ositively Restores the Hearing, and is the Only
Absolute Cure for Deafness Known. Absolute Cure for Deafness Known.

THIS OIL is abstracted from peculiar species of small WHITE SHARK, caught in the Yellow Sea; known as CARCHARDON RONDELETH. Every Chinese fisherman knows it. Its virtues as a restortive of hearing were discovered by a Buddhist Priest about the year 1410. Its cures were so numerous and many so seemingly miraculous, that the remedy was officially proclaimed over the entire Empire. It use became so universal that for over 360 years no Deaf, charges pepald, to any address at \$1.00 per bottle.

"haven't you heard? Mr. Brabazon is to be married to Lady Helen Hartford, Mrs. Pailleton's English niece, text month. The cards are already out."

"What!" cried Rosa, her sapphire-blue eyes blazing, the rosy lips apart. "To be married—and he engaged to me!"

And then Rosa rushed away into the barn chamber, and hid herself for full two hours, to sob out the current of her childish grief.

"That would be impossible," as boney, Lewis Cormier.

"But it's the fact," said she. "I may little Rosa Dale, who was engaged to you, under the chestout trees at Amber Hill, nearly nine years ago, and here is the engagement ring," holding up a slender golden hoop, with an opal glimmer all surprised that you didn't recognize me. I was a child then—I am a woman now. And after my pa-

entering into his mind as he gazed.
"Of course I mean it," said he.
"But I am only 12 years old," cried Rosa, flinging back the sunny tendrils of hair that hung over her forehead.
"You are exactly twelve times as lovely as any of the city belies that congregate hereabouts," said Mr. Brabazon, striving to conceal a yawn. "And if they think I am engaged—don't you see?—there will be some probability of their leaving off persecuting me."

A. E. Onlton.

Coun. Knapp moved as an amendment to the amendment, the appointment of three Councillors to inquire 427.64 the cost of a new building, and re

822,837.39 port the same at the meeting in July him, this, however, could not apply \$2,386.84 called for a new building. The first

motion passed.

Coun. Kuapp suggested that since it was decided to build a new registry building, he would now move to ap-

CHIGNECTO POST AND BORDERER.

SACKVILLE, N. B., JAN. 25, 1883.

The County Council has made provision for a new Registry office at Dorchester, the old one being condemned; the vanis of it is not free proof and it is too small for the requirements of the County. It is proposed to erect the new building of brick.

The first issue of a paper called by C. W. Woodworth and blibbar.

The first issue of a paper called by C. W. Woodworth and edited by H. P. Clay, M. D. Both genellemen have had considerable the certification of the county. It is proposed. It is published by G. W. Woodworth and because the certification of the county is generated by the certification of the county is proposed. It is published by G. W. Woodworth and because the certification of the first issue of a paper called by C. W. Woodworth and because the certification of the county is paper such account.

The Norther Chronicle, of Parraboro, N. S., is received. It is published by G. W. Woodworth and because the certification of the county is paper is "Independent, not neutral," but a decided by H. P. Clay, M. D. Both gene in ewapper work. The paper is "Independent, not neutral," but the decided by H. P. Clay, M. D. Both gene in ewapper work. The paper is "Independent, not neutral," but the decided by H. P. Clay, M. D. Both gene in ewapper work. The paper is "Independent, not neutral," but the decided in limitation, only in keeping with the spirit of the times.

Municipality of Westmorland. Jan. The Committee on Banking consultation with reference to the Count in the class of the far was a deficit, the parish should be reacceded that Collector to the time same beautiful beautiful that the care and the legislation with reference to the time same bank as definite to the time far was a deficit, the parish should be reacceded that collector the same bank as a deficit, the parish should be reacceded that collector the same bank as a deficit, the parish should be reacceded to the consultation to 134. The Maintenance and the consultation with reference to

Mr. Malonson said he did not ask would make scarcely six such farms as this.

-The New York Sun in a recen issue gives us some interesting figures concerning its expenses and The Warden doubted whether it could be re-assessed. When a man has paid, can he be made to pay a second time?

done their duty.

circulation for the past year. There were bought 4,760,435 lbs. of paper at a cost of \$800,492.90. On this second time? were printed 55,536,036 copies of the Sun, including, of course, both the daily and weekly editions, being The collectors ought to have books as serily as possible as a serily as possible as the sun increase of more than five millions.

