NEW SERVICE FROM HALIFAX TO EUROPE

Red Star Line to Inaugurate Weekly Sailings in January.

(Montreal Gazette.) Commencing in January a weekly service between Halifax, Great Britain and the continent will be inaugurated by vessels of the Red Star Line, first, second and third class passengers being carried. In addition to freight, the line's four largest ships have been assigned to the route, the Lapland of 18,694 gross tons, the Kronland of 12,241 tons, the Finland of 12,222 tons, and the Zealand of 11,905 tons.

The four liners will provide a weekly service eastbound from Halifax to Plymouth, Cherbourg and Antwerp, and westbound from Antwerp, Southampton and Cherbourg to Halifax. Sailing dates are not yet available, but are expected to be announced in the course of a few days.

Owing to the withdrawal of other liners from their regular routes for winter cruises, the four Red Star steamers will be the only liners carrying first class passengers calling at Canadian ports this winter. The White Star-Dominion Line, Montreal, will have charge of the Halifax business.

Announcement is also made that the White Star liner Celtic, 13,518 tons, will sail from Halifax on December 7 for Antwerp and Genoa, where she is due December 20 and 21, respectively.

SCORES HIT AT THE UNIQUE

"If Women Only Knew" Received With Enthusiasm.

A good story, good settings and a good cast mark "If Women Only Knew," the new Robertson-Cole release at the Unique. The theme is from Balzac's story, "Meditations on Marriage." It is a story of the pure and disinterested love of a woman and the shallow and selfish affection of a frivolous girl.

After the wedding Donna's father fails to forgive and Maurice has difficulty in finding work. Donna becomes pensive. Maurice finds his wife about to run away with Billy Thorne, a wealthy student. Maurice tries to make good in the business world and succeeds. He returns home and finds that his wife has divorced him. His mother has died and he hears that Madeline is engaged. He is about to leave town when he meets Madeline. Here the picture takes an interesting turn.

Forced Liquidation of Large Stock of Fine Woollens.
When the trade depression was witnessed a year ago the Semi-ready warehouses carried a stock of nearly \$1,000,000, chiefly imported British woollens, serges and tweeds. Nearly the whole of this stock has been liquidated at a big loss to the company.
"Suits that actually sold at \$40 and \$45 are now being tailored to measure for \$25 and \$30," is what the President announces. The Custom Tailoring Department is a big feature of the Semi-ready service.

VALUE

Is the Only True Yard-Stick

Men who buy PRICE alone run the risk of making a great mistake—lots of things that are low in price are actually very expensive because they are neither serviceable nor satisfactory.

Value is the only true measure. When a man buys a Suit or Overcoat here, he is making an investment in clothing which will prove profitable because he has bought something of real value and not clothing which has been cheaply constructed to sell down to a low figure.

This season we are gratified to be able to sell ready-tailored clothing of Gilmour type, Quality and Value at prices much lower than in recent years—\$25 to \$60 for Suits and Overcoats.

the poor this winter were discussed at the meeting of the W. C. T. U. yesterday afternoon and it was decided to leave the matter over until a full meeting could be called. The meeting opened with a devotional session led by Mrs. J. G. Seely. Mrs. David Hipwell, the president, was in the chair for the business session. Mrs. Hope Thompson gave a very interesting report of visiting luncheon and others in hospital for whom the union cares especially. Mrs. George Cowell read a letter in which the terrible conditions in Armenia were described and, while the matter was discussed, no definite action was taken regarding support of the cause. Mrs. I. Hoar was appointed to have charge of calling the full meeting of members to deal with ways and means.

Thanksgiving Day will be observed by the local post office as a public holiday. There will be no delivery by letter carriers and the money order branches will be closed. The general delivery, registration and stamp windows will be open from 9 to 10 a.m. and 6 to 7 p.m. The street letter boxes and parcel receptacles will be collected by team as usual.

REV. DR. WALLACE HAS HAD NOTABLE CAREER

(Montreal Gazette.)

Rev. O. C. S. Wallace, D. D., pastor of Westmount Baptist church, goes to the pastorate of Eutaw Place Baptist church, Baltimore, Md.

As an active worker in the Eastern Association and in the Baptist Convention of Ontario and Quebec, Dr. Wallace has been an outstanding figure, being an ex-president of the latter body. During the annual convention just held at St. Thomas, Ont., he was one of the leading personalities and his daily addresses at the morning sessions were much appreciated by delegates.

The Rev. Dr. O. C. S. Wallace was born in Nova Scotia, and comes of a family of pioneer Baptists, who were persecuted for adhering to their religious persuasions. He studied at Worcester Academy, Mass., and later graduated at Acadia University, N. S., returning to Massachusetts to complete his theological course at the Newton Theological Seminary, of which at a later date he became chairman of the board of trustees. For five years he was pastor of the Baptist church, Toronto, from which charge he was called to the chancellorship of McMaster University. At the end of ten years he resigned that position, and, re-joining the pastorate, went to First Baptist church, Lowell, Mass. In 1908 he went to the First Baptist church, Baltimore, and now he is returning to Baltimore, but to Eutaw Place church. The great B. A., D. D., and L.L.D. are held by Dr. Wallace from various Canadian and U. S. universities. In recent years Dr. Wallace has twice crossed Europe to represent Canadian Baptists, in 1918 as official visitor to the Canadian troops in France and Britain, and in 1920 as delegate to the Baptist World Alliance in London.

Canadian evidently did not pay, either because they were not supposed to pay or because they failed to live up to the law. Whatever is said in its favor, therefore, the income tax is not a general tax. It has apparently only one-third of the inhabitants of the country. Whoever pays is entitled to consider himself as belonging to the select, whether he gets any satisfaction out of it or not.—Edmonton Bulletin.

WHO PAYS?

An official statement just issued at Ottawa shows that during the last year 1920-21 persons in Canada paid Dominion income taxes, the total amount collected being \$46,281,206. That works out at something around \$235 per head on the average of those who paid. Assuming that each person paying represents a family of five, the figures accounted for something less than one million people. The other eight million

THE ISSUES

The people of the maritime provinces have too much at stake in the federal elections to permit their attention to be diverted by the tariff bogey. They know perfectly well that the tariff will be safe in the hands of Mr. Fielding and the other leaders who will surround Hon. Mackenzie King when he becomes prime minister.

