kept by a female teacher who teaches English and French to 60 scholars, the majority of whom are French Canadians. I observed great improvement in these schools. The state of finances is satisfactory.

*St. Malachi of Ormstown.*—I was well satisfied with the result of an examination at the dissentient Catholic school which I visited with the *curé* of the place, the trustees and the secretary-treasurer. This school is kept by a female teacher and is attended by 38 scholars, nearly all of Irish origin. This municipality is very poor and would well deserve a share of the supplementary grant. It would require this money to open a second school of which it stands much in need.

#### COUNTY OF BEAUHARNOIS.

*St. Clement.*—This municipality has a boys' academy attended by 268 scholars, under the management of the Christian Brothers, and a convent managed by the Nuns of the Order of S. S. N. N. de Jésus et de Marie, which is attended by 264 scholars. In both these institutions the best education is carefully imparted. There are 10 elementary schools kept by female teachers, and good progress is obtained. School No. 2 is attended by 134 scholars; the teacher receives \$150, and has an assistant who is provided with a

diploma. No. 3 is attended by 50 scholars, and the teacher receives \$100. No. 4 is attended by 70 scholars, salary \$120. No. 5, attended by 85 scholars, is the best school; the salary of the teacher is \$140. No. 6 is attended by 60 scholars, salary \$100. No. 7 is attended by 108 scholars, and the teacher who has an assistant, receives a salary of \$180. No. 8 is attended by 60 scholars, salary \$100. No. 9 is attended by 50 scholars, with the same salary. No. 11 was only opened two years ago and the teacher receives only \$80. Mr. St. Amour the secretary-treasurer appears to perform his duties satisfactorily. The dissentient school, attended by 40 scholars, is kept with remarkable success by Mr. James Walker, a student of McGill Normal School, where he received a model school diploma. The independent school is almost abandoned, and will be closed before the expiration of the year.

*St. Timothy.*—The boys' academy is managed by Mr. Green with more than ordinary success. One hundred and twenty scholars attend it with a view of obtaining a good commercial education. The teacher has a library of 120 volumes, which he places at the disposal of the scholars without charge. The convent, which is in a flourishing condition, is managed by the Nuns of the Order *S. S. N. N. de Jésus et de Marie*, and is attended by 124 scholars who receive an excellent education. There are five elementary schools kept by female teachers; they are all good and upon the same footing as regards progress. The commissioners are zealous. The books of account and register of proceedings are well kept by Mr. Gervais, notary public.

*St. Cecile.*—This new municipality shews a great increase in the number of pupils attending school. The model school is kept by Mr. Codebecq, is attended by 160 scholars, and is satisfactorily managed. The girls' school, attended by 145 scholars, is well kept by an able female teacher who has an assistant who is provided with an elementary school diploma. The other two schools also well kept. The finances are in a good condition. The dissentient school attended by 48 scholars, is well managed by a female teacher who holds a diploma from the McGill Normal School.

*St. Louis de Gonzague.*—I consider the boys' school kept by Mr. Girard and attended by 140 scholars to be one of the best in my district. The girls' school is kept by a female teacher, and is attended by 112 scholars. The teacher deserves special mention on account of her excellent system. She is assisted by a teacher who holds an elementary school diploma. School No. 3 is kept by Miss Olive Larivière, No. 6 by Miss Malvina Couillard. These two schools have made great progress; the other three are in a satisfactory condition. The finances, which had for a long time been in a state of embarrassment, are now in a better condition. Mr. Bisson, notary public, fulfils his duties as secretary with exactness and ability.

The dissentients have four schools, all well kept, attended by 216 scholars. Nos. 1 and 3 are kept by female teachers; Nos. 2 and 4 by male teachers. Mr. John Symons, Sr., performs the duties of secretary satisfactorily.

*St. Stanislaus de Kostka.*—The model school, attended by 98 scholars, is admirably kept by Mr. M. A. Dupuis, a graduate of the Jacques Cartier Normal School. The result of an examination at an elementary school kept by a female teacher and attended by 82 scholars, was highly satisfactory. The finances are in a prosperous condition, but owing to the negligence of the former secretary-treasurer, there is some confusion in the books. I added 60 volumes to the 264 received from your department this year, making in all 324 volumes distributed among the different schools which I visited. I still have 33 English books remaining for Catholic children.

## No. 22.—EXTRACT FROM REPORT OF INSPECTOR C. GERMAIN.

COUNTIES OF LAVAL, TERREBONNE, TWO MOUNTAINS AND PART OF ARGENTEUIL.

I have the honor to submit my report of inspection during the year 1864, with the statistical tables for the same.

My district comprises:—1st. The whole county of Laval divided into four parishes,

St. Vincent de Paul, St. Rose, St. Martin and St. François de Sales, subdivided into 12 school municipalities, 42 districts, 17 schoolhouses and 26 schools in operation under control.

2nd. The whole county of Terrebonne, divided into nine parishes: Terrebonne, St. Anne, St. Sophie, St. Janvier, St. Jérôme, St. Sauveur, St. Adèle, St. Agathe and St. Thérèse, subdivided into 13 school municipalities, 42 districts, 34 schoolhouses and 46 schools in operation under control.

3rd. The county of Two Mountains including the Lake Mission and nine parishes: St. Colomban, St. Canut, St. Scholastique, St. Hermase, St. Racide, St. Benoit, St. Eustache, St. St. Augustin and St. Joseph; subdivided into 12 municipalities, 48 districts, 48 schoolhouses and 54 schools under control.

4th. A portion of the county of Argenteuil comprising four municipalities in the parish of St. Angélique des Mille Isles and the township of Morin, four districts, five schoolhouses and five schools under control; also the parish of St. Raphaël de l'Île Bizard in the county of Jacques Cartier, with two municipalities, two districts, two schoolhouses and two schools under control.

The tables which accompany my report shew that in my district of inspection there are 43 school municipalities, 120 school districts, 105 schoolhouses, the property of the commissioners, 133 schools in operation under control including elementary, primary and superior schools, dissentient schools, colleges and convents under control. This gives the following figures: 107 elementary schools, attended by 4846 scholars; nine boys' primary schools of superior class, attended by 673 scholars; eight dissentient schools, attended by 193 scholars; four colleges, attended by 615 scholars; nine convents, attended by 995 female scholars. The whole giving 139 institutions of all kinds, attended by 7,431 scholars. Of this number, the following classification may be made:—spelling and the alphabet, 2107 scholars; reading (read easily), 2253 scholars; reading (read very well), 3071 scholars; writing on paper, 2865 scholars; simple rules of arithmetic, 1568 scholars; composite rules, &c., of arithmetic, 1585 scholars; bookkeeping, orthography, 1701 scholars; geography, 1185 scholars; English grammar, 464 scholars; French grammar, 2038 scholars; analysis and parsing, 1464 scholars; the art of letter writing, 196 scholars; horticulture and agriculture, 107 scholars; mathematics, 36 scholars; surveying, 55 scholars; lineal drawing, 31 scholars; vocal music, 297 scholars; instrumental music, 115 scholars; history, 1419 scholars.

In addition to the branches above detailed, all the scholars who learn reading can also read latin and manuscript. In the convents, sewing is taught to the greater number of the scholars, embroidery to 118 scholars, and fancy needlework to 309 scholars.

In the institutions called superior schools under control, the use of the globes is taught to 48 scholars, ornamental drawing to 5, mental arithmetic to 96, natural history to 6, domestic economy to 12 and the art of teaching to 3. At the model school of St. Jérôme the military art is taught to a class of 48 scholars. Twenty-three male and 100 females teachers possess diplomas; there are only two teachers, one male the other female, as yet without diplomas, and at the next meeting of the Board of Examiners they are coming forward for examination.

Nine male teachers receive salaries from \$100 to \$200 per annum; 10 from \$200 to \$400, and five over \$400.

The different special reports that I had the honor to submit during the year, render it unnecessary that I should here enter into the details of difficulties happily settled through your intervention. I am happy, however, to be in a position to state that the measures adopted in every case by the Chief Superintendent of Education, as well as the support afforded me, have strengthened my position as inspector in the opinion of the public, and such a proceeding is necessary to enable a school inspector to perform, with any success, the arduous duties devolving upon him.

If we take into consideration the paucity of our pecuniary means which diminish as the number of municipalites increases, and if we also consider the composition of the different boards of school commissioners, many of them being new, without much enlightenment, I think the schools in my district have progressed as well as could be expected.

I may state also, and it affords me pleasure to be able to do so, that an improvement has taken place in the appreciation of the ability of a teacher. Now, contrary to former

practice, the ability of a teacher is looked to more than the terms he asks for his services. Experience has opened everybody's eyes, and it is now understood that with the cheapest remuneration you seldom obtain the best talent.

It would be desirable that any young persons who intend to adopt teaching as a profession should follow the course in "the Art of Teaching" at the Jacques Cartier Normal School. Art always assists even the best talent, and renders the latter more useful and fruitful in good effects.

I find that as a general rule, the female teachers who have obtained diplomas, neglect their studies, and instead of acquiring fresh knowledge, they imperceptibly forget a portion of what they had already acquired. The male teachers are, as a general rule more careful, and add to their store of knowledge by serious and attentive studies. I have already suggested, and I repeat that if a prize were offered each year for the best school in the district of inspection, there would be a very great incentive to exertion.

Reading is generally well taught, but the art of penmanship is very much neglected. I have used every exertion to obtain improvement in this branch but without the success that I expected.

I should like to see a system of taxation generally adopted which would be more popular than the present system. There is a plan adopted at St. Vincent de Paul which has been very well received; it is as follows:

The secretary-treasurer prepares a list for each school district, which he hands to the school commissioners; the latter divide the different school districts among themselves, and collect the tax in person at the domiciles of the rate-payers. After due consideration they pay the amount of debt incurred. By this system, there is greater responsibility; those who are negligent and in arrears can find no pretext for further delay, and both doubt and difficulty disappear. At the end of each quarter or at the end of the year, the secretary-treasurer prepares a receipt-book in the following form:

Table of sums collected by A. B., School Commissioner, in District No. —, for the year beginning — (here follows the expenditure in detail.)

| Name of Rate-payer. | By received for taxes. | By received for monthly liability. | By received for arrears. | Total received. | Balance due. |
|---------------------|------------------------|------------------------------------|--------------------------|-----------------|--------------|
|                     |                        |                                    |                          |                 |              |

This system forces the commissioners to take a more active part in the management of the schools. It has also the advantage of placing the state of affairs more generally before the eyes of the rate-payers, and thus it is with the greater amount of satisfaction, that each pays his share to the commissioner of his own choice.

All the model schools in my district are managed by able and experienced teachers. I think the establishment of model schools in all our parishes a great improvement in our school system. It would in my opinion be much better to diminish the number of elementary and increase that of model schools. Nothing could possibly conduce more to the cultivation of a taste for good sound education.

I need add nothing in praise of our convents. These institutions recommend themselves; they constitute the ornament, the glory and the moral force of our country.

*St. Vincent de Paul*—Without entering into the details of each school municipality, I may remark, that in this parish, all the schools are making satisfactory progress. The teachers are paid according to their measure of ability, and financial affairs are in a sound state. Two teachers from the Jacques Cartier Normal School are employed. In addition to the Laval College and the convent managed by the Nuns of La Providence, there is the reformatory prison for Lower Canada, managed by F. X. Prieur, Esquire, whose indefatigable zeal and ability in the performance of his duty command general admiration and esteem. As 77 young delinquents receive an education in this establishment from its chaplains, I thought it proper to mention the fact in that portion of the table allotted to independent schools.

*St. Martin.*—This parish is more careful than in previous years in the selection of male and female teachers.

*St. Rose.*—There is an improvement in the schools of this parish. The school kept by Miss Locas deserves special mention. I fear that the delicate state of her health may soon deprive the parish of her services.

*St. François de Salles.*—This parish, although limited in extent, keeps up its four schools.

*Terrebonne.*—I found evident progress in three elementary schools in this parish. Miss C. Robin's school amply meets the requirements of the district in which it is situated.

*St. Anne.*—The schools of this parish have improved during the past year. Miss Morelle is a deserving teacher.

*St. Thérèse.*—This parish has seven schools including one dissentient school.

*St. Janvier.*—The school of the village, kept by Mr Godard, who holds a model school diploma, is well kept and gives satisfactory results. The remuneration given to the female teachers of this parish is so small, that it is impossible to obtain the services of persons sufficiently competent.

*St. Jérôme.*—This village has but lately received the addition of a splendid convent, built of stone, two stories high, 60 feet in length by 40 feet in height, with a basement. The management has been confided to the Nuns of "*La Congregation de St. Anne.*" Although this institution was only opened on the 24th day of September last, already 110 scholars attend it, and the same course of instruction has been adopted as that of other convents.

Mr. Hétier manages the model school, and in addition to his duties, he has undertaken to teach drill to 48 young men, whom he has formed into a military company. It would be desirable that his example should be followed by others of the same profession. No better system could be adopted to produce good order and learning among young men intrusted to the care of a teacher. Mr. Hétier in his experience has been quite successful in this branch.

The parishes of St. Sauveur, St. Adèle, St. Agathe-des-Monts, as well as the townships of Abercrombie and Morin, have been lately divided into school municipalities. Nevertheless, in spite of the pecuniary embarrassments due to the poverty of the taxpayers, the commissioners do everything in their power, and succeed in establishing schools in accordance with the terms of the law. Their noble exertions have been successful, because in the parish of St. Sauveur, two schools have been in operation since last summer, in addition to one already established. In St. Agathe, two schools have been in operation from the same date. I asked the commissioners of the parish of St. Adèle to co-operate with me in the establishment of new schools in their parish, but they requested a delay of one year on account of the insufficiency of last year's crops.

The parish of St. Sophie or New Glasgow is in an exceptional position, because the population is mixed, and each sect demands a teacher whose views may agree with theirs. With the antipathy existing among nationalities, and the small salary that can be afforded by the poor colonists, it is not surprising that so many schools have, during the past few years remained unoccupied.

The school of the village of St. Agathe has changed management. Miss Valiquet, the former teacher, has been replaced by Miss Moncau who keeps it in a prosperous condition. Miss Hétier still continues to teach in the school of "*Nord de L'Île.*"

The school commissioners of the parish of St. Colomban can scarcely keep up their three schools owing to the pecuniary trouble suffered by the majority of the rate-payers. In St. Canut, it will always be difficult to obtain good schools because the soil is very poor and the population is scattered. The central school of the parish has remained unoccupied for some time, and is now in the same condition. I certainly must praise the school commissioners of St. Scholastique as well as those who have exerted themselves in the execution of the law. It is due to them to say that their exertions have been the means of securing the best measure of progress.

In the parish of St. Hermas, the changes in the *personnel* of the teachers have operated

as a moderation in their progress. If the teachers should only follow the instructions which I gave them, they will again be placed on a good footing. The same causes have also operated with regard to the schools of Ste. Placide.

I recommended to the commissioners of the parish of St. Benoit several changes or improvements that certainly would result favorably. Several of the female teachers of this parish certainly deserve great praise for their good conduct and success.

The schools of the parish of St. Eustache are in a good condition; some of them have distinguished themselves in a remarkable manner. There must be a change this year in a teacher, in order that greater and better results may be obtained. The year, however, has been quite satisfactory. In my last report, I mentioned that there were too many schools that operated as a bar to progress in the parish of St. Augustin. In my visit of the 26th October last, the commissioners acknowledged the correctness of my remarks. They, by resolution, abolished the school *Petit St. Charles*, by annexing *La Côte du Grand St. Charles* to St. Eustache. In order to obtain these improvements, the two municipalities must of necessity arrive at an understanding. There will be a conference in a short time on the subject.

The schools of the parish of St. Joseph are generally satisfactory.

The want of pecuniary means and the isolation in which the parish of Ste. Angélique des Mille-Iles is placed, frequently cause difficulties in keeping the schools, and the holidays are of a length prejudicial to the cause of progress. I take this opportunity of bearing testimony to the assiduity with which the school commissioners fulfil their duty.

The two schools in the township of Morin are in operation and work well.

I cannot conclude this report without thanking the gentleman of the clergy and the principal citizens of the parishes that I have visited, for their very great kindness. Everywhere, I must say, I was cordially received.

## REPORT OF MR HUBBARD.

SIR,—I have the honor to submit my report for the year 1864:—

There has been no special change in the number or position of the municipalities and schools in my district during the year, as, in fact, the number of new municipalities and districts organized last year was such as to render many alterations unnecessary for the present. Nearly all the municipalities have sustained their schools successfully, and no serious difficulties have arisen. The general progress of the schools has been good, and in some localities there has been decided improvement in the condition of affairs. I will, as usual, give you a brief account of each municipality in order, classing them in connection with the several counties to which they belong.

### COUNTY OF STANSTEAD.

1. *Stanstead*.—This municipality has resumed its 32 districts, the commissioners having found it necessary to re-open two which had been suspended. All have had schools for at least part of the year; Nos. 23 and 28 had no school in winter, and No. 24 in summer, owing to the small number of children who were able to attend. No. 25, also, was not opened till summer, its schoolhouse not being completed till spring. All the others were in operation through the year. The aggregate attendance was 1032. No. 16 had the largest (96), and No. 9 the smallest aggregate attendance (about 15). Nos. 1 and 5 had each over 50, and No. 17, 23, 24 and 32, less than 20. Nos. 13 and 25 have excellent new schoolhouses, costing about \$500 each. A contract was let for building a new schoolhouse in No. 2, but owing to remissness on the part of the contractor, it has not yet been erected. The other schoolhouses are in pretty good condition. Thirteen of the schools had male teachers in winter, the others and all the summer schools were taught by females. I visited most of the schools both in winter and in summer. A few of the teachers had not obtained their diplomas at the time of my visits, though nearly all of them did so afterward. The schools were generally well conducted, and the progress has been pretty good. The financial affairs of the municipality have improved; the assessments which had

been in arrears, have all been collected, and the assessment levied for this year is double that of last year. As a draw-back upon this, however, I must state that the collections (perhaps necessarily) have still been made in United States money—all business, in fact, being done on that basis. The commissioners have increased the teachers' wages, though I think not enough to balance the depreciation of the currency. This depreciation is really a very serious difficulty in this, as also in all the border townships, as United States money is necessarily the principal *circulating medium*, and it is, perhaps impossible to keep clear of it.

*Stanstead Academy* has continued under the management of Mr. and Mrs. Lea, with good success; aggregate attendance, 180. *Georgeville Academy*, with which the school of district No. 1 is still united, was taught, part of the year, by Mr. W. B. Ives, and the remainder by a female teacher; attendance, 52. *Casville Academy* was taught two terms by Mr. Locke with good success; attendance 67. An independent (elementary) school was also kept in district No. 16, by a good teacher, with 25 pupils, making in all 36 schools within the municipality, with an aggregate attendance of 1304 pupils.

2. *Barnston*.—Has now 20 districts, having lost one of its largest by the separation of Coaticook, districts 3, 10 and 12 have built good new schoolhouses this year, all on an approved plan. The one in No. 10 is an excellent house. All the schoolhouses are now in good condition. The three districts above-mentioned had schools only in summer, as their houses were not completed so as to have winter schools; the other districts had schools through the year; aggregate attendance, 520. None of the schools have an aggregate of over 40 pupils; three had less than 20. Two male teachers were employed (in Nos. 4 and 19) in winter; the others were females, as also, all the summer teachers. I have nothing special to remark respecting any of the schools; the management and progress were generally pretty good. On the whole, I think that the pupils in the schools this year have been of a younger and less advanced class than those of former years.

There has been a good degree of improvement this year, in the management and condition of affairs in this municipality. The assessment has been materially increased, so as to meet the expenses of the schools, and a more regular system adopted in regard to the engagement of teachers, which has hitherto been quite loose, so much so that difficulties had arisen in some cases. I have urged some further changes which I hope will gradually be made. The accounts, &c., seemed to be in good order; collections and payments a little slow; the business is, however, done in *current money*.

*Barnston Academy*, still taught by Mr. Shangs, has been well sustained. As the teacher was away at the time of my last visit, I am unable to state the attendance; it has doubtless been reported to you. I visited the schools of this municipality in winter, and most of them again in summer.

3. *Coaticook*.—This new municipality which was organized last year, has sustained two very good schools with an aggregate of 140 pupils; one of them had an aggregate of 107—the largest in my district. The attendance was, however, quite variable. In the largest school an assistant was employed most of the year. The schools were well conducted.

There are, as yet, no schoolhouses belonging to the commissioners, but tolerably good houses are secured for the present until new ones are built. The commissioners intended this year to build an academy, but finding that the cost would exceed what they were by law authorized to raise, they made an arrangement with the municipal council to build it as a *Town Hall*. As this will require a large assessment, the commissioners will defer building schoolhouses for a year or two. The financial affairs of the commissioners are in good condition, and are well cared for.

*Coaticook Academy* has not been in operation during the year; the commissioners, to whom the institution is now intrusted, having been unable to find a suitable teacher in time, and being destitute also of a suitable building for the school. A teacher was engaged for a short time *on trial*, but he did not give satisfaction; and it was thought better to allow the school to remain closed for the year, until an academy should be erected. The commissioners hope to get the school re-opened the coming year.

4. *Barford*.—The six districts have all had schools through the year, with an aggregate of 165 pupils. All the schoolhouses are good, and, as heretofore, are kept well and

supplied with dry firewood. Two male teachers were employed in winter, the others were females. One of the male teachers failed to obtain a diploma according to agreement. I think that the commissioners will be more cautious in future about employing teachers who have not diplomas at the time. Nos. 4 and 6 had the same teachers through the year; the other districts changed teachers. There has been considerable difficulty growing out of the depreciation of U. S. money; the affairs are, however, in pretty good condition. The secretary-treasurer is, I think, faithful and earnest in his duties. The progress of the schools was pretty good. I visited both in winter and summer.

5. *Hatley*.—Has still 15 districts, including the dissentients. Thirteen of the districts under the commissioners and the dissentient have had schools. No. 7 only in winter, and No. 13 only in summer; aggregate attendance, 461. Six districts, Nos. 2, 4, 5, 6, 8 and 11, had an aggregate of over 40 each; one, No. 13, had less than 20. No. 5 had a male teacher in winter, all the others were females. Nos. 3, 4, 8 and the dissentient school, had the same teachers through the year; Nos. 4, 7, 8 and the dissentient school having the same teachers as last year, and No. 2, 5 and 9, for part of the year. I may mention Nos. 4, 7 and 8 as making the most marked progress, especially the latter; the others did well. I visited most of the schools both in winter and summer. All the teachers, I think, have diplomas, except the teacher of the dissentient school, who has, I suppose, since obtained one. The schoolhouses remain the same as last year. I hope something will soon be done about a new house in No. 12, which had a school this year, the old house being unfit for use.

The affairs of the commissioners are well managed and in good condition. The "States money" depreciation is quite a trouble here. A difficulty has arisen between the commissioners and the municipal council, the latter attempting to control the commissioners in the amount of their assessment, and refusing to collect. The commissioners will probably collect their own rates. They continue the same amount as last year, which, with the scholar fees, make their funds sufficient, but not too large. The changes made last year have had good effect on the *status* of the schools.

The dissentients have sustained their school tolerably well; but the trustees have experienced difficulty in collecting scholar fees, on account of deficiency in their *records*, which I have, I think, put in a way to be remedied and avoided in future. A second dissentient school may have to be opened next year.

*Charleston Academy* was without a teacher part of the year. Mr. Ball was engaged in summer, and is, I think, to continue the coming year. When I visited the school, there was about 35 students in attendance, and the school seemed to be doing well.

6. *Magog*.—One district has been added, making nine, and all have had schools, although nearly all were much interrupted by epidemic sickness among the children. When I visited in winter, four were closed from that cause; aggregate attendance, 236. All the schools except No. 3 were quite small. Nos. 1, 2 and 3 had male teachers in winter; all the teachers have diplomas. The progress of the school was much retarded by the absence of the children, from sickness and other causes. Some difficulty arose in No. 3, in winter, from insubordination on the part of older pupils, some of whom had to be expelled from the school. No. 9, the new district, has no house yet; all the others have good houses. No. 3 occupying the model school house. The *model school* was taught part of the year by Mr. H. M. Hovey, with fair success. (As the school of No. 3 is partly connected with the model school, the attendance of the latter is included in the aggregate given above.)

The improvements introduced last year by the commissioners in the management of their affairs have been continued, and the finances are, consequently, in a much better state than formerly. There are more schools than can well be sustained; but it is difficult, as the township is situated, to have less. An effort may be made to unite some of the older districts.

In the six municipalities in this county, there are now 84 districts, 83 of which have had schools this year, with an aggregate of 2554 pupils. Two schools (one in Barford and one in Hatley) are French the rest are English. The studies pursued and the general management of the schools continue much the same as in previous years. I have no special complaints to make relative to any of these municipalities. The prevalent system of frequently changing teachers, continues to be a source of evil, but it is a matter which I

think cannot be remedied by imperative interference. I shall do all in my power, by urging its importance upon commissioners and others, to encourage longer engagements, and I hope that there has already been some improvement in this respect. This evil is not, by any means, confined to the county.

## COUNTY OF COMPTON.

7. *Compton*.—Has now 23 districts, 22 of which have had schools (one of these for only part of the year). The aggregate attendance has been 670. No. 16 had no school during the year, having still no schoolhouse, and there being but few scholars. (I think, however, that something should be done in this district.) Six male teachers were employed in winter, all the others were females. Only one district had the same teacher through the year, though several had the same for part of the year as for the former year. This, I may remark, was in some instances, perhaps in all, owing, as is frequently the case, to circumstances beyond the control of the commissioners, who are, I think, inclined to avoid this evil. The attendance at the schools was generally pretty good; No. 5 had the largest and No. 10 the smallest aggregate attendance. The progress was generally good. I may speak of special improvement in writing, in No. 5 in winter and in No. 3 in summer, under the same teacher, Miss Care; specimens of writing—about 70 copy books—sent from the former school to the semi-annual meeting of the District Teachers' Association, were much admired.

The schoolhouse in district No. 1 has been well repaired; new houses have been built in Nos. 6, 12, 19 and 23; and the houses generally are now in good condition. Affairs are still well managed as to funds, and payments are prompt.

*Compton Academy* was taught by Mr. W. Mayo, with good success. I am not positive as to the aggregate attendance, but think it was about 50. I visited this municipality both in winter and summer.

8. *Clifton*.—This municipality has the same number of districts and schools as heretofore—five, though, owing to sickness, difficulty in procuring teachers, &c., the schools have been considerably interrupted. I was unable to visit in winter; in summer I found schools keeping in Nos. 1 and 2; the other districts had had schools in winter, but had not been re-opened for want of teachers. No. 4, in fact, should not be re-opened till a new house is built. One is now building. The aggregate attendance was about 120. All the teachers were females. There has been no special change in the affairs of this municipality, except that a new house has been built in No. 5.

9. *Hereford*.—Has now seven districts, and all have had schools a portion of the year—the French settlement of which I spoke last year having had a school. From causes of which I have spoken heretofore, the schools generally were not kept the full time. I found five in operation in summer. The aggregate attendance was 150. All the teachers were females, with diplomas. The schoolhouses are the same as last year. No special trouble has arisen, and affairs are in pretty good condition, and are, I think, well managed.

10. *Eaton*.—All the 15 districts have sustained schools, except Nos. 2, 12 and 13,—the first had a private school part of the year—these three districts not being in a condition to have schools, most of the scholars of the two latter, by an arrangement with the commissioners of Newport, are attending schools in that municipality; the schoolhouse (a new one) of one district of Newport being only a few rods from the old house of No. 12. A portion also of the scholars of No. 13 attend a new school in Bury, this district as well as No. 2 being much scattered. The aggregate attendance was 445; the schools generally were well attended, and the general progress would compare well with other sections. No. 4 had a male teacher in winter, all the others were females; several schools having different teachers in summer from those in winter. Nos. 5 and 14 have built a good new schoolhouses; the others are in tolerable condition. The affairs of the commissioners are in good condition.

*Cookshire Academy* was taught one term by Mr. Fessenden; as he was unable to continue the school, a Mr. Cameron was employed for the remainder of the year, with good success, and has been engaged for the coming year. I am not now able to state with

certainly, the aggregate attendance; when I visited the school, it was well attended. An academy building is in process of erection at Eaton Corner, (District No. 4,) and it is intended to sustain a high school (as has hitherto been done) for at least part of the year, as an independent school. I visited both in winter and in summer.

11. *Newport, Auckland, &c.*—Schools have been kept this year in all the five districts; in No. 1 only in summer, Nos. 1 and 2 being partly sustained, as before intimated, by Eaton scholars. Aggregate attendance 115. No. 4 had the same male teacher in winter as last year, the others were females; the schools were generally well conducted. No. 3 had a very small attendance in summer, owing in part to dissatisfaction in the district, relative to the employment of the teacher, she was, however, sufficiently competent, and there was no valid objection to her. An independent school was kept in summer, in part of Nos. 3 and 4, with about 30 pupils. Nos 1 and 2 have good, new schoolhouses, the others are in good condition, and the finances are in a pretty good state. To avoid mismanagement and dissatisfaction relative to the engagement of teachers, I have advised that all engagements should be agreed upon at a meeting of the commissioners, instead of being made by individual commissioners, as heretofore.

12. *Westbury.*—The 4 districts have sustained schools, with about the usual attendance and success; aggregate about 100. The school have, I think, been pretty well taught, but the pupils, generally, are still backward. One of the districts, No. 4, I was unable to visit. The Secretary-Treasurer was from home at the time of my visit, so that I cannot speak positively as to the state of affairs, but think that they are in a fair condition. I cannot learn that the dissentients have done anything this year, in fact they are so few in number and so scattered, that they can do but little.

13. *Bury* continues prosperous as to its school affairs. The 7 districts, formerly reported, have all had schools, with fair attendance and progress. A new district has been organized, necessarily somewhat informally, in the south-west corner of the township, composed of children in Bury, Eaton, Newport, and Westbury, so situated that they could attend school no where else, and as the majority of the children (as well as the school-house) are in Bury, the district should be reckoned with Bury. This district has built a schoolhouse, and had school in summer. The aggregate attendance at all the schools was about 280. No. 1, which is still united with the model school, was taught part of the year by Mr. Cawling; after the termination of his engagement, as his management was not very satisfactory, a female teacher, Miss Rugg, was employed at a good salary, and, thus far, with good success. The other schools were also taught by female teachers, who generally did well. The school-houses are shut, as last year, that in No. 5, was to be repaired. Affairs seem to be very well managed, and collections and payments prompt. I was able to visit here only in summer.

14. *Lingwick.*—This municipality has gone on without special change, the four districts keeping up tolerable schools, with about the usual attendance, aggregate, 128. The teachers were females, those in winter being the same as the previous season, in summer some new teachers were necessarily employed. The progress of the scholars has been about as heretofore, and the schoolhouses are now comfortable. Want of proper interest is still a great drawback upon the success of the schools here. The finances, &c., are well managed, and accounts well kept. The commissioners are not a little embarrassed, just now, by the refusal of the British American Land Company to pay their portion of the assessment, owing to a difficulty between the latter and the municipal council, and as the matter is in the hands of the council, the commissioners cannot at once enforce collection. I hope, however, that the difficulty will be got over.

15. *South Winslow.*—The hope which I expressed, in my last report, relative to this municipality has, to a good extent, been realized. Old difficulties have been somewhat overcome, and although others have arisen, still matters are, on the whole, in a much more hopeful state. Some four schools have been kept, though with considerable interruption, and some progress has, I trust, been made. The aggregate attendance has, I think, been about 96. The school at the "Dépôt," so called, has been the most successful, having been kept a longer time than the others. Owing to the great difficulty in obtaining properly qualified teachers, one or two were employed a short time with diplomas; but

none such, I think, are now employed. The French settlement, of which I have spoken in previous reports, has not, as yet, established a regular dissentient school, but they have built a schoolhouse, and are, I think, going on under the commissioners. Collections are improving, and altogether affairs seem quite hopeful. There has been but little improvement as to the schoolhouses. I was sorry that none of the schools happened to be keeping just at the time of my visit, which was in June.

16. *North Winslow*.—Has continued its four schools with pretty good success; attendance, 129. The same teachers have been retained, and have given pretty good satisfaction, and there has been fair progress. All the districts have now tolerably fair schoolhouses. I found the arrears of assessment (of which I complained last year), pretty well collected, though something was still due; the teachers' salaries were not very much behind. Considering the poverty of the people, this municipality has, I think, so far done well. I visited it in June.

17. *Whitton, Hampden and Marston*.—This large and sparsely settled municipality has progressed but slowly, though something by way of collecting assessments and sustaining schools, two having been kept part of the year, attendance about 57. (I was unable to visit the schools, but saw the chairman of the commissioners.) The two teachers last employed hold diplomas. Perhaps no portion of my district is more unfavorably situated in regard to opportunity for procuring teachers and sustaining schools. I hope to visit the schools there early in winter.

18. *Sherbrooke*.—I am happy to state that the increased interest and efficiency on the part of the commissioners, to which I alluded last year, has been continued, and the five schools have been well sustained; aggregate attendance, 290. The teachers of the previous year have all been retained, except that the one employed in No. 2 was obliged, on account of other engagements, to give up his school at the close of the first term, and another was employed, who has fully made good the place of the former, the school having very much improved since she took charge of it, both in attendance and the progress of the children. No. 4, still efficiently taught by Mr. Casault, had an aggregate of 100 pupils, and No. 2, of 70 pupils; in both these schools, assistant teachers have been employed. Nos. 3 and 5, the former a French boys' school, and the latter, a girls' school, still taught at the Nunnery, were well attended. No. 1 was not as well attended. All the teachers have been re-engaged for the ensuing year, and the schools have reopened with an increased attendance, the commissioners having abolished the scholar-fee, and offered prizes to encourage attendance. The abolition of the scholar-fee in this instance is, I think, judicious, though of course, not strictly legal. The schoolhouses have been considerably improved, and still further improvements are in progress. The assessment has been increased, and the finances are now in good condition. The commissioners attend faithfully to the visiting and vigilant oversight of the schools; the chairman, Hon. J. S. Sanborn, and L. J. Boivin, Esq., the visiting committee, visited each school twice each term. This, I hardly need say, has an excellent effect on the character of the schools. The principal obstacle to the progress of the schools has been, the irregular attendance of the children, and the commissioners are doing what they can to remedy this evil.

The academy has been in operation, though the male department was interrupted part of the year for want of a teacher, Mr. Marsh not finding the encouragement sufficient to induce him to remain. Miss Robertson has kept up the female department with her usual efficiency and success. The male department is now re-opened under charge of Mr. O'Regan. The *French College* was conducted by Mr. O'Regan, with good success. The *Nunnery* has also been well sustained. The *Colonial School* has had a good attendance, and has been satisfactorily conducted by Miss Green and an assistant. Several independent schools have also been kept up. The attendance at all the schools I have estimated at 749.

19. *Ascot*.—All the 17 districts have had schools (Nos. 1 and 12 only in summer) with an attendance of 500 pupils, and rather better progress generally has been made than last year, though several schools are yet quite backward. Four schools, Nos. 2, 3, 4 and 8 in winter had male teachers; the others were females. In No. 13, I think, the best progress was made, and in Nos. 6 and 14, the least. A male teacher employed in No. 8 in winter had no diploma. Nos. 10 and 18 have good new houses; the others are generally in pretty fair condition, as are also the financial affairs of the corporation.

*Bishop's College and Grammar School* continues to flourish; having had an aggregate attendance of about 175.

20. *Orford* has gone on about as heretofore, rather feebly sustaining four schools, two of them only one term—aggregate attendance 103. No. 1 had a tolerably good school in winter in the same old house. No. 2 had a school in summer, also in the old house, a new one is, however, building, which is much needed, as is also a new house in No. 1. Nos. 4 and 5 (French schools) were both continued the eight months, the former, when I visited it in winter, was very poorly attended, owing, I was told, to the poverty of the parents, not being able to clothe their children suitably to attend school in the cold weather. No. 5 was better sustained and the pupils seemed to be doing well; the schoolhouse has been improved. There has been no special change in the management of affairs.

In the 14 municipalities in this county (including the Electoral Division of Sherbrooke), I have reported 108 districts; 104 schools operating under control of commissioners, with an aggregate attendance of 3,168 pupils; four independant schools, with 75 pupils; in all, 108 elementary schools, with 3,243 pupils; two model schools, three academies, one nunnery, one commercial college and one university; making altogether, 116 educational institutions of all kinds, with 3,942 pupils, which shows considerable increase over last year. Ninety-five of the elementary schools are English, 13 French. Fourteen new schoolhouses have been erected during the year, several of them quite good.

#### COUNTY OF RICHMOND.

21. *Shipton*.—In this municipality 19 districts have had schools under control of the commissioners, and one under the dissentient trustees, with an aggregate of 640 pupils; a new district having opened a school in summer. Several of the schools were somewhat interrupted by sickness, but on the whole, they have been well attended, and generally pretty well taught. One male teacher was employed through the year. Eight districts, Nos. 3, 5, 7, 10, 11, 13, 15, and the dissentient school retained their teachers through the year; three of them, the same as last year, and Nos. 1, 6, 8, 14 and 16 had a former teacher for part of the year. The dissentient school, though controlled by the trustees, is supported the same as the other schools, the funds not being separated.

The assessment is large, and the funds consequently ample, and the accounts are still well kept. No. 19 has built a schoolhouse, and I hope that one will soon be built in No. 5. The other schoolhouses, except No. 15, are in good condition. No. 12 is in need of repairs.

*Danville Academy* was taught, for part of the year, by the former teacher, Mr. Pearl, but as he decided to leave, Mr. Perlay was engaged to supply his place, and the schools has gone on well. It was a matter of regret that Mr. Pearl did not remain, but I hope that the present teacher will do well. The school has had an aggregate of 102.

22. *Cleveland*.—Ten districts under the commissioners, and one under the trustees; have had schools through the year (except No. 4, which was suspended in winter for want of a suitable house), with an aggregate of 375 pupils. Five districts, Nos. 3, 6, 7, 9 and the dissentient school, retained their teachers through the year (females); those in Nos. 6 and 9 were the same as last year. Nos. 2 and 5 had male teachers in winter. With the exception of No. 8, the schools were generally well attended. No. 1 was rather unsuccessful in summer, and the teacher was dismissed, it was well taught in winter. No. 6 made, I think, the best progress. No. 7 also made a good improvement; the others generally did well. No. 11, the new district formed last year, has not yet opened a school. A new house is building in No. 4; the other houses are in good condition, as also, are the financial affairs of the commissioners, and the accounts are well kept. The dissentients are getting matters into a better way in regard to funds.

*St. Francis College* has been well sustained, with an aggregate of 120 students.

23. *Melbourne and Brompton Gore*.—Fourteen districts have had schools, four of these, however, only part of the year, with an aggregate attendance of 335. No. 1, which had been closed for some time, was kept one term in summer. Nos. 3 and 4 were closed in winter, the former on account of the condition of the schoolhouse, and the latter for want of a teacher, the one employed being taken sick. No. 15 was closed through the

year, and No. 18, most of the year, for want of suitable teachers. Four districts, Nos. 6, 7, 8 and 17, retained the same teachers through the year; all the teachers were females. The attendance at the schools generally was not large. I have nothing special to remark respecting any of them. No. 17 which had lost its schoolhouse last year, has re-built a pretty good house; the others remain as last year. The affairs of the commissioners are now in pretty good condition, and there are but few arrears. The *girls' school* has been quite well sustained; attendance 51.

24. *Village of Melbourne*.—Since the appointment of the new commissioners last year, former difficulties have been somewhat overcome, and a school has been organized and tolerably well sustained through the year, with 34 pupils who have made some progress. The school has been kept in a *rented room* which is hardly suitable, and a schoolhouse should be built as soon as it can well be done. Something has been done by way of collecting assessments, and I trust that matters will prosper better than heretofore.

25. *Brompton* has gone on without much change, the five districts keeping up their schools with pretty good success; attendance 166, considerably larger than last year. There has been but little change of teachers, and fair progress has been made. The affairs are pretty well managed, and no difficulties have arisen. A movement has been made at Brompton Mills, to establish a dissentient (Catholic) school, but it has not, as yet, been arranged. An independent school was kept, I think, part of the year.

26. *Windsor*.—Has kept up its five schools, as last year (No. 5 only in summer, there being but few scholars) with 122 pupils. Male teachers were employed both terms in No. 1, and in winter in Nos. 2 and 4; the former having the same teacher in winter and the latter in summer as last year. No. 2 had the most advanced pupils, especially in winter; in No. 1 also, good progress has been made; in the others, fair. A difficulty respecting a site, has delayed the building of a schoolhouse in No. 3, which is much needed. I have endeavored to settle the difficulty, and trust that a house will soon be built. The funds are pretty well managed.

27. *St. George de Windsor*.—This municipality has had six districts, five of which have had schools this year; attendance, 161. There has been no change of teachers, and the schools have been satisfactory. I was unable to visit the municipality till most of the schools were closed. The school-houses have been repaired, the teachers are mostly paid, and affairs are in a more hopeful state than last year. No. 6 will probably have a school the coming year.

28. *Stoke*.—This municipality had had two schools, one with 15 pupils through the year; the other with 10 pupils, only in summer. In the former, fair progress was made, the other was newly opened when I visited it. But little had been done to the school-houses, owing to the refusal of the British American Land Company (which own a large portion of the township,) to pay the assessment, which amounted, for the two years, to about \$600. A suit was brought by the commissioners, before the Circuit Court, for the collection of the amount, and after considerable delay, judgment was obtained in May last, and the amount has since been paid. This will enable the commissioners to finish the present schoolhouses and build another. The proceedings of the commissioners have, I think, been correct, and I trust that affairs will be well managed. The municipality is still very sparsely settled.

In the eight municipalities in this county, I now report 68 school districts, 63 elementary schools operating under commissioners and trustees (two under the latter,) with an aggregate of 1858 pupils; also, one female seminary, one academy and one college; total, 66 schools, 2131 pupils; eight schools are French, the others English. I think that no teacher without a diploma has been employed in the county, and there is less changing of teachers than in Stanstead and Compton counties.

#### COUNTY OF WOLFE.

29. *Dudswell*.—The eight districts, as last year, have had schools, in one or two instances, for only part of the year, attendance, about 200. Nos. 2 and 5 have been much the best sustained, the others being small. No. 2, still united with the academy, was taught in winter, by Mr. Gilman, a former teacher, with good success; in summer, by Miss Ives,

who taught the previous summer. No. 5, still assisted by the Colonial Church and School Society, was taught in winter by the former teacher, Mr. Cork, and in summer, by Miss Hall a former teacher, (with a Normal School diploma), who is to continue the coming year. The school has done pretty well. In one or two instances, in the other districts, teachers without diplomas were employed. I found one such in winter, and remonstrated with the commissioners in writing against allowing such engagements; I found another, however, in summer without diploma. The fault of the commissioners in this matter is in *permitting* the districts to engage such teachers as the people choose, regardless of the legal qualification, and I trust that you will insist on its discontinuance. One of these teachers—a *female*—had the effrontery to tell me, when I politely insisted that *all* teachers should hold diplomas, that she thought “getting diplomas all a *humbug* and *speculation*.”

30. *Wotton*.—This municipality has suffered this year in its schools in consequence of the removal of a large number of its inhabitants, and two schools which had heretofore been kept, have been closed; seven have, however, been kept up or were keeping in winter, nearly all with the same teachers as last year; attendance about 198. I was able to visit only part of the schools, having inadvertently arranged to visit the others on *Ash-Wednesday*, when they were closed, and I was unable to remain another day, or to return. No. 2, which I visited, was making good progress—the others, tolerable. The affairs are still well managed and in good condition.

31. *St. Camille*.—This municipality, like *Wotton*, has suffered from emigration, and one of its schools had to be closed, leaving four in operation with about 100 pupils. Two schoolhouses have been built this year. The schools are not yet much advanced, but some progress has been made. The affairs appear to be well managed. I was able to visit only in winter.

32. *Weedon*.—Four of the districts under the commissioners have had schools, with an aggregate of 86 pupils. No. 2 was well attended; No. 1 had a fair attendance; the other two were quite small. In these two the teachers, females, married while teaching, and took their husbands to live with them in the schoolhouses, which must have had an unfavorable influence on the success of their schools. Nos. 1 and 2 had the same teachers as last year. No. 5, a new district, has built a schoolhouse. The accounts, &c., are in good condition.

The dissentients were unfortunate this year, their schoolhouse having been burned. They have, however, rebuilt it, and will, I think, be able to go on. Their school had not been re-opened when I was there, but I think it has since; but as I am uncertain in regard to the attendance I have not reported it. The returns of the trustees will, I presume, inform you.

33. *St. Gabriel de Stratford*.—This municipality has sustained two schools this year, with an aggregate of 84 pupils. No. 2 was quite large, 58 pupils, and was, I think, very well taught,—several of the pupils learned both French and English (female teacher). The number of scholars was, in fact, too large for the schoolhouse. No. 1 had a male teacher and seemed to be making fair progress; this district has no schoolhouse. The commissioners were unfortunate in losing an amount of money sent by them by mail, to pay a former teacher; they are, however, getting matters into a better way in regard to their finances than last year, and I hope that they will now prosper.

34. *Garthby*.—The school opened last year has been continued. The female teacher who taught last year was retained for part of the year, but she was obliged, on account of ill-health, to give up the school, and a male teacher was employed—he had not obtained a diploma. The secretary-treasurer was away at the time of my visit, but from examination of the accounts, and what I could learn from the chairman, I think that affairs have not been as well managed as I had hoped last year; collections and returns seemed to be much behind, and accounts in rather a confused state. The semi-annual return, which should have been sent to you in December, had not then (June), so far as I could learn, been made. I gave such directions as I was able, and hope to find matters more satisfactory at my next visit.

35. *North Ham*.—Owing to remoteness and other causes, I have not been able to

visit this municipality since my last report, but intend to do so early in winter. I have learned, however, that three schools have been kept with an aggregate attendance of 88 pupils; that collections are pretty well made, and the teachers mostly paid. The commissioners will be able to collect more efficiently now that the municipality is separated from South Ham.

36. *South Ham*.—When I visited in winter, I found one school keeping, with 23 pupils. It was kept in a hired room, the teacher, female, had no diploma. The secretary-treasurer was absent. I have not been able to visit since, and cannot say whether any other school has been kept.

37. *Wolfestown*.—This municipality I have also been unable to visit since my last report, and intend doing so soon. I learn that but little has been done by the commissioners; one school has, I am told, been kept for part of the year, and arrangements have been made to open two more soon. I hope, in winter, to find the three in operation.

In the nine municipalities in this county there are now 48 school districts, about 31 school-houses; 29 schools operating under control of commissioners, with an aggregate attendance of 822 pupils, also, one academy, where attendance is reported, together with the elementary schools. Nineteen of the schools are French, the others, English. The decrease in attendance is attributable mainly to the removals already referred to.

#### MUNICIPALITIES IN "PART OF DRUMMOND AND ARTHABASKA."

38. *Durham*.—Since the separation of St. Pierre, this municipality has retained 13 districts; two of these will, hereafter, be united, and six others will be cut off by the recent separation of St. Fulgence. All the districts have had schools, three of them only part of the year; aggregate attendance, 394. The schools were much interrupted by epidemic sickness, and the progress of the scholars was, of course, retarded by the same cause. No. 3 is still in connection with the academy, taught this year by Mr. Lamy, the former teacher. No. 2 had a male teacher in winter; the others were females. No district retained its teacher through the year; though this, in some instance, was owing to sickness. No. 6, taught in winter by Miss Elliot, made very good progress. I have nothing special to remark respecting the others. No. 13 has built a schoolhouse, which was much needed; that in No. 7 has been repaired. The others are in pretty good condition. The affairs of the commissioners are still well managed.

39. *St. Pierre*.—My report upon this new municipality will refer only to the Protestant schools within the township of Durham, of which seven have been sustained this year (two of them only one term), with an aggregate of 238 pupils. The schools generally have been taught by good teachers, and have made satisfactory progress. No. 7, formerly No. 8 of Durham, was suspended in summer, as a new schoolhouse was building, which has long been needed; the winter school was kept in the old house. No. 12, formerly No. 10 of Durham, was closed in winter for want of scholars. All the teachers were females. No district had the same teacher through the year. The schoolhouses are in pretty good condition. The commissioners have levied a liberal assessment, which has been mostly collected. Affairs seem to be well started; the accounts are well kept.

40. *Kingsley*.—The nine Protestant schools have all been in operation, with an aggregate of 255 pupils. The teachers were all females. The schools were tolerably good; some were quite small. No. 8 I noticed as perhaps rather better than the others. No. 6 has pupils more advanced; was not keeping when I visited it. (The accounts, &c., are, by agreement, examined by Mr. Inspector Bourgeois.)

41. *Tingwick* (dissentients).—I am sorry again to report *no school* in this municipality. This, however, has been the result of circumstances rather than of any neglect. On the division of the township by Act of Parliament, early in the year, I advised the Protestants to unite with the Catholics, under the commissioners, which they did, but almost immediately difficulties arose, and they again dissented. These circumstances have somewhat delayed the action of the trustees, especially as I found the dissent a little informal. Considerable has, however, been done in collecting the old arrears, and paying the debts, which, I think, are nearly all paid, and I presume that schools will soon be opened, if they are not already. Suits have been brought by the trustees, and judgment obtained against some of the refractory parties referred to in my last report.

In these four municipalities there are now, under my supervision, 33 school districts; 29 schools have been in operation with 887 pupils, all English, and one academy.

GENERAL RECAPITULATION.

In reviewing my district inspection, I find at present 41 organized municipalities, 341 school districts, 301 schoolhouses. Three hundred and ten elementary schools have this year been in operation under commissioners and trustees (three only under the latter), with an aggregate attendance of 9,304 pupils.

There have been also in operation three model schools, one superior girls' school, 11 academics, three colleges, one nunnery and seven independent schools; making a total of 325 educational institutions of all kinds, with 10,747 pupils. It may be observed that the total aggregate attendance is less than the sum of those attending elementary and other schools; this is owing to the fact that some pupils are necessarily entered *twice*; and those I have, as far as possible, omitted in making up the total. I have not, this year, included the *independent schools* in the column of *elementary schools*, as I have heretofore done. It may be seen also, that there is a slight discrepancy between the figures given above and those entered in the *table* which I send, for the reason that I have included in the above, the estimates of two academies, not given in the *table*.

By comparing these figures with those of last year, I find that there has been a gain of eight school districts, 16 schoolhouses, 17 schools operating under control, and 889 pupils; nine schools of all kinds, and 600 pupils. As compared with the report for 1861, I find a gain in the three years, of 11 organized municipalities, 55 school districts, 44 schoolhouses, 43 schools operating under control, and in these, 1,161 pupils; in schools of all kinds, 41, and 954 pupils; on an average gain of about 19 per cent. The increase in attendance in the elementary schools under control has been about 16, and in all the schools, about 10 per cent. There is a falling off in the independent schools reported.

In the elementary schools under control, 53 male and 382 female teachers have been employed, all holding diplomas, except seven of the former and five of the latter, 12 in all. Two of these were legally exempt, most of the others were engaged on condition that they should obtain diplomas, but from some cause, failed to do so, and were kept only one term. There has been no general change in regard to the wages of teachers; in some cases, I am sorry to say, there has been a falling off in this respect.

Forty-five of the schools under control, with about 1,200 pupils, are French, though in five of these English is also taught; the remaining 265, with about 8,104 pupils, are English, though in a few French is also taught.

With the two exceptions already mentioned, I have visited each municipality in my district, and in most cases twice during the year. I have visited 121 schools twice, 149 once; and most of the others I have either actually visited when not in keeping or should have visited, had they been in operation when I was in their vicinity. I shall do all in my power to visit the coming, those which I have been obliged to omit this year, and also revisit all the others.

I have but few special complaints or suggestions to make at this time. I find reason for gratification in the general success which has attended the schools, although there is much yet in which there might, and should be, improvement. The changing of teachers is an evil which still too generally continues.

This is rendered less objectionable in many cases, from the fact that there is also much change in the pupils from winter to summer, the older ones attending more in winter, and the younger in summer. Hence, in some instances, where an efficient male teacher is required in winter, a female teacher is better, as well as less expensive in summer. You will see that in nearly all cases, the requirements respecting teachers' diplomas have been complied with, and I trust that you will insist that they should be in all. I may venture to suggest that it would, in my view, be more beneficial and generally satisfactory, to insist on a *renewal* of diplomas as fast as they expire. I am informed that commissioners do not, in all instances, give the *date* of their teachers' diplomas in making the semi-annual returns; I hope you will require this to be done.

The *District Teachers' Association* has held two successful and interesting meetings, one at Lennoxville in December, the other at Coaticook in July. Two prizes (\$25 and

\$10), offered by the Hon. A. T. Galt for the best Essays on Common Schools, to be presented at the coming winter meeting will, I doubt not, add interest to that meeting. Several teachers from this district were present at the formation of the Provincial Association; the first annual meeting of which is to be held in this district.

In conclusion, I have to request that if I have omitted giving any information which you wish, you will be pleased to inform me. Craving your indulgence for imperfections in this report.

I have the honor to remain,

Sir,

Your obedient servant,

H. HUBBARD,

*Inspector of Schools.*

## NO. 24.—EXTRACT FROM THE REPORT OF INSPECTOR CHARLES B. ROULEAU.

### CATHOLIC SCHOOLS OF THE COUNTIES OF OTTAWA AND PONTIAC.

Notwithstanding that, generally speaking, education has made evident progress within the past few years, in my district, there is still great room for improvement, not only as regards education, but also with reference to the discipline of the children and the material appliances of the schools.

Very little attention is paid to the disciplinary and religious education of the children. I have frequently been insulted on the road by children coming out of school. Clearly such conduct is only to be attributed to a want of education on the part of the teachers, for I have remarked that the parents of the children are generally speaking polite and hospitable.

As regards religious instruction, except in the schools in which all the children are Catholics, this important branch of education is entirely omitted. The teachers allege that they could not act otherwise without wounding the susceptibilities either of the Protestants or of the Catholics.

There are hardly ten or a dozen schools in which the history of Canada is taught. In all the others both teachers and pupils are alike ignorant of the most remarkable facts in our history.

In my first report I had the honor to suggest the establishment in the Education Office, of a library of school books for the use of the superior and common schools. I am so deeply persuaded of the benefits of such an establishment, that I cannot refrain from urging the realization of this idea. The Brothers of the Christian Doctrine have long followed this system, and they reap great benefit from it. It has also been established in Upper Canada with the greatest success.

Notwithstanding that I have often urged the municipalities to apply to the normal schools for teachers, when vacancies occur, my advice has hardly ever been adopted. Schools remain closed for whole months for want of teachers, and the municipal authorities never think of applying to those institutions, where they can be furnished with teachers so competent in every respect. The superiority of the pupils of the normal schools as teachers is, nevertheless, fully admitted here.

I am inclined to attribute this state of things to the apathy of the commissioners. I am quite prepared to admit that there are many parishes too poor to give such teachers adequate salaries, but I am persuaded, from my own knowledge of the facts, that two-thirds of the municipalities comprising my district would each be able to support a model school.

The great majority of the teachers in my district keep their journals on loose sheets, so that it takes me almost as long to examine the journals as to examine the children. To remedy this evil, it would be well if the Board of Education were authorised, as recommended by you in your report on the inspection of schools, to print journals for the use of schools, and oblige the commissioners to provide each school with one of them. At

the close of the school year the journal might be placed in the hands of the secretary-treasurer, and if one of the schools should happen to be vacant at the period of the inspector's visit, he would at least have the satisfaction of estimating, by means of the teacher's journal, the progress of the pupils during the last six months.

I have found commissioners in my district who think that the school year lasts twelve months, and compel the teachers to carry out their views.

The secretary-treasurers inform me that since the new law for facilitating the collection of taxes has come into force, the arrears are greatly reduced. It is to be regretted that the Act does not contain a clause providing for the collection of arrears, it would prevent many costly and useless suits.

With these general remarks, I now proceed to a review of all the schools in the district subject to my inspection.

In 1862, the number of French Canadian children attending school was but 800, they now number over 1,200, an increase of 400 in the space of only two years. Unfortunately, there are still many municipalities, almost exclusively French Canadian,—such as Cameron, Bouchette, Hincks and Northfield,—in which hardly any effort has been made to establish schools. The apathy of these municipalities forms a contrast with the zeal of the municipalities of St. André Avellin, Ste. Angélique, Bonsecours, Hartwell, Ripon, Ile du Calumet, Masham and Aylmer, in which everything that is possible is done to promote the interests of education.

On the whole I am tolerably well satisfied with the progress of education in my district, and I trust that hereafter its benefits will be better and better appreciated; the two thirds of the municipalities of this district are new, and have had but very inferior schools, and no opportunity of judging for themselves of the advantages derived from really good instruction.

*Sheen.*—The schools of the two sections of this municipality, attended by 40 pupils, are ably conducted by Miss Payne and Mr. Frawley. Mr. Frawley's pupils, in particular, answered with precision all the questions I put to them. These two schools are exceedingly neat, and are tolerably well furnished with school appliances. The discord which reigned in this township last year, has at length entirely disappeared, and I now trust that the experience acquired by the rate-payers will put them upon their guard for the future.

*Chichester.*—This municipality, which had but one school in 1861, now possess three. They work well and are well provided with school requisites.

The pupils of No. 2 display but little assiduity. Last year the highest entry in the teacher's journal showed an attendance of 32 children, and this year 21 only.

The pupils of section three exhibit but little more punctuality, but the great distance most of them have to go to reach the school, and the bad state of the roads, to a certain extent account for the fact.

The accounts of the secretary-treasurer are well kept, and in view of the poverty of the rate-payers, the arrears are very small.

*Isle des Allouettes.*—There are now seven schools in operation in this municipality, being an increase of two schools since last year; I cordially congratulate the commissioners on this evidence of progress. A better selection of teachers was made this year. I must, however, except two, who are somewhat inferior to the others. Miss McAdam and Mr. McRae deserve honorable mention for their zeal and success in teaching. It is to be regretted that the number of pupils in Mr. McRae's section is not more considerable. Miss McAdam's school is regularly attended by 38 pupils.

The school in section No. 9, at the period of its greatest prosperity, since my visit, has been attended by only nine children. When I visited the school there were but two children present. It is intolerable and unjust that a teacher should receive £30 a year for teaching the children of two or three families. It would therefore be far better for the commissioners to close this school until the number of children required by law be sufficient.

Efforts should be made to establish a good model school in the municipality. This municipality is the centre of a considerable territory, and it would be a great advantage for the adjoining municipalities to establish here a superior school, where the rate-payers would be enabled to give a more advanced education to their children, without being com-

pelled to send them to Ottawa, which involves a great deal of expense,—more than the majority of the rate-payers can meet.

*Waltham.*—I regret having been unable to meet the secretary-treasurer, notwithstanding the measures I had adopted with that view. At the time of my visit the two schools of this township were closed, and there was nothing to indicate that they would soon be in operation.

*Ste. Elizabeth de Franktown.*—This municipality has but one school in operation attended by 48 children.

Another school is shortly to be opened in section No. 2.

I am of opinion that this municipality could support three schools, by annexing to section No. 3 some of the rate-payers of Mansfield, who are cut off from any other school, and too few in number to support one themselves.