215.00 was great loss of time in the spring.

The collectors ought to have books as early as possible and ought to commence at once and collect sharply, to avoid loss by floating population drifting away.

The Warden drew the attention of the Council to order, 89 passed in 1878 that the Council do not tecognize the payment of any charge by Justices for the collection of rates of the paper. The daily sells for the collection of rates of speculation and run the risk of personal less.

Mr. Avard moved that this order

MANHOOD HOW LOST, #HOWERESTORED

We have recently published a New Edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous lity, Mental and Physical Incapacity, diments to Marriage, etc., resulting excesses rom excesses
Price, in a sealed envelope, only

Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the use of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every siferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This Lecture should be in the hands of every youth and every man in the land. Address

In this course of lectores we can only hope to take a general survey of the various broad fields of attudy which lie spread before us. Merce othings which is spread before us. Merce othings which is spread before us. Merce othings which lie spread before as well as a compound of the straingly a continue to the work of the various broad fields of attudy which lie spread before us. Merce othings which lie spread before as a spread before the color is formed or small quantity of its action, and this is the last feeting the colories are shown or come of swall and an imasle, plays an important part in the more of the state of the colories and the colories of the state of the colories of the colories of the state of the colories of

is a heavy, colorless gas having a strong pungent odor; it is called sulphur dioxide, but is more familiar- ly known as sulphurous acid. It dissolves readily in water and gives those who have not studied chemthe water a sour taste; water containing sulphur dioxide turns the way, cuts like cheese, the freshly taining sulphur dioxide turns the juice of purple cabbage red. From this it is concluded that the water contains an acid, sulphurous acid. This acid bloaches vogetable colors, and is commonly used for bleaching straw. The color returns after a time owing to the oxidising action of colors. It therefore the composes the water hydrogen of Goods, Boots and Shoes, Rubbers, Crockery and time owing to the oxidising action it decomposes the water hydrogen.

of the air. In bleaching with being set free and sodium taking its sulphur dioxide the article to be piace. Thus is formed a compound bleached must be moist. Some mineral substances can be desodium, sixteen of oxygen, and one thinks the substances can be desodium, sixteen of oxygen, and one colorised by means of sulphurous of hydrogen. Caustic soda, as this acid. For example, this dark red is called, dissolves very readily in scid. For example, this dark red solution of iodine is immediately deprived of color when I pour into it some water containing sulphurous acid. Sulphur dioxide is injurious to plant and animal life, hence its value as a disinfectant. The fames from burning sulphur can thus be set free at the same time. Thus, if acret effect in preventing investigation burner and water is sufficient to the same time. used with great effect in preventing mixed with hydrochloric acid, comthe spread of those infectious diseases which are such a scourge to the hydrogen of both the base and hunanity, and which seem to be very prevalent in this region. Under the base to form water. Wahing the base to form water.

for preventing the loss of ammon

and animals. It is a clear,

ordinary mannres.

prevalent in this region. Under certain circumstances sulphur combines with a further quantity of oxygen and with hydrogen to form a very strong acid, known in commerce as oil of vitriol. Its chemical name is sulphuric acid, and it is compesed of sixteen parts of sulphur, thirty-two parts oxygen and one part hydrogen. It is a very powerful acid, and quickly eats its way through skin and flesh. Water by diluting it retards its corrosive of the base to form water. Wahing soda is a carbonate of soda (sodum) and baking-soda is a carbonate of soda (sodum) bonate, bi-carbonate of soda (sodum) and baking-soda is a carbonate of soda (sodum) bonate, bi-carbonate of soda (sodum) bonate, bi-carbonate of soda (sodum) and baking-soda is a carbonate of soda (sodum) bonate, bi-carbonate of soda (sodum) bonate, bi-carbon diluting it retards its corrosive oxygen and bydrogen, Caustic Potaction and washing soda stops it al. ash, and corresponding carbonates.

Together It is a very heavy oily Engrepolity bicarbonate of potash was together. It is a very heavy oily formerly bi-carbonate of potates.