BUSINESS AND PRICES

The Canadian Bank of Commerce price index shows a decrease in October in the wholesale price of goods exported, but a slight increase in the price of those imported. We quote: "Our index number of the wholesale prices of exports has fallen from 159.26 in September to 150.06 in October, while that of imports shows a slight rise from 147.92 to 148.81 during the same period."

QUEER OLD RICH LADY STARVED HERSELF TO DEATH

When Husband Died Six Years Ago She Drew the Blinds and Never Left the House—Died in Rocking Chair.

New York, Nov. 2.—Six years ago when her husband, an official of a Manhattan insurance company, died, Mrs. Margaret Easton drew down the shades in their three-story frame dwelling at 10 Putnam avenue, Brooklyn, and never stepped outside the house. Food, what there was of it, came through a cautiously raised window in the basement, and dust settled thick and undisturbed in the home, for no one ever called.

Occasionally the children of the neighborhood, after hearing home gossip of "the queer little old lady," peered under the edges of curtains in the basement windows. Now and then they would see Mrs. Easton, somewhere between seventy-five and eighty years of age, rocking herself—queer little old lady, dressed like a figure in a woodcut print of forty years ago.

Out of all the mystery there came, of course, the neighborhood conviction that Mrs. Easton was rich. But it was not until midnight on Saturday, when Mrs. Easton was found dead in the rocking chair, that the neighborhood knew how rich. Investigators rummaging through the house found bank books showing deposits of \$250,000, old-fashioned, heavy-stoned jewelry worth \$50,000, and in one drawer \$1,570 in cash, including twenty-seven \$50 notes.

One of the bank books showed that the first deposit in a Brooklyn commercial bank was made forty-five years ago, the date being early in 1878.

Last night the police were searching for relatives and, as no will was found, heirs to the \$300,000. For hours Detectives Eugene Daly and Joseph Donlon, of the Classon avenue station, went from house to house in the vicinity of Putnam avenue and Ormande Place, endeavoring to find kin or friends of the dead woman, and late last night they came to Manhattan to try and locate two nieces, expected to be living here.

The discovery that Mrs. Easton had died was made by Otto Spitz, proprietor of a delicatessen and grocery store at 107 Putnam avenue, diagonally across from the Easton home. Ever since the death of Mr. Easton the grocer had called at the basement window several times a week and delivered the small quantities of food which the solitary dweller required.

He called at the house a week ago last Saturday, and left some groceries. Last Wednesday he again rapped on the window, but when it was raised he was informed that "nothing is needed." Knowing that the food stock of the elderly woman must be very low, he returned on Thursday, and when he again was told to go away, he sent his wife, Mrs. Anna Spitz, over to inquire what was wrong.

Refused to Eat.

Enforcing her rule not to permit anybody in the house, Mrs. Easton talked to the grocer's wife through the grated window of the basement, and Mrs. Spitz learned that for about ten days Mrs. Easton had been undergoing treatment from Dr. J. S. Baldwin of 422 Classon avenue.

"But I am not taking the medicine," the grocer's wife quoted the old woman as saying. "I take the prescriptions, but I do not get them filled."

"Don't you want some food?" she was asked.

"No, I have no desire for food," Mrs. Easton replied. "I am not eating; my stomach won't let me."

Last Saturday night, when he was closing up his shop, Spitz, who had been

thinking about the aged woman in the lonely house across the street, decided to make a last effort to get food to her. He said he was positive no food had entered the house since a week ago last Saturday.

"I went across the street," he said, "and looked in the window. There was no lamp burning, as there usually was at night, but I saw Mrs. Easton sitting in the rocking chair she always used. I rapped on the window repeatedly, and when I got no answer I raised the window and got in. She was sitting in the chair with her eyes closed. I thought she was merely asleep or weak from lack of food, but when I touched her hand and forehead I found them cold."

That Mrs. Easton starved herself to death is the accepted theory.

Aches and Pains Of Rheumatism Sometimes They Are Unbearable.

There are weather conditions that make rheumatism worse. They are not the same in the cases of all persons. Some rheumatics suffer more in dry, warm weather than in moist cold weather, but all suffer more or less all the time.

The cause of rheumatism is an excess of uric acid in the blood, affecting the muscles and joints, causing aches and pains. Hence the blood must have attention for permanent results in the treatment of this disease.

Hackensack, Nov. 2.—Walter M. Haws of Westwood, who is connected with a brokerage house in Wall street, Manhattan, is incensed at the statement issued on Saturday by Prosecutor A. C. Hart of Hackensack, in which he characterized the story told by seven-year-old Marjorie Haws of her experience with a "Jack-the-Clipper" as "pure bunk."

Mr. Haws has consulted his counsel, Edwards, O'Loughlin & George, of 20 Nassau street, Manhattan.

"I have been made to appear ridiculous in this statement of the prosecutor, and my reputation and that of my daughter has been assailed in a most unbecoming manner," said Mr. Haws. "I am held in high esteem and am as much respected in my community as Mr. Hart is in his, and I can't allow even a prosecutor to attack me or any member of my family in such a manner."

"In his statement he says things that are not true, and as my daughter insists she is telling the truth I am going to stand by her loyalty. If I thought she was telling a fancied story, I would issue a statement to that effect, too."

Never Discussed Bobbed Hair.

"In the first place she had never said she wanted her hair bobbed and the matter had never been discussed. On the evening this mysterious man gained admission to my house and cut Marjorie's hair she did not send for a young man to come to the house as the prosecutor's statement sets forth. At six o'clock Marjorie sent her younger brother Bradford to the baker's for a loaf of bread, and having had two visits from this stranger, she told him to have Waldor Lester bring him home in a taxicab, for we often used the Lester taxicab service."

"Waldor is a friend of the family and he did bring Bradford home. When they reached the house they found Marjorie unconscious on the floor near the front door, and her aunt, Miss Sophie Seamon, bathing her head. Miss Seamon came on a visit to us that evening and was expected any moment. She reached there at 7:10 and found Marjorie on the floor."

