> Passengers will make the usual change of cars at Virden, Montana, both going and coming.

#### **Orton News**

Orton, Alta. Aug. 2, '09

Editor Alberta Star.

Dear Sir :-I am sorry to inform you of a sad event which happened at Orton

on July 30 and resulted in the death of the six year old daughter of Oliver Orr. It appears that Vira with another little girl named Carry McMurray were in the garden and ate something that brought on sickness. Carry improved but Vera turned worse and, although every effort was made by physicians and friends she died Sunday morning August 1st. The funeral took place the day following and was largely attended by sympathizing friends. The remarks of the Bishopric and Elders Thelin and Henson were very

timely and appropriate. The grave was dedicated by Elder Albert Henson.

This challenge will hold good Mrs. James McMurry has also been seriously sick but is on the way to recovery -Special Correspondent.

> maintained at the expense of thorough cultivation. It is cheaper and better to grow one's own horses than to buy them, as the horses which are eating the products of the farm are thus, like the cattle, growing into money instead of out

The keeping of a few sheep means a great and valuable assistant in keeping weeds down. Their cost in actual feed is small, and the balance is almost always on the

right side of the ledger. This is the true doctrine of mixed farming. It does not embody any insane attempt to produce profitably from the same herd of cattle both milk and beef, any more than it does the preduction of prize-winning, heavy drafts and two-minute trotters from the same stock of the farm.

GROW CORN ON SUMMER-FALLOW.

Grow eorn on the summer-fallow. In other words use corn as a cleaning crop. If well attended, as it may be with comparatively little expense, by using a twohorse riding corn cultivator the field will be as thoroughly rid of weeds and grass as though cultivated all summer with a crop, and the owner will have a thirty, forty or fifty-dollar corn harvest to show for his work. Fall-wheat growers may object that corn is not off the land in time to sow wheat, and yet secure a good top. In some cases this is true, but the purpose can be accomplished by sowing wheat after peas, and spring grain after corn, alternating with each course of the rotation the areas on which the corn and the peas are planted. Thus, if the rotation be a three-course one, each field may have peas, as well as corn, once in six years, or once in eight years, according as the land is left one or two years in sod. Corn, well culti-vated, will clean the land; peas will add nitrogen and supply a most valuable feed in the form of both grain and straw; and if the pro-duce of the farm be devoted mainly to the raising of stock, and the manure carefully saved and applied fresh, the farm will grow richer year by year, and it will be found progressively easier to grow large crops of wheat and secure good catches

**OUR CITY FATHERS** 

It should be and doubtless is, with a great many of our citizens, a matter of public pride, that we have such an efficient and earnest set of workers in our Mayor and Town Council. With the handicap they are under, hardly one man in ten would make an effort for the progress of our town in the way of public improvements; but, with a bonded indebtedness of over 50,000.00. upon which they are obliged to pay a part of the principal, as well as the interest, and with a water system the right to sell any or all of the upon their hands that was so horses and cattle by private sale poorly installed as to be a con- prior to the auction on Aug. 10th. stant expense, they are still pushing our Town to the front.

The surplus they have in hand to work with is being wisely expended to make the best of a bad bargain by putting in good order the tank and the water mains about town and extending the mains so as to accomodate more water-takers and thus produce more revenue.

They have now before them, moreover, two petitions from our most enterprising townsmen ask- tion to the Exhibition of the above ing for a cement sidewalk from Society, to be held at the Exnibi-Lyman to Taylor Streets along tion Grounds here, on Wednesday Main Street, and from there to the railway station. This will no doubt be completed before winter, and that without laying any and Prize List will be sent to you additional burden upon the Mu- on application. We desire an nicipality at large.

#### "The Gospel of Thrift"

Copy of Editorial from Hamilton "Spectator' of April 19, '09

"One of the most practical Gospel sermons delivered in Hamilton that the hearer cannot but be confor many a day, and it was not by a regularly ordained preacher either, was heard in Wesley Church last aight.

"The preachers tell us every Sunday how to live so that when we lie down to die we may have sate passport into the glories of the world beyond, but Dr. Samson, Twenty Thousand the lecturer of last night, preached a Gospel of thrift that will make men and women better citizens, and provide for the days when higher and purer. It is the ex- and family than Mexico or any travagance and recklessness of our other part of the continent, so h daily lines that is responsible for sold the large holdings he had in tion to be thrifty, industrious and ern Alberta, and particularly in economical, and the boys and the Cardston district. young men will have no time to Speaking of Lethbridge the gambling rooms, betting on the expect to see a population of horses, and the smoking habit twenty thousand people in Leth than would provide an annuity for bridge in the next three years .every one of the victims if it were Lethbridge News. properly invested, payable after he reached the age of fifty-five

"With all its sins of wrongdoing the Laurier administration has done one act that will rebound to its credit for all time in the future. While the British Goveroment is providing for Old Age of its thriftless citizens and placing a perpetual tax on the industrious with which to pay pensions, the Canadian Government comes in with a new Gospel of self-help and presents a plan whereby every man and woman can provide an annuity for the days when they are not able to earn a living. The British plan educates pauperism by providing pensions for the improvident who live from hand to mouth 365 days in the year, spending their earnings without one thought of the morrow. The Canadian plan begins with the youth and educates the boys and girls to lay by even as small a sum as 25 cents weekly so that when they reach the age of 55 or 60 years they will have an assured income that will at least make them in dependent of the charity of the world. It begets a spirit of pride instead of dependency. And the larger the weekly sum saved the larger will be the annuity. The plan of the Government provides that no annuity less than \$50 a year can be paid, and the highest sum that anyone can receive is \$600 a year. It depends upon the persons themselves how much to provide between the higher and lower amounts. Once a person begins to save money by opening an account in a savings bank the habit becomes so fixed that every pay-day finds him or her at the bank making the weekly deposit. Once begin saving for an annuity at the time of life when we need a fixed income and everything will be made to bend to that purpose.

"The plan is simple and easily understood, and the name of Sir Richard Cartwright will be a blessing in every home where advantage is taken of the annuity. It is to explain it that Dr. Samson, of Windsor, has been commissioned by the Dominion Government to spend part of his time in the field to educate the people up to the new Gospel of thrift as a provision for old age. Evidently the churches are not yet converted to it, for Dr. Tovell, Pastor of Wesley Church, is one of the first

ministers to open his pulpit to Dr. Samson, and the people who attended Wesley Church last night were profited and well repaid for the hour no more spent. Dr. Samson is an earnest speaker, and he tells his story so eloquently that vinced that the Canadian Government has hit upon the right plan to educate the people that an independent annuity, earned by one's own thrift, is preferable to pauperizing pensior roll."