Formerly bi-carbonate of potates when pure, but generally brown from impurities. Sulphuric acid is the acid of a great many important salts, which are soda is used for hard soap and car

Each called sulphates. For example, bonate of potash for soft. Each gypsum is sulphate of lime, blue must be deprived of its carbonic New Fall and Winter Goods, gypsum is sulphate of time, blue vitriol is sulphate of copper, green vitriol is sulphate of iron, 'Epsom salts' is sulphate of magnesium. Gypsum contains a certain proportion of water, and when heated it loss this water, becoming then 'plaster of Paris.' In 'setting,' plaster of Paris.' In 'setting,' plaster of Paris water, becoming the contains a carbonic acid, i. e. it contains the late, and when heated it loss this water, becoming then 'plaster of Paris.' In 'setting,' plaster of Paris calcium, with oxygen and carbonic acid, i. e. it contains the

combines with water again to form three elements calcium, oxygen and gypsum. Sulphuric acid is used in carbon. When it is burned in the preparation of the artificial kiln carbonic acid is driven off and offered at extraordinary low prices. manure known as superphosphate. oxide of calcium, or lime is left.

Gypsum can be advantageously When water is poured on quicklime used as a fertilizer in many cases, heat is produced, due to the chemi-both as a medium for supplying ral union of the lime and water. Slacked lime, thus formed contains sulphur to the plant, and as a means the elements calcium, oxygen, and GROCERIES, &C. reduced by the decomposition of dinary mannes.

Phosphorus is another of those ements present in small quantity, element, silicon; the oxide is silicon; Phosphorus is another of those

elements present in small quantity, element, silicon; the oxide is silicon, but essential to the life of plants and it acts as a very weak acid. light, Sand can be dissolved by heating it and animals. It is a clear, light, yellow solid, of a waxy consistency, and as everybody knows, it shines in the dark. It very readily takes fire in the air and in burning it melts and runs over the bands and wrists if it happens to take fire in the hands of a careless experimenter; burns from phosphorus are poisoned burns from phosphorus are poisoned on the stalks of grain and grasses, and can be dissolved by heating it with soda until it melts. A glassy mass is formed which can be readily also read which can be dissolved by heating it with soda until it melts. A glassy mass is formed which can be dissolved by heating it with soda until it melts. A glassy mass is formed which can be dissolved by heating it with soda until it melts. A glassy mass is formed which can be dissolved by heating it with soda until it melts. A glassy mass is formed which can be readily it with soda until it melts. A glassy mass is formed which can be readily dissolved in water, and is therefore called 'soluble' glass.' Silica is present in considerable quantity in the stalks of grain and grains and grain solution.

burns from phosphorus are poisened
wounds and the poison may get into
the blood and produce death.
Phosphorus should always be
handled under water. In burning,
a snow-like cloud of an oxide of
phosphorus is formed, and when
this is dissolved in water an acid,
the state of the most imthis is dissolved in water an acid, phosphoric acid, is obtained. Thus, as this piece of phosphorous burns and the white substance falls down into the blue liquid below, the latter is turned red. Phosphoric acid is a compound of phosphorus with oxyonomous of the phosphorus with oxyonomous of the growth, nutrition and representations of phase so that gen and hydrogen, and contains in and reproduction of plants so that every ninety-eight parts, thirty-one of phesphorus, sixy-four of oxygen the facts already learned to a study and three of hydrogen. This is the of practical agriculture. So far acid of a class of salts known as the plosphates. The one of these most In the next five lectures, PLANT LIFE important to the farmer is phosphate will be treated of as fully as pos of lime, which makes up the greater sible in such a short course.

of lime, which makes up the greater part of bone-ash. Now, phosphate of lime is insoluble in water and thus requires that treatment which converts it into the partially soluble 'superphosphate' before it can be used with the best effect as a fertiliser. This treatment is to mix the phosphate (bone ash or mineral phosphate) with sulphuric acid phosphate) with sulphuric acid converts it into the partially soluble to the satisfied us that the preparation of Messrs. T. Milburn & Co... styled Burdock Blood Bitters, as a blood purifyer tonic is worthy of the high reputation is has established among the partially soluble K. D. CORN MEAL:
