LOST AN EYE AT GOLF. Sad Accident to a Player at Bridgeport

Conn. Bridgeport, Conn., Nov. 2.-The first accident occurred on the golf course lished violinist. of the Brooklawn Country Club Wednesday. About a dozen couples were going over the links. Far in advance was Miss Susie Nash, a daughter of the late A. E. Nash. With her was Sheldon Waldo, grandson of the late Col. Frederick Fry, of New Orleans.

Miss Nash nearly fainted, and the accident drew a crowd from the club-house. Mr. Waldo was driven rapidly to his father's home on Golden Hill, but despite the best medical skill his Khama, the African ruler who was eye could not be saved.

Another Eastern Complication Is | Hair Brushes Announced.

This Time It Is Japan That Russia Is Dickering With.

Great Britain Believed to be Facing a Grave Crisis. Royalty "Doing" the Side-Shows at the Westminster Aquarium - Princess

"Harry" the Subject of Great

Public Interest. London, Nov. 2.—The war scare caused by the Hong Kong dispatch to the Times and Globe telling of the railway and other concessions China is supposed to have secretly made to Russia have been replaced in the public mind by the alarm felt at the rumore from Eastern quarters that Japan and Russia have formed, or are forming, an understanding which is to result to their mutual benefit. This new feature of the complications in the East caused a really cold chill to pass down the backs of her Majesty's Ministers, and the Premier is said to be shivering still. Be that as it may, there is much uneasiness in official circles here and elsewhere, and this has sulted in the annexation of Matabelebeen reflected upon the Stock Exchange and continental bourse, causting a decided falling off in prices, particularly of Russian, Turkish and might be the front the annexation of Matabele-land to the British African colonies. King Khama made his debut with Lord Galway's hounds, and his dusky mjesty rofe with spirit and kept well Spanish securities. There seems to be no doubt that Great Britain, practically isolated, is facing a crisis of the

On Thursday the princesses tions, £105,000. went to Sandringham, where they will remain for several weeks. They were followed there on Friday by the Prince of Wales and Prince Nicholas of

SEEING THE SIDE-SHOWS. Princess Maude of Wales, on Tuesday last, acompanied by her mother and Prince Nicholas, visited the Westminster aquarium, mixing, without being recognized, in the crowds inside that popular place of amusement, and seeing all the side-shows like plain, ordinary, everyday subjects of her Majesty, to the greatest delight of Princes Maude, otherwise "Harry," who gets a good amount of supreme enjoyment out of such excursions. While seeing the side-shows the royal party paid for admission into the room where a highly intelligent animal, known as the "human horse," almost talks, answers questions by placing a fore foot on a letter, figures up sums and plays tunes on a monster sort of concertina with his feet. The princesses and the prince had to do some hustling, so great was the crowd, in order to obtain seats, and even then themselves in the second row of the

"PRINCESS HARRY." Princess "Harry," consequently, was highly pleased, and applauded vigorously and repeatedly while her mother ment. looked on, smiling gravely at the enthusiasm of the joyous princess. Prinher cousin, having known each other since childhood. The prince is an officer in the Danish navy, and has spent much of his time in the West Indies. He is fond of all kinds of athletic sports, and was the first to introduce the bicycle into the royal circle. On the other hand, Princess "Harry" is also fond of athletic sports, pastimes and exercises. She is a healthy, jovial girl, a great favorite with her intimate friends, wears a monocle, and is. generally speaking, the smartest in appearance of the daughters of the Prince and Princess of Wales.

Princess Maud takes after her brother, the Duke of York, in her fondness for incognita, has actually been seen on the top of an omnibus, and once spent a fortnight as "Miss Mills" on a visit to some friends at their "Harry" enslaved all the young men of the party, to whom her identity even now remains a secret. She is a skillful horsewoman and fisherwoman, a clever photographer and an accomp-

FOX-HUNTING BEGUN.

Fox-hunting began generally on Fri-

day, though there were several notable exceptions. Lord Linsdale, for instance, announced that owing to the Miss Nash was preparing to make a long drive for the north hole. Just as opening meet of the Quorn Hounds, she swung her lofter young Mr. Wal-which, as usual, was fixed to take do stopped to adjust the ball on the place at Kirby Gate, was postponed T. Miss Nash did not notice his move- for a fortnight. Mr. Foxhall Keene ment. She made the stroke, but missed and other well-known Americans have the ball, the lofter striking Mr. Waldo taken houses near Melton Mowbray, in the left eye and temple. He fell and will hunt with this pack. Owing chiefly to the agricultural depression several packs of hounds have recently

so friendly to the British during the

GERMANY'S ASIATIC FLEET. Berlin, Nov. 2.—The German Asia fleet has been ordered to concentrate at Swatow and Amoy. The fleet consists of the barbette ships Kaiser, Iron and Princess William, the cruiser Cormoran, the corvette Arcona and the

gun boat Iltis. DOWN ON ARMENIA. Constantinople, Nov. 2. - Advices from Marsavon, Asia Minor, show that the trouble which was anticipated by United States Ambassador Terrell, in a dispatch to the State Department at Washington, in August last has culminated in an attempt to burn the American college there. It is added

that the would-be incendiaries have not been discovered.

The agitation against the Armenians at Marsovan began about a year ago, when a number of pupils of the American College were expelled because their fathers were suspected of being implicated in the Armenian movement.

This caused suspicion to fall upon

the professors of the college, five in number, and two of whom are Amerithe best they could do was to locate cans. President Tracy and Prof. Riggs, of the Marsovan College, were specially disliked by the revolutionists, and their lives were threatened for having consented to the expulsion of the Armenian students suspected of being in sympathy with the revolutionary move-

BURNED AT SEA.

Queenstown, Nov. 2.-The Cunard cess "Harry," since the announcement Line steamship Campania, from New of her engagement to Prince Charles, York on Oct. 26, which arrived here Denmark, has been the subject of yesterday morning, reported that on much additional interest to her many Oct. 28, in latitude 45 and longitude 48, friends and admirers. From the time at 9:15 p.m., she saw a burning wood-the news became public, the princess en, three-masted vessel. The Cam-has received a stream of congratulatory telegrams from all parts of the she had been deserted. It is supposed world. The engagement is entirely a that the crew of the burned craft had love match, she and Prince Charles, already been picked up by a passing vessel. Miss Calhoun, a second cabin passenger, died during the passage from New York.

TURKEY TROUBLED. Varna, Bulgaria, Nov. 2.-According to advices received here from Constantinople, a most serious condition of affairs exists there. There seems to be no doubt that the report of discovery of a plot against the palace on Monday evening last is correct, and three Mussulmans are said to have been arrested at Stamboul in connec-

tion with it. In addition several houses have been searched and a quantity of arms has been seized. In Anatolia the feeling of discontent against the rule of the Sultan is becoming so marked that important events are expected to take shortly. The fusion of the Mussulman country house, where, it is reported, and Armenian committees is believed to be imminent, and it is said upon good authority that a joint revolutionary manifesto will shortly be issued. The Turkish Government is aware of the serious aspect which affairs are taking and it is evident that desper-

to provide for the calling out of army,

ate efforts are being made at Con-stantinople to raise money with which

Moncton, N. B., Nov. 2.—A fatal shooting affair occurred Thursday night near Richard's Mill, Chatham. A boy named Joe Doherty was handling a gun carelessly, when it was taken from him. He recovered the gun again, and loading it with slugs, came up to those who took it from him and fired at one of them, a lad named Arthur injuring him so that he died shortly afterward. Doherty is a regular "don't care" lad. He is said to have caused the death of another lad this summer. He is 17 years old. He has cleared out, taking a horse and carriage belonging to his uncle.

THE HYAMS CANNOT SLEEP. Toronto, Nov. 2.-Since the time for the second trial of the Hyams brothers has begun to draw near, the twins have been suffering excessively from insomnia. Ever since their arrest they have been the victims of nervous collapse in a measure, and after the fiasco of last May they became worse. Latterly, however, they have hardly slept at all, such is their anxiety as administered to an unusual degree, according to the statements of a well-known med-In Burford Mr. Van Horne is retir- ical man, but with very little result. Repose has for a month back been almost unknown to them.

> THE CULTIVATION AND PREPAR-ATION OF BLACK TEA.

In China and Japan tea is mostly cultivated in small patches by the pea-santry, who gather the leaves, and prepare the tea in their huts, in a very unfastidious manner. In Ceylon the cultivation and manufacture of tea is very different, and it may be interesting to give a brief account of how good tea is made:

The tea bushes are planted in lines, at regular distances, in drained land, which is regularly weeded. Every year height of about two feet, and eight weeks after the pruning, the first "flush" of new leaf is plucked, and the "flushes" re-occur every ten days. Coolies, with a basket attached to their girpluck the bud, and a couple of tender leaves. Twice a day the leaf is weighed and taken into the factory, where it is at once spread very thinly on trays to wither. The withered leaf is then placed in the rolling machine, and in about an hour it has become a moist mass of twisted leaves, technically called the "roll." It is then placed in trays to ferment, during which process it changes from a green to a copper color. The strength and flaof the tea depend to a great extent on the fermentation (and the careful treatment of "SALADA" Ceylon Teas during the fermentation is the chief reason they excel all others). The next process is that of firing. The leaf is placed in large iron drying machines until it is thoroughly crisp. It is then sorted by being passed through sieves

of different Aesh. All this work in the preparation of "SALADA" tea is done by machinery, whereas in the different China teas the preparation is entirely by hand, the rolling being done by passing the leaves between the palms and fingers of the hand, and very often the feet

are used for the same purpose.

Tea of any kind rapidly deteriorates board of the animal amounted to \$13 80. It was sold by auction on the market there Thursday and brought \$15 80.

John Elliott, an employe at the Wingham chair factory, while engaged at a rip-raw the other day, was struck when exposed to the air, therefore it is always well for consumers to get is always well for consumers to get their tea in sealed lead packages, fine their tea in sealed lead packages, fine thereby retaining all its delicate aroma. "SALADA" Ceylon Tea is sold only in sealed lead packets. Your grocer likely keeps it or will get for you if the values your trade.

ers' Bank, Guelph. The ceremony was Miss Braden, Ottawa, in a carefully

cial W. C. T. U., occupied the chair, and Rev. Dr. Smith opened with pray-er. Mrs. Fenwick rendered a solo very sweetly. Mrs. Boole, on being intro-duced to the audience, said:

We read in Judges, iv., 1 and 2, that of iron, and said: 'If thou wilt go with me I will go, but if thou wilt not 'Why do those women go out against it?' This is the work of the men, of the churches of today—let those women stay at home.' I want to say, if the churches and our brethren had gone forth to lead the Lord's host we women would not have heard God's call as they heard it on the day of the great mustering of the hosts to do battle in our woman's temperance cru-sade."

The speaker then dealt with the excuses of Reuben, Dan, Ashur, etc., given why they did not go up to the help of the Lord against the mighty, and with the curse pronounced on re-creant Meroz, and compared them with the popular excuses given today for not coming up to the help of the Lord against the might rum power—the enemy. She brought forth her strong reasons for resisting this oppressor. First, because the liquor traffic was an enember of the strong reasons for resisting this oppressor. First, because the liquor traffic was an enember of the strong reasons for resisting this oppressor. my to the home. It destroyed the loved statements to any one who may call ones in the home, and the foundations of home. Four thousand women in These pills are a positive cure for According to Mr. Hood, of Sunshine, who supplies a weather report to the Bureau of Industries, the rainfall in Huron in 1894 was 26.12 inches, and the snowfall 62.4 inches.

Mrs. Mary R. Campbell, aged 30, wife of Mr. John Campbell, assessor of Yarmouth, died Thursday night at the residence of her father, Mr. Donald which the Methodists do. Deborah did not want to go against the enemy, but Barak would not go alone. So, gentlemen, we women will go right along, not ahead of you, but by your side.

Mrs. Boole closed with a powerful appeal to stand for God, home and native land. The lecture was listened to with

most intense interest. FRIDAY MORNING.

Mrs. Gordon conducted a consecration service from 9 o'clock to 9:30. A letter was received from F. S. Spence, of the Dominion Alliance, asking that the convention appoint dele-gates to attend the prohibition convention, to be held as soon as the decision of the Privy Council is known. The convention arranged for the required number of delegates.

Mrs. Rockwell rendered a solo, and also read her paper on "The State also read her paper on "The State Half an Orphan." The latter was fully discussed. The plan of work and resolution committees also gave a partial Noontide prayer and adjournment followed.

FRIDAY AFTERNOON. A memorial service, conducted by Mrs. Gordon, was deeply impressive. Resolutions of sympathy were forwarded to members of the W. C. T. U. recently and suddenly bereaved. The plan of work committee reported fully, many valuable measures were adopted, after which the eighteenth an-

Neglect of Kidney Trouble-South American Kidney Cure is a Remedy that Quickly Eradicates Kidney Trouble in Any of Its Stages.

It is an unfortunate blunder to allow disease of the kidneys to obtain a hold in the system. The disease is of that character that leads to many serious complications which too often end The strong point of South American Kidney Cure is that it drives this disease out of the system, whether taken in its incipient stages or after it has more clearly approached a chronic condition. The medicine is a radical one, easy to take, yet thoroughly effective, and what is encouraging to the patient, the results of its use are made manifest almost immediately. As a matter of fact, medicine will relieve distressing kidney and bladder disease in six hours.

James Dowing, a patrolman of the New York police force, can speak the Chinese language. He learned it while doing duty in the Chinatown of the

A LIFE SAVED .- Mr. James Bryson Cameron, states: "I was confined to my bed with inflammation of the lungs, and was given up by physicians. and was given up by physicians. A neighbor advised me to try Dr. Thomas' Eclectric Oil, stating that his wife had used it for a throat trouble with the best results. Acting on this advice, I procured the medicine, and less than a half-bottle cured me; I certainly believe it saved my life. It was with reluctance that I consented to a trial, as I was reduced to such a state that I dcubted the power of any remedy to do me any good."

Beached a Stage When He Was Unto Turn in Bed Without Aid-Hundreds of Dollars Spent in the Search for Relief Dr. Williams' Pink Pills Again Prove Their Wonderful Health-Giving Power.

(From the Kentville, N. S., Chronicle.) Mr. David O. Corkum, of Scott's Bay Road, is the owner of one of the best farms in King's county, N. S., and is one of the best known farmers in that section of the country. He is na-"Organization—The County Union, Its Furnishings, Needs, and Its President's Duties," were dealt with in his place. Last winter he spent the whole season in the lumber woods was strong and healthy and worked followed was full of interest.

"The 'Y' Union" was taken up by always been so. In fact it is the wonder of the neighborhood that he is able prepared paper.

Miss J. McArthur's paper on "Trea-Bay road, Mr. Corkum lived at Chessurers' Mistakes' was brim full of valuable hints, amusing and instructwas a great sufferer from rheumatism, which affected him in such a way that he was unable to do manual labor of any kind. About this time he moved to his present home, but he could not get a moment's respite from the effects of his disease. Feeling that he must get well at any cost he had his old doctor brought from Chester to his relief, but he was unable to do anything for him. He tried many kinds of medicine, hoping to receive benefit, but of no avail. Being determined not to die without a struggle, he had doctors summoned from Halifax, but still Israel was oppressed twenty years by Jabin, King of Canaan, and they cried unto the Lord for deliverance. God called Deborah, that she should not only judge the people, but lead them on to victory and deliverance from their mighty oppressor. Deborah did not partial paralysis of that limb, rendervictory and deliverance from their mighty oppressor. Deborah did not want to go. The Lord's army headed by a woman! We women do not want to do disagreeable things. And she said to Barak, 'Up, for the Lord hath delivered Sisera into thine hand.' But Barak was afraid of Sisera's chariots could not walk. Still the doctors could not walk. Still the doctors waited upon him, and still he took their medicines, but with no beneficial result. During the time Mr. Corkum paid out several hundred dollars in hard cash for doctors' bills and medihard cash for doctors' bills and medi-cine, all of which did him not one particle of good. After lying in bed for fifteen months his case was pronounced hopeless, and he was given up by all. About this time he heard of Dr. Williams Pink Pills, and as a last resource he resolved to give them a trial. The first four boxes produced no noticeable effect, but at the fifth he began to notice a change. Feeling encouraged, he kept on, and from that time he rapidly improved, and after using Pink Pills for a period of some twelve weeks he was restored to per-fect health. Such was the wonderful story told a representative of the Western Chronicle a short time ago. Mr. Corkum is now 59 years of age and perfectly healthy, and feels younger

Without doubt London has the finest equipped Conservative club room in Ontario.

THE "CUMBERLAND." The Government car, "Cumberland," in which the Cabinet Ministers are traveling about the country, at the country's expense, was the center of ed up in luxurious elegance, and is tion has been selected for the sleeping said, 'It's a waste of soap to scrub an quarters. To have had these apartquarters. To have had these apart-ments over the wheels at either end would probably have disturbed the re- to the States for the sign by which the pose of the Government members who travel around therein. The third section is fitted up with divans and richary everyday railway coach seats there are none.

THE PUBLIC MEETING. The auditorium of the building easily proved equal to the task of holding all badges and bouttonieres, and stationed each forward corner under the gallery. The main portion of the gallery was well filled, while the sides would have was naturally adapted for the purpose. Besides files extending half-way round the long room the place is supthe crowd. Some scattered plaudits followed their exit through the door leading to the stage. The audience was promised land. tively small. At 8:20 the curtain went erly with No. 1 Company, Mr. Griffith up, and those on the platform were cupied the chair, and on his right were office of Mr. Dillon, permanent situated Hon. George Foster, Major Beattle, John R. Minhinnick and A. B. Ingram, M. P. On Mr. Gray's left were Hon, Messrs, Haggart and Monreading-room is adorned with a visit- tague, Sir John Carling, Dr. Roome ors' book, which was well patronized and Rufus Stevenson, ex-M.P. The vesterday. In the room adjoining balance of the platform was largely devoted to the accommodation of visiting Conservatives.

> THE CLUBROOM OPENED. President Gray, in his opening remarks, described the various rooms of the club and the purposes to which they were to be devoted. He created a smile when, in referring to the billiard tables, he modestly stated that experts told him that they were the best made. A remark that elicited most applause was one to the effect that intoxicating liquors were to be strictly forbidden in the rooms.

For Sir John Carling was reserved the pleasure of declaring the club rooms open. He was given a rousing standing reception. After a few generalities, Mr. Carling touched upon politics, advocating the National Policy-a Canadian policy.

"Our opponents in this country have no policy," said Sir John. "No policy that they adhere to. One time they talk of free trade like it is in England. Another time they talk of unrestricted reciprocity; another time they want to discriminate against the motherland. itors were for the most part content All these things have been discussed the gymnasium upstairs, where an in Parliament and in the country, and they have abandoned one after the other. But the Conservative party have strictly adhered to the policy by both ladies and gentlemen until 6 which was inaugurated in 1879, which is for the benefit of the workingmen, the manufacturer and the agricultur-ist." (Applause.)

st." (Applause.)
Mr. Carling spoke of the prevailing low prices of farm products, and said that farmers could not expect to get high prices when low prices prevailed in the United States and other counwill be to the country at large." He then, amidst applause, formally

SHORT SPEECHES.

Mr. Beattle made a short speech. He was extremely well received, and gave credit to the younger members of the association for the greater portion of the work in connection with the fitting up of the new rooms.

A. B. Ingram, M.P., devoted himself

chiefly to Mr. Laurier. "I ask," he, "any man or woman in this house tonight who has read the speeches of the Liberal leader if they can tell me whether he is in favor of free trade as they have it in England, or whether he is in favor of revenue tariff, or what he is in favor of

LAURIER ALWAYS WELCOME. Now, sir, I see that Mr. Laurier has ence to this. Our position is as clear recently been visiting the Province of Ontario. As a citizen of the Province of Ontario I am always honored to see Mr. Laurier come here. We are always Conservative Government upon the Manitoba school question? Mr. Laurier joyable to the participants. It was glad to greet a gentleman of so pleas-nicely managed, and the credit is due ant a manner and of so pleasant a was informed last year in Parliato the following committee, many of word of speech, and we are always whom, however, were members in an honorary sense merely:

I. R. Minhinnick, Major Thos. Reattle. Isaac Waterman, T. H. Smallman, Ed Flock, Fred Darch, Clare Powell, W. into the Province of Conservative I may and his content of the find that can be fished from words, who can tell and when can be fished from words. W. into the Province of Ontario-I may and his party stand upon that quesinto the Province of Ontario—I may say to you, that I hope he will come again and bring Mr. Longley and party, and fetch along Sir Richard Cartwright. And I hope he will exhibit his kaleidoscopic policy which he has been exhibiting in the past, for just a few such visits from Mr. Laurier to frame a policy for us and Mr.

A CHALLENGE. Referring to the Liberal assertion, that the Government would break the constitution rather than risk a bye-election, Dr. Montague said: "Well, sir, we shall have this bye-election, and I specially now, as the youngest member of the Government, extend to Mr. Laurier an invitation to come along I am somewhat selfish in that, because, if I remember correctly, Mr. Laurier never yet took part in a bye-election in the Province of Ontario where we did not win by a large majority. (Applause.)

The speaker then denounced Mr. Laurier's companion in his recent tour, Longley, Attorney-General Nova Scotia, as a man who had conducted a Nova Scotian campaign on a platform of secession and disruption, and one who had no faith in the

"I won't discuss public questions divided into three apartments. One of these is devoted to the kitchen and in Canada," said the doctor. "It puts dining room, and a cook and attend- me in mind of a statement of a colleague in the House of Commons who

> The excellent repast served by the host, Mr. C. W. Davis, fortified the guests for a long programme of speeches, lasting until 4 a.m. The Queen's health was drunk enthusiastically, the audience singing and the Seventh Band playing the National Anthem. The Governor-Gen-

eral and Lieutenant-Governor were

likewise honored. The toast of 'The Army and Navy' was coupled with the names of Lieut.-Col. Smith, Lieut.-Col. Lindsay and Major Beattie. Lieut.-Col. Smith said that whether members of the militia called themselves Conservatives or Reformers, they in reality were Conservatives, because they were upholders of crown and constitution. Lieut.-Col. Lindsay congratulated the Young Conservatives on their achievement, which, he said, inaugurated a movement that

less in the future. Mr. Beattie, the candidate, was received with cheers, and spoke barely a ing the greatness of Canada, taking dozen words—his sole speech for the into consideration the country's youth, evening. He thanked the audience for its greeting, and felt assured that the Europe. The point he strove to make Conservatives would do their duty

"The Dominion Cabinet" brought cheers. He said he wished his colleague who was to follow him had the sacrifice himself for the party's sake. Mr. Foster referred to the laboriousand this affair was one of them. He congratulated the Young Conservatives of London on their enterprise. club on having such singers as he had heard. The power of song was a mighty factor in politics as well as in the church. He believed the Secretary of State had inaugurated a movement today among the Liberal-Conservative policy was introduced women which would make them a power for good in the party. When the old flag went up, and the battlecry was sounded, as it soon would be, he hoped every man would be a soldier. Hon. John Haggart was received with cheers and song. A country never was corrupted by its leaders, he said,

graphical, racial and religious conditions, and by mutual conciliation and referred in eulogistic terms to Mr. their party and country than the memcompromise was it possible to become Foster, than whom, he said, no one had a broad and tolerant federation.

ever filled the position of Finance Minister more capably. The party had been accused of piling up the debt, but it was really nothing, when it was considered what the country had got for it. Sir John referred to the steamship line to Japan, and predicted that they would soon have a fast line between Quebec and Great Britain. He touched on the Manitoba school question, and said that in 1857 he came out in favor of separate schools, and that was a part of Sir John Macdonald's policy which was embodied in the Act of Confederation. "If the minority in Manitoba have a grievance, and the highest tribunal in the land has decided that they have, then we, as Canadians, should say we will remove that grievance and will put you on a footing that will be satisfactory to the Sir John lauded the protective policy, and claimed that while Mr. Foster had been trying to lower the tariff, the United States had been trying to put up the duties, and thus We force Canada into commercal union or annexation.

Dr. Roome, M.P., also highly praised Mr. Foster's financial management and the eloquence and ability of "Canada's

Mr. Joseph Marshall, M.P., said there were three or four elements in his constituency, and he meant to combine them. He assured the audience that place. The members had nothing to do all day, worked all night, and slept between times.

> Mr. Ed. Flock sang to a well-known air an original composition, of which the chorus ran:

"We are here, boys, to stay, And the town is our own; And the band plays on. The Fleet is disbanded, The Horse Marines flown; And the band plays on. With grief they are loaded, The boom is exploded, And the band plays on. For the old Tory party Is still hale and hearty,

And the band plays on. Mr. Flock was warmly applauded, not only for his vocal ability, but for the fine poetic fancy and rare felicity of expression which this lyric displays. OUR MANUFACTURING INTER-

ESTS.

Mr. D. W. Karn, of Woodstock, re-

plying to the above, said they had to

thank the Government for making

manufacturing possible. The manufactured goods today were sold at half the price they brought before the N. P., so that he could not say where the injustice to the people came in.
Mr. Thomas Cowan, of Galt, spoke well, but at too great length to suit the patience of the audience. He said the manufacturers were a much abused lot. The Tilley tariff gave the same protection to the farmers' butter and cheese as it did to Karn's organs and Cowan's engines. It had banished American cheese from the country, and in addition Canada was exporting \$15,-000,000 worth a year. They had good Canadian cheese now instead of American glycerine. (Laughter.) The tall chimneys of Berlin, Waterloo, and El-mira had made a National Policy advocate of Mr. Snider, in spite of Laurier's eloquence. Mr. Livingstone did not even think it safe to go to a Grit meeting. The speaker said he was not supposed to talk politics, as he had been banished to a political house of refuge, in the shape of the postmastership of Galt.

F. A. Fitzgerald affirmed that not one in ten of the present manufacturing industries could exist if Mr. Laurier's

"THE RAILROAD INTERESTS" The railroad interests were repre sented on the toast list by Mr. Erls, of Toronto, and Mr. John Jones, of London, both of the Grand Trunk. Mr. Erls highly complimented the merchants of London. He had an idea the Grand Trunk had much to do with as long as its people remained pure making Canada—(laughter)—and to and loyal. He knew when the returns lavish all the praise on the C. P. R. nearly way constituency, and the of no worse fate for his children than

Mr. John Hughes also gave whistling

A Golden Key. What is that which I should turn to, lighting upon days like these?

Every door is barred with gold, and opens but to golden keys,"

The golden key, to which those who desire to open the door of health, should turn to in days like these, is Dr. Pierce's Golden Medical Discovery. The poor man's pence can procure it. The rich man's millions can buy nothing better.

Mrs. NEAL, of Crockett Mills, Tenn., had an attack of measles, which was followed by bronchitis and pneumonia. Her husband writes: "I feel gratified with the effect of your wonderful medicine. I can recommend it to anybody, and feel I am doing them justice. My wife was not able to perform her household duties for six months. She has used two bottles of 'Golden Medical Discovery,' and is now able to do all her work. I think it the finest medicine in the world, and I am gratefully, your life-long friend. Yours sincerely, J. B. NEAL."

The Russians have a singular method of extorting disclosures from prisoners. In their food is mixed a drug which has the effect of rendering them delirious and in this state they are watched and interrogated, when secrets are divulged.

Piles! Piles! Itching Piles! SYMPTOMS—Moisture; intense itching and stinging; mostly at night; worse by scratching. If allowed to continue tumors form, which often bleed and ulcerate, becoming very sore. Swayne's Ointment stops the itching and bleeding, heals ulceration, and in most cases removes the tumors. At druggists, or by mail, 50 cents. Dr. Swayne & Son, Philadelphia, Lyman, Sons & Co., Montreal, wholesale agents.

Pure Baking Powder 20c lb at Anderson Nelles' Drug Store.

Effective Temperance Work. Until within the last year or two temperance organizations generally have been more or less antagonistic to the reformation of inebriates by means of Gold Cure or other medical treatment, advocating, instead, moral method, the grace of God and prayer as effective measures. Dr. Talmage, the eminent Brooklyn divine, who has taken a profound interest in the problem of cure for the inebriate, has, in one of his public utterances, made the matter so clear that the dullest intellect must be impressed by the force of his reasoning. He says: "There are some things the grace of God doesn't propose to do, and this is one of them. Never let the time come in my history when I cease to extol the grace of God, but there are men who need something beside. We want the grace of God and we want surgery and we want the Gold Cure. I am mightily impressed with this Gold Cure." This opinion is being echoed far and wide by grateful thousands. Within the borders of our own province Lakehurst Institute, Oakville, is quietly, yet surely doing its good work and making people happy. Toronto office, 28 Bank of Commerce building. Phone 1163.

THEY CAME NOT.

Though Premier Bowell, Sir Chas. H. Tupper, Mr. Ouimet, Mr. J. F. Wood, Mr. Clarke Wallace, Sir Frank Smith and Sir A. P. Caron, members of the Dominion Cabinet, were announced as speakers at the London meeting yesterday, no explanations were given as to their absence. But a quarrel is reported to have developed on the question of whether or not it would be more advisable to hold an extra session of Parliament or to rush to the country at an early day. Mr. Ouimet was in Western Ontario on Friday, but returned to Quebec.

manufacturing industries of Canada. The reason why the more important members of the Dominion Government were not present yesterday, according to promise, was doubtless the fact that they have not yet fully decided what they had better say.

A POSTMASTER TO THE RESCUE. Postmaster Thomas Cowan, of Galt, was one of the speakers brought to London yesterday to reply on behalf of "the manufacturers," and to claim that the high tax policy had been a benefit

to them. Mr. Cowan's pilgrimage was a pad "break." He was so successful in taxed iron and steel, would be of enthe manufacturing line, under the beneficent high tax policy which he ers of London, as well as to their cuspraises, that he was glad to accept | tomers. an office in the pay of the Canadian | London was a prosperous manufacpeople. The office he now holds, while turing city long before the high tax he journeys about attacking one-half policy, with its tendency to centralize

If Mr. Cowan were a Liberal, he treal, was thought of as a means to would not be in office for twenty-four help a political party to power. The hours. But what is sauce for the population of the city increased at a regime, is not sauce for the Liberal gander. It is nevertheless significant that a man in the position of Mr. owan should be put forward as a representative manufacturer of Western Ontario at this time.

There were many significant ab-

RIDICULE THAT IS HARMLESS. At the London Conservative banquet

last night several of the speakers went out of their way to ridicule the members of the Young Liberal Fleet and Young Liberal Drum Corps. It pleased the talkers, and it certainly will not hurt the hundreds of the flower of London's youth who belong to these organizations.

Is it exactly in good taste for the to impugn, even by inference, at a League in Canada, with a full assortperson in command at the Barracks party banquet, the loyalty of any sec- ment of Dames, and lady personages tion of the whole Canadian people, to of lower degree, in humble imitation whom he owes his daily bread and but-

REMINISCENCES OF THE "DEAL." Mr. Montague has had some fame as the man with the gaseous style of oratory, but no doubt a good many of those who assembled in the old Mechanics Institute to listen to the speeches last night were chiefly anxious to see the to be patronized by Primrose Dames man whose entry into the Dominion Cabinet was effected by the extraordinary intrigue which resulted in driving Sir John Carling out of the Government at Ottawa. Most people who have seen both gentlemen doubtless out of court, one might comment on Last night, Mr. Montague at- maple leaf, the emblem of all classes tempted to beflatter the man thus of Canadians, as the badge of a party. treated by those whom he had served! so well, but Sir John doubtless had in in perturbation over the gaseous doclively recollection, if he did not hum tor's great scheme. The people of Canto himself, the old couplet: "It's all very well to dissemble your

But why did you kick me downstairs?' Mr. Montague, accidentally, no doubt, let out the spirit in which he and his associates have viewed the decapitation of Sir John Carling, when he said that the gathering of last night was intended to speed the parting politician (Sir John Carling), and to welcome the coming one (Mr. Beattie).

DECLINED TO TRY THE CHARGE The Toronto World of today says:

"Chief Justice Meredith sitting at the Kingston assizes has refused to hear the case against Provincial Librarian W. T. R. Preston, which he has adjourned indefinitely. The Chief Justice when leader of the Opposition in the Provincial Parliament, frequently came In contact with Mr. Preston as an onponent, and being under the impression that bias may be imputed on limit account, declined to hear the case, al- of the people in taxes though the defendant, through his interest on this debt. lawyer, Mr. M. E. Saunders, expressed his entire confidence in the judicial integrity of the judge. The plaintiff was given leave to apply at Osgoode Hall at an early date to have another judge appointed to hear the case."

The Chief Justice has acted in accordance with the suggestion of the "Advertiser," and has followed the British precedent. In this he has exercised good judgment, and is to be complimented on his resolution in the

Evidence in the Holmes Murder Trial All In.

Miss Yoke's Story of How the Prisoner Deceived Her.

Defense Decides to Call No Witnesses-A Verdict Expected This Evening.

Philadelphia, Nov. 2.—The Common-wealth yesterday, in the Holmes murder trial, offered in evidence the letters and papers, pictures, and the Holmes book, and rested its case. The defense here asked to recall Miss Yoke for recross-examination on the question of her marriage with Holmes.

"Mrs. Holmes," began Mr. Rotan, to the woman who calls herself Miss Yoke, "were you ever married to the prisoner?" 'I was; on July 17, 1894, at Denver,

by Rev. Mr. Wilcox."
"At the time of this marriage, did you know of the existence of this Willamette woman?"
"I believe I did."

"Did you know anything of any other marriage?" asked Mr. Graham.
"I heard of another."
"To whom?"
"I don't know the name."

"Gilmanton, New Hampshire."
"When you charged him with the matter, what did he say?" "He said he had received word that she was dead." "Was there any truth in the story he told you?"

"Not any truth."
"When you married him you believed you were becoming a lawful wife?"
"I did."
"Or you would not have married him?"

"I would not." Counsel for defense made objection to the admission of the testimony or

anything that did not relate to the murder of Pietzel, but Judge Arnold over-ruled the motion. Immediately upon reassembling in the afternoon, Mr. Rotan advanced to the bar of the court and argued that the Commonwealth had not proven the case, and asking the judge to take

the case away from the jury or give them binding instructions. Judge Arnold said, "I express no opinion. The jury must decide after then hear the evidence."

"Then," continued Mr. Rotan, "we must entreat your honor to grant us a continuance of at least an hour in which to decide upon a line of defense. In consequence of the lack of time to outline our course and the vast quantity of new testimony introduced."

Judge Arnold told the counsel they

must make their selection between calling witnesses or going to the jury on argument alone, but after consultation he ordered a recess of half an hour to permit them to confer with the prisoner on the question.

TWO BAD BLUNDERS.

The defense made two bad blunders

yesterday. Mrs. Pietzel was recalled to identify some articles of clothing belonging to her husband, and under cross-examination the defense attempted to show that she was perfectly cog-nizant of the scheme to swindle the trying to avoid arrest for her share in was ever brought against her, and that she was discharged because there was no evidence showing that she had any direct connection with the swin-dle. The question of the attorney for the defense brought tears to the eyes sympathy of all in court. When was removed from the stand and led into the corridor she was attacked by a nervous fit and her screams rang with friends and relatives. through the room.

The defense's second blunder was in endeavoring to elicit from Miss Yoke ried Thursday to Dr. Burgess, of To-the opinion that she still believed herself to be the legal wife of Holmes, but cross-examination brought out the entire story of how Holmes had deceiv- Mr. J. E. Roome's to J. Luckam's ed her in the marriage. During this store. recital Holmes became confused and hung his head in a shame-faced man-

NO DEFENSE. Counsel for the prisoner, on returning to court after half an hour's consulta-tion, announced that they would rest their case upon the evidence of Commonwealth. Mr. Rotan said they were satisfied that the prosecution had not proven the charge of murder, and they were willing to go to the jury without calling any witnesses. It was

Philadelphia, Nov. 2.—Seats in the criminal court were at a higher premium this morning than at any time since the Holmes trial began. trary to all expectation, the concensus of opinion last night and this morning seemed to be that Holmes would be acquitted. Nine out of every ten persons questioned on the subject, be they lawyers or laymen, agree that the murder of Pietzel has not been brought home to him beyond a reasonable Even bets were being freely made last night on his acquittal.

Durrant, Convicted of Murder in the First Degree.

Calls God to Witness That He Is an Innocent Man.

The Climax "All Like a Dream"-Selfpossession and Nerve Still Characterize the Doomed Man.

San Francisco, Cal., Nov. 2.-The Durrant case went to the jury at 3:25 p.m. yesterday, and the prisoner was found guilty of murder in the first

degree. San Francisco, Cal., Nov. 2.—Theo-dore Durrant, convicted of murder, is the same self-possessed, quiet, ironnerved man that he has been while on trial for his life. He still maintains his innocence, and after being taken back to jail from the court room said to a reporter: "They say that my dear little mother screamed when the verdict was announced. It's a lie, It's all like a dream to me. The first thing I re-membered was that her arms were around my neck. Everything else was cruel, so sudden, so harsh. I felt safe in her arms. I could stand any injustice, any wrong, but for my mother and sister."

"What did you want to do or say just after the verdict was rendered?"

"I wanted to get up and shout my in-nocence. Before God, I am innocent of the crime. I wanted to get up and call God to smite me where I stood, if my heart and conscience were not as pure as those who were howling with joy that I had been branded as a murderer. I told everything honestly and fearlessly when I was on the stand. I even told things that appeared against me. Do you suppose if I were guilty that I would volunteer the statement about the stranger who approached me. I told it because it was true; I told everything that I could re-collect. When I was first arrested I gave my statement, and all I have said since has been materially the same. I would have got up yesterday, but my mother, several friends and the chief failer closed in around me and held me down. Even so, I do not know why I did not scream my protest above it all. But I have within me the consciousness of my innocence, and I shall not break down. I feel the way must clear and I will be vindicated at last." When asked if he contemplated suicide, Durrant said, "Never; I think of no such thing. I think that a man is a coward who will commit suicide. You can rest assured that I will never do that. I am hopeful, believe me, that the way will clear. I have kind letters from friends. My father came last evening with loving messages, and I rest in that assurance that light will

come. Attorneys Dickinson and Deuprey, who defended Durrant, insist that their client is an innocent man. They will ask next Friday for a new trial, which will probably be denied by Judge Mur-phy. Then the case will be appealed to the Supreme Court on the ground that the judge erred in a number of his rulings, during the trial. Attorney Deuprey, speaking of the trial and verdict. said: "It was a newspaper fight and the newspapers won."

MIDDLESEX MATTERS.

Gleanings From Glencoe and Pickings From Parkhill-Other Points Heard From.

Mr. and Mrs. Poole, of Lambeth, have been visiting their daughter, Mrs. F. Hooper, at Arkona. A large number of Glencoe Royal

Templars attended the meeting of the District Council in Appin. Miss Theresa Manning, of Belmont, will spend a few weeks in London Miss Summers, who for many years was a resident of Glencoe, was mar-

Sutherland, Ontario general freight agent of the C. P. R.; W. B. Lanigan, C. P. R. freight agent, and W. Woollatt, manager of the L. E. and D. R., met the railway committee of the Board of Trade here yesterday, and talked over freight prospects and rates.

The election of officers of the Young Liberal Club is exciting great interest, the contest for the several positions is very spirited, though exceedingly good-natured. A pleasing feature during the polling will be the rendition of good music. Those who have not tickets should procure them from J. C. Trebilcock at once. Election Nov. 7 and 8, 7:30 p.m. to 10:30 p.m. each night.

-Small boys did a good deal of damage in the southern portion of the city on Hallowe'en. They tore down fences, removed gates, damaged doors, broke glass-and generally escaped the We have a specially large stock of stylish shoes, all good wearers, all rison's property at Grey and William at moderate prices. We don't have to ask high prices, because our expenses are not so great as those who and stringing them to telephone poles. simply sell shoes. A shipment of One English street resident had several valuable plants torn up by the roots, the celebrated Moloney Bros. while another had his boulevard dam-

—The members of the session of the St. Andrew's Church, and the board of managers, together with their wives, were entertained by the pastor, Rev. Robert Johnston and Mrs. Johnston, at the manse last night. The home was tastefully decorated, refreshments were served, and a very pleasant sociable evening was spent. The affair was much appreciated by all the officers of the church and their wives, and as one of the elders remarked, "Such meetings will have a tendency to promote sociability among the mem-

bers of the church.' -There was an Indian wedding on the Oneida reserve the other evening, and among the guests were two bucks named Gahazi Doxtater and Albert C. Johns. Some of the guests had some fire-water, which was passed around rather freely and caused some trouble between the two above named. On the way home Doxtater was overtaken by Johns and accused of helping another Indian to give him (Johns) a thrashing. Johns is alleged to have "got even" by knocking Dextater down and kicking him in the face and head. At any rate, Doxtater, from his shoulders up, is black and blue, and he feels so sore

ASSESSING THE C. P. R. At the last meeting of the court of revision, a number of cases were left over to be settled by the chairman (Ald. Armstrong) and Assessment Commissioner Grant. These have finally been disposed of. The C. P. R. were assessed for \$2,000 on personalty, which the company declined to agree to, saying that they were not legally liable. The court of revision offered without pre-judice to compromise for \$500, but this was also declined. The assessor has served upon the company notice on their city real estate, including tele-graph poles, instruments, etc., making a total of \$2,000, and the case will now go to the judge. The insurance cases were settled upon a basis of 10 per cent upon their maximum city earnings. Thus the Standard Life will pay upon \$1,500; the Sun Life upon \$1,200, and the London and Lancashire upon \$300. This winds up the business of the court of revision for the year.

35n zywtyw 58u A NEW CLUB.

Name Suggested for a New Social Organization in London.

London (Special), Oct. 28.-It has been facetiously suggested that a new social club in process of organization in this city should be entitled "The Dodd's Kidney Pill Club" as the present members are all enthusiastic advocates of that remedy and in common with many other citizens declare that in all cases of kidney trouble no other agent has been found so completely effective. Most Londoners have at their fingers' ends the particulars of the many marvelous cures through the use of the specific. In every drugstore in the city the medicine is kept in large quantities and warmly recom-mended.

Connoisseurs of driving patronize Overmeyer's livery, Richmond street north, as he has only the latest style

"My six-year-old daughter, Bella, was afflicted with eczema for 24 months, the principal seat of eruption being behind her ears. I tried almost every remedy I saw advertised. bought insumerable medicines and soans, and took the child to medical specialists in skin diseases, but without result. Finally, a week ago, I purchased a box of Dr. Chase's Ointment, and the first application showed the curative effect of the Remedy. We have used only one-sixth of the box, but the change is very marked; the eruption has all disappeared, and I can confidently say my child is oured. Latest on Dairy Produce. The shipments of butter continue very heavy from New York, 19,090 packages being shipped from that port last week, and the engagements for this week are already heavy. From Montreal the shipments are expected to be large, as we hear that Messrs. A. A. Ayer & Co. are putting out about 6,000 packages. Regarding cheese, it owned up to the time of his death, and may be stated that while the shipments from Montreal last week were Neil leaves a wife, but no children. In 117,000 boxes, those from New York politics deceased was a Liberal; in rewere only 3,652, which seems to bear out the statement of English houses that Great Britain would have to depend upon Canada for her outside requirements It may also be stated that a large proportion of last week's heavy shipments of cheese from this

Liverpool, Oct. 19.—We have this week Canadian apples ex the Angloman, Parisian and Nessmore, all of which landed in exceptionally high prices. The demand now for the imported apple is very keen and active. The English fruit is now practically off the market, as we foreshadowed in our annual circular, issued in August ast, would be the case about this time. We are now prepared to handle any quantity at a satisfactory price to all concerned, and we advise regular shipments to Liverpool, Glasgow, London, and a few good colored apples to Hamburg. We cable our Mr. Vaughan, of Montreal, very fully after every sale, and he is therefore in a position to give you the exact market prices on same day. We quote you for good sound apples: Kings, 22s 6d to 23s 6d; Greenings, 15s 2d to 17s 3d; King Pippins, 17s 6d to 18s; Blenheim Pippins, 18s 9d; Holland Pippins, 14s 3d; Colverts, 15s 3d; mixed varieties, 18s 6d, 14s, 15s and 16s 6d.

J. McKITTRICK & CO.

Liverpool, Nov. 1.—The consignmet of apples,

Liverpool, Nov. 1.—The consignmet of apples, in all 5,733 barrels, brought here by the steamers Scotsmsn and Numidian from Montreal and Quebec and Catalonia from Boston, were sold here at auction today. Baldwins brought from 12s to 16s per barrel; Greenings, 11s 9d to 18s 6d: Kings, 20s to 1s 6d; Spys, 15s 6d; Newton Pipnins 14s to 16s.

pins, 14s to 16s.
London, Nov. 1.—Part of the consignment of 10,288 barrels brought here by the steamer St.
John City, from St. John, N. B., and Halifax, was sold here today. The prices obtained were: Ribstons, 11s to 13s; Kings, 12s to 15s; various,

Argentine Butter.

Further shipments of Argentine butments are expected in London. Considering that Canadian creamery butter was quoted in Liverpool at 93s to 97s 6d at the time the above sales of Argentine butter were made, the finest quality of the latter must have been very fine.

Immense Profits In Retailing Cheese.

An instance of the immense profits made by retailers of cheese in Great Britain has been furnished by the firm of Jones, Dickinson & Co., of Cardiff, which has been clearing £10,000 sterling a year by retailing cheese; and their to 8 1-2c, laid down in Cardiff, leaving a splendid margin of profit. There seem to be bigger profits in retailing cheese than speculating in Kaffirs.

This week's freight rates are complained at the police station this piano duet—Homage a Hande......Mos complained at the police station this morning that he feared his wife had morning that he feared his wife had deserted him and gone with another man. He appeared to be all broken up, and told Police Court Clerk Moule that he felt like blowing his brains out. The police made inquiries, and Detective Nickle soon learned that Mrs. Walters had left town for the east at 4:30 yesterday afternoon with Wm. Martyn, a bricklayer, who had until two months ago boarded at Walters' place. He had a row with Walters at that time, and appeared in the Police Court on a charge of drunkenness and disorderly conduct. He owed a big board bill, Walters said, and on the Saturday night in question came home drunk, and broke things generally about the house. He kept away from the place after the row, and yesterday Mrs. Walters also disappeared. Her husband tells the police that a quantity of jewelry is missing also. Mrs. Walters is a woman of about middle age, and has no children. MINISTERS VISIT PORT.

Hon. George E. Foster, Minister ofr Finance, left for Ottawa, this morning. Hon. John Haggart, Minister of Railways and Canals, and Dr. Montague, M.P., went to Port Stanley at 9:30 at the invitation of the lessees of the London and Port Stanley. A special train was made up, and the visitors were accompanied by Mr. John Bland, president of the Board of Trade; ter have been made to England than those reported by us two weeks ago, sales of which were made at 87s 6d up to 105s for medium to fine. Other shippany. At St. Thomas a party of about fifteen joined the train, included among whom were Messrs. Green, Campbell and Stevens, prominent manufacturers. At Port Stanley the local Board of Trade and prominent citizens were waiting at the station to honor the visitors with an address of honor the visitors with an address of welcome. The residents were somewhat surprised to see the train steam past the depot, and stop at the wharf, but they walked the several hundred yards intervening, and accomplished their purpose. The Ministers made short replies of a general nature. They then viewed the harbor without falling in, owing to the defective state of the f120,000. The above firm has been selling cheese over the counter of late at 12c per pound, and buying them at 8c of the road and merchants generally want the entrance deepened to four-teen feet if possible. The Ministers are said to have made definite promises that the matter would be attended to. The party returned at 11:30 a.m., and spent this afternoon visiting the works of Mr. John McClary and several other manufacturers. They left for the east at 4:30 in their car of state, the Cum-

berland. MRS J. B. HICKS, DECEASED. The funeral of the late Mrs. J. B. Hicks took place yesterday afternoon BARGAINS! to Woodland Cemetery, where the remains were followed by a large number of sorrowing friends and relatives. The services were conducted by Rev. W. J. Clark and Rev. T. W. Charlesworth. The pallbearers were Messrs. R. J. C. Dawson, C. A. Kingston, J. S. Pearce, J. D. Dromgole, Stephen Grant and R. W. Sharpe. An intigrate ac-quaintance kindly furnished the folquaintance kindly furnished the following obituary of the deceased lady: "Sarah Hicks, wife of James Baker Hicks, merchant tailor, was born at Alveston, near Bristol, England, on Jan. 23, 1845. Mr. and Mrs. Hicks were married on April 24, 1864, and were blessed with two sons—James Ernest holding a responsible position in Chicago, and William Arthur, now studying engineering—and one daughter who died in infancy. Mr. and Mrs. Hicks came to Canada in 1869, and had resided continuously in the city for the past 24 years. Mrs. Hicks' religious life owed its origin under God to the fostering care of a devoted Christian mother, and in early life she was identified with the Primitive Methodist Church. After coming to the city Mrs. blessed with two sons-James Ernest

to make any critical test for life. The had begun, but stood with doubly hands and face were cold, the flesh had the unmistakable pallor of death, and the muscles had stiffened.

the muscles had stiffened. Martin looked furtively over his shoulder. It would not have surprised him if he had seen the signs of delirium in Elsie's face, to say nothing of insanity, but, unfortunately for his speculations, he couldn't see her face. Will's head was in the way.

"What a big thing it must be to be in love," thought Martin, into whose in love," thought Martin, into life that best reward for living had repeated. never come. "Huh! I wonder what "Because the come." never come. "Huh! I v we'd better do with this?"

Unimaginative as he was, the contrast here presented in this damp cavern at midnight was striking. Here was death, irrevocable, and the form head. that represented the grim monster had been unworthy to live by the unworthy tered, peevishly. uses to which he put his life. There, thing from you. within the reach of his arm, was life, buoyant and hopeful, seeing all good in the present and more in the future, two lives, each typical of what is worthy and admirable in human na-

"Huh!" said Martin non-committally, and he would have been hard put to it to tell just how he felt.
"Will," he said presently, without turning or rising, "Can Elsie walk?" "Yes, John," answered Elsie herself, and he heard her getting up. "Walk out, then," remarked Martin,

sententiously.
Will gave his friend a quick glance

awaken a shudder. But in that respect

he was much like other men.
"The black man went away," continued Elsie, "and for, oh, so long! we sat there without a word. Then Sam said he wanted water, but I couldn't stir to help him, though I would have done so, he seemed to be suffering so. Then, by-and-bye, the torch began to go out. I thought he had fallen asleep, and I think I must have fallen asleep, too. Doesn't it seem strange that anybody could sleep in such a situation. All I know is that suddenly I heard a voice whisper 'Jack!' and though I knew the voice I supposed we both would be shot, for the black man had told Sam that if he shot in the dark he would be sure to hit me. So I guess I screamed, didn't I, Will?"

She squeezed his arm and looked up with a smile. "I guess you did," he answered, and then he did shudder, for the awful impression of that instant when he thought he felt Elsie's body and heard what he supposed must be her death-

cry, was strong upon him. It was 2 o'clock when Martin and Sam Springer, capering about with all the jolly excitement of schoolboys, lit a pile of brush and refuse boards on Will dropped his gun across the body the plowed ground near the Warren of the man who lay before him, stag-gered over it, and fell rather than soon began to hurry along the road from the corners to help Mrs. Warren rejoice and hear Elsie's thrilling story

into hysterical weeping.

The young man himself was sobbing, and there was an extraordingary lump strength of the mine, and was naturally much distressed at the news of his arrest, but when she saw the fortitude with which her mother bore a blaze from a pine knot that he had brought into the cavern in his pocket. He succeeded after several efforts, and it was that her father, of all men, set the crude, sputtering lamp upon a could be guilty of crime, she ceased to projection of the wall and turned his be anxious. In a few hours, she was back to the lovers. Then for the first certain, her father would be released, time he saw the form of the man lying and her sorrow was limited to regrets

> It was a quaintly strange gathering that was attracted to the house by the bonfire. A good many came only part-ly dressed, and when they heard how one of the mysterious scoundrels was one, was still at large, some of them hurried home again, fearing lest their own children might be the next victims of his extraordinary villainy. Others remained and drank coffee that Martin made at the bonfire, and so great was the confusion and excitement that even Gran'pa Kirk was disturbed by it and hobbled from his room to see what was going on, complaining volubly because he hadn't been allowed to understand a half of what had happened yester-

A half, indeed! He was not even aware that there was a sick man in the house, and he could only guess why it nouse, and he could only guess why it give him the diamond? Answer me!" was that his son-in-law had gone to give him the diamond? Answer me!" Denby early in the afternoon. Mrs. "I don't know what you mean," said Denby early in the afternoon. Mrs. Warren had been at the utmost pains to keep from him any knowledge of pa had known of Elsie's disappearance, smile. however, and of the fruitless search for her, and he had gone to bed with

his head full of early century remin-iscences of bears and Indians. He was overjoyed when he came downstairs to run right into Elsie's fore him.

arms. He laughed in a broken, cracked falsetto, while the tears ran down

"Let me alone or I'll throttle you!"

he hissed.

"There was a little girl got lost back in '23, and the Injuns carried her off and we never got her again. He! he! Marthy, do you remember?" and turning from Elsie he went directly to the spare room, and before he could be pre-

the situation, in unloosing Elsie's vented he had entered and had seen bonds. Martin knelt over Sam Meeker. the invalid on the bed.

The man was dead. There was no need the did not finish the reminiscence.

"Why didn't ye tell me?"
"Hush, father," said Mrs. Warren, going to him and turning him gently from the room. "You will disturb

him."
The old man was loath to go, and while he was in the room he kept his eyes on Dutton with a puzzled expres-"Why didn't ye tell me, Marthy?" he

"Because I didn't want you to know, father," replied Mrs. Warren earnestly. "I didn't want you to be troubled, too. You must say nothing, father." He compressed his lips and shook his

"That's what it is to be old," he mut-"They keep every-

He dropped into a chair in the kitchen, looking very discontented and gravely thoughtful. Mrs. Warren stood over him a moment, fearing lest he made some remarks calculated to stir questions from the neighbors.
"Where's Nick, Marthy?" he asked

suddenly, eyeing her sharply. "Nick had ought to be here. Where is he?"
"Nicholas is in Denby, on business," she replied; "we are going to send for

"H'm!" he murmured; "should think you'd better." From then until he went back to bed

seemed to warrant, and he was rather him and the lockup, Williams and ashamed of himself that he could not Jackson dashed past him, just beginning their efforts to overtake Golding and protect Mrs. Warren from whatever plan he may have formed for obtaining possession of the "President." Sam Springer did not go to bed again that night. He was always stirring by b o'clock, and an hour or so didn't matter. He and Martin gossipped about the abduction and speculated on the strange words Elsie had reported concerning diamonds. She had told how the black man and his companion were especially eager for the "Presi-

> "Tell you what that means, Jack," said Springer. "This fellow that Mrs. Warren is taking care of is the president of some kind of organization, that's what 'tis, and they want to get him for something or other."
> "Likely," assented Martin, but he

doubted, nevertheless. By 6 o'clock Sam's thoughts had so turned to business that he declared that he must attend to his store. Martin, too, wanted to go home and look after his cattle. They arranged to take turns in guarding the house, for both felt that it would be inconsiderate and possibly dangerous to leave Mrs. Warren and Elsie alone. Accordingly, Martin hurried home first, Sam meantime sending his wife to the store to open up for business, which was more likely to be rushing at an early hour than later. By 8 o'clock, therefore, Martin was back again and was on guard alone.

The day opened tranquilly enough. The patient was much improved, Elsie was sleeping peacefully, and Mrs. Warren herself, though physically worn, was not mentally as depressed as she had been the morning before, when she was cruelly pained at the conviction that her husband was keeping something from her. Martin had attended to the chores and busied him-self lightly about the premises, for he felt no need of sleep. All night hunts were commonplace episodes to him, though he had never hunted before when the quarry was of such infinite periencing, and his anxiety about herimportance. He was in the barn when

Golding came. The traveler did not stop to hitch his foam-covered horse. He had been growing more and more excited as he drew near the village, and as he passed the store one of the idlers there had called out that "Elsie was back again." When Sam Springer heard that it was Golding who had passed at such high speed, he had dropped a sugar scoop, contents and all, on the floor and put out for Warren's on the dead

Golding strode up the path from the gate and stalked into the sick room. Mrs. Warren was in the kitchen at the moment, but the door was open and she hurried back.

"Has Wanga been ahead of me?" asked Golding, savagely. Mrs. Warren.

"Then you've got it here. Where is Dutton, going so far as to caution it? Where's Freeman's vest?" and he some of her neighbors to say nothing looked around the room eagerly the looked around the room eagerly, the of the stranger in his presence. Gran'- invalid watching him with a faint Golding saw the closet door, dashed

to it and pulled it open.
"Thief!" cried Mrs. Warren at the top of her voice. "You shall not touch his clothing!" and she tried to get be-

and a violent shove, the traveler was stretched at full length on the floor. "Stomp on him, Jack!" said Sam Springer, appearing hot and panting at the front door.

(To be Continued Next Monday.) ELECTRICAL FLASHES.

Notes of Interest in Connection With the Street Railway.

The President Takes a Trip Over the Line - Hamilton Road Line Almost Completed-Alterations to the East End Sheds-Last Shipment of Rails-New Car Sheds Among the Possibilities.

The week just closed has seen many rapid strides towards the completion of the outlying lines of the electric railway, and as long as the weather continues favorable the work will be pushed along with all possible speed. The Hamilton road cars were called in on Tuesday, and Engineer Mackay and 200 men were put to tearing up the old line and putting down the new rails and ties. Even though wet weather was experienced, the men were kept on duty every possible moment, and the result is that the tracks were laid to Adelaide street today, and the road will be completed on Tuesday.

President H. A. Everett and Everett, and the latter's sister, Miss Pengelly, of Cleveland, O., were in the city yesterday, and in the afternoon boarded one of the new cars, and, accompanied by Manager Carr, were given a trip over every portion of the road so far completed. Mr. Everett was greatly pleased with the way in which the work was being carried on, and more than delighted with the new

cars. "They are ahead of the cars in Detroit," he said.

The Lyle street sheds are being altered for the trolley cars. Pits are being dug between the tracks the en-tire length of the sheds to allow of cleaning the trucks, and the entrance is being enlarged. The sheds will hold fifteen of the new cars. It is quite pos-sible that the new sheds and offices will be erected at the foot of Bathurst street next summer.

The last shipment of rails has ar rived at Montreal from Scotland. It contains 60 carloads, 25 of which have arrived in the city, and are ready for distribution.

Rails are being distributed on Wellington street south, but the company does not expect to start the Marley Place spur line until the spring. If the weather continues fine, the Oxford street line will be commenced next. The special work for the Central

avenue and Richmond street junction was shipped from Montreal today. Wm. Nelson, of East London, had a valuable Irish terrier killed by a trolley on Thursday. No arrangement has yet been ar

rived at between the company and the Proof Line Road Managers by which the railway can be extended to the limits on Richmond street north.

> A Former Resident Thought to be Dying of Bright's Disease, Uses Dodd's Kidney Pills and Appears on the Street in Perfect Health.

(Special to the "Advertiser.") Listowel, Nov. 2, 1895.-The press dis-

patch, first read here in a Toronto paper, but dated from Neepawa, Manitoba, has caused quite as much local furore as in the town of its origin. The subject, Mrs. T. H. McKee, formerly lived here, and has a large circle of sympathizing friends who had for months past believed her to be dying or dead. A recovery from Bright's disease and reappearance so remarkable—so much past common belief—naturally resulted in many inquiries for confirmation of the facts. confirmation of the facts.

Similar press dispatches having beer of such frequent occurrence during the past few months, coming from various parts of Canada, the management of this paper had decided not to permit their publication without verification. To this end every dispatch hitherto published has been investigated with a most gratifying result. In every case where we have written we have got prompt replies, very friendly in their tone, and in many cases stating that their case has been under, instead of over, stated. It is found also, they state, that from those remarkable cures the sales of Dodd's Kidney Pills in the surrounding country has doubled and quadrupled during the past year, and that these pills are being successfully used in as many cases as there are names of diseases in the catalogue. The proprietors of Dodd's Kidney Pills were equally prompt in placing all the data for the successful issue of our investigation, and we have ourselves become convinced of the sterling merits of this wonderful medicine.

Dodd's Kidney Pills is the only med icine or treatment in the world that has ever cured Bright's disease.

What! Limping Yet! Why should you go limping round when Putnam's Painless Corn Extractor will remove your corns in a few days? It will give almost instant relief and a guaranteed cure in the end. Be sure you get the genuine Putnam's Corn Extractor, made by Polson & Co., Kingston, for many substitutes are being offered, and it is always better to get the best. Safe, sure, painless.

Property to the value of over \$4,500,000 is left in the railway carriages of Great Britain every year.

PARMELEE'S PILLS possess the power of acting specifically upon the diseased organs, stimulating to action the dormant energies of the system, thereby removing disease. In fact, so great is the power of this medicine to cleanse and purify, that diseases of almost every name and nature are driven from the body. Mr. D. Carswell, of Carswell postoffice, Ont., writes: "I Carswell postoffice, Ont., writes: "I have used Parmelee's Pills, and find them an excellent medicine, and one that will sell well."

The British Isles comprise no fewer than 1,000 separate islands and islets, without counting mere jutting rocks or isolated Minard's Liniment Cures Colds, etc.

years, Rev. P. A. McEwen, B.A., formerly of this city, has resigned the pastorate of the Baptist Church in Windsor, N. S., to resume pastoral work, probably in Ontario. Before location conveyaged to the serious conveyaged to the control of the serious conveyaged to the control of the contro cating anywhere he has engaged to Grand Opera House on Tuesday night next, give a few weeks service to the Grands contains two of the strongest situations that —Mr. McMaster, of Hamilton, who contributed so much to the enjoyment of those that attended the recent concert at St. James' Church, South Lonoccur in any play on the road today. One poker and cauterizes the wound. Another is where he discovers (by the aid of a mirror) his would-be friend giving him dose of poison; and then the duel which follows always arouses the audience to the wildest enthusiasm. "Monbars" is full of strong situations and climaxes and is without doubt Mantell's best play. The costumes are said to be very gorgeous as the period is in the days of the First Empire. The company supporting Mr. Mantell is said to be exceptionally strong and special scenery will be used here.

> TRILBY FOR LONDON. Of all the works which Paul M. Potter has been the dramatizer of his "Trilby" is the greatest. It is great in more senses than one. It is great in that he outdone Du Maurier, the author of the great novel. He has done his work well. He has never reached a higher plane of excellence. He was in perfect accord with Du Maurier, caught absolutely the spirit of the book, knew thoroughly the characters, and made not a mistake in presenting them in action. His dramatization is unique in the sense that he departs slightly from the author in making Trilby leave Little Billee, not in a self-eacrificing way or because she promised to do so, but because she wants to. He puts the heroine completely under the mesmeric influence of Svengali, and if anything by so doing, improves the devel-opment of the plot. Considering the fact that A. H. Palmer has put one of his greatest companies in the piece, and that it is superbly staged by Wm. A. Brady, it should prove to be the most memorable production ever seen at the Grand Opera House, where it will be presented on Friday and Saturday nights and Saturday matinee, Nov. 8 and 9.

Life in Other Worlds

The Possibilities of Existence in Planets Other the latter had a good send-off on Mon-day night, and take with them the Than Ours-Sir Robert Ball Discusses the Subject in a Popular Way.

inight be inhabited, was of this kind. It was noticed that the sun lies at the center of a system of bodies which revolve around it, and that among these bodies the earth holds an intermediate be said that this gas is an important place. It is nearer to the central lum- constituent in those compound bodies inary than are some of the other plan- with which life is associated. In that ets, while, on the other hand, it is shows the actual quantities of the seventh there remote than others. The warmth eral elements of which an average human body is composed, the bulk of the sun would therefore be greater than that received by some planets, the hydrogen forms one of the most striking items, and indeed in connection with all forms of animal and and less than that received by others. vegetable life hydrogen is of primary If some of the planets are much larger importance. In the argument from analogy for the existence of life in other members of the same bered that other members of the same that an element associated in such an that some of them are very much to be widespread through the unismaller. It was also pointed out that verse the earth in another respect is, as it In like manner carbon, which is, of were, a fair average specimen of a course, an essential factor in organic planet. Some of these bodies have substances, has been demonstrated to exist in other parts of the solar system.

The most striking illustration of this fact is presented in the case of the striking illustration of the crican Federation of Labor, attendant globes than is the earth; but then Mercury and Venus are the large of the substances, has been demonstrated to substances, has been demonstrated to have gone up from \$1 and \$1 and \$1 in the past week.

John McBride president of erican Federation of Labor, a tour of the eastern cities. then Mercury and Venus appear to now good reason to believe are due to be unprovided with any moons. It was carbon. Many of the comets exhibit thus seen that in the matter of satel-lites, as well as in dimensions and situation, our globe is an intermediate has often been supposed, are drawn by one in the system. This conclusion was confirmed by the subsequent discovery that Mars had a pair of satellites and Nanture an lites and Neptune a single one. Indeed, the claims of the earth to be a verse. Here, again, modern research in Pittsburg in most of the trades. further. A notable characteristic of a planetary globe is its density, that is to say, its weight in comparison with mical nature of that particular elethe weight of a globe of water of equal dimensions. Here again our carth appears in the light of a fairly a constituent thereof.

hand, much heavier than others. a copious atmosphere, and this is an attribute which of course stands in an exactly to its environment, that it seems in the highest degree unlikely obvious and specially important relation to the question of the earth as an. live on any other globe elsewhere. abode of life. Those who pondered on cannot conjecture what the organism the possibility of life on other worlds, must be which would be adapted for could not fail to be struck by the fact a residence in Venus or Mars, nor does that some of these other worlds were also surrounded by atmospheres. If these atmospheres, in certain cases, knowledge. were excessively dense and abundant, and in others greatly attenuated, this circumstance alone would tend once again to illustrate the intermediate rank, so to speak, of our earth as a member of the planetary system.

The argument then ran in this wise constitutes a member of the solar system, it can hardly be said to possess very extreme attributes. It does not appear to be marked out in any speciappear to be marked out in any special ally distinctive manner which would qualify it rather than certain of the The Cigarmakers' Strike in Detroit

The Minneapolis of a continuous special state to use official State printing. abodes for life. The qualities which the earth possesses are, generally speaking, conferred upon it in degrees intermediate to those in which other globes of the system are endowed with similar qualities. As the earth was in-habited it would seem only reasonable them, or many of them, were also fit-ted for the abode of life, suitably adapted to the conditions which each globe had to offer.

Such was in outline the famous argument which was presented half a century ago, in support of the conclusion in all probability certain other planets besides our earth contained organic life. * * * It is plain that the ancient argument in support of the notion that some of the planets might certain that various elements known on this earth are present in the in all probability, be as abundantly provided upon some of the other planets as it is on the earth.

In this connection it is instructive to bear in mind what is known as to the distribution of those particular elements in space which appear to be most characteristically associated with accept the report. the manifestation of life. No result of strates the extraordinary abundance with which the element hydrogen is diffused throughout the universe. It is, of course, one of the commonest elements of the earth, entering, as it mittee was referred back for fuller does, into the composition of every particulars. Frank McGeary was adddrop of water. Hydrogen is also a constituent part of a vast number of solid bodies, but the remarkable circumstance for our present purpose is that this same element is found in profusion elsewhere. Surrounding that visual glowing globe of the sun there is an invisible atmosphere, of which hydrogen is one of the most also instructed to bring the matter beprominent components. A like con-clusion is drawn from the spectra of many of the stars. In the case of certain specially white and brilliant gems. of which Sirius and Vega may be taken as the types, the chief spectroscopic

He also says there are few workingmen who can say: "My father was a union man," while in England he met many who had four genera-

tions of ancestors in the labor move-

The cigarmakers' strike in Detroit is still on, and financial aid is still coming in from all sections. During the week several of the strikers have secured situations in other cities, thus reducing the strike list. The advisory board of the Cigarmakers' Union has abandoned the plan of furnishing coal to the strikers for the winter. The searcity of coal has scared the dealers and they will not quote a figure that would make it a saving for the board to purchase. Flour in barrel lots will be distributed among the strikers.

An experiment of considerable importance to the granite trade took place in Aberdeen, Scotland, recently. For the past twelve years pneumatic tools for dressing and carving stone resided in Grand Rapids, Mich., is have been in use in the United States, visiting friends in the city. Mr. Hunter is now an operator on a Thorne test made of the tools in the Scottish granite center. The tools, which were driven by means of gas from two carbonic acid gas chargers, were handled by a stonecutter who worked the tools in America. A large cornice stone was operated upon—one of the hardest pieces of granite that could be found-and the test proved in every respect highly successful. Carving, lettering, and filleting were alike excelletly done. It is claimed for the tools that they are easily manipulated and of great power, and that a skilled workman will turn out the work of four to ten men in a more perfect and efficient manner than is accomplished by the old meth-

Here Is a Nut for Foubting Thomases to Crack.

Remarkable and Unexpected Corrob-

oration to the Correctness of an Article Published a Day or Two Ago -And We Don't Have to Go Far From Home to Get the Facts.

In a recent issue was published a scientific article on the causes and effects of Bright's disease, the writer giving it as his opinion from his experience of cases which came under his personal observation that Dodd's Kidney Pills were a positive cure for the disease, whether in its incipient stages or when it had become chronic. We have during the past three or four years published probably several hundred testimonials referring to cures effected by this remedy, but as the testi-monials were furnished by persons totally unknown to us, while we did not doubt the truthfulness of their statements, or question the efficacy of the specific, our attention was not especially drawn to the pills. (Two cases have occurred in this city and vicinity of late, however, which are such pronounced cures, so wonderful in their effect, that we feel bound to endorse everything that has been said by the writers, affiliated with the Internation- writer aforesaid in favor of Dodd's Kidney Pills, for two more remarkable instances of thorough recovery, at tested by indisputable evidence and uncontrovertible documents have probably never been recorded in connection with any specific ever placed on the market.

The first case, that of Mr. Wm. Langley, of Euclid avenue, South London, has already been referred to in these columns. The second one, that of Mr. Robert Bond, of Mount Brydges, is of so remarkabe a nature that it is Bond was for years a sufferer from Bright's disease, which finally became chronic. He consulted a dozen or more only that he was totally disabled, but that his pilgrimage through this life would not be of long duration, He carried an insurance policy in the Provincial Provident Institution, of St. On Monday, Nov. 11, the National Thomas, Ont., and the physicians representing the society were so satisfied that they reported him totally disabled, and on March 21 last the so-ciety paid him \$600 on the strength of their physicians' report. "The Ensign," the paper published by the P. P. I., in its issue for September, 1895, contains a statement of "Death and Disability Claims Paid in Eleven In this statement appears Years." the following:

Bond, Robert (disability), Mt. Brydges. 2917. \$600. March 21, 1895.

The attention of the Dodds Medicine Company was called by a resident of this city to the remarkable case of Mr. Bond, and its manager wrote to reply was purposely delayed, Mr. Bond resolving to consult physicians street, South London. Phone 973. Special attention to diseases of children, before sending an answer. Those physicians, after a thorough examintion, positively assured him that he was cured. He then sent this reply: "Mount Brydges, Middlesex County, Oct. 8, 1895. 'Dr. L. A. Smith & Co.

Gentlemen,-I received your communcation dated 31st August, 1895, asking if I had any objection to your publishing my testimonial. I am perfectly willing you should do so, as I believe I owe my life to the use of your Kindney Pills. I ame very grateful to you and your wonderful remedy. I can recom-mend them to be what you claim. My attending physician said I was in the last stage of Bright's disease and there was no hope for me. I commenced to use your pills in July, 1894, and used in all about twenty boxes, and no other remedy since then; and I might say I fel well, have a good appetite, rest and sleep well, and but for the partial loss of my right hand could earn my own living.

"Now these are the facts, and if you think they are of any use to you or the public, you have my full per-mission to use them. The reason I delayed answering was that I wanted a ined, and they pronounced me nearly, gratefully yours,

"ROBERT BOND, Mount Brydges, Ont."

This statement is to the point and sufficiently explicit to satisfy this paper of its absolue truth. We have no doubt it is equally satisfactory to our readers. Such a remarkable case, happening as it does in our neighborthat the labor movement is further ad- hood, and coming from so respectable vanced in England than in the United a man, cannot but convince every one States, and that the public has a bet- that Dodd's Kidney Pills are not only aims. & Cooks the Breakfast, Washes tenths of its power." Clothes and Dishes, and Scrubs.

Hensekseping Bevolutionized and the Servant Problem Settled.

I new goddess is born. She is called "Electra." She is the goddess of all work, is swifter than Mercury, and brighter than the star of the morning. On her brow is a blaze vant girl question as he greatest bride 10 years of age. She was a Mosof jewels; she carries a fiame-tipped achievement?—Washington Star.

She comes to unbind burdens, to suc cor women and horses. There is no service so exalted that she cannot attain to it, no service so lowly she will not stoop to it.

She will light the kitchen fire and cook the breakfast. She will wash the dishes and scrub the floors. She will curl and brush the hair. She will sweep the room and run the sewing machine. She will run errands and draw the cart. She will pull and fill the teeth, be the physician, and put the weary to sleep. She will play on the piano or the wash-tub as desired. She will amuse the children or entertain the company. She will tend the door or convene the elements.

She will manufacture climate to order, and bring Alpine blasts in midsummer to a city flat. This is not a panegyric, but a prosaic

catalogue of the duties that electricity is prepared to assume in family life. into so fine a heritage, and it is worth while sometimes to realize the privi-

leges of the age we live in. visit, and at the other end of the town puts her mouth to a hole in the wall and assures herself that the baby is still asleep.

A woman lying ill in the torrid days of early June could not be persuaded that the well were suffering, so cool was she from the gentle zephyrs wafted by a silent little electrical fan plying at the head of her bed.

A dinner under way is about to be wrecked by the heat, when a more stimulating climate is ordered and felt younger. brought into the room. A silk cord is attached to an iron, and one iron will tered porch or under a neighboring tree is only a question of length of string.
One swings an electric bulb over the

arm and goes to bed to finish a novel. The same green string may be switched off to the curling irons in the morning to prepare the crimps for breakfast. The performance of the most diverse duties is only the hooking on of a silk twisted cord.

An interesting experiment has been made in Toledo in connection with one of the electric light stations. The principal object was the heating of a block of 27 houses, controlled by a syndicate, with hot water obtained from the exhaust steam spared from the engines used for the electric light.

for lighting only a small force of the obtained from the coal is used. The balance is thrown away in

steam was carried into tanks of water, and there stored, as it were, for When Mr. Cameron was only 21 years heating purposes. In addition to this there was ten per cent more exhaust tiser," steam than was needed for heating, Canada," and this was turned into electricity of low grade and conveyed to these in Ontario outside of Toronto."

houses for cooking purposes.

He has been twice president of the

It is the boast of the Toledo block that there is not a match on the premises. The men light their clears and the women curl their hair by elec-Together they make Welsh rarebits on the malachite and onyx tables of the drawing room, all the

cooks having no fires to make. The most interesting development in domestic life with which women have to deal is cooking by electricity. Every woman knows that the kitchen range is the real hub of the universe. A change of fuel is a more serious experiment than a change of sect or

The first thing that commends electricity to a woman is its cleanliness. For this gas has prepared them somewhat. But even with gas the products of combustion still oblige the washing of the outside of the platters. In cooking by electricity there is no combus-The heat is merely localized. This distinction is radical, and affords the most curious and interesting feature of the new process.

There is no such thing as an electrical stove in the sense of the kitchen range. For example, there is an electrical kitchen in a commodious Brooklyn home. One experiences a curious nineteenth century sort of feeling listering to the middle-aged cook explaining the mysteries of her switchboard.

the marble are hanged the wooden "The "Advertiser" made a rather handles that, moved up or down, make humble start as to size?" or break connection. One is now down, engaged in baking the family loaf. The cook is eloquent over the oven that with the aid of the thermometer to tell her when the oven is just right, and the glass door to allow her to watch the operations within, never fails of her expectations. If the baking or roasting is going on

too quickly she shows how she switches off the current to allow the oven to cool. This it does evenly, as it is heated evenly.

In this case the cooking utensils are themselves designed for electricity. Here there are tea kettles, boiler, stew pan, farina kettle, coffee pot, of copper lined with tin, and for table use nickelplated, each with its twisted cord and separate generators tucked away some-

These articles can, in fact, be used anywhere where there is a chandelier or bracket for electric light.

In point of fact, but for the odors of vegetables and meats, there is no reason why a dinner should not be cooked on a butler's tray by the table side when the duty of cooking falls on the mistress, and it can be done with the same grace that is lavished on the nocturnal chafing dish or an afternoon

An electrician who was putting in an electric cooking plant in the marble kitchen of one of the notoriously rich

"This sort of thing does not pay us. It is not the few electrical kitchens of the very rich we are working for. What it does, however, is to give us the opportunity to experiment and furnish a basis on which to work out eleccooking so that it will come within the reach of the people. This is not in the interest of philanthropy or the new woman, but because there are millions in it.

The electrical and cable railways in

power, actually waste energy enough to heat, ventilate and furnish light and cooking facilities, the revenue from which would produce more than equal the cost of production.

"Every 1,000 horse-power going to waste would equip 250 average sized dwellings, whose actual coal bills average \$25,000. To speak briefly, each sta-

(From "Printer and Publisher.") The Printer and Publisher was in London the other day, and made a call In the earlies, the "Advertiser" was

always readable." Thereupon the interviewing scribe pulled out his note book and sharpened his pencil Mr. Cameron. and sharpened his pencil. Mr. Cameron Mr. Cameron's principal upstairs ashad just returned from a month's sociate, as head of the editorial staff, canoeing and camping trip west of Lake Superior baying "maddled and Rossie as assistant; Mr. George W. Lake Superior, having "paddled and Yates as city editor, M. George Busportaged, and camped, and fried-bac- kard and Mr. E. Clissold.

According to page 418 of "Men of Canada," Mr. Cameron was born Jan. some part of his education at the Stouffville and London public schools, but most of it at the typesetter's frame. At an early age he was apprenticed in the London Free Press office, the first year getting up at 5 o'clock in the morning through snow or storm, to carry a "round" of papers. He recalls his ecstatic emotions on a Christmas Day, when, after delivering his carriers' address cards, he found himself with nearly \$19 in shining York shillings and other coins. He has never felt so rich since. His frame-mate at the case was William southail, now manager of the land it of Speciator. His first newspaper it of hot water obtained from the exaust steam spared from the engines sed for the electric light.

It seems that in producing electricity or lighting only a small force of the light. He says he carried that was printed. He says he carr paper about in his pocket for a week, every how and then taking it out and reading it over with great satisfaction, aste steam.

When Macaulay saw his "History of England" in print he could not have heen happier.

Ord, and "What advice have you for begin-ners?"

When Macaulay saw his "History of England" in print he could not have heen happier.

"Well, there are several things that heen happier."

veloping into the principal newspaper

Canadian Press Association, is an elder of Park Avenue Presbyterian Church, London, and is seldom absent from General Assembly as commissioner. He was married in 1869 to the daughter of the late Capt. Millar, captain and adjutant of the Royal Canadian Rifles. "Here is a copy of our Quarter Century Edition, issued in 1883," said Mr. Cameron. "On the first page you will see a fac simile of the first copy. It was four pages of that size. For a good many years my brother William, an able newspaper man, was associated with me in the publication, and, after his death a younger brother, L. K. Cameron (now Queen's Printer), was for a few years business manager. W. J. McIntosh, now of Chicago, was also at one time connected with the business. But I was myself the founder

president and manager and controlling shareholder." "You were connected with the Globe

for some years?" "Yes, I spent seven or eight agreeable years in Toronto as editor and manager of the Globe after the death of Hon. George Brown. C. W. Taylor, a man of fine qualities, was my chief associate at the business end, and we had the satisfaction, during my term, of getting the company into improved financial shape. A co-director was Robert Jaffray, now president There is a slab of Numidian marble of the Globe Printing Company—a in the jut of the kitchen range. On more than ordinarily able man."

> "Yes; it started about the size of a copybook. The time, just about 32 years ago, was propitious. It was near the exciting close of the American civil war, when people were eager for news of the contest. Like Topsy, the paper 'growed,' until it is now a household word in Canada, and especially in Western Ontario. I always believ-ed in bright paragraphing and striking headings, and in making a readable paper, and one acceptable to the fmily circle. We insert no anonymous We have always been pretty radical; for example, being the first paper in Ontario to advocate equal electoral rights for men and women. The "Advertiser" was the first paper to advocate the plebiscite system. Its general tone is optimistic, our over-editorial motto being Robert

Browning's lines: God's in His heaven,

All's right with the world. "The "Advertiser" publishes two editions daily, with 16 pages, on Saturday, and a mammoth, readable 96column weekly, the "Western Advertiser," which, like the daily, makes a specialty of the news of the fertile and smiling areas of Western Ontaand natural capital."

reply to inquiries, Mr. Cameron stated that he started in without a dollar of capital, but had the opportunity given him of taking over the printing plant of the Evangelical Witness, an organ of the New Connexion Methodist Church, and of acquiring it gradually. At first he was editor, reporter, proofreader, everything.

Among the humors of his existence. he relates that on one occasion he received a poem from a country post-office, professing to be a first effusion, but which was at once recognized as a little poem by Longfellow. On another occasion, after a tea meeting "The electrical and cable railways in the smaller towns, by exhausting into mer confided to him that he was surprised to find him so agreeable in pri-

vate. "I always thought," said the

In the earlies, the "Advertiser" was This is not a panegyric, but a prosaic catalogue of the duties that electricity is prepared to assume in family life.

The women of no time have entered not so fine a heritage, and it is worth while sometimes to realize the privileges of the age we live in.

An anxious mother goes to pay a tiriff and of the character of the cha

oned," to his great delight. Face and Mr. Cameron says he feels as young neck and hands showed healthful as he did 32 years ago, when he started the "Advertiser," is as optimistic as ever, and is setting out on his next 32 years, determined to sustain and increase the prestige of the paper. Both advertising and circulation show a dispose of a whole wash before stopping. To carry it on to a vine-shelsome part of his education at the month by month. Prof. Goldwin Smith and Hon. David Mills are frequent contributors over their own names. numerous acquaintanceships and inside knowledge acquired in Toronto are of-

ten of service. "You must have graduated a good many newspaper men?" "Yes; our graduates of 32 years are scattered far and wide. There is J. S. Willison, editor of the Globe, who received all his early training on the "Advertiser," and whose successful ca-reer we naturally watch with interest and pleasure; H. F. Gardiner, of Southam, now manager of the Ham- the Hamilton Times; Harry Gorman, per, publishing up in the Northwest;

Thomas Coffey, of the Catholic Record, and many others."
"What advice have you for beginmight be said. 1. The born journalist of age he started the "London Advertiser," which, according to "Men of Canada," "has gone on ever since destance of the condition of the condi stepping stone to something else. In nine cases out of ten, journalism, exclusively and energetically pursued, gives as fair a living, as interesting and stimulating an occupation, and as much influence as any other calling.
2. Slang and hackneyed expressions should be avoided in the paper. 3. Cultivate what wil interest and elevate the family circle. Make a clean paper. Character tells as much in a newspaper as in an individual. 4. As a small detail, yet important, spell names correctly, and give initials accurately. 5. All reports should be given with absolute fairness and without bias, either personal or political. 6. Anything of length worth printing should be set off with bright headings. 7. Cultivate cheerfulness and good nature. Whenever you write anything particularly cleverly bitter, whether relating to "The hunting tribes of air and earth your journalistic neighbor or someone Respect the brethren of their birth; who does not wear the same political spectacles as yourself, tear it up, and burn the pieces. 8. Avoid libel suits. The of the paper, and though the paper is now conducted by a company, I am the luxury is expensive. In cases of doubt, consult, or hold over. 9. News is valuable in proportion to its promptitude. Half a dozen lines in this issue is better than half a column next day or next week. Condense when necessary -and that is generally. 10. Discourage anonymous communications. Such as attack people do not insert at all."

> editor to politics and the politician?"
>
> "As to politics, he will find it more advantageous, as well as effective, to be moderate in expression and argument, eschewing personalities. As to the politician, the young journalist cannot be too careful as to entangle-ments that might tie up his independ-ence or mar his manliness. There will always be people perfectly willing to allow the journalist to print effusive anonymous letters for them, make personal editorial attacks and enemies at the same time, and incur loss of business. But should any time of financial or other trial come, do not expect those you have befriended in such ways those you have befriended in such ways to make any sacrifices in return. reply to inquiries Mr. Camera.

IN THE LITERAL SENSE. "No, Willie, dear," said mamma, "no more cakes tonight. "Don't you know you can't sleep on a full stomach?" "Well," said Willie, "I can sleep on my back."

Hood's Is Wonderful. No less than wonderful are the cures accomplished by Hood's Sarsaparilla, even after other preparations have failed. The reason, however, is simple. When the blood is enriched and purified, disease disappears and good health returns, and Hood's Sarsaparilla is the one true blood purifier.

Food's Pills are prompt and efficient and do not purge, pain or gripe. 250.

### What We Should Sing

Ennobling Character of Songs of the Highest Class.

Very High Praise.

Songs Should Teach Peace and Good-Will Not Magnify War and Hatred.

Every emotion that passes through the human mind leaves its impress. The longer, oftener and more intense these emotions, the more they mold our character. If these are low, coarse and vulgar, we cannot rise above them. But if, happily, all the higher and nobler traits of our mind are brought into exercise, and intensified by surrounding conditions, they ennoble our nature, refine our tastes, inspiring in us a feeling that there is something higher and grander than we can ever attain to in this life. Now, I believe that by the aid of music, we have in a good degree the control of these conditions. Music is one of the greatest intensifiers of our feelings, and when blended with poetical sentiment, may inspire, if not create, the highest and holiest emotions of which man here is capable. Gratitude is one of the supreme laws of our being. When we benold the beauties and the bounties of creation, gratitude must o'erflow the swelling heart, and vent itself in grateful songs of praise. Many of the hymns are sweet, tender, beautiful and appropriate for worship The hymn: How gentle God's commands,

How kind his precepts are; Come, cast your burden on the Lord

And trust his constant care. Sung to the tune Dennis, it is excel lent and often admired; yet few would compare it with the 23rd Psalm. But t is in sublime grandeur that the original Psalms so far surpass the hymns We sing, not only because we feel the sentiments expressed, but that we may have the sentiments created and intensified; and I believe you will see a marked difference between the Psalm and hymn singer in religious character and religious taste. The Psalm singer must imbibe a deep reverence, and stand dumb before the terrible power and majesty of his Creator, while the hymn singer speaks of his religion and his Creator with as little restraint as he would speak of his secular affairs, or of his fellow-man. What part could the old school Presbyterian take in the songs and parade of the Salvation Army? As there are a great variety of tastes to meet, we must not be too exclusive. But the songs of the church, if they mold men (and they do mold men) should aim as far as possible in making man what he was as he came fresh from the hand of his Creator, bearing his own image. When we sing the 145th Psalm, as should be sung to the exulting strains of Dukesteet, touched by the subline grandeur of the song, we are carried far beyond the height of choicest hymn. Man once having felt the inspiration of this psalm psalms can never satisfy his taste with Sankey's hymns and tunes.

The uses of song are not confined to the church, but enter into every con-Pope has beautifull dition of life. expressed the uses of music to the various moods and conditions of man. By music minds are equal, temper

Nor swell too high, nor sink too low, If in the breast tumultuous joy arise, Music her soft persuasive voice applies; Or when the soul is pressed with cares, Exalts her in enlivening airs. Warriors she fires with animated

sounds. Pours balm into the bleeding lover's wounds.

We wonder not at the heroism of Scotchmen, when we hear the unconquerable spirit of their songs, very notably. "Scots wha hae wi' Wallace bled," etc. We are, however, glad that the age of military heroism with us has ended, and we should with our songs woo men away from deeds of bloodshed to a far higher, truer and nobler heroism, namely, "Peace and goodwill to men." Lord Byron has well said—"There is more real glory in the drying up of a single tear than shedding seas of human gore.' Walter Scott, in his poem, Rokesby, says:

Respect the brethren of their birth; Even tiger fell and sullen bear, Their likeness and their lineage spare; Man only mars kind nature's plan. And turns the fierce pursuit on man."

Love is the fulfilling of the highest law. Let our songs, then, breathe a universal love. They must come from the heart to the heart, or they cannot mold our lives. The songs of Burns reached the universal heart, because they were the true reflection of a highly sensitive mind. His love songs were always studded round with the beauties of nature. The drooping birch tree with its feathery palms, the sweet hawthorn, the mossy banks, the babbling brooks, the warbling birds, blooming spring to hoary winter, everything in nature had a charm for the different moods of the poet. Varied as these charms and moods may be there is but one grand purpose them all, to lead us up through nature to nature's God.

THOS. B. SCOTT, Vanneck.

REMARKABLY PROLIFIC CANARY. A Whitehead fancier, says the London Daily Graphic, has a canary which alive and doing well, and at the present time (her last nest of birds being almost reared) she is making arrangements for another big lay.

# Physicians

prescribe Scott's Emulsion of Cod-liver Oil and Hypophosphites because they find their patients can tolerate it for a long time, as it does not upset the stomach nor derange the digestion like the plain oil.

Scott's Emulsion is as much easier to digest than the plain oil as milk is easier to digest than butter. Besides, the fishfat taste is taken out of the oil. and it is almost palatable. The way sickly children, emaciated, anæmic and consumptive adults, gain flesh on Scott's Emulsion is very remarkable.

Don't be persuaded to accept a substitute

## Timely Warning.

The great success of the chocolate preparations of the house of Walter Baker & Co. (established in 1780) has led to the placing on the market many misleading and unscrupulous imitations of their name, labels, and wrappers. Walter Baker & Co. are the oldest and largest manufacturers of pure and high-grade Cocoas and Chocolates on this continent. No chemicals are used in their manufactures.

Consumers should ask for, and be sure that they get, the genuine Walter Baker & Co.'s goods.

cheeked optimist or a gaunt, hollow- handsome wrap. It is banded with wide eyed pessimist, according as he finds black mohair braid, and further enriched you prepared or unprepared to receive with an elaborate scroll design, done with

A young doctor commencing practice had among his first patients an uncommonly unclean infant brought to his office in the arms of a mother whose face showed the same abhorrence of soap. Looking down upon the child for a moment, he solemnly remarked: "It seems to be suffering from hydropathic-hydrophobia." "Oh, foctor, is it as bad as that?" cried the mother. "That's a big sickness for such a mite. Whatever shall I do for the child?" "Wash its face, madam; the disease will go off with the dirt." "Wash its face-wash its face, indeed!" exclaimed the matron, losing her temper. "What next, I'd like to know?" "Wash your own, madani-wash your own."-Scottish-

There is a curious picture of Omar Kbayyam Fitzgerald in the recently can be devised. published reminiscences of his friend, F. H. Groome. The poet, Mr. Groome says, was always perfectly careless as Showy Effects in Colors and Trimmings to dress. "I can see him now," he adds, "walking down into Woodbridge, with an old Inverness cape, doublebreasted flowered satin waistcoat, slippers on feet, and a handkerchief, very likely, tied over his hat. Yet one always recognized in him the hidalgo. Never was there a more perfect gentleman. \* \* \* They were eccentric, certainly, the Fitzgeralds. Fitzgerald himself remarked of the family: 'We are all mad, but with this difference, I know that I am.'" Mr. Groome says that a former rector of Woodbridge once called on Fitzgerald to express his regret that he never saw him at church. "Sir," said Omar, "you might have conceived that a man has not come to my years of life without thinking of these things. I believe I may say that I have reflected on them fully as much as yourself. You need not repeat this visit." "Certain it is," says his friend, "that Fitzgerald's was a most reverend mind, and I know that the text on his grave was of his own choosing." "It is he that has made us, and not we ourselves."

Nephew-Do you know, uncle, I dreamed last night you had loaned me \$10. Uncle (generously)—Is that so? Ah! well, you may keep them, Otto .-

I have never found a man, says the writer of the "Point of View" in Scribner's Magazine, wholesome and lovable to the core, who had not somewhere in his composition a capacity for wide and smiling idleness. For your over-busy persons needs be of necessity a coward or an egotist. Either he permits himself to be whipped by Life into a nervous and flinching energy, because he is not strong enough and courageous enough to offer the necessary resistance, or else he is of that class of self-appointed heroes who have a taste for being at the front and who find no privilege of exemption half so dear as the opportunity for self-expression that comes with participation. A great deal or unnecessary work such as Congresses or Discussions, and Societies or Advancement, and fin-desiecle literature, gets itself done in this way and by these persons, not because the world is in any way benefitted by such performances, but simply because the performers are not able to efface themselves and their opinions. One longs at last for the cool presence of the idler, to whom "life is for itself, and not for a spectacle," and who has no feeling of uneasy resentment that there is not provided, a desperate situation for him to redeem. I do not believe that Shakespeare ever thought the better of himself, except perhaps before Anne Hathaway and his debtors, for having written the sonnets, nor am I uncomfortable in the opinion that Shakespeare's peers have lived and died so blessed by Fortune and a high indifference as to be under no temptation to coin their gold and barter it for a world's consideration. For in the richest nature its activities distill back into itself, and thereby is knowledge fortified into wisdom, and both ripen into character. Happy and thrice happy is the man whose life to him a kingdom is, and who is of the royal blood to sit down and enjoy it.

him. He is a fawning servant or a black soutache, which covers the shoulders harsh master, as your case may be. and descends in long Vandykes upon the

The pattern shown, called the Norbury, is a simple fall circle, which remains more popular than any of the intricate and elaborate variations of the shape which

WINTER TOILETS.

are Promised. The artistes of the needle are now cutting, fitting and scheming for what is to be worn during November, December and even as late as January. The model rooms are full of lay figures and draping forms, wearing gowns for dinner toilets for the broken fractions. gaisties that immediately precede and succeed the Christmas helidays.

They all, when drawn in battle array. show a most wonderful, flaunting, daring, flashing assemblage of new colors, varying from the rich deep damson shades, acid looking reds and clear restful dark ocean blues, to an aggressive Algerian yellow, that none but the darkest-browed woman in the world could carry off with anything at sight between a florin, a 2-shilling like effect. Heap on to these new departures in tints and tones all the jewels your imagination can conjure up and you can form some idea of the splendid picture drawing rooms will present a little later in the season.

Many women will wear velvet and all of them, from the tenderest bud up, will use an abundance of gems, along with the revival of laces, on a scale never known before. This promises to be a memorable winter in the annals of fashion. This general glitter and gorgeousness, it is whispered, is a profoundly able trick of those masterly wire pullers of fashion, to cover the prevalling paucity of new ideas as to trimmings and the absence of anything to take the place of the bag front bodice.

with full fronts for a long time to come, since, like the large sleeves, they are a joy to the stout sister, a boon to the thin one, and on the basis of the skirt of of '95, enough variety is being introduced to warn off anything like monopoly. For example, a great many of the new ones are being laid in four, six, or ten great wedgeshaped box pleats, from the waist down, and the pleats treated with delicate points of lace, raying out from the belt. is a relief afforded in the use of light-falling value. He said that a man would pay graperies of lace or illusion, ruffling out on the back seams, there are panels let in, flower like bows of ribbon pinned on one hip, with ends to touch the floor, or such gorgeous silks are used in the make-up that any applied trimming would seem a sacrilege. A happy thought, indeed, has been the bringing back to use of lace in whole gowns, the black of Chantilly, the white of

It will be as well to tell those thirsting for knowledge that the whole principle of color combinations this winter will be that of the tint and shade of the same hue. Red and pink, black and gray, or two tones of green is the method of the smart dressmaker, who is planning a street or dinner dress.

A dinner gown made for a debutante has a pomegranate red silk skirt, creped in tiny pink figures, and over the bodice fall a soft kerchief collar of pink gauze, embroidered on the edges with colored stones. Her fashionably long throat is clasped by a dog collar, in alternate strings of pearls and diamonds, while double strings of pearls run to catch the bodice and hold it

up on the shoulder, Naturally and by preference, the youthful element leans to the wearing of pearls, obscuring their soft contours of neck and shoulder under ropes of these beads, and even twisting them into their hair, or converting them into armlets, by entwining long strings, from elbow to wrist, and fastening one end by a jeweled pin to the sleeve. Heads highly coiled and puffed for evening dressing will generally be most daintily decorated with coronets, wings and little plumes of jet, worked in very often with fine sprays of black curly osprey tips, that against hair of any color are most brilliant and becoming.

Hints for Petticoats.

Sensible advice in regard to fripperies and frills on petticoats is given by a writer in the London Women, who says: "I must risk your displeasure and offer a word of warning on the folly of wearing lacetrimmed petticoats after the month of October. It goes without saying that I am now referring to members of the community who are perforce obliged to walk, or, at best, must resort to a tram or train, for their vehicular assistance. The poverty-stricken appearance of the mud-bedraggied lace flounces can scarcely be paralleied and they have not even the extennating virtue of being inevitable, as there are any number of decerating alternatives, such as two or three rows of guipure insertion laid on to a silk flounce, or a similar arrangement of bebe ribbon in five or six different colorings. A broader ribbon also looks very well fixed in shallow vandykes and I have seen this latter idea carried out with excellent effect in black ribbon velves on a delicately timed moreen petticeat. Without desiring for a moment to attempt the futile task of comparing silk and moreon I am yet constrained to admit the utilitarian virtues of the latter; and, as it may now be had in almost every variety of color and rone, it is worthy of some serious consideration even from those who are not compelled to practise severe economy."

### THE VALUE OF MONEY.

It Is Well to Be Posted When in Foreign Countries.

As soon as the traveler goes on board the Cunarder at New York he finds all prices set down in pounds, shillings and pence.

One of the first things for him to do, says a writer in the Chicago Record, is to go to the purser and ex-change his American money for English "quids" and "bobs." Having parted with is American currency and silver it is probable he will not handle any again until the returning steamer draws near Sandy Hook, and the obliging purser gathers up whatever small change the traveler neglected to spend in Europe and gives back the equivalent in \$2 bills and nickles. It is always interesting to see the embarked traveler get his first handful of English money.
Suppose it be in the smoking room,

the traveler having taken a bottle of Belfast ginger ale in order to warm up and reassure a stomach that is none too courageous. He gives the waiter an English sov-

ereign, which he has reason to believe is worth about \$5. The waiter returns with a number of assorted coins, which the traveler rum-

mages about in the palm of his hand and attempts to count. The gold half-sovereign he computes as being worth \$2 50.

The silver pieces are not so easy.

There are three about the size of half-dollars, but one of them is slightly smaller than the others. There are two-shilling pieces and a sixpence. He roughly estimates the total value at cape. It is lined with bright silk and la \$4 60, and believes the waiter has taken finished up the front with fur to match the advantage of his ignorance. The waiter usually comes to the rescue.
"You gave me a sov'reign," says he.

The gold piece is 10 shillings, the two half-crowns are 5 more—that's 15; the two-shilling piece makes 17, the two-one-shilling pieces make 19, and the sixpence is 19 and 6." The chances are that this lucid explanation does not help the new travel-

He wants to reduce everything to dollars and cents. He wants to count the shillings as quarters, but this won't do, because a sovereign last summer was not \$5. It was about \$4 90. The half-crown piece would be 621-2 cents, and any count would result in

For the last few days he takes it for granted that he is receiving the correct change.

Then it dawns upon him that he can get along by simply remembering that 12 pence make a shilling, 5 shillings make a crown, and 20 shillings make a

But he still must learn to distinguish lings and 6 pence. He comes to learn that there is a 4-

shilling piece, which he is liable to mistake for a crown, or 5 shillings.
The guinea, or 21 shillings, although used in calculations, is not represented by any coin, and he may never come to learn its exact usefulness in the world. There are some men coming home on board the Lucania who have been in

England for weeks without learning When one of these men paid for a cigar he would ask the waiter: "Is this a 2-shilling piece or a half-crown?"

puzzle to any one who has become accustomed to the decimal system. An American learning to use the coins finds himself con-But women are going to be contented stantly trying to reduce them to their equivalents in cents and dollars.

If he asks the price of something and learns that it is "37 and 9," he may need a pencil before he has figured it out that "37 and 9" amounts to about

An old traveler on the returning steamer advanced the original theory that people spent more money in London than they did on the continent because the English money, on its There face, does not appear to represent high £4 for an article, but would hesitate to pay f.100, because the latter "sounded" large. A sixpence never seems to be as large as 60 centimes.

"When a man's in London," said the traveler, "he breaks a £5 note and spends it the same as he would a \$5 bill at home.'

In Holland it is only necessary to re-Honiton by selection, and no color yet permember that a guilder is equal to 40 mitted to mar their neutral beauty and cents in United States money and the home value of all the small coins can readily be estimated.

In Germany the mark is worth an American quarter, and a pfennig is, therefore, one-fourth of a cent. In France, Switzerland, Belgium or Italy, where the franc is the standard, it is equally easy to know at a glance what a coin is worth.

Anyone who is attempting to gauge traveling expenses and keep them within a reasonable limit will be compelled to translate all values to his own standard.

Wherever he goes he will receive his money on a basis of English pounds er, is rejected and they prefer to walk by sterling, and can take sovereigns if he sight. wishes them. If he takes native money anywhere on the continent he always gets a premium, which gives him the comfortable feeling that he is actually receiving more money than he paid for his letter of credit.

In Italy the premium often amounts a considerable sum, at times during last summer being as high as 5 per cent. The banks and the tourist offices pay the current premiums, but English gold, if presented at the shops or hotels, is simply received on a basis of 25 francs to the pound.

At present there is absolutely no silver money in circulation in Italy, and gold is very scarce. The copper and nickel coins serve for amounts less than 1 lire (1 franc, 20 cents), but the 1 franc, 2 franc and 5 franc silver pieces have been entirely replaced by "shinplasters" of these denominations.
The same is true of the gold pieces.

This filmsy paper money has about as much suggestion of value as a bundle of milk tickets would have. The bills are somewhat smaller than those of the United States fractional currency in use just after the war. Instead of being made of tough parchment material, they seem to be rag paper, for they become dog-eared, and most of them have been patched

together a few times. They are too small to be rolled up and too large to be put into a coin It required a stretch of the imagination to accept them as money, and it always seemed a good joke to offer this fluttering, insignificant little scrap in payment.

If the bill is torn in two it does not affect its value, providing the numbers agree. The number is printed on each end of the bill. At a theater in Venice one night, the

man in the box office was receiving all sorts of tattered fragments in payment for tickets. He scanned the numbers, the torn tickets aside, and an assistant with a paste pot was putting the money together again.

### THE SUNDAY SCHOOL.

LESSON VI, FOURTH QUARTER, IN-TERNATIONAL SERIES, NOV. 10.

Text of the Lesson, I Sam. x, 17-27-Menory Verses, 24, 25-Golden Text, Ps. xevi, 1 - Commentary by the Rev. D. M.

17. "And Samuel called the people together unto the Lord to Mizpeh." Israel was chosen to be a special people unto God above all people on the earth; separated from all others unto the Lord, that He might shew through them who and what He was, that thus all nations might know Him for their good (Ex. xix, 5, 6; Deut. vii, 6; II Sam. vii, 23). When therefore they desired to be like other nations (I Sam. viii, 5, 20), they went right contrary to the will of the Lord for them. Samuel told them just how the king they desired would treat them (viii, 11-19), but they insisted on having their own way. The steps by which the Lord brought Saul to Samuel are fully recorded in chapter ix, and the first part of this chapter x, and form one of the most interesting, instructive and practical of all Bible stories. A precious nugget which I enjoy and love to pass on is found in x, 7, "Do as occasion serve thee, for God is with thee."

18. "Thus saith the Lord God of Israel, I brought up Israel out of Egypt." The suggestiveness of Mizpeh was seen in our last lesson, and there the people saw the power of the Lord on their behalf. Now they are again before the Lord, but turning their backs upon Him deliberately in order to be like other nations. He reasons with them concerning their conduct, reminding them of His love to them when they were slaves in Egypt and how He delivered them from all their oppressors. They should therefore consider that they were His property, a people for His own possession (Titus ii, 14, R. V.), and that He and not they should have the right of deciding in all things concerning their wel-

19. "Ye have this day rejected your God, who Himself saved you out of all your adversitles and your tribulations." uel at first felt that they had rejected Him, but the Lord said, "They have not rejected thee, but they have rejected Me," and He added that in doing as they had done they were only treating Samuel as they had always treated Him (chapter vili, 7, 8). When Israel murmured, it was not against Moses and Aaron, but against the Lord (Ex. xvi, 8). See the application to us in Luke x, 16, and let us consider well that all that touches the Lord's people touches the Lord Himself (Zech. ii, 8; Acts ix, 4, 5), and all rebellion or complaining on the part of His people is against Him.

20, 21. "When they sought him, he could not be found." All Israel presented them-selves before the Lord by their tribes, and the lot was cast for the tribe, and for the family, and for the man, and the result was that Saul, the son of Kish, of the tribe of Benjamin was taken, but he could not be found. God knew the man whom they would like and had chosen such a one for them, and now He guided the lot to bring him before them, for "The lot is east into the lap, but the whole disposing thereof is of the Lord" (Prov. xvi, 33).

22. "The Lord answered, Behold he hath hid himself among the stuff." The word translated "stuff" has nine different meanings given to it in this book alone. It is translated furniture, armor, carriage, artillery, weapons, vessels, things, etc. Somewhere and somehow, and for some reason, Saul hid himself. He knew through Samuel that God had selected him (chapter x, 1), and knowing this it was a becoming thing not to put himself forward, but let all see that he had no hand in the election. It did not cost him a penny for votes; the place sought him, not he the place. What a contrast to many elections in our day!

23. "When he stood among the people, he was higher than any of the people, from his shoulders and upward." In addition to this statement we find in chapter ix, 2, that he was a choice young man, and that there was not a goodlier person in all Israel. Size is not everything, however, else Goliath and other giants might be envied, neither is outward appearance, as Samuel afterward learned when he appointed a man after God's heart instead of one to please the people (chapter xvi, 6, 7). Contrast the youth and probable slight figure of David (xvii, 33); also what is written of Saul of Tarsus (II Cor. x, 10).

24. "See ye him whom the Lord hath chosen, that there is none like him among all the people? And all the people shouted and said, God save the king." As we said in a previous verse, Saul was the Lord's choice that He might please the people and for the time being satisfy them, and so in due time humble them. As on another occasion, "He gave them their request, but sent leanness into their soul" (Ps. cvi, 15). The people have now a visible king, a choice man and a noble looking one; they are like other nations in the matter of a king, but the invisible one, their Redeem-

25. "Then Samuel told the people the manner of the kingdom and wrote it in a book and laid it up before the Lord." All this state of affairs had been foreseen by the Lord and fully written about in Deut. xvii, 14-20. This it was, probably, with perhaps additions, that Samuel wrote in the book. Now if the king would consider himself the Lord's representative, and act for the Lord toward the people, in all things consulting Him and obeying Him and honoring Him, all might yet be well. but to please self or the people or to rely on human wisdom or strength will spoil ali.

26. "And Saul also went home to Gibeah, and there went with him a band of men, whose hearts God had touched." God would help him by giving him helpers and friends. He does everything to make it easy for us to do right if we are only willing to serve Him in sincerity and truth. He is the same God who saw that it was not good for Adam to be alone (Gen. ii, 18); who also sent the disciples out by twos (Luke x, 1), and He always, in due time, provides helpers for such as are willing to dwell with Him for His

work. 27. "But the children of Belial said, How shall this man save us? And they despised him and brought him no presents. But he held his peace." Saul was in the place of God's representative and as such had his friends and his enemies. It has been and will be ever so. See John xv, 18. As king of Israel he in a sense typifled Christ, the true King of Israel (John i, 49), and before his enemies held his peace, or, as in the margin, "was as though he had been deaf." See also Ps. xxxviii, 13. The wise men from the east brought Jesus gold and frankincense and myrrh, but many who bear His Name today bring Him no prosents. See Rom. xii, 1, 2.

The bones of Judas Iscariot are said to be preserved among the relies in the cathedral at Milan.

JOHN FRIEND 417 Dundes Street,

ENGLISH METHODS WITH POULTRY

The methods which prevail in England for growing poultry and their care vary so widely from those in vogue here that our readers may find something to interest them in the following, gleaned from the writings of C.E. Brooke. Food should be mixed fresh for every meal and fowls should have only what they eat—leaving none. Through the winter they are fed in the morning with a hot mess of middlings and barley meal. From November to March their midday meal is boiled barley, and the later meal is wheat or maize. Now and then fowls in confinement should have a fresh piece of sod at which to pick. A little salt should be added to their food now and then, and occasionally a small quantity of Epsom salts. For a full day after chickens are hatched they need no food, and for the following week they should be fed chopped boiled eggs and soaked bread and milk, feeding them every two hours for the first fortnight. For the next two weeks they should have grits, boiled rice, barley or potatoes, followed later by bruised barley, wheat, or corn meal. During chickenhood four meals daily are best. The mother should have grain and meal. When moulting, a slight addition of cayenne pepper to the meal, with some hemp seed now and then, and an occasional meal of minced raw onions will be found advantageous. The midday meal at all seasons should include some green food, and when winter approaches should include meat and fat, minced liver, or horseflesh. When fattening for market, the fowls must be kept sheltered. Mutton fat, chopped fine and boiled with milk, is desirable to add to the ground oats or buckwheat, and this is administered in

A Simple Saw-Mill. Fig 1 shows in horizontal section a method of cutting down a standing tree by the aid of spring poles. An inch hole

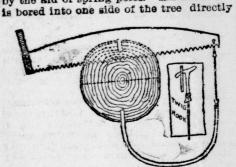

FIG. 1-HORIZONTAL SECTION OF TREE.

opposite the point where the saw-cut is to begin. Into this hole is inserted the butt-end of an elastic pole, cut to the proper length. To the tip of the spring pole is attached a hook cut from a forked | wheat and less corn, it will be a blessing branch. This end is then bent around in disguise to the swine grower. We beand the hook inserted into the hole in lieve that it is an easy problem to solve the saw near one end. This spring pole holds the saw close to the work, and ventive hygienic methods are used. Give assists in hauling it, as the sawyer, grasping the handle, pushes it from him. When the tree is cut half off, the hook is

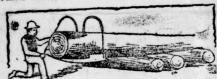

FIG. 2-MODE OF CUTTING FALLEN TREE. liberated from the saw and the springpole shifted to the opposite side of the tree, where it assists in completing the

Fig. 2 shows a similar method of cutting the fallen trees to logs of any desired lengths. In this case two springpoles are inserted into holes in the upper side of the tree, as the distance from the ground would not admit them on the lower side.

Farm Notes.

Alva Agee, in Farmers' Home, says it is exasperating to the farmer to be told that he is doing well, when he knows better his own state of affairs and that he is not doing well.

The advocates of turnips have much to may about their being the sheet-anchor of British agriculture, yet from 1874 to 1894 the area decreased from 2,133,836 acres to 1,956,573 acres. This is a land of chesp labor and without Indian corn.

Analyses of root crops made by the Ontario experiment station, as shown in their last report recently to hand, enforces areaw the old belief that roots carry too much water for economy in handling, the turnips showing from 90 to 93 per cent, water and mangels from 85 to 90 per cent. water. And while the yield of turnips per acre ran as high as 20 tone, only 11/2 tons of dry matter resulted, or about the amount found in 3,400 pounds of hay. The mangels showed slightly over three tons of dry matter, or about what a first and second crop of clover should give. Who says that they are as cheaply raised as the clover

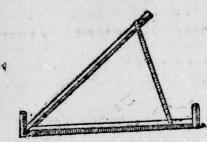

erop? Turnips are often sown on land that has borne a crop of corn or potatoes, with the idea that they will grow after frost has killed the main crop, and that thus some profit may be got without any west. But this overlooks the fact that turnips are a very exhaustive crop, especially of phosphate, In England phosphate is mainly used in growing turnips which are fed off by sheep, and their plant food is thus returned to the soil almost immediately. In this way, the land is put in good condition for a wheat crop. Here, where the turnip crop is always removed, its effect is to make the soil poorer for the crop that

follows it. There are some farmers who still think that there is nothing lost in allowing weeds to grow on land that has no crop, provided the weeds are cut down before going to seed. It is true that the weed contains all the mineral and nitrogenous plant food that it has taken from the soil. When it decays, as it lies, most of this is returned to the soil. But there is always some waste, and if it were otherwise the plant food in the weed is not as available fertility as that which it took from the soil during its growth. The time when a weed can be destroyed with greatest benefit to the soil is immediately after it has germinated. This is also the easiest time to kill it. The worst weeds, like the perennial Canada thistle, for example, are, when first germinated, as easily killed as any of the annual weeds. The slightest brush with a hoe will destroy them. Leave them a few weeks, and these perennial weeds begin to form their under-ground system of roots, and it takes a long time to accomplish what could so easily have

been done at first. ODOROMA removes discoloration from

USES FOR A TEN-FOOT ROD.

Among the things which are found convenient in every farmer's work shop is a ten-foot pole, made thus: A piece of wood, one and a quarter inches square and ten feet long, is nicely smoothed with the plane and then marked as follows: One side has a mark every three feet, to indicate yards; another side is marked every two feet; the third side is marked every foot; while the fourth side has feet, inches, and half-inches, the pocketrule furnishing the smaller sub-divisions of an inch. This measure will be found useful in many places. For instance, when a small building is being started, stakes are set in the ground at each corner. The proper angle of the sills may be found by measuring eight feet on one, and six on the other. Bring them together until the ten-foot pole just reaches both marks, as in the engraving, and a right angle is the result. Again, the

proper length for a post, to support a low reof, is quickly measured with such a pole. If a corn-crib is being built, six feet wide at the bottom, seven at the top, and nine feet high, the proper length of the various scantling is readily measured off. Many other uses will be suggested when this simple implement is at hand.

Preventing The Ravages of Hog Cholera. Very much has been written on the

subject of hog cholera. The matter has been studied by Government commissions, by veterinarians, by swine-growers and by others generally interested, yet the results of their studies are of little practical value in the way of a remedy or remedies. The writer is one who is very firmly of the opinion that preventive methods are the only ones entitled to serious consideration. The foolishness and unscientific methods of growers are, and have been, largely, if not exclusive-ly, responsible for the ravages of this disease in the swine herds of the West and South. Exclusive corn feeding and unsanitary surroundings have made our swine peculiarly susceptible to disease. We believe it is impossible to rear and fatten a hog on an exclusive corn diet and have him healthy. Then again, the breeders have thus given us an animal which is not robust or in a condition to resist disease. He is simply a mass of obesity lacking in muscular development and constitutional vigor-a ready prey for any contagion to which he may be exposed. If the lew price of wheat and the comparatively high price of corn will continue another year, thus stimulating the practice of feeding more -that of avoiding the disease-if pre-

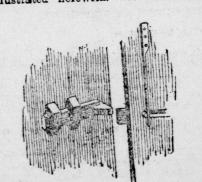

hogs range in summer, grass and water, more wheat and other cereals, with less corn, and we shall in one or two generations of hog life have practically wiped out this scourge. The normal condition of our domestic animals is health, and if we feed and care for them in a proper manner they will not get sick; but it is useless to violate nature's laws and hope to escape the penalty.

The Value of Wheat Feeding for Hogs.

From many parts of the West we hear of successful results of feeding wheat to domestic animals. Its use as a food fer cattle and horses, whether the whole grain is fed or its by-products, has long been well known, and the present experience has confirmed that knowledge. But the greatest good likely to result from the corn crop failure of 1894, and the consequent use of wheat in its place, will be the feeding of wheat to swine. Its value here, when the price makes it practicable, is incalculable. We have fed too much corn. We have for many years made this cereal the almost exclusive food of swine, and we have thus brought on severe punishment. Exclusive corn feeding to hogs has given us a race of domestic animals winch are debilitated at birth. No animal can be fed on such a highly carbonaceous food as corn without becoming physically demoralized. We do not think first-class pork was ever made on such a diet. Swine thus fed when slaughtered, always have more or less inflamed viscera, the result of impaired health. Perhaps the greatest harm resulting from this one-sided diet is that it impairs the animals' vitality and makes it an easy prey for many contagious diseases which a well-fed and healthy animal would readily resist. This has been a prominent factor in making hog cholera the destructive agent that it has so long been. With the range of clover pasture for the swine, and some wheat in the grain ration, this pest would soon cease to be formidable.

Barn Door Fastening.

A device for fastening a barn-door is illustrated herewith. It consists of a

wooden bolt, playing loosely in two wooden guides. A pin of tough hardwood, two and a half to three inches long, is firmly driven into the bolt, and extends through a transverse slot in the door. On the inside of the door is fastened a spring of ash or hickory, with its free end resting against the pin. As the door is closed, the bolt catches on the wooden fastening driven into the opposite door-post, and is held there by the spring inside of the door. This is a very simple contrivance, but is none the less valuable. A bolt on the barn doors is always in place. Even where honesty the rule, it is better to lock the door before the horse is stolen.

Work-horses do better on a peck of carrots and a peck of oats than they do on two pecks of oats.

Do not take any substitute when you ask for the one true blood purifier, Hood's Sarsaparilla. Insist upon Head's and only Hood's.

TEMPERATURE FOR CREAM.

Miss A.E. Maldment, an English dairymaid, gives the following sensible and practical directions on this important subject. In preparing the churn, scald with boiling water, and immediately cool with cold water. When the temperature of the churn is reduced to that of the prepared cream it is ready for use. Decide the temperature of cream for churning according to that of the surrounding air. The following table may be safely adopt-

|   | ed:                                                                          | The Art State |

|   | Temp. of air.                                                                | Temp. of crea |
|   | es Aormoos                                                                   | 55 degre      |
|   | es degrees.                                                                  | 56 "          |
| ä | 60 66                                                                        | 57 "          |
|   | 60 00                                                                        | 58 "          |
|   | 50                                                                           | 59 "          |
|   | 58                                                                           | 60 "          |
| 1 | Temp. of air. 66 degrees. 64 63 60 58 60 60 60 60 60 60 60 60 60 60 60 60 60 |               |

To heat the cream, place vessel containing it in hot water and stir continually so as to warm equally. Be very careful not to warm it too much, or the butter will be injured and the water into which the vessel of cream is plunged should not be more than 100 degrees F. At any time when the temperature of the air is above 55 degrees take that of the cream over night, and if over 60 degrees cool it by the best means at command. In a covered can it may be hung in the well, or it may be placed in a tub of cold water, or in a dry but cool cellar.

It is better to reduce temperature to a point too low for the purpose (for it can be easily warmed again) than to have it even a few degrees too warm when required for churning. If the cream is too thick for free churning it may be corrected by adding water, which, carefully mingled with it, will help in reducing the temperature if that is necessary. Cream churns best when yielding three pounds of butter to every gallon. The thermometer (without which dairy work cannot be pro-perly carried on) should be of glass as most easy to clean.

Continuous Stabling of Cows. In a lengthy article in the London Live Stock Journal on dairying and feeding

herds at Birmingham sewage farm we find the following: "The cattle upon the various farms come up to something like 600 head, the majority of them being housed the greater part of the year, the milking herds, numbering 200, never leaving their stalls. The largest of the homesteads is the one at Tyburn, where the buildings are all new, most efficient, and fitted with every convenience for attending to the cattle to the best advantage. The first shed we entered contained seventy-two milking cows, thirty-six on a side; these stand with their heads to the outer walls, with an 18-foot wide road up the center for the purpose of bringing down the carts to take away the manure at once. There are racks and mangers in front, and a water trough between each two cows, to which they have access at all times. Their feed consists of pulped roots and chopped hay in winter, to which is added a mixture of ground corn to the extent of 8 pounds per head per day. The whole of the feed being of such a succulent character has the effect of producing enormous yields of milk; records are periodically taken, and as much as 1,400 gallons have been obtained from a single cow during the year, and some of the cows, commencing at seven gallons of milk per day after calving, were at the end of ten months still yielding about five and Italian ryegrass during the summer, to which is added a mixture of ground of ten months still yielding about five gallons daily. These cows are almost en-

very good condition." We have quoted this article mainly because of the system of stabling cows pursued, out of fairness to those who claim that continuous stabling of cows is not inimical to their health and productivity. The other remarks are included for the incidental information that they give.

tirely of the Shorthorn type, several of

them having registered pedigrees, and are

purchased when about four years old and

near calving, and are usually bought in

The Udder Not a Vessel.

Major Alvord, in a paper given to the Maine Board of Agriculture, said: "The udder should not be likened to a vessel, a 'bag,' or even a sponge. It does not hold any appreciable quantity of completed milk at any one time. The milk cisterns, where alone completed milk can be found in the udder, and this of very poor quality, -are quite small, the four together seldom holding more than a pint. The glands, between the milkings, bring together the materials, store up a considerable quantity of the serum or fluid portion and prepare to make the milk. In the cells of the udder, the fat globules are formed. They are parts of the anatomy of the cow, like the fat in other parts of the animal body; they form by the building process, ripen, loosen or slough off and are then moved along, coated by the serum, through the ducts and channels, to the cisterns. This final process, the mixing of fats and serum in due proportion, to make milk, occurs almost wholly during the active operation of milking. The distended udder may indicate that the cow is ready for milking, but it is not true that 'the udder is full of milk.' There is practically no fully formed milk in the udder when the tests are seized by hand or calf. The milk making by nature is coincident with the act of milking."

Live Stock Notes.

Don't keep your hogs or any other fat stock too long. There is not much profit in trying to fatten stock in cold weather. It does not pay to give stock stimulating food. Good, wholesome grain and hav or grass, for cattle, horses and sheep and grass and good grain for hogs, are all that is necessary to make them grow to perfec-

tion. In view of the favorite prospect of Western corn, and its probable reasonable price, an exchange of a portion of high-priced hay for a supply of it would be profitable to many dairymen. Don't, however, sell off your scanty supply of hay without supplying something just as good or better in

It may cost an extra effort and many an extra dollar to tide over these times, but dairymen should think twice before selling their cows for a mess of pottage. They will need them next year to help keep things running. I have already heard of those fellows who are going to sell their hay when it reaches \$20 a ton, and feed straw to their cows. I say, don't do it, unless you take at least half of the hay money with which to buy grain for the animals.

Many that know better than to fatten the nondescript steer of the East have little but Hobson's choice, for the dairy breeds have converted the steers of this section into fit companions of the railsplitting hogs of the South. All frame and stomach, they belong to the class that it is said one can see through with the sperm-oil lantern-that is, sidewise, not perpendicularly, for it is a good ways through them in this direction. His day is numbered, for those devoted to him have their days numbered, too.

Consumption, La Grippe, Pneumonis and all Throat and Lung diseases are cured by Shiloh's Cure, A Fact Worth Knowing.

# AM AS WELL AS WISH TO BE."

Miss Blake, of Hamilton, Ont, After Using Paine's Gelery Compound, is a Picture of Womanly Vigor and Beauty.

Story for All who Stand in Need of Perfect Health.

Miss Isabella Blake, of 302 Hughson street, Hamilton, Ont., is one of the fairest and best known young women in the Ambitious City. Today she is a picture of womanly health, vigor and beauty, and joyfully declares, "I am now a new woman, can enjoy life, and am as well as I wish to be."

The cold touch of the destroyer, death, has made her shiver, and caused her to Muskoka Lakes, Georgian Bay and Nirise to think of the dark gloom of the silent tomb.

When Miss Blake's heart was faint, beauty, and joyfully declares, "I am now a new woman, can enjoy life, and am as well as I wish to be."

WESTERVELT, Principal,

An Effective Rebuke.

A few months ago the son of an American millionaire railway director was, through his father's influence, given a position of some importance on one of the largest railways in the west. He had just graduated from college, and the orders which he from time to time issued to the men under him always made use of the longest most unusual words. This habit led to some rather expensive blunders, and the matter coming before the general manager, he suggested a change in style to the young official in the fol-lowing letter: "In promulgating your lowing letter: esoteric cogitations and in articulating your superficial sentimentalities and amicable philosophical or psychological observations, beware of platitudinous ponuerosity. Let your conversational communication possess a clarified conciseness, a compacted comprehensibleness, a coalescent consistency, and a concatenated cogency. Eschew all conglomeration of flatulent garrulity, jejune babblement and asinine affectation. Let your extemporaneous descantings and unpremeditated expatiation have intelligibility and veracious vivacity without rhodomontade or thrasonical bombast. Sedulously avoid all polysyllabic profundity, pompous prolixity, psittaceous vacuity, ventriloquial verbosity, and vaniloquent vapidity. Shun double netendre, prurient jocosity, and pestiferous profanity, obscurant or apparent. In other words, talk plainly, briefly, naturally, sensibly, purely and truthfully. Keep from slang; don't put on airs; say what you mean; mean what you say; and don't use words." The young official took this gentle hint and changed his style.

# Women in Japan.

Peculiar Treatment of Wives and Sisters-Their Social Position Is Interior, but They Bear Their Full Share of Burdens - How the Soil Is Cul-

workingmen of Japan have no reason to complain that the women do not carry their half of the load. Whatever may be the position of the gentler sex in the household, although she is not allowed to hold property, or share in the responsibilities that are usually divided between husbands and wives in America, she is at least permitted to an equality with man when there is any hard work to be done. Wherever you go, in the cities or villages, or the farming communities, you find the wife and mother working side by side with the husband and sons, plowing, planting, and reaping, and at sunset taking home a large portion of the harvest in a big basket on her back. Whenever you see a man between a pair of shafts tugging to haul a heavily loaded cart up a hill, there is always a woman pushing from behind, bare-headed, barefooted, except for a pair of straw sandals, and wearing a pair of blue cotton leggings like tights from her waist to her ankles. Sometimes the baby is playing with a few rude toys on top of the load. Sometimes he is strapped to her shoulders, and his head drops from one side to the other with every motion of the body until you fear it may fall off.

fear it may fall off.

You find women standing knee deep in the rice paddys, which are a thick mush of water, soil and manure, premush of water, soil for the seed, and paring the ground for the seed, and then, when the green shoots appear above the surface, they wade in again to separate and transplant the little bunches of grain. You can scarcely pass through a field without finding a woman weeding; you cannot travel a country road in the morning without meeting hundreds of them with heavy bamboo packs loaded with vegetables and other farm products on their way to market; and while woman may be satisfied with her assignments, it seems to me that the men give her all the back-breaking work to do.

There is very little difference between the dress of the sexes in the agricul-tural districts, and as you go farther into the interior it becomes less, until you find the farmer and his wife and their sons and daughters wearing exactly similar apparel, and very little of it. so that you can scarcely distinguish them, except by their hair.

Silk and tea, the two chief exports of Japan. are raised almost entirely by the labor of woman, and in the methe labor of woman, and in the me-chanical arts she appears to particichanical arts she appears to participate equally in the labor, although she gets little or none of its credit. Her deft fingers fashion many of the deft fingers fashion many of the choicest pieces of cloisenne, and the ceramics, and in the decoration of lacquer that which comes from her hands is equal and often superior to the work of man. She weaves mats and behind. other articles of straw, she braids bambo baskets, and the thousand and one bo baskets, and the thousand and the control of the trunk or the branch of the branc husband in fishing boats and dries and salts the product that he brings home she assists in house-building and cabinet-making, and in various other oc-cupations which in the western coun-tries are not considered suitable to her sex, and does most everything that man can do quite as well and as rapidly, although her wages in every employment are only a little more than half of his. She is always present in the shops and stores, usually as bookkeeper and cashier. Some of the largest stores are managed by women, and few are owned by them. And, although the laws and social regulations of the country prohibit, sometimes you find a woman whose force of character defies both courts and customs and directs the financial affairs and the business of her family, as well as the matters that pertain to the household.

There can be no market for American agricultural implements and machinery in Japan for two very simple rea-First, the farms are not big enough, and, second, labor is too plenty. If a Japanese farmer should introduce a modern reaper and self-binder upon his farm he would cut down everything in the way of crops while he was turning it around, and there wouldn't be anything left for him and his family to do all the rest of the sea-

Most of the farming implements are of a very primitive character and many are home-made. Just as the New England farmer used to whittle his axe helves before the big log fire in the winter, so the Japanese farmer makes his own flails and rakes of bamboo, and the handles for his hoes, spades and sickles in cold and stormy weather. The iron portion is fashioned at the nearest blacksmith shop. These tools last for a lifetime, as they are kept with great care, and are often passed down from generation to generation. Everything is done by hand. You can travel all day in some of the farming counties without seeing a horse or a mule or any other kind of a beast of burden, and goats and sheep, cows and swine are equally scarce.

Japan is one vast garden, and as you look over the fields you can imag-ine that they are covered with toy farms where children are playing with the laws of nature and raising samples of different kinds of vegetables and grain. Everything is on a diminutive scale, and the work is as fine and accurate as that applied to a cloisenne vase. What would an Illinois or an lowa farmer think of planting his corn, wheat, oats and barley in bunches, and then, when it is three or four inches high, transplanting every spear of it in rows about as far apart as you can stretch your fingers. A Japanese far-mer weeds his wheat fields just as a Connecticut farmer weeds his onion bed, and cultivates his potatoes and parley with as much care as a Long Island farmer bestows upon his aspara-

gus or flowers. When grain is ripe it is cut with a sickle close to the ground. The bot-tom ends are carefully tied together with a wisp of straw; the bunch is then divided and hung over a bamboo pole or a rope, like Monday's washing. to dry; sometimes in the fields and sometimes in the back yard, and even

in the street in front of the house. When it is thoroughly cured the heads of grain are cut off with a knife and the straws are carefully bound up and laid away in bundles. The heads are then spread out upon a piece of matting and beaten with a flail. other method of threshing is to take

through a mesh of iron like needles.

After the threshing is done the grain After the threshing is done the grain is taken up in a sort of scoop basket made of bamboo, and shaken by one woman, who holds it as high as her head, while another woman stands by with a large fan, which she waves rapidly through the air and blows the lighter chaff away from the heavier. rapidly through the air and blows the lighter chaff away from the heavier grain as they are falling. The richer the field, and not having any paper claims as they are falling. The richer the field, and not having any paper claims. Miyanoshita, Japan, Sept. 10.-The | farmers have separators, built upon a primitive plan and turned with a crank. People often winnow grain by pouring it from a scoop upon three or four feet wide, upon which it is tossed up and down gently so as to leave the chaff in the air when it falls. Another method of threshing is to beat the heads of grain upon a board or a row of bamboo poles. Sometimes you see a whole family at it.

> In passing through country districts In a carriage or jinrikisha one finds the greater part of the roadway pre-empted by the farmers of the neighborhood for the purpose of drying their grain, which is spread out in thin layers upon long mats, and is raked over every now and then by an old woman in order that the particles on the bot-tom may get their share of the sun. The straw, which is still tied together in bunches, is hung over racks along the roadside during the day, and carried under shelter at night to protect it from dampness as well as from thieves. Sometimes the racks are 30 to 40 yards long, and 18 or 20 feet high, with a series of poles, and the farmer's wife or one of his daughters comes along at intervals to inspect it to see the roadside during the day, and caralong at intervals to inspect it, to see that it is curing evenly, for it is almost as valuable as the grain.

Every particle of straw is saved, and it is put to a thousand uses. They make of it hats, shoes, ropes, roofs, matting, the partitions of floors of houses, waterproof coats, baskets, boxes and a thousand and one other useful They braid it for fences, articles. They braid it for tences, too, and the finer, softer qualities are cut up for fodder.

There is very little hay raised in Japan. The grass is very wiry and in-

digestible. It cuts the intestines of animals. Some alfalfa is grown, but it does not prosper. In the neighborhod of Kobe, which is one of the seaports on the southern shore, the soil seems to be better adapted for hay, and the best beef comes from that lo-cality. M. Howard, of Yokohama, keeps a cow in his stable with his horses, but imports all his hay from California.

The ordinary Japanese horse, which originated in China, and is called a griffin, seems to like straw and thrives upon it, but he is small and ugly and is not capable of much endurance. He resembles the Texas broncho in appearance, but a journey of fifteen miles will use him up. They chop the straw very fine for feeding purposes, mix it with oats, barley, millet and other grains, and by adding water make a kind of mush. Oxen are given the same food, and in some portions of the country one sees a good many of them. They draw their loads by ropes stretched from a collar to the axle of the two-wheeled cart. One man leads them by cords attached to rings in their noses, while another steers the vehicle with a tongue that sticks out

On very rare occasions you may find a man plowing with a cow or an ox, young tree with a proper curve to it and is all wood except a narrow pointed blade, which is fitted into the framework. It has only one handle.

Every variety of agriculture is carried on in a manner similar to that I have described, and the soil is in constant use. A couple of acres is considered a large tract of land for farming purposes. Most of the farms are of smaller area, and the crops are greatly diversified. Upon such a little spot of land will be grown almost everything known to the vegetable kingdom; a few square feet of wheat, barley, corn and millet, a plat of beans, perhaps ten feet wide by twenty feet long, and an equal amount of potatoes and peas, then a patch of onions about as big as a grave, beets, lettuce, celery, turnips, sweet potatoes, vegetable oysters and other varieties of cereals and roots occupy the rest of the area.

The farmer looks upon his growing crop every morning, just as an engineer will inspect the movements of his machinery, and if anything is wrong repairs it. If a weed appears in the bean patch he pulls it up; if a hill of potatoes or anything else fails it is immediately replanted. And when he cuts down a tree he always plants another to take its place. The artificial forests of Japan cover many hundreds of square miles, and by this accuracy, economy and care, the prosperity of the country is permanently assured. As one crop is harvested, the soil is worked over, fertilized, and replanted with something else.

The largest area of agricultural lands in Japan is devoted to raising rice, perhaps as much as nine-tenths of the whole, and as that crop requires a great deal of water, the paddys are banked up into terraces, one above the other, and divided off into little plats 25 or 30 feet square, with ridges of earth between them to keep the water from flowing away when they are flooded. All farming land is irrigated by a system that is a thousand years old, some of the ditches are walled up with bamboo wickerwork.

The farmers live in villages, and their farms are detached, sometimes a mile or two or three miles away from their homes. There are no fences or other visible marks of division, but every man knows his own land, for it has been in his family for generations. Irrigating ditches and little paths are

usually the boundary lines. Theoretically all the land belongs to Emperor, but the greater part of that under cultivation has been held in the same families for generations, and always descends from the father

to the oldest son. The official statistics of Japan show that there are 11,400,008 men and 10,-948,053 women engaged in agriculture, which is more than half the total population.—Wm. E. Curtis, in Chicago Record.

### FACTS ABOUT BANK NOTES.

They Have Been Used for Many Curious Purposes.

Curious and not uninteresting is the fate which occasionally befalls banknotes, as the following instance will show: Some time ago a wealthy gentleman in the north of England quite a sensation at a fancy dress ball by appearing in a costume covered entirely with banknotes, which were stitched on. The gentleman se-cured the first prize for the best dress handfuls of straw and put them of the ball, but it may, perhaps, be questioned whether he arrived home without finding himself minus a few

back of a "fiver." A few years ago a banknote was

made use of by an unlucky gambler, in a sad and tragic manner. The unfortunate man, who had ruined himself beyond redemption on the turf, blew his brains out, and his last banknote served for the wadding of the

laborer who one day presented at a bank a rag of gray paper, crumpled and pulpy, the type hardly legible, which he said was a banknote. His explanation was that a pat goat in his planation was that a pet goat in his kitchen had got hold of and eaten it -a goat of expensive habits. The note had been in the animal's stomach some time before it was missed, and was suspected to be there because one of the girls had seen Nanny "mumbling over" a bit of gray paper. the owner went through a serious domestic difference of opinion and mental struggle before he decided whether to sacrifice the pet on the chance of recovering the money. The strug-gle betwen sentiment and "siller" ended unfavorably for the goat, and after all, the "promise to pay" extracted ed from so strange a hiding place was so bechewed and mangled that the poor man was kept in suspense for some time as to whether he might lose both his money and his pet. But his story was ultimately believed and he went away comforted.

There was an old, eccentric lady of

means, moving in high society, who always slept on a certain pillow, which she would allow no one to touch but herself, and always kept carefully locked up during the daytime. No one thought there was any particular value attached to her pillow, but put her conduct down to eccentricity. After her death, accident disclosed the fact that the pillow contained banknotes amounting in value to several thousand dollars. No doubt the old lady found it very soothing to sleep on so wealth. Readers who suffer from insomnia may feel inclined to take the hint.

For Centuries Regarded as Forerunners of Great Events.

Several Instances That Are Cited From History.

Comets That Shone on the Great Na poleon-The Assassinations of Presidents Lincoln and Garefield Foretold.

The approach of Faye's periodical comet naturally raises the question to what extent, if any, this earth of ours is influenced by these strange denizens of heaven. That they have some influence has been stoutly maintained by harbingers of tremendous changes in astrologers of all ages.

Albumazar tells us that comets becoming first visible in Aries signify and that drought will be especially prevalent. Now, the comet of 1870 appeared in Aries, the sign of Germany, and in that year the Franco-Prussian war was begun and several districts in Europe suffered severely from drought Donati's comet appeared in 1858, and was followed by the Italian war of The appearance of the great comet of 1861 coincided with a most destructive conflagration in London, and was immediatey followed by the outbreak of the civil war in this country. The assassination of Prestdent Lincoln belongs to the same epoch. This comet appeared in Gimini, the sign of the United States and London. The great comet (Comet B) was first seen in Gimini on May 22, 1881, and on July 2 of the same year President Garfield was shot. The same period was noted for its violent storms and hurri-Now, the ancient astrologers taught that the appearance of a comet in Gimini always signifies severe tempests and the death of some illustrious man.

Evidences of a like nature abound in history. A comet tenanted the heavens for several months before the birth of the great Napoleon, and another one of vast splendor became visible at the beginning of September, 1811, when he was at the height of his glory. More curious still, it attained its greatest luster in the latitude of Paris, and it vanished over the latitude of Corsica. When Napoleon was dying a comet appeared again-for the third time in his notable life.

In 1606 a comet appeared in England in the watery sign Scorpio, and soon afterward there was a terrible inundation in Bristol, Somersetshire, Norfolk and the eastern counties. tradamus, by the way, predicted this flood in 1555, 50 years before it took

place. Oriental potentates have for centuries been swayed by comets. Timour, when one appeared, consulted Abdullah Lissan, a famous astrologer, and was informed that it presaged the utmost disasters to his enemies and especially to the Ottoman Empire. Abdullah predicted thus, seeing that the comet was in the west of Timour's dominions, and in the sign Aries. Timour prepared for war, entered his enemies' territory and utterly overthrew them. In the reign of Selim II. (1572), there appeared a comet which had the brightness and magnitude of a Venus. This excited the monarch's apprehensions, which were augmented by the predictions of his astrologers, who foretold that this phenomenon announced the calamities which excessive rain would inflict upon the empire. "Forty days afterward," says the historian, "they imagined themseves threatened with a universal deluge; incessant rains overflowed the monarch's dominions in Europe and Asia, laid waste three of his chief cities, swept away men, cattle and houses, and rendered the bridges and public roads impassable for several weeks." Whiston has conjectured that the deluge mentioned in the Bible was produced by the near approach of a comet to the earth, and he further surmises that the end of the world may be produced by the approach of a comet prodigiously heated in its peri-

Even the great Charlemagne regarded comets as portents. Seeing one appear a few weeks before his death, he consulted his astronomers, and in reply to his secretary, Eginhard, who urged him not to grow uneasy, he said that was not dismayed at such signs, but feared the divine framer of them, who, being incensed with anger against a people or a prince, is wont in this way to admonish them of his wrath

convenient, wrote his message on the tween Octavius Augustus and Mark Antony, it was observed that comets were harbingers of the miseries that then befell them," and expressed the opinion that "such appearances fore-tell great events." Pliny writes: "A fearful star this comet is, and not easily expiated, as it appeared by the late civil troubles when Octavius was consul, as also a second time by the in-testine war of Pompey and Caesar, and in our days about the time that Claudius Caesar was poisoned and left the empire to Demetrius Nero, in the time of whose reign and government there was a blazing comet continually seen." Seneca exclaims: "Some comets are very cruel and threaten us with the worst of mischiefs; they bring with them and leave behind them the seeds of blood and slaughter." Socrates, writing of the seige of Constantinople, says: "So great was the danger that hung about over the city that it was foretold by a huge blazing comet that reached from heaven to earth, the like of which no man ever saw before." Anna Commenus, the daughter of Emperor Alexius, speaking of a comet that appeared before the invasion of the Gauls, says: "This happened by the usual administration of Providence in such cases, for it is not fit that so great and strange an alteration of things as was brought to pass by that coming of theirs should be without some previous denunciation and ad-monishment from heaven."

> Machiavelli, writing on the same subject, says: "Experience shows that some great commotions are the consequence of such signs as these." Milichius, a noted mathematician, says: "Much experience and observation show that comets announce great slaughter to the world, such as sacking of cities, subversion of kingdoms and other public disasters." The learned Grotius observes that "Comets and flery swords and such like signs are wont to be the forerunners of great changes in the world." Raphael tells us that "The great comet in 1680, followed by a lesser one in 1682, was evidently the forerunner of all those remarkable and disastrous events that ended in the revolution of 1688. It also evidently presaged the revocation of the Edict of Nantes and the cruel persecution of the Protestants by Louis XIV., which was followed by those terrible wars that with little intermission continued to ravage the finest parts of Europe for nearly 24 years." Princess Olive of Cumberland says on the same subject: "Comets have been seen to be the forerunners sometimes of especial good, but more often of excessive evil. Thus a comet or blazing star may be presumed to have aided the wise men of the east to Bethlehem. as recorded with solemnity in the New Testament. The downfall of many states has been foreshown by prodigious sights seen in the air. Jerusalem, Egypt, Rome and many other regions declare as much, and, indeed, all strange and unusual apparitions of this nature are generally followed by direful effects, such as convulsions of the earth, insurrections, wars and changes of dynasties. A comet appeared just at the time Charles of England was defeated by Cromwell, and in 1819 a comet appeared in the summer previous to the death of the excellent Duke of Kent and of his Majes-

ty George III.' Many other examples could be given of the popular belief that comets are mundane affairs. This belief is doubtless not as widespread as it was a century ago, but there are still some who coming first visible in Aries signity cling to the old so-called superstitions, evil to the countries ruled by that sign, and even the most skeptical must admit that very notable things have happened on earth while comets were blazing in the heavens.-St. Louis Globe-Democrat.

### GOLD IN ABUNDANCE.

The Expert Sent to Africa Made a Great Mistake.

The African gold fields of the Witwatersrand, now turning out \$40,000,-000 annually, had their share at the outset of adverse expert reports. It is nearly ten years since the Rothschilds sent thither Mr. Gardner Williams, at present the director of the De Beers diamond mines at Kimberly, an authority of the highest class, and he reported to his principals that there was no gold in the region. At present over two thousand heads of stamps are at work upon the ledge which he pronounced barren; and it is declared that the amount of "gold in sight" exceeds \$250,000,000. This is only field of the African outcrop. The deposits in Matabele Land show equal abundance and richness, and the work of their development is proceeding with great energy. Such a tremendous boom as that which the last year or two has witnessed in the South African properties must, of course, have its collapse, but the solid value of many of them may delay it for time, and perhaps when the downfall comes act as a sort of parachute and let the whole frabic down gently instead of tumbling it in a mass of ruin. The gold production of the Transvaal bids fair in no long time to reach \$100,000,000 annually, and there is no reason to imagine that it will materially diminish in a generation. The industry will in time take its normal direction undisturbed by booms, or speculative excesses, but undoubtedly has some powerful shocks and agitations to encounter first, concerning which the forecast of experts is as variable as the judgment of their predecessors on the value of the deposits. When they occur we shall know all about them. Till then each one is at liberty to guess for himself when the Kaffir bubble will burst, and the relative proportion of wind and guineas it will be found to contain. If there is an exorbitant volume of the former the latter are at least not wholly wanting, as they have been in some of the wildest and most extravagant enterprises which the history of speculation presents.-New York Tribune.

"Perhaps the most delightful friendships are those in which there is much agreement, much disputation, and yet more personal liking .- George Eliot.

KAFFIRS CANNOT STAY OUT LATE.

Kaffirs are known as Zulus. They are very ignorant, and go about almost naked. They travel on foot hundreds of miles from different sections of South Africa, to these gold fields, work about six months, save wages, return home, purchase ten bullocks, look up a wife, deliver the bullocks to the prospective father-in-law, and get married. Kaffirs are illiterate and perfectly harmless, and have a peculiar a bell is rung in every town and city, and he must go home. Should he be found on the street, without a permit his naked back. Kaffirs are prohibited from enjoying the sidewalks or pave-ments, and must walk in the street.—

# Wizard of Lightning.

Nikela Tesla and His Inventions in Electrical Science-His Studies, Experiments and Marvelous Inventions.

inventions in the world.

But at any rate, it has directed public still youthful inventor.

It is natural that the world should look with wonder on its great inventors. What they do often has the appearance of being the work of an especial "creative faculty." They seem to be men who have hade rather than merely formed something. In an age like the present, when so much of the world's industries depend upon mechanical use of nature's forces, the inventor becomes one of the greatest of public benefactors. This is especially the case when the saving economicssaving in time and in other expenditures—are so necessary. The available supply of the world's coal, for instance, is no doubt limited. Should this supply be prematurely exhausted the calamity would be beyond calculation. Engineering invention, if it can, must devise methods for its economical utilization and expenditure.

Are these other forces of nature still lying dormant or being let run on to waste-powers that are wanted in helping out the tremendous tasks which the eager workers of the world are having in hand? There is Niagara, with its seemingly almost infinite power, running to waste. Who can by searching such currents as he now uses, he says, and there are no waste. find out nature's secret methods and fit the apt contrivance to the natural law so that that and other similar wasting forces may come into play along with the other working forces of this "industrial age?"

These are some of the questions which nobody has studied more deeply or with more surprising success than Nikola Tesla.

But who is this deep prier into nature's mysteries, this wonder-working magician? Where did he come from? How came he here? And how came he to be what he is, to do the things which have already made his name famous?

In the first place, this Nikola Tesla, though plainly enough a man of geni-us, is no magician. He is no mere visionary. He is no child of luck. His achievements have been no accidents. He is one of the most logical of men. He has not jumped to conclusions. Every perceptive faculty has been alert; but so have all other co-ordinate faculties of the mind been alive and alert, each faculty instant in the doing of its own part toward the wanted and waited-for result.

President Jordan of the Leland Stanford University, is right in insisting as he does in a recent strikingly just ar-ticle in one of his educational reviews true genius, when he does the things at which men wonder and admire, has no lazy fiber in his brain. All the faculties work—work at their best. And they work at their best because they work suitably and all together. But Nikola Tesla—in America he is one of our "immigrants," as Emerson was, as Agassiz was, and some other such people whose names and services the new world will not soon let Tesla is now 38 years of age. He is by birth a Slav. His boyhood home was in the borderland of Eastern Austria, where Slav and Turk have so often struggled for the mastery. He was born in Smiljan, in the province of Lika. His father was a clergyman of the Greek Church, who had hoped to have his son succeed him in the sacred office.

As for his education, he spent four years in the public school, three years in the real school, three years in the higher real school at Cortstatt, and the or three years in the polytechnic school in Gratz. Austria.

By this time young Tesla had become so absorbed in his electrical studies, experiments and scientific ideas, that he saw, as he expressed it, felt that he must "get into the gulf stream of electrical thought." Accordingly, breaking away from all ties and traditions of the past, in 1881, he came to Paris, presently obtaining employment as an electrical engineer. It was not long, however, before it became plain to him that America was the place for him. Associated for a time with Edison, in whose shop he took off his coat the day he landed in America, he threw himself into the mid-stream of the then extraordinary intensity of electrical investigation and invention.

In 1887 the Tesla Electric Company of New York having been formed, he devised and brought into use the epochmarking motor for multiphase alternating currents, thus dispensing both with commutator and brushes.

Tesla was engaged about this time, contemporaneously with Prof. Ferraris, an independent inventor, in perfecting the demonstration of the enormously important principle of the rotary field motor-a new system of electric distribution and transmission of lewer by means of alternating currents.

The various Tesla patents having been acquired by the Westinghouse Electric Company, they began at once to be put to uses in many ways, to the inestimable advantage of the world's growing mechanical industries. In the year 1890 Mr. Tesla, severing his connection with the Westinghouse Company, devoted himself to the study saved him. of alternating currents of high frelecture on "Experiments With Alter- story you printed about me in this nating Currents," delivered before the morning's paper."

American Institute of Electrical En"Certainly," said the editor. gineers, and shortly after repeated be-fore similar bodies in London and in that article about him. He'd like to American Institute of Electrical En-Paris and elsewhere in the summer of 1891, marked a fresh era in the evolu-

tion of electrical applied science. At the present time Tesla is devoting himself to the working out of another great invention, but this time in the department of mechanical engineering known as the oscillator, from which immensely important results are anticipated. If successful, this new melanguage of their own. There is a chanical contrivance is a combination stringent law in force in the African of the steam engine and the dynamo, Republic which compels the Kaffir to by which, it is said, an engine of a be in his home at 9 p.m. At this time given power can be made about onefortieth the weight of the ordinary engine of the same power. In the oscillator the piston travels its path to and from his mother a policeman or con- fro 100 times a second, or oftener if restable puts him under arrest and he is fined ten shillings by the magistrate, and ten rawhide lashes are applied on in the opposite ends of the cylinder at the same time, thus balancing their motion and relieving the apparatus from the rapid shock of vibration. Just how revolutionary this new step in both steam and electrical engineer- mail.

\*\*\*\* Nikola Tesla is today the most inter- | ing is destined to be is not yet wholly esting personality in the department of certain. But in view of what is alelectrical investigation and engineering ready as good as certain that elecnventions in the world.

The fire which lately destroyed the steam in railway and other traction, Tesla laboratory in New York, consum- in the opinion of those most competent to judge, its importance can hardly be ing all the recent devices and creations over-stated. The problem, the worst to of his ingenuity—the results of years of be met, has been to devise the best such labor as only such a man is cap- type of engine for driving the simplest able of-had in it a touch of the tragic. and most economical form of dynamo. Of course, until the problem has been But at any rate, it has directed public completely worked out there remain attention afresh to the character and some things about it which the wary. achievements of this wonderful and inventor "keeps to himself and scarcely tells to any."
Some of Mr. Tesla's most brilliant ex-

periments of startling beauty have had to do with phenomena of light and heat as produced by electrostatic forces acting between charged molecules or atoms. As described by Mr. Marten, perfecting a generator that would give him currents of several thousand alternations per second, and inventing his disruptive coil, he has created electrostatic conditions that have already modified many accepted notions about electricity. For one thing, it has been supposed that one or two thousand volts potential would surely kill, but Mr. Tesla has been seen receiving through his hands currents of a potential of more than 200,000 volts, vibrating 1,000,000 times a second, and manifesting themselves in dazzling streams of light. An actual flame is in this way produced of intense whiteness that does not consume anything, "bursting from the ends of an induction coil as though it were a bush on holy ground,' with such vibrations as can be maintained by a potential of 3,000,000 volts. Mr. Tesla expects some day to clothe himself in a robe of lambent fire that will be altogether harmless. Indeed, would keep a naked man warm at the North Pole; and as for the curative uses of such currents, who can say or gainsay in electrical science and engineering during the past ten or twelve years

Another of the ideas which Tesla is working out is that of the transmission of intelligence, or perhaps of power, across wide spaces without the use of any connecting wire. This, of course, is not any experiment of trying to "do something by means of nothing." It is entirely scientific. It is an effort to utilize the earth itself as an electric conductor. It is an attempt to get at the law of those earth currents of electrical force in a way to devise some method of getting the mastery or them, and of bringing parallel rents, though widely separated in space, into "resonating" relations with each other, the one electrical current being turned to the other.