*Isle du Calumet.*—This municipality has three schools, which are well kept. Messrs. Cyr and Murray, in charge of schools Nos. 4 and 6, deserve praise for their success in teaching; their pupils have made great progress since my last visit.

The finances of the municipality are in a prosperous state, though there is still a large amount of arrears. The average of the male teachers' salaries is over £50, a very reasonable amount in view of the limited means of the rate-payers.

*Bristol.*—This municipality has but one Catholic school. This school was not open at the date of my visit. The secretary-treasurer, Mr. Sherly, was absent.

*Ontario.*—The school in section No. 5, though well conducted by Miss Morney, is in a deplorable state as to school requisites.

The other two schools are provided with suitable appliances, and the children have made satisfactory progress.

#### COUNTY OF OTTAWA.

*Aylmer.*—Mr. Deguise, an ex-pupil of the Laval Normal School, where he received an academy diploma, is an honor to that institution. In addition to several years' experience in teaching, Mr. Deguise has evidently a taste for his profession, and I trust that under his able management the Catholic academy of Aylmer will not fail to prosper. It now has 95 pupils, who attend with regularity.

Miss McDonald, who conducts the girls' school, discharges her duties with ability. Her school is attended by 85 pupils, of whom 20 are learning orthography, 31 geography, 17 French grammar, 15 English grammar, 20 parsing, 16 history, 6 letter-writing and five mathematics.

The affairs of the municipality are in a most satisfactory condition.

*Hull.*—After much difficulty the commissioners have at length succeeded in establishing two schools,—one for girls and the other for boys. These two schools are attended by 115 children, and are in a most prosperous state. I wish I could say as much of the financial affairs of this municipality, which the commissioners have left in a most deplorable condition.

*Chelsea.*—This municipality had but two inferior schools at the period of my visit. The commissioners told me that two more schools would be opened so soon as they found female teachers holding diplomas, though they could not pay them high salaries inasmuch as their means rendered it impossible.

I must say, to the honor of this parish, that it is rapidly recovering from the financial difficulties into which it was plunged by the former municipality of Hull, of which it formed part.

*Masham.*—Three able teachers (male) have charge of the Catholic schools of this municipality. The schools of Messrs. de Coeli and Berthiaume have made rapid progress. The children attend with tolerable regularity.

The secretary-treasurer keeps his books with much order, and pays the teachers punctually.

*Wakefield.*—At the period of my visit, the school of this municipality, conducted by

a new female teacher, had been but a few days in operation. The commissioners appeared to be satisfied with her conduct so far. The school is furnished with very inferior appliances.

*Low*.—This municipality is divided into two sections only. A third is soon to be added. This division of a large tract of country into but two sections is due to the small number of settlers. There was but one school in operation at the time of my visit. Two others are soon to be opened.

*Wright and Northfield, Cameron and Bouchette, Hincks and Maniwaki*.—since my last visit these townships have remained in *s'atu quo*. Some zealous individuals have made efforts to establish schools in these municipalities, but in vain. They do not, however, despair, and I trust their perseverance may soon be crowned with success.

*Waterloo*.—This municipality has one school, provided with tolerably good school appliances, and conducted by Mr. Corbeil. The children, 70 of whom are entered on the teacher's journal, attend with tolerable regularity at the school.

The state of the finances in this village is not very satisfactory, owing to the negligence of the late secretary-treasurer; but with a little energy, Mr. Bouchard, the present secretary, will soon put things once more in good order.

*Templeton*.—I have nothing but praise for this municipality. Three catholic schools were in operation, and two others were to be opened shortly after my visit.

The schools kept by Messrs. Raiche and Golloher deserve to be ranked with the best elementary schools in my district. Miss Burke's school works well also, but the insufficiency of the appliances and the smallness of the school, are obstacles to the progress of the pupils. Mr. Mason, the secretary-treasurer, by his energy and perseverance, has succeeded in collecting a large amount of arrears, previously deemed of no value, and has placed the affairs of the municipality in a prosperous condition.

*L'Ange Gardien*.—This parish, divided into four sections, has also four elementary schools in operation. Misses Demers and Raiche, and Mr. Elzear Bertrand, have given proof of ability in their respective schools. There is great room for improvement in Mrs. St. Pierre's school, as regards the management and discipline of the pupils.

The teacher complains that the parents go so far as to enter the school to dictate to her as regards her conduct. I called the attention of the commissioners to this abuse, which deprives the teacher of all authority over her pupils.

*Buckingham*.—The schools in sections four and two, were closed at the period of my visit, but were to open again in a short time.

The other elementary schools give satisfactory results, particularly Mr. McCormick's, which is certainly the best elementary school in my district; though this teacher deserves much praise for the manner in which he conducts his school, and the rapid progress of the children under his care, he should, nevertheless, refrain from disparaging, as he does, the academy, which after all is superior still to his own school.

This institution, under the able direction of the Rev. Mr. Brady, a retired *curé*, assisted by Mr. Lanorgan, cannot fail to give very satisfactory results. The Rev. Mr. Brady has undertaken to teach mathematics, and Mr. Lanorgan teaches Latin, French and English, to the 46 pupils who attend this school.

*Lochaber*.—Of the five elementary schools of this municipality, two were vacant at the date of my visit; but one these was to be opened so soon as a female teacher could be found, and the other at the end of the vacations granted by the commissioners.

A French school is now established in the village of Thurso. It is attended by 56 French Canadian children. The two schools of sections four and five work tolerably well under the direction of Misses Whitcomb and Merriman. The accounts of the secretary-treasurer, Mr. Kernan, are kept with much order and ability.

*St. André Avelin*.—In consequence of the small number of pupils (5 or 6) attending the school of section No. 3, it was closed last summer.

Miss Girouard's school, attended with tolerable regularity by 83 children, has given good results since my last visit. The same praise is due to the school kept by Miss Fairbanks. The other two schools are inferior.

Mr. Quesnel, the present secretary-treasurer, has restored good order in the affairs of the municipality, and thanks to his energy and management, the municipality will soon be free from all debt, an advantage which it has not enjoyed for a long period.

*Hartwell*.—Remote from the great centres of population and poor, this municipality has as yet but one school in operation. It is attended, nevertheless, by a good number of children. Mrs. Plante, who conducts this school, has obtained tolerably satisfactory results.

Mr. Aubry, the secretary-treasurer, discharges his duties well.

*Ripon*.—This township, which is far more populous than Hartwell, already possesses two good elementary schools. The children, numbering nearly 100, appeared to me to be all very intelligent. They like the school and display much assiduity. I mention this as a fact as rare as it is satisfactory. The finances of the corporation are also well managed by Mr. Quesnel.

*Ste. Angélique*.—This municipality had but two schools last year; but thanks to the unceasing efforts of the commissioners and secretary-treasurer it now possesses four schools, conducted by very competent female teachers. Mrs. Gaudry, who teaches English and French, has made her pupils make great progress.

Mr. McKay, the secretary-treasurer, was absent at the period of my visit.

*Notre Dame de Bonsecours*.—Miss Clairoux, charged with the school in section No. 1, has discharged with great zeal her duties as teacher. Her pupils have in consequence made great progress since my last visit. The number of pupils is 57.

It appears to me that the means of this parish would be sufficient for the establishment of a better school than that in section 2. Would it not be preferable for the wants of the ratepayers to make greater sacrifices, and to open in place of the elementary school a good model school? The additional expense would be the increase of the salaries of the teachers. The school house is a good stone building admirably adapted to the purpose.

I trust the commissioners will carry out my suggestion.

## No. 25.—EXTRACTS FROM THE REPORT OF INSPECTOR BRUCE.

### COUNTY OF HUNTINGDON, PART OF CHATEAUGUAY AND ARGENTEUIL, AND THE PROTESTANT POPULATION OF THE CITY OF MONTREAL.

*Godmanchester*.—School No. 5.—This school is satisfactorily conducted. The teacher is faithful, earnest in the discharge of duty, and devoted to her work.

School No. 8.—This school, until lately, was in a low, inanimate state. The present teacher deserves credit for the quickening she has given it.

School No. 6.—The teacher of No. 6, Miss Sarah Dalglish, is only a novice yet in teaching. I have no doubt whatever respecting her being an earnest, willing teacher, but she lacks experience and teaching skill.

School No. 1.—Dissentient.—This school is at present conducted by rather an able experienced teacher. In reading, writing, and arithmetic, I could scarcely look for more advancement. Schoolhouse in bad repair; desks and seats not sufficient.

School No. 2.—This is a small district. The total scholars is only 21. This school generally makes a satisfactory appearance.

School of District No. 7.—The school is in a fair state of organization. Had a fair attendance since my previous visit. Those children who have attended regularly (and they are but the minority) since I last examined them, have made very good progress.

School of District No. 9.—Visited this school, but found it closed. Small pox prevails in the district; it was, therefore, considered prudent to close the school for a short time. Schools of Nos. 10 and 11 have come under two efficient teachers. Both are zealous and willing, and have teaching heads.

*Dundee*.—School of District No. 1.—The children of this school are at present in a state very favorable to onward progress.

School of District No. 2.—This school is at present favored with an earnest teacher possessing very fair qualifications. Altogether, the school is in a favorable state. Order pretty well established.

School of District No. 3.—Dissentient.—This school, since my previous visit, has manifestly improved. The children are considerably quickened to self-effort, and are in a more favorable state for advancing than they were when I last examined them. The teacher appears anxious and willing to discharge her duty.

School of District No. 4.—The school of this district will be opened in a few days. Had no teaching last half-year. District No. 5 had the benefit of the school during that time. The school alternates between the two.

The schools of both districts cannot be kept regularly in operation; the districts are too weak, and the children too few, to have both in operation at the same time.

The state of school No. 5 is pretty satisfactory.

School of District No. 6.—This school still takes the lead in the municipality.

*St. Anicet*—Division No. 1.—Dissentient.

School of District No. 1.—Dissentient.—In nearly all the branches taught the progress of the children is fair, except the reading of the juniors, which I found very defective; the highest class read well.

Schools No. 2 and 3.—Vacant.

School No. 4.—This school is in a good state. A few in arithmetic over ordinary. In other branches nearly all are advancing. Miss Home is a fair teacher, with high qualifications.

*St. Anicet*—Division No. 1.—Under school commissioners.

School of District No. 3, village of *St. Anicet*.—This school is at present under a willing, earnest teacher, but his work is heavy, requiring great care and great labor.

School of District No. 4.—This is a large school, and pretty well conducted. The teacher's qualifications are not high, but his steady perseverance makes him a successful teacher.

School of District No. 14.—The teacher of this school complains that owing to the irregular attendance of the children, she is not a little discouraged. Writing showed tolerable improvement. In arithmetic the progress is poor. Only a few are studying grammar and geography.

School of District No. 12.—This happens at present to be closed. The death of the teacher's wife, I believe, is the cause. It is right to mention, however, that school No. 12 has, for years, taken the lead in division No. 1.

These schools are attended by 332 pupils, of whom 226 learn writing, 247 arithmetic, 78 grammar, 35 geography, 35 composition. The salaries of the teachers range from \$144 to \$200.

*St. Anicet*—Division No. 2.—School of District No. 1.—This school has much improved.

School of District No. 3.—The children of this school shew improvement. When the school was first opened (a year or two ago), nearly all who attended were abecedarians.

The schools of districts No. 4 and 5 were, at the time of my visit, without teachers. I always find No. 4 in rather a low state. No. 5 has, for some time, been better conducted, and more to the satisfaction of nearly all the district. No. 2 is a school which has for some time been well conducted. At present it is closed, but will soon be reopened. The salaries of the teachers range from \$60 to \$144. Two hundred and fifty-two pupils attend the several schools.

*Elgin*—School of District No. 1.—This school has of late very much improved under Miss Anthonson.

School of District No. 3.—The present teacher, Mr. Bate, appears to be a very eccentric kind of person. His qualifications are rather over ordinary, but his oddities unfit him for profitably conducting any school.

School of District No. 4.—The teacher is I am sorry to observe, not very well skilled in his business of teaching. I gave him my advice which I trust may benefit him.