"It is reasonable to suppose that had Marjorie planned to cut her own hair,

Evening Frocks Are Dignified and Distinctive

Be sure and see our splendid collection before the invitation brings to your mind the pressing need of one for the next formal function.

The season's new modes at their smartest are exemplified in a notable display at this store. Black, Sorrento, Poppy, Orchid, Jade, Nile Turquoise—all these colors are finding high favor with discriminating dressers and are seen here generously interspersed with other shades both delicate and daring.

The new petal dresses are most attractive, the flower effect being brought about by adding row upon row of soft, delicately tinted satin or taffeta cut in petal shape and fashioned to form entire skirts or side skirt panels.

Simplicity itself is all that can be said for the youthful mode of some panne velvet frocks of rare charm. These are sleeveless and have only a hint of trimming. On beauty of color and fabric alone depends their fascinating individuality.

as the prosecutor intimates, that she would have told her brother to hurry back in the taxicab?

Doctor Found Her Hysterical.

"Dr. Townsend, when called, found Marjorie hysterical. Her fingers were clinched and were open with difficulty. I saw marks on her breast and a side of her head. I asked her why she did not get up after the man first knocked her down and left her to go into the kitchen, and she said she seemed paralyzed from fear. She thought the man was going for the carving knife that lay on the table, and she could neither scream nor get up."

"The scissors used by the man were hanging on a nail in the kitchen and were easily seen in the light, so there is nothing mysterious in that."

"On the occasion of the second visit of this man to the house he knocked at the back door, threatening to shoot if the door was not opened. Marjorie rushed up stairs and told her mother, and it was then that we decided to have Chief of Police Bird watch the house."

"On last Friday Prosecutor Hart sent for Marjorie, and without my knowledge she was taken to Hackensack and doubtless sweated by the prosecutor and detectives. Had I been home my daughter would not have left the house. She came home crying. She was told that if she would confess the prosecutor's statement would let her down easy, but she insists the story of the attack is true and that she has nothing to confess."

Doctor Fears For Her Health.

Chief Bird said Marjorie's hair was cut straight, something that would seem impossible for the girl to do herself in a hurry.

Dr. Townsend said the girl was so hysterical that it was necessary to give her a hypodermic injection. He feared the effect of the attack on her nerves might be permanent.

"I have engaged counsel because I think my reputation has been assailed, and because I think the statement of Prosecutor Hart is unwarranted and injurious to my whole family," said Mr. Haws. "I don't think even a prosecutor has a right to make such assertions when he has no evidence to back them. I have questioned my daughter many

times on this matter, but her reply to me has been always, 'If I should die who died at Hackensack at the age of 19, I can't confess to something I never did,' and I believe her."

London, Nov. 2.—Mrs. Lucy Wright, who died at Hackensack at the age of ninety-five, had lived in the same house for seventy-five years.

this province to take a position as business instructor on the staff of Sackville Academy one of the well known group of Mt. Allison institutions. In 1897 he assumed proprietorship of the Fredericton Business College and became principal. Since that time about three thousand students have passed through the school and as a business educational institution it has become known from one coast to the other.

Military Career. Early in life he became a member of the military forces of the Dominion and at the time of leaving Ontario was an officer in the Argyll Light Infantry at that time known as the 19th Regiment. Upon becoming a resident of Fredericton he was transferred to the 71st Regt. now the York Regt. and remained connected with it until he severed his connection with the militia. Early in 1915 Col. Osborne was appointed to the 56th Overseas Battalion, C. E. F., as a company commander and went to England with the unit. Upon that battalion being taken as a draft unit he applied for service in France and soon afterward was sent to the 8th Canadian Mounted Rifles with the rank of major. The 8th C. M. R. was the mounted rifles unit of the Maritime Provinces at the front and saw heavy fighting all through its period of service. Col. Osborne was on the Somme in 1916 and in the Ypres Salient. He also was in the midst of the severe fighting about the Regina Trench. After a long period of service he was injured as a casualty and eventually returned to Canada. Upon the organization of the Military Hospitals Commission Command he was appointed officer commanding K unit at Fredericton with the rank of lieutenant colonel, and upon the transfer of work of that commission to the Department of Soldiers' Civil Re-establishment took command of District Discharge Depot No. 7 in this city from which he was demobilized. His retirement was with the rank of lieutenant colonel.

Lost Eldest Son. Two other members of Col. Osborne's family served overseas. His eldest son, the late Capt. Hubert P. Osborne after going to England with the 104th Battalion transferred to the Royal Flying Corps and with it was killed in action. A younger son was with the Canadian Artillery.

OPERA HOUSE SHOW SCORES A BIG HIT

Mid-Week Programme Contains Plenty of Comedy, Good Dancing, Singing and Clever Bird Offering.

A delightful treat was the statement of many who visited the Opera House yesterday and witnessed the splendid show now being presented. Douglas Graves and Belle DeMonte top the bill in a domestic comedy sketch entitled, "I Gotta Have Meat." Green and Burnett, two jolly sons of Ham, appear in a comedy success, "The Two Hod-Carriers. Both are excellent singers, fine dancers and talented musicians. Much of the fun this clever pair of Ethiopians create is built around an episode that actually occurred prior to their debut as vaudeville performers. Miss Meredith & Co. are described as the "Act de las Birdland" and surely the description

A Profitable Profession for Women

McLean Hospital Training School for Nurses offers a three years' course in the care and treatment of nervous and mental diseases, with affiliations that also offer training in medical, surgical and obstetrical work. CELTIC ATMOSPHERE. Paris, Nov. 1.—While so many prophets are foretelling what the Anglo-Saxons will do at the Washington Conference, it might be pointed out that whatever is done at Washington will not be shaped by Anglo-Saxons at all. David Lloyd George is a Celt and boasts of it. Secretary Hughes' father was named David, which, with his last name, shows that he is of Celtic origin. But that is not all. Aristide Briand is a Breton, and so is a Celt, too, as he so often loves to tell. It is a little too much to expect the Japanese chief delegate to trace his ancestry Selt-ward, but the Celtic countenance of the conference is enough to justify speculation as to what Saint David will do to the giant God of War.

The romance and trading importance of CANADA'S GREAT WATER ROUTE

Canada's history has been made on her lakes and rivers. From the early days of the French settlers and traders, the inland waters of Canada have been the pathway along which progress has pushed forward her frontiers. On these great lakes and rivers the canoes of the missionaries paddled inland as far as the Sault, quickly followed by the courier de bois and later by farmers and merchants from Old France and the British Isles. These broad expanses of fresh water were used by the followers of Jacques Cartier and Champlain to conduct their trade with the Indians. In those pioneer days the water route was the only practical means of transport. The Great Lakes provided the natural access to Upper Canada.

With the coming of steamboats, these same lakes and rivers became the centre of increasing commercial activity. Towns and cities sprang into being. Mount Royal became the metropolis of Montreal. Muddy York developed into the Queen City of Toronto. Hamilton, Kingston, Windsor, Sarnia, Sault Ste. Marie, Fort Arthur, Fort William—all these important cities owe their settlement and development to their respective positions on the St. Lawrence or the Great Lakes, and to the constant stream of traffic which these positions ensured.

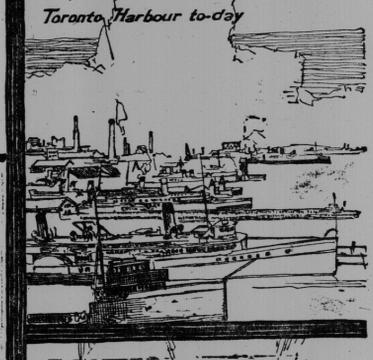

With the settlement of the Great West and the conversion of prairie lands into wheat fields, the golden grain of Canada found its natural outlet in this great new navigable waterway, on which ply the splendid steamships of the Canada Steamship Lines' fleet. This year millions of bushels of Canadian grain were carried by the ships of the Canada Steamship Lines. In addition to this huge grain business, the same fleet carried in the one season great quantities of iron ore and coal. This great volume of business, added to a wonderful passenger traffic, is capable of development to greater totals as our country expands and prospers.

The future holds for Canada Steamship Lines a prospect second only to that of the Dominion itself.

Your state of health largely depends upon the food you eat

No one who is physically ailing in any way can afford to take chances with the food he eats. For upon the selection of your food, and upon its perfect digestion and assimilation largely depends your state of health.

The most important thing in connection with the digestibility of any cereal food is the way it is prepared—and the length of time it is cooked or baked.

Grape-Nuts, the rich cereal food made from whole wheat flour and malted barley, is probably baked longer than any other cereal food.

A large part of the starch of the wheat and barley is changed into dextrin and grape-sugar in preparing Grape-Nuts. This is one reason why Grape-Nuts is so easily digested by even the most delicate people.

Grape-Nuts is wheat and barley so processed as to make it delicious and appetizing; even young children thrive on it and grow strong and rosy.

Go to your grocer today and get a package of Grape-Nuts. Eat it as a cereal with milk or cream, or make it into a delicious pudding. It will be enjoyed and relished by every member of the family.

INVENTOR NEAR TO HIS DEATH IN TESTING SEA SAFE. Supposedly Watertight Invention Leaks When He is Thrown Overboard in It.

Baltimore, Nov. 2.—Twelve thousand persons here today cheered as Menotti Nanni, Chicago inventor of a non-sinking life designed for use aboard ships, arose from the bottom of the harbor at the mouth of Jones's Falls after allowing himself to be placed in his invention and thrown overboard. Whistles tooted and the whole water front seemed aroused. They saw the inventor, 200 feet away from the scene of the demonstration, everything had apparently turned out well.

But those aboard the scow from which the inventor was dropped overboard saw a different scene. They saw Nanni go into the steel cylinder smiling, confident and waving his hand to those about him. They saw him kiss his wife good-bye and saw her wait stoically while her husband remained under water. Five minutes later, when Nanni came from the bottom of the harbor, they saw him taken from the cylinder in a state of exhaustion, with nearly two feet of water surrounding him in his temporary prison, and knew that had he remained under water a few moments longer he would have perished.

The descent today was the third he had made and the other two being entirely successful. The safe used was a new one and not that which he had previously used. It was about five feet in diameter and ten feet tall, built in the form of a cylinder, with a smaller cylinder inside. As it was lowered into the water the small cylinder was released and shot to the surface and great commotion, caused by a chemical compound used in the safe. When the safe was taken up, for several minutes after the door had been opened the cylinder was suspended in mid-air by a derrick and whirled around, to give air to Nanni, who sat in a huddled heap. His wife became hysterical.

FIGHTING DREAD CANCER.

"Worst Enemy of Human Race" Claimed 557 Victims in Toronto Last Year.

(Toronto Telegram.) Last year 557 persons died from cancer in the city of Toronto, as compared with 224 from tuberculosis. Dr. C. J. Hastings, medical officer of health, has declared war on what he terms "the worst enemy of the human race."

In the Health Bulletin for October he states that the generally accepted proper treatment of cancer is the removal of the growth at as early a period as possible. He warns citizens to beware of fake cures. "The man who advertises and sells them," says Dr. Hastings, "is the worst type of criminal, inasmuch as he is not only guilty of fraud, but also robs the individuals of the only chance they had through early operations, radium or X-rays."

The M. O. H. enumerates the danger signals, such as unnatural blood discharges, lumps on the breast, or mammary glands, persistent indigestion with loss of weight, and emphasizes the fact that cancer is only curable in its earliest stage. It is not a constitutional or blood disease, and is not communicable or inherited.

POLICE INQUIRY IS COMPLETED

Crown Prosecutor Gives Evidence—Did Not Think the Police Held Back Evidence.