As Mr. Tesla has himself said: "In connection with resonance effects and the problem of transmission of energy over a single conductor, I would say a few words on a problem which constantly fills my thoughts, and which concerns the welfare of all. I mean the transmission of intelligible signals, or, perhaps, even power, to any distance without the use of wires. I am that "genius" should be taken as the "model in education." The man of vinced of the practicability of the scheme, and though I know full well that the majority of scientific men will not believe that such results can be practically and immediately realized, yet I think that all consider the de-velopments of recent years by a number of workers to have been such as to encourage thought and experiment in this direction. My conviction has grown so strong that I no longer look upon this plan of energy or intelligence transmission as a mere theoretical possibility, but as a serious problem in electrical engineering which must be carried out some day. The idea of transmitting intelligence without wire is the natural outcome of the most recent results of electrical investigations." Some enthusiasts, he says, have expressed their belief that telephoning to any distance by induction through air is possible; for himself he cannot stretch his imagination so far, but he declares his firm belief that it is practicable to disturb by means of power-ful machines the electrostatic condition of the earth, and thus transmit intelligible signals and perhaps power. We need not be frightened, he says, by the idea of distance. To the weary wanderer counting the mile posts, the earth may appear very large; to the astronomer it appears very small. Tesla thinks, it may seem to the electrician. The "big earth," as we call it, contains a certain capacity of electricity; let the electricians of the world find out how to measure that capacity, and then, reasoning solidly from one point to another, find out how to convert the "art and mystery" into the art and mastery of it, for the world's

everyday uses. Nikola Tesla is a man of a most interesting personality. Through his inventions he has begun to do the work of millions of workmen, so helping on immensely the great world's industries in order to the growing comfort and happiness of mankind. This man, of whom America is now so proud, is not without honor in the region of his birth. The Order of the Eagle has just been conferred upon him by the Prince of Montenegro, as previously the Order of St. Sava had been given him by the

Terrible Lesson From the Death of Mrs. Callahan-She flad a Model Husband But Her Unconquer= able Appetite Wrecked Her Home.

(From the New York Advertiser.)

There is material for a sheaf of temperance lectures in the story of the suicide yesterday morning of Mrs. Mary Callahan. Blessed with health, strength, and exceptional good looks, with a sober, industrious and kindhearted husband, with five pretty little children and with a comfortable home, she deliberately took to drink, and it was an attack of delirium tremens that made her kill herself.

Her husband, Peter J. Callahan, is an expert hatter, and has, since he married pretty Mary Kelly in Yonkers twenty years ago averaged \$25 a week at his trade. He was never out of work, and in fact kept a place in the largest hat factory in the country for more than sixteen years. In the first ten years of their married life they lived in a cozy frame house in Williamsburg, on which they were paying purchase installments instead of They were getting along happily and comfortably as could be wished when an epidemic of diph-theria in the neighborhood carried off four of their five children. Mrs. Callahan was prostrated by the blow, and had whisky prescribed to help her in her convalescence.

She grew to depend upon the stimulant, and finally became a drunkard. She fought against it, and was so remorseful after a drunken fit that her husband, who did everything in his power to help her reform, had to herself. The drunken fits were infrequent then, but they came oftener and oftener in the usual way as time went on, and after the birth of her last child, five years ago, she became an habitual drunkard.

By this time the payments had lapsed on the little cottage, and the family went to the tenements. Callahan could afford to have rooms in the better class of buildings, and they had all their furniture, but his wife's excesses would sooner or later bring them notice that they must

EEGINNING OF THE END. Then, in her wild excesses, she began to pawn their jewelry, the furniture, and even her husband's clothes, and the rooms they took had to be in the cheaper neighborhoods. Callahan had to lose so much time in taking care of his wife, for his kindness and patience never wavered, that he lost his steady place, but still his well-known skill made it easy for him to keep at work at almost his old

"If I break my word again, Peter," she said, "I will trouble you no more." Mrs. Martens, who lives on the same floor of the frame tenement at No. 117 Huron street, Greenpoint, said vesterday that Mrs. Callahan kept sober for a whole week, a record for her, and did not succumb to her craze and was noticed to be in a "shaky" condition on Sunday.

LITTLE ONES SAW HER DIE. It must have been a combination of remorse and delirium tremens that made her wake up her little ones at o'clock yesterday morning, kiss them good-bye and cut her throat be-She used her husband's fore them. razor for the deed, and one frenzied slash was enough. She fell to the kitchen floor, and when the neighbors came rushing in, attracted by the her last. The police took the little ones-three girls and two boys, ranging from 12 to 5 years in age-to the station, and from there sent them to the Children's Society, at No. 105

Schermerhorn street. Lily, the eldest, was the only one who could tell the story of her mother's suicide. The younger ones were hysterical, and could only cry for their father. Mr. Callahan came from South Norwalk in response to a telegram at noon, and saw that the body was prepared for burial. He is a little, softvoiced, prematurely gray Irishman, and his grief was pitiful.

"She was a good woman," he kept saying, "barrin' the drink, an' I never should 'a left her

He will take his children from the society today and go away with them to another neighborhood, where they can forget and where their pitiful story can be forgotten. He can support them nicely, and it may be that he can come to think, as outsiders do, that his wife found the best way out of all her difficulties.

### The Gothenburg Plan.

asked a friend. "What is the Gothen-burg system like?"

### Dr. Clark's Attitude.

Boston Mass., dispatch says: Christian Endeavor circles are much stirred up over an attack on Rev. F. E. Clark, D.D., president of the world's and united societies of Christian Endeavor, by Mr. John C. Woolley, the avell known temperance advocate. on account of Dr.Clark's alleged failure to fully ally himself with the prohibition understood to be that Christian Endeacome partisans in any respect.

more.

At Baltimore Miss Frances Willard carried the W. C. T. U. convention with her in a movement to include in fraternal relations Catholics and Hebrews. The question arose on the following resolution:

"Resolved, that Catholic women and nual conventions to ours and to establish branches of the White Ribbon Society within their own borders."

One of the delegates suggested that it might not be quite consistent for the Christian Temperance to ask Hebrews to affiliate. This roused Miss Wil ard. She said: "I want to recognize these two denominations, because in places where I have been, especially in the south, they exhibited sympathy with our work and have extended every courtesy. It has especially touched my heart that in meetings where I have presented the work of this organization among those who have welcomed me to the platform have been the Catholic priest and the Jewish rabbi. They knew what I came for, they knew what I presented, and if they were broad enough to go half way and extend the hand of greeting, should my hand be so small and withered as to not accept the clasp? I want to welcome them to us if they want to

The resolution was aconted. The convention indorsed the woman's temperance publishing association, conducted by women, in Chicago. It indorsed the temperance hospital, which does not administer brandy and other intoxicants in medicine. It rejoiced in the usefulness of the various young people's societies of the churches. It commends organization of a W.C.T.U lecture bureau, and expresses appreciation of the Demorest temperance medal contests. It asked for a place for women on the divorce commissions

of the various States When Armenia was mentioned Miss council of nations on the subject of Armenia. The amendment carried.

Resolutions were adopted extending watch her to see that she did not kill to Theodore Roosevelt "our hearty herself. The drunken fits were in- thanks for his bravery in standing for the right and demonstrating that the saloons can be closed on the Sabbath in New York city," and also express-"our appreciation of the action of Gov. Culberson, of Texas, in preventing the disgrace of a prize fight in that commonwealth.

Mrs. Matilda B. Carse, of Chicago, presented the "temple report," showing the progress of raising \$300,000 necessary to clear "the temple" in Chicago of that debt. Mrs. Carse reported \$108,-600 on condition that the balance be

raised by Jan. 1. A resolution was then adopted deploring the numerous outrages upon lic opinion, or to secure such legislation as would secure to the victim a greater degree of protection. Invitations were received and referred to the committee asking that the W.C.T.U hold its next convention in Los Angeles, San Francisco, Seattle, Chattanooga and Nashville.

children might not suffer from the hair was white, and her countenance "Who's this, officer?" the justice

"It's John Cleary, your honor. We've got his mother to enter complaint against him for habitual drinking. We think if he had a month at the island it would give him a chance to pull up." "You can do nothing with him yourself. Mrs. Cleary?" asked the kindly magistrate, who, used as he was to scenes of suffering, was startled by the dumb agony in the old woman's

face. for drink until last Thursday. After "I cannot, sor. It's five years since dom that she did not draw a sober breath, he took to the drink. It's not Johnny's ods. fault. There's four saloons near by. He was as good a boy as ever mother had. He's good now when he's him-

"He's mad when he's drunk," the policeman interrupted. "He tried to kill her twice."

"Sign the complaint, Mrs. Cleary," the magistrate ordered, nodding to a clerk, who laid a printed form on the table before her, saying, "Write your name on that line."

She took up the pen and then turned children's screams, she was gasping to the justice again. Her thin face was bloodless. "Sor," she said, "he's all the child I've got! I've been fightin' the devil for him for five year. If I sign that paper, I'll hev to let him go. He'll never

forgive me. He'll never come home again." "It's the only chance to save him," the officer said. 'She wrote her name. John was told

to stand up. "Now go into the witness-box," policeman directed her. "You must swear agen him." Her foot was on the step. She suddenly turned. "I can't swear agen him!

again or I shall die.' As for Capt. Burns, he took my defection with great equanimity, and was married to Miss Vesey before I was to Max.

### MRS. RORER ON POTATOES.

She Urges Her Hearers to Use Them Only Twice a Week.

To most of her hearers the opening remark of Mrs. Rorer's lecture, that potatoes were almost without nourishment and wholly indigestible, came with something of a shock. Nevertheless the fact was scientifically proved, and all persons were urged to remember that indulgence twice a week is all the average stomach ought to be called upon to endure. Various dainty and delicious methods of serving were expounded, however, and at the close of the lecture it had become harder to practice abstinence than it seemed at the start.

To make potatoes in suprise, which is both a novel and fascinating method of serving them at a luncheon, boil a sufficient number of potatoes to make one cup when mashed. Add to them half a teaspoonful of salt, one level tablespoonful of butter, one grain of pepper, the yolk of an egg, and one tablespoonful of chopped parsley. Mix thoroughly and beat smooth; make up into small round cakes about

half an inch in thickness. In the saucepan put one tablespoonful of butter and a level tablespoonful of flour. Mix both together over the fire. When smooth stir in half a cupful of cold milk and continue stirring until the boiling point is reached. Season with salt and pepper, and add one cup of shrimps. In the center of each potato cake put about a good teaspoonful of the shrimp mixture. Make up into croquets and fry quickly in oil

Serve garnished with parsley. Potatoes a la Anna, stuffed raw potatoes and potatoes baked in cream were also demonstrated and were enthusiastically received. The subject for this afternoon was desser New York World.

LADY JANET'S GHOST.

### How She Was Saved in the End by

Big Neil (London Literary World.) From a series of sketches of Strathardle by Mr. Charles Ferguson, we select the following legend: Lady Janet Gordon, by marriage

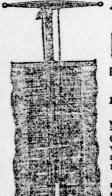

Lindsay, was condemned for the murder of her husband to perpetual im-prisonment on top of the Raven's rock, a stupendous cliff that rises above the river Ericht. Here, says the legend, every day, before touching food, she had to spin a thread long enough to reach from the prison till it touched the river." Her life was protracted till she was over 100, but even when she died the murdress could not rest. and "her ghost was seen to sit and spin, and often the keen angler, as he fished the Ericht below the Rayen's rock, was startled by seeing a shadowy thread coming slowly down till it touched the water, when it disappeared, and the fisherman knew that the lady's task was over for the day. Year after year went on, and the lady, who had in her veins a drop of the Stuart blood-royal, continued to spin until "the black day of Culloden," when the Stuart cause was lost forever, and many of the brave Strathardle lads who had escaped returned to hide in their native glen. Among others came Big Neil of the Trouts, so called from being a very expert angler. He chose as his hiding place a hole under some large boulders on the bank of the river, a little above the Rayen rock, where he kept himself and some comrades who were also hiding close by well supplied with trout. But a severe thunderstorm passed over upper Strathardle, followed by such a deluge of rain that it brought down the river in one breast of water. Neil of the Trouts lay in his den, no doubt thinking it would put the river in good fishing play, when the water poured in. When he got out the rushng torrent was so strong that it swept

him away down the stream. Just as he gave himself up for lost the eddy swept him under the rock and he saw a thin thread hanging down from the cliff, and, as a drowning man will clutch at a straw, he grasped it, and to his astonishment, it held, and he found it strong enough to bear his weight and check his onward course, and by its help he slowly drew himself to the bank. As he stepped ashore he heard a wild scream of joy overhead, and, looking up, he saw the Lady of the Rock standing on the top of the cliff with her distaff in her hand, from which hung the thread that had saved his life. Her task was done, her punishment over. She had saved the life of a gallant follower of the Stuarts, and her own royal race.

It is hardly, we presume, possible that the penal spinning of the lady of Strathardle should be a faint and faraway echo from the legend celebrated by Tennyson in "The Lady of Shalett."

### Most Crowded Spot on Earth.

The most crowded spot on the earth's surface is that portion of the dity of Valletta, Island of Malta, known as the "Manderaggio." In the whole of Valetta the proportion is 75,000 human beings to the square mile, but in the Manderaggio there is one locality in which there are 2,574 persons living on a plot of ground less than two acres and a half in extent. This would give no less than 636,000 persons to the square mile, or 1.017.6 to the acre. In Liverpool, the most crowded city in Britain, the most dense portions have only 116.4 to the acre.

# Boys and Girls.

Too Little and Too Big. Today I asked my mamma if I could whittle, Yes I did.

"Oh, no, my girlie," sald she, "you're too little," So she did. But Tom stepped so hard right on my I cried, I did.

She said, "Oh. you're too big a girl to cry out so," That's what she dia. Why can't I cry if I am little?

Or, if I'm big, why can't I whittle? ....

### Andy Burns' Experience.

"No, I don't want any chores done," snapped Miss Blinns, as she slammed her front door with such a bang that the glass candlesticks which had stood Monday." for years on either end of the mantel in her prim parlor, almost toppled just do as well as ever I can, I know I can do all the work. I got along betover. "That's the penalty I have to ter with the milking this morning, pay for living at the end of the street; didn't 1?" every straggling old tramp that walks the road between Reading and Philadelphia stops here for something or other," complained the rather elderly lady as she hurriedly went back to her write to Mr. Small, he's the minister Saturday's baking. But the last caller where we lived, and mother used to at Miss Blinns' door was not a strag-gling old tramp, but a boy of some us, for he lives right across the street 14 years, whose slight figure and dis- from us." conslate face, haunted her thoughts

as she resumed her morning work. "I might have given him the bit of wood to split, that's out in the back yard, for if old Jerry don't come by Monday I shall have to do it myself. Why didn't I think of it, but-oh, dear, I have no time to be bothered-

Her feelings were somewhat softened with the passing thought that the morning was warm, and her work lowing notice: hard, and in the midst of it all to be "Any one knowing about the where-called from the kitchen to the front abouts of Andy Burns, aged about 14 door by a wandering boy wanting a years, please tell him that his father chore or two to do, was to say the 19 dead, and to communicate with his least, vexatious. The little weary- distressed sister Katy at Port Croton, faced wayfarer had come up to the P.O."

Reading turnpike and vainly sought "I expect that would be good news Reading turnpike and vainly sought "I expect that would be good news work enough to gain him his dinner, to Andy," thought Miss Blinns to herin him, and going around to the well him, I shall make immediate inquiries for a drink of water, he had sat down about it." And acting upon the forunder the overhanging willows to mer suggestion of Andy she wrote to "Come into the kitchen, boy," she following reply:

you come from?" asked the lady rather member of my church, died early last abruptly, as she placed a generous fall, laving Katy, now in her 16th supply of bread and milk before him. year, and Andy, who is, I should "My name is Andy Burns, and my judge, about 14. They have fared hard home is up near Port Croton, west of since their mother's death, and I think,

"I run away."

Miss Blinns opened wide her eyes as she said: "Do you think that was a nice thing to do?"

"I guess you'd think so, if you was said he, turning his head, showing a large bruise on the back of it. My father struck me, and I just-

you?" interposed Miss Blinns. "Why, you see, ever since ma died, last fall, he has took to drink, and he comes home late most every night, and drunk. He's a stone mason by trade, and used to be working all the but now there's ever so many days he don't work any, and Katy, a big heapin' basket full of coal from railroad tracks. I said I brought all I could find. It was one morning after Katy had gone to Mrs. Rood's house. You see if Katy had been home, he wouldn't done it, and he locked me in the closet and didn't let me out till just time for Katy to come home. So I told her I wasn't go, she didn't see why pa should be so cross to me and beat me, 'cause she didn't think I was bad. But I she can stay here a week." and I'm going to keep looking till I find a steady job of some kind. I'll keep on as far as Philadelphia, I'll get something to do there sure; sell papers, black boots or something; some people don't think I look very strong, but I long time."

Here she is, Miss Blinns; she was awful glad to come when I told her how good you was to me; she said she thought I was dead, sure, when she didn't hear from me for such a long time." am, I'm real strong."

read and write and o real hard sums Miss Blinns had inwardly resolved to in 'rithmetic, and I don't steal nor adopt the boy and girl. With the aptell lies, and I just wish you'd give proach of cool days Miss Blinns' summe a little work for a few days. I get awful tired going from one house the school-teacher, was for the third to another, and nobody thinks I'm big winter domiciled in Miss Blinns' front of fine sand, put in a bottle; make a asked her what that was; she said enough to do much. They all say chamber. The five years that follow-their work is so hard they are sure I can't help. I just wish they'd try me once, and I haven't begged anything to eat since I've been away from home. I always say, 'Will you let me do a little work to pay for it? Ma Faid once she hoped I'd never beg for a meal if I was able to work for it." All of which talk was delivered with much animation, surveying mean-while the neat interior of the kitchen and also the generous loaves of bread and flaky pies just out of the oven. The boy's frank manner, animated face and pathetic story touched a vein of sympathy in Miss Blinns' feelings; so she told him she guessed she'd find enough to do to keep him over Sun-day, and pointed to the little pile of wood which he was to split and stack in a neat manner in the woodshed.

Miss Amanda Blinns was of an attenuated figure, and in strength, well preserved; good looks, if she ever possessed any, must have departed with her early youth. She was really a lone woman, inasmuch as she had been for more than ten years the only liv-ing representative of her family, and although a person of considerable means he preferred to open her house to a few of the city people who might desire a quiet country home for the summer month, and to bearding the school-teacher in winter. Although the was a woman whose temper easily suffered encroachment, she was not without one touch of nature which has sympathy for its characteristic, as her recent experience with little Andy proved. Besides, with her snur com-

petency, she did much in a charitable way. The duties which had devolved upon Andy to do had by Monday morning been so satisfactorily performed that he had attained quite an eminence in Miss Blinns' opinion. That very morning, "Old Jerry," as he was familiarly called in the village, and who had been for years her faithful chore man, sent her word that he was "afeared the rheumatiz had got such a hold on him, he could be no longer any help to her, and she had better look for some one else."

"Now, Andy," said Miss Blinns to the boy, as he was having his breakfast, "so far, so good, old Jerry can't do any more work for me, and I'm inclined to try you, as long as you do well by me; and to encourage you, I'll give you a little pay each week, from the first of July, that will be next

"Oh! I'm so glad, Miss Blinns. I'll

"However, I think it is my duty to learn a little more about your affairs at home," said Miss Blinns. "It's all true," quickly spoke up Andy, "what I've told you. If you'd

"Perhaps that's what I'll do."

The first of September came, and young Andy had continued in his lace with satisfaction to Miss Blinns. had promised him that with the beginning of school she would allow him to attend, and later on go to the High School at Reading. One morning while she was looking over the Reading Chronicle she came across the fol-

and now heart and spirits sank with- self on reading it. "But before I tell Miss Blinns' eyes perceived him. the Rev. Mr. Small and received the

called from the doorway, "and I'll give you something to eat."

"Thank you, ma'am," said the boy, "I am hungry. I had some dinner yesterday, but not much of anything them. The father, who had been for since; and I thought if you'd let me some time a hard drinker, was killed work some I could get my dinner," he by a passing train, at the railroad continued, as he caught a pitying crossing near his home one night about glance in Miss Blinns' eye. three weeks ago. The mother, who "What's your name, and where do was a good Christian woman and a three weeks ago. The mother, who by nature, are good and honest chil-"What is a slip of a boy like you do-dren; the boy is truthful relative to ing away in these parts?" she fur- the treatment from his father, and I rejoice that he has fallen in with some one who will show an interest in him.

"Katy is at present with us, and we find a willing, helpful girl, and I To sweeten old lard or butter jars wish something better might be in and meat crocks by filling them with the near future for her. I shall be glad to be of further service to you, if such is desired. Very respectfully, REUBEN SMALL, Pastor Methodist moved painlessly by an application of

'What had you done before he struck Church, Port Croton, Pa."

Miss Blinns placed the letter in the envelope, shoved her spectacles on top of her head, and closing her eyes leaned back in her rocking chair, as was her custom when she had any serious thinking or planning to do. She rose in a few minutes, saying she's my sister, she just has to hus- aloud that she believed the time had tle to get enough for us to eat. But come for her to do more good than she takes care of Mrs. Rood's baley she had yet done in her life. That every day, and so earns a little mon-ey. She's awful good, Katy is, she's Andy he broke in at the sentence tellgoing on 16 years old, and there's only ing of his father's death with "I'm me and her and pa. He's awful good glad," but was immediately remonto her, but he just hates me. He hit strated with by Miss Blinns, and when me on the head 'cause I didn't bring she looked up at the conclusion of the letter Andy's eyes were filled with tears at the thought of his sister Katy, there alone, and all the trouble she had passed through.

"I wish I could see Katy," he said: "pa was always cross and ugly to me, but never to her, and I suppose she misses him."

"Well, listen to this plan, Andy." going to stay home any longer. She said Miss Blinns. "Day after tomor- ing hot fruit, there will be an empty space at the top, and the fruit

"Here she is, Miss Blinns: she was

### FIRST SEWING-MACHINE

### An English Patent More Than a Hundred Years Old.

Chambers' Journal says: A London ing, stitching and making shoes, boots.

This patent, unfortunately, was taken out along with other inventions in connection with leather, and it was quite by accident that, some 80 years later, the specifications of it were dis-covered by one who had made for himself a name in connection with sewing

bility have as much as heard of Saint's machine. This is not the least curious incident in the history of the

sewing machine. In Saint's machine the features are, the overhanging arm, which is the characteristic of many modern machines; the perpendicular action of the Singer machine, the eye-pointed needle of the Howe machine, the pressure surfaces pecular to the Howe machine, and a feed system equal to that

of the most modern inventions. Whether Saint's machine was ever worked in a practical workshop or not, it was unquestionably a practical machine, constructed by one who knew pretty well what he was about and what he wanted to achieve.

Now note the date of Thomas Saint's patent, 1790, and next note the date of Aye, he stands between the Glens the invention of Bartholomy Thimon nier, of St. Etienne, who is claimed in France as the inventor of the sewing machine. In 1830 Thimonnier constructed a machine principally of wood with an arrangement of barbed needles, for stitching gloves, and in the following year he began business in Paris with a partner as an army clothier.

The firm of Thimonnier, Petit & Co. however, did not thrive, because the ouvriers thought they saw in the principal's machine an instrument destined to ruin them; much as the people viewed steam machinery in the cotton districts of England. An idea of that sort rapidly germinates heat, and Thimonnier's workshop was one day invaded by an angry mob, who smashed all the machines and compelled the inventor to seek safety in flight. Poor Thimonnier was absent from Paris for three years, but in 1834 returned with another and more perfect machine. This was so coldly received, both by employers and workmen, in the tailoring trade, that he left the capital, and, journeying down through Florence, with his machine, paid his way by exhibiting it in the

villages as a curiosity. After a few years, however, Thimonnier fell in with a capitalist who believed in him and his machine, and all promised well for the new firm, when the revolution of 1848 broke out, stopped the business and ruined both the inventor and the capitalist. Thimonnier died in 1857 in a poor house of

a broken heart. This French machine was also on the chain-stitch principle, but it was 40 years later than Saint's. In between the two came, about 1822, one Walter Hunt, of New York, who is said to have constructed a sewing machine with the lock-stitch movement. Some uncertainty surrounds this claim, and Elias Howe is the person usually credwith this important, indeed, invaluable, invention.

# Domestic Economy.

HAVE YOU LEARNED-

To check profuse bleeding from cuts by an application of powdered resin? That coal will spend better, burn more evenly, and there will be fewer clinkers, if it is sprinkled with salt? To make good buttonholes in sleazy cloth, rub the cloth before they are cut with the softened edge of a piece of glue?