A number of his scholars showed ordinary improvement in reading, writing and ciphering.

No. 5 School.—In all the subjects taught, the children showed tolerable progress. I doubt if the teacher has sufficient control over them. With more control on her part the children's improvement would no doubt be greater.

This school has much improved since my previous visit. The teachers' salaries vary from \$80 to \$150.

*St. Malachie*.—School of District No. 1.—This school is in a fair state of advancement. It shows that the teacher is careful and laborious. The work of this large school is too much for the teacher. And it is questionable whether her qualifications be such as to enable her to do full justice to all who attend the school. She leaves the school on the 30th June.

School of District No. 2.—Village of Durham.—The teacher of this school continues to succeed. Sedulous attention and painstaking industry characterize his teaching. Reading, writing, dictation, spelling—good; and much progress has been made in arithmetic, grammar and geography. The order and discipline of the school have much improved.

School of District No. 3.—Newly opened. In the elements of some branches I found the scholars not sufficiently grounded. Children docile and obedient. Order good.

School of District No. 4.—This is the leading school of the municipality. Every subject taught in it, is taught with much efficiency. The following question in arithmetic, 742 articles at £3 7s. 6d. was worked in twenty minutes, by three pupils, twenty-three or twenty-four different ways, and by two, twenty ways in the same time. It would take over thirty prizes to reward all who distinguished themselves under examination.

School of District No. 5.—This is another well conducted school—well kept and well taught. All results speak favorably of the teacher.

School of District No. 6.—The examination went on tolerably well, but its results came not up to the mark. The teacher has a model school diploma; but his success does not correspond with his acquirements. I have many teachers under my jurisdiction whose schools give far superior results to Mr. McCuaig's.

School of District No. 7.—This is a superior common school. Every returning visit finds it a step in advance. At present it is in a very satisfactory state. Mental arithmetic is here taught more successfully than in any other school in my district. Correctness in everything taught appears to be Mr. Henderson's great aim. Schoolhouse most unsuitable and far too small. Both the teacher and children's health, packed in so small a space, must greatly suffer.

School of District No. 10.—This school is at present conducted by rather a young teacher; but she is evidently willing, and has considerably improved No. 10 since my previous visit. School organization and discipline good. Progress of the children in the branches taught very fair. The school generally evinces considerable proficiency in everything taught.

School of District No. 11.—This small school has been favored since the 1st of July last with an earnest teacher. In reading, writing and arithmetic I could not well look for more improvement. It is a loss to the district that she leaves at the expiration of her term to take charge of another in the same municipality. Changing teachers so frequently is very detrimental to schools.

School of District No. 14.—State of No. 14 not more than satisfactory. The children appear not to be sufficiently quickened to effort. The teacher wants not will to teach. Intellectual activity is the great want. Progress in reading, writing and arithmetic, fair. In some things only moderate; among these is spelling and the elements of arithmetic. The material of the school is good. An energetic, intelligent instructor is what is needed. The school appears to be conducted in an orderly manner.

*Hinchinbrooke*.—School of District No. 3.—This school is conducted by a young unexperienced teacher who has no diploma. She was engaged on condition that she would appear before the Board of Examiners at its first sitting. I stated to her father that the Education Office would object to such an engagement. Found the school in an ordinary state of efficiency.

School of District No. 6.—Teacher not changed. Methods of teaching improving. School attendance small and very irregular. This renders success very difficult, if not impossible. Teacher earnest and steady. School pretty well conducted.

Dissentient School.—Considering how irregular the attendance in this school is, and that the children are very ill supplied with books, writing materials, &c., the advancement of the children may be considered fair. The teacher appears to be earnest and diligent. A great part of the children were absent.

School of District No. 4.—At the time of my visit the attendance at this school was small. Those present showed improvement in reading, writing and arithmetic. Consider the school in a fair state of advancement.

School of District No. 5.—This school has an industrious teacher. It is not very difficult to interest children *for a time*, but most difficult to keep up interest and retain impressions. I believe the teacher of this school labors not a little with an eye to *both*. Both teacher and pupils are earnest in school work.

School of District No. 7.—This school has had good teaching for years. In the elements of all the subjects taught the children are well grounded, and a number are well advanced.

School of District No. 1.—This school is favored with an earnest teacher—faithful and generally very successful. The school is large but well conducted.

School of District No. 2.—This is another large school, and is generally favored with good teachers. At present (October) the attendance is small, owing to the state of the roads.

*Franklin*—School of District No. 4.—School in its ordinary state. Attendance at the time of my visit very small. Progress of the children fair. Teacher earnest and diligent.

School of District No. 6.—Of late this school has considerably improved. The teaching is better. More intelligence and animation are exhibited by the children. The teacher as yet is without experience, being a mere beginner, but is, I think, painstaking and willing to improve. Attendance small. Children orderly and docile.

School of District No. 5.—This should be a good school, but so often are its teachers changed, and so short are their engagements, that the progress of the children is slow. At present the school is conducted by a well-qualified mistress.

Nos. 3 and 7 are at present without teachers. The schoolhouse of No. 2 was lately burnt.

*Hemmingford*—School of District No. 4.—The children of this school, considering their opportunities and their attendance (which is far from regular, very few excepted), are making fair progress.

School of District No. 1.—I observed a favorable difference in this school since my previous visit; answers to questions were more readily given, and more correctly, and the children appeared to take more interest in their work.

School of District No. 5.—This school has, at present, a diligent, earnest teacher, but her predecessor injured the school not a little. The initiatory part of his teaching was so far from thorough, that the present teacher would require to devote the greater part of her time, and the most of her care, in drilling the greater number of her classes in the mere elements of their studies.

School of District No. 6.—The teacher of this school is careful and steady; the children have the appearance of activity and willing diligence; beginners are in a fair state of progress. The more advanced scholars are in a satisfactory state. In grammar and geography I found less progress. Expertness in ciphering was, both on the slate and mentally, very satisfactory. This school continues to be well conducted. The teacher's heart is evidently in the work; she deserves encouragement.

School of District No. 2.—Found the attendance in this school small, being just opened after holidays. Those present knew very little beyond the mere elements of the branches taught. The number present was too small to test the efficiency of the school. I have reason to believe that the routine of the work is gone through with system.

Dissentient School, No. 2.—This school has been in operation but for a short time, and when it was opened the children were in a backward state. For the time it has been open they have made ordinary progress in reading, writing, and arithmetic. The school appears to be pretty well conducted.

School of District No. 8.—This is the best conducted school in the municipality. Mrs.

Wright is a teacher of much experience, and very considerable acquirements. The work of the school is gone through with system, and order is well established.

School of District No. 10.—The examination of this school was pretty searching, and somewhat prolonged. The results are creditable to the teacher, Miss Quinn. The children went through their test lessons satisfactory. Evidently Miss Quinn conducts her school with earnest steadiness and praiseworthy efforts. She appears to have full control over the children, but it is much against her that she has no apparatus, not even a black board. School in a fair state of advancement.

School of District No. 1.—Dissentient.—Just opened under a new teacher. Found it in a very backward state; children in the third book of reading not able to read the first book. The new teacher appears to be a person of considerable energy and attainments. Spent all my time in the school, rather teaching than inspecting.

School of District No. 12.—School in a fair state; children advancing pretty well in reading, writing, and arithmetic. Teacher apparently anxious for more insight into methods of teaching.

School of District No. 3.—This school shows improvement; the instructor is patient and careful. In writing, improvement fair; in arithmetic they are making considerable advancement, and are pretty well grounded in the elements. Their progress in grammar and geography is not great. Order good; teacher willing. The children have a desire to learn. Five hundred and eighty-eight scholars attend the schools of this municipality. All are doing well, except the three dissentient schools, which are inferior. The salaries of the teachers varies from \$10 to \$15 per month.

*Havelock*—School of District No. 1.—This school is conducted with much efficiency; the progress made is great since my previous visit. The teacher, Miss Oldfield, deserves not a little credit for her energy, and the method and solid instruction visible in their effects on her pupils.

School of District No. 2.—The examination of this school reflected credit on the teacher. Evidently Miss Millar is a painstaking instructress. Beginners are in a very fair state of progress, and the older children distinguished themselves very much. The appearance of the school indicates considerable activity and life, and the routine of work shows not a little judgment in conducting a school.

School of District No. 3.—This school is noted for having at each of my visits a different teacher. It is conducted with considerable life, and not a few of the scholars stood their examination with credit. No doubt many are in a backward state, but this is to be attributed more to want of school opportunities than to want of capacity and quickness in taking up instruction.

School of District No. 6.—This is a well-conducted school, and favored with a painstaking teacher. The children of the higher classes read well, answered test question well, wrote a dictation exercise with scarcely a mistake, worked a number of questions in arithmetic correctly and rapidly. Progress of the majority rather above the ordinary. The teacher's influence is fully established.

School of District No. 5.—Found this school in a fair state, and the children under full subjection. Since my previous visit the children have evidently improved, especially in writing; copy-books clean; writing regular, free, and rather bold.

School of District No. 7.—The children attending this school are a mixture of French and English—of Catholics and Protestants—and from this, so numerous are their classes, that it is impossible to do justice to any class or section of the school, but at the expense of other classes or sections. I believe not fewer than 13 reading classes were counted to me. We cannot really attribute the absence of improvement to the negligence or inefficiency of Miss Carrigan. With such a mixture what teacher could possibly shew even ordinary progress? I see not how matters can be altered for the better.

There are 360 scholars attending the several schools in *Havelock*. The salaries of the teachers vary from \$10 to \$18 per month. All the schools are good, except that taught by Miss Carrigan, which is rather below the average.

*St. Jean Chrysostôme*—Division No. 2—School of District No. 1 (English).—The state of this school does credit to its teacher. The scholars are growing in intelligence; they read well; shewed very good specimens of writing; went through their arithmetical

exercises with great *eclat*, and give satisfactory evidence that they have a fair amount of general information. Organization and discipline good. Since my previous examination of this school the improvement of the children is very marked.

School of District No. 10.—The teacher of this school deserves credit for her diligence and perseverance; she teaches both French and English. This nearly doubles her labors; yet the improvement of her pupils equals that of many schools in which only one language is taught. In reading, writing, cyphering, translating French into English, and English into French, the children showed fair advancement. A number of the girls are taught fancy-work.

Dissentient School, No. 1.—I fear this school is losing ground. Some time ago it was in a fair state of advancement. At present it is not what it was. Its former animation and intelligence have almost disappeared. I attribute not this falling off to its present teacher, Mr. Oatt; he has had charge of it for only about two months, and six months of able teaching will scarcely be sufficient to bring it up to its previous state.

School of District No. 11.—The discipline and instruction of this school have an upward tendency, but have not yet reached that degree of efficiency which they ought to have. The instruction should be more extensive, and thorough. Organization and discipline fair. From the state of the children's minds it is pretty clear that the teacher does not use sufficient method. The school is worked, however, with considerable order and punctuality.

School of District No. 12.—This school has changed its teacher. As Miss McNaughton is yet without experience in teaching, considerable allowance should be made till more initiated in the art of teaching and conducting schools. I found her both willing and earnest—ready to receive hints and to profit by the experience of others. Her school is in a fair state, and the children are orderly and obedient.

#### COUNTY OF ARGENTEUIL.

*St. Andrews*—School of District No. 6.—This school is still conducted by the same teacher, Mr. Hancy. Since my previous visit the children attending it are making fair progress in all the subjects taught them. I was quite satisfied with the progress of those studying French.

School of District No. 13.—This school is again under a new teacher, Miss Bradford. Under examination, the slate spelling very good, the knowledge of arithmetic indicated pains on the part of the teacher.

English Academy.—Examined this academy on the 23rd and 24th of August, 1864; found at this season, though it was harvest time, a very fair attendance. It is, at present, conducted by a young man of good attainments and considerable experience. Order is well established, and the business of the school is conducted with considerable skill and intelligence. Spending two days in examining, I found the results favorable.

School of District No. 11.—This is a very small school, and not kept regularly in operation. The education of the children is, therefore, little advanced. The teacher is young and without much experience, but she tries to do her duty.

School No. 3.—At one the advancement of the scholars of this school was highly creditable; now it is otherwise; a change of teacher is required.

School of No. 12.—This school is closed, and most likely will not be opened for some time. Nearly all the children in the district are of Catholic parentage, and most of them attend the dissentient schools. The remaining Protestant children are too few to form a district school.

School No. 14.—This district has had no school for some time. So small is the number of Protestant children (the French having dissented) that the commissioners cannot keep the school regularly in operation. The state of the education of the children in this district is very backward.

French College.—This school is still conducted by the same head master. This is an advantage to the school.

School No. 2 (Dissentient).—This is at present closed. A new teacher is to be engaged, and the school is to be removed to a more suitable and central situation.

School No. 3 (dissentient).—This teacher is to be also changed. The *curé* is of opinion that a change of teachers in both No. 2 and 3, will benefit the schools.

I would further report respecting the dissentient schools, that their supporters are very poor people, except, perhaps, those of School No. 3, who are well able to support their school. But nearly all the children attending the college, and all those of No. 2, are the children of very poor parents, who cannot pay even monthly fees.

I have few municipalities in which there are so many weak districts. Of seven districts under commissioners, three are so small that they cannot keep their schools in regular operation. Nor can they possibly be enlarged.

I have recommended that they keep the schools of No. 11, and No. 14, each alternately, in operation for one year. This arrangement would enable them to engage a better teacher for the school in operation; and the children, during the time it would be open, could regularly attend school. For years neither of these schools has been in operation, save for a few months now and then; so that the children are deriving little benefit during the short time the schools are open. By the time they are again opened, nearly all the instruction they before received is forgotten. The schools in districts 3, 12 and 14, were closed at the time of my visit. The salaries of the teachers vary from \$80 to \$180. The number of pupils is 499.

*La Chute*.—School of District No. 3.—A good school; improvement since my previous visit considerable. In reading, spelling and writing, progress very manifest; a arithmetic, geography and grammar, very good. General results of the examination indicative of improvement. The children went through nearly every part of their examination with not a little spirit and animation.

School of District No. 5.—Find this school generally in a low state. At present a favorable change in methods of teaching is evident. I believe, I may say, that No. 5 has now a teacher, should she be continued sufficiently long, who will raise the character of the school. She appears to be sedulously attentive.

School No. 2.—This school is generally in a fair state, and a number of the pupils are rather intelligent. Changing teachers too frequently is a bar to improvement.

School of District No. 4.—For some time this school has been losing ground. At one time it was well conducted. Engaging only second class teachers has thrown it back; they are also changed too often.

School of District No. 6.—The children of this school have for some time showed steady improvement. The teaching is better than heretofore.

School of District No. 7.—So irregularly is this school kept in operation and conducted by only third class teachers when open, that the education received by the children is very inferior in quality and small in quantity. The district is small and poor.

*College of La Chute*.—The college is at present thinly attended, owing to the commercial department being closed. Considering the inexperience of the teacher, who is a very young man, I could not well expect the college to be in a more efficient state. The pupils are receiving a good deal of useful positive knowledge. The number of pupils in the municipality is 360. The salaries of the teachers vary from \$130 to \$150.

*Gore and Wentworth*.—School of District No. 1.—There is much of good material in this school; the children generally, are willing to be taught. Their progress generally satisfactory. Slate spelling very good; their improvement in reading and arithmetic fair.

School of District No. 2.—The few in attendance in this school, at present, passed a pretty fair examination. But I observed nothing beyond ordinary. The teacher is steady and willing; but has yet little experience in teaching.

School of District No. 3.—This school has at present a pretty well qualified teacher. School ill supplied with school requirements.

School of District No. 4.—The teacher of number 4 is continued, and is giving fair satisfaction. The school is in an ordinary state of efficiency.

School of District No. 5 is vacant. So weak and poor is the district that the commissioners can keep the school but seldom in operation. Nos. 4 and 5 lie contiguously and should be united. No. 4 will soon need a new schoolhouse; and in building it, it should be on a new site as near No. 5 as possible to enable the children of that district to attend it.

*Wentworth*.—For years the schools of Wentworth are doing no good. Till the people become unanimous in supporting their schools, and show by active efforts that they are in earnest in giving education to their children, *their share* of Government aid should be discontinued. There are in the municipality 343 pupils, and the teachers' salaries vary from \$72 to \$96.

*Chatham*.—Division No. 2.—School of District No. 1.—This is the best conducted school in the municipality. The pupils showed considerable knowledge in all the branches taught.

School of District No. 2.—This is a small school, and kept in operation but for very short terms. The children are on the road to improvement. Their progress in reading, writing and arithmetic, considering the short time that the school is kept in operation, not unsatisfactory. The majority of the children appear to have good capacity.

School of District No. 3.—This school is conducted by a teacher of considerable experience; but she lacks energy. The writing showed ordinary improvement; but the appearance of the copybooks made it clear that the children are not sufficiently superintended while writing. Arithmetic taught too much in the old routine way. In other branches the advancement is fair.

School of District No. 4.—This school is at present vacant. When last in operation it was in a tolerable state.

School of District No. 5.—Well kept. Reading of seniors, fair; of juniors, satisfactory. Writing of a few, satisfactory; of the majority, tolerable. Progress in arithmetic, ordinary; in other branches, tolerably fair. The present teacher's predecessor improved this school remarkably. The salaries of the teachers vary from \$100 to \$200. The number of scholars is 239.

*Chatham*.—Division No. 1.—School of District No. 1.—The children of this district have of late made very little progress. The last teacher did little justice to the school, and the present teacher has not had sufficient time to effect any manifest improvement.

School of District No. 2.—This is perhaps the best conducted school in this division of Chatham. The children show steady improvement in the different subjects taught. The routine of work indicates a well devised system.

The School of District No. 3 was at the time of my visit without a teacher.

School of District No. 4.—This school is very efficiently conducted. The examination of the school showed that the methods of teaching are excellent. Better spelling and specimens of composition I have not found in my first-class schools. Every part of school work indicates aptness to teach.

School of District No. 5.—I have often had to complain of the low condition of this school. At present it is in a favorable state. Its standard of efficiency is yet not high; but the children under the present teacher (Miss McVicar) are very considerably improved. I have not found for years the school in so progressing a state. Closed the examination well pleased.

School No. 6.—This school continues to be well conducted. The teacher is diligent, earnest and persevering. All the children, whose attendance is very regular, are advancing very favorably.

School No. 7.—I seldom find this school to my wish. The commissioners seem to always fail in selecting for this school teachers of the right stamp.

School No. 8.—The present state of this school, taking into account the bad attendance of the majority of the children and the frequent long vacations of the school, is fair. Only one parent was present during the examination.

Dissentient School No. 2.—Instruction here is altogether given in French. The present teacher has considerably improved the school. Never did it stand high, nor will it ever be of high standing; and to find it in a fair state is encouraging. So irregular is the attendance of nearly all the children, and so much of the year is lost by vacations, that a fair working state is all we can expect.

Dissentient School No. 1 is at present vacant. A change of the teacher is deemed advisable.

There are 578 scholars in this municipality, and the salaries of the teachers vary from \$10 to \$15 per month.

*Grenville*—Division No. 1.—School No. 1.—Found this school in nearly the same state as it was last winter. In judging of this school we are to compare its present state with what it was when first opened. Then, all about it was low and unsatisfactory; the most of the pupils were mere beginners, having little knowledge of schools or school work. Now the work goes on with system, and the children have better ideas of study and school order, and they evidently take more interest in their work. So far as I could judge they needed only an intelligent, experienced and skilful teacher to make them fair scholars.

Total scholars, seventy-five. Of these forty-six write; fifty-five cipher; three are taught book-keeping; eighteen study grammar and geography; seven read history; and forty receive lessons in composition. The teacher is engaged for six months. Salary, \$150.

*Harrington* (a new settlement).—The inhabitants of this part of Harrington are endeavoring to bring the school law into operation. Their schoolhouse was built some time ago, and the school was put in operation on the 13th of June last, under a female teacher sufficiently qualified for instructing the children at their present stages, being all but little more than abecedarians. I visited their school on the 17th and 18th of August, and gave such encouragement as I could to both teacher and scholars. The children speak only Gaelic. The Gaelic, therefore, must be the medium of instruction. I had therefore to use the Gaelic in the school. A teacher master of this language can alone, to any advantage to the children, conduct the school. The number of children in the settlement of school age is perhaps about 50. Population 221. On the school roll at present—being harvest time—26; in the winter the number will be nearly double. All the 26 are mere beginners—not able to read without spelling. Though the school has not been long in operation their progress from letters is considerable. The school is in good order. The schoolhouse is in a healthy, elevated situation, conveniently located.

*Montreal*—Model School, Panet Street.—This is now conducted by Miss Maxwell. It is yet scarcely organized. Some time must be allowed to prepare it for a regular examination. Since opened under Miss Maxwell the attendance is good, and the number of children on her school roll is encouraging.

*British and Canadian School*.—This school has now, and very lately, come under Mr. Arnold, well known as a very successful teacher. He has already brought the school into a very efficient state.

*Mr. Williamson's School*.—This school continues to flourish. Under Mr. Williamson it has very much improved; and the teaching pleases me better than when under his predecessor. There is more of intelligent teaching, and the discipline shows much judgment.

*St. Chrysostome*—Division No. 1.—School of District No. 1.—The teacher in this school is a stranger to me. Under him the school is in a fair state, but no more. The best and more advanced of his scholars were absent. I hope the school will continue to maintain its usual efficiency. I believe the teacher is a steady, diligent man.

*School of District No. 2*.—This school appears to be, in all respects, advancing. The standard of instruction is that of a common school, but within this standard the children are acquiring a fair knowledge of the ordinary branches of education. The school appears to be in fair working order.

*Dissentient School*.—This school is certainly gaining in discipline and attainments, and the children are considerably quickened in their desire to improve in all their studies. The discipline is fair; school very orderly and quiet; arrangement of classes very suitable.

The salaries of the teachers vary from \$156 to \$180. The number of pupils is 187 in the several schools of the municipality.

*Huntingdon*—School of District No. 1.—This school continues to be well conducted; its teacher is laborious and successful. In teaching arithmetic and writing especially, few schools come up to him.

*Academy of Huntingdon*.—The attendance of the academy at present is small—only 28. The principal, Mr. McLaroc, is evidently a laborious, skilful teacher. I devoted two days to the examination of his classes, and the results of the examination were very satisfactory.

*School of District No. 2*.—This school is in a thriving state. Since my previous ex-

---

amination, in some things, reading, dictation, spelling, and arithmetic, especially, I observed a very favorable difference. In singing, also, there is improvement.

In this report I have to speak more favorably of the school commissioners. They now show more interest in the prosperity of their schools.

The salaries of the teachers vary from \$180 to \$400. Two hundred and fifty-three scholars attend the schools.

Dissentient and Convent Schools—Convent School.—This school is creditably conducted. In order and discipline it is not excelled by any school in this quarter. The results of the examination speak very favorably of its state.

Dissentient School.—At present there is a very small school. The great difficulty with which the teachers have to contend is the unsteady attendance of the children. The parents being all poor, they have often to keep them at home for want of clothes, shoes, &c. The two schools number no more than 76 pupils.

GENERAL STATEMENT OF THE SCHOOLS OF THE DISTRICT OF INSPECTION OF MR. BRUCE.

| Municipalities.                  | Reading. | Writing. | Arithmetic. | Grammar. | Geography. | Composition. | Bookkeeping. | History. | Drawing. | Mensuration. | Geometry. | French. | Latin. | Greek. | Italian. | German. | Hebrew. | Vocal music. | Instrumental music. | Algebra. | Zoology. | Natural Philosophy. | Needle work. | Embroidery. | Chemistry. |

I am bound to remark that the commissioners of all the municipalities visited by me, give proofs of their devotion to the cause of education. The teachers are generally well paid. The secretary-treasurers are entitled to high praise, the finances and accounts being well ordered and arranged. Few of the schools under my inspection are in an inferior condition and I have good reason to be satisfied with the improvement shewn in most of them, since my last visit.