At the second session of the investigation which is being conducted by Commissioner Thornton into the charges that evidence was suppressed at the trial of Edward O'Brien, held in City Hall last evening, the evidence of Mrs. Mary Fleming and Dr. W. B. Wallace, K. C., was taken. Mrs. Fleming said that she knew nothing of the Norris case. She did not remember Mrs. Truscott calling on her the night of the murder. She had seen Mrs. Truscott since that night. Dr. Wallace, who was prosecuting attorney in the O'Brien and Spellman trials, said that he had never made a statement to the Globe or to Mr. Ellis that evidence had been withheld. On the last day of the trial the evidence was all in when court adjourned for lunch. He said that he had received a telephone call from the office of J. King Kelley that Mrs. Truscott could give important evidence. He had a subpoena issued for her. After lunch the woman had not arrived and he received a message that she was French and would require an interpreter. Witness said that he could not secure one. Detective Power told him that the woman was no good as a witness and that he had better examine her first. He was not told that she was in the building. Witness said that he had seen the editorial in the Globe and went to Mr. Ellis and told him that he had made a mistake. He later saw another editorial and could not understand it after he had told Mr. Ellis his mistake. Witness said that he did not think that the police department had withheld any evidence and said that the police were always anxious to give him information. To Mr. Harrison, Dr. Wallace said that Mrs. Truscott's evidence was important if she was to be believed. He said that he had received the depositions of the witnesses such a short time before opening of court that he could not go into the case with the police very deeply. This concluded the testimony and Commissioner Thornton said that every effort had been made to get all witnesses who would throw light on the matter. In a few days Commissioner Thornton will make his report and recommendations, if any, to the common council.

ADVANCE GUARD OF PROPAGANDISTS

Washington Expects to be
Flooded With All Kinds of
Agents Now.

Washington, Nov. 2.—The advance guard of the propagandists, representing nationalities who emerged from the Paris Conference dissatisfied with the terms of the Versailles Treaty, has arrived in the person of Sallendra Nath Ghose as the spokesman of the Gandhi movement in India.

Washington expects to be flooded with as many agents of these movements as those who come here with the earnest purpose of solving the limitation of armaments and settling the questions that appear to be a menace to future peace. According to reports, the hotels will be filled with propagandists who will attempt to inject their views in the conference, and, of course, failing, they will make every effort to air their views through the press.

Ghose, who arrived here today, immediately became busy and gave out a statement telling of the movement to establish a republic in India. This statement of great length and filled with historic illumination, traced the revolutionary movement in India from the year 1857, and the troubles India has had since the signing of the armistice.

The agitation which the Gandhi followers have been making in India has, through a commission sent here, apparently been transferred to the United States in the hope of enlisting sympathy and lessening the influence of the representatives of Great Britain, who will sit in the conference.

After telling of the revolt against English rule in India, the statement ends with the declaration that the movement now under way is a declaration of war on the part of India.

"Thousands are holding protest meetings throughout the country, calling upon the Indian army to be withdrawn from the British services, culminating in the manifesto by the forty-eight leaders of the republican movement, including Mahatma Gandhi and an American named Stokes, on the 4th of October, re-affirming that it is contrary to the national dignity of an Indian to serve the British government, especially as a soldier, and urging every Indian soldier and civilian to sever connection with the gov-

ernment which has brought India's economic, moral and political degradation. This is a declaration of war on the part of India.

"This is a challenge of the organized republican forces of India to the might of the British sword. How will England respond? Has England the courage to arrest the popular leaders of India? They dare not arrest Gandhi, for it is Gandhi who has directed not only Hindu resentment at the Punjab atrocities and the Amritsar massacre, but the more explosive wrath of India's Mohammedans over the Turkish peace treaty into the passage of passive resistance. Should England remove Gandhi from the government of the Indian people, India might see at once the dawn of the red day which Russia witnessed when the Czar was dethroned."

BETTERMENT IN FRENCH FINANCES

Nation's Position Hopeful—
Improvement Perceptible in
Industrial Field.

Paris, Nov. 2.—Many people in French financial circles are convinced that the worst of the economic crisis is now over. As the autumn season progresses, the financial and industrial position of France shows an unquestionable tendency to improve. The wheat and wine harvests have been excellent and a slight improvement is perceptible in the indus-

trial field generally, especially with the metallurgical trades. That the September foreign trade balance was less favorable is true; but that was due to the exhaustion of the stocks of raw material, which had been weighing heavily on the market. One may therefore hope for improvement in the commercial situation.

As for the Government's budgetary situation, that is certainly not yet on a completely sound basis, nor can it be so, as long as the State has to bear the heavy burden of reparations. Nevertheless, real progress has been made because according to the present estimate, the ordinary budget for 1922 will just about balance. Heavy reductions in expenditure, the Treasury will next year have to borrow only one-half of what it has borrowed this year.

In addition to this the State will most probably repay the Banque de France at the end of next December 2,000,000,000 francs on account of the bank's advances of 25,000,000,000. The whole financial policy of the Government aims at gradually reducing these advances, arriving eventually at restoration of gold payments, though this result will, of course, not be attained for some considerable time to come. There are people who approve further paper inflation, but they have not the upper hand in France, and it is not at all probable that their theories will prevail.

CITY WATER SAFE WITHOUT BOILING

The order advising the boiling of all drinking water was rescinded for the time being by a resolution of the board of health passed at the regular monthly meeting yesterday. The action of the board was taken in view of the more satisfactory reports from the laboratory regarding the condition of the water.

John Kelly, chairman of the board, presided at yesterday's meeting and there were present also George Blake, Mrs. R. J. Hooper and Dr. W. Warwick. The board considered the matter of providing drainage facilities in Rousesay avenue in the vicinity of Eastmount. The board had taken the matter up with the provincial government and a reply from the provincial engineer had been received. The matter was referred to the district medical health officer for further report.

The report of Dr. T. F. Johnston, dairy and food inspector, was read. It showed that 350 sediment tests had been made on milk coming into the city district during the last month. Sixty-eight

had been found dirty, as compared with eighty-two during the month of September. As a consequence the licenses of five milk producers had been cancelled. Warning letters had been sent out and in many cases a marked improvement was shown. It was said that it seemed to be extremely difficult to get consistently clean milk, even from farmers who are endeavoring to provide a good article.

TRAIL RANGERS SOCIAL.

Twenty members of the Work and Win Trail Rangers of the Carleton Methodist church gathered in the school room on Monday evening, when an enthusiastic social evening was held. The

evening began with a supper, after which the boys listened to short addresses by Rev. Jacob Heaney and the mentor of the club, L. H. Stubbs. Games and a rousing singing took up the evening, which was one of the most successful yet held. Miss Olive Kingston and Miss E. Adams greatly assisted towards the success of the entertainment.

At a meeting of the Commercial Club, held in its rooms last evening, there was not a sufficient number present to form a quorum for the transaction of general business, but much business of an executive nature was disposed of. A general meeting of the club has been called for next week.

Ask Some One Who Was There!

On Monday afternoon at the Imperial Theatre, the New Edison proved that there is no difference between its RE-CREATION of music and the original music. It was proof that would be good in any court of law.

If you did not attend, take the trouble to find out exactly what happened. Investigate all the details of this drastic test. It was given particularly for the music-lovers of St. John — so that they might know, through their own personal experience, that there is a phonograph which can give them the exact performance of the living artist.

Leola Lucey, famous soprano, made the

test. She stood on the platform, beside the New Edison. She sang. In the midst of her song she stopped singing. The New Edison took up the song, and continued it alone. Thus they alternated—singer and phonograph.

The audience had to watch Miss Lucey's lips in order to be certain which was singing. The New Edison's triumph was complete and spectacular.

Remember that no other phonograph can sustain this test! Remember that you want a phonograph which does! And remember that the New Edison did it—right here in St. John.

For a marvelous new invention—the Deltor—brings to your needle Paris' own treasured gift of chic; it enables you to make these smarter clothes for less money than any clothes you made ever cost; it gives you miraculous skill and ease of sewing and adds a wonderful economy of time to an actual saving of money!

The DELTOR

Saves you 50c to \$10 on materials alone

YOU will find the Deltor enclosed in the envelope with your Butterick pattern. It is not a part of the pattern itself, but a separate service individually planned for the garment you are about to make.

First, the Deltor gives you an individual layout chart (yes, individual, not just a general chart, but one for your exact size and for each suitable width of material). You buy 1/4 to 1 1/4 yards less material on every garment, a saving that amounts to 50c to \$10 on every gown you make!

Then, you follow picture-and-word illustrations which show you just how to interpret your fashion as would the originator himself. You sew more surely than ever before, saving hours of time. And your flying needle deftly embodies in your frock not only perfect set, fit and drape but lines that bespeak Paris itself.

Finally, suggestions of finish particularly designed for your very own frock are revealed to you—little details that are great in importance—tiny touches that control the whole movement of your gown. Your finished frock—behold! it is a creation of Paris!

Butterick Design 3353

Go to the Butterick pattern counter. Select from the newest Parisian fashions, remembering that the Deltor suggests the correct materials and simplifies the making of the most intricate gown. It saves you 50c to \$10 because it specifies less material than would be possible without the Deltor.

OFFICERS NAMED
Nominations for the Board of Trade Council—Engineers of C. P. R. Bridge Construction.

The construction of the new cantilever C. P. R. railway bridge over the reversing falls was told by C. Droper, of Montreal, resident engineer in charge of the building of bridge, at the November meeting of the board of trade last evening at which W. F. Barrett, the president, presided. Nominations for officers of the board of trade for the ensuing year and for members of the council took place last evening and resulted in the re-election by acclamation of W. F. Barrett to the presidency and G. E. Barbour to the vice-presidency of the board. For members in the council there were nominated: J. H. Kimball, R. B. Macaulay, J. G. Harrison, F. Turcott, A. L. Canadian Pacific Railroad Man was Almost a Wreck from Stomach Trouble.
"When it comes to building a man up and making him feel fine I don't think there's another medicine in the world in the same class with Tanlac," said Stanley J. Smith, Lake Megantic, P. Q., with the Canadian Pacific Railroad.
"There's an old saying that when a man's stomach goes wrong everything else goes wrong with him and my experience proves it. Several months ago I began to suffer from indigestion and it wasn't long before I was on the verge of a breakdown and was so weak I could hardly board my train.
"Tanlac made me feel like a brand new man in a short time. I never saw anything to equal the change it made in my condition and I'm getting strong for it."
Tanlac is sold in St. John by The Ross Drug Co., Ltd., and F. W. Mann and by leading druggists everywhere.

KILLS WIFE AND VISITOR.
Providence Husband Then Hunts for Policeman and Reveals Murder.

Providence, R. I., Nov. 2.—Luciano Imondi, thirty years old, a night worker in a railroad roundhouse here, returned home unexpectedly and shot and killed his wife, Alveria Imondi, and Antonio Calandona, a visitor. Then he hunted for a policeman.
"I've killed my wife," he calmly informed Patrolman Keegan, whom he encountered a few blocks away. Held in charge of double murder, Imondi expressed satisfaction with his act. Two children, aged ten and seven, have been sent to a charitable institution.
"This fight to save Sacco and Vanzetti is one of the most urgent tasks before the American people," said Art Shields, at the Workers' Defense Union tonight. "The Sacco and Vanzetti case does not only put the American justice on trial; it represents a savage attack on the labor movement. They are saved only by united action on the part of labor."
"It is significant that the newspapers that are crying for their execution say very little about the evidence against them, but harp on the fact that they are radicals. They know that the case is not only an appeal to anti-radical prejudice. It was the same way in the Mooney case. The hostile newspapers tried to induce him to maintain his innocence. He refused, falling in this, killed him. She was sentenced to death."

Sydney, N. S. W., Nov. 2.—Australian vineyards have yielded 6,000,000 gallons for the year, as against 5,000,000 gallons in 1920.

DO YOUR BOWELS MOVE REGULARLY, OR DO THEY BECOME CONSTIPATED?
There is no medium through which disease so often attacks the system as by allowing the bowels to become constipated, and there is no other trouble which is so liable to be neglected, because material impaction may not be felt, at once. Though there is not regular action the retention of the decayed and effete matter, with its poisonous gases, soon poisons the whole system by being absorbed into it, causing violent sick and bilious headaches, internal bleeding or protruding piles, heartburn, jaundice, etc.
MILBURN'S LAXA-LIVER PILLS will regulate the flow of bile to act properly on the bowels, thus making them active and regular, and removing the constipation and all its allied troubles.
Mr. Samuel Ruckler, Tatamagouche, N. S., writes: "For over a year I suffered with constipation. I took several different kinds of medicine, but could only get temporary relief. I was told to try Milburn's Laxa-Liver Pills. I procured two vials of them, but after I had taken one I found that I was relieved of my trouble. I do not hesitate to recommend Laxa-Liver Pills for any kind of constipation."

CONVICTED MEN

Mass Meetings in All Parts of the Country to Reach a Climax on November 20—Violent Threats Made.
New York, Nov. 2.—Mass demonstrations in all parts of the United States, similar to those held in European cities, to express indignation of the workers at the impending fate of Nicola Sacco and Bartolomeo Vanzetti, the two Italian labor organizers whose murder appeal will be decided by the Appellate Court of Massachusetts on December 1, are being planned by Communists and other radical organizations with headquarters in this city.
Announcement of the proposed plans was made by the Workers' Defense Union, the Italian committee for Defense of Political Prisoners, the American Labor Alliance, and other organizations, participate in the General meeting.

The committee in charge of the demonstration programme said that special invitations are being extended to the American Federation of Labor and independent union bodies, the Italian Chamber of Labor, the Industrial Workers of the World and the Socialist Party, to participate in the General meeting.
"This fight to save Sacco and Vanzetti is one of the most urgent tasks before the American people," said Art Shields, at the Workers' Defense Union tonight. "The Sacco and Vanzetti case does not only put the American justice on trial; it represents a savage attack on the labor movement. They are saved only by united action on the part of labor."

PLANS CHICAGO CATHEDRAL
Bishop Gets Design for \$6,000,000 Structure for The Episcopal Church.
Chicago, Nov. 2.—Alfred Granger, a Chicago architect, has designed and submitted to Bishop Charles P. Anderson, a suggested \$6,000,000 Gothic combination cathedral and office building for the Protestant Episcopal diocese of Chicago, to be 290 feet high, on a site yet to be determined on the east side of upper Michigan Avenue, south of the Drake Hotel. It is designed to take the place of the burned Cathedral of St. Peter and Paul on the west side.
The project is entirely different from other combination office and church structures, for although partly an office structure it is not a commercial proposition. Every bit of space is designed to be used by some branch or activity of the Episcopal Church.
It will house the executive offices of the diocese, the church club the woman's auxiliary, the visiting nurses' headquarters, a small emergency hospital, a staff for rescue and welfare work, an assembly room for open meetings of social and civic character, an employment bureau, and all other agencies necessary in the modern church.
Chicago's oldest Jewish organization which is also the first of its kind in the West, Kehillah Anshe Mayriv Congregation, has purchased the site for a great synagogue, to cost \$800,000 and to seat 1,800 persons. Rabbi Tobias Schindler has acquired a site at Drexel Boulevard and Fifth Street.
Work is expected to start in about two weeks with the idea of opening the temple in November 1922, on the seventy-fifth anniversary of the foundation of the congregation.

HAD BAD COUGH AND SORE THROAT
Never neglect a cough or cold however slight. If it can be had but one both, affected.
DR. WOOD'S NORWAY PINE SYRUP
will help to stop the cough, soothe the throat, and if the cough or cold has become settled on the lungs the healing virtues of the Norway pine tree along with the soothing and expectorant properties of other excellent herbs, roots and barks promptly eradicates the bad effects, and the persistent use cannot but bring about relief.
Mr. Albert Marsh, Lower L'Ardoise, N. S., writes: "About a year ago I contracted a cold accompanied by a very bad cough and sore throat. I sent for the doctor, but what he prescribed did me so little good I began to get discouraged. A friend came to see me and asked me if I had ever used Dr. Wood's Norway Pine Syrup. I told him I had not and sent him right away to get me a bottle. I started using it, and after a couple of days I found I was getting relief, and after taking two bottles the soreness in my throat seemed to be leaving me, so I resolved to continue its use, and after I had used five bottles both my sore throat and cough were gone. I would not be without 'Dr. Wood's' for any money."

DELAYED IN STARTING.
 Joseph McIntosh, a returned soldier who had been overseas with the 29th battalion from Nova Scotia, had planned on starting tomorrow on a hike around the world, but today said he was so far unable to complete arrangements for a supply of photographs of himself which he desires to sell. He said the sum he needed was \$500 to send a citizen promised to secure it for him, but today he learned that his anticipated benefactor had left the city. Until he could procure the pictures, he said, he could not start on his long hike.

GIRL NOT ABLE TO BE IN COURT

Arrests in Case Referred to Yesterday — Parker Testifies and Falls in Faint.

Theodore Saunders, of Godola Point, Harry Ketchum of Nauwigewauk and William Reynolds of Godola Point, before the magistrate this morning, charged with a statutory offense. The preliminary hearing will be held Friday morning if the girl is able to come to court. This is the case referred to in the Times last night in which three girls were taken for an automobile drive, two of them taken home, but the third driven out the Marsh road and the next morning in a house to which she had gone in the night. A warrant was sworn out on October 27 and the three were arrested yesterday.

Daniel Mullin, K. C., appeared for Reynolds and J. A. Barry for Ketchum. The case against Fred Gallant, charged with breaking and entering the store of E. Taylor and stealing cloth valued at \$400, was resumed this morning.

George V. Parker identified some pieces of cloth in court as some he had bought from the defendant who, said he had found it under a wharf. He paid the defendant for the cloth and a couple of pieces of fur. During cross examination by J. A. Barry, the witness said that he knew that the cloth did belong to the defendant and then said he did not know whether it did or not. Parker fainted at the end of the examination, but was soon revived. The case was postponed for further evidence.

The preliminary hearing of the case against Joseph Neaves, charged with the theft of clothes, watches, and other articles from the store of William Jacobson, 48 Mill street, was taken up this morning. Mr. Jacobson testified on the morning in question he went to the store and found that one of the back windows had been forced and a quantity of goods taken. He identified some articles in the court room as part of his stock. The case was postponed until this afternoon at two o'clock.

The case of Saul Arano, charged with selling liquor, was postponed until this afternoon at two o'clock. The inspectors are making an effort to locate a witness.

AMALGAMATION OFF FOR PRESENT

What is said following the Wright Steel Memorial Home Decision.

Referring to the decision of the board of directors of the Provincial Memorial Home not to amalgamate with the St. John Protestant Orphanage, reached at a meeting held last evening, Dr. James Manning, president of the Memorial Home, said this morning that the financial affairs of the institution had become so greatly improved that it was felt in the best interests of the orphans to carry on for this winter at least.

He said that things were looking better than they had for some time. The sum of \$5,000 had been paid for the property and another \$5,000 expended on a new wing and other improvements. A deficit of \$1,200, which existed about three months ago, he said, had been reduced to about \$400 and there was enough money in sight, outside the home's share in the receipts of the recent fair, practically to wipe out this deficit.

Dr. Manning expressed the opinion that there was a hard winter coming and every bit of accommodation possible would be required in care for the orphans. He said that the directors felt that the home in which \$10,000 of the people's money had been placed should not be now abandoned when the need for its existence was so apparent.

It was said this morning by one of the officers of the Protestant Orphan Home that the situation now is practically the same as it was before negotiations for amalgamation commenced. He said that every concession that was possible to give was made in an effort to effect the union of the two institutions with a view to cutting down the overhead expenses in the care of the Protestant orphans of the city. Now that the plans had failed to produce the desired result, it was the intention of the older organization to proceed no further with the negotiations but to carry on the work as it had been carried on before the subject of amalgamation was brought up.

He said that the directors of the Protestant Orphan Home did not feel like assuming the property of the Memorial Home but were agreeable to take over the children and care for them. A request from the Memorial Home directors that five of the Protestant Orphan Home directors resign to make room for representation from the Memorial Home directorate had been agreed to. It was therefore in the nature of a surprise that last night's action was learned.

After a meeting of the Memorial Home executive last night, the following statement was issued:

"This evening, November 1, after several weeks of negotiations, the terms of absorption offered to the executive of the Provincial Memorial Home in Wright street by the board of directors of the St. John Protestant Orphan Home were very carefully considered. Chiefly for the reason that the board of directors of the Protestant Orphan Home refused to use our building on Wright street, upon which we had paid \$5,000 and expended over \$8,000 more on a new wing, but stated that they would acquire another building to use in its place, the executive declined to accept the terms of the board of directors of the Protestant Orphan Home by a vote of three to one.

The resignation of Miss Lily E. Fraser as superintendent was accepted, with expressions of regret.

PURITY OF OUR WATER SUPPLY

(Continued from page 1.)

Dr. Frink said the general policy was to buy all properties offering. He said last Thursday he found a man draining a boggy into a stream which flows into Little River, the water of which might be used in the city should the Loch Lomond supply be interrupted.

Dr. Warwick was of the opinion that the prohibition of boating, fishing and bathing should be continued permanently.

The mayor said that the city might as well consider buying the land to the head waters of the streams feeding the lakes, as to buy the land surrounding the lakes.

Lake Lattimer.

Dr. Warwick said there was evidence of cattle being watered in Lake Lattimer.

Mr. Jones said he had three caretakers patrolling the lakes.

Mr. Bullock had a report of a mixed bath'ne party in Lattimer Lake this summer.

Regarding the suggestion of raising the intake pipe at Lake Lattimer, the engineer said that no great amount of sediment was drawn into the pipe, but it was of the opinion that the raising of the end of the pipe would prevent sediment entering the pipe. The cost would be \$2,000 to \$3,000.

Commissioner Jones said he would bring in report on the matter, and the engineer would make soundings on the site.

To Mr. Mullock, Dr. Warwick said the pollution in Lake Lattimer was greater than in any other place.

Chief Blake when pollution was first found, the health board found twenty-five or thirty cesspools draining into the lake, one of them from the home of the caretaker of Lake Robertson. It was found that many people were bathing in the lake.

Regarding the board's recommendation to have a duplicate set of screens, Mr. Jones said that duplicate screens were used, one being installed while the other was being cleaned.

Lake Robertson.

The board recommended the fencing of Lake Robertson to prevent cattle grazing. Mr. Jones said he would look into this.

Regarding the diversion of the roadway and oiling the surface—where it skirted the lake, Dr. Warwick said the dust from the road would cause pollution.

Commissioner Frink suggested that a spruce hedge would stop a lot of the dust.

Mr. Kelly thought diversion would solve the difficulty at a cost of \$600.

Mr. Jones agreed to look into this feature.

Regarding the cess-pool at the caretaker's house, Dr. Warwick suggested that the overflow could be disposed of by running it into the subsoil.

Mr. Jones agreed to investigate.

Loch Lomond.

The board recommended the removal of the Barker House, barns and cess-pool. Dr. Warwick said that the septic tank there was not working properly as it had to be haked out twice a year. The overflow, Dr. Warwick said, went into Lake Robertson.

To the mayor, Dr. Warwick said that he did not think the tank could be made septic while a hotel was operated there. He thought that conditions would be suitable for private use only. One remedy to prevent the conditions was to seek legislation to restrain the building of hotels on the lake.

As the city built the tank at the Barker House, Dr. Warwick was of the opinion that the city should remedy it, and Commissioner Frink said the health board had the right to make the owners stop instantaneously.

It was decided to make tests on the city lands below the Barker House to ascertain the amount of sewerage in the soil.

The drainage from the barns, Dr. Warwick said, ran into the lake through drains.

Mr. Kelly said there was a pile of sand on the side of the lake.

The mayor said the sewerage matter was one for the health board to deal with.

Mr. Jones said he would look into the drain matter.

A General Scheme.

The board, recommending the covering of the stream between Loch Lomond and Lake Robertson over which the bridge near the Barker House passed, Commissioner Frink said an extension of the 42-inch pipe from the Lake Robertson dam to Loch Lomond would do away with covering in the stream, the diversion of the Lake Robertson road, the drainage trouble at the Barker House and the continuation along the shores of Lake Robertson. This would eliminate Lake Robertson altogether.

The city engineer said that it would mean 1.1-4 miles of pipe.

The mayor estimated the cost at \$100,000.

Mr. Jones was asked to make a survey of the scheme.

Regarding the fencing of the land along the lake where the road ran nearby, Mr. Kelly said this recommendation was to prevent the watering of horses and cattle in the lake.

Commissioner Frink said that the city had only one source of water supply and that should be protected.

Dr. Warwick said the matter of fencing had to be taken up with the provincial government.

Commissioner Frink said it might be well to have a bill providing for the prevention of the erection of dwellings on the lakes which supply the city with water.

It was decided to take up the matter of proposed sewer extensions at a later meeting.