To extract ink from colored goods? Dip the spots in spirits of turpentine, let lie several hours, then rub well between the hands.

To remove heat spots from varnished furniture? Rub them with a soft cloth dipped in spirits of camphor, then with sweet oil.

very hot lime water, and leaving them until it is cold? That a porous plaster can be re-

alcohol? Alcohol also aids greatly in removing traces of it from the skin. How to secure a smooth and durable darn in woollen stockings? Make the first layer of stout coarse thread, and the cross-layers of woollen yarn, How to protect the heels of stockings? Cut a piece of chamois skin or soft leather to fit, bind the edges with tape, hold in place over the stocking with elastic ribbon.

That wheat flour is altogether the best thing to extinguish a blaze caused by the igniting of coal oil? It is always on hand, can be used freely, leaving neither spot nor stain.

To sweeten musty tainted earthenware or fruit cans by leaving them a few days filled with dry earth? In mold has extended over the outside, in addition bury them in the earth for a week.

That if cans containing hot fruit are opened after they have stood five minwill not mold?

When washing glassware not to put it in hot water bottom first, as it will was bound I'd go, so one morning, after a week.

The appointed day came, and late in the afternoon Andy and Katy appeared at the kitchen door.

It is about two weeks ago, peared at the kitchen door.

It is the water bottom first, as it will be liable to crack from sudden expansion? Even delicate class can be safely washed in very hot water if safely washed in very hot water if slipped in edgewise?

To prevent paint-brushes from shedding bristles? When new, turn handle down, open and spread the bristles. pour in a tablespoonful or less of good varnish, and keep the brush in the same position until it dries.

To stop leaks in stone jars, iron kettles, to fasten lamp tops to standards. and to fill seams in milk pans, by using a cement of litharge and glycerine, the consistency of putty? It resists the action of almost any degree of heat, hardens in a few hours and is harmless.

To sow small seeds thinly and evenhole through the cork with a gimlet and insert a goose quill. The faster effective, and since then have used it Burns into their new home proved the bottle is moved the thinner the in every case of erysipelas on any part seed will be sown. Rough seeds should of the body. My first treatment is be rubbed with the sand and ashes the external application of honey. I small seeds, like lettuce.

### .... HEALTHFUL INFLUENCE OF TREES

Forests have an important hygienic influence. In warm countries, when a pole?"

by him to show that a forest constitutes an important barrier against the approach of epidemics and infectious disease.-The Literary Digest, from Cosmos.

A NEW TREATMENT FOR FEVER. A new curative treatment has been discovered by a Transvaal doctor. Having noted the fact that milk absorbs poisonous germs from a bucket, he decided that it night be possible to turn this germ-absorbing power to a therapeutic account. He put his ideas to the test, and now asserts that he has cured persons of smallpox, fever. diphtheria and other maladies by simply wrapping them in milk sheets. The patient is laid on a mattress covered with blankets, and is packed in a sheet just large enough to envelop the body. This sheet has first been saturated in a pint and a half of warm milk, and is applied to the body without wringing. After this treatment, which lasts about an hour, the patient is sponged with warm water or is put into a warm bath.-Medical Press and Circular.

INSECTS AND CONTAGION. It is generally understood that the stings of some insects are especially poisonous in a greater or less degree, you? and must, therefore, be early and carefully treated. Pain alone in such cases will suffice for a danger signal, and few when thus warned would care the neglect the puncture made by a hornet, a wasp or even a bee. The fact that other insects, like some species of fly, are capable of equal or down and eat it. even greater mischief, is not so commonly known as it ought to be. The recent death of a woman in Kingston from septic crysipelas thus caused may fourth time our little boy has been be quoted in illustration. In accounting for such occurrences two points up he will be a second Shakespeare. are specially noteworthy-namely the condition of health in the person at-tacked, and the previous habitat of the assailant. In no case probably is it possible to define exactly the influence exercised by each of these con- for ladies in fashionable styles out of tributing factors. This much we know, however, that no matter how trivial or how great the effect of the conveyed poison, it is much enhanced by all conditions of weakness or blood impurity existing in the sufferer. A mere midge or knat bite in one person will prove almost as serious in its effect as a septic wound in another. There are in the system all the materials for a conflagration, and a spark may light it up as well as a firebrand. The habits of insects afford a ciue to the seeming vagary of their occasional or accidental virulence. The sting of the mandibles, which perhaps were buried an hour previously in some putrid sore, excreta or offal, cannot penetrate a living tissue without leaving in it something of the same putrid character. It is safer, therefore, for the medical practitioner to regard each and every injury of this kind, however slight, as a possible source of illness, and at once contrive its relief by poulticing, antiseptic compres-es or like means. For prevention we can suggest no better safeguard than some form of antiseptic veil, to be worn after the manner suggested in

### TO AVOID THE DANGERS OF CYCLING.

the Lancet of Aug. 6, 1892.

The dangers of cycling may be avoided in great measure, says Dr. George Hershell, by: 1. The use of ther's face, like marble-carved a low gear. 2. The upright position Grief,
Had placid brows laid whitely o'er with point position prewith point with point position prevents proper expansion of the lungs, and interferes with the proper earation of the blood. 3. Adequate food And eyes like violets long drenched muscle poisons, such as beef tea—the digestive power of the stomach is inwhen riding and the avoidance of Then spake the fair, sweet one, and of kola and cocoa preparations; these, by benumbing the sense of fatigue, hibited when riding. 4. The avoidance cause more work to be done than is judicious. 5. On no account should the cyclist continue riding after he has commenced to feel short of breath or when there is the slightest sensation of uneasiness in the chest.-Medical Record.

.... WATER-BORNE CHOLERA. In the annual report of the Chemical Examiner and Bacteriologist to the Government of India for 1894, The angel's radiant face smiled swift Dr. Hankin refers to a remarkable instance of exemption of one company in a regiment suffering from cholera. Within his brother's hand he placed The East Lancaster Regiment consisted of Companies A, C, E, F, G, H. When the choiera broke out in the cantonments the regiment was transchoosing Life, didst fail to ferred to the Kokrail cholera camp. Throughout the epidemic the E com-pany remained immune from attack, though the conditions of life were Laura Spencer Porter, in Harper's identical with those of other companies, and their barracks were almost surrounded by those of companies who suffered severely from cholera. At first no possible explanation of this escape of one company could be found. "On cross examination the color sergeant of this company," says Dr. Han-kin, "the mystery at first seemed to deepen, for he roundly asserted that the men of his company had exactly the same supplies of food and water as the men of other companies. But on his being pressed as to how he knew that the water supply was the same as that of the other companies he replied that he ought to know if anybody, as he boiled it himself! It is needless to say that on making inquiries we found that this sanitary precaution had not been taken by the color sergeants of other companies."

> NOVEL CURE FOR HEADACHE. An apostle of physical culture says that an excellent and never-failing ple act of walking backward. Ten minutes is as long as is usually necessary to promenade. It sometimes. however, requires more than ten minutes to walk at all, if one is very "nervous." But it is not understood that it is necessary to walk a chalk line. Any kind of walking will do, provided it is backward. It is well to get in a long, narrow room, where the windows are high, and walk very slowly, placing first the ball of the foot on the floor, and then the heel. Besides curing headache, this exercise promotes a graceful carriage. A halfhour's walk backward every day will do wonders toward producing a grace-

to my patients. \*\*\* Little Betty was at her first evening entertainment, where everybody was strange to her. She grew homesick, and with tears in her eyes begged her hostess to send her home. As she was starting a smile shone through her tears, and she said:
"Good-bye, Mrs. Smif. Mamma told

me to be sure and tell you I had a nice time. Mrs. Newriche (patronizingly)-Were any of your ancestors men of note, Mr.

Mr. Cynic-Yes, madam, I should say so. One of them was the most famous admiral of his day, and commanded the allied forces of the world. Mrs. Newriche (with altered tone of deep respect)-Is it possible, Mr. Cynic? And what was his name? Mr. Cynic-Noah, madam.

\* \* \* \* A tourist had arrived unannounced at a crowded village inn. It was already late in the evening, and there was no spare bed. The traveler grew impatient.

"Haven't you at least a bundle of hay you can give me?" he demanded of the landlady. That worthy was also getting impa-"There isn't a thing left," she ans-

wered, "except a bit of cold roast beef." \* \* \* \* Mistress-Biddy,run and fetch me the plum tart out of the pantry. Biddy (returning)-Please, ma'am, it isn't there.

Mistress-Perhaps it is on the sideboard in the dining-room. Biddy-I can't find it. Mistress-Then it must be in the cel-

Biddy-I don't see it, ma'm. Mistress-Then most likely you have Biddy-Yes, ma'am.

### DR. LIVINGSTONE'S TREE.

### Still Standing in the African Forest With His Inscription.

Reuter's Agency has received communication of an interesting letter, the last written by the American explorer Glave, news of whose death on the Congo was received in June last. Mr. Glave writes: "I traveled to Ilala over a route to the north of that taken by Joseph Thomson. While in Ilala I made an interesting discovery, having un-earthed the veritable tree under which was placed the heart of Dr.Livingstone. Joseph Thomson's trusted follower who visited, or who was supposed to have visited, the place was an ingenious raseal, for he brought back a piece of the bark which bore some of the lettering deeply cut into it. I don't suggest at all where the treasured bark could have come from, but certainly not from the sacred tree, for on that the bark has been carefully pared off for a space of about two and a half feet square, and the following inscription has been cut

There are few men who would dispute a statement made by John C. the "pious monks of St. Bernard," Level, one of the owners of the Tower which are supposed to have a sort of Hotel at Niagara Falls and the owner monopoly of the accomplishment of of the Reservation carriage line. Mr. serving the wounded and helpless, and Level usually tells his tales in a way calling assistance for them. But the Level usually tells his tales in a way to carry conviction with them, and German military have trained dogs to his late experience in Canada is one search out and attend the wounded, that will doubtless interest every one and call human assistance. interested in ornithology. John was Everyone has heard of the dogs of serious as he recited the tale to a the "pious monks of St. Bernard," party of Buffalonians at the Tower which are supposed to have a sort of Hotel several evenings ago. He said monopoly of the accomplishment of serving the would like to have had with him convenience to have a sort of monopoly of the accomplishment of serving the wounded and helpless, and him some one interested in birds when calling assistance for them. But the nearly all the difficult peaks of the his attention was taken with the action of a lot of crows.

As is his custom, Mr. Level went and call human assistance. through the Canadian peninsula on one These dogs of the ambulance corps of his periodical trips, and, as his are trained to divided duties. Some of horse was cantering along easily toward the falls, he was surprised to or restoratives, simply sit and bark or bay near the body of a failen man. over his buggy. He was astonished to Others have been trained to go in find that it was a flock of crows. Some search of assistance and guide to the of them flew so close to the ground spot a soldier of the ambulance corps. as to cause them to swerve from his buggy in order to avoid a collision.

The trained dog performed all these functions very skilfully at the recent "I was so much taken up with the trial near Dresden. It is plain that actions of the crows, said Mr. Level, the German army, if it should be en-

"that I reined up the horse for the purpose of finding out the cause of the congregation of crows. To my surprise the crows alighted in a large onen field, where one of them alighted open field, where one of them alighted on a knoll. He was soon surrounded by several of the others, and was apparently holding court. Before him stood a dejected-looking crow, with head bowed, and it appeared that there was some sort of a trial going on. of a bevy of English sparrows, I found There was a chattering, and, apparevery one of the crows in the party took up the refrain, as in a few moments one could hardly hear his voice with the noise made.

"It ceased as suddenly a sit began, lit all over the poor horse, nipping and pecking at such a rate that there and one of the birds seemed to address itself to the one which held court on the knoll. When it finished it seemed as though all the flock were saying something. Two of the members of the party had a struggle with the one which appeared to be under arrest, and in a few minutes the entire flock flew away. When the flock started I noticed that one of the birds, the one which appeared to be on trial, was still on the ground. Afthe rest of them had flown he raised himself, and, in a wabbly way, followed them, staying in their rear and lower than the rest of the birds. "I have an idea that the crow did something wrong, and that the trial out of reach of the pests, some of the was had in the open field, where little fellows chasing him the whole three of the wing feathers were taken from the bird as punishment, and he was ordered to follow in the wake of the flock. In order to find what had been done with the bird as punishment I went into the field where the contest had been had, and there found three wing feathers which had apparcked from the criminal."-Buffalo Express.

"I had a horse," said an old army able to move, and half hidden in the

man, "that had once belonged to the Seventh Cavalry, but he had the 'I. Seventh under his mane, so he was C.' brand under his mane, so he was his being trod upon, and were now out of the service, inspected and con- trying in some way to assist him to demands. He was a regular old plug, rise. This he was unable to do, howbut he was all I could get to go hunting on, so I took him. I rode away picked him up and put him on a little out into the plains from the fort, and shelf in my rose arbor, and there his I saw a bunch of antelope finally. I little friends seem to be taking the got off the horse and dropped the reins on the ground, expecting the horse to take turns in staying with him and to stand there till I came back, I start- keeping him company, while the others ed off toward the antelope, and was continue to forage, coming now and sneaking along to get a good shot then with choice bits for the little inwhen I looked round, and I'll be blamed valid. if that brute of a horse hadn't started off as tight as he could lope.
"'Well,' says I, 'I guess I'm in for a

six-mile tramp home,' I cursed that horse to myself for a while, and then I went on. Pretty soon I looked up, sun for the sake of a quarter of an and I'm blessed if there wasn't that hour of surf-bathing, which was dehorse over the other side of that bunch of antelope, 'Well, now,' says I, 'I'd like to know what the — that horse thinks he is up to, anyhow.' Pretty soon he began to circle around on the other side, and the antelope saw him and started off toward me. I caught on at once and I laid down and waited. That old horse cut up the most surprising antics out there, and all the while he kept working those antelopes By and by they got in toward me. range and I got two; darned good luck it was, too. You see, that old horse was an Indian hunting pony, and he had been trained to do that way. Well, I went back to the post, and every-body wanted to know how it happened I had such good luck. But I didn't

"A few days later I took that same horse out after prairie chickens. was a time of the year when the chickens were flying and I was riding along, when all of a sudden the critter stopped short, braced himself up and waited-for what I didn't know. But in a second a couple of chickens flew up ahead of me, and I was so surprised didn't shoot. 'Well,' I says, 'I'll be switched. Here's a horse that's not mly a hunting horse, but is a regular pointer dog, too.' And he was. I got ny gun ready, and the next time he stopped I was right on hand and dropjed a bird. Well, no sooner did that horse see that bird fall than he galoped off right to where he fell, and all I had to do was to reach off and sick it up. He was a great horse, I and then whirl about and see us all tell you, and I got lots of good huntng with him."

### DOG-SOLDIERS.

The use of dogs for military purposes has proved so successful in Germany that the dog-soldier is continually being taught new things. Near and worked his head and shoulders and Dresden recently there was a test of every muscle in his whole body as skill on the part of army dogs which though he were fighting his way was a great revelation of their ac- through a mob of men. complishments.

Two companies, of soldiers separated by a distance of a mile and a quarter, of them supposed to be an out- looked as though it were increasing at post in the face of an enemy, com-municated for some time by the aid of dogs trained to go back and forth. would sit on the wharf in front of the Each time the distance between the two companies was traversed by the dogs in less than two minutes, in spite and marking their passage with a of intense heat and a great deal of trail of fire, or we would heave a log

### About People.

Oliver Cromwell was married in the Church of St. Giles, Cripplegate, London, in 1620, a fact which has recently been commemorated by a tablet placed in the church.

Johann Szathmary and his wife, of zsombolga, Hungary, have actually celebrated the centenary of their marriage. The wife is 116 years of age, and her husband one year older.

The King of Siam has a bodyguard of female warriors, says the Newry Telegraph, which is composed of 400 girls chosen from among the strongest and most handsome of all the ladies Everyone has heard of the dogs of in the land.

One of Stevenson's heroes was the Duke of Wellington. The Scotch novelist liked to remark that the best thing Brown, the principal of the Free Kirk ever said of Wellington was this: "He did his duty as naturally as a horse eats oats."

It may not be generally known that the Rev. Hugh Price Hughes, the great pulpit orator of the Wesleyan Methodtaineer. German military have trained dogs to Alps.

The poet Swinburne is 58 years old and in the prime of physical condition. He is an impressive figure. He is scarcely five feet in height, his face is ghastly pale, and his head, which is large in proportion to his pody, is covered with a thick shock of uncombed hair.

The Prime Minister or Japan is now the Marquis Ito, instead of Count Ito. This distinction has been conferred upof his great services during the recent them to those who will look after them. the recent commander-in-chief of the Japanese forces, and now Secretary of War, has also been made a marquis.

The New York Tribune says that "Monsignor Capel, the well-known Roman Catholic ecclesiastic, became a ranchman in California a few years ago, and is said to be very wealthy. Formerly the pink of perfection in dress, he has now become indifferent to his garb, and always appears in the little fellows making a most violent the rough costume of a ranchman. He attack upon a horse that was nipping grass just beyond my window. I don't London, and is supposed to be the original of Catesby, in Disraell's "Lothair."

Sir John Lubbock, the well known English scientist, statesman and essayist, has recently made some studies of the elementary habits of spiders. Selected specimens were weighed be fore and after they had enjoyed a full meal, and the result was the assurance that if a man were to absorb the quantity of food, proportionate to his little tormentors were too much for him, and I do not think he succeeded weight, consumed by a spider, he would devour four barrels of fish, a dozen hogs, thirteen sheep, and two They would light and nip and be whole oxen.

A great number of people were not aware that the Queen had a sister until the recent announcement that the minutes before the horse finally gave young Princess of Coburg-Edinburgh was going to marry the grandson of out of reach of the bests, some of the little fellows chasing him the whole length of the block. What it could all but when the horse was well out of Her eldest daughter, the little Princess the way the birds flew to the ground Feodore, was brought up for some in a great heap, chattering and chirpin a great heap, chattering and chirp-ing as busily as ever, so I went out to sister, Princess Victoria, and a tender the last day of Princess Feodore's life, ever, the birds were so thick and eager, which the Queen published for private but at last I found a poor little cripcirculation after her Royal Highness' death. The young man who is to marry the Princess Alexandra of Edinburgh is the grandson of the Princess Feqdore.

With regard to Madame Patti's recent exhibition of her powers as a singer of Wagner's music, I have found, says the Daily Chronicle, an interesting statement made by the prima through without a breakdown. All the donna thirteen years ago. Madame Patti was asked which was her favorite opera, to which she replied, "One that I have never sung in in publicbeautiful and ideal character in on the list. "Then you admire Wagner?" 'More than any other composer., I am afraid to sing his music in public for fear of injuring my voice. But I have sung over his music at home, to my own intense enjoyment, many, many Every afternoon we all tramped a times" Madame Patti was then askmile or two up the beach in the lot ed, 'Will you never sing Wagner's music in public?" She replied, "I have reserved it, especially Elsa, for the last season of my operatic career. Then I shall not be afraid of injuring my voice, and I can sing his beautiful music as I would wish to. It seems A constant current is passed through lightful in itself, and which was rendered especially interesting by our having to share the surf with large man-eating sharks. When they came, to me most fitting to close my career which they were sure to do ten minwith what I consider the greatest utes after we had arrived, we generalmusic ever written." The phonograph men and our party

DR. DODS, of Haddington, who is at present on a trip to southern seas, has been visiting the grave of Robert Louis Stevenson at Samoa. In a letter which has just been received by the Westminster Gazette, the doctor says all Mr. Stevenson's people have gone from the island, but the house is there as the novelist left it, with all "I saw his old felt his books, etc. wide-awake and a riding whip hanging on a peg. Dr. Dods says: 'I climbed up to his grave one day. There is a space about twenty feet wide cleared through the forest straight up to the top, but the ground is so fearfully steep that they had to cut a zig-zag path all the way up. Even with that it is an awful climb with the thermometer at 90 degrees. I took off my coat and waistcoat, but I was drenched when I got to the top. There is a place about 30 feet square cleared of bush. In the middle is the grave, a simple mound of red volcanic soil. There is a small white cross at the head, and lying on the grave was an anchor made of what I took to be witherer heather, probably sent from Scotland. It looks a lonely spot, and through the trees you can see the blue sea and the white line of the coral reef, which seem to add to the loneli-

### Confusing Names.

ding a few days in Ireland, joining the house party of the Duke and Duck. the house party of the Duke and Duchess of St. Albans, whose daughter, Lady Catherine Beaucierk, her son is engaged to. Names are apt to be a little confusing. Lady Henry Somerset's own father's name was Earl Somers, nothing to do with the Somerset family. There are besides a Duke and Duchess of Somerset, but their family name is Seymour; and though there is a Duke of Beaufort, the great house known by that name, Beaufort Castle, is not his, but Lord Lovat's place in Inverness. To add to this the name of Mr. Somerset's fiancee is Beauclerk, of course, nothing to do with Beaufort. Henry's son will be made by the mar-riage that is announced of his uncle, the Marquis of Worcester. This gentle-man, as the eldest son of the Duke of Marx will be regarded not as agitators, but as thinkers of the first rank, who have their dangers in common with other philosophers.

MOSES may have easily written the Pentateuch and the Israelites of his days may have read and understood it.

man, as the eldest son of the Duke of Beaufort, stands before Mr. Somerset in the heirship to the dukedom; and austrian subjects. With all other diplomates French is always spoken. But in intercourse with the Danish royal family German is nearly always the language spoken.—Westminster Gazentee.

### An English Market-Day Dinner.

In England a distinction is made between a "village" and a "town," the dignity of town being applied only to those places which are large enough to French army in Tunis. The statuette support a weekly market in the public square, to which the farmers of the surrounding country bring for sale and barter their butter, eggs and other

On market day the leading public houses make a point of providing a special dinner, at a fair price, for the more well-to-do attendants upon the market-the gentlemen farmers, as favorite houses.

I happened to be in Stamford, in Lincolnshire, on market-day, recently, and improved the opportunity to attend the market dinner at "The Crown," one of the best public houses there. The dinner is spread in a long dining-room, furnished in a thoroughly home-like manner, quite unlike a hotel realize after one has sat down to the table that one is not a guest at a

Long experience has taught the landlord to estimate very nearly the number for whom the table should be laid, and just as the company sit down, the at the Crown. The landlord sat at the head of the table, and an experienced friend took, by his request, the

seat at the foot. The first course consisted of two kinds of fish, brought on in large dishes, and placed one at each end of the table to be served. I have forgotten what one of these was, but the other was stewed eels, served in cream, which in spite of the name proved to be one of the most delicious dishes I ever ate. After these were removed the solid part of the meal, the roasts and vegetables were brought on.

The chief of these, an enormous roast of beef, was placed before the landlord; the next, a crispy browned leg of mutton, at the opposite end of the table. In addition to these there were living memory.

EXPERIMENTS in crossing rivers boiled fowl, calf's head and brains, etc.

These were placed at various intervals along the table, and the man before whom one happened to be place was expected to serve it. I watched with some anxiety to see that none came to me, for my poor skill at carving would have disgraced me beside such work as I saw going on around

The pastry which followed this course was a deep gooseberry pie, very different from our American ideas of pie, and a rhubarb custard, also a new dish to me. This dish consists of a rich, thick, baked custard and stewed rhubarb, cooked separately and served together, wit ha sweet sauce.

The dessert, which closed the meal, was a simple one of bread and cheese and watercress. Noticeable among the cheese was delicious, fresh cream cheese, which would literally melt in one's mouth.

The price for all this was half a crown, about 62 cents of our money, and while the maids were bringing on the dessert, the "Boots" of the estabtors, and a lawyer, which pronounced him innocent, the doctors voting down passed a plate, into which each guest dropped the pay for his meal, whole being so quietly done that it hardly detracted at all fro mthe homelike nature of the meal.

One thing which impressed me particularly-and that I repeatedly remarked all over England—was the superb physique of the men who sat about the table. They were all tall and solid in form, and though many of them were no longer young, their fresh complexions, clear eyes and firm voices showed that their vitality was

in no way impaired. Nor was this in any way a picked ecmpany, though the men were of a superior class, and accustomed to openair life. They had merely happened to come together, but I am convinced that no company of the same number in America, gathered under similar circumstances, would equal them physically.

Another thing which I could not but notice was the beautiful courtesy shown me as a stranger by every man who sat anywhere near me, although there was only one of them whom had ever seen before Before any one of them was served, pains was taken to see that my plate was heaped up, and if there was any special dish brought on which I, in my ignorance of English cookery, might not notice, care was taken to see that my attention was called to it. More strange, though, than any other

feature of the meal to one accustomed only to American hotel dinners, was the grace. After we were all seated, at a signal from the landlord, every head but mine-for I was taken too much by surprise-was bowed, and every voice but mine joined reverently in a few words of petition to bless the

Again, after the dessert had been thordiscussed, but before anyone oughly had left the table, there came a like signal, a hush in the conversation, and with the same reverent manner a few words of thanks were said. Then those

This simple service was so old a custom, so much a part of the meal. I do not think any one supposed that I noticed it, or suspected that it had been to me one of the most striking features of a dinner all of which had been delightfully novel .- Youth's Companion.

Languages the Queen Speaks. The Queen speaks English to Prince

Henry of Battenberg, and even to the Grand Duke of Hesse and the Duchess of Coburg-Gotha, and the Prince of Wales writes almost always in English to his mother and to his other is only spoken in conversation with German and Austrian ambassadors,
